

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

K

KABZEE'L (קַבְצְאֵל: Βασελεήλ, Καβσεήλ, Καβσαήλ; Alex. Καστεήλ: *Cabseel, Capsael*), one of the "cities" of the tribe of Judah; the first named in the enumeration of those next Edom, and apparently the farthest south (Josh. xv. 21). Taken as Hebrew, the word signifies "collected by God," and may be compared with JOKTHEEL, the name bestowed by the Jews on an Edomite city. Kabseel is memorable as the native place of the great hero BENAIAH-ben-Jehoiada, in connexion with whom it is twice mentioned (2 Sam. xxiii. 20; 1 Chr. xi. 22). After the captivity it was reinhabited by the Jews, and appears as JEKABZEEL.

It is twice mentioned in the Onomasticon—as Καβσεήλ and *Capseel*; the first time by Eusebius only, and apparently confounded with Carmel, unless the conjecture of Le Clerc in his notes on the passage be accepted, which would identify it with the site of Elijah's sleep and vision, between Beersheba and Horeb. No trace of it appears to have been discovered in modern times. [G.]

KA'DESH, KA'DESH BAR'NEA (קָדֵשׁ, קָדֵשׁ בַּרְנֵעַ: Κάδης, Κάδης Βαρνή, Κάδης τοῦ Βαρνή). This place, the scene of Miriam's death, was the farthest point to which the Israelites reached in their direct road to Canaan; it was also that whence the spies were sent, and where, on their return, the people broke out into murmuring, upon which their strictly penal term of wandering began (Num. xiii. 3, 26, xiv. 29-33, xx. 1; Deut. ii. 14). It is probable that the term "Kadesh," though applied to signify a "city," yet had also a wider application to a region, in which Kadesh-Meribah certainly, and Kadesh-Barnea probably, indicates a precise spot. Thus Kadesh appears as a limit eastward of the same tract which was limited westward by Shur (Gen. xx. 1). Shur is possibly the same as Shor, "which is before Egypt" (xxv. 18; Josh. xiii. 3; Jer. ii. 18), and was the first portion of the wilderness on which the people emerged from the passage of the Red Sea. [SHUR.] "Between Kadesh and Bered" is another indication of the site of Kadesh as an eastern limit (Gen. xvi. 14), for the point so fixed is "the fountain on the way to Shur" v. 7), and the range of limits is narrowed by selecting the western one not so far to the west, while the eastern one, Kadesh, is unchanged. Again, we have Kadesh as the point to which the army of

Chedorlaomer "returned"—a word which does not imply that they had previously visited it, but that it lay in the direction, as viewed from Mount Seir and Paran mentioned next before it, which was that of the point from which Chedorlaomer had come, viz. the North. Chedorlaomer, it seems, coming down by the eastern shore of the Dead Sea smote the Zuzims (Ammon, Gen. xiv. 5; Deut. ii. 20), and the Emims (Moab, Deut. ii. 11), and the Horites in Mount Seir, to the south of that sea, unto "El-Paran that is by the wilderness." He drove these Horites over the Arabah into the *Et-Tih* region. Then "returned," *i. e.* went northward to Kadesh and Hazazon Tamar, or Engedi (comp. Gen. xiv. 7; 2 Chr. xx. 2). In Gen. xiv. 7 Kadesh is identified with En-Mishpat, the "fountain of judgment," and is connected with Tamar, or Hazazon Tamar, just as we find these two in the comparatively late book of Ezekiel, as designed to mark the southern border of Judah, drawn through them and terminating seaward at the "River to," or "toward the Great Sea." Precisely thus stands Kadesh-Barnea in the books of Numbers and Joshua (comp. Ezek. xlvii. 19, xlviii. 28; Num. xxxiv. 4; Josh. xv. 3). Unless then we are prepared to make a double Kadesh for the book of Genesis, it seems idle with Reland (*Palestina*, p. 114-7) to distinguish the "En-Mishpat, which is Kadesh," from that to which the spies returned. For there is an identity about all the connexions of the two, which, if not conclusive, will compel us to abandon all possible inquiries. This holds especially as regards Paran and Tamar, and in respect of its being the eastern limit of a region, and also of being the first point of importance found by Chedorlaomer on passing round the southern extremity of the Dead Sea. In a strikingly similar manner we have the limits of a route, apparently a well-known one at the time, indicated by three points, Horeb, Mount Seir, Kadesh-Barnea, in Deut. i. 2, the distance between the extremes being fixed at "11 days' journey," or about 165 miles, allowing 15 miles to an average day's journey. This is one element for determining the site of Kadesh, assuming of course the position of Horeb ascertained. The name of the place to which the spies returned is "Kadesh" simply, in Num. xiii. 26, and is there closely connected with the "wilderness of Paran;" yet the "wilderness of Zin" stands in near conjunction, as the point whence the "search" of the spies commenced (ver. 21). Again, in Num. xxxii. 8, we find that it was

from Kadesh-Barnea that the mission of the spies commenced, and in the rehearsed narrative of the same event in Deut. i. 19, and ix. 23, the name "Barnea" is also added. Thus far there seems no reasonable doubt of the identity of this Kadesh with that of Genesis. Again, in Num. xx., we find the people encamped in Kadesh after reaching the wilderness of Zin. For the question whether this was a second visit (supposing the Kadesh identical with that of the spies), or a continued occupancy, see WILDERNESS OF WANDERING. The mention of the "wilderness of Zin" is in favour of the identity of this place with that of Num. xiii. The reasons which seem to have fostered a contrary opinion are the absence of water (ver. 2) and the position assigned—"in the uttermost of" the "border" of Edom. Yet the murmuring seems to have arisen, or to have been more intense on account of their having encamped there in the expectation of finding water; which affords again a presumption of identity. Further, "the wilderness of Zin along by the coast of Edom" (Num. xxxiv. 3; Josh. xv.) destroys any presumption to the contrary arising from that position. Jerome clearly knows of but one and the same Kadesh—"where Moses smote the rock," where "Miriam's monument," he says, "was still shown, and where Chedorlaomer smote the rulers of Amalek." It is true Jerome gives a distinct article on Κάδης, ἔνθα ἡ πηγὴ τῆς κρίσεως, *i.e.* En-mishpat,[a] but only perhaps in order to record the fountain as a distinct local fact. The apparent ambiguity of the position, first, in the wilderness of Paran, or in Paran; and secondly in that of Zin, is no real increase to the difficulty. For whether these tracts were contiguous, and Kadesh on their common border, or ran into each other, and embraced a common territory, to which the name "Kadesh," in an extended sense, might be given, is comparatively unimportant. It may, however, be observed, that the wilderness of Paran commences, Num. x. 12, where that of Sinai ends, and that it extends to the point, whence in ch. xiii. the spies set out, though the only positive identification of Kadesh with it is that in xiii. 26, when on their return to rejoin Moses they come "to the wilderness of Paran, to Kadesh." PARAN then was evidently the general name of the great tract south of Palestine, commencing soon after Sinai, as the people advanced northwards,—that perhaps now known as the desert *Et-Tîh*. Hence, when the spies are returning *southwards* they return to Kadesh, viewed as in the wilderness of Paran; though, in the same chapter, when starting northwards on their journey, they commence from that of Zin. It seems almost to follow that the wilderness of Zin must have overlapped that of Paran on the north side; or must, if they were parallel and lay respectively east and west, have had a further extension northwards than this latter. In the designation of the southern border of the Israelites also, it is observable that the wilderness of Zin is mentioned as a limit, but nowhere that of Paran[b] (Num. xxxiv. 3; Josh. xv. 1), unless the dwelling of Ishmael "in the wilderness of Paran" (Gen. xxi. 21) indicates that, on the western portion of the southern border, which the *story* of Hagar indicates as his dwelling-place, the Paran nomenclature prevailed.

If it be allowed, in the dearth of positive testimony, to follow great natural boundaries in suggesting an answer to the question of the situation of these adjacent or perhaps overlapping wildernesses, it will be seen, on reference to Kiepert's map (in Robinson, vol. i.; see also Russegger's map of the same region), that the Arabah itself and the plateau westward of it are, when we leave out the commonly so-called Sinaitic peninsula (here considered as corresponding in its wider or northerly portion to "the wilderness of Sinai"), the two parts of the whole region most strongly partitioned off from and contrasted with one another. On this western plateau is indeed superimposed another, no less clearly marked out, to judge from the map, as distinct from the former as this from the Arabah; but this higher ground, it will be further seen, probably corresponds with "the mountain of the Amorites." The Arabah, and its limiting barrier of high ground[c] on the western side, differ by about 400 or 500 feet in elevation at the part where Robinson, advancing from Petra towards Hebron, ascended that barrier by the pass *el Khŭrâr*. At the N.W. angle of the Arabah the regularity of this barrier is much broken by the great wadys which converge thither; but from its edge at *el Khŭrâr* the great floor stretches westward, with no great interruption of elevation, if we omit the superimposed plateau, to the Egyptian frontier, and northward to Rhinocolura and Gaza. Speaking of it apparently from the point of view at *el Khŭrâr*, Robinson (ii. 586-7) says it is "not exactly a table-land, but a higher tract of country, forming the first of the several steps or offsets into which the ascent of the mountains in this part is divided." It is now known as the wilderness *Et-Tîh*. A general description of it occurs in Robinson (i. 261-2), together with a mention of the several travellers who had then previously visited it: its configuration is given, *ib.* 294. If this *Et-Tîh* region represent the wilderness of Paran, then the Arabah itself, including all the low ground at the southern and south-western extremity of the Dead Sea, may stand for the wilderness of Zin. The superimposed plateau has an eastern border converging, towards the north, with that of the general elevated tract on which it stands, *i. e.* with the western barrier aforesaid of the Arabah, but losing towards its higher or northern extremity its elevation and prominence, in proportion as the general tract on which it stands appears to rise, till, near the S.W. curve of the

[a] Another short article of Jerome's, apparently referred to by Stanley (*S. & P.* 93 note), as relating likewise to En-mishpat, should seem to mean something wholly different, viz., the well of Isaac and Abimelech in Gerar: φρέαρ κρίσεως εἰς ὅτι νῦν ἐστι κώμη Βήρσαν (*puteus judicii*) καλουμένη ἐν τῇ Γεραρίτῃ.

[b] There is a remarkable interpolation in the LXX., or (as seems less probable) omission in the present Heb. text of Num. xxxiii. 36, where, in following the various stages of the march, we find respectively as follows:—

HEBREW.

וַיִּסְעוּ מִמִּדְבַּר צִן וַיַּחֲנוּ בְּמַתְקָה׃
צִן הִוא קָדֵשׁ

GREEK.

καὶ ἀπῆραν ἐκ Γεσιὼν Γάβερ καὶ παρενέβαλον ἐν τῇ ἐρήμῳ Σὶν, καὶ ἀπῆραν ἐκ τῆς ἐρήμου Σὶν, καὶ παρενέβαλον εἰς τὸν ἅρμον Φάραν· αὐτή ἐστι Κάδης.

The LXX. would make them approach the wilderness of Sin first, and that of Paran secondly, thus reversing the effect of the above observations.

[c] Called, at least throughout a portion of its course, *Jebel el Beydâ*.

Dead Sea, the higher plateau and the general tract appear to blend. The convergency in question arises from the general tract having, on its eastern side, *i. e.* where it is to the Arabah a western limit, a barrier running more nearly N. and S. than that of the superimposed plateau, which runs about E.N.E. and W.S.W. This highest of the two steps on which this terrace stands is described by Williams (*Holy City*, i. 463-4), who approached it from Hebron—the opposite direction to that in which Robinson, mounting towards Hebron by the higher pass *Es-Sûfâh*,[d] came upon it—as "a gigantic natural rampart of lofty mountains, which we could distinctly trace for many miles[e] E. and W. of the spot on which we stood, whose precipitous promontories of naked rock, forming as it were bastions of Cyclopean architecture, jutted forth in irregular masses from the mountain-barrier into the southern wilderness, a confused chaos of chalk."[f] Below the traveller lay the *Wady Murreh*, running into that called *El-Fikreh*, identifying the spot with that described by Robinson (ii. 587) as "a formidable barrier supporting a third plateau" (reckoning apparently the Arabah as one), rising on the other, *i. e.* northern side of the *Wady el-Fikreh*. But the southern face of this highest plateau is a still more strongly defined wall of mountains. The Israelites must probably have faced it, or wandered along it, at some period of their advance from the wilderness of Sinai to the more northern desert of Paran. There is no such boldly-marked line of cliffs north of the *Et-Tîh* and *El-Odjmeh* ranges, except perhaps Mount Seir, the eastern limit of the Arabah. There is a strongly marked expression in Deut. i. 7, 19, 20, "the mountain of the Amorites," which besides those of Seir and Hor, is the only one mentioned by name after Sinai, and which is there closely connected with Kadesh Barnea. The wilderness (that of Paran) "great and terrible," which they passed through after quitting Horeb (vers. 6, 7, 19), was "by the way of" this "mountain of the Amorites." "We came," says Moses, "to Kadesh Barnea; and I said unto you, ye are come unto the mountain of the Amorites." Also in ver. 7, the adjacent territories of this mountain-region seem not obscurely intimated; we have the Shephelah ("plain") and the Arabah ("vale"), with the "hills" ("hill-country of Judah") between them; and "the South" is added as that debateable outlying region, in which the wilderness strives with the inroads of life and culture. There is no natural feature to correspond so well to this mountain of the Amorites as this smaller higher plateau superimposed on *Et-Tîh*, forming the watershed of the two great systems of wadys, those north-westward towards the great *Wady-el-Arish*, and those north-eastward towards the *Wady Jerâfeh* and the great *Wady-el-Jeib*. Indeed, in these converging wady-systems on either side of the "mountain," we have a desert-continuation of the same configuration of country, which the Shephelah and Arabah with their interposed watershedding highlands present further north. And even as the name ARABAH is plainly continued from the Jordan valley, so as to mean the great arid trough between the Dead Sea and Elath; so perhaps the Shefelah ("vale") might naturally be viewed as continued to the "river of Egypt." And thus the "mountain of the Amorites" would merely continue the mountain-mass of Judah and Ephraim, as forming part of the land "which the Lord our God doth give unto us." The south-western angle of this higher plateau is well defined by the bluff peak of *Jebel 'Arâif*, standing in about 30° 22′ N., by 34° 30′ E. Assuming the region from *Wady Feiran* to the *Jebel Mousa* as a general basis for the position of Horeb, nothing farther south than this *Jebel 'Arâif* appears to give the necessary distance from it for Kadesh, nor would any point on the west side of the western face of this mountain region suit, until we get quite high up towards Beersheba. Nor, if any site in this direction is to be chosen, is it easy to account for "the way of Mount Seir" being mentioned as it is, Deut. i. 2, apparently as the customary route "from Horeb" thither. But if, as further reasons will suggest, Kadesh lay probably near the S.W. curve of the Dead Sea, then "Mount Seir" will be within sight on the E. during all the latter part of the journey "from Horeb" thither. This mountain region is in Kiepert's map laid down as the territory of the *Azâzimeh*, but is said to be so wild and rugged that the Bedouins of all other tribes avoid it, nor has any road ever traversed it (Robinson, i. 186). Across this then there was no pass; the choice of routes lay between the road which leading from Elath to Gaza and the Shephelah, passes to the west of it, and that which ascends from the northern extremity of the Arabah by the Ma'aleh Akrabbim towards Hebron. The reasons for thinking that the Israelites took this latter course are, that if they had taken the western, Beersheba would seem to have been the most natural route of their first attempted attack (Robinson, i. 187). It would also have brought them too near to the land of the Philistines, which it seems to have been the Divine purpose that they should avoid. But above all, the features of the country, scantily as they are noticed in Num., are in favour of the eastern route from the Arabah and Dead Sea.

One site fixed on for Kadesh is the *Ain es Sheyâbeh* on the south side of this "mountain of the Amorites," and therefore too near Horeb to fulfil the conditions of Deut. i. 2. Messrs. Rowlands and Williams (*Holy City*, i. 463-8) argue strongly in favour of a site for Kadesh on the west side of this whole mountain region, towards *Jebel Helal*, where they found "a large single mass or small hill of solid rock, a spur of the mountain to the north of it, immediately rising above it, the only visible naked rock in the whole district." They found salient water rushing from this rock into a basin, but soon losing itself in the sand, and a grand space for the encampment of a host on the S.W. side of it. In favour of it they allege, 1, the name *Kâdês* or *Kâdes*, pronounced in English *Kâddâse* or *Kâdddse*, as being exactly the form of the Hebrew name Kadesh; 2, the position, in the line of the southern boundary of Judah; 3, the correspondence with the order of the places mentioned, especially the places Adar and Azmon, which these travellers recognize in *Adeirat* and *Aseimeh*, otherwise (as in

[d] There are three nearly parallel passes leading to the same level: this is the middle one of the three. Schubert (*Reise*, ii. 441-3) appears to have taken the same path; Berton that on the W. side, *El Yemen*.

[e] This is only the direction, or apparent direction, of the range at the spot, its general one being as above stated. See the maps.

[f] So Robinson, before ascending, remarks (ii. 585) that the hills consisted of chalky stone and conglomerate.

Kiepert's map) *Kadeirat* and *Kaseimeh*; 4, its position with regard to *Jebel el-Halal*, or *Jebel Helal*; 5, its position with regard to the mountain of the Amorites (which they seem to identify with the *western* face of the plateau); 6, its situation with regard to the grand S.W. route to Palestine by Beer-lahai-roi from Egypt; 7, its distance from Sinai, and the goodness of the way thither; 8, the accessibility of Mount Hor from this region. Of these, 2, 4, 5, and 8, seem of no weight;[g] 1 is a good deal weakened by the fact that some such name seems to have a wide range[h] in this region; 3 is of considerable force, but seems overbalanced by the fact that the whole position seems too far west; arguments 6 and 7 rather tend against than for the view in question, any western route being unlikely (see text above), and the "goodness" of the road not being discoverable, but rather the reverse, from the Mosaic record. But, above all, how would this accord with "the way of Mount Seir" being that from Sinai to Kadesh Barnea? (Deut. i. 2.)

In the map to Robinson's last edition, a *Jebel el Kudeis* is given on the authority of Abeken. But this spot would be too far to the west for the fixed point intended in Deut. i. 2 as Kadesh Barnea. Still, taken in connexion with the region endeavoured to be identified with the "mountain of the Amorites," it may be a general testimony to the prevalence of the name Kadesh within certain limits; which is further supported by the names given below (b).

The indications of locality strongly point to a site near where the mountain of the Amorites descends to the low region of the Arabah and Dead Sea. *Tell Arad* is perhaps as clear a local monument of the event of Num. xxi. 1, as we can expect to find. [ARAD]. "The Canaanitish king of Arad" found that Israel was coming "by the way of the spies," and "fought against" and "took some of them prisoners." The subsequent defeat of this king is clearly connected with the pass *Es-Sûfa*, between which and the *Tell Arad* a line drawn ought to give us the direction of route intended by "by the way of the spies;" accordingly, within a day's journey on either side of this line produced towards the Arabah, Kadesh-Barnea should be sought for. [HORMAH]. Nearly the same ground appears to have been the scene of the previous discomfiture of the Israelites rebelliously attempting to force their way by this pass to occupy the "mountain" where "the Amalekites and Amorites" were "before them" (Num. xiv. 45; Judg. i. 17); further, however, this defeat is said to have been "in Seir" (Deut. i. 44). Now, whether we admit or not with Stanley (*S. & P.* 94 note) that Edom had at this period no territory west of the Arabah, which is perhaps doubtful, yet there can be no room for doubt that "the mountain of the Amorites" must at any rate be taken as their western limit. Hence the overthrow in Seir must be east of that mountain, or, at furthest, on its eastern edge. The "Seir" alluded to may be the western edge of the Arabah below the *Es-Sûfa* pass. When thus driven back, they "abode in Kadesh many days" (Deut. i. 46). The city, whether we prefer Kadesh simply, or Kadesh-Barnea, as its designation, cannot have belonged to the Amorites, for these after their victory would probably have disputed possession of it; nor could it, if plainly Amoritish, have been "in the uttermost of the border" of Edom. It may be conjectured that it lay in the debateable ground between the Amorites and Edom, which the Israelites in a message of courtesy to Edom might naturally assign to the latter, and that it was possibly then occupied in fact by neither, but by a remnant of those Horites whom Edom (Deut. ii. 12) dislodged from the "mount" Seir, but who remained as refugees in that arid and unenviable region, which perhaps was the sole remnant of their previous possessions, and which they still called by the name of "Seir," their patriarch. This would not be inconsistent with "the edge of the land of Edom" still being at Mount Hor (Num. xxxiii. 37), nor with the Israelites regarding this debateable ground, after dispossessing the Amorites from "their mountain," as pertaining to their own "south quarter." If this view be admissible, we might regard "Barnea" as a Hebraized remnant of the Horite language, or of some Horite name.

The nearest approximation, then, which can be given to a site for the city of Kadesh, may be probably attained by drawing a circle, from the pass *Es-Sûfa*, at the radius of about a day's journey, its south-western quadrant will intersect the "wilderness of Paran," or *Et-Tîh*, which is there overhung by the superimposed plateau of the mountain of the Amorites; while its south-eastern one will cross what has been designated as the "wilderness of Zin." This seems to satisfy all the conditions of the passages of Genesis, Numbers, and Deuteronomy, which refer to it. The nearest site in harmony with this view, which has yet been suggested (Robinson, ii. 175), is undoubtedly the *Ain el-Weibeh*. To this, however, is opposed the remark of a traveller (Stanley, *S. and P.* 95) who went probably with a deliberate intention of testing the local features in reference to this suggestion, that it does not afford among its "stony shelves of three or four feet high" any proper "cliff" (סֶלַע), such as is the word specially describing that "rock" (A. V.) from which the water gushed. It is however nearly opposite the *Wady Ghuweir*, the great opening into the steep eastern wall of the Arabah, and therefore the most probable "highway" by which to "pass through the border" of Edom But until further examination of local features has

[g] What is more disputable than the S. boundary line? *Jebel Helal* derives its sole significance from a passage not specified in Jeremiah. The "mountain of the Amorites," as shown above, need not be that western face. Mt. Hor is as accessible from elsewhere.

[h] Seetzen's last map shows a *Wady Kidiese* corresponding in position nearly with *Jebel el Kudeise* given in Kiepert's, on the authority of Abeken. Zimmermann's Atlas, sect. x., gives *el Cadessah* as another name for the well-known hill *Madurah*, or *Moderah*, lying within view of the point described above, from Williams's *Holy City*, i. 463-4. This is towards the East, a good deal nearer the Dead Sea and so far more suitable. Further, Robertson's map in Stewart's *The Tent and the Khan* places an *'Ain Khades* near the junction of the *Wady Abyad*, with the *Wady el Arish*; but in this map are tokens of some confusion in the drawing.

[i] Fürst has suggested בַּר־נוּעַ, "son of wandering" = Bedouin; but בַּר does not occur as "son" in the writings of Moses. The reading of the LXX. in Num. xxxiv. 4, Κάδης τοῦ Βαρνῆ, seems to favour the notion that it was regarded by them as a man's name. The name "Meribah" is accounted for in Num. xx. 13. [MERIBAH.]

been made, which owing to the frightfully desolate character of the region deems very difficult, it would be unwise to push identification further.

Notice is due to the attempt to discover Kadesh in Petra, the metropolis of the Nabathaeans (Stanley, *S. and P.* 94), embedded in the mountains to which the name of Mount Seir is admitted by all authorities to apply, and almost overhung by Mount Hor. No doubt the word *Selâ*, "cliff," is used as a proper name occasionally, and may probably in 2 K. xiv. 7; Is. xvi. 1, be identified with a city or spot of territory belonging to Edom. But the two sites of Petra and Mount Hor are surely far too close for each to be a distinct camping station, as in Num. xxxiii. 36, 37. The camp of Israel would have probably covered the site of the city, the mountain, and several adjacent valleys. But, further, the site of Petra must have been as thoroughly Edomitish territory as was that of BOZRAH, the then capital, and could not be described as being "in the uttermost" of their border. "Mount Seir" was "given to Esau for a possession," in which he was to be unmolested, and not a "foot's breadth" of his land was to be taken. This seems irreconcileable with the quiet encampment of the whole of Israel and permanency there for "many days," as also with their subsequent territorial possession of it, for Kadesh is always reckoned as a town in the southern border belonging to Israel. Neither does a friendly request to be allowed to pass through the land of Edom come suitably from an invader who had seized, and was occupying one of its most difficult passes; nor, again, is the evident temper of the Edomites and their precautions, if they contemplated, as they certainly did, armed resistance to the violation of their territory, consistent with that invader being allowed to settle himself by anticipation in such a position without a stand being made against him. But, lastly, the conjunction of the city Kadesh with "the mountain of the Amorites," and its connexion with the assault repulsed by the Amalekites and Canaanites (Deut. i. 44; Num. xiv. 43), points to a site wholly away from Mount Seir.

A paper in the *Journal of Sacred Literature*, April, 1860, entitled *A Critical Enquiry into the Route of the Exodus*, discards all the received sites for Sinai, even that of Mount Hor, and fixes on Elusa *El Kaleah*) as that of Kadesh. The arguments of the writer will be considered, as a whole, under WILDERNESS OF WANDERING.

Kadesh appears to have maintained itself, at least as a name to the days of the prophet Ezekiel, *l. c.*) and those of the writer of the apocryphal book of Judith (i. 9). The "wilderness of Kadesh" occurs only in Ps. xxix. 8, and is probably undistinguishable from that of Zin. As regards the name "Kadesh," there seems some doubt whether it be originally Hebrew.[k]

Almost any probable situation for Kadesh on the grounds of the Scriptural narrative, is equally opposed to the impression derived from the aspect of the region thereabouts. No spot perhaps, in the locality above indicated, could now be an eligible site for the host of the Israelites "for many days." Jerome speaks of it as a "desert" in his day, and makes no allusion to any city there, although the tomb of Miriam, of which no modern traveller has found any vestige, had there its traditional site. It is possible that the great volume of water which in the rainy season sweeps by the great *El-Jeib* and other wadys into the S.W. corner of the Ghor, might, if duly husbanded, have once created an artificial oasis, of which, with the neglect of such industry, every trace has since been lost. But, as no attempt is made here to fix on a definite site for Kadesh as a city, it is enough to observe that the objection applies in nearly equal force to nearly all solutions of the question of which the Scriptural narrative admits. [H. H.]

KAD'MIEL (קַדְמִיאֵל: Καδμιήλ: *Cedmihel*), one of the Levites who with his family returned from Babylon with Zerubbabel, and apparently a representative of the descendants of Hodaviah, or, as he is elsewhere called, Hodaveh or Judah (Ezr. ii. 40; Neh. vii. 43). In the first attempt which was made to rebuild the Temple, Kadmiel and Jeshua, probably an elder member of the same house, were, together with their families, appointed by Zerubbabel to superintend the workmen, and officiated in the thanksgiving-service by which the laying of the foundation was solemnized (Ezr. iii. 9). His house took a prominent part in the confession of the people on the day of humiliation (Neh. ix. 4, 5), and with the other Levites joined the princes and priests in a solemn compact to separate themselves to walk in God's law (Neh. x. 9). In the parallel lists of 1 Esdr. he is called CADMIEL.

KAD'MONITES, THE (הַקַּדְמֹנִי, *i. e.* "the Kadmonite;" τὸν Καδμωναῖον; Alex. omits: *Cedmonaeos*), a people named in Gen. xv. 19 only; one of the nations who at that time occupied the land promised to the descendants of Abram. The name is from a root *Kedem*, signifying "eastern," and also "ancient" (Ges. *Thes.* 1195).

Bochart (*Chan.* i. 19; *Phal.* iv. 36) derives the

[k] It may be perhaps a Horite word, corrupted so as to bear a signification in the Heb. and Arab.; but, assuming it to be from the root meaning "holiness," which exists in various forms in the Heb. and Arab., there may be some connexion between that name, supposed to indicate a shrine, and the En-Mishpat = Fountain of Judgment. The connexion of the priestly and judicial function, having for its root the regarding as sacred whatever is authoritative, or the deducing all subordinate authority from the Highest, would support this view. Compare also the double functions united in Sheikh and Cadi. Further, on this supposition, a more forcible sense accrues to the name Kadesh *Meribah* = strife or contention, being as it were a perversion of *Mishpat* = judgment—a taking it *in partem deteriorem*. For the Heb. and Arab. derivatives from this same root see Gesen. *Lex.* s. v. קָדַשׁ, varying in senses of to be holy, or (piel) to sanctify, as a priest, or to keep holy, as the sabbath, and (pual) its passive; also *Golii Lex. Arab. Lat.* Lugd. Bat. 1653, *s. v.* قدس. The derived sense, קָדֵשׁ, a male prostitute, fem. קְדֵשָׁה, a harlot, does not appear to occur in the Arab.: it is to be referred to the notion of prostitution in honour of an idol, as the Syrians in that of Astarte, the Babylonians in that of Mylitta (Herod. i. 199), and is conveyed in the Greek ἱερόδουλος. [IDOLATRY, vol. i. 858*b*.] This repulsive custom seems more suited to those populous and luxurious regions than to the hard bare life of the desert. As an example of Eastern nomenclature travelling far west at an early period, Cadiz may perhaps be suggested as based upon Kadesh, and carried to Spain by the Phoenicians.

Kadmonites from Cadmus, and further identifies them with the Hivites (whose place they fill in the above list of nations), on the ground that the Hivites occupied Mount Hermon, "the most easterly part of Canaan." But Hermon cannot be said to be on the east of Canaan, nor, if it were, did the Hivites live there so exclusively as to entitle them to an appellation derived from that circumstance (see vol. i. 820). It is more probable that the name Kadmonite in its one occurrence is a synonym for the BENE-KEDEM—the "children of the East," the general name which in the Bible appears to be given to the tribes who roved in the great waste tracts on the east and south-east of Palestine. [G.]

KALLA'I (קַלָּי: Καλλαΐ: *Celai*), a priest in the days of Joiakim the son of Jeshua. He was one of the chiefs of the fathers, and represented the family of Sallai (Neh. xii. 20).

KA'NAH (קָנָה: Καναθάν; Alex. Κανά: *Cana*), one of the places which formed the landmarks of the boundary of Asher; apparently next to Zidon-rabbah, or "great Zidon" (Josh. xix. 28 only). If this inference is correct, then Kanah can hardly be identified in the modern village *Kâna*, six miles inland, not from Zidon, but from Tyre, nearly 20 miles south thereof. The identification, first proposed by Robinson (*B. R.* ii. 456), has been generally accepted by travellers (Wilson, *Lands*, ii. 230; Porter, *Handbook*, 395; Schwarz, 192; Van de Velde, i. 180). Van de Velde (i. 209) also treats it as the native place of the "woman of *Canaan*" (γυνὴ Χαναναία) who cried after our Lord. But the former identification, not to speak of the latter—in which a connexion is assumed between two words radically distinct—seems untenable. An *Ain-Kana* is marked in the map of Van de Velde, about 8 miles S.E. of *Saida* (Zidon), close to the conspicuous village *Jwjéa*, at which latter place Zidon lies full in view (Van de Velde, ii. 437). This at least answers more nearly the requirements of the text. But it is put forward as a mere conjecture, and must abide further investigation. [G.]

KA'NAH, THE RIVER (נַחַל קָנָה = the torrent or wady K.: Χελκανά, φάραγξ Καρανά; Alex. χείμαρρος Κανά and φάραγξ Κανά: *Vallis arundineti*), a stream falling into the Mediterranean, which formed the division between the territories of Ephraim and Manasseh, the former on the south, the latter on the north (Josh. xvi. 8, xvii. 9). No light appears to be thrown on its situation by the Ancient Versions or the Onomasticon. Dr. Robinson (iii. 135) identifies it "without doubt" with a wady, which taking its rise in the central mountains of Ephraim, near *Akrabeh*, some 7 miles S.E. of *Nablus*, crosses the country and enters the sea just above Jaffa as *Nahr-el-Aujeh*; bearing during part of its course the name of *Wady Kanah*. But this, though perhaps sufficiently important to serve as a boundary between two tribes, and though the retention of the name is in its favour, is surely too far south to have been the boundary between Ephraim and Manasseh. The conjecture of Schwarz (51) is more plausible—that it is a wady which commences west of and close to *Nablus*, at *Ain-el-Khassab*, and falls into the sea as *Nahr Falaik*, and which bears also the name of *Wady al-Khassab*—the reedy stream. This has its more northerly position in its favour, and also the agreement in signification of the names (Kanah meaning also reed). But it should not be forgotten that the name *Khassab* is borne by a large tract of the maritime plain at this part (Stanley, *S. & P.* 260). Porter pronounces for *N. Akhdar*, close below Caesarea. [G.]

KARE'AH (קָרֵחַ: Κάρης: *Caree*), the father of Johanan and Jonathan, who supported Gedaliah's authority and avenged his murder (Jer. xl. 8, 13, 15, 16, xli. 11, 13, 14, 16, xlii. 1, 8, xliii. 2, 4, 5). He is elsewhere called CAREAH.

KARKA'A (with the def. article, הַקַּרְקַע: Κάδης, in both MSS.; Symm. translating, Ἔδαφος: *Carcaa*), one of the landmarks on the south boundary of the tribe of Judah (Josh. xv. 3), and therefore of the Holy Land itself. It lay between Addar and Azmon, Azmon being the next point to the Mediterranean (*Wady el-Arish*). Karkaa, however, is not found in the specification of the boundary in Num. xxxiv., and it is worth notice that while in Joshua the line is said to make a detour (סָבַב) to Karkaa, in Numbers it runs to Azmon. Nor does the name occur in the subsequent lists of the southern cities in Josh. xv. 21-32, or xix. 2-8, or in Neh. xi. 25, &c. Eusebius (*Onomasticon*, Ἀκαρκάς) perhaps speaks of it as then existing (κώμη ἐστίν), but at any rate no subsequent traveller or geographer appears to have mentioned it. [G.]

KAR'KOR (with the def. article, הַקַּרְקֹר: Καρκάρ; Alex. Καρκά: Vulg. translating, *requiescebant*), the place in which the remnant of the host of Zebah and Zalmunna which had escaped the rout of the Jordan valley were encamped, when Gideon burst upon and again dispersed them (Judg. viii. 10). It must have been on the east of the Jordan, beyond the district of the towns, in the open wastes inhabited by the nomad tribes—"them that dwelt in tents on the east of Nobah and Jogbehah" (ver. 11). But it is difficult to believe that it can have been so far to the south as it is placed by Eusebius and Jerome (*Onomast.* Καρκά and "Carcar"), namely one day's journey (about 15 miles) north of Petra, where in their time stood the fortress of Carcaria, as in ours the castle of *Kerek el-Shobak* (Burckhardt, 19 Aug. 1812). The name is somewhat similar to that of CHARACA, or Charax, a place on the east of the Jordan, mentioned once in the Maccabean history; but there is nothing to be said either for or against the identification of the two.

If *Kunawat* be KENATH, on which Nobah bestowed his own name (with the usual fate of such innovations in Palestine), then we should look for Karkor in the desert to the east of that place; which is quite far enough from the Jordan valley, the scene of the first encounter, to justify both Josephus's expression, πόρρω πολύ (*Ant.* vii. 6, §5), and the careless "security" of the Midianites. But no traces of such a name have yet been discovered in that direction, or any other than that above mentioned. [G.]

KAR'TAH (קַרְתָּה: ἡ Κάδης; Alex. Καρθά: *Chartha*), a town of Zebulun, which with its "suburbs" was allotted to the Merarite Levites (Josh. xxi. 34). It is not mentioned either in the general list of the towns of this tribe (xix. 10-16), or in the parallel catalogue of Levitical cities in 1 Chr. vi., nor does it appear to have been recognised since. [G.]

KARTAN (קַרְתָּן: Θεμμάν; Alex. Νεεμμάν: *Carthan*), a city of Naphtali, allotted with its "suburbs" to the Gershonite Levites (Josh. xxi. 32). In the parallel list of 1 Chr. vi. the name appears in the more expanded form of KIRJATHAIM (ver. 76), of which Kartan may be either a provincialism or a contraction. A similar change is observable in Dothan and Dothaim. The LXX. evidently had a different Hebrew text from the present. [G.]

KATTATH (קַטָּת: Κατανθ; Alex. Καττηθ: *Catteth*), one of the cities of the tribe of Zebulun (Josh. xix. 15). It is not mentioned in the Onomasticon. Schwarz (172) reports that in the *Jerusalem Megillah*, Kattath "is said to be the modern Katunith," which he seeks to identify with *Kana el-Jelil*,—most probably the CANA OF GALILEE of the N. T.—5 miles north of *Seffurieh*, partly on the ground that Cana is given in the Syriac as *Katna*, and partly for other but not very palpable reasons. [G.]

KE'DAR (קֵדָר, "black skin, black-skinned man," Ges.: Κηδάρ: *Cedar*), the second in order of the sons of Ishmael (Gen. xxv. 13; 1 Chr. i. 29), and the name of a great tribe of the Arabs, settled on the north-west of the peninsula and the confines of Palestine. This tribe seems to have been, with Tema, the chief representative of Ishmael's sons in the western portion of the land they originally peopled. The "glory of Kedar" is recorded by the prophet Isaiah (xxi. 13-17) in the burden upon Arabia; and its importance may also be inferred from the "princes of Kedar," mentioned by Ez. (xxvii. 21), as well as the pastoral character of the tribe: "Arabia, and all the princes of Kedar, they occupied with thee in lambs, and rams, and goats: in these [were they] thy merchants." But this characteristic is maintained in several other remarkable passages. In Cant. i. 5, the black tents of Kedar, black like the goat's or camel's-hair tents of the modern Bedawee, are forcibly mentioned, "I [am] black, but comely, O ye daughters of Jerusalem, as the tents of Kedar, as the curtains of Solomon." In Is. lx. 7, we find the "flocks of Kedar," together with the rams of Nebaioth; and in Jer. xlix. 28, "concerning Kedar, and concerning the kingdoms of HAZOR," it is written, "Arise ye, go up to Kedar, and spoil the men of the East [the BENE-KEDEM]. Their tents and their flocks shall they take away; they shall take to themselves their tent-curtains, and all their vessels, and their camels" (28, 29). They appear also to have been, like the wandering tribes of the present day, "archers" and "mighty men" (Is. xxi. 17; comp. Ps. cxx. 5). That they also settled in villages or towns, we find from that magnificent passage of Isaiah (xlii. 11), "Let the wilderness and the cities thereof lift up [their voice], the villages [that] Kedar doth inhabit: let the inhabitants of the rock sing, let them shout from the top of the mountains;"—unless encampments are here intended.[a] But dwelling in more permanent habitations than tents is just what we should expect from a far-stretching tribe such as Kedar certainly was, covering in their pasture-lands and watering places the great western desert, settling on the borders of Palestine, and penetrating into the Arabian peninsula, where they were to be the fathers of a great nation. The archers and warriors of this tribe were probably engaged in many of the wars which the "men of the East" (of whom Kedar most likely formed a part) waged, in alliance with Midianites and others of the Bene-Kedem, with Israel (see M. Caussin de Perceval's *Essai*, i. 180-1, on the war of Gideon, &c.). The tribe seems to have been one of the most conspicuous of all the Ishmaelite tribes, and hence the Rabbins call the Arabians universally by this name.[b]

In Is. xxi. 17, the descendants of Kedar are called the Bene-Kedar.

As a link between Bible history and Mohammadan traditions, the tribe of Kedar is probably found in the people called the Cedrei by Pliny, on the confines of Arabia Petraea to the south (*N. H.* v. 11); but they have, since classical times, become merged into the Arab nation, of which so great a part must have sprung from them. In the Mohammadan traditions, Kedar[c] is the ancestor of Mohammad; and through him, although the genealogy is broken for many generations, the ancestry of the latter from Ishmael is carried. (See Caussin, *Essai*, i. 175, *seqq.*) The descent of the bulk of the Arabs from Ishmael we have elsewhere shown to rest on indisputable grounds. [ISHMAEL.] [E. S. P.]

KE'DEMAH (קַדְמָה, *i. e.* "eastward:" Κεδμά: *Cedma*), the youngest of the sons of Ishmael (Gen. xxv. 15; 1 Chr. i. 31).

KE'DEMOTH (in Deut. and Chron. קְדֵמוֹת; in Josh. קְדֵמֹת: Κεδαμώθ, Βαιτεδμώθ, ἡ Δεκμών, ἡ Καδμώθ; Alex. Κεδμοθώ, Κεδημώθ, Καμηδώθ, Γεδσών: *Cedemoth*, *Cademoth*), one of the towns in the district east of the Dead Sea allotted to the tribe of Reuben (Josh. xiii. 18); given with its "suburbs" to the Merarite Levites (Josh. xxi. 37; 1 Chr. vi. 79; in the former of these passages the name, with the rest of verses 36 and 37, is omitted from the Rec. Hebrew Text, and from the Vulg.). It possibly conferred its name on the "wilderness, or uncultivated pasture land (*Midbar*), of Kedemoth," in which Israel was encamped when Moses asked permission of Sihon to pass through the country of the Amorites; although, if Kedemoth be treated as a Hebrew word, and translated "Eastern," the same circumstance may have given its name both to the city and the district. And this is more probably the case, since "Aroer on the brink of the torrent Arnon" is mentioned as the extreme (south) limit of Sihon's kingdom and of the territory of Reuben, and the north limit of Moab, Kedemoth, Jahazah, Heshbon, and other towns, being apparently north of it (Josh. xiii. 16, &c.), while the wilderness of Kedemoth was certainly outside the territory of Sihon (Deut. ii. 26, 27, &c.), and therefore south of the Arnon. This is supported by the terms of Num. xxi. 23, from which it would appear as if Sihon had come out of his territory into the wilderness; although on the other hand, from the fact of Jahaz (or Jahazah) being said to be "in the wilderness" (Num. xxi. 23), it seems doubtful whether the towns named in Josh. xiii. 16-21, were all north of Arnon. As in other cases we must await further investigation on the east of the Dead Sea. The place is but casually mentioned in the *Onomasticon* ("Cademoth"), but yet

[a] חֲצֵרִים. Comp. usage of Arabic, قَرْيَة, *Karyeh*.

[b] Hence לשון קדר, Rabbin. use of the Arabic language (Ges. *Lex.* ed. Tregelles).

[c] *Kaydar*, قيدار.

so as to imply a distinction between the town and the wilderness. No other traveller appears to have noticed it. (See Ewald, *Gesch.* ii. 271.) [JAHAZ.]

KE'DESH (קֶדֶשׁ), the name borne by three cities in Palestine.

1. (Κάδης; Alex. Βελέθ: *Cedes*) in the extreme south of Judah (Josh. xv. 23). Whether this is identical with Kadesh-Barnea, which was actually one of the points on the south boundary of the tribe (xv. 3; Num. xxxiv. 4), it is impossible to say. Against the identification is the difference of the name,—hardly likely to be altered if the famous Kadesh was intended, and the occurrence of the name elsewhere showing that it was of common use.

2. (Κέδες; Alex. Κέδεε: *Cedes*), a city of Issachar, which according to the catalogue of 1 Chr. vi. was allotted to the Gershonite Levites (ver. 72). In the parallel list (Josh. xxi. 28) the name is KISHON, one of the variations met with in these lists, for which it is impossible satisfactorily to account. The Kedesh mentioned among the cities whose kings were slain by Joshua (Josh. xii. 22), in company with Megiddo and Jokneam of Carmel, would seem to have been this city of Issachar, and not, as is commonly accepted, the northern place of the same name in Naphtali, the position of which in the catalogue would naturally have been with Hazor and Shimron-Meron. But this, though probable, is not conclusive.

3. KEDESH (Κάδες, Κάδης, Κέδες,[a] Κενέζ; Alex. also Κεϊδες; *Cedes*): also KEDESH IN GALILEE (קֶדֶשׁ בַּגָּלִיל, *i. e.* "K. in the Galil;" ἡ Κάδης ἐν τῇ Γαλιλαίᾳ; *Cedes in Galilaea*): and once, Judg. iv. 6, KEDESH-NAPHTALI (קֶדֶשׁ נַפְתָּלִי; Κάδης Νεφθαλί; *Cedes Nephthali*). One of the fortified cities of the tribe of Naphtali, named between Hazor and Edrei (Josh xix. 37); appointed as a city of refuge, and allotted with its "suburbs" to the Gershonite Levites (xx. 7, xxi. 32; 1 Chr. vi. 76). In Josephus's account of the northern wars of Joshua (*Ant.* v. 1, §18), he apparently refers to it as marking the site of the battle of Merom, if Merom be intended under the form Beroth.[b] It was the residence of Barak (Judg. iv. 6), and there he and Deborah assembled the tribes of Zebulun and Naphtali before the conflict (9, 10). Near it was the tree of Zaananim, where was pitched the tent of the Kenites Heber and Jael, in which Sisera met his death (ver. 11). It was probably, as its name implies, a "holy[c] place" of great antiquity, which would explain its selection as one of the cities of refuge, and its being chosen by the prophetess as the spot at which to meet the warriors of the tribes before the commencement of the struggle 'for Jehovah against the mighty." It was one of the places taken by Tiglath-Pileser in the reign of Pekah (Jos. *Ant.* ix. 11, §1, Κόδισα; 2 K. xv. 29); and here again it is mentioned in immediate connexion with Hazor. Its next and last appearance in the Bible is as the scene of a battle between Jonathan Maccabaeus and the forces of Demetrius (1 Macc. xi. 63, 73, A. V. CADES; Jos. *Ant.* xiii. 5, §6, 7). After this time it is spoken of by Josephus (*B. J.* ii. 18, §1; iv. 2, §3, πρὸς Κυδυσσοῖς) as in the possession of the Tyrians—"a strong inland[d] village," well fortified, and with a great number of inhabitants; and he mentions that during the siege of Giscala, Titus removed his camp thither—a distance of about 7 miles, if the two places are correctly identified—a movement which allowed John to make his escape.

By Eusebius and Jerome (*Onomast.* "Cedes") it is described as lying near Paneas, and 20 miles (Eusebius says 8—ἡ—but this must be wrong) from Tyre, and as called Kudossos or Cidissus. Brocardus (*Descr.* ch. iv.), describes it, evidently from personal knowledge, as 4 leagues north of *Safet*, and as abounding in ruins. It was visited by the Jewish travellers, Benjamin of Tudela (A.D. 1170), and ha-Parchi (A.D. 1315). The former places it one day's, and the latter half-a-day's, journey from Banias (Benj. of Tudela by Asher, i. 82, ii. 109, 420). Making allowances for imperfect knowledge and errors in transcription, there is a tolerable agreement between the above accounts, recognisable now that Dr. Robinson has with great probability identified the spot. This he has done at *Kades*, a village situated on the western edge of the basin of the *Ard-el-Huleh*, the great depressed basin or tract through which the Jordan makes its way into the Sea of Merom. *Kades* lies 10 English miles N. of Safed, 4 to the N.W. of the upper part of the Sea of Merom, and 12 or 13 S. of *Banias*. The village itself "is situated on a rather high ridge, jutting out from the western hills, and overlooking a small green vale or basin. . . Its site is a splendid one, well watered and surrounded by fertile plains." There are numerous sarcophagi, and other ancient remains (Rob. iii. 366-8; see also Van de Velde, ii. 417; Stanley, 365, 390).

In the Greek (Κυδίως) and Syriac (*Kedesh de Naphtali*) texts of Tob. i. 2,—though not in the Vulgate or A. V.—Kedesh is introduced as the birthplace of Tobias. The text is exceedingly corrupt, but some little support is lent to this reading by the Vulgate, which, although omitting Kedesh, mentions Safed—*post viam quae ducit ad Occidentem, in sinistro habens civitatem Saphet.*

[a] Some of the variations in the LXX. are remarkable. In Judg. iv. 9, 10, Vat. has Κάδης, and Alex. Κεΐδες; but in ver. 11, they both have Κέδες. In 2 K. xv. 29, both have Κενέζ. In Judg. iv and elsewhere the Peschito Version has Recem-Naphtali for Kedesh, Recem being the name which in the Targums is commonly used for the Southern Kedesh, K. Barnea. (See Stanley, *S. & P.* 94 *note.*)

[b] Πρὸς Βηρόθη πόλιν τῆς Γαλιλαίας τῆς ἄνω, Κεδίσης οὐ πόρρω. J. D. Michaelis (*Orient. und Exeget. Bibliothek*, 1773, No. 84) argues strenuously for the identity of Beroth and Kedes in this passage with Berytus (*Beirût*) and Kedesh, near Emessa (see above); but interesting and ingenious as is the attempt, the conclusion cannot be tenable. (See also a subsequent paper in 1774, No. 116.)

[c] From the root קָדַשׁ, common to the Semitic languages (Gesenius, *Thes.* 1195, 8). Whether there was any difference of signification between Kadesh and Kedesh does not seem at all clear. Gesenius places the former in connexion with a similar word which would seem to mean a person or thing devoted to the infamous rites of ancient heathen worship—"Scortum sacrum, idque masculum;" but he does not absolutely say that the bad force resided in the name of the place Kadesh. To Kedesh he gives a favourable interpretation—"Sacrarium." The older interpreters, as Hiller and Simonis, do not recognise the distinction.

[d] Thomson, *The Land and the Book*, ch. xix, has some strange comments on this passage. He has taken Whiston's translation of μεσόγειος—"mediterranean"—as referring to the Mediterranean Sea! and has drawn his inferences accordingly.

The name Kedesh exists much farther north than the possessions of Naphtali would appear to have extended, attached to a lake of considerable size on the Orontes, a few miles south of *Hums*, the ancient Emesa (Rob. iii. 549; Thomson, in Ritter, *Damascus*, 1002, 4). The lake was well known under that name to the Arabic geographers (see, besides the authorities quoted by Robinson, Abulfeda in Schultens' *Index Geogr.* "Fluvius Orontes" and "Kudsum"), and they connect it in part with Alexander the Great. But this and the origin of the name are alike uncertain. At the lower end of the lake is an island which, as already remarked, is possibly the site of Ketesh, the capture of which by Sethee I. is preserved in the records of that Egyptian king. [JERUSALEM, vol. i. 989 note.] [G.]

KEHE'LATHAH (קְהֵלָתָה: Μακελλάθ: *Ceclatha*), a desert encampment of the Israelites (Num. xxxiii. 22), of which nothing is known.[a] [H. H.]

KEI'LAH (קְעִילָה, but in 1 Sam. xxiii. 5, קְעִלָה: Κεειλάμ, ἡ Κειλά; Alex. Κεειλά; Joseph. Κίλλα, and the people *οἱ* Κιλλαῖοι and *οἱ* Κιλλαῖται: *Ceila*: Luth. *Kegila*), a city of the Shefelah or lowland district of Judah, named, in company with NEZIB and MARESHAH, in the next group to the Philistine cities (Josh. xv. 44). Its main interest consists in its connexion with David. He rescued it from an attack of the Philistines, who had fallen upon the town at the beginning of the harvest (Jos. *Ant.* vi. 13, §1), plundered the corn from its threshing-floor, and driven off the cattle (1 Sam. xxiii. 1). The prey was recovered by David (2-5), who then remained in the city till the completion of the in-gathering. It was then a fortified place,[b] with walls, gates, and bars (1 Sam. xxiii. 7, and Joseph.). During this time the massacre of Nob was perpetrated, and Keilah became the repository of the sacred Ephod, which Abiathar the priest, the sole survivor, had carried off with him (ver. 6). But it was not destined long to enjoy the presence of these brave and hallowed inmates, nor indeed was it worthy of such good fortune, for the inhabitants soon plotted David's betrayal to Saul, then on his road to besiege the place. Of this intention David was warned by Divine intimation. He therefore left (1 Sam. xxiii. 7-13.)

It will be observed that the word *Baali* is used by David to denote the inhabitants of Keilah, in this passage (ver. 11, 12; A. V. "men"); possibly pointing to the existence of Canaanites in the place [BAAL, p. 146*b*].

We catch only one more glimpse of the town, in the times after the Captivity, when Hashabiah, the ruler of one half the district of Keilah (or whatever the word *Pelec*, A. V., "part" may mean), and Bavai ben-Henadad, ruler of the other half, assisted Nehemiah in the repair of the wall of Jerusalem (Neh. iii. 17, 18). Keilah appears to have been known to Eusebius and Jerome. They describe it in the *Onomasticon* as existing under the name Κηλά, or *Ceila*, on the road from Eleutheropolis to Hebron, at 8[c] miles distance from the former. In the map of Lieut. Van de Velde (1858), the name *Kila* occurs attached to a site with ruins, on the lower road from *Beit Jibrin* to Hebron, at very nearly the right distance from *B. Jibrin* (almost certainly Eleutheropolis), and in the neighbourhood of *Beit Nûsib* (Nezib) and *Marsa* (Mareshah). The name was only reported to Lieut. V. (see his *Memoir*, p. 328), but it has been since visited by the indefatigable Tobler, who completely confirms the identification, merely remarking that *Kila* is placed a little too far south on the map. Thus another is added to the list of places which, though specified as in the "lowland," are yet actually found in the mountains: a puzzling fact in our present ignorance of the principles of the ancient boundaries. [JIPHTAH; JUDAH, p. 1156*b*.]

In the 4th century a tradition existed that the prophet Habbakuk was buried at Keilah (*Onomasticon*, "Ceila;" Nicephorus, *H. E.* xii. 48; Cassiodorus, in Sozomen, *H. E.* vii. 29); but another tradition gives that honour to HUKKOK.

In 1 Chr. iv. 19, "KEILAH THE GARMITE" is mentioned, apparently—though it is impossible to say with certainty—as a descendant of the great Caleb (ver. 15). But the passage is extremely obscure, and there is no apparent connexion with the town Keilah. [G.]

KELAI'AH (קְלָיָה: Κωλία; Alex. Κωλάα: Cod. Fred. Aug. Κωλεία, and Κωλίαν: *Celaia*) = KELITA (Ezr. x. 23). In the parallel list of 1 Esd. his name appears as COLIUS.

KE'LITA (קְלִיטָא: Κωλίτας; Καλιτάν in Neh. x. 10: *Celita*; *Calita* in Ezr. x. 23), one of the Levites who returned from the captivity with Ezra, and had intermarried with the people of the land (Ezr. x. 23). In company with the other Levites he assisted Ezra in expounding the law (Neh. viii. 7), and entered into a solemn league and covenant to follow the law of God, and separate from admixture with foreign nations (Neh. x. 10). He is also called KELAIAH, and in the parallel list of 1 Esdr. his name appears as CALITAS.

KEM'UEL (קְמוּאֵל: Καμουήλ: *Camuel*). 1. The son of Nahor by Milcah, and father of Aram, whom Ewald (*Gesch.* i. 414, note) identifies with Ram of Job xxxii. 2, to whose family Elihu belonged (Gen. xxii. 21).

2. The son of Shiphtan, and prince of the tribe of Ephraim; one of the twelve men appointed by Moses to divide the land of Canaan among the tribes (Num. xxxiv. 24).

3. A Levite, father of Hashabiah, prince of the tribe in the reign of David (1 Chr. xxvii. 17).

KE'NAN (קֵינָן: Καϊνάν: *Cainan*) = CAINAN the son of Enos (1 Chr. i. 2), whose name is also correctly given in this form in the margin of Gen. v. 9.

KEN'ATH (קְנָת: ἡ Καθ, Alex. ἡ Καναθ in Chron. both MSS. Καναθ: *Chanath*, *Canath*), one

[a] The name may possibly be derived from קָהִלָּה, a congregation, with the local suffix ָת, which many of these names carry. Compare the name of another place of encampment, מַקְהֵלֹת, which appears to be from the same root.

[b] This is said by Gesenius and others to be the signification of the name "Keilah." If this be so, there would almost appear to be a reference to this and the contemporary circumstances of David's life, in Ps. xxxi.; not only in the expression (ver. 21), "marvellous kindness *in a strong city*" (עִיר מָצוֹר), but also in ver. 8, and in the general tenour of the Psalm.

[c] This is Jerome's correction of Eusebius, who gives 17—manifestly wrong, as the whole distance between Hebron and *Beit-Jibrin* is not more than 15 Roman miles.

of the cities on the east of Jordan, with its "daughter-towns" (A. V. "villages") taken possession of by a certain NOBAH, who then called it by his own name (Num. xxxii. 42). At a later period these towns, with those of Jair, were recaptured by Geshur and Aram (1 Chr. ii. 23[a]). In the days of Eusebius (*Onom.* "Canath") it was still called Kanatha, and he speaks of it as "a village of Arabia near Bozra." Its site has been recovered with tolerable certainty in our own times at *Kenawât*, a ruined town at the southern extremity of the *Lejah*, about 20 miles N. of *Bŭsrah*, which was first visited by Burckhardt in 1810 (*Syria*, 83-86), and more recently by Porter (*Damascus*, ii. 87-115; *Handbk.* 512-14), the latter of whom gives a lengthened description and identification of the place. The suggestion that *Kenawât* was Kenath seems, however, to have been first made by Gesenius in his notes to Burckhardt (A.D. 1823, p. 505). Another Kenawat is marked on Van de Velde's map, about 10 miles farther to the west.

The name furnishes an interesting example of the permanence of an original appellation. NOBAH, though conferred by the conqueror, and apparently at one time the received name of the spot (Judg. viii. 11), has long since given way to the older title. Compare ACCHO, KIRJATH-ARBA, &c. [G.]

KE'NAZ (קְנַז: Κενέζ: *Cenez*). 1. Son of Eliphaz, the son of Esau. He was one of the dukes of Edom, according to both lists, that in Gen. xxxvi. 15, 42, and that in 1 Chr. i. 53, and the founder of a tribe or family, who were called from him Kenezites (Josh. xiv. 14, &c.). Caleb, the son of Jephunneh, and Othniel, were the two most remarkable of his descendants. [CALEB.]

2. One of the same family, a grandson of Caleb, according to 1 Chr. iv. 15, where, however, the Hebrew text is corrupt. Another name has possibly fallen out before Kenaz. [A. C. H.]

KE'NEZITE (written **KENIZZITE**, A. V. Gen. xv. 19: קְנִזִּי: Κενεζαῖος: *Cenezaeus*), an Edomitish tribe (Num. xxxii. 12; Josh. xiv. 6, 14). [KENAZ.] It is difficult to account for the Kenezites existing as a tribe so early as before the birth of Isaac, as they appear to have done from Gen. xv. 19. If this tribe really existed then, and the enumeration of tribes in ver. 19-21 formed a part of what the Lord said to Abram, it can only be said, with Bochart (*Phaleg*, iv. 36), that these Kenezites are mentioned here only, that they had ceased to exist in the time of Moses and Joshua, and that nothing whatever is known of their origin or place of abode. But it is worth consideration whether the enumeration may not be a later explanatory addition by Moses or some later editor, and so these Kenezites be descendants of Kenaz, whose adoption into Israel took place in the time of Caleb, which was the reason of their insertion in this place. [A. C. H.]

KE'NITE, THE, and KE'NITES, THE (הַקֵּינִי and הַקִּינִים, *i. e.* "the Kenite;" in Chron. הַקִּינִים; but in Num. xxiv. 22, and in Judg. iv. 11 *b*, קַיִן, *Kain: οἱ Κενεῖοι, ὁ Κυναῖος, οἱ Κυναῖοι: Cinaeus*),[b] a tribe or nation whose history is strangely interwoven with that of the chosen people. In the genealogical table of Gen. x. they do not appear. The first mention of them is in company with the Kenizzites and Kadmonites, in the list of the nations who then occupied the Promised Land (Gen. xv. 19). Their origin, therefore, like that of the two tribes just named, and of the Avvim (AVITES) is hidden from us. But we may fairly infer that they were a branch of the larger nation of MIDIAN—from the fact that Jethro, the father of Moses's wife, who in the records of Exodus (see ii. 15, 16, iv. 19, &c.) is represented as dwelling in the land of Midian, and as priest or prince of that nation, is in the narrative of Judges (i. 16, iv. 11[c]) as distinctly said to have been a Kenite. As Midianites they were therefore descended immediately from Abraham by his wife Keturah, and in this relationship and their connexion with Moses we find the key to their continued alliance with Israel. The important services rendered by the sheikh of the Kenites to Moses during a time of great pressure and difficulty, were rewarded by the latter with a promise of firm friendship between the two peoples —"what goodness Jehovah shall do unto us, the same will we do to thee." And this promise was gratefully remembered long after to the advantage of the Kenites (1 Sam. xv. 6). The connexion then commenced lasted as firmly as a connexion could last between a settled people like Israel and one whose tendencies were so ineradicably nomadic as the Kenites. They seem to have accompanied the Hebrews during their wanderings. At any rate they were with them at the time of their entrance on the Promised Land. Their encampment—separate and distinct from the rest of the people—was within Balaam's view when he delivered his prophecy[d] (Num. xxiv. 21, 22), and we may infer that they assisted in the capture of Jericho,[e] the "city of palm-trees" (Judg. i. 16; comp. 2 Chr. xxviii. 15). But the wanderings of Israel over, they forsook the neighbourhood of the towns, and betook themselves to freer air—to "the wilderness of Judah, which

[a] This passage is erroneously translated in the A. V. It should be, "And Geshur and Aram took the Havvoth-Jair, with Kenath and her daughters, sixty cities." See Bertheau, *Chronik*; Zunz's version; Targum of Joseph, &c. &c.

[b] Josephus gives the name Κενναῖος (*Ant.* v. 5, §4); but in his notice of Saul's expedition (vi. 7, §3) he has τὸ τῶν Σικιμιτῶν ἔθνος—the form in which he elsewhere gives that of the Shechemites. No explanation of this presents itself to the writer. The Targums of Onkelos, Jonathan, and Pseudojon. uniformly render the Kenite by שְׁלְמָאָה = Salmaite, possibly because in the genealogy of Judah (1 Chr. ii. 55) a branch of the Kenites come under Salma, son of Caleb. The same name is introduced in the Samarit. Vers. before "the Kenite" in Gen. xv. 19 only.

[c] This passage is incorrectly rendered in the A. V. It should be, "And Heber the Kenite had severed himself from Kain of the children of Hobab, the father-in-law of Moses, and pitched," &c.

[d] If it be necessary to look for a literal "fulfilment" of this sentence of Balaam's, we shall best find it in the accounts of the latter days of Jerusalem under Jehoiakim, when the Kenite Rechabites were so far "wasted" by the invading army of Assyria as to be driven to take refuge within the walls of the city, a step to which we may be sure nothing short of actual extremity could have forced these Children of the Desert. Whether "Ashur carried them away captive" with the other inhabitants we are not told, but it is at least probable.

[e] It has been pointed out under HOBAB that one of the wadys opposite Jericho, the same by which, according to the local tradition, the Bene-Israel descended to the Jordan, retains the name of *Sho'eib*, the Muslimah version of Hobab.

is to the south of Arad" (Judg. i. 16), where "they dwelt among the people" of the district—the Amalekites who wandered in that dry region, and among whom they were living centuries later when Saul made his expedition there (1 Sam. xv. 6). Their alliance with Israel at this later date is shown no less by Saul's friendly warning than by David's feigned attack (xxvii. 10, and see xxx. 29).

But one of the sheikhs of the tribe, Heber by name, had wandered north instead of south, and at the time of the great struggle between the northern tribes and Jabin king of Hazor, his tents were pitched under the tree of Zaanaim, near Kedesh (Judg. iv. 11). Heber was in alliance with both the contending parties, but in the hour of extremity the ties of blood-relationship and ancient companionship proved strongest, and Sisera fell a victim to the hammer and the nail of Jael.

The most remarkable development of this people, exemplifying most completely their characteristics—their Bedouin hatred of the restraints of civilization, their fierce determination, their attachment to Israel, together with a peculiar semi-monastic austerity not observable in their earlier proceedings—is to be found in the sect or family of the RECHABITES, founded by Rechab, or Jonadab his son, who come prominently forward on more than one occasion in the later history. [JEHONADAB; RECHABITES.]

The founder of the family appears to have been a certain Hammath (A. V. HEMATH) and a singular testimony is furnished to the connexion which existed between this tribe of Midianite wanderers and the nation of Israel, by the fact that their name and descent are actually included in the genealogies of the great house of Judah (1 Chr. ii. 55).

No further notices would seem to be extant of this interesting people. The name of *Ba-Kain* (abbreviated from *Beni el-Kain*) is mentioned by Ewald (*Gesch.* i. 337 *note*) as borne in comparatively modern days by one of the tribes of the desert; but little or no inference can be drawn from such similarity in names. [G.]

KENIZZITE. Gen. xv. 19. [KENEZITE.]

KEREN-HAP'PUCH (קֶרֶן הַפּוּךְ: Ἀμαλθίας κέρας: *Cornustibii*), the youngest of the daughters of Job, born to him during the period of his reviving prosperity (Job xlii. 14), and so called probably from her great beauty. The Vulgate has correctly rendered her name "horn of antimony," the pigment used by Eastern ladies to colour their eyelashes; but the LXX., unless they had a different reading, adopted a current expression of their own age, without regard to strict accuracy, in representing Keren-happuch by "the horn of Amalthaea," or "horn of plenty."

KERIOTH (קְרִיּוֹת, *i. e.* Keriyoth). 1. (*al* πόλις; Alex. πόλεις: *Carioth*), a name which occurs among the lists of the towns in the southern district of Judah (Josh. xv. 25). According to the A. V. ("Kerioth,[b] *and* Hezron") it denotes a distinct place from the name which follows it; but the separation is not in accordance with the accentuation of the Rec. Hebrew text, and is now generally abandoned (see Keil, *Josua*, ad loc. and Reland, *Pal.* 700, 708; the versions of Zunz, Cahen, &c.), and the name taken as "Keriyoth-Hezron, which is Hazor," *i. e.* its name before the conquest was Hazor, for which was afterwards substituted Keriyoth-Hezron—the "cities of H."

Dr. Robinson (*B. R.* ii. 101), and Lieut. Van de Velde (ii. 82) propose to identify it with *Kuryetein* ("the two cities"), a ruined site which stands about 10 miles S. from Hebron, and 3 from *Main* (Maon).

Kerioth furnishes one, and that perhaps the oldest and most usual, of the explanations proposed for the title "Iscariot," and which are enumerated under JUDAS ISCARIOT, vol. i. 1160*b*. But if Kerioth is to be read in conjunction with Hezron, as stated above, another difficulty is thrown in the way of this explanation.

2. (Καριάθ; *Carioth*), a city of Moab, named in the denunciations of Jeremiah—and there only—in company with Dibon, Beth-diblathaim, Bethmeon, Bozrah, and other places "far and near" (Jer. xlviii. 24). None of the ancient interpreters appear to give any clue to the position of this place. By Mr. Porter, however, it is unhesitatingly identified with *Kureiyeh*, a ruined town of some extent lying between *Busrah* and *Sulkhad*, in the southern part of the *Haurân* (*Five Years* &c. ii. 191-198; *Handbook*, 523, 4). The chief argument in favour of this is the proximity of *Kureiyeh* to *Busrah*, which Mr. Porter accepts as identical with the BOZRAH of the same passage of Jeremiah. But there are some considerations which stand very much in the way of these identifications. Jeremiah is speaking (xlviii. 21) expressly of the cities of the "Mishor" (A. V. "plain-country"), that is, the district of level downs east of the Jordan and the Dead Sea, which probably answered in whole or in part to the *Belka* of the modern Arabs. In this region were situated Heshbon, Dibon, Elealeh, Beth-meon, Kir-heres—the only places named in the passage in question, the positions of which are known with certainty. The most northern of these (Heshbon) is not farther north than the upper end of the Dead Sea; the most southern (Kir) lay near its lower extremity. Nor is there anything in the parallel denunciation of Moab by Isaiah (ch. xvi.) to indicate that the limits of Moab extended farther to the north. But *Busrah* and *Kureiyeh* are no less than 60 miles to the N.N.E. of Heshbon itself, beyond the limits even of the modern Belka (see Kiepert's map to Wetzstein's *Hauran und die Trachonen*, 1860), and in a country of an entirely opposite character from the "flat downs, of smooth and even turf" which characterise that district—"a savage and forbidding aspect . . . nothing but stones and jagged black rocks . . . the whole country around *Kureiyeh* covered with heaps of loose stones," &c. (Porter, ii. 189, 193). A more plausible identification would be *Kureiyat*, at the western foot of *Jebel Attarus*, and but a short distance from either Dibon, Bethmeon, or Heshbon.

But on the other hand it should not be overlooked that Jeremiah uses the expression "far and more marked—"and Kerioth: *and* Hezron, which is Hazor." This agrees with the version of Junius and Tremellius—"et Kerijothae (Chetsron ea est Chatzor)," and with that of Luther. Castellio, on the other hand, has "Cariothesron, quae alias Hasor."

[a] A place named KINAH, possibly derived from the same root as the Kenites, is mentioned in the lists of the cities of "the south" of Judah. But there is nothing to imply any connexion between the two. [KINAH.]

[b] In the A. V. of 1611 the punctuation was still

wear" (ver. 24), and also that if *Bozrah* and *Kureiyah* are not Bozrah and Kerioth, those important places have apparently flourished without any notice from the Sacred writers. This is one of the points which further investigation by competent persons, east of the Jordan, may probably set at rest.

Kerioth occurs in the A. V., also in ver. 41. Here however it bears the deficite article (הַקְּרִיּוֹת: Alex. Ἀκκαριώθ: *Carioth*), and would appear to signify not any one definite place, but "the cities[a] of Moab"—as may also be the case with the same word in Amos ii. 2. [KIRIOTH.] [G.]

KE'ROS (קֵרֹס: Κάδης; Alex. Κήρασ *Cerás*), one of the Nethinim, whose descendants returned with Zerubbabel.

KETTLE (דּוּד: λέβης: *caldaria*), a vessel for culinary or sacrificial purposes (1 Sam. ii. 14). The Hebrew word is also rendered "basket" in Jer. xxiv. 2, "caldron" in 2 Chr. xxxv. 13, and "pot" in Job xli. 20. [CALDRON.] [H. W. P.]

KETU'RAH (קְטוּרָה, "incense," Ges.: Χετούρα: *Cetura*), the "wife" whom Abraham "added and took" (A. V. "again took") besides, or after the death of, Sarah (Gen. xxv. 1; 1 Chr. i. 32). Gesenius and others adopt the theory that Abraham took Keturah after Sarah's death; but probability seems against it (compare Gen. xvii. 17, xviii. 11; Rom. iv. 19; and Heb. xi. 12), and we incline to the belief that the passage commencing with xxv. 1, and comprising perhaps the whole chapter, or at least as far as ver. 10, is placed out of its chronological sequence in order not to break the main narrative; and that Abraham took Keturah during Sarah's lifetime. That she was strictly speaking his wife is also very uncertain. The Hebrew word so translated in this place in the A. V., and by many scholars, is *Ishâh*,[b] of which the first meaning given by Gesenius is "a woman, of every age and condition, whether married or not;" and although it is commonly used with the signification of "wife," as opposed to husband, in Gen. xxx. 4, it occurs with the signification of concubine, "and she gave him Bilhah her handmaid to wife." In the record in 1 Chr. i. 32, Keturah is called a "concubine," and it is also said, in the two verses immediately following the genealogy of Keturah, that "Abraham gave all that he had unto Isaac. But unto the sons of the concubines, which Abraham had, Abraham gave gifts, and sent them away from Isaac his son, while he yet lived, eastward, unto the east country." Gen. xxv. 5, 6). Except Hagar, Keturah is the only person mentioned to whom this passage can relate; and in confirmation of this supposition we find strong evidence of a wide spread of the tribes sprung from Keturah, bearing the names of her sons, as we have mentioned in other articles. These sons were "Zimran, and Jokshan, and Medan, and Midian, and Ishbak, and Shuah" ver. 2; besides the sons and grandsons of Jokshan, and the sons of Midian. They evidently crossed the desert to the Persian Gulf and occupied the whole intermediate country, where traces of their names are frequent, while Midian extended south into the peninsula of Arabia Proper. The elder branch of the "sons of the concubines," however, was that of Ishmael. He has ever stood as the representative of the bondwoman's sons; and as such his name has become generally applied by the Arabs to all the Abrahamic settlers north of the Peninsula—besides the great Ishmaelite element of the nation.

In searching the works of Arab writers for any information respecting these tribes, we must be contented to find them named as Abrahamic, or even Ishmaelite, for under the latter appellation almost all the former are confounded by their descendants. Keturah[c] herself is by them mentioned very rarely and vaguely, and evidently only in quoting from a rabbinical writer. (In the *Kámoos* the name is said to be that of the Turks, and that of a young girl (or slave) of Abraham; and, it is added, her descendants are the Turks!) M. Caussin de Perceval (*Essai*, i. 179) has endeavoured to identify her with the name of a tribe of the Amalekites (the 1st Amalek) called *Katoorà*,[d] but his arguments are not of any weight. They rest on a weak etymology, and are contradicted by the statements of Arab authors as well as by the fact that the early tribes of Arabia (of which is Katoorà) have not, with the single exception of Amalek, been identified with any historical names; while the exception of Amalek is that of an apparently aboriginal people whose name is recorded in the Bible; and there are reasons for supposing that these early tribes were aboriginal. [E. S. P.]

KEY (מַפְתֵּחַ, from פָּתַח, "to open," Ges. p. 1138: κλείς; *clavis*). The key of a native Oriental lock is a piece of wood, from 7 inches to 2 feet in length, fitted with wires or short nails, which, being inserted laterally into the hollow bolt which serves as a lock, raises other pins within the staple so as to allow the bolt to be drawn back. But it is not difficult to open a lock of this kind even without a key, viz. with the finger dipped in paste or other adhesive substance. The passage Cant. v. 4, 5, is thus probably explained (Harmer, *Obs.* iii. 31; vol. i. 394, ed. Clarke; Rauwolff, ap. Ray, *Trav.* ii. 17). [LOCK.] The key, so obvious a symbol of authority, both in ancient and modern times, is named more than once in the Bible, especially Is. xxii. 22, a passage to which allusion is probably made in Rev. iii. 7. The expression "bearing the key on the shoulder" is thus a phrase used, sometimes perhaps in the literal sense, to denote possession of office; but there seems no reason to suppose, with Grotius, any figure of a key embroidered on the garment of the office-bearer (see Is. ix. 6). In Talmudic phraseology the Almighty was represented as "holding the keys" of various operations of nature, *e. g.* rain, death, &c., i. *e.* exercising dominion over them. The delivery of the key is therefore an act expressive of authority conferred, and the possession of it implies authority of some kind held by the receiver. The term "chamberlain," an officer whose mark of office is sometimes in modern times an actual key, is explained under EUNUCH Grotius, Calmet, Knobel, on Is. xxii. 22; Hammond; Lightfoot, *Hor. Hebr.*; De Wette on Matt. xvi. 19; Carpzov on Goodwin, *Moses and Aaron*, pp. 141, 682; *Dict. of Antiq.* art. "Matrimonium;" Ovid, *Fast.* i. 99, 118, 125, 139; Hottmann, *Lex.*

[a] So Ewald, *Propheten*, "Die Städte Moabs."

[b] אִשָּׁה.

[c] قنطوراء

[d] قطوراء

"Cucurnius;" Chambers, *Dict.* "Chamberlain;" [illegible], *Ant. Hebr.* ii. 3, 5.) [H. W. P.]

Iron Key. (From Thebes.)

KEZIA (קְצִיעָה: Κασία; Alex. Κασσία: Cassia), the second of the daughters of Job, born to him after his recovery (Job xlii. 14).

KEZIZ, THE VALLEY OF (עֵמֶק קְצִיץ: Ἀσσασείς; Alex. Ἀμεκκασείς: *Vallis Casis*), one of the "cities" of Benjamin (Josh. xviii. 21). That it was the eastern border of the tribe, is evident from its mention in company with BETH-HOGLAH and BETH-HA-ARABAH. The name does not re-apppear in the O. T., but it is possibly intended under the corrupted form BETH-BASI, in 1 Macc. ix. 62, 64. The name, if Hebrew, is derivable from a root meaning to cut off (Ges. *Thes.* 1229; Simonis, *Onom.* 70). Is it possible that it can have any connexion with the general circumcision which took place at Gilgal, certainly in the same neighbourhood, after the Jordan was crossed (Josh. v. 2-9)? [G.]

KIBROTH - HATTA'AVAH (קִבְרוֹת הַתַּאֲוָה: μνήματα τῆς ἐπιθυμίας: *sepulchra concupiscentiae*), Num. xi. 34; marg. "the graves of lust" (comp. xxxiii. 17). From there being no change of spot mentioned between it and Taberah in xi. 3, it is probably, like the latter, about three days' journey from Sinai (x. 33); and from the sea being twice mentioned in the course of the narrative (x. 22, 31), a maritime proximity may perhaps be inferred. Here it seems they abode a whole month, during which they went on eating quails, and perhaps suffering from the plague which followed. If the conjecture of *Hâdherâ* (Burckhardt, p. 495; Robinson, i. 151) as a site for Hazeroth [see HAZEROTH] be adopted, then "the graves of lust" may be perhaps within a day's journey thence in the direction of Sinai, and would lie within 15 miles of the Gulf of Akabah; but no traces of any graves have ever been detected in the region.[a] Both Schubert, between Sinai and the *Wady Murrah* (*Reisen*, 360), and Stanley (*S. & P.* 82), just before reaching *Hâdherâ*, encountered flights of birds—the latter were of "red-legged cranes." Ritter[b] speaks of such flights as a constant phenomenon, both in this peninsula and in the Euphrates region. Burckhardt, *Travels in Syria*, 406, 8 Aug., quotes Russell's *Aleppo*, ii. 194, and says the bird *Katta* is found in great numbers in the neighbourhood of *Tûfileh*. [TOPHEL.] He calls it a species of partridge, or "not improbably the *Seloua* or quail."[c] Boys not uncommonly kill three or four of them at one throw with a stick." [H. H.]

KIBZA'IM (קִבְצַיִם: Vat. omits; Alex. ἡ Καβσαείμ: *Cebsaim*), a city of Mount-Ephraim, not named in the meagre, and probably imperfect, lists of the towns of that great tribe (see Josh. xvi.), but mentioned elsewhere as having been given up with its "suburbs" to the Kohathite Levites (xxi. 22). In the parallel list of 1 Chr. vi. JOKMEAM is substituted for Kibzaim (ver. 68), an exchange which, as already pointed out under the former name, may have arisen from the similarity between the two in the original. Jokmeam would appear to have been situated at the eastern quarter of Ephraim. But this is merely inference, no trace having been hitherto discovered of either name.

Interpreted as a Hebrew word, Kibzaim signifies "two heaps." [G.]

KID. [GOAT: see Appendix A.]

KID'RON, THE BROOK (נַחַל קִדְרוֹן[d]: ὁ χείμαρρος Κέδρων and τῶν κέδρων; in Jer. only Νάχαλ Κέδρων, and Alex. χείμαρρος Νάχαλ K.: *torrens Cedron*), a torrent or valley—not a "brook," as in the A. V.—in immediate proximity to Jerusalem. It is not named in the earlier records of the country, or in the specification of the boundaries of Benjamin or Judah, but comes forward in connexion with some remarkable events of the history. It lay between the city and the Mount of Olives, and was crossed by David in his flight (2 Sam. xv. 23, comp. 30), and by our Lord on His way to Gethsemane (John xviii. 1;[e] comp. Mark xiv. 26; Luke xxii. 39). Its connexion with these two occurrences is alone sufficient to leave no doubt that the Nachal-Kidron is the deep ravine on the east of Jerusalem, now commonly known as the "Valley of Jehoshaphat." But it would seem as if the name were formerly applied also to the ravines surrounding other portions of Jerusalem—the south or the west; since Solomon's prohibition to Shimei to "pass over the torrent Kidron" (1 K. ii. 37; Jos. *Ant.* viii. 1, §5) is said to have been broken by the latter when he went in the direction of Gath to seek his fugitive slaves (41, 42). Now a person going to Gath would certainly not go by the way of the Mount of Olives, or approach the eastern side of the city at all. The route—whether Gath were at *Beit-Jibrîn* or at *Tell es-Safieh*—would be by the

[a] Save one of a Mahommedan saint (Stanley, *S. & P.* 78), which does not assist the question.

[b] He remarks on the continuance of the law of nature in animal habits through a course of thousands of years (xiv. 261).

[c] Pliny, *Nat. Hist.* x. 33, says quails settle on the masts of ships by night, so as to sink sometimes the ships in the neighbouring sea. So Diod. Sic. i. p. 38: τὰ πλοῖα τῶν ὀρτυγῶν ἐπιοῦσῶν, ἐφέροντό τε οὗτοι ἐπ' ἠόνας, μείζους ἢ κατὰ τοὺ πελάγους (Lepsius, *Thebes & Sinai*, 23). Comp. Joseph. *Ant.* iii. 1, §5; and Freytag, *Lex. Arab.* s. v. [illegible]; also Kalisch on Ex. xvi. 13, where an incidental mention of the bird occurs. The Lamaean name appears to be *Thêrao Alohata*.

[d] The name is derived by Gesenius and others from קָדַר "black;" either, according to Robinson, from the turbidness of its stream (comp. Job vi. 16; though the words of Job imply that this was a condition of all brooks when frozen); or more appropriately, with Stanley, from the depth and obscurity of the ravine (*S. & P.* 172); possibly also—though this is proposed with hesitation—from the impurity which seems to have attached to it from a very early date.

We cannot, however, too often insist on the great uncertainty which attends the derivations of these ancient names; and in treating Kidron as a Hebrew word, we may be making a mistake almost as absurd as that of the copyists who altered it into τῶν κέδρων, believing that it arose from the presence of cedars.

[e] Here, and here only, the form used in the A. V. is CEDRON. The variations in the Greek text are very curious. Codex A has τοῦ κέδρων; B, τῶν κέδρων; [illegible], τοῦ κέδρου, and in some cursive MSS. quoted by Tischendorf we even find τῶν δένδρων

Bethlehem-gate, and then nearly due west. Perhaps the prohibition may have been a more general one than is implied in ver. 37 (comp. the king's reiteration of it in ver. 42), the Kidron being in that case specially mentioned because it was on the road to Bahurim, Shimei's home, and the scene of his crime. At any rate, beyond the passage in question, there is no evidence of the name Kidron having been applied to the southern or western ravines of the city.

The distinguishing peculiarity of the Kidron valley—that in respect to which it is most frequently mentioned in the O. T.—is the impurity which appears to have been ascribed to it. Excepting the two casual notices already quoted, we first meet with it as the place in which King Asa demolished and burnt the obscene phallic idol (vol. i. 848*a*) of his mother (1 K. xv. 13; 2 Chr. xv. 16). Next we find the wicked Athaliah hurried thither to execution (Jos. *Ant.* ix. 7, §3; 2 K. xi. 16). It then becomes the regular receptacle for the impurities and abominations of the idol-worship, when removed from the Temple and destroyed by the adherents of Jehovah[a] (2 Chr. xxix. 16, xxx. 14; 2 K. xxiii. 4, 6, 12). In the course of these narratives the statement of Josephus just quoted as to the death of Athaliah is supported by the fact that in the time of Josiah it was the common cemetery of the city (2 K. xxiii. 6; comp. Jer. xxvi. 23, "graves of the common people"), perhaps the "valley of dead bodies" mentioned by Jeremiah (xxxi. 40) in close connexion with the "fields" of Kidron; and the restoration of which to sanctity was to be one of the miracles of future times (*ibid.*).

How long the valley continued to be used for a burying-place it is very hard to ascertain. After the capture of Jerusalem in 1099 the bodies of the slain were buried outside the Golden Gateway (Mislin, ii. 487; Tobler, *Umgebungen*, 218); but what had been the practice in the interval the writer has not succeeded in tracing. To the date of the monuments at the foot of Olivet we have at present no clue; but even if they are of pre-Christian times there is no proof that they are tombs. From the date just mentioned, however, the burials appear to have been constant, and at present it is the favourite resting-place of Moslems and Jews, the former on the west, the latter on the east of the valley. The Moslems are mostly confined to the narrow level spot between the foot of the wall and the commencement of the precipitous slope; while the Jews have possession of the lower part of the slopes of Olivet, where their scanty tombstones are crowded so thick together as literally to cover the surface like a pavement.

The term *Nachal*[b] is in the O. T., with one single exception (2 K. xxiii. 4), attached to the name of Kidron, and apparently to that alone of the valleys or ravines of Jerusalem. Hinnom is always the *Ge*. This enables us to infer with great probability that the Kidron is intended in 2 Chr. xxxii. 4, by the "*brook* (Nachal) which ran through the midst of the land;" and that Hezekiah's preparations for the siege consisted in sealing the source of the Kidron—"the upper springhead (not 'watercourse,' as A. V.) of Gihon" where it burst out in the wady some distance north of the city, and leading it by a subterranean channel to the interior of the city. If this is so, there is no difficulty in accounting for the fact of the subsequent want of water in the ancient bed of the Kidron. In accordance with this also is the specification of Gihon as "Gihon-in-the-Nachal"—that is, in the Kidron valley—though this was probably the lower of two outlets of the same name. [GIHON.] By Jerome, in the *Onomasticon*, it is mentioned as "close to Jerusalem on the eastern side, and spoken of by John the Evangelist." But the favourite name of this valley at the time of Jerome, and for several centuries after, was "the valley of Jehoshaphat," and the name Kidron, or, in accordance with the orthography of the Vulgate, Cedron, is not invariably found in the travellers (see Arculf, *E. Trav.* 1; Saewulf, 41; Benjamin of Tudela; Maundeville, *E. Trav.* 176; Thietmar, 27: but not the Bordeaux Pilgrim, the Citez de Jherusalem, Willibald, &c.).

The following description of the valley of Kidron in its modern state—at once the earliest and the most accurate which we possess—is taken from Dr. Robinson (*B. R.* i. 269):—

"In approaching Jerusalem from the high mosk of *Neby Samwîl* in the N.W. the traveller first descends and crosses the bed of the great *Wady Beit Hanîna* already described. He then ascends again towards the S.E. by a small side wady and along a rocky slope for twenty-five minutes, when he reaches the Tombs of the Judges, lying in a small gap or depression of the ridge, still half an hour distant from the northern gate of the city. A few steps further he reaches the watershed between the great wady behind him and the tract before him; and here is the head of the Valley of Jehoshaphat. From this point the dome of the Holy Sepulchre bears S. by E. The tract around this spot is very rocky; and the rocks have been much cut away, partly in quarrying building-stone, and partly in the formation of sepulchres. The region is full of excavated tombs; and these continue with more or less frequency on both sides of the valley, all the way down to Jerusalem. The valley runs for 15 minutes directly towards the city;[c] it is here shallow and broad, and in some parts tilled, though very stony. The road follows along its bottom to the same point. The valley now turns nearly east, almost at a right angle, and passes to the northward of the Tombs of the Kings and the *Muslim Wely* before mentioned. Here it is about 200 rods distant from the city; and the tract between is tolerably level ground, planted with olive-trees. The *Nâbulus* road crosses it in this part, and ascends the hill on the north. The valley is here still shallow, and runs in the same direction for about 10 minutes. It then bends again to the south, and, following this general course, passes between the city and the Mount of Olives.

"Before reaching the city, and also opposite its northern part, the valley spreads out into a basin

[a] The Targum appears to understand the obscure passage Zeph. i. 11, as referring to the destruction of the idolatrous worship in Kidron, for it renders it, "Howl all ye that dwell in the Nachal Kidron, for all the people are broken whose works were like the works of the people of the land of Canaan." [MAKTESH.]

[b] *Nachal* is untranslateable in English unless by "Wady," to which it answers exactly, and which bids fair to become shortly an English word. It does not signify the stream, or the valley which contained the bed of the stream, and was its receptacle when swollen by winter-rains—but both. [RIVER.]

[c] See a slight correction of this by Tobler, *Umgebungen*, 22.

of some breadth, which is tilled, and contains plantations of olive and other fruit-trees. In this part it is crossed obliquely by a road leading from the N.E. corner of Jerusalem across the northern part of the Mount of Olives to *'Anâta*. Its sides are still full of excavated tombs. As the valley descends, the steep side upon the right becomes more and more elevated above it; until, at the gate of St. Stephen, the height of this brow is about 100 feet. Here a path winds down from the gate on a course S.E. by E., and crosses the valley by a bridge; beyond which are the church with the Tomb of the Virgin, Gethsemane, and other plantations of olive-trees, already described. The path and bridge are on a causeway, or rather terrace, built up across the valley, perpendicular on the south side; the earth being filled in on the northern side up to the level of the bridge. The bridge itself consists of an arch, open on the south side, and 17 feet high from the bed of the channel below; but the north side is built up, with two subterranean drains entering it from above; one of which comes from the sunken court of the Virgin's Tomb, and the other from the fields further in the north-west. The breadth of the valley at this point will appear from the measurements which I took from St. Stephen's Gate to Gethsemane, along the path, viz.—

	Eng. feet.
1. From St. Stephen's Gate to the brow of the descent, level	136
2. Bottom of the slope, the angle of the descent being 16°	415
3. Bridge, level	140
4. N.W. corner of Gethsemane, slight rise ..	145
5. N.E. corner of do. do.	150

The last three numbers give the breadth of the proper bottom of the valley at this spot, viz. 435 feet, or 145 yards. Further north it is somewhat broader.

"Below the bridge the valley contracts gradually, and sinks more rapidly. The first continuous traces of a water-course or torrent-bed commence at the bridge, though they occur likewise at intervals higher up. The western hill becomes steeper and more elevated; while on the east the Mount of Olives rises much higher, but is not so steep. At the distance of 1000 feet from the bridge on a course S. 10° W. the bottom of the valley has become merely a deep gully, the narrow bed of a torrent, from which the hills rise directly on each side. Here another bridge[4] is thrown across it on an arch; and just by on the left are the alleged tombs of Jehoshaphat, Absalom, and others; as also the Jewish cemetery. The valley now continues of the same character, and follows the same course (S. 10° W.) for 550 feet further; where it makes a sharp turn for a moment towards the right. This portion is the narrowest of all; it is here a mere ravine between high mountains. The S.E. corner of the area of the mosk overhangs this part, the corner of the wall standing upon the very brink of the declivity. From it to the bottom, on a course S.E. the angle of depression is 27°, and the distance 450 feet, giving an elevation of 128 feet at that point; to which may be added 20 feet or more for the rise of ground just north along the wall; making in all an elevation of about 150 feet. Thus, however, is the highest point above the valley; for further south the narrow ridge of Ophel slopes down as rapidly as the valley itself. In this part of the valley one would expect to find, if anywhere, traces of ruins thrown down from above, and the ground raised by the rubbish thus accumulated. Occasional blocks of stone are indeed seen; but neither the surface of the ground, nor the bed of the torrent, exhibits any special appearance of having been raised or interrupted by masses of ruins.

"Below the short turn above mentioned, a line of 1025 feet on a course S.W. brings us to the Fountain of the Virgin, lying deep under the western hill. The valley has now opened a little; but its bottom is still occupied only by the bed of the torrent. From here a course S. 20° W. carried us along the village of Siloam (*Kefr Selwân*) on the eastern side, and at 1170 feet we were opposite the mouth of the Tyropoeon and the Pool of Siloam, which lies 255 feet within it. The mouth of this valley is still 40 or 50 feet higher than the bed of the Kidron. The steep descent between the two has been already described as built up in terraces, which, as well as the strip of level ground below, are occupied with gardens belonging to the village of Siloam. These are irrigated by the waters of the Pool of Siloam, which at this time were lost in them. In these gardens the stones have been removed, and the soil is a fine mould. They are planted with fig and other fruit-trees, and furnish also vegetables for the city. Elsewhere the bottom of the valley is thickly strewed with small stones.

"Further down, the valley opens more and is tilled. A line of 685 feet on the same course (S. 20° W.) brought us to a rocky point of the eastern hill, here called the Mount of Offence, over against the entrance of the Valley of Hinnom. Thence to the well of Job or Nehemiah is 275 feet due south. At the junction of the two valleys the bottom forms an oblong plat, extending from the gardens above mentioned nearly to the well of Job, and being 150 yards or more in breadth. The western and north-western parts of this plat are in like manner occupied by gardens; many of which are also on terraces, and receive a portion of the waters of Siloam.

"Below the well of Nehemiah the Valley of Jehoshaphat continues to run S.S.W. between the Mount of Offence and the Hill of Evil Counsel, so called. At 130 feet is a small cavity or outlet by which the water of the well sometimes runs off. At about 1200 feet, or 400 yards, from the well is a place under the western hill, where in the rainy season water flows out as from a fountain. At about 1500 feet or 500 yards below the well the valley bends off S. 75° E. for half a mile or more, and then turns again more to the south, and pursues its way to the Dead Sea. At the angle where it thus bends eastward a small wady comes in from the west, from behind the Hill of Evil Counsel. The width of the main valley below the well, as far as to the turn, varies from 50 to 100 yards; it is full of olive and fig-trees, and is in most parts ploughed and sown with grain. Further down it takes the name among the Arabs of *Wady er-Rdhib*, 'Monks' Valley,' from the convent of St. Saba situated on it; and still nearer to the Dead Sea it is also called *Wady en-Nâr*, 'Fire Valley.'[5]

[4] For a minute account of the two bridges, see Robinson, *Unterbauungen*, 35-39.

[5] A list of some of the plants found in this valley is given by Mislin (iii. 269); and some scraps of information about the valley itself at p. 199.

"The channel of the Valley of Jehoshaphat, the Brook Kidron of the Scriptures, is nothing more than the dry bed of a wintry torrent, bearing marks of being occasionally swept over by a large volume of water. No stream flows here now except during the heavy rains of winter, when the waters descend into it from the neighbouring hills. Yet even in winter there is no constant flow; and our friends, who had resided several years in the city, had never seen a stream running through the valley. Nor is there any evidence that there was anciently more water in it than at present. Like the wadys of the desert, the valley probably served of old, as now, only to drain off the waters of the rainy season."

One point is unnoticed in Dr. Robinson's description, sufficiently curious and well-attested to merit further careful investigation—the possibility that the Kedron flows below the present surface of the ground. Dr. Barclay (*City*, &c. 302) mentions "a fountain that bursts forth during the winter in a valley entering the Kedron from the north, and flows several hundred yards before it sinks;" and again he testifies that at a point in the valley about two miles below the city the murmurings of a stream deep below the ground may be distinctly heard, which stream, on excavation, he actually discovered (*ibid.*). His inference is that between the two points the brook is flowing in a subterraneous channel, as is "not at all unfrequent in Palestine" (p. 303). Nor is this a modern discovery, for it is spoken of by William of Tyre; by Brocardus (*Descr.* cap. viii.), as audible near the "Tomb of the Virgin;" and also by Fabri (i. 370), Marinus Sanutus (3, 14, 9), and others.

That which Dr. Robinson complains that neither he nor his friends were fortunate enough to witness has since taken place. In the winter of 1853-4 so heavy were the rains, that not only did the lower part of the Kidron, below the so-called well of Nehemiah or Joab, run with a considerable stream for the whole of the month of March (Barclay, 515), but also the upper part, "in the middle section of the Valley of Jehoshaphat, flowed for a day or two" (Stewart, *Tent & Khan*, 316). The Well of Joab is probably one of the outlets of the mysterious spring which flows below the city of Jerusalem, and its overflow is comparatively common;[f] but the flowing of a stream in the upper part of the valley would seem not to have taken place for many years before the occasion in question, although it occurred also in the following winter (*Jewish Intelligencer*, May 1856, p. 137 *note*), and, as the writer is informed, has since become almost periodical. [G.]

KI'NAH (קִינָה: Ἰκδμ; Alex. Κιvδ: *Cina*), a city of Judah, one of those which lay on the extreme south boundary of the tribe, next to Edom (Josh. xv. 22). It is mentioned in the *Onomasticon* of Eusebius and Jerome, but not so as to imply that they had any actual knowledge of it. With the sole exception of Schwarz (99), it appears to be unmentioned by any traveller, and the "town Cinah situated near the wilderness of Zin" with which he would identify it, is not to be found in his own or any other map.

Professor Stanley (*S. & P.* 160) very ingeniously connects Kinah with the Kenites (הַקֵּינִי), who settled in this district (Judg. i. 16). But it should not be overlooked that the list in Josh. xv. purports to record the towns as they were at the conquest, while the settlement of the Kenites probably (though not certainly) did not take place till after it. [G.]

KINDRED.[a] I. Of the special names denoting relation by consanguinity, the principal will be found explained under their proper heads, FATHER BROTHER, &c. It will be there seen that the words which denote near relation in the direct line are used also for the other superior or inferior degrees in that line, as grandfather, grandson, &c.

On the meaning of the expression *Sh'ér basar* (see below 1 and 2) much controversy has arisen. *Sh'ér*, as shown below, is in Lev. xviii. 6, in marg. of A. V., "remainder." The rendering, however, of *Sh'ér basar* in text of A. V., "near of kin," may be taken as correct, but, as Michaelis shows, without determining the precise extent to which the expression itself is applicable (Mich. *Laws of Moses*, ii. 48, ed. Smith; Knobel on *Leviticus*; see also Lev. xxv. 49; Num. xxvii. 11).

II. The words which express collateral consanguinity are—1. uncle;[b] 2. aunt;[c] 3. nephew;[d] 4. niece (not in A. V.); 5. cousin.[e]

[f] "During the latter rains of February and March the well *Ain Ayub* is a subject of much speculation and interest to all dwellers in the city. If it overflows and discharges its waters down the *Wady-en-Nar*, the lower part of the Kidron, then they are certain that they will have abundance of water during the summer; if there is no overflow, their minds are filled with forebodings." (Stewart, 316.)

[a] 1. (*a*) שְׁאֵר, "flesh;" οἰκεῖος; *caro*. (*b*) שְׁאֵרָה, "kinswoman," also "kindred," οἰκεία, *caro*, from שָׁאַר, "to swell," also "to remain," *i. e.* "be superfluous." Whence comes שְׁאֵר, "remainder," Ges. 1349-50. Hence, in Lev. xviii. 6, A. V. has in margin "remainder."

2. בָּשָׂר, "flesh," σάρξ, *caro*, from בָּשַׂר, "be joyful," *i. e.* conveying the notion of beauty, Ges. p. 248.

3. מִשְׁפָּחָה, "family," φυλή, *familia*, applied both to races and single families of mankind, and also to animals.

4. (*a*) מוֹדָע, מֹדָע, and in Keri מוֹדַע, from יָדַע, "see," "know." (*b*) Also, from same root, מְיֻדָּעָת, "kindred;" and hence "kinsman," or "kinswoman," used, like "acquaintance," in both senses, Ges. p. 574. But Buxtorf limits (*b*) to the abstract sense, (*a*) to the concrete, γνώριμος, *propinquus*.

5. אֲחוֹת, "brotherhood," διαθήκη, *germanitas*, Ges. p. 63.

Nearly allied with the foregoing in sense are the following general terms:—

6. קָרוֹב, "near," hence "a relative," ὁ ἐγγὺς *propinquus*, Ges. p. 1234.

7. גֹּאֵל, from גָּאַל, "redeem," Ges. p. 253, ὁ ἐγχιστεύων, "a kinsman," *i. e.* the relative to whom belonged the right of redemption or of vengeance.

[b] דּוֹד, ἀδελφὸς τοῦ πατρός, εἰκεῖος; *patruus*.

[c] דּוֹדָה or דֹּדָה, ἡ συγγενὴς, *uxor patrui*.

[d] נִין, in connexion with נֶכֶד, "offspring;" but see JOCHEBED. It is rendered "nephew" in A. V., but indicates a descendant in general, and is usually so rendered by LXX. and Vulg. See Ges. p. 864.

[e] συγγενής, *cognatus*, Luke i. 36, 58.

III. The terms of affinity are—1. (*a*) father-in-law,[f] (*b*) mother-in-law;[g] 2. (*a*) son-in-law,[h] (*b*) daughter-in-law;[i] 3. (*a*) brother-in-law,[k] (*b*) sister-in-law.[m]

The relations of kindred, expressed by few words, and imperfectly defined in the earliest ages, acquired in course of time greater significance and wider influence. The full list of relatives either by consanguinity, *i. e.* as arising from a common ancestor, or by affinity, *i. e.* as created by marriage, may be seen detailed in the *Corpus Juris Civ. Digest.* lib. xxxviii. tit. 10, *de Gradibus*; see also *Corp. Jur. Canon. Decr.* ii. c. xxxv. 9, 5.

The domestic and economical questions arising out of kindred may be classed under the three heads of MARRIAGE, INHERITANCE, and BLOOD-REVENGE, and the reader is referred to the articles on those subjects for information thereon. It is clear that the tendency of the Mosaic Law was to increase the restrictions on marriage, by defining more precisely the relations created by it, as is shown by the cases of Abraham and Moses. [ISCAH; JOCHEBED.] For information on the general subject of kindred and its obligations, see Selden, *de Jure Naturali*, lib. v.; Michaelis, *Laws of Moses*, ed. Smith, ii. 36; Knobel on Lev. xviii.; Philo, *de Spec. Leg.* iii. 3, 4, 5, vol. ii. 301-304, ed. Mangey; Burckhardt, *Arab Tribes*, i. 150; Keil, *Bibl. Arch.* ii. p. 50, §106, 107. [H. W. P.]

KINE. [COW: See Appendix A.]

KING (מֶלֶךְ, *melek*: βασιλεύς: *rex*), the name of the Supreme Ruler of the Hebrews during a period of about 500[a] years previous to the destruction of Jerusalem, B.C. 586. It was borne first by the Ruler of the 12 Tribes united, and then by the Rulers of Judah and Israel separately.

The immediate occasion of the substitution of a regal form of government for that of the Judges, seems to have been the siege of Jabesh-Gilead by Nahash, king of the Ammonites (1 Sam. xi. 1, xii. 12, and the refusal to allow the inhabitants of that city to capitulate, except on humiliating and cruel conditions (1 Sam. xi. 2, 4-6). The conviction seems to have forced itself on the Israelites that they could not resist their formidable neighbour unless they placed themselves under the sway of a king, like surrounding nations. Concurrently with this conviction, disgust had been excited by the corrupt administration of justice under the sons of Samuel, and a radical change was desired by them in this respect also (1 Sam. viii. 3-5). Accordingly the original idea of a Hebrew king was twofold: first, that he should lead the people to battle in time of war; and, 2ndly, that he should execute judgment and justice to them in war and in peace (1 Sam. viii. 20). In both respects the desired end was attained. The righteous wrath and military capacity of Saul were immediately triumphant over the Ammonites; and though ultimately he was defeated and slain in battle with the Philistines, he put even them to flight on more than one occasion (1 Sam. xiv. 23, xvii. 52), and generally waged successful war against the surrounding nations (1 Sam. xiv. 47). His successor, David, entered on a series of brilliant conquests over the Philistines, Moabites, Syrians, Edomites, and Ammonites [see DAVID, vol. i. 410]; and the Israelites, no longer confined within the narrow bounds of Palestine, had an empire extending from the river Euphrates to Gaza, and from the entering in of Hamath to the river of Egypt (1 K. iv. 21). In the meanwhile complaints cease of the corruption of justice; and Solomon not only consolidated and maintained in peace the empire of his father, David, but left an enduring reputation for his wisdom as a judge. Under this expression, however, we must regard him, not merely as pronouncing decisions, primarily, or in the last resort, in civil and criminal cases, but likewise as holding public levees and transacting public business "at the gate," when he would receive petitions, hear complaints, and give summary decisions on various points, which in a modern European kingdom would come under the cognizance of numerous distinct public departments.

To form a correct idea of a Hebrew king, we must abstract ourselves from the notions of modern Europe, and realise the position of Oriental sovereigns. It would be a mistake to regard the Hebrew government as a limited monarchy, in the English sense of the expression. It is stated in 1 Sam. x. 25, that Samuel "told the people the manner[b] of the kingdom, and wrote it in the book and laid it before the Lord," and it is barely possible that this may refer to some statement respecting the boundaries of the kingly power. But no such document has come down to us; and if it ever existed, and contained restrictions of any moment on the kingly power, it was probably disregarded in practice. The following passage of Sir John Malcolm respecting the Shahs of Persia, may, with some slight modifications, be regarded as fairly applicable to the Hebrew monarchy under David and Solomon:—"The monarch of Persia has been pronounced to be one of the most absolute in the world. His word has ever been deemed a law: and he has probably never had any further restraint upon the free exercise of his vast authority than has arisen from *his regard for religion*, his respect for established usages, his desire of reputation, and

[f] חָם, πενθερός, *socer*.

[g] חֲמוֹת, πενθερά, *socrus*.

[h] חֹתֵן, γαμβρός, *socer*, from חָתַן, "give in marriage," whence come part. in Kal. חֹתֵן, m., and חֹתֶנֶת, f. father-in-law and mother-in-law, *i. e.* parents who give a daughter in marriage.

[i] כַּלָּה, νύμφη, *nurus*.

[k] יָבָם, ἀδελφὸς τοῦ ἀνδρός, *levir*.

[m] יְבִמָה, γυνὴ τοῦ ἀδελφοῦ, *uxor fratris*.

[a] The precise period depends on the length of the reign of Saul, for estimating which there are no certain data. In the O. T. the exact length is nowhere mentioned. In Acts xiii. 21 forty years are specified; but this is in a speech, and statistical accuracy may have been foreign to the speaker's ideas on that occasion. And there are difficulties in admitting that he reigned so long as forty years. See Winer *sub voc.*, and the article SAUL in this volume. It is only in the reign of David that mention is first made of the "recorder" or "chronicler" of the king (2 Sam. viii. 16). Perhaps the contemporary notation of dates may have commenced in David's reign.

[b] The word מִשְׁפָּט, translated "manner" in the A. V., is translated in the LXX. δικαίωμα, *i. e.* statute or ordinance (see Ecclus. iv. 17, Bar. ii. 12, iv. 13). But Josephus seems to have regarded the document as a prophetical statement, read before the king, of the calamities which were to arise from the kingly power, as a kind of protest recorded for succeeding ages (see *Ant.* vi. 4, §6).

his fear of exciting an opposition that might be dangerous to his power, or to his life" (Malcolm's *Persia*, vol. ii. 303; compare Elphinstone's *India, or the Indian Mahometan Empire*, book viii. c. 3). It must not, however, be supposed to have been either the understanding, or the practice, that the sovereign might seize at his discretion the private property of individuals. Ahab did not venture to seize the vineyard of Naboth till, through the testimony of false witnesses, Naboth had been convicted of blasphemy; and possibly his vineyard may have been seized as a confiscation, without flagrantly outraging public sentiment in those who did not know the truth (1 K. xi. 6). But no monarchy perhaps ever existed in which it would not be regarded as an outrage, that the monarch should from covetousness seize the private property of an innocent subject in no ways dangerous to the state. And generally, when Sir John Malcolm proceeds as follows, in reference to "one of the most absolute" monarchs in the world, it will be understood that the Hebrew king, whose power might be described in the same way, is not, on account of certain restraints which exist in the nature of things, to be regarded as "a limited monarch" in the European use of the words. "We may assume that the power of the king of Persia is by usage absolute over the property and lives of his conquered enemies, *his rebellious subjects, his own family, his ministers, over public officers civil and military, and all the numerous train of domestics; and that he may punish any person of these classes, without examination or formal procedure of any kind:* in all other cases that are capital, the forms prescribed by law and custom are observed; the monarch only commands, when the evidence has been examined and the law declared, that the sentence shall be put in execution, or that the condemned culprit shall be pardoned" (vol. ii. 306). In accordance with such usages, David ordered Uriah to be treacherously exposed to death in the forefront of the hottest battle (2 Sam. xi. 15); he caused Rechab and Baanah to be slain instantly, when they brought him the head of Ishbosheth (2 Sam. iv. 12); and he is represented as having on his death-bed recommended Solomon to put Joab and Shimei to death (1 K. ii. 5-9). In like manner, Solomon caused to be killed, without trial, not only his elder brother Adonijah, and Joab, whose execution might be regarded as the exceptional acts of a dismal state-policy in the beginning of his reign, but likewise Shimei, after having been seated on the throne three years. And King Saul, in resentment at their connivance with David's escape, put to death 85 priests, and caused a massacre of the inhabitants of Nob, including women, children, and sucklings (1 Sam. xxii. 18, 19).

Besides being commander-in-chief of the army, supreme judge, and absolute master, as it were, of the lives of his subjects, the king exercised the power of imposing taxes on them, and of exacting from them personal service and labour. Both these points seem clear from the account given (1 Sam. viii. 11-17) of the evils which would arise from the kingly power; and are confirmed in various ways. Whatever mention may be made of consulting "old men," or "elders of Israel," we never read of their deciding such points as these. When Pul, the king of Assyria, imposed a tribute on the kingdom of Israel, "Menahem, the king," exacted the money of all the mighty men of wealth, of each man 50 shekels of silver (2 K. xv. 19). And when Jehoiakim, king of Judah, gave his tribute of silver and gold to Pharaoh, *he* taxed the land to give the money; he exacted the silver and gold of the people of every one according to his taxation (2 K. xxiii. 35). And the degree to which the exaction of personal labour might be carried on a special occasion, is illustrated by King Solomon's requirements for building the temple. He raised a levy of 30,000 men, and sent them to Lebanon by courses of ten thousand a month; and he had 70,000 that bare burdens, and 80,000 hewers in the mountains (1 K. v. 13-15). Judged by the Oriental standard, there is nothing improbable in these numbers. In our own days, for the purpose of constructing the Mahmoodeyeh Canal in Egypt, Mehemet Ali, by orders given to the various sheikhs of the provinces of Sakarah, Ghizeh, Mensourah, Sharkieh, Menouf, Bahyreh, and some others, caused 300,000 men, women, and children, to be assembled along the site of the intended canal.[e] This was 120,000 more than the levy of Solomon.

In addition to these earthly powers, the King of Israel had a more awful claim to respect and obedience. He was the vicegerent of Jehovah (1 Sam. x. 1, xvi. 13), and as it were His son, if just and holy (2 Sam. vii. 14; Ps. lxxxix. 26, 27, ii. 6, 7). He had been set apart as a consecrated ruler. Upon his head had been poured the holy anointing oil, composed of olive-oil, myrrh, cinnamon, sweet calamus, and cassia, which had hitherto been reserved exclusively for the priests of Jehovah, especially the high-priest, or had been solely used to anoint the Tabernacle of the Congregation, the Ark of the Testimony, and the vessels of the Tabernacle (Ex. xxx. 23-33, xl. 9; Lev. xxi. 10; 1 K. i. 39). He had become, in fact, emphatically "the Lord's Anointed." At the coronation of sovereigns in modern Europe, holy oil has been frequently used, as a symbol of divine right; but this has been mainly regarded as a mere form; and the use of it was undoubtedly introduced in imitation of the Hebrew custom. But, from the beginning to the end of the Hebrew monarchy, a living real significance was attached to consecration by this holy anointing oil. From well-known anecdotes related of David,—and perhaps, from words in his lamentation over Saul and Jonathan (2 Sam. i. 21)—it results that a certain sacredness invested the person of Saul, the *first* king, as the Lord's anointed; and that, on this account, it was deemed sacrilegious to kill him, even at his own request (1 Sam. xxiv. 6, 10, xxvi. 9, 16; 2 Sam. i. 14). And, after the destruction of the first Temple, in the Book of Lamentations over the calamities of the Hebrew people, it is by the name of "the Lord's Anointed" that Zedekiah, the *last* king of Judah, is bewailed (Lam. iv. 20). Again, more than 600 years after the capture of Zedekiah, the name of the Anointed, though never so used in the Old Testament—yet suggested probably by Ps. ii. 2, Dan. ix. 26—had

[e] See *The Englishwoman in Egypt*, by Mrs. Poole, vol. ii. p. 219. Owing to insufficient provisions, bad treatment, and neglect of proper arrangements, 30,000 of this number perished in seven months (p. 220). In compulsory levies of labour, it is probably difficult to prevent gross instances of oppression. At the rebellion of the ten tribes, Adoniram, called also Adoram, who was over the levy of 30,000 men for Lebanon, was stoned to death (1 K. xii. 18; 1 K. v. 14; 2 Sam xx. 24).

became appropriated to the expected king, who was to restore the kingdom of David, and inaugurate a period when Edom, Moab, the Ammonites, and the Philistines, would again be incorporated with the Hebrew monarchy, which would extend from the Euphrates to the Mediterranean Sea and to the ends of the earth (Acts i. 6; John i. 41, iv. 25; Is. xi. 12-14; Ps. lxxii. 8). And thus the identical Hebrew word which signifies anointed,[4] through its Aramaic form adopted into Greek and Latin, is still preserved to us in the English word *Messiah*. (See Gesenius's *Thesaurus*, p. 825.)

A ruler in whom so much authority, human and divine, was embodied, was naturally distinguished by outward honours and luxuries. He had a court of Oriental magnificence. When the power of the kingdom was at its height, he sat on a throne of ivory, covered with pure gold, at the feet of which were two figures of lions. The throne was approached by 6 steps, guarded by 12 figures of lions, two on each step. The king was dressed in royal robes (1 K. xxii. 10; 2 Chr. xviii. 9); his insignia were, a crown or diadem of pure gold, or perhaps radiant with precious gems (2 Sam. i. 10, xii. 30; 2 K. xi. 12; Ps. xxi. 3), and a royal sceptre (Ex. xix. 11; Is. xiv. 5; Ps. xiv. 6; Am. i. 5, 8). Those who approached him did him obeisance, bowing down and touching the ground with their foreheads (1 Sam. xxiv. 8; 2 Sam. xix. 24); and this was done even by a king's wife, the mother of Solomon (1 K. i. 16). Their officers and subjects called themselves his servants or slaves, though they do not seem habitually to have given way to such extravagant salutations as in the Chaldæan and Persian courts (1 Sam. xvii. 32, 34, 36, xx. 8; 2 Sam. vi. 20; Dan. ii. 4). As in the East at present, a kiss was a sign of respect and homage (1 Sam. x. 1, perhaps Ps. ii. 12). He lived in a splendid palace, with porches and columns (1 K. vii. 2-7). All his drinking vessels were of gold (1 K. x. 21). He had a large harem, which in the time of Solomon must have been the source of enormous expense, if we accept as statistically accurate the round number of 700 wives and 300 concubines, in all 1000, attributed to him in the Book of Kings (1 K. xi. 3). As is invariably the case in the great eastern monarchies at present, his harem was guarded by eunuchs; translated "officers" in the A. V. for the most part (1 Sam. viii. 15; 2 K. xxiv. 12, 15; 1 K. xxii. 9; 2 K. viii. 6, ix. 32, 33, xx. 18, xxiii. 11; Jer. xxxviii. 7).

The main practical restraints on the kings seem to have arisen from the prophets and the prophetical order, though in this respect, as in many others, a distinction must be made between different periods and different reigns. Indeed, under all circumstances, much would depend on the individual character of the king or the prophet. No transaction of importance, however, was entered on without consulting the will of Jehovah, either by Urim and Thummim or by the prophets; and it was the general persuasion that the prophet was in an especial sense the servant and messenger of Jehovah, to whom Jehovah had declared his will (Is. xliv. 26; Am. iii. 7; 1 Sam. xxviii. 6, ix. 6: see PROPHETS).

The prophets not only rebuked the king with boldness for individual acts of wickedness, as after the murders of Uriah and of Naboth; but also, by interposing their denunciations or exhortations at critical periods of history, they swayed permanently the destinies of the state. When, after the revolt of the ten tribes, Rehoboam had under him at Jerusalem an army stated to consist of 180,000 men, Shemaiah, as interpreter of the divine will, caused the army to separate without attempting to put down the rebellion (1 K. xii. 21-24). When Judah and Jerusalem were in imminent peril from the invasion of Sennacherib, the prophetical utterance of Isaiah encouraged Hezekiah to a successful resistance (Is. xxxvii. 22-36). On the other hand, at the invasion of Judæa by the Chaldees, Jeremiah prophetically announced impending woe and calamities in a strain which tended to paralyse patriotic resistance to the power of Nebuchadnezzar (Jer. xxxviii. 4, 2). And Jeremiah evidently produced an impression on the king's mind contrary to the counsels of the princes, or what might be called the war-party in Jerusalem (Jer. xxxviii. 14-27).

The law of succession to the throne is somewhat obscure, but it seems most probable that the king during his lifetime named his successor. This was certainly the case with David, who passed over his elder son Adonijah, the son of Haggith, in favour of Solomon, the son of Bathsheba (1 K. i. 30, ii. 22); and with Rehoboam, of whom it is said that he loved Maachah the daughter of Absalom above all his wives and concubines, and that he made Abijah her son to be ruler among his brethren, to make him king (2 Chr. xi. 21, 22). The succession of the first-born has been inferred from a passage in 2 Chr. xxi. 3, 4, in which Jehoshaphat is said to have given the kingdom to Jehoram "because he was the first-born." But this very passage tends to show that Jehoshaphat had the *power* of naming his successor; and it is worthy of note that Jehoram, on his coming to the throne, put to death all his brothers, which he would scarcely, perhaps, have done if the succession of the first-born had been the law of the land. From the conciseness of the narratives in the books of Kings no inference either way can be drawn from the ordinary formula in which the death of the father and succession of his son is recorded (1 K. xv. 8). At the same time, if no partiality for a favourite wife or son intervened, there would always be a natural bias of affection in favour of the eldest son. There appears to have been some prominence given to the mother of the king (2 K. xxiv. 12, 15; 1 K. ii. 19), and it is possible that the mother may have been regent during the minority of a son. Indeed some such custom best explains the possibility of the audacious usurpation of Athaliah on the death of her son Ahaziah: an usurpation which lasted six years after the destruction of all the seed-royal except the young Jehoash (2 K. xi. 1, 3).

The following is a list of some of the officers of the king:—

1. The Recorder or Chronicler, who was perhaps analogous to the Historiographer whom Sir John Malcolm mentions as an officer of the Persian court,

[4] It is supposed both by Jahn (*Archäol. Bib.* §222) and Bauer (in his *Heb. Alterthümer*, §20) that a king was only anointed when a new family came to the throne, or when the right to the crown was disputed. It is usually on such occasions only that the anointing is specified; as in 1 Sam. x. 1, 2 Sam. ii. 4, 1 K. i. 39, 2 K. ix. 3, 2 K. xi. 12: but this is not *invariably* the case (see 2 K. xxiii. 30), and there does not seem sufficient reason to doubt that each individual king was anointed. There can be little doubt, likewise, that the kings of Israel were anointed, though this is not specified by the writers of Kings and Chronicles, who would deem such anointing invalid.

whose duty it is to write the annals of the king's reign (*History of Persia*, c. 23). Certain it is that there is no regular series of minute dates in Hebrew history until we read of this recorder, or *remembrancer*, as the word *mazkîr* is translated in a marginal note of the English version. He signifies one who keeps the memory of events alive, in accordance with a motive assigned by Herodotus for writing his history, viz. that the acts of men might not become extinct by time (Herod. i. 1; 2 Sam. viii. 16; 1 K. iv. 3; 2 K. xviii. 18; Is. xxxvi. 3, 22).

2. The Scribe or Secretary, whose duty would be to answer letters or petitions in the name of the king, to write despatches, and to draw up edicts (2 Sam. viii. 17, xx. 25; 2 K. xii. 10, xix. 2, xxii. 8).

3. The officer who was *over the house* (Is. xxxii. 15, xxxvi. 3). His duties would be those of chief steward of the household, and would embrace all the internal economical arrangements of the palace, the superintendence of the king's servants, and the custody of his costly vessels of gold and silver. He seems to have worn a distinctive robe of office and girdle. It was against Shebna, who held this office, that Isaiah uttered his personal prophecy (xxii. 15-25), the only instance of the kind in his writings (see Ges. *Com. on Isaiah*, p. 694).

4. The king's friend (1 K. iv. 5), called likewise the king's companion. It is evident from the name that this officer must have stood in confidential relation to the king, but his duties are nowhere specified.

5. The keeper of the vestry or wardrobe (2 K. x. 22).

6. The captain of the body-guard (2 Sam. xx. 23). The importance of this officer requires no comment. It was he who obeyed Solomon in putting to death Adonijah, Joab, and Shimei (1 K. ii. 25, 34, 46).

7. Distinct officers over the king's treasures—his storehouses, labourers, vineyards, olive-trees, and sycamore-trees, herds, camels, and flocks (1 Chr. xxvii. 25-31).

8. The officer over all the host or army of Israel, the commander-in-chief of the army, who commanded it in person during the king's absence (2 Sam. xx. 23; 1 Chr. xxvii. 34; 2 Sam. xi. 1). As an instance of the formidable power which a general might acquire in this office, see the narrative in 2 Sam. iii. 30-37, when David deemed himself obliged to tolerate the murder of Abner by Joab and Abishai.

9. The royal counsellors (1 Chr. xxvii. 32; Is. iii. 3, xix. 11, 13). Ahithophel is a specimen of how much such an officer might effect for evil or for good; but whether there existed under Hebrew kings any body corresponding, even distantly, to the English Privy Council, in former times, does not appear (2 Sam. xvi. 20-23, xvii. 1-14).

The following is a statement of the sources of the royal revenues:—

1. The royal demesnes, corn-fields, vineyards, and olive-gardens. Some at least of these seem to have been taken from private individuals, but whether as the punishment of rebellion, or on any other plausible pretext, is not specified (1 Sam. viii. 14; 1 Chr. xxvii. 26-28). 2. The produce of the royal flocks (1 Sam. xxi. 7; 2 Sam. xiii. 23; 2 Chr. xxvi. 10; 1 Chr. xxvii. 25). 3. A nominal tenth of the produce of corn-land and vineyards and of sheep (1 Sam. viii. 15, 17). 4. A tribute from merchants who passed through the Hebrew territory (1 K. x. 14 5. Presents made by his subjects (1 Sam. xvi. 20 1 Sam. x. 27; 1 K. x. 25; Ps. lxxii. 10). There is perhaps no greater distinction in the usages of eastern and western nations than on what relates to the giving and receiving of presents. When made regularly they do in fact amount to a regular tax. Thus, in the passage last referred to in the book of Kings, it is stated that they brought to Solomon "every man his present, vessels of silver and vessels of gold, and garments, and armour, and spices, horses and mules, a rate year by year." 6. In the time of Solomon, the king had trading vessels of his own at sea, which, starting from Eziongeber, brought back once in three years gold and silver, ivory, apes, and peacocks (1 K. x. 22). It is probable that Solomon and some other kings may have derived some revenue from commercial ventures (1 K. ix. 28). 7. The spoils of war taken from conquered nations and the tribute paid by them (2 Sam. viii. 2, 7, 8, 10; 1 K. iv. 21; 2 Chr. xxvii. 5). 8. Lastly, an undefined power of exacting compulsory labour, to which reference has been already made (1 Sam. viii. 12, 13, 16). As far as this power was exercised it was equivalent to so much income. There is nothing in 1 Sam. x. 25, or in 2 Sam. v. 3, to justify the statement that the Hebrews defined in express terms, or in any terms, by a particular agreement or covenant for that purpose, what services should be rendered to the king, or what he could legally require. (See Jahn, *Archäologia Biblica*; Bauer, *Lehrbuch der Hebräischen Alterthümer*; Winer, *s. v.* König.)

It only remains to add, that in Deuteronomy xvii. 14-20 there is a document containing some directions as to what any king who might be appointed by the Hebrews was to do and not to do. The proper appreciation of this document would mainly depend on its date. It is the opinion of many modern writers—Gesenius, De Wette, Winer, Ewald, and others—that the book which contains the document was composed long after the time of Moses. See, however, DEUTERONOMY in the 1st vol. of this work; and compare Gesenius, *Geschichte der Hebräischen Sprache und Schrift*, p. 32; De Wette, *Einleitung in die Bibel*, "Deuteronomium"; Winer, *s. v.* König; Ewald, *Geschichte des Volkes Israel*, iii. 381. [E. T.]

KINGS, FIRST AND SECOND BOOKS OF, originally only one book in the Hebrew Canon, and first edited in Hebrew as two by Bomberg, after the model of the LXX. and the Vulgate (De Wette and O. Thenius, *Einleitung*). They are called by the LXX., Origen, &c., Βασιλειῶν τρίτη and τετάρτη, third and fourth of the *Kingdoms* (the books of Samuel being the first and second), but by the Latins, with few exceptions, tertius et quartus *Regum* liber. Jerome, though in the heading of his translation of the Scriptures, he follows the Hebrew name, and calls them Liber Malachim Primus and Secundus, yet elsewhere usually follows the common usage of the church in his day. In his Prologus Galeatus he places them as the fourth of the second order of the sacred books, *i. e.* of the Prophets:—"Quartus, Malachim, i. e. Regum, qui tertio et quarto Regum volumine continetur. Meliusque multo est Malachim, i. e. *Regum*, quàm Mamelachoth, i. e. *Regnorum*, dicere. Non enim multarum gentium describit regna; sed unius Israelitici populi, qui tribubus duodecim continetur." In his epistle to Paulinus he thus describes the

contents of these two books:—"Malachim, i. e. tres et quartus Regum liber, a Salomone usque ad Jechoniam, et a Jeroboam filio Nabat usque ad Oze qui doctus est in Assyrios, regnum Juda et regnum describit Israel. Si historiam respicias, verba simplicia sunt: si in literis sensum latentem requiris, Ecclesiae paucitas, et hereticorum contrà ecclesiam bella, narrantur." The division into two books, being purely artificial and as it were mechanical, may be overlooked in speaking of them; and it must also be remembered that the division between the books of Kings and Samuel is equally artificial, and that in point of fact the historical books commencing with Judges and ending with 2 Kings present the appearance of one work,[a] giving a continuous history of Israel from the times of Joshua to the death of Jehoiachin. It must suffice here to mention, in support of this assertion, the frequent allusion in the book of Judges to the times of the kings of Israel (xvii. 6, xviii. 1, xix. 1, xxi. 25); the concurrent evidence of ch. ii. that the writer lived in an age when he could take a retrospect of the whole time during which the judges ruled (ver. 16-19), *i. e.* that he lived after the monarchy had been established; the occurrence in the book of Judges, for the first time, of the phrase "the Spirit of Jehovah" (iii. 10), which is repeated often in the book (vi. 34, xi. 29, xiii. 25, xiv. 6, &c., and is of frequent use in Samuel and Kings, *e.g.* 1 Sam. x. 6, xvi. 13, 14, xix. 9; 2 Sam. xxiii. 2; 1 K. xxii. 24; 2 K. ii. 16, &c.); the allusion in i. 21 to the capture of Jebus, and the continuance of a Jebusite population (see 2 Sam. xxiv. 16); the reference in xx. 27 to the removal of the ark of the covenant from Shiloh to Jerusalem, and the expression "in those days," pointing, as in xvii. 6, &c., to remote times; the distinct reference in xviii. 30 to the captivity of Israel by Shalmaneser; with the fact that the books of Judges, Ruth, Samuel, Kings, form one unbroken narrative, similar in general character, which has no beginning except at Judg. i., while, it may be added, the book of Judges is not a continuation of Joshua, but opens with a repetition of the same events with which Joshua closes. In like manner the book of Ruth clearly forms part of those of Samuel, supplying as it does the essential point of David's genealogy and early family history, and is no less clearly connected with the book of Judges by its opening verse, and the epoch to which the whole book relates.[b] Other links connecting the books of Kings with the preceding may be found in the comparison, suggested by De Wette, of 1 K. ii. 26 with 1 Sam. ii. 35; ii. 11 with 2 Sam. v. 5; 1 K. ii. 3, 4, v. 17, 18, viii. 18, 19, 25, with 2 Sam. vii. 12-16; and 1 K. v. 1-6 with 2 Sam. viii. 15-18. Also 2 K. xvii. 41 may be compared with Judg. ii. 19; 1 Sam. ii. 27 with Judg. xiii. 6; 2 Sam. xiv. 17, 20, xix. 27, with Judg. xiii. 6; 1 Sam. ix. 21 with Judg. vi. 15, and xx.; 1 K. viii. 1 with 2 Sam. vi. 17, and v. 9; 1 Sam. xvii. 12 with Ruth iv. 17; Ruth i. 1 with Judg. xvii. 7, 8, 9, xix. 1, 2 (Bethlehem-Judah); the use in Judg. xiii. 6, 8, of the phrase "the man of God" (in the earlier books applied to Moses only, and that only in Deut. xxxiii. 1 and Josh. xiv. 6), may be compared with the very frequent use of it in the books of Samuel and Kings as the common designation of a prophet, whereas only Jeremiah besides (xxxv. 4) so uses it before the captivity.[c] The phrase, "God do so to me, and more also," is common to Ruth, Samuel, and Kings, and "till they were ashamed" to Judges and Kings (iii. 25; 2 K. ii. 17, viii. 11). And generally the style of the narrative, ordinarily quiet and simple, but rising to great vigour and spirit when stirring deeds are described (as in Judg. iv., vii., xi., &c.; 1 Sam. iv., xvii., xxxi., &c.; 1 K. viii., xviii., xix., &c.), and the introduction of poetry or poetic style in the midst of the narrative (as in Judg. v., 1 Sam. ii., 2 Sam. i. 17, &c., 1 K. xxii. 17, &c.), constitute such strong features of resemblance as lead to the conclusion that these several books form but one work. Indeed the very *names* of the books sufficiently indicate that they were all imposed by the same authority for the convenience of division, and with reference to the subject treated of in each division, and not that they were original titles of independent works.

But to confine ourselves to the books of Kings. We shall consider—

I. Their historical and chronological range;
II. Their peculiarities of diction, and other features in their literary aspect;
III. Their authorship, and the sources of the author's information;
IV. Their relation to the books of Chronicles;
V. Their place in the canon, and the references to them in the New Testament.

I. The books of Kings range from David's death and Solomon's accession to the throne of Israel, commonly reckoned as B.C. 1015, but according to Lepsius B.C. 993 (*Königsb. d. Aegypt.* p. 102), to the destruction of the kingdom of Judah and the desolation of Jerusalem, and the burning of the Temple, according to the same reckoning B.C. 588, (B.C. 586, Lepsius, p. 107)—a period of 427 (or 405) years: with a supplemental notice of an event that occurred after an interval of 26 years, viz. the liberation of Jehoiachin from his prison at Babylon, and a still further extension to Jehoiachin's death, the time of which is not known, but which was probably not long after his liberation. The history therefore comprehends the whole time of the Israelitish monarchy, exclusive of the reigns of Saul and David, whether existing as one kingdom as under Solomon and the eight last kings, or divided into the two kingdoms of Israel and Judah. It exhibits the Israelites in the two extremes of power and weakness; under Solomon extending their dominion over tributary kingdoms from the Euphrates to the Mediterranean and the border of Egypt (1 K. iv. 21); under the last kings reduced to a miserable remnant, subject alternately to Egypt and Assyria, till at length they were rooted up from their own land. As the cause of this decadence it points out the division of Solomon's monarchy into two parts, followed by the religious schism and idolatrous worship brought about from political motives by Jeroboam. How the consequent wars between the two kingdoms necessarily weakened both; how they led to calling in the stranger to their aid whenever their power

[a] De Wette's reasons for reckoning Kings as a separate work seem to the writer quite inconclusive. On the other hand, the book of Joshua seems to be an independent book. Ewald classes these books together mostly as in some above (*Gesch.* i. 175), and calls them "the great Book of the Kings."

[b] Eichhorn attributes Ruth to the author of the books of Samuel (Th. Parker's De Wette, ii. 320).

[c] In Chronicles, Ezra, and Nehemiah, it repeatedly occurs.

was equally balanced, of which the result was the destruction first of one kingdom and then of the other; how a further evil of these foreign alliances was the adoption of the idolatrous superstitions of the heathen nations whose friendship and protection they sought, by which they forfeited the Divine protection — all this is with great clearness and simplicity set forth in these books, which treat equally of the two kingdoms while they lasted. The doctrine of the Theocracy is also clearly brought out (see *e. g.* 1 K. xiv. 7-11, xv. 29. 30, xvi. 1-7), and the temporal prosperity of the pious kings, as Asa, Jehoshaphat, Hezekiah, and Josiah, stands in contrast with the calamitous reigns of Rehoboam, Ahaziah, Ahaz, Manasseh, Jehoiachin, and Zedekiah. At the same time the continuance of the kingdom of Judah, and the permanence of the dynasty of David, are contrasted with the frequent changes of dynasty, and the far shorter duration of the kingdom of Israel, though the latter was the more populous and powerful kingdom of the two (2 Sam. xxiv. 9). As regards the affairs of foreign nations, and the relation of Israel to them, the historical notices in these books, though in the earlier times scanty, are most valuable, and, as has been lately fully shown (Rawlinson's *Bampton Lectures*, 1859), in striking accordance with the latest additions to our knowledge of contemporary profane history. Thus the patronage extended to Hadad the Edomite by Psinaches king of Egypt (1 K. xi. 19, 20); the alliance of Solomon with his successor Psusennes, who reigned 35 years; the accession of Shishak, or Sesonchis I., towards the close of Solomon's reign (1 K. xi. 40), and his invasion and conquest of Judaea in the reign of Rehoboam, of which a monument still exists on the walls of Karnac (*Königsb.* p. 114); the time of the Aethiopian kings So (Sabak) and Tirhakah, of the 25th dynasty; the rise and speedy fall of the power of Syria; the rapid growth of the Assyrian monarchy which overshadowed it; Assyria's struggles with Egypt, and the sudden ascendancy of the Babylonian empire under Nebuchadnezzar, to the destruction both of Assyria and Egypt, as we find these events in the books of Kings, fit in exactly with what we now know of Egyptian, Syrian, Assyrian, and Babylonian history. The names of Omri, Jehu, Menahem, Hoshea, Hezekiah, &c., are believed to have been deciphered in the cuneiform inscriptions, which also contain pretty full accounts of the campaigns of Tiglath-Pileser, Sargon, Sennacherib, and Esarhaddon: Shalmaneser's name has not yet been discovered, though two inscriptions in the British Museum are thought to refer to his reign. These valuable additions to our knowledge of profane history, which we may hope will shortly be increased both in number and in certainty, together with the fragments of ancient historians, which are now becoming better understood, are of great assistance in explaining the brief allusions in these books, while they afford an irrefragable testimony to their historical truth.

Another most important aid to a right understanding of the history in these books, and to the filling up of its outline, is to be found in the prophets, and especially in Isaiah and Jeremiah. In the former the reigns of Ahaz and Hezekiah, and of the contemporary Israelitish and foreign potentates, receive especial illustration; in the latter, and to a still greater extent, the reigns of Jehoiakim and Zedekiah, and those of their heathen contemporaries. An intimate acquaintance with these prophets is of the utmost moment for elucidating the concise narrative of the books of Kings. The two together give us a really full view of the events of the times at home and abroad.

It must, however, be admitted that the chronological details expressly given in the books of Kings form a remarkable contrast with their striking historical accuracy. These details are inexplicable, and frequently entirely contradictory. The very first date of a decidedly chronological character which is given, that of the foundation of Solomon's temple (1 K. vi. 1) is manifestly erroneous, as being irreconcileable with any view of the chronology of the times of the Judges, or with St. Paul's calculation, Acts xiii. 20.[d] It is in fact abandoned by almost all chronologists, whatever school they belong to, whether ancient or modern, and is utterly ignored by Josephus. [CHRONOLOGY, vol. i. 323, 324 *a*, 325.] Moreover, when the text is examined, it immediately appears that this date of 480 years is both unnecessary and quite out of place. The reference to the Exodus is gratuitous, and alien to all the other notes of time, which refer merely to Solomon's accession. If it is left out, the text will be quite perfect without it,[e] and will agree exactly with the *resume* in ver. 37, 38, and also with the parallel passage in 2 Chr. iii. 2. The evidence therefore of its being an interpolation is wonderfully strong. But if so, it must have been inserted by a professed chronologist, whose object was to reduce the Scripture history to an exact system of chronology. It is likely therefore that we shall find traces of the same hand in other parts of the books. Now De Wette (*Einleit.* p. 235), among the evidences which he puts forward as marking the books of Kings as in his opinion a separate work from those of Samuel, mentions, though erroneously, as 2 Sam. v. 4, 5 shows, the sudden introduction of "a chronological system" (*die genauere zeit-rechnung*). When therefore we find that the very first date introduced is erroneous, and that numerous other dates are also certainly wrong, because contradictory, it seems a not unfair conclusion that such dates are the work of an interpolator, trying to bring the history within his own chronological system: a conclusion somewhat confirmed by the alterations and omissions of these dates in the LXX.[f] As regards, however, these chronological difficulties, it must be observed they are of two essentially different kinds. One kind is merely the want of the data necessary for chronological exactness. Such is the absence, apparently, of any uniform rule for dealing with the fragments of years at the beginning and end of the reigns. Such might also be a deficiency in the sum of the regnal years of Israel as compared with the synchronistic years of Judah, caused by unnoticed interregna, if any such really occurred. And this class of difficulties may probably have belonged to these books in their original state, in which exact scientific chronology was not aimed at. But the other kind of difficulty is of a totally different character, and embraces dates which

[d] The MSS. A. B. C. have, however, a different reading, which is adopted by Lachmann and Wordsworth.

[e] "And it came to pass in the fourth year of Solomon's reign over Israel, in the month Zif, which is the second month, that he began to build the house of the Lord."

[f] See 1 K. xvi. 8, 15, 29; vi. 1.

in very exact in their mode of expression, but are sometimes and contradictory. Some of these are pointed out below; and it is such which it seems reasonable to ascribe to the interpolation of later professed chronologists. But it is necessary to give specimens of each of these kinds of difficulty, both with a view to approximating to a true chronology, and also to show the actual condition of the books under consideration.

(1.) When we sum up the years of all the reigns of the kings of Israel as given in the books of Kings, and then all the years of the reigns of the kings of Judah from the 1st of Rehoboam to the 6th of Hezekiah, we find that, instead of the two sums agreeing, there is an excess of 19 or 20 years in Judah—the reigns of the latter amounting to 261 years, while the former make up only 242. But we are able to get somewhat nearer to the seat of this disagreement, because it so happens that the parallel histories of Israel and Judah touch in four or five points where the synchronisms are precisely marked. These points are (1) at the simultaneous accessions of Jeroboam and Rehoboam; (2) at the simultaneous deaths of Jehoram and Ahaziah, or, which is the same thing, the simultaneous accessions of Jehu and Athaliah; (3) at the 15th year of Amaziah, which was the 1st of Jeroboam II. (2 K. xiv. 17); (4) in the reign of Ahaz, which was contemporary with some part of Pekah's, viz. according to the text of 2 K. xvi. 1, the three last years of Ahaz with the three last of Pekah; and (5) at the 6th of Hezekiah, which was the 9th of Hoshea; the two last points, however, being less certain than the others, at least as to the precise date of the synchronisms, depending as this does on the correctness of the numerals in the text.

Hence, instead of lumping the whole periods of 261 years and 242 years together, and comparing their difference, it is clearly expedient to compare the different sub-periods, which are defined by common termini. Beginning therefore with the sub-period which commences with the double accession of Rehoboam and Jeroboam, and closes with the double death of Ahaziah and Jehoram, and summing up the number of years assigned to the different reigns in each kingdom, we find that the six reigns in Judah make up 95 years, and the eight reigns in Israel make up 98 years. Here there is an excess of 3 years in the kingdom of Israel, which may, however, be readily accounted for by the frequent changes of dynasty there, and the probability of fragments of years being reckoned as whole years, thus causing the same year to be reckoned twice over. The 95 years of Judah, or even a less number, will hence appear to be the true number of whole years (see too Clinton, *F. H.* ii. 314, &c.).

Beginning, again, at the double accession of Athaliah and Jehu, we have in Judah 7+40+14 first years of Amaziah = 61, to correspond with 28+17+16 = 61, ending with the last year of Jehoash in Israel. Starting again with the 15th of Amaziah = 1 Jeroboam II., we have 15+52+16+3 = 86 (to the 3rd year of Ahaz), to correspond with 41+1+12+2+20 = 74 (to the close of Pekah's reign), where we at once detect a deficiency on the part of Israel of (86 − 74 =) 12 years, if at least the 3rd of Ahaz really corresponded with the 20th of Pekah. And lastly, starting with the year following that last named, we have 13 last years of Ahaz+7 first of Hezekiah = 20, to correspond with the 9 years of Hoshea, where we find another deficiency in Israel of 11 years.

The two first of the above periods may then be said to agree together, and to give 95+61 = 156 years from the accession of Rehoboam and Jeroboam to the 15th of Amaziah in Judah, and the death of Jehoash in Israel, and we observe that the discrepance of 12 years first occurs in the third period, in which the breaking up of the kingdom of Israel began at the close of Jehu's dynasty. Putting aside the synchronistic arrangement of the years as we now find them in 2 K. xv. *seq.*, there would be no difficulty whatever in supposing that the reigns of the kings of Israel at this time were not continuous, and that for several years after the death of Zachariah, or Shallum, or both, the government may either have been in the hands of the king of Syria, or broken up amongst contending parties, till at length Menahem was able to establish himself on the throne by the help of Pul, king of Assyria, and transmit his tributary throne to his son Pekahiah.

But there is another mode of bringing this third period into harmony, which violates no historical probability, and is in fact strongly indicated by the fluctuations of the text. We are told in 2 K. xv. 8 that Zachariah began to reign in the 38th of Uzziah, and (xiv. 23) that his father Jeroboam began to reign in the 15th of Amaziah. Jeroboam must therefore have reigned 52 or 53 years, not 41: for the idea of an interregnum of 11 or 12 years between Jeroboam and his son Zachariah is absurd. But the addition of these 12 years to Jeroboam's reign exactly equalizes the period in the two kingdoms, which would thus contain 86 years, and makes up 242 years from the accession of Rehoboam and Jeroboam to the 3rd of Ahaz and 20th of Pekah, supposing always that these last-named years really synchronize.

As regards the discrepance of 11 years in the last period, nothing can in itself be more probable than that either during some part of Pekah's lifetime, or after his death, a period, not included in the regnal years of either Pekah or Hoshea, should have elapsed, when there was either a state of anarchy, or the government was administered by an Assyrian officer. There are also several passages in the contemporary prophets Isaiah and Hosea, which would fall in with this view, as Hos. x. 3. 7; Is. ix. 9-19. But it is impossible to assert peremptorily that such was the case. The decision must await some more accurate knowledge of the chronology of the times from heathen sources. The addition of these last 20 years makes up for the whole duration of the kingdom of Israel, 261 or 262 years, more or less. Now the interval, according to Lepsius's tables, from the accession of Sesonchis, or Shishak, to that of Sabacon, or So (2 K. xvii. 4), is 245 years. Allowing Sesonchis to have reigned 7 years contemporaneously with Solomon, and Sabaco, who reigned 12 years,[s] to have reigned 9 before Shalmaneser came up the second time against Samaria (245+7+9 = 261), the chronology of Egypt would exactly tally with that here given. It may, however, turn out that the time thus allowed for the duration of the Israelitish monarchy is somewhat too long, and that the time indicated by the years of the Israelitish kings, without any interregnum, is nearer the truth. If so, a ready way of reducing the sum of the reigns of the kings of Judah would be to assign 41 years to that of Uzziah, instead of 52 (as if the numbers of Uzziah and Jeroboam had been

[s] Lepsius, *Königsb.* p. 97.

accidentally interchanged): an arrangement which interferes with no known historical truth, though it would disturb the doubtful synchronism of the 3rd of Ahaz with the 20th of Pekah, and make the 3rd of Ahaz correspond with about the 9th or 10th of Pekah. Indeed it is somewhat remarkable that if we neglect this synchronism, and consider as one the period from the accession of Athaliah and Jehu to the 7th of Hezekiah and 9th of Hoshea, the sums of the reigns in the two kingdoms agree exactly, when we reckon 41 years for Uzziah, and 52 for Jeroboam, viz. 155 years, or 250 for the whole time of the Israelitish monarchy. Another advantage of this arrangement would be to reduce the age of Uzziah at the birth of his son and heir Jotham from the improbable age of 42 or 43 to 31 or 32. It may be added that the date in 2 K. xv. 1, which assigns the 1st of Uzziah to the 27th of Jeroboam, seems to indicate that the author of it only reckoned 41 years for Uzziah's reign, since from the 27th of Jeroboam to the 1st of Pekah is just 41 years (see Lepsius's table, *Königsb.* p. 103[b]). Also that 2 K. xvii. 1. which makes the 12th of Ahaz = 1st of Hoshea, implies that the 1st of Ahaz = 9th of Pekah.

(2.) Turning next to the other class of difficulties mentioned above, the following instances will perhaps be thought to justify the opinion that the dates in these books which are intended to establish a precise chronology are the work of a much later hand or hands than the books themselves.

The date in 1 K. vi. 1 is one which is obviously intended for strictly chronological purposes. If correct, it would, taken in conjunction with the subsequent notes of time in the books of Kings, supposing them to be correct also, give to a year the length of the time from the Exodus to the Babylonian captivity, and establish a perfect connexion between sacred and profane history. But so little is this the case, that this date is quite irreconcileable with Egyptian history, and is, as stated above, by almost universal consent rejected by chronologists, even on purely Scriptural grounds. This date is followed by precise synchronistic definitions of the parallel reigns of Israel and Judah, the effect of which would be, and must have been designed to be, to supply the want of accuracy in stating the length of the reigns without reference to the odd months. But these synchronistic definitions are in continual discord with the statement of the length of reigns. According to 1 K. xxii. 51 Ahaziah succeeded Ahab in the 17th year of Jehoshaphat. But according to the statement of the length of Ahab's reign in xvi. 29, Ahab died in the 18th of Jehoshaphat; while according to 2 K. i. 17, Jehoram the son of Ahaziah succeeded his brother (after his 2 years' reign) in the second year of Jehoram the son of Jehoshaphat, though, according to the length of the reigns, he must have succeeded in the 18th or 19th of Jehoshaphat (see 2 K. iii. 1), who reigned in all 25 years (xxii. 42). [JEHORAM.] As regards Jeboram the son of Jehoshaphat, the statements are so contradictory that Archbishop Usher actually makes three distinct beginnings to his regnal æra: the first when he was made prorex, to meet 2 K. i. 17; the second when he was associated with his father, 5 years later, to meet 2 K. viii. 16; the third when his sole reign commenced, to meet 1 K. xxii. 50, compared with 42. But as the only purpose of these synchronisms is to give an accurate measure of time, nothing can be more absurd than to suppose such variations in the time from which the commencement of the regnal year is dated. It may also here be remarked that the whole notion of these joint reigns has not the smallest foundation in fact, and unluckily does not come into play in the only cases where there might be any historical probability of their having occurred, as in the case of Asa's illness and Uzziah's leprosy. From the length of Amaziah's reign, as given 2 K. xiv. 2, 17, 23, it is manifest that Jeroboam II. began to reign in the 15th year of Amaziah, and that Uzziah began to reign in the 16th of Jeroboam. But 2 K. xv. 1 places the commencement of Uzziah's reign in the 27th of Jeroboam, and the accession of Zachariah = the close of Jeroboam's reign, in the 38th of Uzziah—statements utterly contradictory and irreconcileable.

Other grave chronological difficulties seem to have their source in the same erroneous calculations on the part of the Jewish chronologist. For example, one of the cuneiform inscriptions tells us that Menahem paid tribute to Assyria in the 8th year of Tiglath-Pileser (Rawl. *Herod.* i. 469), and the same inscription passes on directly to speak of the overthrow of Rezin, who we know was Pekah's ally. Now this is scarcely compatible with the supposition that the remainder of Menahem's reign, the 2 years of Pekahiah, and 18 or 19 years of Pekah's reign intervened, as must have been the case according to 2 K. xvi. 1, xv. 32. But if the invasion of Judea was one of the early acts of Pekah's reign, and the destruction of Rezin followed soon after, then we should have a very intelligible course of events as follows. Menahem paid his last tribute to Assyria in the 8th of Tiglath-Pileser, his suzerain (2 K. xv. 19), which, as he reigned for some time under Pul, and only reigned 10 years in all, we may assume to have been his own last year. On the accession of his son Pekahiah, Pekah, one of his captains, rebelled against him, made an alliance with Rezin king of Syria to throw off the yoke of Assyria, in the course of a few months dethroned and killed Pekahiah, and reigned in his stead, and rapidly followed up his success by a joint expedition against Judah, the object of which was to set up a king who should strengthen his hands in his rebellion against Assyria. The king of Assyria, on learning this, and receiving Ahaz's message for help, immediately marches to Syria, takes Damascus, conquers and kills Rezin, invades Israel, and carries away a large body of captives (2 K. xv. 29), and leaves Pekah to reign as tributary king over the enfeebled remnant, till a conspiracy deprived him of his life. Such a course of events would be consistent with the cuneiform inscription, and with everything in the Scripture narrative, except the synchronistic arrangement of the reigns. But of course it is impossible to affirm that the above was the true state of the case Only at present the text and the cuneiform inscription do not agree, and few people will be satisfied with the explanation suggested by Mr. Rawlinson, that "the official who composed, or the workman who engraved, the Assyrian document, made a mistake in the nu

[b] Lepsius suggests that Azariah and Uzziah may possibly be different and successive kings, the former of whom reigned 11 years, and the latter 41. But beyond the confusion of the names there is to support such a notion.

and put Menahem: when he should have put Pekah (*Bampt. Lect.* pp. 136, 409; *Herod.* i. 468-471). Again: "Scripture places only 8 years between the fall of Samaria and the first invasion of Judaea by Sennacherib" (*i. e.* from the 6th to the 14th of Hezekiah). "The inscriptions (cuneiform) assigning the fall of Samaria to the first year of Sargon, giving Sargon a reign of *at least* 15 years, and assigning the first attack on Hezekiah to Sennacherib's third year, put an interval of *at least* 18 years between the two events" (Rawl. *Herod.* i. 479). This interval is further shown by reference to the canon of Ptolemy to have amounted in fact to 22 years. Again, Lepsius (*Königsb.* p. 95-97) shows with remarkable force of argument that the 14th of Hezekiah could not by possibility fall *earlier* than B.C. 692, with reference to Tirhakah's accession; but that the additional date of the 3rd of Sennacherib furnished by the cuneiform inscriptions, coupled with the fact given by Berosus that the year B.C. 693 was the year of Sennacherib's accession, fixes the year B.C. 691 as that of Sennacherib's invasion, and consequently as the 14th of Hezekiah. But from B.C. 691 to B.C. 586, when Jerusalem was destroyed by Nebuchadnezzar, is an interval of only 105 years; whereas the sum of the regnal years of Judah for the same interval amounts to 125 years.[1] From which calculations it necessarily follows, both that there is an error in those figures in the book of Kings which assign the relative positions of the destruction of Samaria and Sennacherib's invasion, and also in those which measure the distance between the invasion of Sennacherib and the destruction of Jerusalem. It should however be noted that there is nothing to fix the fall of Samaria to the reign of Hezekiah but the statement of the synchronism; and 2 Chr xxx. 6, 18, &c., seems rather to indicate that the kingdom of Israel had quite ceased in the 1st of Hezekiah. Many other numbers have the same stamp of incorrectness. Rehoboam's age is given as 41 at his accession, 1 K. xiv. 21, and yet we read at 2 Chr. xiii. 7 that he was "young and tenderhearted" when he came to the throne. Moreover, if 41 when he became king, he must have been born before Solomon came to the throne, which seems improbable, especially in connexion with his Ammonitish mother. In the apocryphal passage moreover in the Cod. Vat. of the LXX, which follows 2 K. xii. 24, his age is said to have been 16 at his accession, which is much more probable. According to the statement in 2 K. xv. 33, compared with ver. 2, Uzziah's son and heir Jotham was not born till his father was 42 years old; and according to 2 K. xxi. 1, compared with ver. 19, Manasseh's son and heir Amon was not born till his father was in his 45th year. Still more improbable is the statement in 2 K. xviii. 2, compared with xvi. 2, which makes Hezekiah to have been born when his father was 11 years old: a statement which Bochart has endeavoured to defend with his usual vast erudition, but with little success (*Opera*, i. 921). But not only does the incorrectness of the numbers testify against their genuineness, but in some passages the structure of the sentence seems to betray the fact of a later insertion of the chronological element. We have seen one instance in 1 K. vi. 1. In like manner at 1 K. xiv. 31, xv. 1, 2, we can see that at some time or other xv. 1 has been inserted between the two other verses. So again ver. 9 has been inserted between 8 and 10; and xv. 24 must have once stood next to xxii. 42, as xxii. 50 did to 2 K. viii. 17, at which time the corrupt ver. 16 had no existence. Yet more manifestly viii. 24, 26, were once consecutive verses, though they are now parted by 25, which is repeated, with a variation in the numeral, at ix. 29. So also xvi. 1 has been interposed between xv. 38 and xvi. 2. xviii. 2 is consecutive with xvi. 20. But the plainest instance of all is 2 K. xi. 21, xii. 1 (xii. 1, *seq.*, Heb.), where the words "In the seventh year of Jehu, Jehoash began to reign," could not possibly have formed part of the original sentence, which may be seen in its integrity 2 Chr. xxiv. 1. The disturbance caused in 2 K. xii. by the intrusion of this clause is somewhat disguised in the LXX. and the A. V. by the division of Heb. xii. 1 into two verses, and separate chapters, but is still palpable. A similar instance is pointed out by Movers in 2 Sam. v., where ver. 3 and 6 are parted by the introduction of ver. 4, 5 (p. 190). But the difficulty remains of deciding in which of the above cases the insertion was by the hand of the original compiler, and in which by a later chronologist.

Now when to all this we add that the pages of Josephus are full, in like manner, of a multitude of inconsistent chronological schemes, which prevent his being of any use, in spite of Hales's praises, in clearing up chronological difficulties, the proper inference seems to be, that no authoritative, correct, systematic chronology was originally contained in the books of Kings, and that the attempt to supply such afterwards led to the introduction of many erroneous dates, and probably to the corruption of some true ones which were originally there. Certainly the present text contains what are either conflicting calculations of antagonistic chronologists, or errors of careless copyists, which no learning or ingenuity has ever been able to reduce to the consistency of truth.

II. The peculiarities of diction in them, and other features in their literary history, may be briefly disposed of. The words noticed by De Wette, §185, as indicating their modern date, are the following:— אֹתִי for אֹתְּ, 1 K. xiv. 2. (But this form is also found in Judg. xvii. 2, Jer. iv. 30, Ez. xxxvi. 13, and not once in the later books.) אוֹתוֹ for אֹתוֹ, 2 K. i. 15. (But this form of אֵת is found in Lev. xv. 18, 24; Josh. xiv. 12; 2 Sam. xxiv. 24; Is. lix. 21; Jer. x. 5, xii. 1, xix. 10, xx. 11, xxiii. 9, xxxv. 2; Ez. xiv. 4, xxvii. 26.) יִשֹּׁם for יִשָּׂם, 1 K. ix. 8. (But Jer. xix. 8, xlix. 17, are identical in phrase and orthography.) רָצִין for רְצִין, 2 K. xi. 13. (But everywhere else in Kings, *e. g.* 2 K. xi. 6, &c., רְצִים, which is also universal in Chronicles, an avowedly later book; and here, as in יְרֹבְעָם, 1 K. xi. 33, there is every appearance of the ו being a clerical error for the copulative ו; see Thenius, *l. c.*) מְדִינוֹת, 1 K. xx. 14. (But this word occurs Lam. i. 1, and there is every appearance of its being a technical word in 1 K. xx. 14, and therefore as old as the reign of Ahab.) לֹא for לוֹ, 1 K. iv. 22. (But לֹא

[1] Lepsius proposes reducing the reign of Manasseh to 33 years. He observes with truth the improbability of Amon having been born in the 45th year of his father's life. Mr. Bosanquet would lower the date of the destruction of Jerusalem to the year B.C. 555.

is used by Ez. xlv. 14, and *homer* seems to have been then already obsolete.) חֹרִים, 1 K. xxi. 8. 11. (Occurs in Is. and Jer.) רַב, 2 K. xxv. 8. (But as the term evidently came in with the Chaldees, as seen in Rab-shakeh, Rab-saris, Rab-mag, its application to the Chaldee general is no evidence of a time later than the person to whom the title is given.) שָׁלֵם, 1 K. viii. 61, &c. (But there is not a shadow of proof that this expression belongs to late Hebr. It is found, among other places, in Is. xxxviii. 3; a passage against the authenticity of which there is also not a shadow of proof, except upon the presumption that prophetic intimations and supernatural interventions on the part of God are impossible.) הִשְׁכִּיל, 2 K. xviii. 7. (On what grounds this word is adduced it is impossible to guess, since it occurs in this sense in Josh., Is., Sam., and Jer.: vid. Gesen.) בִּטָּחוֹן, 2 K. xviii. 19. (Is. xxxvi. 4, Eccles. ix. 4.) יְהוּדִית, 2 K. xviii 26. (But why should not a *Jew*, in Hezekiah's reign, as well as in the time of Nehemiah, have called his mother-tongue "the *Jews'* language," in opposition to the *Aramean*? There was nothing in the Babylonish captivity to give it the name, if it had it not before; nor is there a single earlier instance — Is. xix. 18 might have furnished one —of *any* name given to the language spoken by all the Israelites, and which in later times was called Hebrew: Ἑβραϊστί, Prolog. Ecclus.; Luke xxiii. 38; John v. 2, &c.)[k] דִּבֶּר מִשְׁפָּט אֶת, 2 K. xxv. 6. (Frequent in Jer. iv. 12, xxxix. 5, &c.) Theod. Parker adds פַּחָה (see, too, Thenius, *Einl.* §6), 1 K. x. 15, xx. 24; 2 K. xviii. 24, on the presumption probably of its being of Persian derivation; but the etymology and origin of the word are quite uncertain, and it is repeatedly used in Jer. li., as well as Is. xxxvi. 9. With better reason might בָּרָא have been adduced, 1 K. xii. 33. The expression עֵבֶר הַנָּהָר, in 1 K. iv. 24 is also a difficult one to form an impartial opinion about. It is doubtful, as De Wette admits, whether the phrase necessarily implies its being used by one to the east of the Euphrates, because the use varies in Num. xxxii. 19, xxxv. 14; Josh. i, 14 *seq.*, v. 1, xii. 1, 7, xxii. 7; 1 Chr. xxvi. 30; Deut. i. 1, 5, &c. It is also conceivable that the phrase might be used as a mere geographical designation by those who belonged to one of "the provinces beyond the river" subject to Babylon: and at the time of the destruction of Jerusalem, Judaea had been such a province for at least 23 years, and probably longer. We may safely affirm therefore, that on the whole the peculiarities of diction in these books do not indicate a time after the captivity, or towards the close of it, but on the contrary point pretty distinctly to the age of Jeremiah. And it may be added, that the marked and systematic differences between the language of Chronicles and that of Kings, taken with the fact that all attempts to prove the Chronicles later than Ezra have utterly failed, lead to the same conclusion. (See many examples in Movers, p. 200, *seq.*) Other peculiar or rare expressions in these books are the proverbial ones: מַשְׁתִּין בְּקִיר, found only in them and in 1 Sam. xxv. 22, 34, "slept with his fathers," "him that dieth in the city, the dogs shall eat," &c.; כֹּה יַעֲשֶׂה אֱלֹ, 1 K. ii. 23, &c.; also קְרִיָה, 1 K. i. 41, 45; elsewhere only in poetry, and in the composition of proper names, except Deut. ii. 36. בַּרְבָּרִים, i. 9. חֲלָת, "fowl," iv. 23. אֲרֻוֹת, "stalls," v. 6; 2 Chr. ix. 25. חֶעֱלָה יָם, v. 13, ix. 15, 21. מַצֵּבָה, "a stone-quarry," (Gesen.) vi. 7. לְפָנִי, vi. 17. לְתַתָּן, 19. פְּקָעִים and פַּקֻּעוֹת, "wild cucumbers," vi. 18, vii. 24, 2 K. iv. 39. מִכְוֶה, x. 28; the names of the months אֵתָנִים, viii. 2, זִו, בּוּל, vi. 37, 38. בָּרָא, "to invent," xii. 33, Neh. vi. 8, in both cases joined with מְלֶב. מַפֵּלָצֶת, "an idol," xv. 13. בֹּשֶׁת and הִבְעִיר, followed by אַחֲרֵי, "to destroy," xiv. 10, xvi. 3, xxi. 21. דְּבָקִים, "*joints* of the armour," xxii. 34. שְׁאֵנָ, "a pursuit," xviii. 27. נָהַר, "to bend oneself," xviii. 42, 2 K. iv. 34, 35. שְׁנֹם, "to gird up," xviii. 46. אֵפֹד, "a head-band," xx. 38, 42. שָׁפַק, "to suffice," xx. 10. חָלַם, incert. signif. xx. 33. עָשָׂה מְלוּכָה, "to reign," xxi. 7. צַלַּחַת, "a dish," 2 K. ii. 20. נָלַם, "to fold up," ib. 8. נֹקֵד, "a herdsman," iii. 4, Am. i. 1. אַסוּךְ, "an oil-cup," iv. 2. חָרַד אֶל, "to have a care for," 13; זָרַר, "to sneeze," 35; צְקְלוֹן, "a bag," 42. חֲרִיט, "a money-bag," v. 23. תַּחֲנָה, "an encamping" (?) vi. 8; כְּרָה, "a feast," 23; נְחַת, "descending," 9; כַּב, "a cab," 25; חֲרֵי יוֹנִים, "dove's dung," ib. מַכְבֵּר, perhaps "a fly-net," viii. 15. נֶרֶם (in sense of "self," as in Chald. and Samar.), ix. 13. צְבוּר, "a heap," x. 8; מַלְתַּחָה, "a vestry," 22; מַחֲרָאָה, "a draught-house," 27. כְּרִי, "Cherethites," xi. 4, 19, and 2 Sam. xx. 23, cethib. מִשְׁמָר, "a keeping off," xi. 6. מַכָּר, "an acquaintance," xii. 6. The form יוֹר, from יָרָה, "to shoot," xiii. 17. בְּנֵי הִתְעָרְבוּת, "hostages," xiv. 14, 2 Chr. xxv. 24. בֵּית הַחֻפְשִׁית, "sick-house," xv. 5, 2 Chr. xxvi. 21. קֶבֶל, "before," xv. 10. דַּמֶּשֶׂק, "Damascus," xvi. 10 (perhaps only a false reading). מִרְצָפַת, "a pavement," xvi. 17. מוּסָךְ, or מִיסָךְ, "a covered way," xvi. 18. חָפָא in Pih. "to do secretly," xvii. 9. אֲשֵׁרָה, with ׳, 16, only besides Deut. vii. 5, Mic. v. 14. נָדָא, *i. q.* נָדָה, xvii. 21 (Cethib). שֹׁמְרוֹנִים, "Samaritans," 29. נְחִשְׁתָּן, "Nehustan," xviii. 4. אַמְנָה, "a pillar," 16. עָשָׂה בְרִכָה, "to make peace," 31, Is. xxxvi. 16. סָחִישׁ, "that which grows up the third year," xix. 29, Is. xxxvii. 30. בֵּית נְכֹת, "treasure-house," xx. 13, Is. xxxix. 2. מִשְׁנֶה, part of Jerusalem so called, xxi. 14, Zeph. i. 10, Neh. xi. 9. מַזָּלוֹת, "signs of the Zodiac," xxiii. 5. פַּרְוָר, "a suburb," xxiii. 11. גִּבִּים, "ploughmen," xxv. 12, cethib. שְׁנָא, for שָׁנָה, "to change," xxv 9. To which may be added the architectural terms in 1 K. vi., vii., and

[k] See Rödiger's *Gesen. Heb. Gramm.* Eng. tr. p. 6; Keil, *Chron.* p. 40.

the names of foreign idols in 2 K. xvii. The general character of the language is, most distinctly, that of the time before the Babylonish captivity. But it is worth consideration whether some traces of dialectic varieties in Judah and Israel, and of an earlier admixture of Syriasms in the language of Israel, may not be discovered in those portions of these books which refer to the kingdom of Israel. As regards the text, it is far from being perfect. Besides the errors in numerals, some of which are probably to be traced to this source, such passages as 1 K. xv. 6; v. 10, compared with v. 2; 2 K. xv. 30, viii. 16, xvii. 34, are manifest corruptions of transcribers. In some instances the parallel passage in Chronicles corrects the error, as 1 K. iv. 26 is corrected by 2 Chr. ix. 25; 2 K. xiv. 21, &c., by 2 Chr. xxvi. 1, &c. So the probable misplacement of the section 2 K. xxiii. 4-20 is corrected by 2 Chr. xxxiv. 3-7. The substitution of Azariah for Uzziah in 2 K. xiv. 21, and throughout 2 K. xv. 1-30, except ver. 13, followed by the use of the right name, Uzziah, in vers. 30, 32, 34, is a very curious circumstance. In Isaiah, in Zechariah (xiv. 5), and in the Chronicles (except 1 Chr. iii. 12), it is uniformly Uzziah. Perhaps no other cause is to be sought than the close resemblance between עזריה and עזיה, and the fact that the latter name, Azariah, might suggest itself more readily to a Levitical scribe. There can be little doubt that Uzziah was the king's true name, Azariah that of the high-priest. (But see Thenius on 1 K. xv. 21.)

In connexion with these literary peculiarities may be mentioned also some remarkable variations in the version of the LXX. These consist of *transpositions*, *omissions*, and some considerable *additions*, of all which Thenius gives some useful notices in his Introduction to the book of Kings.

The most important *transpositions* are the history of Shimei's death, 1 K. ii. 36-46, which in the LXX. (Cod. Vat.) comes after iii. 1, and divers scraps from chs. iv., v., and ix., accompanied by one or two remarks of the translators.

The sections 1 K. iv. 20-25, 2-6, 26, 21, 1, are strung together and precede 1 K. iii. 2-28, but are many of them repeated again in their proper places.

The sections 1 K. iii. 1, ix. 16, 17, are strung together, and placed between iv. 34 and v. 1.

The section 1 K. vii. 1-12 is placed after vii. 51.

Section viii. 12, 13, is placed after 53.

Section ix. 15-22 is placed after x. 22.

Section xi. 43, xii. 1, 2, 3, is much transposed and confused in LXX. xi. 43, 44, xii. 1-3.

Section xiv. 1-21 is placed in the midst of the long addition to Chr. xii. mentioned below.

Section xxii. 42-50 is placed after xvi. 28.

Chaps. xx. and xxi. are transposed.

Section 2 K. iii. 1-3 is placed after 2 K. i. 18.

The *omissions* are few.

Section 1 K. vi. 11-14 is entirely omitted, and 37, 38, are only slightly alluded to at the opening of ch. iii. The erroneous clause 1 K. xv. 6 is omitted; and so are the dates of Asa's reign in xvi. 8 and 15; and there are a few verbal omissions of no consequence.

The chief interest lies in the *additions*, of which the principal are the following. The supposed mention of a fountain as among Solomon's works in the Temple in the passage after 1 K. ii. 35; of a paved causeway on Lebanon, iii. 46; of Solomon pointing to the sun at the dedication of the Temple, before he uttered the prayer, "The Lord said he would dwell in the thick darkness," &c., viii. 12, 13 (after, 53 LXX.), with a reference to the *βίβλιον τῆς ᾠδῆς*, a passage on which Thenius relies as proving that the Alexandrian had access to original documents now lost; the information that "Joram his brother" perished with Tibni, xvi. 22; an additional date "in the 24th year of Jeroboam," xv. 2; numerous verbal additions, as xi. 29, xvii. 1, &c.; and lastly, the long passage concerning Jeroboam the son of Nebat, inserted between xii. 24 and 25. There are also many glosses of the translator, explanatory, or necessary in consequence of transpositions, as *e. g.* 1 K. ii. 35, viii. 1, xi. 43, xvii. 20, xix. 2, &c. Of the above, from the recapitulatory character of the passage after 1 K. ii. 35, containing in brief the sum of the things detailed in ch. vii. 24-23, it seems far more probable that ΚΡΗΝΗΝ ΤΗΣ ΑΥΛΗΣ is only a corruption of ΚΡΙΝΟΝ ΤΟΥ ΑΙΔΑΜ, there mentioned. The obscure passage about Lebanon after iii. 46, seems no less certainly to represent what in the Heb. is ix. 18, 19, as appears by the triple concurrence of Tadmor, Lebanon, and *συναγενόμενα*, representing מַמְשַׁלְתּוֹ. The strange mention of the sun seems to be introduced by the translator to give significance to Solomon's mention of the House which he had built for God, who had said He would dwell in *the thick darkness;* not therefore under the unveiled light of the sun; and the reference to "the book of song" can surely mean nothing else than to point out that the passage to which Solomon referred was Ps. xcvii. 2. Of the other additions the mention of Tibni's brother Joram is the one which has most the semblance of an historical fact, or makes the existence of any other source of history probable. See too 1 K. xx. 19, 2 K. xv. 25 There remains only the long passage about Jeroboam. That this account is only an apocryphal version made up of the existing materials in the Hebrew Scriptures, after the manner of 1 Esdras, Bel and the Dragon, the apocryphal Esther, the Targums, &c., may be inferred on the following grounds. The frame-work of the story is given in the very words of the Hebrew narrative, and that very copiously, and the new matter is only worked in here and there. Demonstrably therefore the Hebrew account existed when the Greek one was framed, and was the original one. The principal new facts introduced, the marriage of Jeroboam to the sister of Shishak's wife, and his request to be permitted to return, is a manifest imitation of the story of Hadad. The misplacement of the story of Abijah's sickness, and the visit of Jeroboam's wife to Ahijah the Shilonite, makes the whole history out of keeping—the disguise of the queen, the rebuke of Jeroboam's idolatry (which is accordingly left out from Ahijah's prophecy, as is the mention at v. 2 of his having told Jeroboam he should be king), and the king's anxiety about the recovery of his son and heir. The embellishments of the story, Jeroboam's chariots, the amplification of Ahijah's address to Ano, the request asked of Pharaoh, the new garment *not washed in water*, are precisely such as an embroiderer would add, as we may see by the apocryphal books above cited. Then the fusing down the three Hebrew names צְרוּעָה, צְרֵדָה, and תִּרְצָה, into one Σαρηδά, thus giving the same name to the mother of Jeroboam, and to the city where she dwelt, shows how comparatively modern the story is, and how completely of Greek growth. A yet plainer indication is the

confounding Shemaiah of 1 K. xii. 22, with Shemaiah the Nehelamite of Jer. xxix. 24, 31, and putting Ahijah's prophecy into his mouth. For beyond all question Ἐνλαμί, 1 K. xii., is only another form of Αἰλαμίτης (Jer. xxxvi. 24, LXX.). Then again the story is self-contradictory. For if Jeroboam's child Abijam was not born till a year or so after Solomon's death, how could "any good thing toward the Lord God of Israel" have been found in him before Jeroboam became king? The one thing in the story that is more like truth than the Hebrew narrative is the age given to Rehoboam, 16 years, which may have been preserved in the MS. which the writer of this romance had before him. The calling Jeroboam's mother γυνὴ πόρνη, instead of γυνὴ χήρα, was probably accidental.

On the whole then it appears that the great variations in the LXX. contribute little or nothing to the elucidation of the history contained in these books, nor much even to the text. The Hebrew text and arrangement is not in the least shaken in its main points, nor is there the slightest cloud cast on the accuracy of the history, or the truthfulness of the prophecies contained in it. But these variations illustrate a characteristic tendency of the Jewish mind to make interesting portions of the Scriptures the groundwork of separate religious tales, which they altered or added to according to their fancy, without any regard to history or chronology, and in which they exercised a peculiar kind of ingenuity in working up the Scripture materials, or in inventing circumstances calculated as they thought to make the main history more probable. The story of Zerubbabel's answer in 1 Esdr. about truth, to prepare the way for his mission by Darius; of the discovery of the imposture of Bel's priests by Daniel, in Bel and the Dragon; of Mordecai's dream in the Apocr. Esther, and the paragraph in the Talmud inserted to connect 1 K. xvi. 34, with xvii. 1 (Smith's *Sacr. Ann.*, vol. ii. p. 421), are instances of this. And the reign of Solomon,[m] and the remarkable rise of Jeroboam were not unlikely to exercise this propensity of the Hellenistic Jews. It is to the existence of such works that the variations in the LXX. account of Solomon and Jeroboam may most probably be attributed.

Another feature in the literary condition of our books must just be noticed, viz. that the compiler, in arranging his materials, and adopting the very words of the documents used by him, has not always been careful to avoid the *appearance* of contradiction. Thus the mention of the staves of the ark remaining in their place "unto this day," 1 K. viii. 8, does not accord with the account of the destruction of the Temple 2 K. xxv. 9. The mention of Elijah as the only prophet of the Lord left, 1 K. xviii. 22, xix. 10, has an appearance of disagreement with xx. 13, 28, 35, &c., though xviii. 4, xix. 18, supply, it is true, a ready answer. In 1 K. xxi. 13, only Naboth is mentioned, while in 2 K. ix. 26, his sons are added. The prediction in 1 K. xix. 15-17 has no perfect fulfilment in the following chapters. 1 K. xxii. 38, does not seem to be a fulfilment of xxi. 19.[n] The declaration in 1 K. ix. 22 does not seem in harmony with xi. 28. There are also some singular repetitions, as 1 K. xiv. 21 compared with 31; 2 K. ix. 29 with viii. 25; xiv. 15, 16 with xiii. 12, 13. But it is enough just to have pointed these out, as no real difficulty can be found in them.

III. As regards the authorship of these books, but little difficulty presents itself. The Jewish tradition which ascribes them to Jeremiah, is borne out by the strongest internal evidence, in addition to that of the language. The last chapter, especially as compared with the last chapter of the Chronicles, bears distinct traces of having been written by one who did not go into captivity, but remained in Judea, after the destruction of the Temple. This suits Jeremiah.[o] The events singled out for mention in the concise narrative, are precisely those of which he had personal knowledge, and in which he took special interest. The famine in 2 K. xxv. 3 was one which had nearly cost Jeremiah his life (Jer. xxxviii. 9). The capture of the city, the flight and capture of Zedekiah, the judgment and punishment of Zedekiah and his sons at Riblah, are related in 2 K. xxv. 1-7, in almost the identical words which we read in Jer. xxxix. 1-7. So are the breaking down and burning of the Temple, the king's palace, and the houses of the great men, the deportation to Babylon of the fugitives and the surviving inhabitants of Jerusalem and Judea. The intimate knowledge of what Nebuzar-adan did, both in respect to those selected for capital punishment, and those carried away captive, and those poor whom he left in the land, displayed by the writer of 2 K. xxv. 11, 12, 18-21, is fully explained by Jer. xxxix. 10-14, xl. 1-5, where we read that Jeremiah was actually one of the captives who followed Nebuzar-adan as far as Ramah, and was very kindly treated by him. The careful enumeration of the pillars and of the sacred vessels of the Temple which were plundered by the Chaldaeans, tallies exactly with the prediction of Jeremiah concerning them, xxvii. 19-22. The paragraph concerning the appointment of Gedaliah as governor of the remnant, and his murder by Ishmael, and the flight of the Jews into Egypt, is merely an abridged account of what Jeremiah tells us more fully, xl.-xliii. 7, and are events in which he was personally deeply concerned. The writer in Kings has nothing more to tell us concerning the Jews or Chaldees in the land of Judah, which exactly agrees with the hypothesis that he is Jeremiah, who we know was carried down to Egypt with the fugitives. In fact, the date of the writing and the position of the writer, seem as clearly marked by the termination of the narrative at v. 26, as in the case of the Acts of the Apostles.[p] It may be added, though the argument

[m] A later tale of Solomon's wisdom, in imitation of the judgment of the two women, told in the Talmud, may be seen in *Curiosities of Literature*, i. 226. The Talmud contains many more.

[n] For a discussion of this difficulty see [NABOTH] [JEZREEL]. The simplest explanation is that Naboth was stoned at Samaria, since we find the elders of Jezreel at Samaria, 2 K. x. 1. Thus both the spot where Naboth's blood flowed, and his vineyard at Jezreel, were the scene of righteous retribution.

[o] De Wette cites from Hävernick and Movers, 1 K. ix. 8, 9, comp. with Jer. xxii. 8; 2 K. xvii. 13, 14, comp. with Jer. vii. 13, 24; 2 K. xxi. 12, comp. with Jer. xix. 3; and the identity of Jer. lii. with 2 K. xxiv. 18, seq. xxv., as the strongest passages in favour of Jeremiah's authorship, which, however, he repudiates, on the ground that 2 K. xxv. 27-30 could not have been written by him. A weaker ground can scarcely be imagined. Jer. xv. 1 may also be cited as connecting the compilation of the books of Samuel with Jeremiah. Compare further 1 K. viii. 51 with Jer. xi. 4.

[p] The four last verses, relative to Jehoiachin, are equally a supplement whether added by the author or

of slight weight, that the annexation of this chapter to the writings of Jeremiah so as to form Jer. lii. (with the additional clause contained 28-30) is an evidence of a very ancient, if not a contemporary belief, that Jeremiah was the author of it. Again, the special mention of Seraiah the high-priest, and Zephaniah the second priest, as slain by Nebuzaradan (v. 18), together with three other priests,[9] is very significant when taken in connexion with Jer. xxi. 1, xxix. 25-29, passages which show that Zephaniah belonged to the faction which opposed the prophet, a faction which was headed by priests and false prophets (Jer. xxvi. 7, 8, 11, 16). Going back to the xxivth chapter, we find in ver. 14 an enumeration of the captives taken with Jehoiachin identical with that in Jer. xxiv. 1; in ver. 13, a reference to the vessels of the Temple precisely similar to that in Jer. xxvii. 18-20, xxviii. 3, 6, and in ver. 3, 4, a reference to the idolatries and bloodshed of Manasseh very similar to those in Jer. ii. 34, xix. 4-8, &c., a reference which also connects ch. xxiv. with xxi. 6, 13-16. In ver. 2 the enumeration of the hostile nations, and the reference to the prophets of God, point directly to Jer. xxv. 9, 20, 21, and the reference to Pharaoh Necho in ver. 7 points to ver. 19, and to xlvi. 1-12. Brief as the narrative is, it brings out all the chief points in the political events of the time which we know were much in Jeremiah's mind; and yet, which is exceedingly remarkable, Jeremiah is never once named (as he is in 2 Chr. xxxvi. 12, 21), although the manner of the writer is frequently to connect the sufferings of Judah with their sins and their neglect of the Word of God, 2 K. xvii. 13, *seq.*, xxiv. 2, 3, &c. And this leads to another striking coincidence between that portion of the history which belongs to Jeremiah's times, and the writings of Jeremiah himself. De Wette speaks of the superficial character of the history of Jeremiah's times as hostile to the theory of Jeremiah's authorship. Now, considering the nature of these annals, and their conciseness, this criticism seems very unfounded as regards the reigns of Josiah, Jehoahaz, Jehoiachin, and Zedekiah. It must, however, be acknowledged that as regards Jehoiakim's reign, and especially the latter part of it, and the way in which he came by his death, the narrative is much more meagre than one would have expected from a contemporary writer, living on the spot. But exactly the same paucity of information is found in those otherwise copious notices of contemporary events with which Jeremiah's prophecies are interspersed. Let any one open, *e. g.* Townshend's "*Arrangement*," or Geneste's "*Parallel Histories*," and he will see at a glance how remarkably little light Jeremiah's narrative or prophecies throw upon the latter part of Jehoiakim's reign. The cause of this silence may be difficult to assign, but whatever it was, whether absence from Jerusalem, possibly on the mission described, Jer. xiii.,[1] or imprisonment, or any other impediment, it operated equally on Jeremiah and on the writer of 2 K. xxiv. When it is borne in mind that the writer of 2 K. was a contemporary writer, and, if not Jeremiah, must have had independent means of information, this coincidence will have great weight.

Going back to the reign of Josiah, in the xxiii. and xxii. chapters, the connexion of the destruction of Jerusalem with Manasseh's transgressions, and the comparison of it to the destruction of Samaria, ver. 26, 27, lead us back to xxi. 10-13, and that passage leads us to Jer. vii. 15, xv. 4, xix. 3, 4, &c. The particular account of Josiah's passover, and his other good works, the reference in ver. 24, 25 to the law of Moses, and the finding of the Book by Hilkiah the priest, with the fuller account of that discovery in ch. xxii., exactly suit Jeremiah, who began his prophetic office in the 13th of Josiah; whose xith chap. refers repeatedly to the book thus found; and who showed his attachment to Josiah by writing a lamentation on his death (2 Chr. xxxv. 25), and whose writings show how much he made use of the copy of Deuteronomy so found. [JEREMIAH, HILKIAH.] With Josiah's reign (although we may even in earlier times hit upon occasional resemblances, such for instance as the silence concerning Manasseh's repentance in both), necessarily cease all strongly marked characters of Jeremiah's authorship. For though the general unity and continuity of plan (which, as already observed, pervades not only the books of Kings, but those of Samuel, Ruth, and Judges likewise) lead us to assign the whole history in a certain sense to one author, and enable us to carry to the account of the whole book the proofs derived from the closing chapters, yet it must be borne in mind that the authorship of those parts of the history of which Jeremiah was not an eye-witness, that is, of all before the reign of Josiah, would have consisted merely in selecting, arranging, inserting the connecting phrases, and, when necessary, slightly modernising (see Thenius, *Einleit.* § 2) the old histories which had been drawn up by contemporary prophets through the whole period of time. See *e. g.* 1 K. xiii. 32. For, as regards the *sources of information*, it may truly be said that we have the narrative of contemporary writers throughout. It has already been observed [CHRONICLES] that there was a regular series of state-annals both for the kingdom of Judah and for that of Israel, which embraced the whole time comprehended in the Books of Kings, or at least to the end of the reign of Jehoiakim,

by some later hand. There is nothing impossible in the supposition of Jeremiah having survived till the 37th of Jehoiachin's captivity, though he would have been between 80 and 90. There is something touching in the idea of this gleam of joy having reached the prophet in his old age, and of his having added these few words to his long-finished history of his nation.

[9] These priests, of very high rank, called שֹׁמְרֵי הַסַּף, "keepers of the door," *i. e.* of the three principal entrances to the Temple, are not to be confounded with the porters, who were Levites. We are expressly told in 2 K. xii. 10 (9, A. V.) that these "keepers" were priests. 2 K. xxii. 4, xxiii. 4, with xxv. 18 and xxv. 18, clearly point out the rank of these officers as next in dignity to the second priest, or sagan. [HIGH-PRIEST, vol. i. p. 808.] Josephus calls them τοὺς φυλάσσοντας τὸ ἱερὸν ἡγεμόνας. The expression שֹׁמְרֵי הַסַּף is however also applied to the Levites in 2 Chr. xxxiv. 9, 1 Chr. ix. 19. [KORAHITE.]

[1] The prophet does not tell us that he returned to Jerusalem after hiding his girdle in the Euphrates. The "many days" spoken of in ver. 6 may have been spent among the captivity at Babylon. [JEREMIAH, p. 969 *a*.] He may have returned just after Jehoiakim's death; and "the king and the queen," in ver. 18, may mean Jehoiachin and his mother. Comp. 2 K. xxiv. 12, 15, which would be the fulfilment of Jer. xiii. 18, 19.

2 K. xxiv. 5. These annals are constantly cited by name as "the Book of the Acts of Solomon," 1 K. xi. 41; and, after Solomon, "the Book of the Chronicles of the Kings of Judah, *or*, Israel," *e. g.* 1 K. xiv. 29, xv. 7, xvi. 5, 14, 20; 2 K. x. 34, xxiv. 5, &c., and it is manifest that the author of Kings had them both before him, while he drew up his history, in which the reigns of the two kingdoms are harmonised, and these annals constantly appealed to. But in addition to these national annals, there were also extant, at the time that the Books of Kings were compiled, separate works of the several prophets who had lived in Judah and Israel, and which probably bore the same relation to the annals, which the historical parts of Isaiah and Jeremiah bear to those portions of the annals preserved in the Books of Kings, *i. e.* were, in some instances at least, fuller and more copious accounts of the current events, by the same hands which drew up the more concise narrative of the annals, though in others perhaps mere duplicates. Thus the acts of Uzziah, written by Isaiah, were very likely identical with the history of his reign in the national chronicles; and part of the history of Hezekiah we know was identical in the chronicles and in the prophet. The chapter in Jeremiah relating to the destruction of the Temple (lii.) is identical with that in 2 K. xxiv., xxv. In later times we have supposed that a chapter in the prophecies of Daniel was used for the national chronicles, and appears as Ezr. ch. i. [EZRA, BOOK OF.] Compare also 2 K. xvi. 5, with Is. vii. 1; 2 K. xviii. 8, with Is. xiv. 28-32. As an instance of verbal agreement, coupled with greater fullness in the prophetic account, see 2 K. xx. compared with Is. xxxviii., in which latter alone is Hezekiah's *writing* given.

These other works, then, as far as the memory of them has been preserved to us, were as follows (see Keil's *Apolog. Vers.*). For the time of David, the book of Samuel the seer, the book of Nathan the prophet, and the book of Gad the seer (2 Sam. xxi.–xxiv. with 1 K. 1, being probably extracted from Nathan's book), which seem to have been collected—at least that portion of them relating to David—into one work called "the Acts of David the King," 1 Chr. xxix. 29. For the time of Solomon, "the Book of the Acts of Solomon," 1 K. xi. 41, consisting probably of parts of the "Book of Nathan the prophet, the prophecy of Ahijah the Shilonite, and the visions of Iddo the seer," 2 Chr. ix. 29. For the time of Rehoboam, "the words of Shemaiah the prophet, and of Iddo the seer concerning genealogies," 2 Chr. xii. 15. For the time of Abijah, "the story (מִדְרָשׁ)[a] of the prophet Iddo," 2 Chr. xiii. 22. For the time of Jehoshaphat, "the words of Jehu the son of Hanani," 2 Chr. xx. 34. For the time of Uzziah, "the writings of Isaiah the prophet," 2 Chr. xxvi. 22. For the time of Hezekiah, "the vision of Isaiah the prophet, the son of Amos," 2 Chr. xxxii. 32. For the time of Manasseh, a book called "the sayings of the seers," as the A. V., following the LXX., Vulg., Kimchi, &c., rightly renders the passage, in accordance with ver. 18, 2 Chr. xxxiii. 19, though others, following the grammar too servilely, make *Chozai* a proper name, because of the absence of the article.

[CHRONICLES, vol. i. p. 310.[b]] For the time of Jeroboam II., a prophecy of "Jonah, the son of Amittai the prophet, of Gath-hepher," is cited, 2 K. xiv. 25; and it seems likely that there were books containing special histories of the acts of Elijah and Elisha, seeing that the times of these prophets are described with such copiousness. Of the latter Gehazi might well have been the author, to judge from 2 K. viii. 4, 5, as Elisha himself might have been of the former. Possibly too the prophecies of Azariah the son of Oded, in Asa's reign, 2 Chr. xv. 1, and of Hanani (2 Chr. xvi. 7), (unless this latter is the same as Jehu son of Hanani, as Oded is put for Azariah in xv. 8), and Micaiah the son of Imlah, in Ahab's reign; and Eliezer the son of Dodavah, in Jehoshaphat's; and Zechariah the son of Jehoiada, in Jehoash's; and Oded, in Pekah's; and Zechariah, in Uzziah's reign; of the prophetess Huldah, in Josiah's, and others, may have been preserved in writing, some or all of them. These works, or at least many of them, must have been extant at the time when the Books of Kings were compiled, as they certainly were much later when the Books of Chronicles were put together by Ezra. But whether the author used them all, or only those duplicate portions of them which were embodied in the national chronicles, it is impossible to say, seeing he quotes none of them by name except the acts of Solomon, and the prophecy of Jonah. On the other hand, we cannot infer from his silence that these books were unused by him, seeing that neither does he quote by name the Vision of Isaiah as the Chronicler does, though he must, from its recent date, have been familiar with it, and that so many parts of his narrative have every appearance of being extracted from these books of the prophets, and contain narratives which it is not likely would have found a place in the chronicles of the kings. (See 1 K. xiv. 4, &c., xvi. 1, &c., xi.; 2 K. xvii., &c.)

With regard to the work so often cited in the Chronicles as "the Book of the Kings of Israel and Judah," 1 Chr. ix. 1; 2 Chr. xvi. 11, xxvii. 7, xxviii. 26, xxxii. 32, xxxv. 27, xxxvi. 8, it has been thought by some that it was a separate collection containing the joint histories of the two kingdoms; by others that it is our Books of Kings which answer to this description; but by Eichhorn, that it is the same as the Chronicles of the Kings of Judah so constantly cited in the Books of Kings and this last opinion seems the best founded. For in 2 Chr. xvi. 11, the same book is called "the book of the Kings of Judah and Israel," which in the parallel passage, 1 K. xv. 23, is called "the Book of the Chronicles of the Kings of Judah." So again, 2 Chr. xxvii. 7, comp. with 2 K. xv. 36; 2 Chr. xxviii. 26, comp. with 2 K. xvi. 19; 2 Chr. xxxii. 32, comp. with 2 K. xx. 20; 2 Chr. xxxv. 27, with 2 K. xxiii. 28; 2 Chr. xxxvi. 8, with 2 K. xxiv. 5. Moreover the book so quoted refers exclusively to the affairs of Judah, and even in the one passage where reference is made to it as "the Book of the Kings of Israel," 2 Chr. xx. 34, it is for the reign of Jehoshaphat that it is cited. Obviously therefore it is the same work which is elsewhere described as the *Chr. of Israel and Judah*, and of *Judah and Israel*.[c] Nor is this an unreasonable title to give to these chro-

[a] Movers thinks the term מִדְרָשׁ implies translation from older works.

[b] Thenius comes to the same conclusion (*Einleit.* §3). It is cited in 2 Chr. xxiv. 27 as "the story"—the Midrash—מִדְרָשׁ, of the book of the Kings

[c] Comp. 2 K. xii. 19.

nicles. Saul, David, Solomon, and in some sense Hezekiah, 2 Chr. xxx. 1, 5, 6, and all his successors were kings of Israel as well as of Judah, and therefore it is very conceivable that in Ezra's time the chronicles of Judah should have acquired the name of the Book of the Kings of Israel and Judah. Even with regard to a portion of Israel in the days of Rehoboam, the chronicler remarks, apparently as a matter of gratulation, that "Rehoboam reigned over them," 2 Chr. x. 17; he notices Abijah's authority in portions of the Israelitish territory, 2 Chr. xiii. 18, 19, xv. 8, 9; he not unfrequently speaks of Israel, when the kingdom of Judah is the matter in hand, as 2 Chr. xii. 1, xxi. 4, xxiii. 2, &c., and even calls Jehoshaphat "King of Israel," 2 Chr. xxi. 2, and distinguishes "Israel and Judah," from "Ephraim and Manasseh," xxx. 1; he notices Hezekiah's authority from Dan to Beersheba, 2 Chr. xxx. 5, and Josiah's destruction of idols throughout all the land of Israel, xxxiv. 6-9, and his passover for all Israel, xxxv. 17, 18, and seems to parade the title "*King of Israel*" in connexion with David and Solomon, xxxv. 3, 4, and the relation of the Levites to "all Israel," ver. 3; and therefore it is only in accordance with the feeling displayed in such passages that the name, "the Book of the Kings of Israel and Judah" should be given to the chronicles of the Jewish kingdom. The use of this term in speaking of the "Kings of Israel and Judah who were carried away to Babylon for their transgression," 1 Chr. ix. 1, would be conclusive, if the construction of the sentence were certain. But though it is absurd to separate the words "and Judah" from Israel, as Bertheau does (*Kurzgef. Exeg. Handb.*), following the Masoretic punctuation, seeing that the "*Book of the Kings of Israel and Judah*," is cited in at least six other places in Chr., still it is possible that Israel and Judah might be the antecedent to the pronoun understood before הַגְלָה. It seems, however, much more likely that the antecedent to אֲשֶׁר is מַלְכֵי יִשְׂ֫ רָאֵל וִיהוּדָה. On the whole therefore there is no evidence of the existence in the time of the chronicler of a history, since lost, of the two kingdoms, nor are the Books of Kings the work so quoted by the chronicler, seeing he often refers to it for "the rest of the acts" of Kings, when he has already given all that is contained in our Books of Kings. He refers therefore to the chronicles of Judah. From the above authentic sources then was compiled the history in the books under consideration. Judging from the facts that we have in 2 K. xviii. xix., xx., the history of Hezekiah in the very words of Isaiah, xxxvi.–xxxix.; that, as stated above, we have several passages from Jeremiah in duplicate in 2 K., and the whole of Jer. lii. in 2 K. xxiv. 18, &c., xxv.; that so large a portion of the Books of Kings is repeated in the Books of Chronicles, though the writer of Chronicles had the original Chronicles also before him, as well as from the whole internal character of the narrative, and even some of the blemishes referred to under the 2nd head; we may conclude with certainty that we have in the Books of Kings, not only in the main the history faithfully preserved to us from the ancient chronicles, but most frequently whole passages transferred verbatim into them. Occasionally, no doubt, we have the compiler's own comments, or reflexions thrown in, as at 2 K. xxi. 10-16, xvii. 10-15, xiii. 23, xvii. 7-41, &c. We connect the insertion of the prophecy in 1 K. xiii. with the fact that the compiler himself was an eye-witness of the fulfilment of it, and can even see how the *words* ascribed to the old prophet are of the age of the compiler.[a] We can perhaps see his hand in the frequent repetition on the review of each reign of the remark, "the high places were not taken away, the people still sacrificed and burnt incense on the high places," 1 K. xxii. 43; 2 K. xii. 3, xiv. 4, xv. 4, 35; cf. 1 K. iii. 3, and in the repeated observation that such and such things, as the staves by which the ark was borne, the revolt of the 10 tribes, the rebellion of Edom, &c., continue "unto this day," though it may be perhaps doubted in some cases whether these words were not in the old chronicle (2 Chr. v. 9). See 1 K. viii. 8, ix. 13, 21, x. 12, xii. 19; 2 K. ii. 22, viii. 22, x. 27, xiii. 23, xiv. 7, xvi. 6, xvii. 23, 34, 41, xxiii. 25. It is however remarkable that in no instance does the use of this phrase lead us to suppose that it was penned after the destruction of the Temple: in several of the above instances the phrase necessarily supposes that the Temple and the kingdom of Judah were still standing. If the phrase then is the compiler's, it proves him to have written before the Babylonish captivity; if it was a part of the chronicle he was quoting, it shows how exactly he transferred its contents to his own pages.

IV. As regards the relation of the Books of Kings to those of Chronicles, it is manifest, and is universally admitted, that the former is by far the older work. The language, which is quite free from the Persicisms of the Chronicles and their late orthography, and is not at all more Aramaic than the language of Jeremiah, as has been shown above (II.), clearly points out its relative superiority in regard to age. Its subject also, embracing the kingdom of Israel as well as Judah, is another indication of its composition before the kingdom of Israel was forgotten, and before the Jewish enmity to Samaria, which is apparent in such passages as 2 Chr. xx. 37, xxv., and in those chapters of Ezra (i.–vi.) which belong to Chronicles, was brought to maturity. While the Books of Chronicles therefore were written especially for the Jews after their return from Babylon, the Book of Kings was written for the whole of Israel, before their common national existence was hopelessly quenched.

Another comparison of considerable interest between the two histories may be drawn in respect to the main design, that design having a marked relation both to the individual station of the supposed writers, and the peculiar circumstances of their country at the times of their writing.

Jeremiah was himself a prophet. He lived while the prophetic office was in full vigour, in his own person, in Ezekiel, and Daniel, and many others, both true and false. In his eyes, as in truth, the main cause of the fearful calamities of his countrymen was their rejection and contempt of the Word of God in his mouth and that of the other prophets; and the one hope of deliverance lay in their hearkening to the prophets who still continued to speak to them in the name of the Lord. Accordingly, we find in the Books of Kings great prominence given to the prophetic office. Not only are some fourteen chapters devoted more or less to the history of Elijah and Elisha, the former of whom is but once named, and the latter not once in the Chronicles; but besides the many passages in which the names and sayings of prophets are recorded alike in both histories, the following may be cited

[a] V. 32. The phrase "the cities of Samaria" of course cannot belong to the age of Jeroboam.

as instances in which the compiler of Kings has notices of the prophets which are peculiar to himself. The history of the prophet who went from Judah to Bethel in the reign of Jeroboam, and of the old prophet and his sons who dwelt at Bethel, 1 K. xiii.; the story of Ahijah the prophet and Jeroboam's wife in 1 K. xiv.; the prophecy of Jehu the son of Hanani concerning the house of Baasha, 1 K. xvi.; the reference to the fulfilment of the Word of God in the termination of Jehu's dynasty, in 2 K. xv. 12; the reflexions in 2 K. xvii. 7-23; and above all, as relating entirely to Judah, the narrative of Hezekiah's sickness and recovery in 2 K. xx. as contrasted with that in 2 Chr. xxxii., may be cited as instances of that prominence given to prophecy and prophets by the compiler of the book of Kings, which is also especially noticed by De Wette, §183, and Parker, transl. p. 233.

This view is further confirmed if we take into account the lengthened history of Samuel the prophet, in 1 Sam. (while he is but barely named two or three times in the Chronicles), a circumstance, by the way, strongly connecting the books of Samuel with those of Kings.

Ezra, on the contrary, was only a priest. In his days the prophetic office had wholly fallen into abeyance. That evidence of the Jews being the people of God, which consisted in the presence of prophets among them, was no more. But to the men of his generation, the distinctive mark of the continuance of God's favour to their race was the rebuilding of the Temple at Jerusalem, the restoration of the daily sacrifice and the Levitical worship, and the wonderful and providential renewal of the Mosaic institutions. The chief instrument, too, for preserving the Jewish remnant from absorption into the mass of Heathenism, and for maintaining their national life till the coming of Messiah, was the maintenance of the Temple, its ministers, and its services. Hence we see at once that the chief care of a good and enlightened Jew of the age of Ezra, and all the more if he were himself a priest, would naturally be to enhance the value of the Levitical ritual, and the dignity of the Levitical caste. And in compiling a history of the past glories of his race, he would as naturally select such passages as especially bore upon the sanctity of the priestly office, and showed the deep concern taken by their ancestors in all that related to the honour of God's House, and the support of His ministering servants. Hence the Levitical character of the Books of Chronicles, and the presence of several detailed narratives not found in the Books of Kings, and the more frequent reference to the Mosaic institutions, may most naturally and simply be accounted for, without resorting to the absurd hypothesis that the ceremonial law was an invention subsequent to the captivity. 2 Chr. xxix., xxx., xxxi. compared with 2 K. xviii. is perhaps as good a specimen as can be selected of the distinctive spirit of the Chronicles. See also 2 Chr. xxvi. 16-21, comp. with 2 K. xv. 5; 2 Chr. xi. 13-17. xiii. 9-20, xv. 1-15, xxiii. 2-8, comp. with 2 K. xi. 5-9, and vers. 18, 19, comp. with ver. 18, and many other passages. Moreover, upon the principle that the sacred writers were influenced by natural feelings in their selection of their materials, it seems most appropriate that while the prophetical writer in Kings deals very fully with the kingdom of Israel, in which the prophets were much more illustrious than in Judah, the Levitical writer, on the contrary, should concentrate all his thoughts round Jerusalem where alone the Levitical caste had all its power and functions, and should dwell upon all the instances preserved in existing muniments of the deeds and even the minutest ministrations of the priests and Levites, as well as of their faithfulness and sufferings in the cause of truth. This professional bias is so true to nature, that it is surprising that any one should be found to raise an objection from it. Its subserviency in this instance to the Divine purposes and the instruction of the Church, is an interesting example of the providential government of God. It may be further mentioned as tending to account simply and naturally for the difference in some of the narratives in the books of Kings and Chronicles respectively, that whereas the compiler of Kings usually quotes the Book of the Chronicles of the Kings of Judah, the writer of Chronicles very frequently refers to those books of the contemporary prophets which we presume to have contained more copious accounts of the same reigns. This appears remarkably in the parallel passages in 1 K. xi. 41; 2 Chr. ix. 29, where the writer of Kings refers for "the rest of Solomon's acts" to the "book of the acts of Solomon," while the writer of Chronicles refers to "the book of Nathan the prophet" and "the prophecy of Ahijah the Shilonite," and "the visions of Iddo the seer against Jeroboam the son of Nebat;" and in 1 K. xiv. 29, and 2 Chr. xii. 15, where the writer of Kings sums up his history of Rehoboam with the words, "Now the rest of the acts of Rehoboam and all that he did, are they not written in the *Book of the Chronicles of the Kings of Judah*?" whereas the chronicler substitutes "*in the Book of Shemaiah the prophet, and of Iddo the seer concerning genealogies*;" and in 1 K. xxii. 45, where "the Book of the Chronicles of the Kings of Judah" stands instead of "the Book of Jehu the son of Hanani," in 2 Chr. xx. 34. Besides which, the very formula so frequently used, "the rest of the acts of *so and so*, and all that he did," &c., necessarily supposes that there were in the chronicles of each reign, and in the other works cited, many things recorded which the compiler did not transcribe, and which of course it was open to any other compiler to insert in his narrative if he pleased. If then the chronicler, writing with a different motive and different predilections, and in a different age, had access to the same original documents from which the author of Kings drew his materials, it is only what was to be expected, that he should omit or abridge some things given in detail in the Book of Kings, and should insert, or give in detail, some things which the author of Kings had omitted, or given very briefly. The following passages which are placed side by side are examples of these opposite methods of treating the same subject on the part of the two writers:—

Full in Kings.	*Short in Chronicles.*
1 K. i. ii. give in detail the circumstances of Solomon's accession, the conspiracy of Adonijah, Joab, Abiathar, &c., and substitution of Zadok in the priest's office in room of Abiathar, the submission of Adonijah and all his party, Joab's death, &c.	1 Chr. xxix. 22-24. "And they made Solomon the son of David king the second time, and anointed him unto the Lord to be the chief governor, and Zadok to be priest. Then Solomon sat on the throne of the Lord as king instead of David his father, and prospered, and all Israel obeyed him. And all the princes and the mighty men, and all the sons likewise of king David, submitted themselves unto Solomon the king."

Full in Kings.	*Short in Chronicles.*
1 K. ii. 5-14.	2 Chr. i. 7-12.
Ver. 6. "And Solomon said, Thou hast showed unto thy servant David my father great mercy, according as he walked before Thee in truth, and in righteousness, and in uprightness of heart with Thee; and Thou hast kept for him this great kindness, that Thou hast given him a son to sit on his throne, as it is this day."	Ver. 8. "And Solomon said unto God, Thou hast shewed great mercy unto David my father,
	and hast made me to reign in his stead."
7, 8, 9, 10 "And the speech pleased the Lord, that Solomon had asked this thing."	
11. "And God said unto him," &c.	11. "And God said to Solomon," &c.
12. "... like unto thee all thy days."	12. "... any after thee have the like."
14. "And if thou wilt walk in my ways, and keep my statutes and my commandments as thy father David did walk, then I will lengthen thy days."	
15. "And Solomon awoke, and behold it was a dream. And he came to Jerusalem, and stood before the ark of the covenant of the Lord, and offered up burnt-offerings, and offered peace-offerings, and made a feast to all his servants."	13. "Then Solomon came from his journey to the high place that was at Gibeon to Jerusalem, from before the tabernacle of the congregation,
16-28. Solomon's judgment.	
iv. 1. "So king Solomon was king over all Israel."	and reigned over Israel."
2-19. Containing a list of Solomon's officers.	Omitted in Chronicles.
xi. 1-40. Containing history of Solomon's idolatry, and the enmity of Hadad, and Rezon, and Jeroboam against him.	Wholly omitted in Chronicles, except the allusion in 2 Chr. x. 2, "It came to pass, when Jeroboam the son of Nebat, who was in Egypt, whither he had fled from the presence of Solomon the king," &c.
xii. 2. "Who was yet in Egypt." The omission of the word "yet" in Chron. is of course accounted for by his flight to Egypt not having been narrated by the chronicler.	
1 K. xiv. 22-24. A detailed account of the idolatries of Judah in the reign of Rehoboam.	2 Chr. xii. 1. "And it came to pass when Rehoboam had established the kingdom, and had strengthened himself, he forsook the law of the Lord, and all Israel with him."
1 K. xv. 18. "Then Asa took all the silver and the gold that were left in the treasures of the house of the Lord, and the treasures of the king's house, and delivered them into the hand of his servants; and king Asa sent them to Benhadad the son of Tabrimon, the son of Hezion, king of Syria, that dwelt at Damascus, saying, There is a league," &c.	2 Chr. xvi. 2. "Then Asa brought out silver and gold out of the treasures of the house of the Lord, and of the king's house, and
	sent to Benhadad
	king of Syria, that dwelt at Damascus, saying, There is a league," &c.
2 K. xvi. 10-16. A detailed account of Ahaz's visit to Damascus, and setting up an altar in the temple at Jerusalem after the pattern of one at Damascus. Urijah's subservicncy, &c.	2 Chr. xxviii. 22, 23. "And in the time of his distress did he trespass yet more against the Lord: this is that king Ahaz. For he sacrificed unto the gods of Damascus which smote him. And he said, Because the gods of Syria help them, therefore will I sacrifice to them, that they may help me."

Full in Kings.	*Short in Chronicles.*
xx. 1-19. Hezekiah's sickness, prayer, and recovery, with Isaiah's prophecy, and the sign of the shadow on the dial; the visit of the Babylonish ambassadors; Hezekiah's pride, Isaiah's rebuke, and Hezekiah's submission. Throughout the history of Hezekiah the narrative in 2 K. and Isaiah is much fuller than in Chronicles.	xxxii. 24-26. "In those days Hezekiah was sick to the death, and prayed unto the Lord, and He spake unto him and gave him a sign. But Hezekiah rendered not again according to the benefit done unto him; for his heart was lifted up: therefore there was wrath upon him, and upon Judah and Jerusalem Notwithstanding, Hezekiah humbled himself for the pride of his heart, both he and the inhabitants of Jerusalem, so that the wrath of the Lord came not upon them in the days of Hezekiah." Ver. 31. "Howbeit in the business of the ambassadors of the princes of Babylon, who sent unto him to enquire of the wonder done in the land, God left him to try him, that he might know all that was in his heart."
xxi. 10-16. Message from God to Manasseh by His prophets. Manasseh's sin.	2 Chr. xxxiii. 10. "And the Lord spake to Manasseh and his people: but they would not hearken.
2 K. xxiii. 4-25. Detailed account of the destruction of Baal-worship and other idolatrous rites and places in Judah and Israel, by Josiah, "that he might perform the words of the law which were written in the book that Hilkiah the priest found in the house of the Lord."	2 Chr. xxxiv. 32, 33. "And the inhabitants of Jerusalem did according to the covenant of God, the God of their fathers. And Josiah took away all the abominations out of all the countries that pertained to the children of Israel, and made all that were present in Israel to serve, even to serve the Lord their God."

In like manner a comparison of the history of the reigns of Jehoahaz, Jehoiakim, Jehoiachin, and Zedekiah, will show, that, except in the matter of Jehoiakim's capture in the 4th year of his reign, and deportation to (or towards) Babylon, in which the author of Chronicles follows Daniel and Ezekiel (Dan. i. 1, 2; Ez. xix. 9), the narrative in Chronicles is chiefly an abridgment of that in Kings. Compare 2 K. xxiii. 30-37, with 2 Chr. xxxvi. 1-5; 2 K. xxiv. 1-7, with 2 Chr. xxxvi. 6-8; 2 K. xxiv. 10-17, with 2 Chr. xxxvi. 10. From 2 Chr. xxxvi. 13, however, to the end of the chapter, is rather a comment upon the history in 2 K. xxv. 1-21, than an abridgment of it.

Under this head should be noticed also what may be called systematic abridgments; as when the statements in Kings concerning high-place worship in the several reigns (2 K. xii. 2, 3; xiv. 3, 4; xv. 3, 4, 35) are either wholly omitted, or more cursorily glanced at, as at 2 Chr. xxv. 2, xxvii. 2; or when the name of the queen-mother is omitted, as in the case of the seven last kings from Manasseh downwards, whose mothers are given by the author of Kings, but struck out by the author of Chronicles.[x]

[x] The annexed list of kings' mothers shows which are named in Kings and Chronicles, which in Kings alone:—

Solomon	son of	Bathsheba, K. and Chr. (1. hi. 5).
Rehoboam	"	Naamah, K. and Chr.
Abijah	"	Maachah or Michaiah, K and Chr.
Asa	"	Maachah, da of Absalom, K. and Chr
Jehoshaphat	"	Azubah, K. and Chr.
Jehoram	"	———
Ahaziah	"	Athaliah, K. and Chr.
Joash	"	Zibiah, K. and Chr.
Amaziah	"	Jehoaddan, K. and Chr.

There is something systematic also in the omitted or abbreviated accounts of the idolatries in the reigns of Solomon, Rehoboam, and Ahaz. It may not always be easy to assign the exact motives which influence a writer, who is abbreviating, in his selection of passages to be shortened or left out; but an obvious motive in the case of these idolatries, as well as the high-places, may be found in the circumstance that the idolatrous tendencies of the Jews had wholly ceased during the captivity, and that the details and repetition of the same remark relating to them were therefore less suited to the requirements of the age. To see a design on the part of the Chronicler to deceive and mislead, is to draw a conclusion not from the facts before us, but from one's own prejudices. It is not criticism, but invention.

On the other hand, the subjoined passages present some instances in which the Books of Kings give the short account, and the Books of Chronicles the full one.

Short in Kings.	*Full in Chronicles.*
1 K. viii.	2 Chr. v
Ver 10. "And it came to pass when the priests were come out of the holy place,	Ver. 11. "And it came to pass when the priests were come out of the holy place: (for all the priests that were present were sanctified, and did not then wait by course:
	12. "Also the Levites which were the singers, all of them of Asaph, of Heman, of Jeduthun, with their sons and their brethren, being arrayed in white linen, having cymbals and psalteries and harps, stood at the east end of the altar, and with them 120 priests, sounding with trumpets:)
	13. "It came even to pass, as the trumpeters and singers were as one, to make one sound to be heard in praising and thanking the Lord; and when they lifted up their voice with the trumpets and cymbals and instruments of musick, and praised the Lord, saying, For He is good, for His mercy endureth for ever, that then the house was filled with a cloud, even the house of the Lord.
that the cloud filled the house of the Lord,	14. "So that the priests could not stand to minister by reason of the cloud: for the glory of the Lord had filled the house of God.
11. "So that the priests could not stand to minister because of the cloud: for the glory of the Lord had filled the house of the Lord.	Then said Solomon," &c.
12. "Then said Solomon," &c.	
1 K. viii.	2 Chr. vi., vii.
Ver. 52 corresponds with 2 Chr. vi. 40. Ver. 53 is omitted in Chr.	Ver. 41. "Now therefore arise, O Lord God, into thy resting place, thou, and the ark of thy strength: let thy priests, O Lord God, be clothed with salvation, and thy saints rejoice in goodness.
	42. "O Lord God, turn not away the face of thine anointed; remember the mercies of David thy servant.
54. "And it was so that *when Solomon had made an end of praying* all this prayer and supplication unto the Lord he arose from before the altar of the Lord, from kneeling on his knees with his hands spread up to heaven."	1. "*Now when Solomon had made an end of praying*, the fire came down from heaven, and consumed the burnt-offering and the sacrifices, and the glory of the Lord filled the house, and the priests could not enter into the house of the Lord, because the glory of the Lord had filled the Lord's house.[a] And when all the children of Israel saw how the fire came down, and the glory of the Lord upon the house, they bowed themselves with their faces to the ground, upon the pavement, and worshipped and praised the Lord, saying, For He is good, for His mercy endureth for ever.
55-61. "And he stood and blessed all the congregation," &c.	4. "Then the king and all the people offered sacrifice before the Lord."
62. "And the king, and all Israel with him, offered sacrifices before the Lord."	
1 K. xii. 24 corresponds with 2 Chr. xi. 4.	
Wholly omitted in Kings, where from xii. 25 to xiv. 20 is occupied with the kingdom of Israel, and seems to be not improbably taken from the book of Ahijah the Shilonite.	2 Chr. xi. 5-23. Containing particulars of the reign of Rehoboam, and the gathering of priests and Levites to Jerusalem, during his three first years, very likely from the book of Iddo, as this passage has a genealogical form.
xiv. 25, 26. A very brief mention of Shishak's invasion, and plunder of the sacred and royal treasures.	xii. 2-9. A more detailed account of Shishak's invasion, of the number and nature of his troops, the capture of the fenced cities of Judah, and the prophecying of Shemaiah on the occasion; evidently extracted from the book of Shemaiah.
1 K. xv.	2 Chron. xiii.
Ver. 7. "And there was war between Abijam and Jeroboam."	Ver. 2. "And there was war between Abijah and Jeroboam."
	3-21 contains a detailed account of the war between the two kings; of Abijah's speech to the Israelites, upbraiding them with forsaking the Levitical worship, and glorying in the retention of the same by Judah; his victories, and his family.
7. "And the rest of the acts of Abijam, and all that he did, are they not written in the book of the Chronicles of the Kings of Judah," &c.	22. "And the rest of the acts of Abijah, and his ways and his sayings, are written in the story (midrash) of the prophet Iddo."
8. "And Abijam slept with his fathers," &c.	23. "And Abijah slept with his fathers," &c. (xiv. 1, A. V.)

[7] A curious incidental confirmation of the fact of this copious use of musical instruments in Solomon's time may be found in 1 K. x. 11, 12, where we read that Solomon made of the "great plenty of almug-trees" which came from Ophir "harps and psalteries for singers." Several able critics (as Ewald) have inferred from the frequent mention of the Levitical musical services, that the author of Chronicles was one of the singers of the tribe of Levi himself.

[a] This is obviously repeated here, because at this moment the priests ought to have entered into the house but could not because of the glory.

Short in Kings.	*Full in Chronicles.*
...ked and removed all the ...ods that his fathers had ...ade."	fortifying the cities of Judah; of Asa's army; the invasion of Zerah the Ethiopian; Asa's victory; Azariah the son of Oded's prophecy; Asa's further reforms in the 15th year of his reign.
Entirely omitted.	xvi. 7-14. Hanani's prophecy against Asa, for calling in the aid of Tabrimon king of Syria; Asa's wrath, disease, death embalming, and burial.
22. "Nevertheless in the ...me of his old age he was ...iseased in his feet."

2 K. ix. 27. "And when Ahaziah the ...ing of Judah saw this, he ...ed by the way of the ...arden-house. And Jehu ...rsued after him, and ...id, Smite him also in the ...hariot. And they did so ...t the going up to Gur, ...hich is by Ibleam. And ...e fled to Megiddo, and ...ed there. And his ser...ants carried him in a ...hariot to Jerusalem, and ...ried him in his sepulchre	2 Chr. xxii. 7-9. "And the destruction of Ahaziah was of God by coming to Joram: for when he was come, he went out with Jehoram against Jehu the son of Nimshi, whom the Lord had anointed to cut off the house of Ahab. And it came to pass that when Jehu was executing judgment upon the house of Ahab, and found the princes of Judah and the sons of the brethren of Ahaziah, that ministered to Ahaziah, he slew them And he sought Ahaziah and they caught him (for he was hid in Samaria), and they brought him to Jehu; and when they had slain him they buried him, because said they he is the son of Jehoshaphat, who sought the Lord with all his heart. So the house of Ahaziah had no power still to keep the kingdom."
with his fathers in the city of David."	

With reference to the above two accounts of the death of Ahaziah, which have been thought irreconcileable (Ewald, iii. 529; Parker's De Wette, 270; Thenius, &c.), it may be here remarked, that the order of the events is sufficiently intelligible if we take the account in Chronicles, where the kingdom of Judah is the main subject, as explanatory of the brief notice in Kings, where it is only incidentally mentioned in the history of Israel. The order is clearly as follows:—Ahaziah was with Jehoram at Jezreel when Jehu attacked and killed him. Ahaziah escaped and fled by the Beth-gan road to Samaria, where the partisans of the house of Ahab were strongest, and where his own brethren were, and there concealed himself. But when the sons of Ahab were all put to death in Samaria, and the house of Ahab had hopelessly lost the kingdom, he determined to make his submission to Jehu, and sent his brethren to salute the children of Jehu[a] (2 K. x. 13), in token of his acknowledgment of him as king of Israel. Jehu, instead of accepting this submission, had them all put to death, and hastened on to Samaria to take Ahaziah also, who he had probably learnt from some of the attendants, or as he already knew, was at Samaria. Ahaziah again took to flight northwards, towards Megiddo, perhaps in hope of reaching the dominions of the king of the Sidonians, his kinsman, or more probably to reach the coast where the direct road from Tyre to Egypt would bring him to Judah. [CAESAREA.] He was hotly pursued by Jehu and his followers, and overtaken near Ibleam, and mortally wounded, but managed to get as far as Megiddo, where it should seem Jehu followed in pursuit of him, and where he was brought to him as his prisoner. There he died of his wounds. In consideration of his descent from Jehoshaphat, "who sought Jehovah with all his heart," Jehu, who was at this time very forward in displaying his zeal for Jehovah, handed over the corpse to his followers, with permission to carry it to Jerusalem, which they did, and buried him in the city of David. The whole difficulty arises from the account in Kings being abridged, and so bringing together two incidents which were not consecutive in the original account. But if 2 K. ix. 27 had been even divided into two verses, the first ending at "garden-house," and the next beginning "and Jehu followed after him," the difficulty would almost disappear. Jehu's pursuit of Ahaziah would only be interrupted by a day or two, and there would be nothing the least unusual in the omission to notice this interval of time in the concise abridged narrative. We should then understand that the word *also* in the *original* narrative referred not to Jehoram, but to the brethren of Ahaziah, who had

[a] Not, as Thenius and others, the children of Jehoram, and of Jezebel the queen-mother.

just before been smitten, and the death of Ahaziah would fall under 2 K. x. 17. If Beth-gan (A. V. "garden-house") be the same as En-gannim, now *Jenin*, it lay directly on the road from Jezreel to Samaria, and is also the place at which the road to Megiddo and the coast, where Caesarea afterwards stood, turns off from the road between Jezreel and Samaria.[b] In this case the mention of Beth-gan in Kings as the direction of Ahaziah's flight is a confirmation of the statement in Chronicles that he concealed himself in Samaria. This is also substantially Keil's explanation (p. 288-9). Movers proposes an alteration of the text (p. 92, note), but not very successfully (וַיָּבֹא הוּא לִיהוּדָה instead of וַיְבַאֲהוּ אֵלֵיהוּ).

The other principal additions in the Books of Chronicles to the facts stated in Kings are the following. In 2 Chr. xxiv. 17-24 there is an account of Joash's relapse into idolatry after the death of Jehoiada, of Zechariah's prophetic rebuke of him, and of the stoning of Zechariah by the king's command in the very court of the Temple; and the Syrian invasion, and the consequent calamities of the close of Joash's reign are stated to have been the consequence of this iniquity. The Book of Kings gives the history of the Syrian invasion at the close of Joash's reign, but omits all mention of Zechariah's death. In the account of the Syrian invasion also some details are given of a battle in which Jehoash was defeated, which are not mentioned in Kings, and repeated reference is made to the sin of the king and people as having drawn down this judgment upon them. But though the apostasy of Jehoash is not mentioned in the Book of Kings, yet it is clearly implied in the expression (2 K. xii. 2), "Jehoash did that which was right in the eyes of Jehovah all his days, wherein Jehoiada the priest instructed him." The silence of Kings is perhaps to be accounted for by the author following here the Chronicle of the Kings, in which Zechariah's death was not given. And the truth of the narrative in the Book of Chronicles is confirmed by the distinct reference to the death of Zechariah, Luke xi. 49-51.

2 Chr. xxv. 5-16 contains a statement of a genealogical character,[c] and in connexion with it an account of the hiring of 100,000 mercenaries out of Israel, and their dismissal by Amaziah on the bidding of a man of God. This is followed by an account (in greater detail than that in Kings) of Amaziah's victory over the Edomites, the plunder of certain cities in Judah by the rejected mercenaries of Israel, the idolatry of Amaziah with the idols of Edom, and his rebuke by a prophet.

2 Chr. xxvi. 5-20 contains particulars of the reign of Uzziah, his wars with the Philistines, his towers and walls which he built in Jerusalem and Judah, and other statistics concerning his kingdom, somewhat of a genealogical character; and lastly, of his invasion of the priestly office, the resistance of Azariah the priest, and the leprosy of the king. Of all this nothing is mentioned in Kings except the fact of Uzziah's leprosy in the latter part of his reign; a fact which confirms the history in Chronicles. The silence of the Book of Kings may most probably be explained here on the mere *principle* of abridgment.

2 Chr. xxvii. 2-6 contains some particulars of the reign of Jotham, especially of the building done by him, and the tribute paid by the Ammonites, which are not contained in Kings.

2 Chr. xxviii. 17-19 gives details of invasions by Edomites and Philistines, and of cities of Judah taken by them in the reign of Ahaz, which are not recorded in Kings. 2 K. xvi. 5 speaks only of the hostile attacks of Rezin and Pekah. But 2 Chr. xxix.-xxxi. contains by far the longest and most important addition to the narrative in the Book of Kings. It is a detailed and circumstantial account of the purification of the Temple by Hezekiah's orders in the first year of his reign, with the names of all the principal Levites who took part in it, and the solemn sacrifices and musical services with which the Temple was reopened, and the worship of God reinstated, after the desuetude and idolatries of Ahaz's reign. It then gives a full account of the celebration of a great Passover at Jerusalem in the second month, kept by all the tribes, telling us that "since the time of Solomon the son of David king of Israel there was not the like in Jerusalem;" and goes on to describe the destruction of idols both in Judah and Israel; the revival of the courses of priests and Levites, with the order for their proper maintenance, and the due supply of the daily, weekly, and monthly sacrifices; the preparation of chambers in the Temple for the reception of the tithes and dedicated things, with the names of the various Levites appointed to different charges connected with them. Of this there is no mention in Kings: only the high religious character and zeal, and the attachment to the law of Moses, ascribed to him in 2 K. xviii. 4-6, is in exact accordance with these details.

2 Chr. xxxii. 2-8 supplies some interesting facts connected with the defence of Jerusalem, and its supplies of water, in Hezekiah's reign, which are not mentioned in 2 K. xviii.

2 Chr. xxxiii. 11-19 contains the history of Manasseh's captivity, deportation to Babylon, repentance and restoration to his throne, and an account of his buildings in Jerusalem after his return. The omission of this remarkable passage of history in the Book of Kings is perhaps one of the most difficult to account for. But since the circumstances are, in the main, in harmony with the narrative in Kings, and with what we know of the profane history of the times (as Keil has shown, p. 427), and since we have seen numerous other omissions of important events in the Books of Kings, to disbelieve or reject it on that account, or to make it a ground of discrediting the Book of Chronicles, is entirely contrary to the spirit of sound criticism. Indeed all the soberer German critics accept it as truth, and place Manasseh's captivity under Esarhaddon (Bertheau, *in loc.*).[d] Bertheau suggests that some support to the account may perhaps be found in 2 K. xx. 17, *seq.* Movers, while he defends the truth of Manasseh's exile to Babylon, seems to give up the story of his repentance, and reduces it to the level of a moral romance, such as the books of Tobit and Judith. But such a mode of explaining

[b] See Van de Velde's map of the Holy Land, and Stanley, *S. & P.* p. 342.

[c] From 1 Chr. ix. 1, it appears that "The Book of the Chronicles of the Kings of Judah" contained a copious collection of genealogies.

[d] In like manner the Book of Kings is silent concerning Jehoiakim's being carried to Babylon; and yet Dan. i. 2, Ez. xix. 9, both expressly mention it in accordance with 2 Chr. xxxvi. 6.

away plain historical statements of a trustworthy historian, who cites contemporary documents as his authority (let alone the peculiar character of the Bible histories as "given by inspiration of God"), cannot reasonably be accepted. There is doubtless some reason why the repentance of Manasseh for his dreadful and heinous wickedness was not recorded in the Book of Kings, and why it was recorded in Chronicles; just as there is some reason why the repentance of the thief on the cross is only recorded by one evangelist, and why the raising of Lazarus is passed over in silence in the three first Gospels. It may be a moral reason: it may have been that Manasseh's guilt being permanent in its fatal effects upon his country, he was to be handed down to posterity in the national record as the SINFUL KING, though, having obtained mercy as a penitent man, his repentance and pardon were to have a record in the more private chronicle of the church of Israel. But, whatever the cause of this silence in the Book of Kings may be, there is nothing to justify the rejection as non-historical of any part of this narrative in the Book of Chronicles.

Passing over several other minor additions, such as 2 Chr. xxxiv. 12-14, xxxv. 25, xxxvi. 6, 7, 13, 17, it may suffice to notice in the last place the circumstantial account of JOSIAH'S PASSOVER in 2 Chr. xxxv. 1-19, as compared with 2 K. xxiii. 21-23. This addition has the same strong Levitical character that appears in some of the other additions; contains the names of many Levites, and especially, as in so many other passages of Chronicles, the names of singers; but is in every respect, except as to the time,[e] confirmatory of the brief account in Kings. It refers, curiously enough, to a great Passover held in the days of Samuel (thus defining the looser expressions in 2 K. xxiii. 22, "the days of the judges"), of which the memorial, like that of Joab's terrible campaign in Edom (1 K. xi. 15, 16), has not been preserved in the books of Samuel, and enables us to reconcile one of those little verbal apparent discrepancies which are jumped at by hostile and unscrupulous criticism. For the detailed account of the two Passovers in the reigns of Hezekiah and Josiah enables us to see, that, while Hezekiah's was most remarkable for the extensive feasting and joy with which it was celebrated, Josiah's was more to be praised for the exact order in which everything was done, and the fuller union of all the tribes in the celebration of it (2 Chr. xxx. 26, xxxv. 18; 2 K. xxiii. 22). As regards discrepancies which have been imagined to exist between the narratives in Kings and Chronicles, besides those already noticed, and besides those which are too trifling to require notice, the account of the repair of the Temple by King Joash, and that of the invasion of Judah by Hazael in the same reign may be noticed. For the latter, see JOASH. As regards the former, the only real difficulty is the position of the chest for receiving the contributions. The writer of 2 K. xii. 9, seems to place it in the inner court, close to the brazen altar, and says that the priests who kept the door put therein all the money that was brought into the house of Jehovah. The writer of 2 Chr. xxiv. 8, places it apparently in the outer court, at the entrance into the inner court, and makes the princes and people cast the money into it themselves. Bertheau thinks there were two chests. Lightfoot, that it was first placed by the altar, and afterwards removed outside at the gate (ix. 374-5), but whether either of these be the true explanation, or whether rather the same spot be not intended by the two descriptions, the point is too unimportant to require further consideration in this place.

From the above comparison of parallel narratives in the two books, which, if given at all, it was necessary to give somewhat fully, in order to give them fairly, it appears that the results are precisely what would naturally arise from the circumstances of the case. The writer of Chronicles, having the books of Kings before him,[f] and to a great extent making those books the basis of his own, but also having his own personal views, predilections, and motives in writing, writing for a different age, and for people under very different circumstances; and, moreover, having before him the original authorities from which the books of Kings were compiled, as well as some others, naturally rearranged the older narrative as suited his purpose, and his tastes; gave in full passages which the other had abridged, inserted what had been wholly omitted, omitted some things which the other had inserted, including everything relating to the kingdom of Israel, and showed the colour of his own mind, no only in the nature of the passages which he selected from the ancient documents, but in the reflections which he frequently adds upon the events which he relates, and possibly also in the turn given to some of the speeches which he records. But to say, as has been said or insinuated, that a different view of supernatural agency and Divine interposition, or of the Mosaic institutions and the Levitical worship, is given in the two books, or that a less historical character belongs to one than to the other, is to say what has not the least foundation in fact. Supernatural agency, as in the cloud which filled the temple of Solomon, 1 K. viii. 10, 11, the appearance of the Lord to Solomon, iii. 5, 11, ix. 2, *seq.*; the withering of Jeroboam's hand, xiii. 3-6; the fire from heaven which consumed Elijah's sacrifice, xviii. 38, and numerous other incidents in the lives of Elijah and Elisha; the smiting of Sennacherib's army, 2 K. xix. 35; the going back of the shadow on the dial of Ahaz, xx. 11, and in the very frequent prophecies uttered and fulfilled. is really more often adduced in these books than in the Chronicles. The selection therefore of one or two instances of miraculous agency which happen to be mentioned in Chronicles and not in Kings, as indications of the superstitious credulous disposition of the Jews after the captivity, can have no effect but to mislead. The same may be said of a selection of passages in Chronicles in which the mention of Jewish idolatry is omitted. It conveys a false inference, because the truth is that the Chronicler does expose the idolatry of Judah as severely as the author of Kings, and traces the destruction of Judah to such idolatry quite as clearly and forcibly (2 Chr. xxxvi. 14, *seq.*). The author of Kings again is quite as explicit in his references to the law of Moses, and

[e] See above, under II.

[f] This appears by comparing the parallel passages, and especially noticing how the formula, "Now the rest of the acts," &c., comes in in both books. See, e. g. 1 K. xv. 23, 24, and 2 Chr. xvi. 11, 12. Of this 1 K. xiv. 31, xv. 1, compared with 2 Chr. xii. 16, xiii. 1, 2, is another striking proof. So is the repetition of rare words found in K. by the Chronicler. Comp. 2 xiv. 14 with 2 Chr. xxv. 24, xv. 5, with xxvi. 21. 1 v. 6, with 2 ix. 25.

has many allusions to the Levitical ritual, though he does not dwell so copiously upon the details. See *e. g.* 1 K. ii. 3, iii. 14, viii. 2, 4, 9, 53, 56, ix. 9, 20, x. 12, xi. 2, xii. 31, 32; 2 K. xi. 5-7, 12, xii. 5, 11, 13, 16, xiv. 6, xvi. 13, 15, xvii. 7-12, 13-15, 34-39, xviii. 4, 6, xxii. 4, 5, 8, *seq.*, xxiii. 21, &c., besides the constant references to the Temple, and to the illegality of high-place worship. So that remarks on the Levitical tone of Chronicles, when made for the purpose of supporting the notion that the law of Moses was a late invention, and that the Levitical worship was of post-Babylonian growth, are made in the teeth of the testimony of the books of Kings, as well as those of Joshua, Judges, and Samuel. The opinion that these books were compiled "towards the end of the Babylonian exile," is doubtless also adopted in order to weaken as much as possible the force of this testimony (De Wette, ii. p. 248; Th. Parker's transl.). As regards the weight to be given to the judgment of critics "of the liberal school," on such questions, it may be observed by the way that they commence every such investigation with this axiom as a starting point, "Nothing supernatural can be true." All prophecy is of course comprehended under this axiom. Every writing therefore containing any reference to the captivity of the Jews, as 1 K. viii. 46, 47, ix. 7, 8, *must* have been written after the events referred to. No events of a supernatural kind *could* be attested in contemporary historical documents. All the narratives therefore in which such events are narrated do not belong to the ancient annals, but *must* be of later growth, and so on. How far the mind of a critic, who has such an axiom to start with, is free to appreciate the other and more delicate kinds of evidence by which the date of documents is decided it is easy to perceive. However, these remarks are made here solely to assist the reader in coming to a right decision on questions connected with the criticism of the books of Kings.

V. The last point for our consideration is the place of these books in the Canon, and the references to them in the N. T. Their canonical authority having never been disputed, it is needless to bring forward the testimonies to their authenticity which may be found in Josephus, Eusebius, Jerome, Augustine, &c., or in Bp. Cosin, or any other modern work on the Canon of Scripture. [CANON.] They are reckoned, as has been already noticed, among the Prophets [BIBLE, vol. i. 211*a*], in the threefold division of the Holy Scriptures; a position in accordance with the supposition that they were compiled by Jeremiah, and contain the narratives of the different prophets in succession. They are frequently cited by our Lord and by the Apostles. Thus the allusions to Solomon's glory (Matt. vi. 29); to the queen of Sheba's visit to Solomon to hear his wisdom (xii. 42); to the Temple (Acts vii. 47, 48); to the great drought in the days of Elijah, and the widow of Sarepta (Luke iv. 25, 26); to the cleansing of Naaman the Syrian (ver. 27); to the charge of Elisha to Gehazi (2 K. iv. 29, comp. with Luke x. 4); to the dress of Elijah (Mark i. 6, comp. with 2 K. i. 8); to the complaint of Elijah, and God's answer to him (Rom. xi. 3, 4); to the raising of the Shunamite's son from the dead (Heb. xi. 35); to the giving and withholding the rain in answer to Elijah's prayer (Jam v. 17, 18; Rev. xi. 6); to Jezebel (Rev. ii. 20) are all derived from the Books of Kings, and, with the statement of Elijah's presence at the Transfiguration, are a striking testimony to their value for the purpose of religious teaching, and to their authenticity as a portion of the Word of God.[s]

On the whole then, in this portion of the history of the Israelitish people to which the name of the *Books of Kings* has been given, we have (if we except those errors in numbers, which are either later additions to the original work, or accidental corruptions of the text), a most important and accurate account of that people during upwards of four hundred years of their national existence, delivered for the most part by contemporary writers, and guaranteed by the authority of one of the most eminent of the Jewish prophets. Considering the conciseness of the narrative, and the simplicity of the style, the amount of knowledge which these books convey of the characters, conduct, and manners of kings and people during so long a period is truly wonderful. The insight they give us into the aspect of Judah and Jerusalem, both natural and artificial, into the religious, military, and civil institutions of the people, their arts and manufactures, the state of education and learning among them, their resources, commerce, exploits, alliances, the causes of their decadence, and finally of their ruin, is most clear, interesting, and instructive. In a few brief sentences we acquire more accurate knowledge of the affairs of Egypt, Tyre, Syria, Assyria, Babylon, and other neighbouring nations, than had been preserved to us in all the other remains of antiquity up to the recent discoveries in hieroglyphical and cuneiform monuments. If we seek in them a system of scientific chronology, we may indeed be disappointed; but if we are content to read accurate and truthful history, ready to fit into its proper place whenever the exact chronology of the times shall have been settled from other sources, then we shall assuredly find they will abundantly repay the most laborious study which we can bestow upon them.

But it is for their deep religious teaching, and for the insight which they give us into God's providential and moral government of the world, that they are above all valuable. The books which describe the wisdom and the glory of Solomon, and yet record his fall; which make us acquainted with the painful ministry of Elijah, and his translation into heaven and which tell us how the most magnificent temple ever built for God's glory, and of which He vouchsafed to take possession by a visible symbol of His presence, was consigned to the flames and to desolation, for the sins of those who worshipped in it, read us such lessons concerning both God and man, as are the best evidence of their divine origin, and make them the richest treasure to every Christian man.

[s] The miracle of the loaves and fishes (Luke ix. 13, 2 K. iv. 42. John vi. 9, 2 K. iv. 43), and the catching away of Philip, Acts ix. 39, 40, as compared with 1 K. xviii. 12, 2 K. ii. 16, are also, in a different way, N. T. references to the Books of Kings.

quet, *Chronology of Times of Esr.*, *Transact. of Chronolog. Institt.* No. iii.; Maurice, *Kings and Prophets*. [A. C. H.]

KIR (קִיר: Καλλάν: *Cyrene*) is mentioned by Amos (ix. 7) as the land from which the Syrians (Aramaeans) were once "brought up;" *i. e.* apparently, as the country where they had dwelt before migrating to the region north of Palestine. It was also, curiously enough, the land to which the captive Syrians of Damascus were removed by Tiglath-Pileser on his conquest of that city (2 K. xvi. 9; comp. Am. i. 5). Isaiah joins it with Elam in a passage where Jerusalem is threatened with an attack from a foreign army (xxii. 6). These notices, and the word itself, are all the data we possess for determining the site. A variety of conjectures have been offered on this point, grounded on some similarity of name. Rennell suggested *Kurdistan* (*Geography of Herodotus*, p. 391); Vitringa, *Carine*, a town of Media; Bochart (*Phaleg*, iv. 32, p. 293), *Curena* or *Curna*, likewise in Media. But the common opinion among recent commentators has been that a tract on the river *Kur* or *Cyrus* (Κῦρος) is intended. This is the view of Rosenmüller, Michaelis, and Gesenius. Winer sensibly remarks that the tract to which these writers refer "never belonged to Assyria," and so cannot possibly have been the country whereto Tiglath-Pileser transported his captives (*Realwörterbuch*, i. 658). He might have added, that all we know of the Semites and their migrations is repugnant to a theory which would make Northern Armenia one of their original settlements. The Semites, whether Aramaeans, Assyrians, Phoenicians, or Jews, seem to have come originally from lower Mesopotamia—the country about the mouths of the Euphrates and Tigris rivers. Here exactly was Elam or Elymais, with which Kir is so closely connected by Isaiah. May not *Kir* then be a variant for *Kish* or *Kush* (Cush), and represent the eastern Ethiopia, the Cissia (Κισσία) of Herodotus? [G. R.]

KIR-HARA'SETH (חֲרֶשֶׂת קִיר: τοὺς λίθους τοῦ τοίχου καθηρημένους; Alex. . . . καθημάξους: *murus fictilis*), 2 K. iii. 25.

KIR-HA'RESH (קִ֫ חֲרֶשׁ, i. e. *Kir-hares*: τοῖχος ἐνκαίνισας; Alex. τῖχος ὁ ἐνέκεντρισας: *ad murum cocti lateris*), Is. xvi. 11.

KIR-HARE'SETH (קִ֫ חֲרֶשֶׂת: τοῖς κατοικοῦσι δὲ Χαλὲθ μελετήσεις: *murus cocti lateris*), Is. xvi. 7.

KIR-HERES (קִ֫ חֶרֶשׁ: κειράδες αἰχμοῦ: *murus fictilis*), Jer. xlviii. 31, 36. This name and the three preceding, all slight variations of it, are all applied to one place, probably KIR-MOAB. Whether Cheres refers to a worship of the sun carried on there is uncertain; we are without clue to the meaning of the name.

KIR'IAH (קִרְיָה), apparently an ancient or archaic word, meaning a city or town. The grounds for considering it a more ancient word than IR (עִיר) or AR (עָר) are—(1.) Its more frequent occurrence in the names of places existing in the country at the time of the conquest. These will be found below. (2.) Its rare occurrence as a mere appellative, except in poetry, where old words and forms are often preserved after they become obsolete in ordinary language. Out of the 36 times that it is found in the O. T. (both in its original and its Chaldee form) 4 only are in the narrative of the earlier books (Deut. ii. 36, iii. 4, 1 K. i. 41, 45), 24 are in poetical passages (Num. xxi. 28; Ps. xlviii. 2; Is. i. 26, &c. &c.), and 8 in the book of Ezra, either in speaking of Samaria (iv. 10), or in the letter of the Samaritans (iv. 12-21), implying that it had become a provincialism. In this it is unlike Ir, which is the ordinary term for a city in narrative or chronicle, while it enters into the composition of early names in a far smaller proportion of cases. For illustration—though for that only—Kiryah may perhaps be compared to the word "burg," or "bury," in our own language.

Closely related to Kiryah is Kereth (כֶּרֶת), apparently a Phoenician form, which occurs occasionally (Job xxix. 7; Prov. viii. 3). This is familiar to us in the Latin garb of *Carthago*, and in the Parthian and Armenian names *Cirta*, Tigrano *Certa* (Bochart, *Chanaan*, ii. cap. x; Gesenius, *Thes.* 1236-7).

As a proper name it appears in the Bible under the forms of Kerioth, Kartah, Kartan; besides those immediately following. [G.]

KIRIATHA'IM (קִרְיָתַיִם, but in the *Cethîb* of Ez. xxv. 9, קִרְיָתִם: Καριαθέμ, in Vat. of Jer. xlviii. 1; elsewhere with Alex. Καριαθαίμ: *Cariathaim*), one of the towns of Moab which were the "glory of the country;" named amongst the denunciations of Jeremiah (xlviii. 1, 23) and Ezekiel (xxv. 9). It is the same place as KIRJATHAIM, in which form the name elsewhere occurs in the A. V. Taken as a Hebrew word this would mean "double city;" but the original reading of the text of Ez. xxv. 9, Kiriatham, taken with that of the Vat. LXX. at Num. xxxii. 37, prompts the suspicion that that may be nearer its original form, and that the *aim*—the Hebrew dual—is a later accommodation, in obedience to the ever-existing tendency in the names of places to adopt an intelligible shape. In the original edition (A.D. 1611) of the A. V. the name Kirjath, with its compounds, is given as Kiriath, the *yod* being there, as elsewhere in that edition, represented by *i*. Kiriathaim is one of the few of these names which in the subsequent editions have escaped the alteration of *i* to *j*. [G.]

KIRIATHIA'RIUS (Καριαθιρί; Alex. Καριαθιάριος: *Crearpatros*), 1 Esd. v. 19. [KIRJATH-JEARIM, and K. ARIM.]

KIR'IOTH (הַקְּרִיּוֹת, with the definite article, i. e. *hak-Keriyoth*: αἱ πόλεις αὐτῆς: *Carioth*), a place in Moab the palaces of which were denounced by Amos with destruction by fire (Am. ii. 2); unless indeed it be safer to treat the word as meaning simply "the cities"—which is probably the case also in Jer. xlviii. 41, where the word is in the original exactly similar to the above, though given in the A. V. "Kerioth." [KERIOTH.] [G.]

KIR'JATH (קִרְיַת: Ἰαριμ; Alex. πόλις Ἰαριμ: *Cariath*), the last of the cities enumerated as belonging to the tribe of Benjamin (Josh. xviii. 28), one of the group which contains both Gibeon and Jerusalem. It is named with Gibeath, but without any copulative—"Gibeath, Kirjath," a circumstance which, in the absence of any further mention of the place, has given rise to several explanations. (1.) That of Eusebius in the *Onomasticon* (Καριάθ), that it was under the protection of Gibeah

(ὑπὸ Μητροπόλιν Γαβαθά). This, however, seems to be a mere supposition. (2.) That of Schwarz and others, that the two names form the title of one place, "Gibeath-Kirjath" (the hill-town). Against this is the fact that the towns in this group are summed up as 14; but the objection has not much force, and there are several considerations in favour of the view. [See GIBEATH, 689b.] But whether there is any connexion between these two names or not, there seems a strong probability that Kirjath is identical with the better-known place KIRJATH-JEARIM, and that the latter part of the name has been omitted by copyists at some very early period. Such an omission would be very likely to arise from the fact that the word for "cities," which in Hebrew follows Kirjath, is almost identical with Jearim;[a] and that it has arisen we have the testimony of the LXX. in both MSS. (the Alex. most complete), as well as of some Hebrew MSS. still existing (Davidson, *Hebr. Text*, ad loc.). In addition, it may be asked why Kirjath should be in the "construct state" if no word follows it to be in construction with? In that case it would be Kiriah. True, Kirjath-jearim is enumerated as a city of Judah[b] (Josh. xv. 9, 60, xviii. 14), but so are several towns which were Simeon's and Dan's, and it is not to be supposed that these places never changed hands. [G.]

KIRJATHA'IM (קִרְיָתַיִם), the name of two cities of ancient Palestine.

1. (Καριαθάμ[c] (in Num.), Καριαθαίμ: *Cariathaim.*) On the east of the Jordan, one of the places which were taken possession of and rebuilt by the Reubenites, and had fresh names conferred on them (Num. xxxii. 37, and see 38). Here it is mentioned between Elealeh, Nebo, and Baal-meon, the first and last of which are known with some tolerable degree of certainty. But on its next occurrence (Josh. xii. 19) the same order of mention is not maintained, and it appears in company with MEPHAATH and SIBMAH, of which at present nothing is known. It is possibly the same place as that which gave its name to the ancient Shaveh-Kiriathaim, though this is mere conjecture. It existed in the time of Jeremiah (xlviii. 1, 23) and Ezekiel (xxv. 9—in these three passages the A. V. gives the name KIRIATHAIM). Both these prophets include it in their denunciations against Moab, in whose hands it then was, prominent among the cities which were "the glory of the country" (Ez. xxv. 9).

By Eusebius it appears to have been well known. He describes it (*Onom.* Καριαθιείμ) as a village entirely of Christians, 10 miles west of Medeba, "close to the Baris" (ἐπὶ τὸν Βάριν). Burckhardt (p. 367, July 13) when at *Madeba* (Medeba) was told by his guide[d] of a place, *et-Teym*, about half an hour (1½ mile English, or barely 2 miles Roman) therefrom, which he suggests was identical with Kirjathaim. This is supported by Gesenius (see his notes on Burckhardt in the Germ. transl. p. 1063), who passes by the discrepancy in the distance by saying that Eusebius's measurements are seldom accurate. Seetzen also names half an hour as the distance (*Reisen*, i. 408).

But it must be admitted that the evidence for the identity of the two is not very convincing, and appears to rest entirely on the similarity in sound between the termination of Kirjathaim and the name of *et-Teym*. In the time of Eusebius the name was Karias—having retained, as would be expected, the first and chief part of the word. Porter (*Hdbook*, 300) pronounces confidently for *Kureiyat*, under the southern side of *Jebel Attarus*, as being identical both with Kirjathaim and Kirjath-Huzoth; but he adduces no arguments in support of his conclusion, which is entirely at variance with Eusebius; while the name, or a similar one (see KERIOTH, KIRIOTH, in addition to those named already), having been a common one east of the Jordan, as it still is (witness *Kureiyeh*, *Kureiyetein*, &c.), *Kureiyat* may be the representative of some other place.

What was the "Baris" which Eusebius places so close to Kirjathaim? Was it a palace or fortress (בִּירָה, Βάρις), or is it merely the corruption of a name? If the latter, then it is slightly in accordance with Beresha, the reading of the Targum Pseudojon. at Num. xxxii. 37.[e] But where to find Beresha we do not at present know. A village named *Bûrazin* is marked in the maps of Robinson (1856) and Van de Velde, but about 9 miles east of *Hesbân*, and therefore not in a suitable position.

2. (ἡ Καριαθαίμ.) A town in Naphtali not mentioned in the original lists of the possession allotted to the tribe (see Josh. xix. 32-39), but inserted in the list of cities given to the Gerahonite Levites, in 1 Chr. (vi. 76), in place of KARTAN in the parallel catalogue, Kartan being probably only a contraction thereof. [G.]

KIR'JATH-AR'BA (קִרְיַת אַרְבַּע, and once, Neh. xi. 25, קִרְיָה: πόλις Ἀρβόκ, π. Ἀργόβ; Alex. Ἀρβό and Ἄρβοδ; ἡ Καριαθαρβόκ; Καριαθαρβοκσεφέρ, but Mai Καριαβόξ Ἐφέρ; Alex. Καριαρβόκ σεφέρ: *Civitas Arbee, Cariat-Arbe*), an early name of the city which after the conquest is generally known as HEBRON (Josh. xiv. 15; Judg. i. 10). Possibly, however, not Kirjath-arba, but MAMRE, was its earliest appellation (Gen. xxxv. 27), though the latter name may have been that of the sacred grove near the town, which would

[a] The text now stands קִרְיַת עָרִים; in the above view it originally stood קִרְיַת יְעָרִים עָרִים.

[b] It is as well to observe, though we may not be able yet to draw any inference from the fact, that on both occasions of its being attributed to Judah, it is called by another name,—"KIRJATH-BAAL, which is Kirjath-jearim."

[c] This reading of the LXX. suggests that the dual termination "aim" may have been a later accommodation of the name to Hebrew forms, as was possibly the case with Jerushalaim (vol. i. 982a). It is supported by the Hebrew text: cf. Es. xxv. 9, and the Vat. LXX. of Jer. xlviii. 1. [KIRIATHAIM.]

[d] There is some uncertainty about Burckhardt's route at this part. In order to see *Madeba*, which is shewn on the maps as nearly S. of *Hesbân*, he left the great road at the latter place, and went through *Djeboul*, *es-Sameh*, and other places which are shewn as on the road eastward, in an entirely different direction from *Madeba*, and then after 8 hours, without noting any change of direction, he arrives at *Madeba*, which appears from the maps to be only about 1½ hour from *Hesbân*.

[e] The following is the full synonym of this Targum for Kirjathaim:—"And the city of two streets paved with marble, the same is Beresha" (בְּיֵרְשָׁא). This is almost identical with the rendering given in the same Targum on Num. xxii. 39, for Kirjath-Huzoth. Can Beresha contain an allusion to Gerasa, the modern *Jerash*?

occasionally transfer its title to the whole spot. [MAMRE.]

The identity of Kirjath-Arba with Hebron is constantly asserted (Gen. xxiii. 2, xxxv. 27; Josh. xiv. 15, xv. 13, 54, xx. 7, xxi. 11),[a] the only mention of it without that qualification being, as is somewhat remarkable, after the return from the captivity (Neh. xi. 25), a date so late that we might naturally have supposed the aboriginal name would have become extinct. But it lasted far longer than that, for when Sir John Maundeville visited the place (cir. 1322) he found that "the Saracens call the place in their language Karicarba, but the Jews call it Arbotha" (*Early Trav.* 161). Thus too in Jerome's time would Debir seem to have been still called by its original title, Kirjath-Sepher. So impossible does it appear to extinguish the name originally bestowed on a place![b]

The signification of Kirjath-Arba is, to say the least, doubtful. In favour of its being derived from some ancient hero is the statement that "Arba was the great man among the Anakim" (Josh. xiv. 15)—the "father of Anak" (xxi. 11). Against it are (*a*) the peculiarity of the expression in the first of these two passages, where the term *Adam* (האדם הגדול)—usually employed for the species, the human race—is used instead of *Ish*, which commonly denotes an individual. (*b*) The consideration that the term "father" is a metaphor frequently employed in the Bible—as in other Oriental writings—for an originator or author, whether of a town or a quality, quite as often as of an individual. The LXX. certainly so understood both the passages in Joshua, since they have in each μητρόπολις, "mother-city." (*c*) The constant tendency to personification so familiar to students of the topographical philology of other countries than Palestine, and which in the present case must have had some centuries in which to exercise its influence. In the lists of 1 Chron. Hebron itself is personified (ii. 42) as the son of Mareshah, a neighbouring town, and the father of Tappuah and other places in the same locality; and the same thing occurs with Beth-zur (ver. 45), Ziph (42), Madmannah and Gibea (49), &c. &c. (*d*) On more than one occasion (Gen. xxiv. 27; Josh. xv. 13; Neh. xi. 25) the name Arba has the definite article prefixed to it. This is very rarely, if ever, the case with the name of a man (see Reland, *Pal.* 724). (*e*) With the exception of the *Ir-David*—the city of David, Zion—the writer does not recal any city of Palestine named after a man. Neither Joshua, Caleb, Solomon, nor any other of the heroes or kings of Israel, conferred their names on places; neither did Og, Jabin, or other Canaanite leaders. The "city of Sihon," for Heshbon (Num. xxi. 27), is hardly an exception, for it occurs in a very fervid burst of poetry, differing entirely from the matter-of-fact documents we are now considering. (*f*) The general consent of the Jewish writers in a different interpretation is itself a strong argument against the personality of Arba, however absurd (according to our ideas) may be their ways of accounting for that interpretation. They take *Arba* to be the Hebrew word for "four," and Kirjath-Arba therefore to be the "city of four;" and this they explain as referring to four great saints who were buried there—Abraham, Isaac, Jacob, and Adam—whose burial there they prove by the words already quoted from Josh. xiv. 15 (*Beresh. rabba*, quoted by Beer, *Leben Abrahams*, 189, and by Keil, *ad loc.*; Bochart, *Phaleg*, iv. 34, &c.). In this explanation Jerome constantly concurs, not only in commentaries (as *Quaest. in Genesim*, xxiii. 2; *Comm. in Matt.* xxvii.; *Epit. Paulae*, §11; *Onomast.* "Arboch" and "Cariatharbe," &c.), but also in the text of the Vulgate at this passage—*Adam maximus ibi inter Enacim situs est.* With this too agrees the Veneto-Greek version, πόλει τῶν τεττάρων (Gen. xxiii. 2, xxxv. 27). It is also adopted by Bochart (*Chanaan*, i. 1), in whose opinion the "four" are Anak, Ahiman, Sheshai, and Talmai.

The fact at the bottom of the whole matter probably is, that Arba was neither a man nor a numeral, but that (as we have so often had occasion to remark in similar cases) it was an archaic Canaanite name, most likely referring to the situation or nature of the place, which the Hebrews adopted, and then explained in their own fashion. [See JEGAR-SAHADUTHA, &c.]

In Gen. xxiii. 2, the LXX. (both MSS.) insert ἡ ἐστιν ἐν τῷ κοιλώματι; and in xxxv. 27 they render K. Arba by εἰς πόλιν τοῦ πεδίου. In the former of these the addition may be an explanation of the subsequent words, "in the land of Canaan"—the explanation having slipped into the text in its wrong place. Its occurrence in both MSS. shows its great antiquity. It is found also in the Samaritan Codex and Version. In xxxv. 27 πεδίον may have arisen from the translators reading עֲרָבָה for אַרְבַּע. [G.]

KIR'JATH-A'RIM (קִרְיַת־עָרִים: Καριαθιαρίμ, Alex. Καριαθιαρείμ: *Cariathiarim*), an abbreviated form of the name KIRJATH-JEARIM, which occurs only in Ezr. ii. 25. In the parallel passage of Nehemiah the name is in its usual form, and in Esdras it is KIRIATHIARIUS. [G.]

KIR'JATH-BA'AL (קִרְיַת־בַּעַל = town of Baal: Καριαθβάαλ: *Cariathbaal*), an alternative name of the place usually called Kirjath-jearim (Josh. xv 60, xviii. 14), but also BAALAH, and once BAALE OF-JUDAH. These names doubtless point to the existence of a sanctuary of Baal at this spot before the conquest. They were still attached to it considerably later, for they alone are used, to the exclusion of the (probably) newly-bestowed name of Kirjath-jearim, in the description of the removal of the ark thence (2 Sam. vi.). [G.]

KIR'JATH-HU'ZOTH (קִרְיַת חֻצוֹת: πόλεως ἐναύλεων: *urbs quae in extremis regni ejus finibus erat*), a place to which Balak accompanied

[a] In Gen. xxxv. 27, the A. V. has "the city of Arbah;" in Josh. xv. 13, and xxi. 11, "the city of Arba."

[b] A curious parallel to this tenacity is found in our own country, where many a village is still known to its rustic inhabitants by the identical name by which it is inscribed in Domesday Book, while they are actually unaware of the later name by which the place has been currently known in maps and documents, and in the general language of all but their own class for centuries. If this is the case with Kirjath-Arba and Hebron, the occurrence of the former in Nehemiah, noticed above, is easily understood. It was simply the effort of the original name to assert its rights and assume its position, as soon as the temporary absence of the Israelites at Babylon had left the Canaanite rustics to themselves.

Balaam immediately after his arrival in Moab (Num. xxii. 39), and which is nowhere else mentioned. It appears to have lain between the ARNON (*Wady Mojeb*) and BAMOTH-BAAL (comp. ver. 36 and 41), probably north of the former, since there is some, though only slight, ground for supposing that Bamoth-Baal lay between Dibon and Beth-baal-meon (see Josh. xiii. 17). The passage (Num. xxii. 39) is obscure in every way. It is not obvious why sacrifices should have been offered there, or how, when Balaam accompanied Balak thither, Balak could have "sent" thence to him and to the princes who were with him (40).

No trace of the name has been discovered in later times. It is usually interpreted to mean "city of streets," from the Hebrew word חוּץ, *chutz*, which has sometimes this meaning (Gesenius, *Thes.* 456*a*; margin of A. V.; and so Luther, *die Gassenstadt*; so also the Veneto-Greek); but Jerome, in the Vulgate, has adopted another signification of the root. The LXX. seem to have read חצרות, "villages," the word which they usually render by ἀναύλεις, and which is also the reading of the Peschito. The Samaritan Codex and Version, the former by its reading חיזות, "visions," and the latter, רזי, "mysteries," seem to favour the idea—which is perhaps the explanation of the sacrifices there—that Kirjath-Chutzoth was a place of sacred or oracular reputation. The Targum Pseudojon. gives it as "the streets of the great city, the city of Sihon, the same is Birosa," apparently identifying it with Kirjathaim (see note to p. 40*b*). [G.]

KIR'JATH-JEA'RIM (קִרְיַת יְעָרִים: πόλις Ἰαρίμ and Ἰαρίν, Καριαθιαρίμ, and once πόλις Καριαθιαρίμ; Alex. the same, excepting the termination εἰμ; Joseph. Καριαθιάριμα: *Cariathiarim*), a city which played a not unimportant part in the history of the Chosen People. We first encounter it as one of the four cities of the Gibeonites (Josh. ix. 17): it next occurs as one of the landmarks of the northern boundary of Judah (xv. 9), and as the point at which the western and southern boundaries of Benjamin coincided (xviii. 14, 15); and in the two last passages we find that it bore another, perhaps earlier, name—that of the great Canaanite deity Baal, namely BAALAH[a] and KIRJATH-BAAL. It is included among the towns of Judah (xv. 60), and there is some reason for believing that under the shortened form of KIRJATH it is also named among those of Benjamin, as might almost be expected from the position it occupied on the confines of each. Some considerations bearing on this will be found under KIRJATH and GIBEAH. It is included in the genealogies of Judah (1 Chr. ii. 50, 52) as founded by, or descended from, SHOBAL, the son of Calebben-Hur, and as having in its turn sent out the colonies of the Ithrites, Puhites, Shumathites, and Mishraites, and those of Zorah and Eshtaol. "Behind Kirjath-jearim" the band of Danites pitched their camp before their expedition to Mount Ephraim and Laish, leaving their name attached to the spot for long after (Judg. xviii. 12). [MAHANEH DAN.] Hitherto, beyond the early sanctity implied in its bearing the name of BAAL, there is nothing remarkable in Kirjath-jearim. It was no doubt this reputation for sanctity which made the people of Beth-shemesh appeal to its inhabitants to relieve them of the Ark of Jehovah, which was bringing such calamities on their untutored inexperience. From their place in the valley they looked anxiously for some eminence, which, according to the belief of those days, should be the appropriate seat for so powerful a Deity—"Who is able to stand before the face of Jehovah, this holy God, and to whom shall He (or, LXX., the ark of Jehovah) *go up* from us?" "And they sent to the inhabitants of Kirjath-jearim, saying, the Philistines have brought back the ark of Jehovah, *come ye down* and *fetch it up* to you" (1 Sam. vi. 20, 21). In this high-place—"the hill" (הַגִּבְעָה)—under the charge of Eleazar, son of Abinadab,[b] the ark remained for twenty years (vii. 2), during which period the spot became the resort of pilgrims from all parts, anxious to offer sacrifices and perform vows to Jehovah (Joseph. *Ant.* vi. 2, §1). At the close of that time Kirjath-Jearim lost its sacred treasure, on its removal by David to the house of Obed-edom the Gittite (1 Chr. xiii. 5, 6; 2 Chr. i. 4; 2 Sam. vi. 2, &c.). It is very remarkable and suggestive that in the account of this transaction the ancient and heathen name Baal is retained. In fact, in 2 Sam. vi. 2—probably the original statement—the name Baale is used without any explanation, and to the exclusion of that of Kirjath-jearim. In the allusion to this transaction in Ps. cxxxii. 6, the name is obscurely indicated as the "wood"—*yaar*, the root of Kirjath-*jearim*. We are further told that its people, with those of Chephirah and Beeroth, 743 in number, returned from captivity (Neh. vii. 29; and see Ezra ii. 25, where the name is K-ARIM, and 1 Esdr. v. 19, KIRIATHIARIUS). We also hear of a prophet URIJAH-ben-Shemaiah, a native of the place, who enforced the warnings of Jeremiah, and was cruelly murdered by Jehoiakim (Jer. xxvi. 20, &c.), but of the place we know nothing beyond what has been already said. A tradition is mentioned by Adrichomius (*Descr. T. S.* Dan. §17), though without stating his authority, that it was the native place of "Zechariah, son of Jehoiada, who was slain between the altar and the Temple."[c]

To Eusebius and Jerome (*Onom.* Cariathiarim) it appears to have been well known. They describe it as a village at the ninth (or, *s. v.* "Baal," tenth) mile between Jerusalem and Diospolis (Lydda). With this description, and the former of these two distances agrees Procopius (see Reland, 503). It was reserved for Dr. Robinson (*B. R.* ii. 11) to discover that these requirements are exactly fulfilled in the modern village of *Kuriet-el-Enab*—now usually known as *Abû Gosh*, from the robber-chief whose head-quarters it was—at the eastern end of the *Wady Aly*, on the road from Jaffa to Jerusalem. And, indeed, if the statement of Eusebius contained the only conditions to be met, the identification would be certain. It does not, however so

[a] In 1 Chr. xiii. 6, the Vulgate has *collis Cariathiarim* for the Baalah of the Hebrew text.

[b] Kirjath-jearim is not stated to have been allotted to the Levites, but it is difficult to suppose that Abinadab and Eleazar were not Levites. This question, and the force of the word rendered "sanctified" (vii. 1), will be noticed under LEVITES. On the other hand it is remarkable that Beth-shemesh, from which the Ark was sent away, was a city of the priests.

[c] The mention of Καριαθιαρείν (Alex. Καριαθιαρίμ) in the LXX. of Josh. iii. 16, possibly proceeds from a corruption of the Hebrew Kirjath-Adam, "the city Adam," as has been pointed out under ADAM, vol. i. 20*b*.

well agree with the requirements of 1 Sam. vi. The distance from Bethshemesh (*Ain Shems*) is considerable—not less than 10 miles—through a very uneven country, whh no appearance of any road ever having existed (Rob. iii. 157). Neither is it at all in proximity to Bethlehem (Ephratah), which would seem to be implied in Ps. cxxxii. 6; though this latter passage is very obscure. Williams (*Holy City*) endeavours to identify Kirjath-jearim with *Deir-el-Howa*, east of *Ain Shems*. But this, though sufficiently near the latter place, does not answer to the other conditions. We may therefore, for the present, consider *Kuriet-el-Enab* as the representative of Kirjath-jearim.

The modern name, differing from the ancient only in its latter portion, signifies the "city of grapes;" the ancient name, if interpreted as Hebrew, the "city of forests." Such interpretations of these very antique names must be received with great caution on account of the tendency which exists universally to alter the names of places and persons so that they shall contain a meaning in the language of the country. In the present case we have the play on the name in Ps. cxxxii. 6, already noticed, the authority of Jerome (*Comm. in Is.* xxix. 1), who renders it *villa silvarum*, and the testimony of a recent traveller (Tobler, *Dritte Wanderung*, 178. 187), who in the immediate neighbourhood, on the ridge probably answering to MOUNT JEARIM, states that, "for real genuine (*echtes*) woods, so thick and so solitary, he had seen nothing like them since he left Germany."

It remains yet to be seen if any separate or definite eminence answering to the hill or high-place on which the ark was deposited is recognisable at *Kuriet-el-Enab*. [G.]

KIR'JATH-SAN'NAH (קִרְיַת סַנָּה: πόλις γραμμάτων: *Cariathsenna*), a name which occurs once only (Josh. xv. 49), as another, and probably an earlier, appellation for DEBIR, an important place in the mountains of Judah, not far from Hebron, and which also bore the name of KIRJATH-SEPHER. Whence the name is derived we have no clue, and its meaning has given rise to a variety of conjectures (see Keil, *Josua*, on x. 40; Ewald, *Gesch.* i. 324 *note*). That of Gesenius (*Thes.* 962) is, that *sannah* is a contraction of *sansannah* = a palm-branch, and thus that Kirjath-sannah is the "city of palms." But this, though adopted by Stanley (*S. & P.* 161, 524), is open to the objection that palms were not trees of the mountain district, where Kirjath-sannah was situated, but of the valleys (*S. & P.* 145).

It will be observed that the LXX. interpret both this name and Kirjath-sepher alike. [G.]

KIR'JATH-SEPHER (קִרְיַת סֵפֶר: in Judg. i. 11, Καριαθσεφὲρ πόλις Γραμμάτων; in ver. 12, and in Josh. the first word is omitted: *Cariathsepher*), the early name of the city DEBIR, which further had the name—doubtless also an early one—of KIRJATH-SANNAH. Kirjath-sepher occurs only in the account of the capture of the place by Othniel, who gained thereby the hand of his wife Achsah, Caleb's daughter (Josh. xv. 15, 16; and in the exact repetition of the narrative, Judg. i. 11. 12). In this narrative, a document of unmistakably early character (Ewald, *Gesch.* ii. 373, 4), it is stated that "the name of Debir before was Kirjath-sepher." Ewald conjectures that the new name was given it by the conquerors on account of its retired position on the back[a]—the south or south-western slopes—of the mountains, possibly at or about the modern *el-Burj*, a few miles W. of *ed-Dhoheriyeh* (*Gesch.* ii. 373 *note*). But whatever the interpretation of the Hebrew name of the place may be, that of the Canaanite name must certainly be more obscure. It is generally assumed to mean "city of book" (from the Hebrew word *Sepher* = book), and it has been made the foundation for theories of the amount of literary culture possessed by the Canaanites (Keil, *Josua*, x. 39; Ewald, i. 324). But such theories are, to say the least, premature during the extreme uncertainty as to the meaning of these very ancient names.[b]

The old name would appear to have been still in existence in Jerome's time, if we may understand his allusion in the epitaph of Paula (§11), where he translates it *vinculum litterarum*. [Comp. KIRJATH-ARBA.]

KIR OF MOAB (קִיר מוֹאָב: τὸ τεῖχος τῆς Μωαβίτιδος: *murus Moab*), one of the two chief strongholds of Moab, the other being AR OF MOAB. The name occurs only in Is. xv. 1, though the place is probably referred to under the names of KIR-HERES, KIR-HARASETH, &c. The clue to its identification is given us by the Targum on Isaiah and Jeremiah, which for the above names has קַרְכָּא, *Cracca*, קְרָךְ, *Crac*, almost identical with the name *Kerak*, by which the site of an important city in a high and very strong position at the S.E. of the Dead Sea is known at this day. The chain of evidence for the identification of *Kerak* with Kir-Moab is very satisfactory. Under the name of Χαρακμῶβα it is mentioned in the Acts of the Council of Jerusalem, A.D. 536 (Reland, *Pal.* 533), by the geographers Ptolemy and Stephanus of Byzantium (Reland, 463, 705). In A.D. 1131, under King Fulco, a castle was built there which became an important station for the Crusaders. Here, in A.D. 1183, they sustained a fruitless attack from Saladin and his brother (Bohaeddin, *Vit. Sal.* ch. 25), the place being as impregnable as it had been in the days of Elisha (2 K. iii. 25). It was then the chief city of *Arabia Secunda* or *Petraeensis*; it is specified as in the *Belka*, and is distinguished from "Moab" or "Rabbat," the ancient AR-MOAB, and from the *Mons regalis* (Schultens, *Index Geogr.* "Caracha"; see also the remarks of Gesenius, *Jesaia*, 517, and his notes to the German transl. of Burckhardt[c]). The Crusaders in error believed it to be Petra, and that name is frequently attached to it in the writings of William of Tyre and Jacob de Vitry (see quotations in Rob. *Bib. Res.* ii. 167). This error is perpetuated in the Greek Church to the present day; and the bishop of Petra, whose office, as representative of the Patriarch, it is to produce the holy fire at Easter in the "Church of the Sepulchre" at Jerusalem

[a] Taking Debir to mean an *adytum*, or innermost recess, as it does in 1 K. vi. 5, 19, &c. (A. V. "oracle").

[b] In the Targum it is rendered by קִרְיָא רַבְּתָא "city of princes" (ἀρχαί). See Buxtorf, *Lex. Talm.* 217.

[c] Gesenius expresses it as follows: "Ar-Moab, Stadt Moabs gleichsam ἄστυ oder *urbs Moabitarum* ... und die Burg des Landes Kir-Moab" (Burckhardt, von Gesenius, 1064).

(Stanley, *S. & P.* 467), is in reality bishop of Kerak (Seetzen, *Reisen*, ii. 358; Burckh. 387).

The modern *Kerak* is known to us through the descriptions of Burckhardt (379-390), Irby (ch. vii.), Seetzen (*Reisen*, i. 412, 3), and De Saulcy (*La Mer Morte*, i. 355, &c.); and these fully bear out the interpretation given above to the name—the "fortress," as contradistinguished from the "metropolis" (Ar) of the country, *i. e.* Rabbath-Moab, the modern *Rabba*. It lies about 6 miles S. of the last-named place, and some 10 miles from the Dead Sea, upon the plateau of highlands which forms this part of the country, not far from the western edge of the plateau. Its situation is truly remarkable. It is built upon the top of a steep hill, surrounded on all sides by a deep and narrow valley, which again is completely inclosed by mountains rising higher than the town, and overlooking it on all sides. It must have been from these surrounding heights that the Israelite slingers hurled their vollies of stones after the capture of the place had proved impossible (2 K. iii. 25). The town itself is encompassed by a wall, to which, when perfect, there were but two entrances, one to the south and the other to the north, cut or tunnelled through the ridge of the natural rock below the wall for a length of 100 to 120 feet. The wall is defended by several large towers, and the western extremity of the town is occupied by an enormous mass of buildings—on the south the castle or keep, on the north the seraglio of El-Melek edh-Dhahir. Between these two buildings is apparently a third exit, leading to the Dead Sea. (A map of the site and a view of part of the keep will be found in the Atlas to De Saulcy, *La Mer Morte*, &c., feuilles 8, 20). The latter shows well the way in which the town is inclosed. The walls, the keep, and seraglio are mentioned by Lynch (*Report*, May 2, p. 19, 20), whose account, though interesting, contains nothing new. The elevation of the town can hardly be less than 3000 feet above the sea (Porter, *Hdbk.* 60). From the heights immediately outside it, near a ruined mosque, a view is obtained of the Dead Sea, and in clear weather of Bethlehem and Jerusalem (Seetzen, *Reisen*, i. 413; Schwarz, 217). [G.]

KISH (קִישׁ: Κίς: *Cis*, Vulg. and A. V., Acts xiii. 21). 1. A man of the tribe of Benjamin and the family of Matri, according to 1 Sam. x. 21, though descended from Becher according to 1 Chr. vii. 8, compared with 1 Sam. ix. 1. [BECHER.] He was son of Ner, brother to Abner, and father to King Saul. Gibeah or Gibeon seems to have been the seat of the family from the time of Jehiel, otherwise called Abiel (1 Sam. xiv. 51), Kish's grandfather (1 Chr. ix. 35).

2. Son of Jehiel, and uncle to the preceding (1 Chr. ix. 36).

3. A Benjamite, great grandfather of Mordecai, who was taken captive at the time that Jeconiah was carried to Babylon (Esth. ii. 5).

4. A Merarite, of the house of Mahli, of the tribe of Levi. His sons married the daughters of his brother Eleazar (1 Chr. xxiii. 21, 22, xxiv. 28, 29), apparently about the time of King Saul, or early in the reign of David, since Jeduthun the singer was the son of Kish (1 Chr. vi. 44, A. V., compared with 2 Chr. xxix. 12). In the last cited place, "Kish the son of Abdi," in the reign of Hezekiah, must denote the Levitical house or division, under its chief, rather than an individual. [JESHUA.] The genealogy in 1 Chr. vi. shows that, though Kish is called "the son of Mahli" (1 Chr. xxiii. 21), yet eight generations intervened between him and Mahli. In the corrupt text of 1 Chr. xv. the name is written *Kushaiah* at ver. 17, and for *Jeduthun* is written *Ethan*. [JEDUTHUN.] At 1 Chr. vi. 29 (44, A. V.) it is written *Kishi*. It is not improbable that the name Kish may have passed into the tribe of Levi from that of Benjamin, owing to the residence of the latter in the immediate neighbourhood of Jerusalem, which might lead to intermarriages (1 Chr. viii. 28, 32). [A. C. H.]

KISH'I (קִישִׁי: Κισά; Alex. Κεισάν: *Cusi*), a Merarite, and father or ancestor of Ethan the minstrel (1 Chr. vi. 44). The form in which his name appears in the Vulg. is supported by 22 of Kennicott's MSS. In 1 Chr. xv. 17 he is called KUSHAIAH, and KISH in 1 Chr. xxiii. 21, xxiv. 29.

KISH'ION (קִשְׁיוֹן: Κισιών; Alex. Κεσιών: *Cesion*), one of the towns on the boundary of the tribe of Issachar (Josh. xix. 20), which with its suburbs was allotted to the Gershonite Levites (xxi. 28; though in this place the name—identical in the original—is incorrectly given in the A. V. KISHON). If the judgment of Gesenius may be accepted, there is no connexion between the name Kishion and that of the river Kishon, since as Hebrew words they are derivable from distinct roots.[a] But it would seem very questionable how far so archaic a name as that of the Kishon, mentioned, as it is, in one of the earliest records we possess (Judg. v.) can be treated as Hebrew. No trace of the situation of Kishion however exists, nor can it be inferred so as to enable us to ascertain whether any connexion was likely to have existed between the town and the river.

KISH'ON (קִשְׁיוֹן: ἡ Κισών; Alex. ἡ Κισιών *Cesion*), an inaccurate mode of representing (Josh. xxi. 28) the name which on its other occurrence is correctly given as KISHION. In the list of Levitical cities in 1 Chr. vi. its place is occupied by KEDESH (ver. 72).

KISH'ON, THE RIVER (נַחַל קִישׁוֹן: ὁ χειμάρρους Κισῶν, Κισσῶν,[b] and Κεισῶν; Alex. usually Κεισών: *torrens Cison*), a torrent or winter stream of central Palestine, the scene of two of the grandest achievements of Israelite history—the defeat of Sisera, and the destruction of the prophets of Baal by Elijah.

Unless it be alluded to in Josh. xix. 11, as "the torrent facing Jokneam"—and if *Kaimôn* be Jokneam, the description is very accurate—the Kishon is not mentioned in describing the possessions of the tribes. Indeed its name occurs only in connexion with the two great events just referred to (Judg. iv. 7, 13, v. 21;[c] Ps. lxxxiii. 9—here inaccurately "Kison;" and 1 K. xviii. 40).

The *Nahr Mukûtta*, the modern representative

[a] Kishon is from קוּשׁ, to be bent, or tortuous; Kishion from קָשָׁה, to be hard (*Thes.* 1211, 1243).

[b] By some this was—with the usual craving to make the name of a place mean something—developed into χ. τῶν Κισσῶν "the torrent of the ivy bushes" (Suidas, *s. v.* Ἰαβίν), just as the name of Kidron (Κέδρων) was made τῶν Κέδρων, "of the cedars." [CEDRON; KIDRON.]

[c] The term coupled with the Kishon in Judg. v. 21, הַקְּדוּמִים, in A. V. "that *ancient* river," has been

of the Kishon, is the drain by which the waters of the plain of Esdraelon, and of the mountains which enclose that plain, namely, Carmel and the Samaria range on the south, the mountains of Galilee on the north, and Gilboa, "Little Hermon" (so called), and Tabor on the east, find their way to the Mediterranean. Its course is in a direction nearly due N.W. along the lower part of the plain nearest the foot of the Samarian hills, and close beneath the very cliffs of Carmel (Thomson, *L. & B.* 2nd ed. 436), breaking through the hills which separate the plain of Esdraelon from the maritime plain of Acre, by a very narrow pass, beneath the eminence of *Harothieh* or *Harti*, which is believed still to retain a trace of the name of Harosheth of the Gentiles (Thomson, 437). It has two principal feeders: the first from *Deburieh* (Daberath), on Mount Tabor, the N.E. angle of the plain; and secondly, from *Jelbûn* (Gilboa) and *Jenin* (Enganniim) on the S.E. The very large perennial spring of the last-named place may be said to be the origin of the remote part of the Kishon (Thomson, 435). It is also fed by the copious spring of *Lejjun*, the stream from which is probably the "waters of Megiddo" (Van de Velde, 353; Porter, *Handbook*, 385). During the winter and spring, and after sudden storms of rain the upper part of the Kishon flows with a very strong torrent; so strong, that in the battle of Mount Tabor, April 16, 1799, some of the circumstances of the defeat of Sisera were reproduced, many of the fugitive Turks being drowned in the wady from *Deburieh*, which then inundated a part of the plain (Burckhardt, 339). At the same seasons the grounds about *Lejjun* (Megiddo) where the principal encounter with Sisera would seem to have taken place, becomes a morass, impassable for even single travellers, and truly destructive[d] for a huge horde like his army (Prokesch, in Rob. ii. 364; Thomson, 436).

But like most of the so-called "rivers" of Palestine, the perennial stream forms but a small part of the Kishon. During the greater part of the year its upper portion is dry, and the stream confined to a few miles next the sea. The sources of this perennial portion proceed from the roots of Carmel—the "vast fountains called *Sa'adîyeh*, about three miles east of Chaifa" (Thomson, 435) and those, apparently still more copious, described by Shaw (Rob. ii. 365),[e] as bursting forth from beneath the eastern brow of Carmel, and discharging of themselves "a river half as big as the Isis." It enters the sea at the lower part of the bay of *Akka*, about two miles east of *Chaifa* "in a deep tortuous bed between banks of loamy soil some 15 feet high, and 15 to 20 yards apart" (Porter, *Handbook*, 383, 4). Between the mouth and the town the shore is lined by an extensive grove of date-palms, one of the finest in Palestine (Van de Velde, 289).

The part of the Kishon at which the prophets of Baal were slaughtered by Elijah was doubtless close below the spot on Carmel where the sacrifice had taken place. This spot is now fixed with all but certainty, as at the extreme east end of the mountain, to which the name is still attached of *El-Mahraka*, "the burning." [CARMEL.] Nowhere does the Kishon run so close to the mountain as just beneath this spot (Van de Velde, i. 324). It is about 1000 feet above the river, and a precipitous ravine leads directly down, by which the victims were perhaps hurried from the sacred precincts of the altar of Jehovah to their doom in the torrent bed below, at the foot of the mound, which from this circumstance may be called *Tell Kîsîs*, the hill of the priests. Whether the Kishon contained any water at this time we are not told; that required for Elijah's sacrifice was in all probability obtained from the spring on the mountain side below the plateau of *El-Mahrakah*. [CARMEL, vol. i. 279b.]

Of the identity of the Kishon with the present *Nahr Mukûtta* there can be no question. The existence of the sites of Taanach and Megiddo along its course, and the complete agreement of the circumstances just named with the requirements of the story of Elijah, are sufficient to satisfy us that the two are one and the same. But it is very remarkable what an absence there is of any continuous or traditional evidence on the point. By Josephus the Kishon is never named, neither does the name occur in the early Itineraries of Antoninus Augustus, or the Bourdeaux Pilgrim. Eusebius and Jerome dismiss it in a few words, and note only its origin in Tabor (*Onom.* "Cison"), or such part of it as can be seen thence (*Ep. ad Eustochium*, §13), passing by entirely its connexion with Carmel. Benjamin of Tudela visited Akka and Carmel. He mentions the river by name as "Nachal Kishon;"[f] but only in the

very variously rendered by the old interpreters. 1. It is taken as a proper name, and thus apparently that of a distinct stream—in some MSS. of the LXX., Καδημείν (see Burbdt's *Hexapla*); by Jerome, in the Vulgate, *torrens Cadumim*; in the Peshito and Arabic versions, *Carmin*. This view is also taken by Benjamin of Tudela, who speaks of the river close to Acre (doubtless meaning thereby the Belus) as the נחל קדומים. 2. As an epithet of the Kishon itself: LXX., χειμάῤῥους ἀρχαίου; Aquila, σπουδαῖον, perhaps intending to imply a scorching wind or simoom as accompanying the rising of the waters; Symmachus, σίγινον or σίγιον, perhaps alluding to the swift springing of the torrent (σίγυες is used for high waves by Artemidorus). The Targum, adhering to the signification "ancient," expands the sentence—"the torrent in which were shewn signs and wonders to Israel of old;" and this miraculous torrent a later Jewish tradition (preserved in the *Commentarius in Canticum Deborae*, ascribed to Jerome) would identify with the Red Sea, the scene of the greatest marvels in Israel's history. The rendering of the A. V. is supported by Mendelssohn, Gesenius, Ewald, and other eminent modern scholars. But is it not possible that the term may refer to an ancient tribe of Kedumim — wanderers from the Eastern deserts — who had in remote antiquity settled on the Kishon or one of its tributary wadys?

[d] "The Kishon, considered, on account of its quicksands, the most dangerous river in the land" (Van de Velde, i. 289).

[e] The report of Shaw that this spring is called by the people of the place *Rás el-Kishon*, though dismissed with contempt by Robinson in his note, on the ground that the name K. is not known to the Arabs, has been confirmed to the writer by the Rev. W. Lea, who recently visited the spot.

[f] The English reader should be on his guard not to rely on the translation of Benjamin contained in the edition of Asher (Berlin, 1840). In the part of the work above referred to two serious errors occur. (1) נַחַל קְדוּמִים is rendered "Nahr el Kelb;" most erroneously, for the *N. el Kelb* (Lycus) is more than 80 miles farther north. 2) נַחַל קִישׁוֹן is rendered "the river Mukattua." Other renderings no less inexact occur elsewhere, which need not be noted here.

most cursory manner. Brocardus (cir. 1500) describes the western portion of the stream with a little more fullness, but enlarges most on its upper or eastern part, which, with the victory of Barak, he places on the east of Tabor and Hermon, as discharging the water of those mountains into the Sea of Galilee (*Descr. Terrae S.* cap. 6, 7). This has been shown by Dr. Robinson (*B. R.* ii. 364) to allude to the *Wady el Bireh*, which runs down to the Jordan a few miles above Scythopolis. For the descriptions of modern travellers, see Maundrell (*Early Trav.* 430); Robinson (ii. 362, &c., iii. 116, 17); Van de Velde (324, &c.); Stanley (336, 339, 355), and Thomson (*Land and Book*, chap. xxix.). [G.]

KIS'ON (קִישׁוֹן: Κεισών; Alex. Κισεών; *Cison*), an inaccurate mode of representing the name elsewhere correctly given in the A. V. KISHON (Ps. lxxxiii. 9 only). An additional inconsistency is the expression "the brook *of* Kison"—the word "of" being redundant both here and in Judg. iv. 13, and v. 21. (G.]

KISS.[a] Kissing the lips by way of affectionate salutation was not only permitted, but customary, amongst near relatives of both sexes, both in Patriarchal and in later times (Gen. xxix. 11; Cant. viii. 1). Between individuals of the same sex, and in a limited degree between those of different sexes, the kiss on the cheek as a mark of respect or an act of salutation has at all times been customary in the East, and can hardly be said to be extinct even in Europe. Mention is made of it (1) between parents and children (Gen. xxvii. 26, 27, xxxi. 28, 55, xlviii. 10, l. 1; Ex. xviii. 7; Ruth i. 9, 14; 2 Sam. xiv. 33; 1 K. xix. 20; Luke xv. 20; Tob. vii. 6, x. 12): (2) between brothers or near male relatives or intimate friends (Gen. xxix. 13, xxxiii. 4, xlv. 15; Ex. iv. 27; 1 Sam. xx. 41): (3) the same mode of salutation between persons not related, but of equal rank, whether friendly or deceitful, is mentioned (2 Sam. xx. 9; Ps. lxxv. 10; Prov. xxvii. 6; Luke vii. 45 (1st clause), xxii. 48; Acts xx. 37): (4) as a mark of real or affected condescension (2 Sam. xv. 5, xix. 39): (5) respect from an inferior (Luke vii. 38, 45, and perhaps viii. 44).

In the Christian Church the kiss of charity was practised not only as a friendly salutation, but as an act symbolical of love and Christian brotherhood (Rom. xvi. 16; 1 Cor. xvi. 20; 2 Cor. xiii. 12; 1 Thess. v. 26; 1 Pet. v. 14). It was embodied in the early Christian offices, and has been continued in some of those now in use (*Apost. Constit.* ii. 57, viii. 11; Just. Mart. *Apol.* i. 65; Palmer, *On Lit.* ii. 102, and note from Du Cange; Bingham, *Christ. Antiq.* b. xii. c. iv. §5, vol. iv. 49, b. ii. c. xi. §10, vol. i. 161, b. ii. c. xix. §17, vol. i. 272, b. iv. c. vi. §14, vol. i. 526, b. xxii. c. iii. §6, vol. vii. 316; see also *Cod. Just. V. Tit.* iii. 16, *de Don. ante Nupt.*; Brande, *Pop. Antiq.* ii. 87).

Between persons of unequal rank, the kiss, as a mark either of condescension on the one hand, or of respect on the other, can hardly be said to survive in Europe except in the case of royal personages. In the East it has been continued with little diminution to the present day. The ancient Persian custom amongst relatives is mentioned by Xenophon (*Cyrop.* i. 4, §27), and among inferiors towards superiors, whose feet and hands they kissed (*ib.* vii. 5, §32; Dion Cass. lix. 27). Among the Arabs the women and children kiss the beards of their husbands or fathers. The superior returns the salute by a kiss on the forehead. In Egypt an inferior kisses the hand of a superior, generally on the back, but sometimes, as a special favour, on the palm also. To testify abject submission, and in asking favours, the feet are often kissed instead of the hand. "The son kisses the hand of his father, the wife that of her husband, the slave, and often the free servant, that of the master. The slaves and servants of a grandee kiss their lord's sleeve or the skirt of his clothing" (Lane, *Mod. Eg.* ii. 9; Arvieux, *Trav.* p. 151; Burckhardt, *Trav.* i. 369; Niebuhr, *Voy.* i. 329, ii. 93; Layard, *Nin.* i. 174; Wellsted, *Arabia*, i. 241; Malcolm, *Sketches of Persia*, p. 271; see above (5)).

The written decrees of a sovereign are kissed in token of respect; even the ground is sometimes kissed by Orientals in the fulness of their submission (Gen. xli. 40; 1 Sam. xxiv. 8; Ps. lxxii. 9; Is. xlix. 23; Mic. vii. 17; Matt. xxviii. 9; Wilkinson, *Anc. Eg.* ii. 203; Layard, *Nin.* i. 274, Harmer, *Obs.* i. 336).

Friends saluting each other join the right hand, then each kisses his own hand, and puts it to his lips and forehead, or breast; after a long absence they embrace each other, kissing first on the right side of the face or neck, and then on the left, or on both sides of the beard (Lane, ii. 9, 10; Irby and Mangles, p. 116; Chardin, *Voy.* iii. 421; Arvieux, *l. c.*; Burckhardt, *Notes*, i. 369; Russell, *Aleppo*, i. 240).

Kissing is spoken of in Scripture as a mark of respect or adoration to idols (1 K. xix. 18; Hos. xiii. 2; comp. Cic. *Verr.* iv. 43; Tacitus, speaking of an Eastern custom, *Hist.* iii. 24, and the Mohammedan custom of kissing the Kaaba at Mecca; Burckhardt, *Travels*, i. 250, 298, 323; Crichton, *Arabia*, ii. 215). [H. W. P.]

KITE (אַיָּה, *ayyâh*: ἱκτῖνος, γύψ: *vultur, milvus*?). The Hebrew word thus rendered occurs in three passages, Lev. xi. 14, Deut. xiv. 13, and Job xxviii. 7: in the two former it is translated "kite" in the A. V., in the latter "vulture." It is enumerated among the twenty names of birds mentioned in Deut. xiv.[b] (belonging for the most part to the order *Raptores*), which were considered unclean by the Mosaic Law, and forbidden to be used as food by the Israelites. The allusion in Job alone affords a clue to its identification. The deep mines in the recesses of the mountains from which the labour of man extracts the treasures of the earth are there described as "a track which the bird of prey hath not known, nor hath the eye of the *ayyah* looked upon it." Among all birds of prey, which are proverbially clearsighted, the *ayyah* is thus distinguished as possessed of peculiar keenness of vision, and by this attribute alone is it marked. Translators have been singularly at variance with regard to this bird. In the LXX. of Lev. and Deut. *ayyah* is rendered

[a] 1. *Verb.* נָשַׁק: LXX. and N. T. φιλέω, καταφιλέω: *osculor, deosculor*. 2. *Subs.* נְשִׁיקָה, the notion being of extension, or possibly from the sound, Gesen. p. 924: LXX. and N. T. φίλημα: *osculum*.

[b] In the parallel passage of Lev. xi. the *glede* (רְאָה) is omitted; but the Hebrew word has in all probability crept into the text by an error of some transcriber. (See Gesen. *s. v.*, and GLEDA.)

"kite,"[a] while in Job it is "vulture," which the A. V. has followed. The Vulg. give "vulture" in all three passages, unless, as Drusius suggests (on Lev. xi. 14), the order of the words in Lev. and Deut. is changed; but even in this case there remains the rendering "vulture" in Job, and the reason advanced by Drusius for the transposition is not conclusive. The Targ. Onkelos vaguely renders it "bird of prey;" Targ. Pseudo-Jonathan, "black vulture;" Targ. Jerus. by a word which Buxtorf translates "a pie," in which he is supported by the authority of Kimchi, but which Bochart considers to be identical in meaning with the preceding, and which is employed in Targ. Onkelos as the equivalent of the word rendered "heron" in A. V. of Lev. xi. 19. It is impossible to say what the rendering of the Peshito Syriac in Lev. and Deut. may be, in consequence of an evident confusion in the text; in Job *ayyah* is translated by *dastho*,[b] "a kite," or "vulture" as some have it, which is the representative of "vulture" in the A. V. of Is. xxxiv. 15. The Arabic versions of Saadias and Abulwalid give "the night-owl;" and Aben Ezra, deriving it from a root[c] signifying "an island," explains it as "the island bird," without however identifying it with any individual of the feathered tribes. Robertson (*Clavis Pentateuchi*) derives *ayyah* from the Heb. אָוָה, an obsolete root, which he connects with an Arabic word,[d] the primary meaning of which, according to Schultens, is "to turn." If this derivation be the true one, it is not improbable that "kite" is the correct rendering. The habit which birds of this genus have of "sailing in circles, with the rudder-like tail by its inclination governing the curve," as Yarrell says, accords with the Arabic derivation.[e]

Bochart, regarding the etymology of the word, connected it with the Arabic *al yuyu*, a kind of hawk so called from its cry *yáyá*, described by Damir as a small bird with a short tail, used in hunting, and remarkable for its great courage, the swiftness of its flight, and the keenness of its vision, which is made the subject of praise in an Arabic stanza quoted by Damir. From these considerations Bochart identifies it with the merlin, or *Falco aesalon* of Linnaeus, which is the same as the Greek αἰσαλών and Latin *aesalo*. It must be confessed, however, that the grounds for identifying the *ayyah* with any individual species are too slight to enable us to regard with confidence any conclusions which may be based upon them; and from the expression which follows in Lev. and Deut., "after its kind," it is evident that the term is generic. The Talmud goes so far as to assert that the four Hebrew words rendered in A. V. "vulture," "glede," and "kite," denote one and the same bird (Lewysohn, *Zoologie des Talmuds*, §196). Seetzen (i. 310) mentions a species of falcon used in Syria for hunting gazelles and hares, and a smaller kind for hunting hares in the desert. Russell (*Aleppo*, ii. 196) enumerates seven different kinds employed by the natives for the same purpose.

Two persons are mentioned in the O. T. whose names are derived from this bird. [AJAH.] Fürst (*Handw. s. v.*) compares the parallel instances of *Shebin*, a kind of falcon, used as a proper name by the Persians and Turks, and the Latin *Milvius*. To these we may add *Faber* and *Falconia* among the Romans, and the names of *Hawke*, *Falcon*, *Falconer*, *Kite*, &c. &c., in our own language (see Lower's *Historical Essays on English Surnames*).

[W. A. W.]

Kite.

KITH'LISH (כִּתְלִישׁ, *i. e.* Cithlish: Μααχές; Alex. καθλές: *Cethlis*), one of the towns of Judah, in the Shefelah or lowland (Josh. xv. 40), named in the same group with Eglon, Gederoth, and Makkedah. It is not named by Eusebius or Jerome, nor does it appear to have been either sought or found by any later traveller. [G.]

KIT'RON (קִטְרוֹן: Κέδρων: Alex., with unusual departure from the Heb. text, Χεβρών: *Cetron*), a town which, though not mentioned in the specification of the possessions of Zebulun in Josh. xix., is catalogued in Judg. i. 30 as one of the towns from which Zebulun did not expel the Canaanites. It is here named next to Nahalol, a position occupied in Josh. xix. 15, by Kattath. Kitron may be a corruption of this, or it may be an independent place omitted for some reason from the other list. In the Talmud (*Megillah*, as quoted by Schwarz, 173) it is identified with "Zippori," *i. e.* Sepphoris, now *Seffurieh*. [G.]

KIT'TIM (כִּתִּים: Κήτιοι, Gen. x. 4; Κίτιοι, 1 Chr. i. 7: *Cethim*). Twice written in the A. V. for CHITTIM.

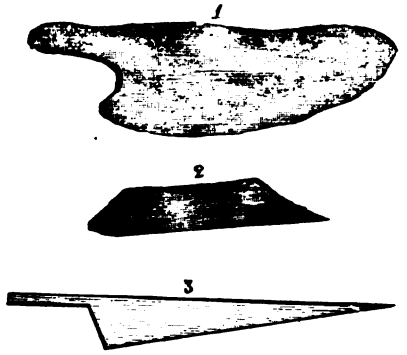
KNEADING-TROUGHS. [BREAD.]

KNIFE.[f] 1. The knives of the Egyptians, and of other nations in early times, were probably only of hard stone, and the use of the flint or stone

[a] In ornithological language "kite" = "glede" (*Milvus vulgaris*); but "glede" is applied by the common people in Ireland to the common buzzard (*Buteo vulgaris*), the "kite" not being indigenous to that country. So, too, the translators of the A. V. considered the terms "kite" and "glede" as distinct, for they render רָאָה "glede," and אַיָּה "kite," "and the glede and the kite" (Deut. xiv. 13).

[b] דַּסְתָּא. [c] אוּי.

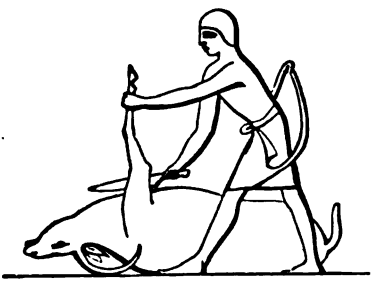
[d] אوى



[e] Gesenius traces the word to the unused root אָוָה = Arab. عوى, "to howl like a dog or wolf."

[f] 1. חֶרֶב, Gesen. p. 516: μάχαιρα: *gladius, culter.* 2. מַאֲכֶלֶת, from אָכַל, "eat," Gesen. pp. 69, 92: δίκοπις: *gladius.*

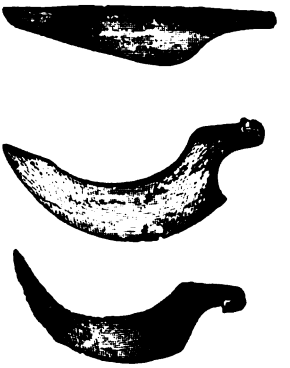
knife was sometimes retained for sacred purposes after the introduction of iron and steel (Plin. *H. N.* xxxv. 12, §165). Herodotus (ii. 86) mentions knives both of iron and of stone[a] in different stages of the same process of embalming. The same may perhaps be said to some extent of the Hebrews.[b]



2. In their meals the Jews, like other Orientals, made little use of knives, but they were required both for slaughtering animals either for food or sacrifice, as well as cutting up the carcase (Lev. vii. 33, 34, viii. 15, 20, 25, ix. 13; Num. xviii. 18; 1 Sam. ix. 24; Ez. xxiv. 4; Ezr. i. 9; Matt. xxvi. 25, Russell, *Aleppo*, i. 172; Wilkinson, i. 169; Mischn. *Tamid.* iv. 3).

3. Smaller knives were in use for paring fruit (Joseph. *Ant.* xvii. 7; *B. J.* i. 33, §7) and for sharpening pens[c] (Jer. xxxvi. 23).

1, 2. Egyptian Flint Knives in Museum at Berlin.
3. Egyptian Knife represented in Hieroglyphics.



4. The razor[d] was often used for Nazaritic purposes, for which a special chamber was reserved in the Temple (Num. vi. 5, 9, 19; Ez. v. 1; Is. vii. 20; Jer. xxxvi. 23; Acts xviii. 18, xxi. 24; Mischn. *Middl.* ii. 5).

Egyptian Knife. (British Museum.)

5 The pruning-hooks of Is. xviii. 5[e] were probably curved knives.

6. The lancets[f] of the priests of Baal were doubtless pointed knives (1 K. xviii. 28).

Assyrian Knives. (From Originals in British Museum.)

Asiatics usually carry about with them a knife or dagger, often with a highly ornamented handle, which may be used when required for eating purposes (Judg. iii. 21; Layard, *Nin.* ii. 342, 299; Wilkinson, i. 358, 360; Chardin, *Voy.* iv. 18; Niebuhr, *Voy.* i. 340, pl. 71). [H. W. P.]

KNOP, that is KNOB (A. S. *cnæp*). A word employed in the A. V. to translate two terms, of the real meaning of which all that we can say with certainty is that they refer to some architectural or ornamental object, and that they have nothing in common.

1. *Caphtor* (כַּפְתּוֹר). This occurs in the description of the candlestick of the sacred tent in Ex. xxv. 31-36, and xxxvii. 17-22, the two passages being identical. The knops are here distinguished from the shaft, branches, bowls, and flowers of the candlestick; but the knop and the flower go together, and seem intended to imitate the produce of an almond-tree. In another part of the work they appear to form a boss, from which the branches are to spring out from the main stem. In Am. ix. 1 the same word is rendered, with doubtful accuracy, "lintel." The same rendering is used in Zeph. ii. 14, where the reference is to some part of the palaces of Nineveh, to be exposed when the wooden upper story—the "cedar work"—was destroyed. The Hebrew word seems to contain the sense of "covering" and "crowning" (Gesenius, *Thes.* 709). Josephus's description (*Ant.* iii. 6, §7) names both bulls (*σφυρίδια*) and pomegranates (*ῥοΐσκοι*), either of which may be the *caphtor*. The Targum[g] agrees with the latter, the LXX. (*σφαιρωτῆρες*) with the former. [LINTEL.]

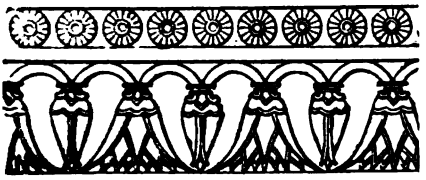
2. The second term, *Peka'im* (פְּקָעִים), is found only in 1 K. vi. 18 and vii 24. It refers in the former to carvings executed in the cedar wainscot of the interior of the Temple, and, as in the preceding word, is associated with flowers. In the latter case it denotes an ornament cast round the

[a] *λίθος Αἰθιοπικος.*

[b] צֵר (Ex. iv. 25) is in LXX. *φῆφος*, in which Syr. and other versions agree; as also חַרְבוֹת צֻרִים, Ges. p. 1160; *μαχαιρας πετρινας ἐκ πέτρας ἀκροτόμους*, Josh. v. 2. See Wilkinson, *Anc. Eg.* ii. 164; Prescott, *Mexico*, i. 63.

[c] תַּעַר הַסֹּפֵר, "the knife of a scribe."

[d] תַּעַר הַגִּלָּבִים, Gesen. p. 1369.



[e] מַזְמֵרוֹת, Gesen. p. 421: *δρέπανα*: *falces*.

[f] רְמָחִים: *σειρομάσται*: *lanceoli*.

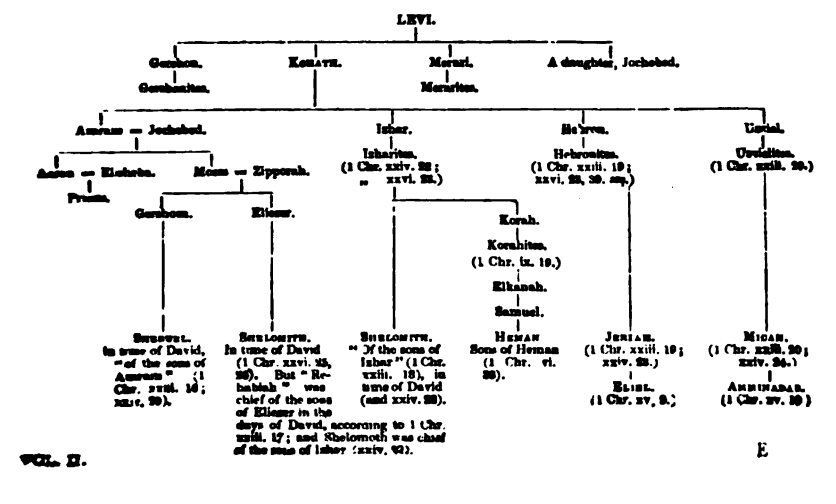
[g] חַזּוּר, an apple, or other fruit of a round form both in Onkelos and Pseudojon.

great reservoir or "sea" of Solomon's Temple below the brim: there was a double row of them, ten to a cubit, or about 2 inches from centre to centre.

The word no doubt signifies some globular thing resembling a small gourd,[a] or an egg,[b] though as to the character of the ornament we are quite in the dark. The following woodcut of a portion of a richly ornamented door-step or slab from Kouyunjik, probably represents something approximating to the "knop and the flower" of Solomon's Temple. But as the building from which this is taken was the work of a king at least as late as the son of Esarhaddon, contemporary with the latter part of the reign of Manasseh, it is only natural to suppose that the character of the ornament would have undergone considerable modification from what it was in the time of Solomon. We must await some future happy discovery in Assyrian or Egyptian art, to throw clearer light on the meaning of these and a hundred other terms of detail in the descriptions of the buildings and life of the Israelites. [G.]

Border of a Slab from Kouyunjik. (Fergusson's Architecture.)

KO'A (קוֹעַ: Χουέ[c]) is a word which occurs only in Ex. xxiii. 23:—"The Babylonians and all the Chaldeans, Pekod, and Shoa, and Koa, and all the Assyrians with them." It is uncertain if the word is a proper name or no. It may perhaps designate a place otherwise unknown, which we must suppose to have been a city or district of Babylonia. Or it may be a common noun, signifying "prince" or "nobleman," as the Vulgate takes it, and some of the Jewish interpreters. [G. R.]



[a] Compare the similar word פְּקֻעָה, *Pakkuôth*, "gourds," in 2 K. iv. 39.

[b] This is the rendering of the Targum.

[c] The conjunction being taken as part of the name.

KO'HATH[d] (קְהָת; and, Num. xvi. 1, &c., קֹהָת: Κάθ and Καάθ: *Cahath*: "assembly"), second of the three sons of Levi (Gershon, Kohath, Merari), from whom the three principal divisions of the Levites derived their origin and their name (Gen. xlvi. 11; Exod. vi. 16, 18; Num. iii. 17; 2 Chr. xxxiv. 12, &c.). Kohath was the father of Amram, and he of Moses and Aaron. From him, therefore, were descended all the priests; and hence those of the Kohathites who were not priests were of the highest rank of the Levites, though not the sons of Levi's first-born. Korah, the son of Izhar, was a Kohathite, and hence, perhaps, his impatience of the superiority of his relatives, Moses and Aaron. In the journeyings of the Tabernacle the sons of Kohath had charge of the most holy portion of the vessels, to carry them by staves, as the vail, the ark, the tables of show-bread, the golden-altar, &c. (Num. iv.); but they were not to touch them or look upon them "lest they die." These were all previously covered by the priests, the sons of Aaron. In the reign of Hezekiah the Kohathites are mentioned first (2 Chr. xxix. 12), as they are also 1 Chr. xv. 5-7, 11, when Uriel their chief assisted, with 120 of his brethren, in bringing up the ark to Jerusalem in the time of David. It is also remarkable that in this last list of those whom David calls "chief of the fathers of the Levites," and couples with "Zadok and Abiathar the priests," of six who are mentioned by name four are descendants of Kohath; viz., besides Uriel, Shemaiah the son of Elzaphan, with 200 of his brethren; Eliel, the son of Hebron, with 80 of his brethren; and Amminadab, the son of Uzziel, with 112 of his brethren. For it appears from Ex. vi. 18-22, compared with 1 Chr. xxiii. 12, xxvi. 23-32, that there were four families of sons of Kohath — Amramites, Izharites, Hebronites, and Uzzielites; and of the above names Elzaphan and Amminadab were both Uzzielites (Ex. vi. 22), and Eliel a Hebronite. The verses already cited from 1 Chr. xxvi.; Num. iii. 19, 27; 1 Chr. xxiii. 12,

[d] It is not apparent why the form Kohath, which occurs but occasionally, should have been chosen in the A. V. in preference to the more usual one of Kehath, sanctioned both by LXX. and Vulg.

...show the wealth and importance of the Kohathites, and the numerous tribes filled by them as keepers of the sacred treasures, as judges, officers, and scribes, and warrior and sacred. In 1 Chr. xv. 5 they appear as singers with the Levites.

The number of the sons of Kohath between the ages of 1 mo. and 30 at the first census in the wilderness was 8,300, and the whole number of males from a month old was 8,600. Num. iii. 28, iv. 36. At the census at the close of the second numbering (Num. xxvi. 57, 58) the whole number of Levites had increased by 1,000, viz. from 22,000 to 23,000 (Num. iii. 39, xxvi. 62). The place of the sons of Kohath in marching and encampment was south of the tabernacle (Num. iii. 29), which was also the station of the Levites. Samuel was a Kohathite, and so of course were his descendants, Heman the singer and the third division of the singers which was under him. [HEMAN; ASAPH; JEDUTHUN.] The inheritance of those sons of Kohath who were not priests lay in the half tribe of Manasseh, in Ephraim (1 Chr. vi. 61-70), and in Dan (Josh. xxi. 5, 20-26). Of the personal history of Kohath we know nothing, except that he came down to Egypt with Levi and Jacob (Gen. xlvi. 11), that his sister was Jochebed (Ex. vi. 20), and that he lived to the age of 133 years (Ex. vi. 18). He lived about 80 or 90 years in Egypt during Joseph's lifetime, and about 30 more after his death. He may have been some 20 years younger than Joseph his uncle. The table on the preceding page shows the principal descents from Kohath; a fuller table may be seen in Burrington's *Genealogies*, Tab. X. No. 1. [LEVITES.] [A. C. H.]

KOLAI'AH (קוֹלָיָה: Κωλαΐα; Cod. Fr. Aug. Κωλαΐα: *Colaïa*). 1. A Benjamite whose descendants settled in Jerusalem after the return from the captivity (Neh. xi. 7).

2. The father of Ahab the false prophet, who was burnt by the king of Babylon (Jer. xxix. 21).

KORAH (קֹרַח, "baldness"[a]: Κορέ: *Core*). 1. Third son of Esau by Aholibamah (Gen. xxxvi. 5, 14, 18; 1 Chr. i. 35). He was born in Canaan before Esau migrated to Mount Seir (Gen. xxxvi. 5-9), and was one of the "dukes" of Edom.

2. Another Edomitish duke of this name, sprung from Eliphaz, Esau's son by Adah (Gen. xxxvi. 16); but this is not confirmed by ver. 11, nor by the list in 1 Chr. i. 36, nor is it probable in itself.

3. One of the "sons of Hebron" in 1 Chr. ii. 43; but whether, in this obscure passage, Hebron is the name of a man or of a city, and whether, in the latter case, Korah is the same as the son of Izhar (No. 4), whose children may have been located at Hebron among those Kohathites who were priests, is difficult to determine.

4. Son of Izhar, the son of Kohath, the son of Levi. He was leader of the famous rebellion against his cousins Moses and Aaron in the wilderness, for which he paid the penalty of perishing with his followers by an earthquake and flames of fire (Num. xvi. xxvi. 9-11). The details of this rebellion are too well known to need repetition here, but it may be well to remark, that the particular grievance which rankled in the mind of Korah and his company was their exclusion from the office of the priesthood, and their being confined—those among them who were Levites—to the inferior service of the tabernacle, as appears clearly, both from the words of Moses in ver. 9, and from the test resorted to with regard to the censers and the offering of incense. The same thing also appears from the subsequent confirmation of the priesthood to Aaron (ch. xvii.). The appointment of Elizaphan to be chief of the Kohathites (Num. iii. 30) may have further inflamed his jealousy. Korah's position as leader in this rebellion was evidently the result of his personal character, which was that of a bold, haughty, and ambitious man. This appears from his address to Moses in ver. 3, and especially from his conduct in ver. 19, where both his daring and his influence over the congregation are very apparent. Were it not for this, one would have expected the Gershonites—as the elder branch of the Levites—to have supplied a leader in conjunction with the sons of Reuben, rather than the family of Izhar, who was Amram's younger brother. From some cause which does not clearly appear, the children of Korah were not involved in the destruction of their father, as we are expressly told in Num. xxvi. 11, and as appears from the continuance of the family of the Korahites to the reign, at least of Jehoshaphat (2 Chr. xx. 19), and probably till the return from the captivity (1 Chr. ix. 19, 31). [KORAHITES.] Perhaps the fissure of the ground which swallowed up the tents of Dathan and Abiram did not extend beyond those of the Reubenites. From ver. 27 it seems clear that Korah himself was not with Dathan and Abiram at the moment. His tent may have been one pitched for himself, in contempt of the orders of Moses, by the side of his fellow-rebels, while his family continued to reside in their proper camp nearer the tabernacle; or it must have been separated by a considerable space from those of Dathan and Abiram. Or, even if Korah's family resided amongst the Reubenites, they may have fled, at Moses's warning, to take refuge in the Kohathite camp, instead of remaining, as the wives and children of Dathan and Abiram did (ver. 27). Korah himself was doubtless with the 250 men who bare censers nearer the tabernacle (ver. 19), and perished with them by the "fire from Jehovah" which accompanied the earthquake. It is nowhere said that he was one of those who "went down quick into the pit" (comp. Ps. cvi. 17, 18), and it is natural that he should have been with the censer-bearers. That he was so is indeed clearly implied by Num. xvi. 16-19, 35, 40, compared with xxvi. 9, 10. In the N. T. (Jude ver. 11) Korah is coupled with Cain and Balaam, and seems to be held out as a warning to those who "despise dominion and speak evil of dignities," of whom it is said that they "perished in the gainsaying of Core."[b]

[a] The meaning of Korah's name (baldness) has supplied a ready handle to some members of the Church of Rome to banter Calvin (Calvinus, Calvus), as being homonymous with his predecessor in schism; and it has been retorted that Korah's baldness has a more suitable antitype in the tonsure of the Romish priests (Simonis, *Onom.* s. v.).

[b] ἀντιλογία, "contradiction," alluding to his speech in Num. xvi. 3, and accompanying rebellion. Compare the use of the same word in Heb. xii. 3, Ps. cvi. 32, and of the verb, John xix. 12, and Is. xxii. 22, lxv. 2 (LXX.), in which latter passage, as quoted Rom. x. 21, the A. V. has the same expression of "gainsaying" as in Jude. The Son of Sirach, following Ps. cvi. 16, יְקַנְּאוּ לְמֹשֶׁה, &c. (otherwise rendered however by LXX., Ps. cvi. 16, παρώργισαν), describes Korah and his companions as envious or jealous of Moses, where the English "maligned" is hardly an equivalent for ἐζήλωσαν.

Nothing more is known of Korah's personal character or career previous to his rebellion. [A. C. H.]

KORAHITE (1 Chr. ix. 19, 31), **KORHITE**, or **KORATHITE** (in Hebrew always קָרְחִי, or in plur. קָרְחִים: never expressed at all by the LXX., but paraphrased *υἱοί*, *δῆμος*, or *γενέσεις Κορέ*: *Coritae*), that portion of the Kohathites who were descended from Korah, and are frequently styled by the synonymous phrase Sons of Korah. [KOHATH.] It would appear, at first sight, from Ex. vi. 24, that Korah had three sons—Assir, Elkanah, and Abiasaph—as Winer, Rosenmüller, &c., also understand it; but as we learn from 1 Chr. vi. 22, 23, 37, that Assir, Elkanah, and Abiasaph, were respectively the son, grandson, and great-grandson of Korah, it seems obvious that Ex. vi. 24, gives us the chief houses sprung from Korah, and not his actual sons, and therefore that Elkanah and Abiasaph were not the sons, but later descendants of Korah. If, however, Abiasaph was the grandson of Assir his name must have been added to this genealogy in Exodus later, as he could not have been born at that time. Elkanah might, being of the same generation as Phinehas (Ex. vi. 25).

The offices filled by the sons of Korah, as far as we are informed, are the following. They were an important branch of the *singers* in the Kohathite division, Heman himself being a Korahite (1 Chr. vi. 33), and the Korahites being among those who, in Jehoshaphat's reign, "stood up to praise the Lord God of Israel with a loud voice on high" (2 Chr. xx. 19). [HEMAN.] Hence we find eleven Psalms (or twelve, if Ps. 43 is included under the same title as Ps. 42) dedicated or assigned to the sons of Korah, viz. Ps. 42, 44-49, 84, 85, 87, 88. Winer describes them as some of the most beautiful in the collection, from their high lyric tone. Origen says it was a remark of the old interpreters that all the Psalms inscribed with the name of the sons of Korah are full of pleasant and cheerful subjects, and free from anything sad or harsh (*Homil. on 1 Kings, i. e.* 1 *Sam.*), and on Matt. xviii. 20, he ascribes the authorship of these Psalms to "the three sons of Korah," who, "because they agreed together had the Word of God in the midst of them" (*Homil.* xiv.).* Of moderns, Rosenmüller thinks that the sons of Korah, especially Heman, were the authors of these Psalms, which, he says, rise to greater sublimity and breathe more vehement feelings than the Psalms of David, and quotes Hensler and Eichhorn as agreeing. De Wette also considers the sons of Korah as the authors of them (*Einl.* 335-339), and so does Just. Olshausen on the Psalms (*Exeg. Handb. Einl.* p. 22). As, however, the language of several of these Psalms—as the 42nd, 84th, &c.—is manifestly meant to apply to David, it seems much simpler to explain the title "for the sons of Korah," to mean that they were given to them to sing in the temple-services. If their style of music, vocal and instrumental, was of a more sublime and lyric character than that of the sons of Merari or Gershon, and Heman had more fire in his execution than Asaph and Jeduthun, it is perfectly natural that David should have given his more poetic and elevated strains to Heman and his choir, and the simpler and quieter psalms to the other choirs. J. van Iperen (ap. Rosenm.) assigns these psalms to the times of Jehoshaphat; others to those of the Maccabees; Ewald attributes the 42nd Psalm to Jeremiah. The purpose of many of the German critics seems to be to reduce the antiquity of the Scriptures as low as possible.

Others, again, of the sons of Korah were "porters," *i. e.* doorkeepers, in the temple, an office of considerable dignity. In 1 Chr. ix. 17-19, we learn that Shallum, a Korahite of the line of Ebiasaph, was chief of the doorkeepers, and that he and his brethren were over the work of the service, keepers of the gates of the tabernacle (comp. 2 K. xxv. 18), apparently after the return from the Babylonish captivity. [KINGS.] See also 1 Chr. ix. 22-29; Jer. xxxv. 4; and Ezr. ii. 42. But in 1 Chr. xxvi. we find that this official station of the Korahites dated from the time of David, and that their chief was then Shelemiah or Meshelemiah, the son of (Abi)asaph, to whose custody the east gate fell by lot, being the principal entrance. Shelemiah is doubtless the same name as Shallum in 1 Chr. ix. 17, and, perhaps, Meshullam, 2 Chr. xxxiv. 12, Neh. xii. 25, where, as in so many other places, it designates, not the individuals, but the house or family. In 2 Chr. xxxi. 14, Kore, the son of Imnah the Levite, the doorkeeper towards the east, who was over the freewill offerings of God to distribute the oblations of the Lord and the most holy things, was probably a Korahite, as we find the name Kore in the family of Korah in 1 Chr. ix. 19. In 1 Chr. ix. 31, we find that Mattithiah, the first-born of Shallum the Korahite, had the set office over the things that were made in the pans (Burrington's *Genealogies*; Patrick, *Comment. on Num.*; Lyell's *Princ. of Geol.*, ch. 23, 24, 25, on Earthquakes; Rosenmüller and Olshausen, *On Psalms*; De Wette, *Einl.*). [A. C. H.]

KORATHITES, THE (הַקָּרְחִי), Num. xxvi. 58. [KORAHITE.]

KORHITES, THE (הַקָּרְחִי), Ex. vi. 24, xxvi. 1; 1 Chr. xii. 6; 2 Chr. xx. 19. [KORAHITE.]

KO'RE (קוֹרֵא: *Κορέ*; Alex. *Κορή* in 1 Chr. ix. 19; Alex. *Κορηέ*, 1 Chr. xxvi. 1: *Core*). 1. A Korahite, ancestor of Shallum and Meshelemiah, chief porters in the reign of David.

2. (*Κορή*: Alex. *Κορή*.) Son of Imnah, a Levite in the reign of Hezekiah, appointed over the free-will offerings and most holy things, and a gatekeeper on the eastern side of the Temple after the reform of worship in Judah (2 Chr. xxxi. 14).

3. In the A. V. of 1 Chr. xxvi. 19, "the sons of KORE" (following the Vulg. *Core*), should properly be "the sons of the Korhite."

KOZ (קוֹץ: *Ἀκκοβώς* in Ezr. ii. 61; *Ἀκκως*, Neh. iii. 4, 21: *Accos* in Ezr., *Accus* in Neh. iii. 4, *Haccus* in Neh. iii. 21) = ACCOZ = COZ = HAKKOZ.

KUSHAI'AH (קִישַׁיְהוּ: *Κισαΐας*: *Casaias*), The same as KISH or KISHI, the father of Ethan the Merarite (1 Chr. xv. 17).

* St. Augustine has a still more fanciful conceit, which he thinks it necessary to repeat in almost every homily on the eleven psalms inscribed to the sons of Kore. Adverting to the interpretation of Korah, Calvaria, he finds in it a great mystery. Under this name is set forth Christ, who is entitled Calvus, because He was crucified on Calvary, and was mocked by the bystanders, as Elisha had been by the children who cried after him "*Calve, calve!*" and who, when they said "*Go up*, thou bald pate," had prefigured the crucifixion. The sons of Korah are therefore the children of Christ the bridegroom (*Homil. on Psalms*)

L

LA'ADAH (לַעְדָּה: Λααδά: *Laada*), the son of Shelah, and grandson of Judah. He is described as the "father," or founder, of MARESHAH in the lowlands of Judah (1 Chr. iv. 21).

LA'ADAN (לַעְדָּן: Λααδάν: Alex. Γαλααδά and Λααδά: *Laadan*). 1. An Ephraimite, ancestor of Joshua the son of Nun (1 Chr. vii. 26).

2. (Ἐδάν; Alex. Λεαδάν; *Leedan*, 1 Chr. xxiii. 7, 8, 9: Λαδάν; Alex. Λεδάν and Λααδέ: *Ledan*, 1 Chr. xxvi. 21.) The son of Gershom, elsewhere called LIBNI. His descendants in the reign of David were among the chief fathers of his tribe, and formed part of the Temple-choir.

LAB'AN (לָבָן, Λάβαν, Joseph. Λάβανος: *Laban*), son of Bethuel, grandson of Nahor and Milcah, grand-nephew of Abraham, brother of Rebekah, and father of Leah and Rachel; by whom and their handmaids Bilhah and Zilpah he was the natural progenitor of three-fourths of the nation of the Jews, and of our Blessed Lord, and the legal ancestor of the whole.

The elder branch of the family remained at Haran when Abraham removed to the land of Canaan, and it is there that we first meet with Laban, as taking the leading part in the betrothal of his sister Rebekah to her cousin Isaac (Gen. xxiv. 10, 29-60, xxvii. 43, xxix. 4). Bethuel, his father, plays so insignificant a part in the whole transaction, being in fact only mentioned once, and that *after* his son (xxiv. 50), that various conjectures have been formed to explain it. Josephus asserts that Bethuel was dead, and that Laban was the head of the house and his sister's natural guardian (*Ant.* i. 16, §2); in which case "Bethuel" must have crept into the text inadvertently, or be supposed, with some (Adam Clarke, *in loc.*), to be the name of another brother of Rebekah. Le Clerc (*in Pent.*) mentions the conjecture that Bethuel was absent at first, but returned in time to give his consent to the marriage. The mode adopted by Prof. Blunt (*Undesigned Coincidences*, p. 35) to explain what he terms "the consistent insignificance of Bethuel," viz., that he was incapacitated from taking the management of his family by age or imbecility, is most ingenious; but the prominence of Laban may be sufficiently explained by the custom of the country, which then, as now (see Niebuhr, quoted by Rosenmüller *in loc.*), gave the brothers the main share in the arrangement of their sister's marriage, and the defence of her honour (comp. Gen. xxxiv. 13; Judg. xxi. 22; 2 Sam. xiii. 20-29). [BETHUEL.]

The next time Laban appears in the sacred narrative it is as the host of his nephew Jacob at Haran (Gen. xxix. 13, 14). The subsequent transactions by which he secured the valuable services of his nephew for fourteen years in return for his two daughters, and for six years as the price of his cattle, together with the disgraceful artifice by which he palmed off his elder and less attractive daughter on the unsuspecting Jacob, are familiar to all (Gen. xxix., xxx.).

Laban was absent shearing his sheep, when Jacob, having gathered together all his possessions, started with his wives and children for his native land; and it was not till the third day that he heard of their stealthy departure. In hot haste he sets off in pursuit of the fugitives, his indignation at the prospect of losing a servant, the value of whose services he had proved by experience (xxx. 27), and a family who he hoped would have increased the power of his tribe, being increased by the discovery of the loss of his teraphim, or household gods, which Rachel had carried off, probably with the view of securing a prosperous journey. Jacob and his family had crossed the Euphrates, and were already some days' march in advance of their pursuers; but so large a caravan, encumbered with women and children, and cattle, would travel but slowly (comp. Gen. xxxiii. 13), and Laban and his kinsmen came up with the retreating party on the east side of the Jordan, among the mountains of Gilead. The collision with his irritated father-in-law might have proved dangerous for Jacob but for a divine intimation to Laban, who, with characteristic hypocrisy, passes over in silence the real ground of his displeasure at Jacob's departure, urging only its clandestine character, which had prevented his sending him away with marks of affection and honour, and the theft of his gods. After some sharp mutual recrimination, and an unsuccessful search for the teraphim, which Rachel, with the cunning which characterized the whole family, knew well how to hide, a covenant of peace was entered into between the two parties, and a cairn raised about a pillar-stone set up by Jacob, both as a memorial of the covenant, and a boundary which the contracting parties pledged themselves not to pass with hostile intentions. After this, in the simple and beautiful words of Scripture, "Laban rose up and kissed his sons and his daughters, and blessed them, and departed, and returned to his place;" and he thenceforward disappears from the Biblical narrative.

Few Scriptural characters appear in more repulsive colours than Laban, who seems to have concentrated all the duplicity and acquisitiveness which marked the family of Haran. The leading principle of his conduct was evidently self-interest, and he was little scrupulous as to the means whereby his ends were secured. Nothing can excuse the abominable trick by which he deceived Jacob in the matter of his wife, and there is much of harshness and mean selfishness in his other relations with him. At the same time it is impossible, on an unbiassed view of the whole transactions, to acquit Jacob of blame, or to assign him any very decided superiority over his uncle in fair and generous dealing. In the matter of the flocks each was evidently seeking to outwit the other; and though the whole was divinely overruled to work out important issues in securing Jacob's return to Canaan in wealth and dignity, our moral sense revolts from what Chalmers (*Daily Scr. Readings*, i. 60) does not shrink from designating the "sneaking artifices for the promotion of his own selfishness," adopted for his own enrichment and the impoverishment of his uncle; while we can well excuse Laban's mortification at seeing himself outdone by his nephew in cunning, and the best of his flocks changing hands. In their mistaken zeal to defend Jacob, Christian writers have unduly depreciated Laban; and even the ready hospitality shewn by him to Abraham's servant, and the affectionate reception of his nephew (Gen. xxiv. 30, 31, xxix. 13, 14), have been misconstrued into the acts of a selfish man, eager to embrace an opportunity of a lucrative connexion. No man, however, is wholly selfish; and even Laban was capable of generous impulses, however mean and unprincipled his general conduct. [E. V.]

LA'BAN (לָבָן: Λαβάν: *Laban*), one of the landmarks named in the obscure and disputed passage, Deut. i. 1: "Paran, and Tophel, and Laban, and Hazeroth, and Di-zahab." The mention of Hazeroth has perhaps led to the only conjecture regarding Laban of which the writer is aware, namely, that it is identical with LIBNAH (Num. xxxiii. 20), which was the second station from Hazeroth.

The Syriac Peschito understands the name as Lebanon. The Targums, from Onkelos downward, play upon the five names in this passage, connecting them with the main events of the wanderings. Laban in this way suggests the manna, because of its white colour, that being the force of the word in Hebrew. [G.]

LABA'NA (Λαβανά: *Labana*), 1 Esd. v. 29. [LEBANA.]

LACEDEMO'NIANS (Σπαρτιᾶται; once Λακεδαιμόνιοι, 2 Macc. v. 9: *Spartiatae, Spartani, Lacedaemonae*), the inhabitants of Sparta or Lacedaemon, with whom the Jews claimed kindred (1 Macc. xii. 2, 5, 6, 20, 21; xiv. 20, 23; xv. 23; 2 Macc. v. 9). [SPARTA.]

LA'CHISH (לָכִישׁ: Λαχείς; but in Vat. of Josh. xv. Μαχήδ;[a] Joseph. Λάχεισα: *Lachis*), a city of the Amorites, the king of which joined with four others, at the invitation of Adonizedek king of Jerusalem, to chastise the Gibeonites for their league with Israel (Josh. x. 3, 5). They were however routed by Joshua at Beth-horon, and the king of Lachish fell a victim with the others under the trees at Makkedah (ver. 26). The destruction of the town seems to have shortly followed the death of the king: it was attacked in its turn, immediately after the fall of Libnah, and notwithstanding an effort to relieve it by Horam king of Gezer, was taken, and every soul put to the sword (ver. 31-33). In the special statement that the attack lasted two days, in contradistinction to the other cities which were taken in one (see ver. 35), we gain our first glimpse of that strength of position for which Lachish was afterwards remarkable. In the catalogue of the kings slain by Joshua (xii. 10-12), Lachish occurs in the same place with regard to the others as in the narrative just quoted; but in Josh. xv., where the towns are separated into groups, it is placed in the Shefelah, or lowland district, and in the same group with Eglon and Makkedah (ver 39), apart from its former companions. It should not be overlooked that, though included in the lowland district, Lachish was a town of the Amorites, who appear to have been essentially mountaineers. Its king is expressly named as one of the "kings of the Amorites who dwell in the mountains" (Josh. x. 6). A similar remark has already been made of JARMUTH; KEILAH, and others; and see JUDAH, vol. i. 1156 *b*. Its proximity to Libnah is implied many centuries later (2 K. xix. 8). Lachish was one of the cities fortified and garrisoned by Rehoboam after the revolt of the northern kingdom (2 Chr. xi. 9). What was its fate during the invasion of Shishak—who no doubt advanced by the usual route through the maritime lowland, which would bring him under its very walls—we are not told. But it is probable that it did not materially suffer, for it was evidently a place of security later, when it was chosen as a refuge by Amaziah king of Judah from the conspirators who threatened him in Jerusalem, and to whom he at last fell a victim at Lachish (2 K. xiv. 19, 2 Chr. xxv. 27). Later still, in the reign of Hezekiah, it was one of the cities taken by Sennacherib when on his way from Phoenicia to Egypt (Rawlinson's *Herod.* i. 477). It is specially mentioned that he laid siege to it "with all his power" (2 Chr. xxxii. 9); and here "the great King" himself remained, while his officers only were dispatched to Jerusalem (2 Chr. xxxii. 9; 2 K. xviii. 17).

This siege is considered by Layard and Hincks to be depicted on the slabs found by the former in one of the chambers of the palace at Kouyunjik, which bear the inscription "Sennacherib, the mighty king, king of the country of Assyria, sitting on the throne of judgment before (or at the entrance of) the city of Lachish (Lakhisha). I give permission for its slaughter" (Layard, *N. & B.* 149-52, and 153, note). These slabs contain a view of a city which, if the inscription is correctly interpreted, must be Lachish itself.

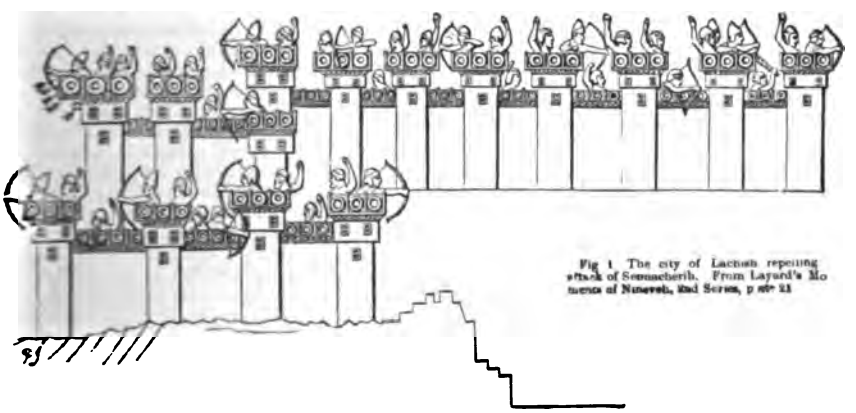


Fig. 1. The city of Lachish repelling attack of Sennacherib. From Layard's Monuments of Nineveh, 2nd Series, p. 85.

[a] The ordinary editions of the Vatican LXX., Tischendorf's included, give Λαχείς, and the Alex. Λαχεείς; but the edition of the former by Cardinal Mai has the Λαχεείς throughout. In Josh. xv. 39, all trace of Lachish has disappeared in the common editions; but in Mai's, Μαχήδ is inserted between Ἰαναρεὴλ and καὶ Βασεδώθ.

Another slab seems to show the ground-plan of the same city after its occupation by the conquerors—the Assyrian tents pitched within the walls, and the foreign worship going on. The features of the town appear to be accurately given. At any rate there is considerable agreement between the two views in the character of the walls and towers, and both are unlike those represented on other slabs. Both support in a remarkable manner the conclusions above drawn from the statement of the Bible as to the position of Lachish. The elevation of the town, fig. 1, shows that it was on hilly ground, one part higher than the other. This is also testified to by the background of the scene in fig. 2, which is too remote to be included in the limits of the woodcut, but which in the original shows a very hilly country covered with vineyards and fig-trees. On the other hand the palms round the town in fig. 2 point to the proximity of the maritime plain, in which palms flourished—and still

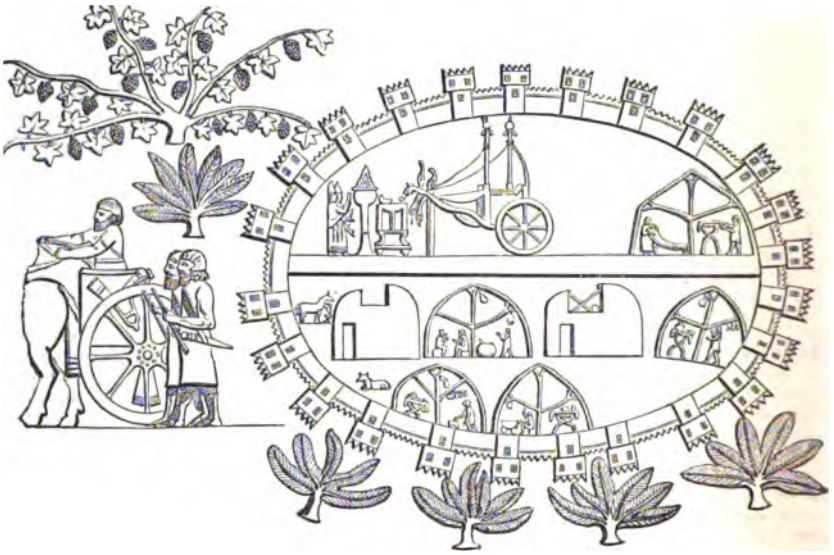

Fig. 2. Plan of Lachish (?) after its capture. From the same work, plate 24.

flourish—more than in any other region of Palestine. But though the Assyrian records thus appear[b] to assert the capture of Lachish, no statement is to be found either in the Bible or Josephus that it was taken. Indeed some expressions in the former would almost seem to imply the reverse (see "thought to win them," 2 Chr. xxxii. 1; "departed[c] from Lachish," 2 K. xix. 8; and especially Jer. xxxiv. 7).

The warning of Micah (i. 13)[d] was perhaps delivered at this time. Obscure as the passage is, it plainly implies that from Lachish some form of idolatry, possibly belonging to the northern kingdom, had been imported into Jerusalem.

After the return from captivity, Lachish with its surrounding "fields" was re-occupied by the Jews (Neh. xi. 30). It is not however named in the books of the Maccabees, nor indeed does its name reappear in the Bible.

By Eusebius and Jerome, in the *Onomasticon*, Lachish is mentioned as "7 miles from Eleutheropolis, towards Daroma," *i. e.* towards the south. No trace of the name has yet been found in any position at all corresponding to this. A site called *Um-Lâkis*, situated on a "low round swell or knoll," and displaying a few columns and other fragments of ancient buildings, is found between Gaza and *Beit-Jibrin*, probably the ancient Eleutheropolis, at the distance of 11 miles (14 Roman miles), and in a direction not S., but about W.S.W. from the latter. Two miles east of *Um-Lâkis* is a site of similar character, called *'Ajlân* (Rob. ii. 46, 7). Among modern travellers, these sites appear to have been first discovered by Dr. Robinson. While admitting the identity of *Ajlan* with EGLON, he disputes that of *Um-Lâkis*, on the ground that it is at variance with the statement of Eusebius, as above quoted; and further that the remains are not those of a fortified city able to brave an Assyrian army (47). On the other hand, in favour of the identification are the proximity of Eglon (i. *'Ajlân* be it), and the situation of *Um-Lâkis* in the middle of the plain, right in the road from Egypt. By "Daroma" also Eusebius may have intended, not the southern district, but a place of that name, which is mentioned in the Talmud, and is placed by the accurate old traveller hap-Parchi as two hours south of Gaza (Zunz in *Benj. of Tudela*, by Asher, ii. 442). With regard to the weakness of *Um-Lâkis*, Mr. Porter has a good comparison between it and Ashdod (*Handbk.* 261). [G.]

LACU'NUS (Λακκοῦνος: *Calous*), one of the sons of Addi, who returned with Ezra, and has married a foreign wife (1 Esd. ix. 31). The name does not occur in this form in the parallel lists of Ezr. x., but it apparently occupies the place of

[b] Col. Rawlinson seems to read the name as Lubana, i. e. Libnah (Layard, *N. & B.* 153, note).

[c] This is also the opinion of Rawlinson (*Herod.* i. 480 note 6).

[d] The play of the words is between Lachish and Recesh (רֶכֶשׁ, A. V "swift beast"), and the exhortation is to flight

CHELAL (ver. 30 *f*, as is indicated by the *Caleus* of the Vulg.

LA'DAN (Δαλάν, Tisch., but 'Ασάν in Mai's ed.: *Dalarus*), 1 Esd. v. 37. [DELAIAH, 2.]

LADDER OF TYRUS, THE (ἡ κλῖμαξ Τύρου: *a terminis Tyri*, possibly reading κλίμα), one of the extremities (the northern) of the district over which Simon Maccabaeus was made captain (στρατηγός) by Antiochus VI. (or Theos), very shortly after his coming to the throne; the other being "the borders of Egypt" (1 Macc. xi. 59). The Ladder of Tyre,[a] or of the Tyrians, was the local name for a high mountain, the highest in that neighbourhood, a hundred stadia north of Ptolemais, the modern *Akka* or Acre (Joseph. *B. J.* ii. 10, §2). The position of the *Ras-en-Nakhurah* agrees very nearly with this, as it lies 10 miles, or about 120 stadia, from *Akka*, and is characterised by travellers from Parchi downwards as very high and steep. Both the *Ras-en-Nakhurah*, and the *Ras-el-Abyad*, *i.e.* the White Cape, sometimes called Cape Blanco, a headland 6 miles still farther north, are surmounted by a path cut in zigzags; that over the latter is attributed to Alexander the Great. It is possibly from this circumstance that the *Ras-el-Abyad*,[b] is by some travellers (Irby, Van de Velde, &c.) treated as the ladder of the Tyrians. But by the early and accurate Jewish traveller, hap-Parchi[c] (Zunz, 402), and in our own times by Robinson (iii. 89), Mislin (*Les Saints Lieux*, ii. 9), Porter (*Hdbk.* 389), Schwarz (76), Stanley (*S. & P.* 264), the *Ras-en-Nakhurah* is identified with the ladder; the last-named traveller pointing out well that the reason for the name is the fact of its "differing from Carmel in that it leaves no beach between itself and the sea, and thus, by cutting off all communication round its base, acts as the natural barrier between the Bay of Acre and the maritime plain to the north—in other words, between Palestine and Phoenicia" (comp. p. 266). [G.]

LA'EL (לָאֵל: Δαήλ: *Laël*), the father of Eliasaph, prince of the Gershonites at the time of the Exodus (Num. iii. 24).

LA'HAD (לָהַד: Λααδ; Alex. Λάδ: *Laad*), son of Jahath, one of the descendants of Judah, from whom sprung the Zorathites, a branch of the tribe who settled at Zorah, according to the Targ. of R. Joseph (1 Chr. iv. 2).

LAHA'I-ROI, THE WELL (בְּאֵר לַחַי רֹאִי: τὸ φρέαρ τῆς ὁράσεως: *puteus, cujus nomen est Viventis et Videntis*). In this form is given in the A. V. of Gen. xxiv. 62, and xxv. 11, the name of the famous well of Hagar's relief, in the oasis of verdure round which Isaac afterwards resided. In xvi. 14—the only other occurrence of the name—it is represented in the full Hebrew form of BEER-LAHAI-ROI. In the Mussulman traditions the well *Zemzem* in the *Beit-allah* of Mecca is identical with it. [LEHI.] [G.]

LAH'MAM (לַחְמָם: Μαχές καὶ Μααχές Alex. Λαμάς: *Lehman, Leemas*), a town in the lowland district of Judah (Josh. xv. 40) named between CABBON and KITHLISH, and in the same group with LACHISH. It is not mentioned in the *Onomasticon*, nor does it appear that any traveller has sought for or discovered its site.

In many MSS. and editions of the Hebrew Bible, amongst them the Rec. Text of Van der Hooght, the name is given with a final *s*—Lachmas.[d] Corrupt as the LXX. text is here, it will be observed that both MSS. exhibit the *s*. This is the case also in the Targum and the other Oriental versions. The ordinary copies of the Vulgate have *Lehemas*, but the text published in the Benedictine Edition of Jerome *Leemas*. [G.]

LAH'MI (לַחְמִי: τὸν Ἐλεμεί; Alex. τὸν Λεεμεῖ: *Beth*-lehem-*ites*), the brother of Goliath the Gittite, slain by Elhanan the son of Jair, or Jaor (1 Chr. xx. 5). In the parallel narrative (2 Sam. xxi. 19), amongst other differences, Lahmi disappears in the word *Beth hal-lachmi*, i. e. the Bethlehemite. This reading is imported into the Vulgate of the Chron. (see above). What was the original form of the passage has been the subject of much debate; the writer has not however seen cause to alter the conclusion to which he came under ELHANAN—that the text of Chronicles is the more correct of the two. In addition to the LXX., the Peschito and the Targum both agree with the Hebrew in reading Lachmi. The latter contains a tradition that he was slain on the same day with his brother. [G.]

LA'ISH (לַיִשׁ; in Isaiah, לַיְשָׁה: Λαΐσα; Judg. xviii. 29, Οὐλαμαίς;[e] Alex. Λαείς: *Lais*), the city which was taken by the Danites, and under its new name of DAN became famous as the northern limit of the nation, and as the depository, first of the graven image of Micah (Judg. xviii. 7, 14, 27, 29), and subsequently of one of the calves of Jeroboam. In another account of the conquest the name is given, with a variation in the form, as LESHEM (Josh. xix. 47). It is natural to presume that Laish was an ancient sanctuary, before its appropriation for that purpose by the Danites, and we should look for some explanation of the mention of Dan instead of Laish in Gen. xiv.; but nothing is as yet forthcoming on these points. There is no reason to doubt that the situation of the place was at or very near that of the modern *Banias*. [DAN.]

In the A. V. Laish is again mentioned in the graphic account by Isaiah of Sennacherib's march on Jerusalem (Is. x. 30):—"Lift up thy voice, O daughter of Gallim! cause it to be heard unto Laish, oh poor Anathoth!"—that is, cry so loud that your shrieks shall be heard to the very confines of the land. This translation—in which our translators followed the version of Junius and Tremellius, and the comment of Grotius—is adopted because the last syllable of the name which appears here as Laishah is taken to be the Hebrew particle of mo-

[a] This name is found in the Talmud, סלמה דצור. See *Zeraa* (*Bosq. of Tud.* 402).

[b] Maundrell, ordinarily so exact (March 17), places "the mountain climax" at an hour and a quarter south of the *Nahr Ibrahim Basso* (Adonis River), meaning therefore the headland which encloses on the north the bay of Juneh above *Beirût*. On the other hand, Irby and Mangles (Oct. 21) with equally unusual inaccuracy, give the name of Cape Blanco to the *Ras Nakurah*—an hour's ride from *Es-Sûr*, the ancient Ecdippa. Wilson also (ii 232) has fallen into a curious confusion between the two.

[c] He gives the name as *Al-Nawakir*, probably a mere corruption of *En-Nakura*.

[d] לחמס for לחמם, by interchange of ס and ם.

[e] The LXX. have here transferred literally the Hebrew words וְאַגְלָם לַיִשׁ, "and indeed Laish." Exactly the same thing is done in the case of Luz, Gen xxviii. 19.

tion, "to Laish," as is undoubtedly the case in Judg. xviii. 7. But such a rendering is found neither in any of the ancient versions, nor in those of modern scholars, as Gesenius, Ewald, Zunz, &c.; nor is the Hebrew word[1] here rendered "cause it to be heard," found elsewhere in that voice, but always absolute—"hearken," or "attend." There is a certain violence in the sudden introduction amongst these little Benjamite villages of the frontier town so very far remote, and not less in the use of its ancient name, elsewhere so constantly superseded by Dan. (See Jer. viii. 16.) On the whole it seems more consonant with the tenor of the whole passage to take Laishah as the name of a small village lying between Gallim and Anathoth, and of which hitherto, as is still the case with the former, and until 1831 was the case with the latter, no traces have been found.

In 1 Macc. ix. 5 a village named Alasa (Mai, and Alex. Ἀλασᾶ; A. V. Elcasa) is mentioned as the scene of the battle in which Judas was killed. In the Vulgate it is given as *Laisa*. If the Berea at which Demetrius was encamped on the same occasion was Beeroth—and from the Peschito reading this seems likely—then Alasa or Laisha was somewhere on the northern road, 10 or 12 miles from Jerusalem, about the spot at which a village named Adasa existed in the time of Eusebius and Jerome. D (Δ) and L (Λ) are so often interchanged in Greek manuscripts, that the two names may indicate one and the same place, and that the Laishah of Isaiah. Such an identification would be to a certain extent consistent with the requirements of Is. x. 30, while it would throw some light on the uncertain topography of the last struggle of Judas Maccabaeus. But it must be admitted that at present it is but conjectural: and that the neighbourhood of Beeroth is at the best somewhat far removed from the narrow circle of the villages enumerated by Isaiah. [G.]

LA'ISH (לַיִשׁ; in 2 Sam. the orig. text, *Cethîb*, has לוּשׁ: Ἀμείς, Ἐλλᾶϊς; Alex. Λαΐς, Λαείς: *Laïs*), father of Phaltiel, to whom Saul had given Michal, David's wife (1 Sam. xxv. 44; 2 Sam. iii. 15). He was a native of GALLIM. It is very remarkable that the names of Laish (Laishah) and Gallim should be found in conjunction at a much later date (Is. x. 30). [G.]

LAKES. [PALESTINE.]

LA'KUM (לָקוּם, *i. e.* Lakkûm: Δωδά; Alex. —unusually wide of the Hebrew—ἕως Ἀκρού: *Locum*), one of the places which formed the landmarks of the boundary of Naphtali (Josh. xix. 33), named next to Jabneel, and apparently between it and the Jordan: but the whole statement is exceedingly obscure, and few, if any, of the names have yet been recognised. Lakkum is but casually named in the *Onomasticon*, and no one since has discovered its situation. The rendering of the Alex. LXX. is worth remark. [G.]

LAMB. 1. אִמֵּר, *immar*, is the Chaldee equivalent of the Hebrew *cebes*. See below, No. 3 (Ezr. vi. 9, 17; vii. 17).

2. טָלֶה, *tâleh* (1 Sam. vii. 9; Is. lxv. 25), a young sucking lamb; originally the young of any animal. The noun from the same root in Arabic signifies "a fawn," in Ethiopic "a kid," in Samaritan "a boy;" while in Syriac it denotes "a boy," and in the fem. "a girl." Hence "*Talîtha* kumi," "Damsel, arise!" (Mark v. 41). The plural of a cognate form occurs in Is. xl. 11.

3. כֶּבֶשׂ, *cebes*, כֶּשֶׂב, *cesev*, and the feminines כִּבְשָׂה, *cibsâh*, or כַּבְשָׂה, *cabsâh*, and כִּשְׂבָה, *cisbâh*, respectively denote a male and female lamb from the first to the third year. The former perhaps more nearly coincide with the provincial term *hog* or *hogget*, which is applied to a young ram before he is shorn. The corresponding word in Arabic, according to Gesenius, denotes a ram at that period when he has lost his first two teeth and four others make their appearance, which happens in the second or third year. Young rams of this age formed an important part of almost every sacrifice. They were offered at the daily morning and evening sacrifice (Ex. xxix. 38-41), on the sabbath day (Num. xxviii. 9), at the feasts of the new moon (Num. xxviii. 11), of trumpets (Num. xxix. 2), of tabernacles (Num. xxix. 13-40), of Pentecost (Lev. xxiii. 18-20), and of the Passover (Ex. xii. 5). They were brought by the princes of the congregation as burnt-offerings at the dedication of the tabernacle (Num. vii.), and were offered on solemn occasions like the consecration of Aaron (Lev. ix. 3), the coronation of Solomon (1 Chr. xxix. 21), the purification of the temple under Hezekiah (2 Chr. xxix. 21), and the great passover held in the reign of Josiah (2 Chr. xxxv. 7). They formed part of the sacrifice offered at the purification of women after childbirth (Lev. xii. 6), and at the cleansing of a leper (Lev. xiv. 10-25). They accompanied the presentation of first-fruits (Lev. xxiii. 12). When the Nazarites commenced their period of separation they offered a he-lamb for a trespass-offering (Num. vi. 12); and at its conclusion a he-lamb was sacrificed as a burnt-offering, and an ewe-lamb as a sin-offering (v. 14). An ewe-lamb was also the offering for the sin of ignorance (Lev. iv. 32).

4. כַּר, *car*, a fat ram, or more probably "wether," as the word is generally employed in opposition to *ayil*, which strictly denotes a "ram" (Deut. xxxii. 14; 2 K. iii. 4; Is. xxxiv. 6). Mesha king of Moab sent tribute to the king of Israel 100,000 fat wethers; and this circumstance is made use of by R. Joseph Kimchi to explain Is. xvi. 1, which he regards as an exhortation to the Moabites to renew their tribute. The Tyrians obtained their supply from Arabia and Kedar (Ez. xxvii. 21), and the pastures of Bashan were famous as grazing grounds (Ez. xxxix. 18).

5. צֹאן, *tsôn*, rendered "lamb" in Ex. xii. 21, is properly a collective term denoting a "flock" of small cattle, sheep and goats, in distinction from herds of the larger animals (Eccl. ii. 7; Ex. xlv. 15). In opposition to this collective term the word

6. שֶׂה, *seh*, is applied to denote the individuals of a flock, whether sheep or goats; and hence, though "lamb" is in many passages the rendering of the A. V., the marginal reading gives "kid" (Gen. xxii. 7, 8; Ex. xii. 3, xxii. 1, &c.). [SHEEP.]

On the Paschal Lamb see PASSOVER. [W. A. W.]

LAM'ECH (לֶמֶךְ: Λαμέχ: *Lamech*), properly Lemech, the name of two persons in antediluvian history. 1. The fifth lineal descendant from Cain (Gen. iv. 18-24). He is the only one except Enoch, of the posterity of Cain, whose history is related with some detail. He is the first polygamist on record. His two wives, Adah and Zillah, and his daughter Naamah, are, with Eve, the only antedi-

[1] הַקְשֵׁב, hiphil imp. from קָשַׁב.

Levian women whose names are mentioned by Moses. His three sons—JABAL, JUBAL, and TUBAL-CAIN, are celebrated in Scripture as authors of useful inventions. The Targum of Jonathan adds, that his daughter was "the mistress of sounds and songs," *i. e.* the first poetess. Josephus (*Ant.* i. 2, § 2) relates that the number of his sons was seventy-seven, and Jerome records the same tradition, adding that they were all cut off by the Deluge, and that this was the seventy-and-sevenfold vengeance which Lamech imprecated.

The remarkable poem which Lamech uttered has not yet been explained quite satisfactorily. It is the subject of a dissertation by Hilliger in *Thesaurus Theologico-Philol.* i. 141, and is discussed at length by the various commentators on Genesis. The history of the descendants of Cain closes with a song, which at least threatens bloodshed. Delitzsch observes, that as the arts which were afterwards consecrated by pious men to a heavenly use, had their origin in the family of Cain, so this early effort of poetry is composed in honour, not of God, but of some deadly weapon. It is the only extant specimen of antediluvian poetry; it came down, perhaps as a popular song, to the generation for whom Moses wrote, and he inserts it in its proper place in his history. Delitzsch traces in it all the peculiar features of later Semitic poetry; rhythm, assonance, parallelism, strophe, and poetic diction. It may be rendered:—

Adah and Zillah! hear my voice,
Ye wives of Lamech! give ear unto my speech;
For a man had I slain for smiting me,
And a youth for wounding me:
Surely sevenfold shall Cain be avenged,
But Lamech seventy and seven.

The A. V. makes Lamech declare himself a murderer, "I have slain a man to my wounding," &c. This is the view taken in the LXX. and the Vulgate. Chrysostom (*Hom.* xx. *in Gen.*) regards Lamech as a murderer stung by remorse, driven to make public confession of his guilt solely to ease his conscience, and afterwards (*Hom. in Ps.* vi.) obtaining mercy. Theodoret (*Quaest. in Gen.* xliv.) sets him down as a murderer. Basil (*Ep.* 260 [317], §5) interprets Lamech's words to mean that he had committed two murders, and that he deserved a much severer punishment than Cain, as having sinned after plainer warning; Basil adds, that some persons interpret the last lines of the poem as meaning, that whereas Cain's sin increased, and was followed after seven generations by the punishment of the Deluge washing out the foulness of the world, so Lamech's sin shall be followed in the seventy-seventh (see St. Luke iii. 23-38) generation by the coming of Him who taketh away the sin of the world. Jerome (*Ep.* xxxvi. *ad Damasum*, t. i. p. 161) relates as a tradition of his predecessors and of the Jews, that Cain was accidentally slain by Lamech in the seventh generation from Adam. This legend is told with fuller details by Jarchi. According to him, the occasion of the poem was the refusal of Lamech's wives to associate with him in consequence of his having killed Cain and Tubal-cain; Lamech, it is said, was blind, and was led about by Tubal-cain; when the latter saw in the thicket what he supposed to be a wild-beast, Lamech, by his son's direction, shot an arrow at it, and thus slew Cain; in alarm and indignation at the deed, he killed his son; hence his wives refused to associate with him; and he excuses himself as having acted without a vengeful or murderous purpose. Luther considers the occasion of the poem to be the deliberate murder of Cain by Lamech. Lightfoot (*Decas Chorogr. Marc. praem.* § iv.) considers Lamech as expressing remorse for having, as the first polygamist, introduced more destruction and murder than Cain was the author of into the world. Pfeiffer (*Diff. Scrip. Loc.* p. 25) collects different opinions with his usual diligence, and concludes that the poem is Lamech's vindication of himself to his wives, who were in terror for the possible consequences of his having slain two of the posterity of Seth. Lowth (*De S. Poesi Heb.* iv.) and Michaelis think that Lamech is excusing himself for some murder which he had committed in self-defence, "for a wound inflicted on me."

A rather milder interpretation has been given to the poem by some, whose opinions are perhaps of greater weight than the preceding in a question of Hebrew criticism. Onkelos, followed by Pseudo-jonathan, paraphrases it, "I have not slain a man that I should bear sin on his account." The Arab. Ver. (Saadia) puts it in an interrogative form, "Have I slain a man?" &c. These two versions, which are substantially the same, are adopted by De Dieu and Bishop Patrick. Aben-Ezra, Calvin, Drusius, and Cartwright, interpret it in the future tense as a threat, "I will slay any man who wounds me." This version is adopted by Herder; whose hypothesis as to the occasion of the poem was partly anticipated by Hess, and has been received by Rosenmüller, Ewald, and Delitzsch. Herder regards it as Lamech's song of exultation on the invention of the sword by his son Tubal-cain, in the possession of which he foresaw a great advantage to himself and his family over any enemies. This interpretation appears, on the whole, to be the best that has been suggested. But whatever interpretation be preferred, all persons will agree in the remark of Bp. Kidder that the occasion of the poem not being revealed, no man can be expected to determine the full sense of it; thus much is plain, that they are vaunting words in which Lamech seems, from Cain's indemnity, to encourage himself in violence and wickedness.

2. The father of Noah (Gen. v. 29). Chrysostom (*Serm.* ix. *in Gen.* and *Hom.* xxi. *in Gen.*), perhaps thinking of the character of the other Lamech, speaks of this as an unrighteous man, though moved by a divine impulse to give a prophetic name to his son. Buttman and others, observing that the names of Lamech and Enoch are found in the list of Seth's, as well as in the list of Cain's family, infer that the two lists are merely different versions or recensions of one original list,—traces of two conflicting histories of the first human family. This theory is deservedly repudiated by Delitzsch on *Gen.* v. [W. T. B.]

LAMENTATIONS. The Hebrew title of this Book, *Echah* (אֵיכָה), is taken, like those of the five Books of Moses, from the Hebrew word with which it opens, and which appears to have been almost a received formula for the commencement of a song of wailing (comp. 2 Sam. i. 19-27). The Septuagint translators found themselves obliged, as in the other cases referred to, to substitute some title more significant, and adopted θρῆνοι Ἱερεμίου as the equivalent of *Kinoth* (קִינוֹת, "lamentations"), which they found in Jer. vii. 29, ix. 10, 20; 2 Chr. xxxv. 25, and which had probably been applied

familiarly, as it was afterwards by Jewish commentators, to the Book itself. The Vulgate gives the Greek word and explains it (*Threni, id est, Lamentationes Jeremiæ Prophetæ*). Luther and the A. V. have given the translation only, in *Klaglieder* and *Lamentations* respectively.

The poems included in this collection appear in the Hebrew canon with no name attached to them, and there is no direct external evidence that they were written by the prophet Jeremiah earlier than the date given in the prefatory verse which appears in the Septuagint.[a] This represents, however, the established belief of the Jews after the completion of the canon. Josephus (*Ant.* x. 5, §1) follows, as far as the question of authorship is concerned, in the same track, and the absence of any tradition or probable conjecture to the contrary, leaves the consensus of critics and commentators almost undisturbed.[b] An agreement so striking rests, as might be expected, on strong internal evidence. The poems belong unmistakeably to the last days of the kingdom, or the commencement of the exile. They are written by one who speaks, with the vividness and intensity of an eye-witness, of the misery which he bewails. It might almost be enough to ask who else then living could have written with that union of strong passionate feeling and entire submission to Jehovah which characterises both the Lamentations and the Prophecy of Jeremiah. The evidences of identity are, however, stronger and more minute. In both we meet, once and again, with the picture of the "Virgin-daughter of Zion," sitting down in her shame and misery (Lam. i. 15, ii. 13; Jer. xiv. 17). In both there is the same vehement out-pouring of sorrow. The prophet's eyes flow down with tears (Lam. i. 16, ii. 11, iii. 48, 49; Jer. ix. 1, xiii. 17, xiv. 17). There is the same haunting feeling of being *surrounded* with fears and terrors on every side (Lam. ii. 22; Jer. vi. 25, xlvi. 5).[c] In both the worst of all the evils is the iniquity of the prophets and the priests (Lam. ii. 14, iv. 13; Jer. v. 30, 31, xiv. 13, 14). The sufferer appeals for vengeance to the righteous Judge (Lam. iii. 64-66; Jer. xi. 20). He bids the rival nation that exulted in the fall of Jerusalem prepare for a like desolation (Lam. iv. 21; Jer. xlix. 12). We can well understand, with all these instances before us, how the scribes who compiled the Canon after the return from Babylon should have been led, even in the absence of external testimony, to assign to Jeremiah the authorship of the Lamentations.

Assuming this as sufficiently established, there come the questions—(1.) When, and on what occasion did he write it? (2.) In what relation did it stand to his other writings? (3.) What light does it throw on his personal history, or on that of the time in which he lived?

I. The earliest statement on this point is that of Josephus (*Ant.* x. 5, §1). He finds among the books which were extant in his own time the lamentations on the death of Josiah, which are mentioned in 2 Chr. xxxv. 25. As there are no traces of any other poem of this kind in the later Jewish literature, it has been inferred naturally enough, that he speaks of this. This opinion was maintained also by Jerome, and has been defended by some modern writers (Ussher, Dathe, Michaelis,[d] *Notes to Lowth, Prael.* xxii.; Calovius, *Prolegom. ad Thren.*; De Wette, *Einl. in das A. T., Klagl.*). It does not appear, however, to rest on any better grounds than a hasty conjecture, arising from the reluctance of men to admit that any work by an inspired writer can have perished, or the arbitrary assumption (De Wette, *l. c.*) that the same man could not, twice in his life, have been the spokesman of a great national sorrow.[e] And against it we have to set (1) the tradition on the other side embodied in the preface of the Septuagint, (2) the contents of the book itself. Admitting that some of the calamities described in it may have been common to the invasions of Necho and Nebuchadnezzar, we yet look in vain for a single word distinctive of a funeral dirge over a devout and zealous reformer like Josiah, while we find, step by step, the closest possible likeness between the pictures of misery in the Lamentations and the events of the closing years of the reign of Zedekiah. The long siege had brought on the famine in which the young children fainted for hunger (Lam. ii. 11, 12, 20, iv. 4, 9; 2 K. xxv. 3). The city was taken by storm (Lam. ii. 7, iv. 12; 2 Chr. xxxvi. 17). The Temple itself was polluted with the massacre of the priests who defended it (Lam. ii. 20, 21; 2 Chr. xxxvi. 17), and then destroyed (Lam. ii. 6; 2 Chr. xxxvi. 19). The fortresses and strongholds of Judah were thrown down. The anointed of the Lord, under whose shadow the remnant of the people might have hoped to live in safety, was taken prisoner (Lam. iv. 20; Jer. xxxix. 5). The chief of the people were carried into exile (Lam. i. 5, ii. 9; 2 K. xxv. 11). The bitterest grief was found in the malignant exultation of the Edomites (Lam. iv. 21; Ps. cxxxvii. 7). Under the rule of the stranger the Sabbaths and solemn feasts were forgotten (Lam. i. 4, ii. 6), as they could hardly have been during the short period in which Jerusalem was in the hands of the Egyptians. Unless we adopt the strained hypothesis that the whole poem is prophetic in the sense of being predictive, the writer seeing the future as if it were actually present, or the still wilder conjecture of Jarchi, that this was the roll which Jehoiachin destroyed, and which was re-written by Baruch or Jeremiah (Carpzov, *Introd. ad lib. V. T.* iii. c. iv.), we are compelled to come to the conclusion that the coincidence is not accidental, and to adopt the later, not the earlier of the dates. At what period after the capture of the city the prophet gave this utterance to his sorrow we can only conjecture, and the materials for doing so with any probability are but scanty. The local tradition which pointed out a cavern in the neighbourhood of Jerusalem as the refuge to which Jeremiah withdrew that he might write this book (Del Rio, *Proleg. in Thren.*, quoted by Carpzov, *Introd. l. c.*), is as trustworthy as most of the other legends of the time of Helena. The ingenuity which aims at attaching each individual poem to some definite

[a] "And it came to pass that after Israel was led captive and Jerusalem was laid waste, Jeremiah sat weeping, and lamented with this lamentation over Jerusalem, and said."

[b] The question whether all the five poems were by the same writer has however been raised by Thenius, *Die Klagelieder erklärt: Vorbemerk.* quoted in Davidson's *Introd. to O. T.*, p. 888.

[c] More detailed coincidences of words and phrases are given by Keil (quoting from Pareau) in his *Einl. in das A. T.* §129.

[d] Michaelis and Dathe, however, afterwards abandoned this hypothesis, and adopted that of the later date.

[e] The argument that iii. 27 implies the youth of the writer hardly needs to be confuted.

event in the prophet's life, is for the most part simply wasted.[f] He may have written it immediately after the attack was over, or when he was with Gedaliah at Mizpeh, or when he was with his countrymen at Tahpanhes.

II. It is well, however, to be reminded by these conjectures that we have before us, not a book in five chapters, but five separate poems, each complete in itself, each having a distinct subject, yet brought at the same time under a plan which includes them all. It is clear, before entering on any other characteristics, that we find, in full predominance, that strong personal emotion which mingled itself, in greater or less measure, with the whole prophetic work of Jeremiah. There is here no "word of Jehovah," no direct message to a sinful people. The man speaks out of the fulness of his heart, and though a higher Spirit than his own helps him to give utterance to his sorrows, it is yet the language of a sufferer rather than of a teacher. There is this measure of truth in the technical classification which placed the Lamentations among the Hagiographa of the Hebrew Canon, in the feeling which led the Rabbinic writers (Kimchi, *Pref. in Psalm.*) to say that they and the other books of that group, were written indeed by the help of the Holy Spirit, but not with the special gift of prophecy.

Other differences between the two books that bear the prophet's name grew out of this. Here there is more attention to form, more elaboration. The rhythm is more uniform than in the prophecies. A complicated alphabetic structure pervades nearly the whole book. It will be remembered that this acrostic form of writing was not peculiar to Jeremiah. Whatever its origin, whether it had been adopted as a help to the memory, and so fitted especially for didactic poems, or for such as were to be sung by great bodies of people (Lowth, *Prael.* xxii.),[g] it had been a received, and it would seem popular, framework for poems of very different characters, and extending probably over a considerable period of time. The 119th Psalm is the great monument which forces itself upon our notice; but it is found also in the 25th, 34th, 37th, 111th, 112th, 145th—and in the singularly beautiful fragment appended to the book of Proverbs (Prov. xxxi. 10-31). Traces of it, as if the work had been left half-finished (De Wette, *Psalmen*, ad loc.) appear in the 9th and 10th. In the Lamentations (confining ourselves for the present to the structure) we meet with some remarkable peculiarities.

(1.) Ch. i., ii., and iv. contain 22 verses each, arranged in alphabetic order, each verse falling into three nearly balanced clauses (Ewald, *Poet. Büch.* i. 147); ii. 19 forms an exception as having a fourth clause, the result of an interpolation, as it the writer had shaken off for a moment the restraint of his self imposed law. Possibly the inversion of the usual order of ע and פ in ch. ii., iii., iv., may have arisen from a like forgetfulness. Grotius, *ad loc.*, explains it on the assumption that here Jeremiah followed the order of the Chaldæan alphabet.[h]

(2.) Ch. iii. contains three short verses under each letter of the alphabet, the initial letter being three times repeated.

(3.) Ch. v. contains the same number of verses as ch. i., ii., iv., but without the alphabetic order. The thought suggests itself that the earnestness of the prayer with which the book closes may have carried the writer beyond the limits within which he had previously confined himself; but the conjecture (of Ewald) that we have here, as in Ps. ix. and x., the rough draught of what was intended to have been finished afterwards in the same manner as the others, is at least a probable one.

III. The power of entering into the spirit and meaning of poems such as these depends on two distinct conditions. We must seek to see, as with our own eyes, the desolation, misery, confusion, which came before those of the prophet. We must endeavour also to feel as he felt when he looked on them. And the last is the more difficult of the two. Jeremiah was not merely a patriot-poet, weeping over the ruin of his country. He was a prophet who had seen all this coming, and had foretold it as inevitable. He had urged submission to the Chaldæans as the only mode of diminishing the terrors of that "day of the Lord." And now the Chaldæans were come, irritated by the perfidy and rebellion of the king and princes of Judah; and the actual horrors that he saw, surpassed, though he had predicted them, all that he had been able to imagine. All feeling of exultation in which, as mere prophet of evil, he might have indulged at the fulfilment of his forebodings, was swallowed up in deep overwhelming sorrow. Yet sorrow, not less than other emotions, works on men according to their characters, and a man with Jeremiah's gifts of utterance could not sit down in the mere silence and stupor of a hopeless grief. He was compelled to give expression to that which was devouring his heart and the heart of his people. The act itself was a relief to him. It led him on (as will be seen hereafter) to a calmer and serener state. It revived the faith and hope which had been nearly crushed out.

[f] Parvus (quoted by De Wette, *l. c.*) connects the poems in the life as follows:—

C. I. During the siege (Jer. xxxvii. 5).

C. II. After the destruction of the Temple.

C. III. At the time of Jeremiah's imprisonment in the dungeon (Jer. xxxviii. 6, with Lam. iii. 55).

C. IV. After the capture of Zedekiah.

C. V. After the destruction, later than c. ii.

[g] De Wette maintains (*Comment. über die Psalm.* p. 56) that this acrostic form of writing was the outgrowth of a feeble and degenerate age dwelling on the outer structure of poetry when the soul had departed. His judgment as to the origin and character of the alphabetic form is shared by Ewald (*Poet. Buch.* i. p. 140). It is hard, however, to reconcile this estimate with the impression made on us by such Psalms as the 25th and 34th; and Ewald himself, in his translation of the Alphabetic Psalms and the Lamentations, has shewn how compatible such a structure is with the highest energy and beauty. With some of these, too, it must be added, the assignment of a later date than the time of David rests on the foregone conclusion that the acrostic structure is itself a proof of it. (Comp. Delitzsch, *Commentar über den Psalter*, on Ps. ix., x.). De Wette however allows, condescendingly, that the Lamentations, in spite of their degenerate taste, "have some merit in their way" ("sind zwar in ihrer Art von einigen Werthe").

[h] Similar anomalies occur in Ps. xxxvii., and have received a like explanation (De Wette, *Ps.* p. 57). It is however a mere hypothesis that the Chaldæan alphabet differed in this respect from the Hebrew; nor is it easy to see why Jeremiah should have chosen the Hebrew order for one poem, and the Chaldæan for the other three.

It has to be remembered too, that in thus speaking he was doing that which many must have looked for from him, and so meeting at once their expectations and their wants. Other prophets and poets had made themselves the spokesmen of the nation's feelings on the death of kings and heroes. The party that continued faithful to the policy and principles of Josiah remembered how the prophet had lamented over his death. The lamentations of that period (though they are lost to us) had been accepted as a great national dirge. Was he to be silent now that a more terrible calamity had fallen upon the people? Did not the exiles in Babylon need this form of consolation? Does not the appearance of this book in their Canon of Sacred writings, after their return from exile, indicate that during their captivity they had found that consolation in it?

The choice of a structure so artificial as that which has been described above, may at first sight appear inconsistent with the deep intense sorrow of which it claims to be the utterance. Some wilder less measured rhythm would seem to us to have been a fitter form of expression. It would belong, however, to a very shallow and hasty criticism to pass this judgment. A man true to the gift he has received will welcome the discipline of self-imposed rules for deep sorrow as well as for other strong emotions. In proportion as he is afraid of being carried away by the strong current of feeling, will he be anxious to make the laws more difficult, the discipline more effectual. Something of this kind is traceable in the fact that so many of the master-minds of European literature have chosen, as the fit vehicle for their deepest, tenderest, most impassioned thoughts, the complicated structure of the sonnet; in Dante's selection of the *terza rima* for his vision of the unseen world. What the sonnet was to Petrarch and to Milton, that the alphabetic verse-system was to the writers of Jeremiah's time, the most difficult among the recognised forms of poetry, and yet one in which (assuming the earlier date of some of the Psalms above referred to) some of the noblest thoughts of that poetry had been uttered. We need not wonder that he should have employed it as fitter than any other for the purpose for which he used it. If these Lamentations were intended to assuage the bitterness of the Babylonian exile, there was, besides this, the subsidiary advantage that it supplied the memory with an artificial help. Hymns and poems of this kind, once learnt, are not easily forgotten, and the circumstances of the captives made it then, more than ever, necessary that they should have this help afforded them.[1]

An examination of the five poems will enable us to judge how far each stands by itself, how far they are connected as parts forming a whole. We must deal with them as they are, not forcing our own meanings into them; looking on them not as prophetic, or didactic, or historical, but simply as lamentations, exhibiting, like other elegies, the different phases of a pervading sorrow.

I. The opening verse strikes the key-note of the whole poem. That which haunts the prophet's mind is the solitude in which he finds himself. She that was "princess among the nations" (1) sits (like the JUDAEA CAPTA of the Roman medals), "solitary," "as a widow." Her "lovers" (the nations with whom she had been allied) hold aloof from her (2). The heathen are entered into the sanctuary, and mock at her Sabbaths (7, 10). After the manner so characteristic of Hebrew poetry, the personality of the writer now recedes and now advances, and blends by hardly perceptible transitions with that of the city which he personifies, and with which he, as it were, identifies himself. At one time, it is the daughter of Zion that asks "Is it nothing to you, all ye that pass by?" (12). At another, it is the prophet who looks on her, and portrays her as "spreading forth her hands, and there is none to comfort her" (17). Mingling with this outburst of sorrow there are two thoughts characteristic both of the man and the time. The calamities which the nation suffers are the consequences of its sins. There must be the confession of those sins: "The Lord is righteous, for I have rebelled against His commandment" (18). There is also, at any rate, this gleam of consolation that Judah is not alone in her sufferings. Those who have exulted in her destruction shall drink of the same cup. They shall be like unto her in the day that the Lord shall call (21).

II. As the solitude of the city was the subject of the first lamentation, so the destruction that had laid it waste is that which is most conspicuous in the second. Jehovah had thrown down in his wrath the strongholds of the daughter of Judah (2). The rampart and the wall lament together (8). The walls of the palace are given up into the hand of the enemy (7). The breach is great as if made by the inrushing of the sea (13). With this there had been united all the horrors of the famine and the assault:—young children fainting for hunger in the top of every street (19); women eating their own children, and so fulfilling the curse of Deut. xxviii. 53 (20); the priest and the prophet slain in the sanctuary of the Lord (ibid.). Added to all this, there was the remembrance of that which had been all along the great trial of Jeremiah's life, against which he had to wage continual war. The prophets of Jerusalem had seen vain and foolish things, false burdens, and causes of banishment (14). A righteous judgment had fallen on them. The prophets found no vision of Jehovah (9). The king and the princes who had listened to them were captive among the Gentiles.

III. The difference in the structure of this poem which has been already noticed, indicates a corresponding difference in its substance. In the two preceding poems, Jeremiah had spoken of the misery and destruction of Jerusalem. In the third he speaks chiefly, though not exclusively, of his own. He himself is the man that has seen affliction (1), who has been brought into darkness and not into light (2). He looks back upon the long life of suffering which he has been called on to endure, the scorn and derision of the people, the bitterness as of one drunken with wormwood (14, 15). But that experience was not one which had ended in darkness and despair. Here, as in the prophecies, we find a Gospel for the weary and heavy-laden, a

[1] The re-appearance of this structure in the later literature of the East is not without interest. Alphabetic poems are found among the hymns of Ephraem Syrus (Assemani, *Bibl. Orient.* iii. p. 68) and other writers; sometimes, as in the case of Ebed-jesus, with a much more complicated plan than any of the O. T. poems of this type (ibid. iii. p. 328), and these chiefly in hymns to be sung by boys at solemn festivals, or in confessions of faith which were meant for their instruction.

trust, not to be shaken, in the mercy and righteousness of Jehovah. The mercies of the Lord are new every morning (22, 23). He is good to them that wait for Him (25). And the retrospect of that sharp experience showed him that it all formed part of the discipline which was intended to lead him on to a higher blessedness. It was good for a man to bear the yoke in his youth, good that he should both hope and quietly wait (26, 27). With this, equally characteristic of the prophet's individuality, there is the protest against the wrong which had been or might hereafter be committed by rulers and princes (34-36), the confession that all that had come on him and his people was but a righteous retribution, to be accepted humbly, with searchings of heart, and repentance (39-42). The closing verses may refer to that special epoch in the prophet's life when his own sufferings had been sharpest (53-56) and the cruelties of his enemies most triumphant. If so, we can enter more fully, remembering this, into the thanksgiving with which he acknowledges the help, deliverance, redemption, which he had received from God (57, 58). And feeling sure that, at some time or other, there would be for him a yet higher lesson, we can enter with some measure of sympathy, even into the terrible earnestness of his appeal from the unjust judgment of earth to the righteous Judge, into his cry for a retribution without which it seemed to him that the Eternal Righteousness would fail (64-66).

IV. It might seem, at first, as if the fourth poem did but reproduce the pictures and the thoughts of the first and second. There come before us, once again, the famine, the misery, the desolation, that had fallen on the holy city, making all faces gather blackness. One new element in the picture is found in the contrast between the past glory of the consecrated families of the kingly and priestly stocks (Nazarites in A. V.) and their later misery and shame. Some changes there are, however, not without interest in their relation to the poet's own life and to the history of his time. All the facts gain a new significance by being seen in the light of the personal experience of the third poem. The declaration that all this had come "for the sins of the prophets and the iniquities of the priests" is clearer and sharper than before (13). There is the giving up of the last hope which Jeremiah had cherished, when he urged on Zedekiah the wisdom of submission to the Chaldaeans (20). The closing words indicate the strength of that feeling against the Edomites which lasted all through the captivity[b] (21, 22). She, the daughter of Edom, had rejoiced in the fall of her rival, and had pressed on the work of destruction. But for her too there was the doom of being drunken with the cup of the Lord's wrath. For the daughter of Zion there was hope of pardon, when discipline should have done its work and the punishment of her iniquity should be accomplished.

V. One great difference in the fifth and last section of the poem has been already pointed out. It obviously indicates either a deliberate abandonment of the alphabetic structure, or the unfinished character of the concluding elegy. The title prefixed in the Vulgate, "*Oratio Jeremiae Prophetae*," points to one marked characteristic which may have occasioned this difference. There are signs also of a later date than that of the preceding poems. Though the horrors of the famine are ineffaceable, yet that which he has before him is rather the continued protracted suffering of the rule of the Chaldaeans. The mountain of Zion is desolate, and the foxes walk on it (18). Slaves have ruled over the people of Jehovah (8). Women have been subjected to intolerable outrages (11). The young men have been taken to grind,[a] and the children have fallen under the wood (13). But in this also, deep as might be the humiliation, there was hope, even as there had been in the dark hours of the prophet's own life. He and his people are sustained by the old thought which had been so fruitful of comfort to other prophets and psalmists. The periods of suffering and struggle which seemed so long, were but as moments in the lifetime of the Eternal (19); and the thought of that eternity brought with it the hope that the purposes of love which had been declared so clearly should one day be fulfilled. The last words of this lamentation are those which have risen so often from broken and contrite hearts, "Turn thou us, O Lord, and we shall be turned. Renew our days as of old" (21). That which had begun with wailing and weeping ends (following Ewald's and Michaelis's translation) with the question of hope, "Wilt thou utterly reject us? Wilt thou be very wroth against us?"

There are perhaps few portions of the O. T. which appear to have done the work they were meant to do more effectually than this. It has presented but scanty materials for the systems and controversies of theology. It has supplied thousands with the fullest utterance for their sorrows in the critical periods of national or individual suffering. We may well believe that it soothed the weary years of the Babylonian exile (comp. Zech. i. 6, with Lam. ii. 17). When they returned to their own land, and the desolation of Jerusalem was remembered as belonging only to the past, this was the book of remembrance. On the ninth day of the month of Ab (July), the Lamentations of Jeremiah were read, year by year, with fasting and weeping, to commemorate the misery out of which the people had been delivered. It has come to be connected with the thoughts of a later devastation, and its words enter, sometimes at least, into the prayers of the pilgrim Jews who meet at the "place of wailing" to mourn over the departed glory of their city.[a] It enters largely into the nobly-constructed order of the Latin Church for the services of Passion-week (*Breviar. Rom.* Feria Quinta. "In Cœna Domini"). If it has been comparatively in the background in times when the study of Scripture had passed into casuistry and speculation, it has come forward, once and again, in times of danger and suffering, as a messenger of peace, comforting men, not after the fashion of the friends of Job, with formal moralizings, but by enabling them to express themselves, leading them to feel that they might give utterance to the deepest and saddest feelings by which they were overwhelmed. It is striking, as we cast our eye over the list of writers who have treated specially of the book, to notice

[b] Comp. with this Obad. ver. 10, and Ps. cxxxvii. 7.

[a] The Vulgate imports into this verse also the thought of a shameful infamy. It must be remembered, however, that the literal meaning conveyed to the mind of an Israelite one of the lowest offices of slave-labour (comp. Judg xvi. 21).

[a] Is there any uniform practice in these devotions? The writer hears from some Jews that the only prayers said are those that would have been said, as the prayer of the day, elsewhere; from others, that the Lamentations of Jeremiah are frequently employed.

how many must have passed through scenes of trial not unlike in kind to that of which the Lamentations speak. The book remains to do its work for any future generation that may be exposed to analogous calamities.

A few facts connected with the external history of the Book remain to be stated. The position which it has occupied in the canon of the O. T. has varied from time to time. In the received Hebrew arrangement it is placed among the *Kethubim* or Hagiographa, between Ruth and *Koheleth* (Ecclesiastes). In that adopted for synagogue use, and reproduced in some editions, as in the Bomberg Bible of 1521, it stands among the five *Megilloth* after the books of Moses. The LXX. group the writings connected with the name of Jeremiah together, but the Book of Baruch comes between the prophecy and the Lamentation. On the hypothesis of some writers that Jer. lii. was originally the introduction to the poem, and not the conclusion of the prophecy, and that the preface of the LXX. (which is not found either in the Hebrew, or in the Targum of Jonathan) was inserted to diminish the abruptness occasioned by this separation of the book from that with which it had been originally connected, it would follow that the arrangement of the Vulg. and the A. V. corresponds more closely than any other to that which we must look on as the original one.

Literature.—Theodoret, *Opp.* ii. p. 286; Jerome, *Opp.* v. 165; Special Commentaries by Calvin (*Prol. in Thren.*); Bullinger (Tigur. 1575); Peter Martyr (Tigur. 1629); Oecolampadius (Argent. 1558); Zuinglius (Tigur. 1544); Maldonatus; Pareau (*Threni Jeremiae*, Lugd. Bat. 1790); Tarnovius (1624); Kalkar (1836); Neumann (*Jeremias u. Klagelieder*, 1858). Translated by Ewald, in *Poet. Büch.* part i. [E. H. P.]

LAMP.[a] 1. That part of the golden candlestick belonging to the Tabernacle which bore the light; also of each of the ten candlesticks placed by Solomon in the Temple before the Holy of Holies (Ex. xxv. 37; 1 K. vii. 49; 2 Chr. iv. 20, xiii. 11; Zech. iv. 2). The lamps were lighted every evening, and cleansed every morning (Ex. xxx. 7, 8; Reland, *Ant. Hebr.* i. v. 9, and vii. 8). The primary sense of light (Gen. xv. 17) gives rise to frequent metaphorical usages, indicating life, welfare, guidance, as *e. g.* 2 Sam. xxi. 17; Ps. cxix. 105; Prov. vi. 23, xiii. 9.

2. A torch or flambeau, such as was carried by the soldiers of Gideon (Judg. vii. 16, 20; comp. xv. 4). See vol. i. p. 695, note.

3. In N. T. λαμπάδες is in A. V., Acts xx. 8, "lights;" in John xviii. 3, "torches;" in Matt. xxv. 1, Rev. iv. 5, "lamps."

Herodotus, speaking of Egyptian lamps used at a festival, describes them as vessels filled with salt and olive oil, with floating wicks, but does not mention the material of the vessels (Herod. ii. 62; Wilkinson, *Anc. Eg.* Abridg. i. 298, ii. 71).

Egyptian Lamp.

The use of lamps fed with oil at marriage processions is alluded to in the parable of the ten virgins (Matt. xxv. 1).

Modern Egyptian lamps consist of small glass vessels with a tube at the bottom containing a cotton-wick twisted round a piece of straw. Some water is poured in first, and then oil. For night-travelling, a lantern composed of waxed cloth strained over a sort of cylinder of wire-rings, and a top and bottom of perforated copper. This would, in form at least, answer to the lamps within pitchers of Gideon. On occasions of marriage the street or quarter where the bridegroom lives is illuminated with lamps suspended from cords drawn across. Sometimes the bridegroom is accompanied to a mosque by men bearing flambeaux, consisting of frames of iron fixed on staves, and filled with burning wood; and on his return, by others bearing frames with many lamps suspended from them (Lane, *Mod. Eg.* i. 202 215, 224, 225, 230; Mrs. Poole, *English. in Eg.* iii. 131). [H. W. P.]

LANCET. This word is found in 1 K. xviii. 28 only. The Hebrew term is *Romach*, which is elsewhere rendered, and appears to mean a javelin, or light spear. [See ARMS, vol. i. p. 110 b.] In the original edition of the A. V. (1611) this meaning is preserved, the word being "lancers."

LANGUAGE. [TONGUES, CONFUSION OF.]

LANGUAGES, SEMITIC. [SHEM.]

LANTERN (φανός) occurs only in John xviii. 3. See *Dict. of Ant.* art. LATERNA.

LAODICE'A (Λαοδίκεια). The two passages in the N. T. where this city is mentioned define its geographical position in harmony with other authorities. In Rev. i. 11, iii. 14, it is spoken of as belonging to the general district which contained Ephesus, Smyrna, Thyatira, Pergamus, Sardis, and Philadelphia. In Col. iv. 13, 15, it appears in still closer association with Colossae and Hierapolis. And this was exactly its position. It was a town of some consequence in the Roman province of ASIA; and it was situated in the valley of the Maeander, on a small river called the Lycus, with COLOSSAE and HIERAPOLIS a few miles distant to the west.

Built, or rather rebuilt, by one of the Seleucid monarchs, and named in honour of his wife, Laodicea became under the Roman government a place of some importance. Its trade was considerable: it lay on the line of a great road; and it was the seat of a *conventus*. From Rev. iii. 17, we should gather it was a place of great wealth. The damage which was caused by an earthquake in the reign of Tiberius (Tac. *Ann.* xiv. 27) was promptly repaired by the energy of the inhabitants. It was soon after this occurrence that Christianity was introduced into Laodicea, not however, as it would seem, through the direct agency of St. Paul. We have good reason for believing that when, in writing from Rome to the Christians of Colossae, he sent a greeting to those of Laodicea, he had not personally visited either place. But the preaching of the Gospel at Ephesus (Acts xviii. 19–xix. 41) must inevitably have resulted in the formation of churches in the neighbouring cities, especially where Jews were settled: and there were Jews in Laodicea (Joseph. *Ant.* xii. 3, §4; xiv. 10, §20). In subsequent times it became a Christian city of eminence, the see of a bishop, and a meeting-place of councils. It is often mentioned by the Byzantine writers. The Mohammedan invaders destroyed it; and it is now a scene of utter desolation: but the extensive ruins near *Denishu* justify all that we read of Laodicea in Greek and Roman writers. Many travellers

[a] נֵר, once נִיר (2 Sam. xxii. 29), from נָאַר, "to shine," Ges. p. 867: λύχνος: *lucerna*.

(Pococke, Chandler, Leake, Arundell, Fellows) have visited and described the place, but the most elaborate and interesting account is that of Hamilton.

One Biblical subject of interest is connected with Laodicea. From Col. iv. 16 it appears that St. Paul wrote a letter to this place (ἡ ἐκ Λαοδικείας) when he wrote the letter to Colossæ. The question arises whether we can give any account of this Laodicean epistle. Wieseler's theory (*Apost. Zeitalter*, p. 450) is that the Epistle to Philemon is meant; and the tradition in the *Apostolical Constitutions* that he was bishop of this see is adduced in confirmation. Another view, maintained by Paley and others, and suggested by a manuscript variation in Eph. i. 1, is that the Epistle to the Ephesians is intended. Ussher's view is that this last epistle was a circular letter sent to Laodicea among other places (see *Life and Epistles of St. Paul*, ii. 488, with Alford's *Prolegomena*, G. T. v. iii. 13-18). None of these opinions can be maintained with much confidence. It may however be said, without hesitation, that the apocryphal *Epistola ad Laodicenses* is a late and clumsy forgery. It exists only in Latin MSS., and is evidently a cento from the Galatians and Ephesians. A full account of it is given by Jones (*On the Canon* ii. 31-49).

The subscription at the end of the First Epistle to Timothy (ἐγράφη ἀπὸ Λαοδικείας, ἥτις ἐστὶ μητρόπολις Φρυγίας τῆς Πακατιανῆς) is of no authority; but it is worth mentioning, as showing the importance of Laodicea. [J. S. H.]

LAODICE'ANS (Λαοδικεῖς: *Laodicenses*), the inhabitants of Laodicea (Col. iv. 16; Rev. iii. 14).

LAPPIDOTH (לַפִּידוֹת, *i. e.* Lappidoth: Λαφιδώθ: *Lapidoth*), the husband of Deborah the prophetess (Judg. iv. 4 only). The word rendered "wife" in the expression "wife of Lapidoth" has simply the force of "woman;" and thus *lappidoth* ("torches") has been by some understood as descriptive of Deborah's disposition, and even of her occupations. [DEBORAH.] But there is no real ground for supposing it to mean anything but wife, or for doubting the existence of her husband. True, the termination of the name is feminine; but this is the case in other names undoubtedly borne by men, as MERENOTH, MAHAZIOTH, &c. [G.]

LAPWING (דוּכִיפַת, *dukiphath*: ἔποψ: *upupa*) occurs only in Lev. xi. 19, and in the parallel passage of Deut. xiv. 18, amongst the list of those birds which were forbidden by the law of Moses to be eaten by the Israelites. Commentators generally agree with the LXX. and Vulg. that the *Hoopoe* is the bird intended, and with this interpretation the Arabic versions[a] coincide: all these three versions give one word, *Hoopoe*, as the meaning of *dukiphath*; but one cannot definitely say whether the Syriac reading,[b] the Targums of Jerusalem, Onkelos, and Jonathan,[c] and the Jewish doctors, indicate any particular bird or not, for they merely appear to resolve the Hebrew word into its component parts. *dukiphath* being by them understood as the "mountain-cock," or "woodland-cock." This translation has, as may be supposed, produced considerable discussion as to the kind of bird represented by these terms—expressions which would, before the date of acknowledged scientific nomenclature, have a very wide meaning. According to Bochart, these four different interpretations have been assigned to *dukiphath*:—1. The Sadducees supposed the bird intended to be the *common hen*, which they therefore refused to eat. 2. Another interpretation understands the *cock of the woods* (*tetrao urogallus*). 3. Other interpreters think the *attagen* is meant. 4. The last interpretation is that which gives the *Hoopoe* as the rendering of the Hebrew word.[d]

The Hoopoe (*Upupa Epops*)

As to the value of 1. nothing can be urged in its favour except that the first part of the word *duk* or *dik* does in Arabic mean a *cock*.[e] 2. With almost as little reason can the *cock of the woods*, or *capercailzie*, be considered to have any claim to be the bird indicated; for this bird is an inhabitant of the northern parts of Europe and Asia, and although it has been occasionally found, according to M. Temmink, as far south as the Ionian Islands, yet such occurrences are rare indeed, and we have no record of its ever having been seen in Syria or Egypt. The *capercailzie* is therefore a bird not at all likely to come within the sphere of the observation of the Jews. 3. As to the third theory, it is certainly at least as much a question what is signified by *attagen*, as by *dukiphath*.[f]

Many, and curious in some instances, are the derivations proposed for the Hebrew word, but the most probable one is that which was alluded to above, viz. the *mountain-cock*. Aeschylus speaks of the *Hoopoe* by name, and expressly calls it the

[a] الهدهد *alhudhud*, from root هدهد, "to moan as a dove." *Hudhud* is the modern Arabic name for the hoopoe. At Cairo the name of this bird is *hidhid* (vid. Forskal, *Descr. Animal.* p. [illegible]).

[b] لاوِيوُ حنا (Syriac), *woodland-cock*.

[c] נֵר מוּרְא (Chaldee), *artifex montis*; German, *bergmeister* (then, *gallus montanus*): from the Rabbinical story of the Hoopoe and the Shâmir (See Adamant, in Appendix, and Buxtorf, *Lex. Chald. Talm.* s. v. נגר.)

[d] There can be no doubt that the *Hoopoe* is the bird intended by *dukiphath*; for the Coptic *Kukupha*, the Syriac *Kikupha*, which stand for the *Upupa Epops*, are almost certainly allied to the Hebrew דּוּכִיפַת *dukiphath*.

[e] ديك, ديكة: *gallina, gallus*.

[f] By *attagen* is here of course meant the ἀττάγας of the Greeks, and the *attagen* of the Romans; not that name as sometimes applied locally to the *ptarmigan*, or *white grouse*.

bird of the rocks (*Fragm.* 291, quoted by Arist *H. A.* ix. 49). Aelian (*N. A.* iii. 26) says that these birds build their nests in *lofty rocks*. Aristotle's words are to the same effect, for he writes, "Now some animals are found in the mountains, as the *hoopoe* for instance" (*H. A.* i. 1). When the two lawsuit-wearied citizens of Athens, Euelpides and Pisthetaerus, in the comedy of the *Birds* of Aristophanes (20, 54), are on their search for the home of Epops, king of birds, their *ornithological* conductors lead them through a wild desert tract *terminated by mountains and rocks*, in which is situated the royal aviary of Epops.

It must, however, be remarked that the observations of the habits of the hoopoe recorded by modern zoologists do not appear to warrant the assertion that it is so pre-eminently a mountain-bird as has been implied above.[g] Marshy ground, ploughed land, wooded districts, such as are near to water, are more especially its favourite haunts; but perhaps more extended observation on its habits may hereafter confirm the accuracy of the statements of the ancients.

The hoopoe was accounted an unclean bird by the Mosaic law, nor is it now eaten[h] except occasionally in those countries where it is abundantly found—Egypt, France, Spain, &c. &c. Many and strange are the stories which are told of the hoopoe in ancient Oriental fable, and some of these stories are by no means to its credit. It seems to have been always regarded, both by Arabians and Greeks, with a superstitious reverence[i]—a circumstance which it owes no doubt partly to its crest (Aristoph. *Birds*, 94; comp. Ov. *Met.* vi. 672), which certainly gives it a most imposing appearance, partly to the length of its beak, and partly also to its habits. "If any one anointed himself with its blood, and then fell asleep, he would see demons suffocating him"—"if its liver were eaten with rue, the eater's wits would be sharpened, and pleasing memories be excited"—are superstitions held respecting this bird. One more fable narrated of the hoopoe is given, because its origin can be traced to a peculiar habit of the bird. The Arabs say that the hoopoe is a betrayer of secrets; that it is able moreover to point out hidden wells and fountains under ground. Now the hoopoe, on settling upon the ground, has a strange and portentous-looking habit of bending the head downwards till the point of the beak touches the ground, raising and depressing its crest at the same time.[k] Hence with much probability arose the Arabic fable.

These stories, absurd as they are, are here mentioned because it was perhaps in a great measure owing, not only to the uncleanly habits of the bird, but also to the superstitious feeling with which the hoopoe was regarded by the Egyptians and heathen generally, that it was forbidden as food to the Israelites, whose affections Jehovah wished to wean from the land of their bondage, to which, as we know, they fondly clung.

The word *Hoopoe* is evidently onomatopoetic, being derived from the voice of the bird, which resembles the words "hoop, hoop," softly but rapidly uttered. The Germans call the bird *Ein Houp*, the French *La Huppe*, which is particularly appropriate, as it refers both to the crest and note of the bird. In Sweden it is known by the name of *Här-Fogel*, the army-bird, because, from its ominous cry, frequently heard in the wilds of the forest, while the bird itself moves off as any one approaches, the common people have supposed that seasons of scarcity and war are impending (Lloyd's *Scand. Advent.* ii. 321).

The *Hoopoe* is an occasional visitor to this country, arriving for the most part in the autumn, but instances are on record of its having been seen in the spring. Col. Hamilton Smith has supposed that there are two Egyptian species of the genus *Upupa*, from the fact that some birds remain permanently resident about human habitations in Egypt, while others migrate: he says that the migratory species is eaten in Egypt, but that the stationary species is considered inedible (Kitto's *Cycl.* art. 'Lapwing'). There is, however, but one species of Egyptian hoopoe known to ornithologists, viz. *Upupa Epops*. Some of these birds migrate northwards from Egypt, but a large number remain all the year round; all, however, belong to the same species. The hoopoe is about the size of the *missel-thrush* (*Turdus viscivorus*). Its crest is very elegant, the long feathers forming it are each of them tipped with black. It belongs to the family *Upupidae*, sub-order *Tenuirostres*, and order *Passeres*. [W. H.]

LASAE'A (Λασαία). Four or five years ago it would have been impossible to give any information regarding this Cretan city, except indeed that it might be presumed (Conybeare and Howson, *St. Paul*, ii. 394, 2nd ed.) to be identical with the "Lisia" mentioned in the *Peutinger Table* as 16 miles to the east of GORTYNA. This corresponds sufficiently with what is said in Acts xxvii. 8 of its proximity to FAIR HAVENS. The whole matter, however, has been recently cleared up. In the month of January, 1856, a yachting party made inquiries at Fair Havens, and were told that the name Lasaea was still given to some ruins a few miles to the eastward. A short search sufficed to discover these ruins, and independent testimony confirmed the name. A full account of the discovery, with a plan, is given in the 2nd ed. of Smith's *Voyage and Shipwreck of St. Paul*, App. iii. pp. 262, 263. Captain Spratt, R.N., had previously observed some remains, which probably represent the harbour of Lasaea (see pp. 80, 82 245). And it ought to be noticed that in the *Descrizione dell' Isola di Candia*, a Venetian MS. of the 16th century, as published by Mr. E. Falkener in the *Museum of Classical Antiquities*, Sept. 1852 (p. 287), a place called Lapsea, with a "temple in ruins," and "other vestiges near the harbour," is

[g] See Macgillivray's *British Birds*, vol. iii. 43; Yarrell, *Brit. B.* ii. 178, 2nd edit.; Lloyd's *Scandinavian Adventures*, ii. 321; Tristram in *Ibis*, vol. i. The chief grounds for all the filthy habits which have been ascribed to this much-maligned bird are to be found in the fact that it resorts to dunghills, &c., in search of the worms and insects which it finds there.

[h] A writer in *Ibis*, vol. i. p. 49, says, "We found the *Hoopoe* a very good bird to eat."

[i] Such is the case even to this day. The Rev. H. B. Tristram, who visited Palestine in the spring of 1858, says of the *Hoopoe* (*Ibis*, i. 27): "The Arabs have a superstitious reverence for this bird, which they believe to possess marvellous medicinal qualities, and call it 'the Doctor.' Its head is an indispensable ingredient in all charms, and in the practice of witchcraft."

[k] This habit of *inspecting* probably first suggested the Greek word ἔποψ.

mentioned as being close to Fair Havens. This also is undoubtedly St. Luke's Lasaea; and we see how needless it is (with Cramer, *Ancient Greece*, iii. 374, and the *Edinburgh Review*, No. clv. 176) to resort to Lachmann's reading, "Alassa," or to the "Thalassa" of the Vulgate. [CRETE.] [J. S. H.]

LA'SHA (לָשָׁע, *i. e.* Lesha: Λασά: *Lasa*), a place noticed in Gen. x. 19 only, as marking the limit of the country of the Canaanites. From the order in which the names occur, combined with the expression "*even unto* Lasha," we should infer that it lay somewhere in the south-east of Palestine. Its exact position cannot, in the absence of any subsequent notice of it, be satisfactorily ascertained, and hence we can neither absolutely accept or reject the opinion of Jerome and other writers, who identify it with Callirhoë, a spot famous for hot springs near the eastern shore of the Dead Sea. It may indeed be observed, in corroboration of Jerome's view, that the name Lasha, which signifies, according to Gesenius (*Thes.* p. 764), "a fissure," is strikingly appropriate to the deep chasm of the *Zerka Main*, through which the waters of Callirhoë find an outlet to the sea (Lynch's *Exped.* p. 370). No town, however, is known to have existed in the neighbourhood of the springs, unless we place there Machaerus, which is described by Josephus (*B. J.* vii. 6, §3) as having hot springs near it. That there was some sort of a settlement at Callirhoë may perhaps be inferred from the fact that the springs were visited by Herod during his last illness (Joseph. *Ant.* xvii. 6, §5); and this probability is supported by the discovery of tiles, pottery, and coins on the spot. But no traces of buildings have as yet been discovered; and the valley is so narrow as not to offer a site for any thing like a town (Irby and Mangles (ch. viii. June 8). [W. L. B.]

LASHA'RON (לָשָׁרוֹן, *i. e.* Lasharon: LXX. omits: *Saron*; but in the Benedictine text *Lassaron*), one of the Canaanite towns whose kings were killed by Joshua (Josh. xii. 18). Some difference of opinion has been expressed as to whether the first syllable is an integral part of the name or the Hebrew possessive particle. (See Keil, *Josua*, ad loc.) But there seems to be no warrant for supposing the existence of a particle before this one name, which certainly does not exist before either of the other thirty names in the list. Such at least is the conclusion of Bochart (*Hieros.* i. ch. 31), Reland (*Pal.* 871), and others, a conclusion supported by the reading of the Targum,* and the Arabic version, and also by Jerome, if the Benedictine text can be relied on. The opposite conclusion of the Vulgate, given above, is adopted by Gesenius (*Thes.* 642 *b*), but not on very clear grounds, his chief argument being apparently that, as the name of a town, Sharon would not require the article affixed, which, as that of a district, it always bears. But this appears to be begging the question. The name has vanished from both MSS. of the LXX., unless a trace exists in the Ὀφεστη-σαρών of the Vat. [G.]

LAS'THENES (Λασθένης; cf. Ad-μαχος), an officer who stood high in the favour of Demetrius II. Nicator. He is described as "cousin" (συγγενής, 1 Macc. xi. 31), and "father" (1 Macc. xi. 32; Jos. *Ant.* xiii. 3, §9) of the king. Both words may be taken as titles of high nobility (comp. Grimm on 1 Macc. x. 89; Diod. xvii. 59; Ges. *Thes. s. v.* אָב, §4). It appears from Josephus (*Ant.* xiii. 4, §3) that he was a Cretan, to whom Demetrius was indebted for a large body of mercenaries (cf. 1 Macc. x. 67), when he asserted his claim to the Syrian throne. The service which he thus rendered makes it likely (Vales. *ad loc.*) that he was the powerful favourite whose evil counsels afterwards issued in the ruin of his master (Diod. *Exc.* xxxii. p. 592). But there is not the slightest ground for identifying him with the nameless *Cnidian* to whose charge Demetrius I. committed his sons (Just. xxxv. 2).

[B. F. W.]

LATCHET, the thong or fastening by which the sandal was attached to the foot. The English word is apparently derived from the A. Saxon *laeccan*, "to catch" or "fasten" (Old Eng. "to latch"), as "hatchet" from *hacc an*, "to hack;" whence "latch," the fastening of a door, "lock," and others. The Fr. *lacet* approaches most nearly in form to the present word. The Hebrew שְׂרוֹךְ, *seróc*, is derived from a root which signifies "to twist." It occurs in the proverbial expression in Gen. xiv. 23, and is there used to denote something trivial or worthless. Gesenius (*Thes.* s. v. חוּט) compares the Lat. *hilum* = *filum*, and quotes two Arabic proverbs from the Hamasa and the Kamûs, in which a corresponding word is similarly employed. In the poetical figure in Is. v. 27 the "latchet" occupies the same position with regard to the shoes as the girdle to the long flowing Oriental dress, and was as essential to the comfort and expedition of the traveller. Another semi-proverbial expression in Luke iii. 16 points to the fact that the office of bearing and unfastening the shoes of great personages fell to the meanest slaves. [SHOE.] [W. A. W.]

LATIN, the language spoken by the Romans, is mentioned only in John xix. 20, and Luke xxiii. 38; the former passage being a translation of Ῥωμαϊστί, "in the Roman tongue," i. e. *Latin*; and the latter of the adjective Ῥωμαϊκοῖς (γράμμασιν).

LATTICE. The rendering in A. V. of three Hebrew words.

1. אֶשְׁנָב, *eshnâb*, which occurs but twice, Judg. v. 28, and Prov. vii. 6, and in the latter passage is translated "casement" in the A. V. In both instances it stands in parallelism with "window." Gesenius, following Schultens, connects it with an Arab. root, which signifies "to be cool," esp. of the day, and thus attaches to *eshnâb* the signification of a "latticed window," through which the cool breezes enter the house, such as is seen in the illustrations to the article HOUSE (vol. i. p. 837). But Fuerst and Meier attach to the root the idea of twisting, twining, and in this case the word will be synonymous with the two following, which are rendered by the same English term, "lattice," in the A. V. The LXX. in Judg. v. 28 render *eshnâb* by τοξικόν, which is explained by Jerome (*ad Ex.* xl. 16) to mean a small arrow-shaped aperture, narrow on the outside, but widening inwards, by which light is admitted. Others conjecture that it denoted a narrow window, like those in the castles of the Middle Ages, from which the archers could discharge their arrows in safety. It would then correspond with the "shot-window" of Chaucer ("Miller's Tale"), according to the interpretation which some give to that obscure phrase.

* מַלְכָּא דְלַשָּׁרוֹן = "king of Lassharon."

2. חֲרַכִּים, *khăraccîm* (Cant. ii. 9), is apparently synonymous with the preceding, though a word of later date. The Targum gives it, in the Chaldee form, as the equivalent of *eshnâb* in Prov. vii. 6. Fuerst (*Conc.* s. v.), and Michaelis before him, assign to the root the same notion of twisting or weaving, so that *khăraccîm* denotes a network or jalousie before a window.

3. שְׂבָכָה, *sebâcâh*, is simply "a network" placed before a window or balcony. Perhaps the network through which Ahaziah fell and received his mortal injury was on the parapet of his palace (2 K. i. 2). [HOUSE, vol. i. 838 *b*, 839 *a*.] The root involves the same idea of weaving or twisting as in the case of the two preceding words. *Sebâcâh* is used for "a net" in Job xviii. 8, as well as for the network ornaments on the capitals of the columns in the Temple. [WINDOW.] [W. A. W.]

LAVER.[a] 1. In the Tabernacle, a vessel of brass containing water for the priests to wash their hands and feet before offering sacrifice. It stood in the court between the altar and the door of the Tabernacle, and, according to Jewish tradition, a little to the south (Ex. xxx. 19, 21; Reland, *Ant. Hebr.* pt. i. ch. iv. 9; Clemens, *de Labro Aeneo*, iii. 9; ap. Ugolini, *Thes.* vol. xix.). It rested on a basis,[b] *i. e.* a foot, though by some explained to be a cover (Clemens, ibid. c. iii. 5), of copper or brass, which, as well as the laver itself, was made from the mirrors[c] of the women who assembled[d] at the door of the Tabernacle-court (Ex. xxxviii. 8). The notion held by some Jewish writers, and reproduced by Franzius, Bähr (*Symb.* i. 484), and others, founded on the omission of the word "women," that the brazen vessel, being polished, served as a mirror to the Levites, is untenable.[e]

The form of the laver is not specified, but may be assumed to have been circular. Like the other vessels belonging to the Tabernacle, it was, together with its "foot," consecrated with oil (Lev. viii. 10, 11). No mention is found in the Hebrew text of the mode of transporting it, but in Num. iv. 14 a passage is added in the LXX., agreeing with the Samaritan Pent. and the Samaritan version, which prescribes the method of packing it, viz. in a purple cloth, protected by a skin covering. As no mention is made of any vessel for washing the flesh of the sacrificial victims, it is possible that the laver may have been used for this purpose also (Reland, *Ant. Hebr.* i. iv. 9).

2. In Solomon's Temple, besides the great molten sea, there were ten lavers[f] of brass, raised on bases[g] (1 K. vii. 27, 39), five on the N. and S. sides respectively of the court of the priests. Each laver contained 40 of the measures called "bath" (χόας, LXX. and Josephus). They were used for washing the animals to be offered in burnt-offerings (2 Chr. iv. 6; Joseph. *Ant.* viii. 3, §6). The bases were mutilated by Ahaz, and carried away as plunder, or at least what remained of them, by Nebuzar-adan, after the capture of Jerusalem (2 K. xvi. 17; xxv. 13). No mention is made in Scripture of the existence of the lavers in the second Temple, nor by Josephus in his account of Herod's restoration (Joseph. *B. J.* v. 5). [MOLTEN SEA.]

The dimensions of the bases with the lavers, as given in the Hebrew text, are 4 cubits in length and breadth, and 3 in height. The LXX. gives 4×4×6 in height. Josephus, who appears to have followed a var. reading of the LXX., makes them 5 in length, 4 in width, and 6 in height (1 K. vii 28; Thenius, *ad loc.*; Joseph. *Ant.* viii. 3, §3) There were to each 4 wheels of 1½ cubit in diameter, with spokes, &c., all cast in one piece. The principal parts requiring explanation may be thus enumerated:—(*a*) "Borders,"[h] probably panels. Gesenius (*Thes.* 938) supposes these to have been ornaments like square shields with engraved work. (*b*) "Ledges,"[i] joints in corners of bases or fillets covering joints.[k] (*c*) "Additions,"[m] probably festoons; Lightfoot translates, "margines oblique descendentes." (*d*) Plates,[n] probably axles, cast in the same piece as the wheels. (*e*) Undersetters,[o] either the naves of the wheels, or a sort of handles for moving the whole machine; Lightfoot renders "columnae fulcientes lavacrum." (*f*) Naves.[p] (*g*) Spokes.[q] (*h*) Felloes.[r] (*i*) Chapiter,[s] perhaps the rim of the circular opening ("mouth," ver. 31) in the convex top. (*k*) A round compass,[t] perhaps the convex roof of the base. To these parts Josephus adds chains, which may probably be the festoons above mentioned (*Ant.* viii. 3, §6).

Thenius, with whom Keil in the main agrees, both of them differing from Ewald, in a minute examination of the whole passage, but not without some transposition, chiefly of the greater part of ver. 31 to ver. 35, deduces a construction of the

[a] כִּיּוֹר and כִּיֹּר, from כּוּר, "to boil," Ges. p. 671: λουτήρ: *labrum*.

[b] כֶּן, βάσις, *basis*, and so also A. V.

[c] מַרְאוֹת, κάτοπτρα, *specula*.

[d] LXX. τῶν νηστευουσῶν.

[e] See the parallel passage, 1 Sam. ii. 22, where נָשִׁים, γυναικῶν, is inserted; Gesenius on the prep. ב, p. 172; Keil, *Bibl. Arch.* pt. i. c. 1, §19; Glassius, *Phil. Sacr.* i. p. 580, ed. Dathe; Lightfoot, *Descr. Templ.* c. 37, 1; Jennings, *Jew. Antiq.* p. 302; Knöbel, *Kurtz. Exeg. Handb.* Exod. xxxviii. Philo, *Vit. Mos.* iii. 15, ii. 136, ed. Mangey.

[f] כִּיֹּרוֹת.

[g] מְכֹנוֹת, pl. of מְכוֹנָה or מְכֹנָה, from כּוּן, "stand upright," Ges. pp. 665, 670; μεχωνώθ; *bases*.

[h] מִסְגְּרוֹת; συγκλείσματα; *scripturae*.

[i] שְׁלַבִּים, ἐξοχώματα, *junctiurae*, from שָׁלַב, "cut in notches," Ges. p. 1411.

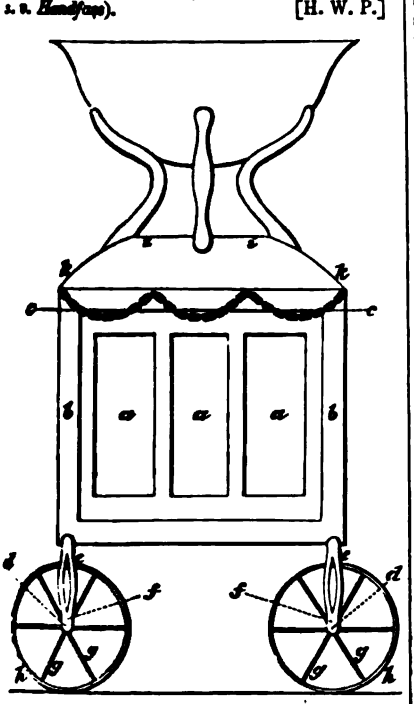
[k] Josephus says: κιονίσκοι τετράγωνοι, τὰ πλευρὰ τῆς βάσεως ἐξ ἑκατέρου μέρους ἐν αὐτοῖς ἔχοντες ἐξῃρμοσμένα.

[m] לְיוֹת, from לָוָה, "twine," Ges. p. 746; χῶραι; *lorae*; whence Thenius suggests λῶροι or λῶρα as the true reading.

[n] סְרָנִים, προέχοντα, *axes*, Ges. 972; Lightfoot, *massae aereae tetragonae*.

[o] כַּתֵּפוֹת, ὠμίαι, *humeruli*, Ges. 724.

[p] חִשּׁוּרִים, *modioli*; and



[q] חִשֻּׁקִים, *radii*; the two words combined in LXX. ἡ πραγματεία, Ges. p. 536; Schleusner, *Lex. V. T.*, πραγμ.

[r] גַּבִּים, νῶτοι, *canthi*, Ges. p. 256.

[s] כֹּתֶרֶת, κεφαλίς, *summitas*, Ges. p. 725.

[t] עֻגֹל סָבִיב, Ges. 935, (¶9; στρόγγυλον κύκλῳ *rotunditas*.

bases and lavers, which seems fairly to reconcile the very great difficulties of the subject. Following chiefly his description, we may suppose the base to have been a quadrangular hollow frame, connected at its corners by pilasters (ledges), and moved by 4 wheels or high castors, one at each corner, with handles (plates) for drawing the machine. The sides of this frame were divided into 3 vertical panels or compartments (borders), ornamented with bas-reliefs of lions, oxen, and cherubim. The top of the base was convex, with a circular opening of 1½ cubit diameter. The top itself was covered with engraved cherubim, lions, and palm-trees or branches. The height of the convex top from the upper plane of the base was ½ cubit, and the space between this top and the lower surface of the laver ½ cubit more. The laver rested on supports (undersetters) rising from the 4 corners of the base. Each laver contained 40 "baths," or about 300 gallons. Its dimensions, therefore, to be in proportion to 7 feet (4 cubits, ver. 38) in diameter, must have been about 30 inches in depth. The great height of the whole machine was doubtless in order to bring it near the height of the altar (2 Chr. iv. 1; Arias Montanus, *de Templi Fabrica, Crit. Sacr.* viii. 626; Lightfoot, *Descr. Templi*, c. xxxvii. 3, vol. i. 646; Thenius, in *Kurtz. Exeg. Handb.* on 1 K. vii., and App. p. 41; Ewald, *Geschichte*, iii. 313; Keil, *Handb. der Bibl. Arch.* §24, p. 128, 129; Winer, s. v. *Handfässer*). [H. W. P.]

a, borders; b, ledges; c, additions; d, plates; e, undersetters; f, bows; g, spokes; h, felloes; i, chapiter; k, round compass.

LAW (תּוֹרָה: Νόμος). The word is properly used, in Scripture as elsewhere, to express a definite commandment laid down by any recognised authority. The commandment may be general, or (as in Lev. vi. 9, 14, &c., "the law of the burnt-offering," &c.) particular in its bearing; the authority either human or divine. But when the word is used with the article, and without any words of limitation, it refers to the expressed will of God, and, in nine cases out of ten, to the Mosaic Law, or to the Pentateuch, of which it forms the chief portion.

The Hebrew word (derived from the root יָרָה, "to point out," and so "to direct and lead") lays more stress on its moral authority, as teaching the truth, and guiding in the right way; the Greek Νόμος (from νέμω, "to assign or appoint"), on its constraining power, as imposed and enforced by a recognised authority. But in either case it is a commandment proceeding from without, and distinguished from the free action of its subjects, although not necessarily opposed thereto.

The sense of the word, however, extends its scope, and assumes a more abstract character in the writings of St. Paul. Νόμος, when used by him with the article, still refers in general to the Law of Moses; but when used without the article, so as to embrace any manifestation of "Law," it includes all powers which act on the will of man by compulsion, or by the pressure of external motives, whether their commands be or be not expressed in definite forms. This is seen in the constant opposition of ἔργα νόμου ("works done under the constraint of law") to faith, or "works of faith," that is, works done freely by the internal influence of faith. A still more remarkable use of the word is found in Rom. vii. 23, where the power of evil over the will, arising from the corruption of man, is spoken of as a "law of sin," that is, an unnatural tyranny proceeding from an evil power without.

The occasional use of the word "law" (as in Rom. iii. 27, "law of faith;" in vii. 23, "law of my mind," τοῦ νοός; in viii. 2, "law of the spirit of life;" and in Jam. i. 25, ii. 12, "a perfect law, the law of liberty") to denote an *internal* principle of action, does not really militate against the general rule. For in each case it will be seen, that such principle is spoken of in contrast with some formal law, and the word "law" is consequently applied to it "improperly," in order to mark this opposition, the qualifying words which follow guarding against any danger of misapprehension of its real character

It should also be noticed that the title "the Law" is occasionally used loosely to refer to the whole of the Old Testament (as in John x. 34, referring to Ps. lxxxii. 6; in John xv. 25, referring to Ps. xxxv. 19; and in 1 Cor. xiv. 21, referring to Is. xxviii. 11, 12). This usage is probably due, not only to desire of brevity and to the natural prominence of the Pentateuch, but also to the predominance in the older Covenant (when considered separately from the New, for which it was the preparation) of an external and legal character. [A. B.]

LAW OF MOSES. It will be the object of this article, not to enter into the history of the giving of the Law (for which see MOSES, THE EXODUS, &c.), nor to examine the authorship of the books in which it is contained (for which see PENTATEUCH, EXODUS, &c.), nor to dwell on particular ordinances, which are treated of under their respective heads; but to give a brief analysis of its substance, to point out its main principles, and to explain the position which it occupies in the progress of Divine Revelation. In order to do this

the more clearly, it seems best to speak of the Law, 1st, in relation to the past 2ndly, in its own intrinsic character; and, 3rdly, in its relation to the future.

(I.) (*a.*) In reference to the past, it is all-important, for the proper understanding of the Law, to remember its *entire dependence on the Abrahamic Covenant*, and its adaptation thereto (see Gal. iii. 17-24). That covenant had a twofold character. It contained the "spiritual promise" of the Messiah, which was given to the Jews as representatives of the whole human race, and as guardians of a treasure in which "all families of the earth should be blessed." This would prepare the Jewish nation to be the centre of the unity of all mankind. But it contained also the temporal promises subsidiary to the former, and needed in order to preserve intact the nation, through which the race of man should be educated and prepared for the coming of the Redeemer. These promises were special, given distinctively to the Jews as a nation, and, so far as they were considered in themselves, calculated to separate them from other nations of the earth. It follows that there should be in the Law a corresponding duality of nature. There would be much in it of the latter character, much (that is) peculiar to the Jews, local, special, and transitory; but the fundamental principles on which it was based must be universal, because expressing the will of an unchanging God, and springing from relations to Him, inherent in human nature, and therefore perpetual and universal in their application.

(*b.*) The nature of this *relation of the Law to the promise* is clearly pointed out. The belief in God as the Redeemer of man, and the hope of His manifestation as such in the person of the Messiah, involved the belief that the Spiritual Power must be superior to all carnal obstructions, and that there was in man a spiritual element which could rule his life by communion with a Spirit from above. But it involved also the idea of an antagonistic Power of Evil, from which man was to be redeemed, existing in each individual, and existing also in the world at large. The promise was the witness of the one truth, the Law was the declaration of the other. It was "added because of transgressions." In the individual, it stood between his better and his worser self; in the world, between the Jewish nation, as the witness of the spiritual promise, and the heathendom, which groaned under the power of the flesh. It was intended, by the gift of guidance and the pressure of motives, to strengthen the weakness of good, while it curbed directly the power of evil. It followed inevitably, that, in the individual, it assumed somewhat of a coercive, and, as between Israel and the world, somewhat of an antagonistic and isolating character; and hence that, viewed without reference to the promise (as it was viewed by the later Jews), it might actually become a hindrance to the true revelation of God, and to the mission for which the nation had been made a "chosen people."

(*c.*) Nor is it less essential to remark the *period of the history* at which it was given. It marked and determined the transition of Israel from the condition of a tribe to that of a nation, and its definite assumption of a distinct position and office in the history of the world. It is on no unreal metaphor that we base the well-known analogy between the stages of individual life and those of national or universal existence. In Israel the patriarchal time was that of childhood, ruled chiefly through the affections and the power of natural relationship, with rules few, simple, and unsystematic. The national period was that of youth, in which this indirect teaching and influence give place to definite assertions of right and responsibility, and to a system of distinct commandments, needed to control its vigorous and impulsive action. The fifty days of their wandering alone with God in the silence of the wilderness represent that awakening to the difficulty, the responsibility, and the nobleness of life, which marks the "putting away of childish things." The Law is the sign and the seal of such an awakening.

(*d.*) Yet, though new in its general conception, it was probably *not wholly new in its materials*. Neither in His material nor His spiritual providence does God proceed *per saltum*. There must necessarily have been, before the Law, commandments and revelations of a fragmentary character, under which Israel had hitherto grown up. Indications of such are easily found, both of a ceremonial and moral nature; as, for example, in the penalties against murder, adultery, and fornication (Gen. ix. 6, xxxviii. 24), in the existence of the Levirate law (Gen. xxxviii. 8), in the distinction of clean and unclean animals (Gen. viii. 20), and probably in the observance of the Sabbath (Ex. xvi. 23, 27-29). But, even without such indications, our knowledge of the existence of Israel as a distinct community in Egypt would necessitate the conclusion, that it must have been guided by some laws of its own, growing out of the old patriarchal customs, which would be preserved with Oriental tenacity, and gradually becoming methodised by the progress of circumstances. Nor would it be possible for the Israelites to be in contact with an elaborate system of ritual and law, such as that which existed in Egypt, without being influenced by its general principles, and, in less degree, by its minuter details. As they approached nearer to the condition of a nation they would be more and more likely to modify their patriarchal customs by the adoption from Egypt of laws which were fitted for national existence. This being so, it is hardly conceivable that the Mosaic legislation should have embodied none of these earlier materials. It is clear, even to human wisdom, that the only constitution, which can be efficient and permanent, is one which has grown up slowly, and so been assimilated to the character of a people. It is the peculiar mark of legislative genius to mould by fundamental principles, and animate by a higher inspiration, materials previously existing in a cruder state. The necessity for this lies in the nature, not of the legislator, but of the subjects; and the argument therefore is but strengthened by the acknowledgment in the case of Moses of a divine and special inspiration. So far therefore as they were consistent with the objects of the Jewish law, the customs of Palestine and the laws of Egypt would doubtless be traceable in the Mosaic system.

(*e.*) In close connexion with and almost in consequence of this reference to antiquity we find an *accommodation of the Law* to the temper and circumstances of the Israelites, to which our Lord refers in the case of divorce (Matt. xix. 7, 8) as necessarily interfering with its absolute perfection. In many cases it rather should be said to guide and modify existing usages than actually to sanction them; and the ignorance of their existence may lead to a conception of its ordinances not only

erroneous, but actually the reverse of the truth. Thus the punishment of filial disobedience appears severe (Deut. xxi. 18-21); yet when we refer to the extent of parental authority in a patriarchal system, or (as at Rome) in the earlier periods of national existence, it appears more like a limitation of absolute parental authority by an appeal to the judgment of the community. The Levirate Law again appears (see Mich. *Mos. Recht*, bk. iii. ch. 6, art. 98) to have existed in a far more general form in the early Asiatic peoples, and to have been rather limited than favoured by Moses. The law of the Avenger of blood is a similar instance of merciful limitation and distinction in the exercise of an immemorial usage, probably not without its value and meaning, and certainly too deep-seated to admit of any but gradual extinction. Nor is it less noticeable that the degree of prominence, given to each part of the Mosaic system, has a similar reference to the period at which the nation had arrived. The ceremonial portion is marked out distinctly and with elaboration; the moral and criminal law is clearly and sternly decisive; even the civil law, so far as it relates to individuals, is systematic: because all these were called for by the past growth of the nation, and needed in order to settle and develope its resources. But the political and constitutional law is comparatively imperfect; a few leading principles are laid down, to be developed hereafter; but the law is directed rather to sanction the various powers of the state, than to define and balance their operations. Thus the existing authorities of a patriarchal nature in each tribe and family are recognised; while side by side with them is established the priestly and Levitical power, which was to supersede them entirely in sacerdotal, and partly also in judicial functions. The supreme civil power of a "Judge," or (hereafter) a King, is recognised distinctly, although only in general terms, indicating a sovereign and summary jurisdiction (Deut. xvii. 14-20); and the prophetic office, in its political as well as its moral aspect, is spoken of still more vaguely as future (Deut. xviii. 15-22). These powers, being recognised, are left, within due limits, to work out the political system of Israel, and to ascertain by experience their proper spheres of exercise. On a careful understanding of this adaptation of the Law to the national growth and character of the Jews (and of a somewhat similar adaptation to their climate and physical circumstances) depends the correct appreciation of its nature, and the power of distinguishing in it what is local and temporary from that which is universal.

(*f*.) In close connexion with this subject we observe also *the gradual process by which the Law was revealed* to the Israelites. In Ex. xx.-xxiii., in direct connexion with the revelation from Mount Sinai, that which may be called the rough outline of the Mosaic Law is given by God, solemnly recorded by Moses, and accepted by the people. In Ex. xxv.-xxxi. there is a similar outline of the Mosaic ceremonial. On the basis of these it may be conceived that the fabric of the Mosaic system gradually grew up under the requirements of the time. In certain cases indeed (as *e. g.* in Lev. x. 1, 2, compared with 8-11; Lev. xxiv. 11-16; Num. ix. 6-12; xv. 32-41; xxvii. 1-11 compared with xxxvi. 1-12) we actually see how general rules, civil, criminal, and ceremonial, originated in special circumstances; and the unconnected nature of the records of laws in the earlier books suggests the idea that this method of legislation extended to many other cases.

The first revelation of the Law in anything like a perfect form is found in the book of Deuteronomy, at a period when the people, educated to freedom and national responsibility, were prepared to receive it, and carry it with them to the land which was now prepared for them. It is distinguished by its systematic character and its reference to first principles; for probably even by Moses himself, certainly by the people, the Law had not before this been recognised in all its essential characteristics, and to it we naturally refer in attempting to analyze its various parts. [DEUTERONOMY.] Yet even then the revelation was not final; it was the duty of the prophets to amend and explain it in special points (as in the well-known example in Ex. xviii.), and to bring out more clearly its great principles, as distinguished from the external rules in which they were embodied; for in this way, as in others, they prepared the way of Him, who "came to fulfil" (πληρῶσαι) the Law of old time.

The relation, then, of the Law to the Covenant, its accommodation to the time and circumstances of its promulgation, its adaptation of old materials, and its gradual development, are the chief points to be noticed under the first head.

(II.) In examining the nature of the Law in itself, it is customary to divide it into the Moral, Political, and Ceremonial. But this division, although valuable, if considered as a distinction merely subjective (as enabling us, that is, to conceive the objects of Law, dealing as it does with man in his social, political, and religious capacity), is wholly imaginary, if regarded as an objective separation of various classes of Laws. Any single ordinance might have at once a moral, a ceremonial, and a political bearing; and in fact, although in particular cases one or other of these aspects predominated, yet the whole principle of the Mosaic institutions is to obliterate any such supposed separation of laws, and refer all to first principles, depending on the Will of God and the nature of man.

In giving an analysis of the substance of the Law, it will probably be better to treat it, as any other system of laws is usually treated, by dividing it into—(1) Laws Civil; (2) Laws Criminal; (3) Laws Judicial and Constitutional; (4) Laws Ecclesiastical and Ceremonial.

(I.) LAWS CIVIL.

(A) OF PERSONS.

(*a*) FATHER AND SON.

The power of a Father to be held sacred; cursing, or smiting (Ex. xxi. 15, 17; Lev. xx. 9), or stubborn and wilful disobedience to be considered capital crimes. But uncontrolled power of life and death was apparently refused to the father, and vested only in the congregation (Deut. xxi. 18-21).

Right of the first-born to a double portion of the inheritance not to be set aside by partiality (Deut. xxi. 15-17).[a]

Inheritance by Daughters to be allowed in default of sons, provided (Num. xxvii. 6-8, comp. xxxvi.) that heiresses married in their own tribe.

Daughters unmarried to be entirely dependent on their father (Num. xxx. 3-5).

[a] For an example of the authority of the first-born see 1 Sam. xx. 29 ("my brother, he hath commanded me to be there").

(*b*) HUSBAND AND WIFE.

The power of a Husband to be so great that a wife could never be *sui juris*, or enter independently into any engagement, even before God (Num. xxx. 6-15). A widow or divorced wife became independent, and did not again fall under her father's power (ver. 9).

Divorce (for uncleanness) allowed, but to be formal and irrevocable (Deut. xxiv. 1-4).

Marriage within certain degrees forbidden (Lev. xviii. &c.).

A Slave Wife, whether bought or captive, not to be actual property, nor to be sold; if ill-treated, to be *ipso facto* free (Ex. xxi. 7-9; Deut. xxi. 10-14).

Slander against a wife's virginity, to be punished by fine, and by deprival of power of divorce; on the other hand, ante-connubial uncleanness in her to be punished by death (Deut. xxii. 13-21).

The raising up of seed (Levirate law) a formal right to be claimed by the widow, under pain of infamy, with a view to preservation of families (Deut. xxv. 5-10).

(*c*) MASTER AND SLAVE.

Power of Master so far limited, that death under actual chastisement was punishable (Ex. xxi. 20); and maiming was to give liberty *ipso facto* (ver. 26, 27).

The Hebrew Slave to be freed at the sabbatical year,[b] and provided with necessaries (his wife and children to go with him only if they came to his master with him), unless by his own formal act he consented to be a perpetual slave (Ex. xxi. 1-6; Deut. xv. 12-18). In any case (it would seem) to be freed at the jubilee (Lev. xxv. 10), with his children. If sold to a resident alien, to be always redeemable, at a price proportional to the distance of the jubilee (Lev. xxv. 47-54).

Foreign Slaves to be held and inherited as property for ever (Lev. xxv. 45, 46); and fugitive slaves from foreign nations not to be given up (Deut. xxiii. 15).

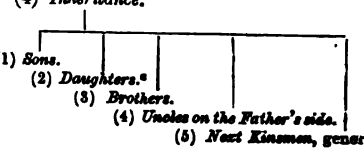
(*d*) STRANGERS.

They seem never to have been *sui juris*, or able to protect themselves, and accordingly protection and kindness towards them are enjoined as a sacred duty (Ex. xxii. 21; Lev. xix. 33, 34).

(B) LAW OF THINGS.

(*a*) LAWS OF LAND (AND PROPERTY).

(1) *All Land to be the property of God alone*, and its holders to be deemed His tenants (Lev. xxv. 23).



(2) *All sold Land* therefore to *return to its original owners* at the jubilee, and the price of sale to be calculated accordingly; and redemption on equitable terms to be allowed at all times (xxv. 25-27).

A House sold to be redeemable within a year; and, if not redeemed, to pass away altogether (xxv. 29, 30).

But the Houses of the Levites, or those in unwalled villages to be redeemable at all times, in the same way as land; and the Levitical suburbs to be inalienable (xxv. 31-34).

(3) *Land or Houses sanctified*, or tithes, or unclean firstlings to be capable of being redeemed, at $\frac{5}{5}$ value (calculated according to the distance from the jubilee-year by the priest); if devoted by the owner and unredeemed, to be hallowed at the jubilee for ever, and given to the priests; if only by a possessor, to return to the owner at the jubilee (Lev. xxvii. 14-34).

(4) *Inheritance.*

(*b*) LAWS OF DEBT.

(1) *All Debts* (to an Israelite) to be released at the 7th (sabbatical) year; a blessing promised to obedience, and a curse on refusal to lend (Deut. xv. 1-11).

(2) *Usury* (from Israelites) not to be taken (Ex. xxii. 25-27; Deut. xxiii. 19, 20).

(3) *Pledges* not to be insolently or ruinously exacted (Deut. xxiv. 6, 10-13, 17, 18).

(*c*) TAXATION.

(1) *Census-money*, a poll-tax (of a half-shekel), to be paid for *the service of the tabernacle* (Ex. xxx. 12-16).

All spoil in war to be halved; of the combatant's half, $\frac{1}{500}$th, of the people's, $\frac{1}{50}$th, to be paid for a "heave-offering" to Jehovah.

(2) *Tithes.*

(*a*) *Tithes of all produce* to be given for maintenance of the Levites (Num. xviii. 20-24).

(Of this $\frac{1}{10}$th to be paid as a heave-offering (for maintenance of the priests) 24-32).

(*β*) *Second Tithe* to be bestowed in religious feasting and charity, either at the Holy Place, or every 3rd year at home (?) (Deut. xiv. 22-28).

(*γ*) *First-Fruits* of corn, wine, and oil (at least $\frac{1}{60}$th, generally $\frac{1}{10}$th, for the priests) to be offered at Jerusalem, with a solemn declaration of dependence on God the King of Israel (Deut. xxvi. 1-15; Num. xviii. 12, 13).

Firstlings of clean beasts; the redemption-money (5 shekels) of man, and ($\frac{1}{2}$ shekel, or 1 shekel) of unclean beasts, to be given to the priests after sacrifice (Num. xviii. 15-18).

(3) *Poor-Laws.*

(*a*) *Gleanings* (in field or vineyard) to be a legal right of the poor (Lev. xix. 9, 10; Deut. xxiv. 19-22).

(*β*) *Slight Trespass* (eating on the spot) to be allowed as legal (Deut. xxiii. 24, 25).

(*γ*) *Second Tithe* (see 2 *β*) to be given in charity.

(*δ*) *Wages to be paid day by day* (Deut. xxiv. 15).

(4) *Maintenance of Priests* (Num. xviii. 8-32).

(*a*) *Tenth of Levites' Tithe.* (See 2 *a*).

(*β*) *The heave and wave-offerings* (breast and right shoulder of all peace-offerings).

(*γ*) *The meat and sin-offerings*, to be eaten solemnly, and only in the holy place.

(*δ*) *First-Fruits* and redemption money. (See 2 *γ*).

[b] The difficulty of enforcing this law is seen in Jer. xxxiv. 8-16.

[a] Heiresses to marry in their own tribe (Num. xxvii. 6-8, xxxvi.).

(c) *Price of all devoted things*, unless specially given for a sacred service. A man's service, or that of his household, to be redeemed at 50 shekels for man, 30 for woman, 20 for boy, and 10 for girl.

(II.) Laws Criminal.

(A) Offences against God (of the nature of treason).

1st Commend. Acknowledgment of false gods (Ex. xxii. 20), as *e. g.* Moloch (Lev. xx. 1-5), and generally all *idolatry* (Deut. xiii., xvii. 2-5).

2nd Command. *Witchcraft and false prophecy* (Ex. xxii. 18; Deut. xviii. 9-22; Lev. xix. 31).

3rd Command. *Blasphemy* (Lev. xxiv. 15, 16).

4th Command. *Sabbath-breaking* (Num. xv. 32-36).

Punishment in all cases, death by stoning. Idolatrous cities to be utterly destroyed.

(B) Offences against Man.

5th Command. *Disobedience to* or cursing or smiting of *parents* (Ex. xxi. 15, 17; Lev. xx. 9; Deut. xxi. 18-21), to be punished by death by stoning, publicly adjudged and inflicted; so also of disobedience to the priests (as judges) or Supreme Judge. Comp. 1 K. xxi. 10-14 (Naboth); 2 Chr. xxiv. 21 (Zechariah).

6th Command. (1) *Murder*, to be punished by death without sanctuary or reprieve, or satisfaction (Ex. xxi. 12, 14; Deut. xix. 11-13). Death of a slave, actually under the rod, to be punished (Ex. xxi. 20, 21).

(2) *Death by negligence*, to be punished by death (Ex. xxi. 28-30).

(3) *Accidental Homicide*; the avenger of blood to be escaped by flight to the cities of refuge till the death of the high-priest (Num. xxxv. 9-28; Deut. iv. 41-43, xix. 4-10).

(4) *Uncertain Murder*, to be expiated by formal disavowal and sacrifice by the elders of the nearest city (Deut. xxi. 1-9).

(5) *Assault* to be punished by *lex talionis*, or damages (Ex. xxi. 18, 19, 22-25; Lev. xxiv. 19, 20).

7th Command. (1) *Adultery* to be punished by death of both offenders; the rape of a married or betrothed woman, by death of the offender (Deut. xxii. 13-27).

(2) *Rape or Seduction* of an unbetrothed virgin, to be compensated by marriage, with dowry (50 shekels), and without power of divorce; or, if she be refused, by payment of full dowry (Ex. xxii. 16, 17; Deut. xxii. 28, 29).

(3) *Unlawful Marriages* (incestuous, &c.), to be punished, some by death, some by childlessness (Lev. xx.).

8th Command. (1) *Theft* to be punished by fourfold or double restitution; a nocturnal robber might be slain as an outlaw (Ex. xxii. 1-4).

(2) *Trespass* and injury of things lent to be compensated (Ex. xxii. 5-15).

(3) *Perversion of Justice* (by bribes, threats, &c.), and especially oppression of strangers, strictly forbidden (Ex. xxiii. 9, &c.).

(4) *Kidnapping* to be punished by death (Deut. xxiv. 7).

9th Command. *False Witness*; to be punished by *lex talionis* (Ex. xxiii. 1-3; Deut. xix. 16-21).

Slander of a wife's chastity, by fine and loss of power of divorce (Deut. xxii. 18, 19).

A fuller consideration of the tables of the Ten Commandments is given elsewhere. [Ten Commandments.]

(III.) Laws Judicial and Constitutional.

(A) Jurisdiction.

(a) *Local Judges* (generally Levites, as more skilled in the Law) appointed, for ordinary matters, probably by the people with approbation of the supreme authority (as of Moses in the wilderness) (Ex. xviii. 25; Deut, i. 15-18), through all the land (Deut. xvi. 18).

(b) *Appeal to the Priests* (at the holy place), or to *the judge*; their sentence final, and to be accepted under pain of death. See Deut. xvii. 8-13 (comp. appeal to Moses, Ex. xviii. 26.)

(c) *Two witnesses* (at least) required in capital matters (Num. xxxv. 30; Deut. xvii. 6, 7).

(d) *Punishment* (except by special command) to be personal, and not to extend to the family (Deut. xxiv. 16).

Stripes allowed and limited (Deut. xxv. 1-3), so as to avoid outrage on the human frame.

All this would be to a great extent set aside—

1st. By the summary jurisdiction of the king. See 1 Sam. xxii. 11-19 (Saul); 2 Sam. xii. 1-5, xiv. 4-11; 1 K. iii. 16-28; which extended even to the deposition of the high-priest (1 Sam. xxii. 17, 18; 1 K. ii. 26, 27).

The practical difficulty of its being carried out is seen in 2 Sam. xv. 2-6, and would lead of course to a certain delegation of his power.

2nd. By the appointment of the Seventy (Num. xi. 24-30) with a solemn religious sanction. (In later times there was a local Sanhedrim of 23 in each city, and two such in Jerusalem, as well as the Great Sanhedrim, consisting of 70 members, besides the president, who was to be the high-priest if duly qualified, and controling even the king and high-priest. The members were priests, scribes (Levites), and elders (of other tribes). A court of exactly this nature is noticed, as appointed to supreme power by Jehoshaphat. (See 2 Ch. xix. 8-11.)

(B) Royal Power.

The King's Power limited by the Law, as written and formally accepted by the king: and directly forbidden to be despotic[4] (Deut. xvii. 14-20; comp. 1 Sam. x. 25). Yet he had power of taxation (to $\frac{1}{10}$th); and of compulsory service (1 Sam. viii. 10-18; the declaration of war (1 Sam. xi.), &c. There are distinct traces of a "mutual contract" (2 Sam. v. 3 (David); a "league" (Joash), 2 K. xi. 17); the remonstrance with Rehoboam being clearly not extraordinary (1 K. xii. 1-6).

The Princes of the Congregation. The heads of the tribes (see Josh. ix. 15) seem to have had authority under Joshua to act for the people (comp. 1 Chr. xxvii. 16-22); and in the later times "the princes of Judah" seem to have had power to control both the king and the priests (see Jer. xxvi. 10-24, xxxviii. 4, 5, &c.).

(C) Royal Revenue. (See Mich. b. II. c. 7, art. 59.

(1) *Tenth of produce.*

(2) *Domain land* (1 Chr. xxvii. 26-29). Note confiscation of criminal's land (1 K. xxi. 15).

[4] Military conquest discouraged by the prohibition of the use of horses. (See Josh. xi. 6.) For an example of obedience to this law see 2 Sam. viii. 4, and of disobedience to it in 1 K. x. 26-29.

(3) *Bond service* (1 K. v. 17, 18) chiefly on foreigners (1 K. ix. 20-22; 2 Chr. ii. 16, 17).
(4) *Flocks and herds* (1 Chr. xxvii. 29-31).
(5) *Tributes* (gifts) from foreign kings.
(6) *Commerce;* especially in Solomon's time (1 K. x. 22, 29, &c.).

(IV.) ECCLESIASTICAL AND CEREMONIAL LAW.

(A) LAW OF SACRIFICE (considered as the sign and the appointed means of the union with God, on which the holiness of the people depended).

(1) ORDINARY SACRIFICES.
(α) *The whole Burnt-Offering* (Lev. i.) of the herd or the flock; to be offered continually (Ex. xxix. 38-42); and the fire on the altar never to be extinguished (Lev. vi. 8-13).
(β) *The Meat-Offering* (Lev. ii., vi. 14-23) of flour, oil, and frankincense, unleavened, and seasoned with salt.
(γ) *The Peace-Offering* (Lev. iii., vii. 11-21) of the herd or the flock; either a thank-offering, or a vow, or freewill offering.
(δ) *The Sin-Offering*, or *Trespass-Offering* (Lev. iv., v., vi.).
(a) For sins committed in ignorance (Lev. iv.).
(b) For vows unwittingly made and broken, or uncleanness unwittingly contracted (Lev. v.).
(c) For sins wittingly committed (Lev. vi. 1-7).

(2) EXTRAORDINARY SACRIFICES.
(α) *At the Consecration of Priests* (Lev. viii., ix.).
(β) *At the Purification of Women* (Lev. xii.).
(γ) *At the Cleansing of Lepers* (Lev. xiii., xiv.).
(δ) *On the Great Day of Atonement* (Lev. xvi.).
(ε) *On the great Festivals* (Lev. xxiii.).

(B) LAW OF HOLINESS (arising from the union with God through sacrifice).

(1) HOLINESS OF PERSONS.
(α) *Holiness of the whole people* as "children of God" (Ex. xix. 5, 6; Lev. xi.–xv., xvii., xviii.; Deut. xiv. 1-21) shown in
(a) The Dedication of the first-born (Ex. xiii. 2, 12, 13, xxii. 29, 30, &c.); and the offering of all firstlings and first-fruits (Deut. xxvi., &c.).
(b) Distinction of clean and unclean food (Lev. xi.; Deut. xiv.).
(c) Provision for purification (Lev. xii., xiii., xiv., xv.; Deut. xxiii. 1-14).
(d) Laws against disfigurement (Lev. xix. 27; Deut. xiv. 1; comp. Deut. xxv. 3, against excessive scourging).
(e) Laws against unnatural marriages and lusts (Lev. xviii., xx.).
(β) *Holiness of the Priests* (*and Levites*).
(a) Their consecration (Lev. viii. ix.; Ex. xxix.).
(b) Their special qualifications and restrictions (Lev. xxi., xxii. 1-9).
(c) Their rights (Deut. xviii. 1-3; Num. xviii.) and authority (Deut. xvii. 8-13).

(2) HOLINESS OF PLACES AND THINGS.
(α) *The Tabernacle* with the ark, the vail, the altars, the laver, the priestly robes, &c. (Ex. xxv.–xxviii., xxx).
(β) *The Holy Place* chosen for the permanent erection of the tabernacle (Deut. xii., xiv. 22-29), where only all sacrifices were to be offered, and all tithes, first-fruits, vows, &c., to be given or eaten.

(3) HOLINESS OF TIMES.
(α) *The Sabbath* (Ex. xx. 9-11, xxiii. 12, &c.).
(β) *The Sabbatical Year* (Ex. xxiii. 10, 11, Lev. xxv. 1-7, &c.).
(γ) *The Year of Jubilee* (Lev. xxv. 8-16, &c.).
(δ) *The Passover* (Ex. xii. 3-27; Lev. xxiii. 4-14).
(ε) *The Feast of Weeks* (Pentecost) (Lev. xxiii. 15, &c.).
(ζ) *The Feast of Tabernacles* (Lev. xxiii. 33-43.
(η) *The Feast of Trumpets* (Lev. xxiii. 23-25).
(θ) *The Day of Atonement* (Lev. xxiii. 26-32, &c.).

On this part of the subject, see FESTIVALS, PRIESTS, TABERNACLE, SACRIFICE, &c.

Such is the substance of the Mosaic Law; its details must be studied under their several heads; and their full comprehension requires a constant reference to the circumstances, physical and moral, of the nation, and a comparison with the corresponding ordinances of other ancient codes.

The leading principle of the whole is its THEOCRATIC CHARACTER, its reference (that is) of all action and thoughts of men *directly and immediately* to the will of God. All law, indeed, must ultimately make this reference. If it bases itself on the sacredness of human authority, it must finally trace that authority to God's appointment; if on the rights of the individual and the need of protecting them, it must consider these rights as inherent and sacred, because implanted by the hand of the Creator. But it is characteristic of the Mosaic Law, as also of all Biblical history and prophecy, that it passes over all the intermediate steps, and refers at once to God's commandment as the foundation of all human duty. The key to it is found in the ever-recurring formula, "Ye shall observe all these statutes; I am the LORD."

It follows from this, that it is to be regarded not merely as a law, that is, a rule of conduct, based on known truth and acknowledged authority, but also as a *Revelation of God's nature* and His dispensations. In this view of it, more particularly, lies its connexion with the rest of the Old Testament. As a law, it is definite and (generally speaking) final; as a revelation, it is the beginning of the great system of prophecy, and indeed bears within itself the marks of gradual development, from the first simple declaration ("I am the Lord thy God") in Exodus to the full and solemn declaration of His nature and will in Deuteronomy. With this peculiar character of revelation stamped upon it, it naturally ascends from rule to principle, and regards all goodness in man as the shadow of the Divine attributes, "Ye shall be holy: for I the Lord your God am holy" (Lev. xix. 2, &c.; comp. Matt. v. 48).

But this theocratic character of the law depends necessarily on the *belief in God*, as not only the Creator and sustainer of the world, but as, by special covenant, *the head of the Jewish nation*. It is not indeed doubted that He is the king of all the

earth, and that all earthly authority is derived from Him; but here again, in the case of the Israelites, the intermediate steps are all but ignored, and the people at once brought face to face with Him as their ruler. It is to be especially noticed, that God's claim (so to speak) on their allegiance is based not on His power or wisdom, but on His special mercy in being their Saviour from Egyptian bondage. Because they were made free by Him, therefore they became His servants (comp. Rom. vi. 19-22); and the declaration, which stands at the opening of the law is, "I am the Lord thy God, *which brought thee out of the land of Egypt.*" (Comp. also the reason given for the observation of the sabbath in Deut. v. 15; and the historical preface of the delivery of the second law (Deut. i.–iii.); of the renewal of the covenant by Joshua (Josh. xxv. 1-13); and of the rebuke of Samuel at the establishment of the kingdom (1 Sam. xii. 6-15).)

This immediate reference to God as their king, is clearly seen as the groundwork of their whole polity. The foundation of the whole law of land, and of its remarkable provisions against alienation, lies in the declaration, "The land is mine, and ye are strangers and sojourners with me" (Lev. xxv. 23). As in ancient Rome, all land belonged properly to the state, and under the feudal system in mediæval Europe to the king; so in the Jewish law the true ownership lay in Jehovah alone. The very system of tithes embodied only a peculiar form of a tribute to their king, such as they were familiar with in Egypt (see Gen. xlvii. 23-26); and the offering of the first-fruits, with the remarkable declaration by which it was accompanied (see Deut. xxvi. 5-10), is a direct acknowledgment of God's immediate sovereignty. And, as the land, so also the persons of the Israelites are declared to be the absolute property of the Lord, by the dedication and ransom of the first-born (Ex. xiii. 2-16, &c.), by the payment of the half-shekel at the numbering of the people, "as a ransom for their souls to the Lord" (Ex. xxx. 11-16); and by the limitation of power over Hebrew slaves, as contrasted with the absolute mastership permitted over the heathen and the sojourner (Lev. xxv. 39-46).

From this theocratic nature of the law follow important deductions with regard to (*a*) the view which it takes of political society; (*b*) the extent of the scope of the law; (*c*) the penalties by which it is enforced; and (*d*) the character which it seeks to impress on the people.

a. *The basis of human society* is ordinarily sought, by law or philosophy, either in the rights of the individual, and the partial delegation of them to political authorities; or in the mutual needs of men, and the relations which spring from them; or in the actual existence of power of man over man, whether arising from natural relationship, or from benefits conferred, or from physical or intellectual ascendancy. The maintenance of society is supposed to depend on a "social compact" between governors and subjects; a compact, true as an abstract idea, but untrue if supposed to have been a historical reality. The Mosaic Law seeks the basis of its polity, first, in the absolute sovereignty of God, next in the relationship of each individual to God, and through God to his countrymen. It is clear that such a doctrine, while it contradicts none of the common theories, yet lies beneath them all, and shows why each of them, being only a secondary deduction from an ultimate truth, cannot be in itself sufficient; and, if it claim to be the whole truth, will become an absurdity. It is the doctrine which is insisted upon and developed in the whole series of prophecy; and which is brought to its perfection only when applied to that universal and spiritual kingdom for which the Mosaic system was a preparation.

(*b.*) The law, as proceeding directly from God, and referring directly to Him, is necessarily *absolute in its supremacy* and *unlimited in its scope*.

It is supreme over the governors, as being only the delegates of the Lord, and therefore it is incompatible with any despotic authority in them. This is seen in its limitation of the power of the master over the slave, in the restrictions laid on the priesthood, and the ordination of the "manner of the kingdom" (Deut. xvii. 14-20; comp. 1 Sam. x. 25). By its establishment of the hereditary priesthood side by side with the authority of the heads of tribes ("the princes"), and the subsequent sovereignty of the king, it provides a balance of powers, all of which are regarded as subordinate. The absolute sovereignty of Jehovah is asserted in the earlier times in the dictatorship of the Judge; but much more clearly under the kingdom by the spiritual commission of the prophet. By his rebukes of priests, princes, and kings, for abuse of their power, he was not only defending religion and morality, but also maintaining the divinely-appointed constitution of Israel. On the other hand, it is supreme over the governed, recognising no inherent rights in the individual, as prevailing against, or limiting the law. It is therefore unlimited in its scope. There is in it no recognition, such as is familiar to us, that there is one class of actions directly subject to the coercive power of law, while other classes of actions and the whole realm of thought are to be indirectly guided by moral and spiritual influence. Nor is there any distinction of the temporal authority which wields the former power, from the spiritual authority to which belongs the other. In fact these distinctions would have been incompatible with the character and objects of the law. They depend partly on the want of foresight and power in the lawgiver; they could have no place in a system traced directly to God: they depend also partly on the freedom which belongs to the manhood of our race; they could not therefore be appropriate to the more imperfect period of its youth.

Thus the law regulated the whole life of an Israelite. His house, his dress, and his food, his domestic arrangements and the distribution of his property, all were determined. In the laws of the release of debts, and the prohibition of usury, the dictates of self-interest and the natural course of commercial transactions are sternly checked. His actions were rewarded and punished with great minuteness and strictness; and that according to the standard, not of their consequences, but of their intrinsic morality; so that, for example, fornication and adultery were as severely visited as theft or murder. His religious worship was defined and enforced in an elaborate and unceasing ceremonial. In all things it is clear, that, if men submitted to it merely as a law, imposed under penalties by an irresistible authority, and did not regard it as a means to the knowledge and love of God, and a preparation for His redemption, it would well deserve from Israelites the description given of it by St. Peter (Acts xv. 10), as "a yoke which neither they nor their fathers were able to bear."

(*c.*) *The penalties and rewards* by which the

law is enforced are such as depend on the direct theocracy. With regard to individual actions, it may be noticed that, as generally some penalties are inflicted by the subordinate, and some only by the supreme authority, so among the Israelites some penalties came from the hand of man, some directly from the Providence of God. So much is this the case, that it often seems doubtful whether the threat that a "soul shall be cut off from Israel" refers to outlawry and excommunication, or to such miraculous punishments as those of Nadab and Abihu, or Korah, Dathan, and Abiram. In dealing with the nation at large, Moses, regularly and as a matter of course, refers for punishments and rewards to the providence of God. This is seen, not only in the great blessing and curse which enforces the law as a whole, but also in special instances, as, for example, in the promise of unusual fertility to compensate for the sabbatical year, and of safety of the country from attack when left undefended at the three great festivals. Whether these were to come from natural causes, *i. e.* laws of His providence, which we can understand and foresee, or from causes supernatural, *i. e.* incomprehensible and inscrutable to us, is not in any case laid down, nor indeed does it affect this principle of the law.

The bearing of this principle on the inquiry as to the *revelation of a future life, in the Pentateuch*, is easily seen. So far as the law deals with the nation as a whole, it is obvious that its penalties and rewards could only refer to this life, in which alone the nation exists. So far as it relates to such individual acts as are generally cognizable by human law, and capable of temporal punishments, no one would expect that its divine origin should necessitate any reference to the world to come. But the sphere of moral and religious action and thought to which it extends is beyond the cognizance of human laws, and the scope of their ordinary penalties, and is therefore left by them to the retribution of God's inscrutable justice, which, being but imperfectly seen here, is contemplated especially as exercised in a future state. Hence arises the expectation of a direct revelation of this future state in the Mosaic Law. Such a revelation is certainly not given. Warburton (in his *Divine Legation of Moses*) even builds on its non-existence an argument for the supernatural power and commission of the law-giver, who could promise and threaten retribution from the providence of God in this life, and submit his predictions to the test of actual experience. The truth seems to be that, in a law which appeals directly to God himself for its authority and its sanction, there cannot be that broad line of demarcation between this life and the next, which is drawn for those whose power is limited by the grave. Our Lord has taught us (Matt. xxii. 31, 32) that in the very revelation of God, as the "God of Abraham and Isaac and Jacob," the promise of immortality and future retribution was implicitly contained. We may apply this declaration even more strongly to a law in which God was revealed, as entering into covenant with Israel, and in them drawing mankind directly under His immediate government. His blessings and curses, by the very fact that they came from Him, would be felt to be unlimited by time; and the plain and immediate fulfilment, which they found in this life, would be accepted as an earnest of a deeper, though more mysterious completion in the world to come. But the time for the clear revelation of this truth was not yet come, and, therefore, while the future life and its retribution is implied, yet the rewards and penalties of the present life are those which are plainly held out and practically dwelt upon.

(*d.*) But perhaps the most important consequence of the theocratic nature of the law was the *peculiar character of goodness* which it sought to *impress on the people*. Goodness in its relation to man takes the forms of righteousness and love; in its independence of all relation, the form of purity, and in its relation to God, that of piety. Laws, which contemplate men chiefly in their mutual relations, endeavour to enforce or protect in them the first two qualities; the Mosaic Law, beginning with piety, as its first object, enforces most emphatically the purity essential to those who, by their union with God, have recovered the hope of intrinsic goodness, while it views righteousness and love rather as deductions from these than as independent objects. Not that it neglects these qualities; on the contrary it is full of precepts which show a high conception and tender care of our relative duties to man;[d] but these can hardly be called its distinguishing features. It is most instructive to refer to the religious preface of the law in Deut. vi.–xi. (especially to vi. 4–13), where all is based on the first great commandment, and to observe the subordinate and dependent character of "the second that is like unto it,"—"Thou shalt love thy neighbour as thyself; *I am the Lord*" (Lev. xix. 18). On the contrary, the care for the purity of the people stands out remarkably, not only in the enforcement of ceremonial "cleanness," and the multitude of precautions or remedies against any breach of it, but also in the severity of the laws against sensuality and self-pollution, a severity which distinguishes the Mosaic code before all others ancient and modern. In punishing these sins, as committed against a man's own self, without reference to their effect on others, and in recognising purity as having a substantive value and glory, it sets up a standard of individual morality, such as, even in Greece and Rome, philosophy reserved for its most esoteric teaching.

Now in all this it is to be noticed that the appeal is not to any dignity of human nature, but to the obligations of communion with a Holy God. The subordination, therefore, of this idea also to the religious idea is enforced; and so long as the due supremacy of the latter was preserved, all other duties would find their places in proper harmony. But the usurpation of that supremacy in practice by the idea of personal and national sanctity was that which gave its peculiar colour to the Jewish character. In that character there was intense religious devotion and self-sacrifice; there was a high standard of personal holiness, and connected with these an ardent feeling of nationality, based on a great idea, and, therefore, finding its vent in their proverbial spirit of proselytism. But there was also a spirit of contempt for all unbelievers, and a forgetfulness of the existence of any duties towards them, which gave even to their religion an antagonistic spirit, and degraded it in after-times to a ground of national self-glorification. It is to be traced to a natural, though not justifiable perversion of the law, by those who made it their all; and both in its strength and its weaknesses it has reap-

[d] See, for example, Ex. xxi. 7-11, 28-36; xxiii. 1-9, Deut. xxii. 1-4; xxiv. 10-22, &c. &c.

passed remarkably among those Christians who have dwelt on the O. T. to the neglect of the New.

It is evident that this characteristic of the Israelites would tend to preserve *the seclusion* which, under God's providence, was intended for them, and would in its turn be fostered by it. We may notice, in connexion with this part of the subject, many subordinate provisions tending to the same direction. Such are the establishment of an agricultural basis of society and property, and the provision against its accumulation in a few hands; the discouragement of commerce by the strict laws as to usury, and of foreign conquest by the laws against the maintenance of horses and chariots; as well as the direct prohibition of intermarriage with idolaters, and the indirect prevention of all familiar intercourse with them by the laws as to meats—all these things tended to impress on the Israelitish polity a character of permanence, stability, and comparative isolation. Like the nature and position of the country to which it was in great measure adapted, it was intended to preserve in purity the witness borne by Israel for God in the darkness of heathenism, until the time should come for the gathering in of all nations to enjoy the blessing promised to Abraham.

III. In considering the relation of the Law to the future, it is important to be guided by the general principle laid down in Heb. vii. 19, "The Law made nothing perfect" (Οὐδὲν ἐτελείωσεν ὁ Μωσῆς). This principle will be applied in different senses to its bearing (*a*) on the after-history of the Jewish commonwealth before the coming of Christ; (*b*) on the coming of our Lord Himself; and (*c*) on the dispensation of the Gospel.

(*a.*) To that after-history the Law was, to a great extent, the key; for in ceremonial and criminal law it was complete and final; while, even in civil and constitutional law, it laid down clearly the general principles to be afterwards more fully developed. It was indeed often neglected, and even forgotten. Its fundamental assertion of the Theocracy was violated by the constant lapses into idolatry, and its provisions for the good of man overwhelmed by the natural course of human selfishness (Jer. xxxiv. 13-17); till at last, in the reign of Josiah, its very existence was unknown, and its discovery was to the king and the people as a second publication: yet still it formed the standard from which they knowingly departed, and to which they constantly returned; and to it therefore all which was peculiar in their national and individual character was due. Its direct influence was probably greatest in the periods before the establishment of the kingdom, and after the Babylonish captivity. The last act of Joshua was to bind the Israelites to it as the charter of their occupation of the conquered land (Josh. xxiv. 24-27); and, in the semi-anarchical period of the Judges, the Law and the Tabernacle were the only centres of anything like national unity. The establishment of the kingdom was due to an impatience of this position, and a desire for a visible and personal centre of authority, much the same in nature as that which plunged them so often in idolatry. The people were warned (1 Sam. xii. 6-25), that it involved much danger of their forgetting and rejecting the main principle of the Law—that "Jehovah their God was their King." The truth of the prediction was soon shown. Even under Solomon, as soon as the monarchy became one of great splendour and power, it assumed a heathenish and polytheistic character, breaking the Law, both by its dishonour towards God, and its forbidden tyranny over man. Indeed if the Law was looked upon as a collection of abstract rules, and not as a means of knowledge of a Personal God, it was inevitable that it should be overborne by the presence of a visible and personal authority.

Therefore it was, that from the time of the establishment of the kingdom began the prophetic office. Its object was to enforce and to perfect the Law, by bearing witness to the great truths on which it was built, viz. the truth of God's government over all, kings, priests, and people alike, and the consequent certainty of a righteous retribution. It is plain that at the same time this witness went far beyond the Law as a definite code of institutions. It dwelt rather on its great principles, which were to transcend the special forms in which they were embodied. It frequently contrasted (as in Is. i., &c.) the external observance of form with the spiritual homage of the heart. It tended therefore, at least indirectly, to the time when, according to the well-known contrast drawn by Jeremiah, the Law written on the tables of stone should give place to a new Covenant, depending on a law written on the heart, and therefore coercive no longer (Jer. xxxi. 31-34). In this they did but carry out the prediction of the Law itself (Deut. xviii. 9-22), and prepare the way for "the Prophet" who was to come.

Still the Law remained as the distinctive standard of the people. In the kingdom of Israel, after the separation, the deliberate rejection of its leading principles by Jeroboam and his successors was the beginning of a gradual declension into idolatry and heathenism. But in the kingdom of Judah the very division of the monarchy and consequent diminution of its splendour, and the need of a principle to assert against the superior material power of Israel, brought out the Law once more in increased honour and influence. In the days of Jehoshaphat we find, for the first time, that it was taken by the Levites in their circuits through the land, and the people taught by it (2 Chr. xvii. 9). We find it especially spoken of in the oath taken by the king "at his pillar" in the temple, and made the standard of reference in the reformations of Hezekiah and Josiah (2 K. xi. 14, xxiii. 3; 2 Chr. xxx., xxxiv. 14-31).

Far more was this the case after the captivity. The revival of the existence of Israel was hallowed by the new and solemn publication of the Law by Ezra, and the institution of the synagogues, through which it became deeply and familiarly known. [EZRA.] The loss of the independent monarchy, and the cessation of prophecy, both combined to throw the Jews back upon the Law alone, as their only distinctive pledge of nationality, and sure guide to truth. The more they mingled with the other subject-nations under the Persian and Grecian empires, the more eagerly they clung to it as their distinction and safeguard; and opening the knowledge of it to the heathen, by the translation of the LXX., based on it their proverbial eagerness to proselytize. This love for the Law, rather than any abstract patriotism, was the strength of the Maccabean struggle against the Syrians,[a] and the success of that struggle, enthroning a Levitical power, deepened the feeling from which it sprang. It so entered into the heart of the people that open

[a] Note here the question as to the lawfulness of war on the Sabbath in this war (1 Macc. ii. 23-41).

[illegible] became impossible. The certainty and authority of the Law's commandments amidst the perplexities of paganism, and the spirituality of its doctrine as contrasted with sensual and carnal idolatries, were the favourite boast of the Jew, and the secret of his influence among the heathen. The Law thus became the moulding influence of the Jewish character; and, instead of being looked upon as subsidiary to the promise, and a means to its fulfilment, was exalted to supreme importance as at once a means and a pledge of national and individual sanctity.

This feeling laid hold of and satisfied the mass of the people, harmonising as it did with their ever-increasing spirit of an almost fanatic nationality, until the destruction of the city. The Pharisees, truly representing the chief strength of the people, systematized this feeling; they gave it fresh food, and assumed a predominant leadership over it by the floating mass of tradition which they gradually accumulated around the Law as a nucleus. The popular use of the word "lawless" (ἄνομος) as a term of contempt (Acts ii. 23; 1 Cor. ix. 21) for the heathen, and even for the uneducated mass of their followers (John vii. 49), marked and stereotyped their principle.

Against this idolatry of the Law (which when imported into the Christian Church is described and vehemently denounced by St. Paul), there were two reactions. The first was that of the SADDUCEES; one which had its basis, according to common tradition, in the idea of a higher love and service of God, independent of the Law and its sanctions; but which degenerated into a speculative infidelity, and an anti-national system of politics, and which probably had but little hold of the people. The other, that of the ESSENES, was an attempt to burst the bonds of the formal law, and assert its ideas in all fullness, freedom, and purity. In its practical form it assumed the character of high and ascetic devotion to God; its speculative guise is seen in the school of Philo, as a tendency not merely to treat the commands and history of the Law on a symbolical principle, but actually to allegorise them into mere abstractions. In neither form could it be permanent, because it had no sufficient relation to the needs and realities of human nature, or to the personal Subject of all the Jewish promises; but it was still a declaration of the insufficiency of the Law in itself, and a preparation for its absorption into a higher principle of unity. Such was the history of the Law before the coming of Christ. It was full of effect and blessing, when used as a means; it became hollow and insufficient, when made an end.

(*b.*) The relation of the Law to the advent of Christ is also laid down clearly by St. Paul. "The Law was the Παιδαγωγὸς εἰς Χριστὸν, the servant (that is), whose task it was to guide the child to the true teacher (Gal. iii. 24); and Christ was "the end" or object "of the Law" (Rom. x. 4). As being subsidiary to the promise, it had accomplished its purpose when the promise was fulfilled. In its national aspect it had existed to guard the faith in the theocracy. The chief hindrance to that faith had been the difficulty of realising the invisible presence of God, and of conceiving a communion with the infinite Godhead which should not crush or absorb the finite creature (comp. Deut. v. 24-27; Num. xvii. 12, 13; Job ix. 32-35, xiii. 21, 22; Is. xlv. 15, lxiv. 1, &c.). From that had come in earlier times open idolatry, and a half-idolatrous longing for and trust in the kingdom; in after-times the substitution of the law for the promise. This difficulty was now to pass away for ever, in the Incarnation of the Godhead in One truly and visibly man. The guardianship of the Law was no longer needed, for the visible and personal presence of the Messiah required no further witness. Moreover, in the Law itself there had always been a tendency of the fundamental idea to burst the formal bonds which confined it. In looking to God as especially their King, the Israelites were inheriting a privilege, belonging originally to all mankind, and destined to revert to them. Yet that element of the Law which was local and national, now most prized of all by the Jews, tended to limit this gift to them, and place them in a position antagonistic to the rest of the world. It needed therefore to pass away, before all men could be brought into a kingdom where there was to be "neither Jew nor Gentile, barbarian, Scythian, bond or free."

In its individual, or what is usually called its "moral" aspect, the Law bore equally the stamp of transitoriness and insufficiency. It had, as we have seen, declared the authority of truth and goodness over man's will, and taken for granted in man the existence of a spirit which could recognise that authority; but it had done no more. Its presence had therefore detected the existence and the sinfulness of sin, as alien alike to God's will and man's true nature; but it had also brought out with more vehement and desperate antagonism the power of sin dwelling in man as fallen (Rom. vii. 7-25). It only showed therefore the need of a Saviour from sin, and of an indwelling power which should enable the spirit of man to conquer the "law" of evil. Hence it bore witness of its own insufficiency, and led men to Christ. Already the prophets, speaking by a living and indwelling spirit, ever fresh and powerful, had been passing beyond the dead letter of the law, and indirectly condemning it of insufficiency. But there was need of "*the* Prophet" who should not only have the fullness of the spirit dwelling in Himself, but should have the power to give it to others, and so open the new dispensation already foretold. When He had come, and by the gift of the Spirit implanted in man a free internal power of action tending to God, the restraints of the Law, needful to train the childhood of the world, became unnecessary and even injurious to the free development of its manhood.

The relation of the Law to Christ in its sacrificial and ceremonial aspect, will be more fully considered elsewhere. [SACRIFICE.] It is here only necessary to remark on the evidently typical character of the whole system of sacrifices, on which alone their virtue depended; and on the imperfect embodiment, in any body of mere men, of the great truth which was represented in the priesthood. By the former declaring the need of Atonement, by the latter the possibility of Mediation, and yet in itself doing nothing adequately to realise either, the Law again led men to Him, who was at once the only Mediator and the true Sacrifice.

Thus the Law had trained and guided man to the acceptance of the Messiah in His threefold character of King, Prophet, and Priest; and then, its work being done, it became, in the minds of those who trusted in it, not only an encumbrance but a snare. To resist its claim to allegiance was therefore a matter of life and death in the days of St. Paul, and, in a less degree, in after-ages of the Church.

(c.) It remains to consider how far it has any obligation or existence under the dispensation of the Gospel. As a means of justification or salvation, it ought never to have been regarded, even before Christ: it needs no proof to show that still less can this be so since He has come. But yet the question remains whether it is binding on Christians, even when they do not depend on it for salvation.

It seems clear enough, that its formal coercive authority as a whole ended with the close of the Jewish dispensation. It is impossible to separate, though we may distinguish, its various elements: it must be regarded as a whole, for he who offended "in one point against it was guilty of all" (James ii. 10). Yet it referred throughout to the Jewish covenant, and in many points to the constitution, the customs, and even the local circumstances of the people. That covenant was preparatory to the Christian, in which it is now absorbed; those customs and observances have passed away. It follows, by the very nature of the case, that the formal obligation to the Law must have ceased with the basis on which it is grounded. This conclusion is stamped most unequivocally with the authority of St. Paul through the whole argument of the Epistles to the Romans and to the Galatians. That we are "not under law" (Rom. vi. 14, 15; Gal. v. 18); "that we are dead to law" (Rom. vii. 4-6; Gal. ii. 19), "redeemed from under law" (Gal. iv. 5), &c., &c., is not only stated without any limitation or exception, but in many places is made the prominent feature of the contrast between the earlier and later covenants. It is impossible, therefore, to make distinctions in this respect between the various parts of the Law, or to avoid the conclusion that the formal code, promulgated by Moses, and sealed with the prediction of the blessing and the curse, cannot, *as a law*, be binding on the Christian.

But what then becomes of the declaration of our Lord, that He came "not to destroy the Law, but to perfect it," and that "not one jot or one tittle of it shall pass away?" what of the fact, consequent upon it, that the Law has been reverenced in all Christian churches, and had an important influence on much Christian legislation? The explanation of the apparent contradiction lies in the difference between positive and moral obligation. The *positive* obligation of the Law, as such, has passed away; but every revelation of God's Will, and of the righteousness and love which are its elements, imposes a *moral* obligation, by the very fact of its being known, even on those to whom it is not primarily addressed. So far as the Law of Moses is such a revelation of the will of God to mankind at large, occupying a certain place in the education of the world as a whole, so far its declarations remain for our guidance, though their coercion and their penalties may be no longer needed. It is in their general principle, of course, that they remain, not in their outward form; and our Lord has taught us, in the Sermon on the Mount, that these principles should be accepted by us in a more ex[illegible]ted and spiritual development than they could receive in the time of Moses.

To apply this principle practically there is need of much study and discretion, in order to distinguish what is local and temporary from what is moral, and what is mere external form from what is the essence of an ordinance. The moral law undoubtedly must be most permanent in its influence, because it is based on the nature of man generally, although at the same time it is modified by the greater prominence of love in the Christian system. Yet the political law, in the main principles which it lays down as to the sacredness and responsibility of all authorities, and the rights which belong to each individual, and which neither slavery nor even guilt can quite eradicate, has its permanent value. Even the ceremonial law, by its enforcement of the purity and perfection needed in any service offered, and in its disregard of mere costliness on such service, and limitation of it strictly to the prescribed will of God, is still in many respects our best guide. In special cases (as for example that of the sabbatical law and the prohibition of marriage within the degrees) the question of its authority must depend on the further inquiry, whether the basis of such laws is one common to all human nature, or one peculiar to the Jewish people. This inquiry will be difficult, especially in the distinction of the essence from the form; but by it alone can the original question be thoroughly and satisfactorily answered.

For the chief authorities, see Winer, *Realw.* "Gesetz." Michaelis (*Mos. Gerecht*) is valuable for facts and antiquities, not much so for theory. Ewald, *Gesch. des Volkes Israel*, vol. ii. pp. 124-205, is most instructive and suggestive as to the main ideas of the Law. But after all the most important parts of the subject need little else than a careful study of the Law itself, and the references to it contained in the N. T. [A. B.]

LAWYER (*νομικός*). The title "lawyer" is generally supposed to be equivalent to the title "scribe," both on account of its etymological meaning, and also because the man, who is called a "lawyer" in Matt. xxii. 35 and Luke x. 25, is called "one of the scribes" in Mark xii. 28. If the common reading in Luke xi. 44, 45, 46, be correct, it will be decisive against this; for there, after our Lord's denunciation of the "scribes and Pharisees," we find that a lawyer said, "Master, thus saying, thou reproachest us *also*. And Jesus said, Woe unto you *also* ye lawyers." But it is likely that the true reading refers the passage to the Pharisees alone. By the use of the word *νομικός* (in Tit. iii. 9) as a simple adjective, it seems more probable that the title "scribe" was a legal and official designation, but that the name *νομικός* was properly a mere epithet signifying one "learned in the law" (somewhat like the *οἱ ἐκ νόμου* in Rom. iv. 14), and only used as a title in common parlance (comp. the use of it in Tit. iii. 13, "Zenas the lawyer"). This would account for the comparative unfrequency of the word, and the fact that it is always used in connexion with "Pharisees," never, as the word "scribe" so often is, in connexion with "chief priests" and "elders." [SCRIBES.] [A. B.]

LAYING ON OF HANDS. [See Appendix B.*]

LAZARUS (Λάζαρος: *Lazarus*). In this name, which meets us as belonging to two characters in the N. T., we may recognize an abbreviated form of the old Hebrew Eleazar (Tertull.

* As the "Laying on of hands" was considered in the Church as the "Supplement of Baptism," it is considered better to treat it in connexion with the latter subject, which is reserved for the Appendix.

De Idol, Grotius *et al.*) The corresponding עֲזָר appears in the Talmud (Winer, *Realwb.* s. v.). In Josephus, and in the historical books of the Apocrypha (1 Macc. viii. 17; 2 Macc. vi. 18), the more frequent form is Ἐλεάζαρος; but Ἀλάζαρος occurs also (*B. J.* v. 13, §7).

1. Lazarus of Bethany, the brother of Martha and Mary (John xi. 1). All that we know of him is derived from the Gospel of St John, and that records little more than the facts of his death and resurrection. We are able, however, without doing violence to the principles of a true historical criticism, to arrive at some conclusions helping us, with at least some measure of probability, to fill up these scanty outlines. In proportion as we bring the scattered notices together, we find them combining to form a picture far more distinct and interesting than at first seemed possible; and the distinctness in this case, though it is not to be mistaken for certainty, is yet less misleading than that which, in other cases, seems to arise from the strong statements of apocryphal traditions. (1.) The language of John, xi. 1, implies that the sisters were the better known. Lazarus is "of (ἀπὸ) Bethany, of the village (ἐκ τῆς κώμης) of Mary and her sister Martha." No stress can be laid on the difference of the prepositions (Meyer and Lampe, *in loc.*), but it suggests as possible the inference that, while Lazarus was, at the time of St. John's narrative, *of* Bethany, he was yet described as *from* the κώμη τις of Luke x. 38, already known as the dwelling-place of the two sisters (Greswell, *On the Village of Martha and Mary*, Dissert. V. ii. 545).[a] From this, and from the order of the three names in John xi. 5, we may reasonably infer that Lazarus was the youngest of the family. The absence of the name from the narrative of Luke x. 38-42, and his subordinate position (εἷς τῶν ἀνακειμένων) in the feast of John xii. 2 lead to the same conclusion. (2.) The house in which the feast is held appears, from John xii. 2, to be that of the sisters. Martha "serves," as in Luke x. 38. Mary takes upon herself that which was the special duty of a hostess towards an honoured guest (comp. Luke vii. 46). The impression left on our minds by this account, if it stood alone, would be that they were the givers of the feast. In Matt. xxvi. 6, Mark xiv. 3, the same fact[b] appears as occurring in "the house of Simon the leper:" but a leper, as such, would have been compelled to lead a separate life, and certainly could not have given a feast and received a multitude of guests. Among the conjectural explanations which have been given of this difference,[c] the hypothesis that this Simon was the father of the two sisters and of Lazarus, that he had been smitten with leprosy, and that actual death, or the civil death that followed on his disease, had left his children free to act for themselves, is at least as probable as any other, and has some support in early ecclesiastical traditions (Niceph. *H. E.* i. 27; Theophyl. *in loc.*; comp. Ewald, *Geschichte*, v. 357). Why, if this were so, the house should be described by St. Matthew and St. Mark as it is; why the name of the sister of Lazarus should be altogether passed over, will be questions that will meet us further on. (3.) All the circumstances of John xi. and xii.,—the feast for so many guests, the number of friends who come from Jerusalem to condole with the sisters, left with female relations, but without a brother or near kinsman (John xi. 19), the alabaster-box, the ointment of spikenard very costly, the funeral vault of their own,—point to wealth and social position above the average (comp. Trench, *Miracles*, 29). The peculiar sense which attaches to St. John's use of οἱ Ἰουδαῖοι (comp. Meyer on John xi. 19), as the leaders of the opposition to the teaching of Christ, in other words as equivalent to Scribes and Elders and Pharisees, suggests the further inference that these visitors or friends belonged to that class, and that previous relations must have connected them with the family of Bethany. (4.) A comparison of Matt. xxvi. 6, Mark xiv. 3, with Luke vii. 36, 44, suggests another conjecture that harmonises with and in part explains the foregoing. To assume the identity of the anointing of the latter narrative with that of the former (so Grotius), of the woman that was a sinner with Mary the sister of Lazarus, and of one or both of these with Mary Magdalene (Lightfoot, *Harm.* §33, vol. iii. 75), is indeed (in spite of the authorities, critical and patristic, which may be arrayed on either side) altogether arbitrary and uncritical. It would be hardly less so to infer, from the mere recurrence of so common a name as Simon, the identity of the leper of the one narrative with the Pharisee of the other; nor would the case be much strengthened by an appeal to the interpreters who have maintained that opinion (comp. Chrysost. *Hom. in Matt.* lxxx.; Grotius, *in Matt.* xxvi. 6; Lightfoot, *l. c.*; Winer, *Realwb. s. v.* Simon). [Comp. MARY MAGDALENE and SIMON.] There are however some other facts which fall in with this hypothesis, and to that extent confirm it. If Simon the leper were also the Pharisee, it would explain the fact just noticed of the friendship between the sisters of Lazarus and the members of that party in Jerusalem. It would account also for the ready utterance by Martha of the chief article of the creed of the Pharisees (John xi. 24). Mary's lavish act of love would gain a fresh interest for us if we thought of it (as this conjecture would lead us to think) as growing out of the recollection of that which had been offered by the woman that was a sinner. The disease which gave occasion to the later name may

[a] By most commentators (Trench, Alford, Tholuck, Lücke) the distinction which Greswell insists on is rejected as utterly untenable. It may be urged, however, (1) that it is the distinction drawn by a scholar like Hermann ("Ponitur autem ἀπὸ nonnisi de origine secundâ, cum in origine primâ usurpetur ἐκ," quoted by Wahl, *Clavis N. T.*); (2) that though both might come to be used apart with hardly any shade of difference, their use in close juxtaposition might still be antithetical, and that this was more likely to be with one who, though writing in Greek, was not using it as his native tongue; (3) that John i. 45 is open to the same doubt as this passage; (4) that our Lord is always said to be ἀπὸ, never ἐκ Νάζαρετ.

In connexion with this verse may be noticed also the Vulg. translation, "de castello Marthae," and the consequent traditions of a Castle of Lazarus, pointed out to mediæval pilgrims among the ruins of the village, which had become famous by a church erected in his honour, and had taken its Arab name (Lazarieh, or Elazarieh) from him. [BETHANY, vol. i. 196 *b*.]

[b] The identity has been questioned by some harmonists; but it will be discussed under SIMON.

[c] Meyer assumes (on Matt. xxvi. 6) that St. John, as an eye-witness, gives the true account, St. Matthew and St. Mark an erroneous one. Paulus and Greswell suggest that Simon was the husband, living or deceased, of Martha; Grotius and Kuinöl, that he was a kinsman, or a friend who gave the feast for them.

have supervened after the incident which St. Luke records. The difference between the localities of the two histories (that of Luke vii. being apparently in Galilee near Naim, that of Matt. xxvi. and Mark xiv. in Bethany) is not greater than that which meets us on comparing Luke x. 38 with John xi. 1 (comp. Greswell, *Diss. l. c.*). It would follow on this assumption that the Pharisee, whom we thus far identify with the father of Lazarus, was probably one of the members of that sect, sent down from Jerusalem to watch the new teacher (comp. Ellicott's *Hulsean Lectures*, p. 169); that he looked on him partly with reverence, partly with suspicion; that in his dwelling there was a manifestation of the sympathy and love of Christ, which could not but leave on those who witnessed or heard of it, and had not hardened themselves in formalism, a deep and permanent impression. (5.) One other conjecture, bolder perhaps than the others, may yet be hazarded. Admitting, as must be admitted, the absence at once of all direct evidence and of traditional authority, there are yet some coincidences, at least remarkable enough to deserve attention, and which suggest the identification of Lazarus with the young ruler that had great possessions, of Matt. xix., Mark x., Luke xviii.[d] The age (*νεανίας*, Matt. xix. 20, 22) agrees with what has been before inferred (see above, 1), as does the fact of wealth above the average with what we know of the condition of the family at Bethany (see 2). If the father were an influential Pharisee, if there were ties of some kind uniting the family with that body, it would be natural enough that the son, even in comparative youth, should occupy the position of an *ἄρχων*. The character of the young ruler, the reverence of his salutation (*διδάσκαλε ἀγαθέ*, Mark x. 17) and of his attitude (*γονυπετήσας*, ibid.) his eager yearning after eternal life, the strict training of his youth in the commandments of God, the blameless probity of his outward life, all these would agree with what we might expect in the son of a Pharisee, in the brother of one who had chosen "the good part." It may be noticed further, that as his spiritual condition is essentially that which we find about the same period in Martha, so the answer returned to him, "One thing thou lackest," and that given to her, "One thing is needful," are substantially identical.[e] But further, it is of this rich young man that St. Mark uses the emphatic word ("Jesus, beholding him, *loved* him," *ἠγάπησεν*) which is used of no others in the Gospel-history, save of the beloved apostle and of Lazarus and his sisters (John xi. 5). We can hardly dare to believe that that love, with all the yearning pity and the fervent prayer which it implied, would be altogether fruitless. There might be for a time the hesitation of a divided will, but the half-prophetic words "with God all things are possible," "there are last that shall be first," forbid our hasty condemnation, as they forbade that of the disciples, and prepare us to hope that some discipline would yet be found to overcome the evil which was eating into and would otherwise destroy so noble and beautiful a soul. However strongly the absence of the name of Lazarus, or of the locality to which he belonged, may seem to militate against this hypothesis, it must be remembered that there is just the same singular and perplexing omission in the narrative of the anointing in Matt. xxvi. and Mark xiv.

Combining these inferences then, we get, with some measure of likelihood, an insight into one aspect of the life of the Divine Teacher and Friend, full of the most living interest. The village of Bethany and its neighbourhood were,—probably from the first, certainly at a later period of our Lord's ministry,—a frequent retreat from the controversies and tumults of Jerusalem (John xviii. 2; Luke xxi. 37, xxii. 39). At some time or other one household, wealthy, honourable, belonging to the better or Nicodemus section of the Pharisees (see above, 1, 2, 3) learns to know and reverence him. There may have been within their knowledge or in their presence, one of the most signal proofs of His love and compassion for the outcast (*sup.* 4). Disease or death removes the father from the scene, and the two sisters are left with their younger brother to do as they think right. They appear at Bethany, or in some other village, where also they had a home (Luke x. 38, and Greswell, *l. c.*), as loving and reverential disciples, each according to her character. In them and in the brother over whom they watch, He finds that which is worthy of His love, the craving for truth and holiness, the hungering and thirsting after righteousness which shall assuredly be filled. But two at least need an education in the spiritual life. Martha tends to rest in outward activity and Pharisaic dogmatism, and does not rise to the thought of an eternal life as actually present. Lazarus (see 5) oscillates between the attractions of the higher life and those of the wealth and honour which surround the pathway of his life, and does not see how deep and wide were the commandments which, as he thought, he had "kept from his youth up." The searching words, the loving look and act,[f] fail to undo the evil which has been corroding his inner life. The discipline which could provide a remedy for it was among the things that were "impossible with men," and "possible with God only." A few weeks pass away, and then comes the sickness of John xi. One of the sharp malignant fevers of Palestine[g] cuts off the life that was so precious. The sisters know how truly the Divine Friend has loved him on whom their love and their hopes centered. They send to Him in the belief that the tidings of the sickness will at once draw Him to them (John xi. 3). Slowly, and in words which (though afterwards understood otherwise) must at the time have seemed to the disciples those of one upon whom the truth came not at once but by degrees, he prepares them for the worst. "This sickness is not unto death"—"Our friend Lazarus sleepeth"—"Lazarus is dead." The work which He was doing as a teacher or a healer (John x. 41, 42) in Bethabara, or the other Bethany (John x. 40, and i. 28), was

[d] The arrangement of Greswell, Tischendorf, and other harmonists, which places the inquiry of the rich ruler after the death and resurrection of Lazarus, is of course destructive of this hypothesis. It should be remembered, however, that Greswell assigns the same position to the incident of Luke x. 38-42. The order here followed is that given in the present work by Dr. Thomson under Gospels and Jesus Christ, by Lightfoot, and by Alford.

[e] The resemblance is drawn out in a striking and beautiful passage by Clement of Alexandria (*Quis Dives.* §10).

[f] By some interpreters the word was taken as = *κατεφίλησεν*. It was the received Rabbinic custom for the teacher to kiss the brow of the scholar whose answers gave special promise of wisdom and holiness. Comp. Grotius, *ad loc.*

[g] The character of the disease is inferred from its rapid progress, and from the fear expressed by Martha (John xi. 39). Comp. Lampe, *ad loc.*

not interrupted, and continues for two days after the message reaches him. Then comes the journey, occupying two days more. When He and His disciples come, three days have passed since the burial. The friends from Jerusalem, chiefly of the Pharisee and ruler class, are there with their consolations. The sisters receive the Prophet, each according to her character, Martha hastening on to meet Him, Mary sitting still in the house, both giving utterance to the sorrowful, half-reproachful thought, "Lord, if thou hadst been here my brother had not died" (John xi. 21-32). His sympathy with their sorrow leads Him also to weep as if he felt it in all the power of its hopelessness, though He came with the purpose and the power to remove it. Men wonder at what they look on as a sign of the intensity of His affection for him who had been cut off (John xi. 35, 36). They do not perhaps see that with this emotion there mingles indignation (ἐνεβριμήσατο, John xi. 33, 38) at their want of faith. Then comes the work of might as the answer of the prayer which the Son offers to the Father (John xi. 41, 42). The stone is rolled away from the mouth of the rock-chamber in which the body had been placed. The Evangelist writes as if he were once again living through every sight and sound of that hour. He records what could never fade from his memory any more than could the recollection of his glance into that other sepulchre (comp. John xi. 44, with xx. 7). "He that was dead came forth, bound hand and foot with grave-clothes; and his face was bound about with a napkin."

It is well not to break in upon the silence which hangs over the interval of that "four days' sleep" (comp. Trench, *Miracles*, *l. c.*). In nothing does the Gospel narrative contrast more strongly with the mythical histories which men have imagined of those who have returned from the unseen world,[h] and with the legends which in a later age have gathered round the name of Lazarus (Wright's *St. Patrick's Purgatory*, p. 167), than in this absence of all attempt to describe the experiences of the human soul that had passed from the life of sense to the land of the shadow of death. But thus much at least must be borne in mind in order that we may understand what has yet to come, that the man who was thus recalled as on eagle's wings from the kingdom of the grave (comp. the language of the complaint of Hades in the Apocryphal Gospel of Nicodemus, Tischendorf, *Evang. Apoc.* p. 305) must have learnt "what it is to die" (comp. a passage of great beauty in Tennyson's *In Memoriam*, xxxi. xxxii.). The soul that had looked with open gaze upon the things behind the vail had passed through a discipline sufficient to burn out all selfish love of the accidents of his outward life.[i] There may have been an inward resurrection parallel with the outward (comp. Olshausen, *ad loc.*). What men had given over as impossible had been shown in a twofold sense to be possible with God.

One scene more meets us, and then the life of the family which has come before us with such daylight clearness lapses again into obscurity. The fame of the wonder spreads rapidly, as it was likely to do, among the ruling class, some of whom had witnessed it. It becomes one of the proximate occasions of the plots of the Sanhedrim against our Lord's life (John xi. 47-53). It brings Lazarus no less than Jesus within the range of their enmity (John xii. 10), and leads perhaps to his withdrawing for a time from Bethany (Greswell). They persuade themselves apparently that they see in him one who has been a sharer in a great imposture, or who has been restored to life through some demoniac agency.[k] But others gather round to wonder and congratulate. In the house which, though it still bore the father's name (*sup.* 1), was the dwelling of the sisters and the brother, there is a supper, and Lazarus is there, and Martha serves, no longer jealously, and Mary pours out her love in the costly offering of the spikenard ointment, and finds herself once again misjudged and hastily condemned. The conjecture which has been ventured on above connects itself with this fact also. The indignant question of Judas and the other disciples implies the *expectation* of a lavish distribution among the poor. They look on the feast as like that which they had seen in the house of Matthew the publican, the farewell banquet given to large numbers (comp. John xii. 9, 12) by one who was renouncing the habits of his former life. If they had in their minds the recollection of the words, "Sell that thou hast, and give to the poor," we can understand with what a sharpened edge their reproach would come as they contrasted the command which their Lord had given with the "waste" which He thus approved. After this all direct knowledge of Lazarus ceases. We may think of him, however, as sharing in or witnessing the kingly march from Bethany to Jerusalem (Mark xi. 1), "enduring life again that Passover to keep" (Keble, *Christian Year*, Advent Sunday). The sisters and the brother must have watched eagerly, during those days of rapid change and wonderful expectation, for the evening's return to Bethany and the hours during which "He lodged there" (Matt. xxi. 17). It would be as plausible an explanation of the strange fact recorded by St. Mark alone (xiv. 51) as any other, if we were to suppose that Lazarus, whose home was near, who must have known the place to which the Lord "oftentimes resorted," was drawn to the garden of Gethsemane by the approach of the officers "with their torches and lanterns and weapons" (John xviii. 3), and in the haste of the night-alarm, rushed eagerly "with the linen cloth cast about his naked body," to see whether he was in time to render any help. Whoever it may have been, it was not one of the company of professed disciples. It was one who was drawn by some strong impulse to follow Jesus when they, all of them, "forsook him and fled." It was one whom the high-priest's servants were

[h] The return of Eros the Armenian (Plato, *Rep.* x.) and Cunningham of Melrose (Bede, *Eccl. Hist.* v. 12) may be taken as two typical instances, appearing under circumstances the most contrasted possible, yet having not a few features in common.

[i] A tradition of more than average interest, bearing on this point, is mentioned (though without an authority) by Trench (*Miracles*, *l. c.*). The first question asked by Lazarus, on his return to life, was whether he should die again. He heard that he was still subject to the common doom of all men, and was never afterwards seen to smile.

[k] The explanation, "He casteth out devils by Beelzebub" (Matt. ix. 34, x. 25; Mark iii. 22, &c.), which originated with the scribes of Jerusalem, would naturally be applied to such a case as this. That it was so applied we may infer from the statement in the *Sepher Toldoth Jeshu* (the Rabbinic anticipation of another *Life of Jesus*), that this and other like miracles were wrought by the mystic power of the cabbalistic Shemhamphorash, or other magical formula (Lampe, *Comm. in Joan.* xi. 44).

eager to seize, as if destined for a second victim (comp. John xii. 10), when they made no effort to detain any other. The linen-cloth (σινδών), forming, as it did, one of the "soft raiment" of Matt. xi. 8, used in the dress and in the funerals of the rich (Mark xv. 46; Matt. xxvii. 59), points to a form of life like that which we have seen reason to assign to Lazarus (comp. also the use of the word in the LXX. of Judg. xiv. 12, and Prov. xxxi. 24). Uncertain as all inferences of this kind must be, this is perhaps at least as plausible as those which identify the form that appeared so startlingly with St. John (Ambrose, Chrysost., Greg. Mag.); or St. Mark (Olshausen, Lange, Isaac Williams (*On the Passion*, p. 30); or James the brother of the Lord (Epiphan. *Haer.* p. 87, 13; comp. Meyer, *ad loc.*); and, on this hypothesis, the omission of the name is in harmony with the noticeable reticence of the first three Gospels throughout as to the members of the family at Bethany. We can hardly help believing that to them, as to others ("the five hundred brethren at once," 1 Cor. xv. 6), was manifested the presence of their risen Lord; that they must have been sharers in the Pentecostal gifts, and have taken their place among the members of the infant Church at Jerusalem in the first days of its overflowing love; that then, if not before, the command, "Sell that thou hast and give to the poor," was obeyed by the heir of Bethany, as it was by other possessors of lands or houses (Acts ii. 44, 45). But they had chosen now, it would seem, the better part of a humble and a holy life, and their names appear no more in the history of the N. T. Apocryphal traditions even are singularly scanty and jejune, as if the silence which "sealed the lips of the Evangelists" had restrained others also. We almost wonder, looking at the wild luxuriance with which they gather round other names, that they have nothing more to tell of Lazarus than the meagre tale that follows: —He lived for thirty years after his resurrection, and died at the age of sixty (Epiphan. *Haer.* i. 652). When he came forth from the tomb, it was with the bloom and fragrance as of a bridegroom (Ἀνθοφορὰ Παλαιῶν, Thilo, *Cod. Apoc. N. T.* p. 805). He and his sisters, with Mary the wife of Cleophas, and other disciples, were sent out to sea by the Jews in a leaky boat, but miraculously escaped destruction, and were brought safely to Marseilles. There he preached the Gospel, and founded a church, and became its bishop. After many years, he suffered martyrdom, and was buried, some said, there; others, at Citium in Cyprus. Finally his bones and those of Mary Magdalene were brought from Cyprus to Constantinople by the Emperor Leo the Philosopher, and a church erected to his honour. Some apocryphal books were extant bearing his name (comp. Thilo, *Codex Apoc. N. T.* p. 711; Baronius, *ad Martyrol. Rom. Dec.* xvii.; and for some wild Provençal legends as to the later adventures of Martha, Migne, *Dict. de la Bible*, s. v. "Marthe"). These traditions have no personal or historical interest for us. In one instance only do they connect themselves with any fact of importance in the later history of Christendom. The Canons of St. Victor at Paris occupied a Priory dedicated (as one of the chief churches at Marseilles had been) to St. Lazarus. This was assigned, in 1633, to the fraternity of the Congregation founded by St. Vincent de Paul, and the mission-priests sent forth by it consequently became conspicuous as the Lazarists (Butler's *Lives of the Saints*, July xix.).

The question why the first three Gospels omit all mention of so wonderful a fact as the resurrection of Lazarus, has from a comparatively early period forced itself upon interpreters and apologists. Rationalist critics have made it one of their chief points of attack, directly on the trustworthiness of St. John, indirectly on the credibility of the Gospel history as a whole. Spinoza professed to make this the crucial instance by which, if he had but proof of it, he would be determined to embrace the common faith of Christians (Bayle, *Dict.* s. v. "Spinoza"). Woolston, the *maledicentissimus* of English Deists, asserts that the story is "brimfull of absurdities," "a contexture of folly and fraud" (*Dis. on Miracles*, v.; comp. N. Lardner's *Vindications*, Works, ii. 1-54). Strauss (*Leben Jesu*, pt. ii. ch. ix. §100) scatters with triumphant scorn the subterfuges of Paulus and the naturalist-interpreters (such, for example, as the hypothesis of suspended animation), and pronounces the narrative to have all the characteristics of a mythus. Ewald (*Gesch.* v. p. 404), on the other hand, in marked contrast to Strauss, recognises, not only the tenderness and beauty of St. John's narrative, and its value as a representation of the quickening power of Christ, but also its distinct historical character. The explanations given of the perplexing phenomenon are briefly these: (1) That fear of drawing down persecution on one already singled out for it, kept the three Evangelists, writing during the lifetime of Lazarus, from all mention of him; and that, this reason for silence being removed by his death, St. John could write freely. By some (Grotius, *ad loc.*) this has perhaps been urged too exclusively. By others (Alford, *ad loc.*; Trench, *On Miracles*, l. c.) it has perhaps been too hastily rejected as extravagant. (2) That the writers of the first three Gospels confine themselves, as by a deliberate plan, to the miracles wrought in Galilee (that of the blind man at Jericho being the only exception), and that they therefore abstained from all mention of any fact, however interesting, that lay outside that limit (Meyer, *ad loc.*). This too has its weight, as showing that, in this omission, the three Evangelists are at least consistent with themselves, but it leaves the question, "what led to that consistency?" unanswered. (3) That the narrative, in its beauty and simplicity, its human sympathies and marvellous transparency, carries with it the evidence of its own truthfulness, and is as far removed as possible from the embellishments and rhetoric of a writer of myths, bent upon the invention of a miracle which should outdo all others (Meyer, *l. c.*). In this there is no doubt great truth. To invent and tell any story as this is told would require a power equal to that of the highest artistic skill of our later age, and that skill we should hardly expect to find combined at once with the deepest yearnings after truth and a deliberate perversion of it. There would seem, to any but a rationalist critic, an improbability quite infinite, in the union, in any single writer, of the characteristics of a Goethe, an Ireland, and an à Kempis. (4) Another explanation, suggested by the attempt to represent to one's-self what must have been the sequel of such a fact as that now in question upon the life of him who had been affected by it, may perhaps be added. The history of monastic orders, of sudden conversions after great critical deliverances from disease or danger, offers an analogy which may help to guide us. In such cases it has happened, in a thousand instances, that the man has felt as if the thread of his life was broken, the past buried for ever, old things vanished away,

He retires from the world, changes his name, speaks to no one, or speaks only in hints, of all that belongs to his former life, shrinks above all from making his conversion, his resurrection from the death of sin, the subject of common talk. The instance already referred to in Bede offers a very striking illustration of this. Cunningham, in that history, gives up all to his wife, his children, and the poor, retires to the monastery of Melrose, takes the new name of Drithelm, and "would not relate these and other things which he had seen to slothful persons and such as lived negligently." Assume only that the laws of the spiritual life worked in some such way on Lazarus; that the feeling would be strong in proportion to the greatness of the wonder to which it owed its birth; that there was the recollection, in him and in others, that, in the nearest parallel instance, silence and secrecy had been solemnly enjoined (Mark v. 43), and it will seem hardly wonderful that such a man should shrink from publicity, and should wish to take his place as the last and lowest in the company of believers. Is it strange that it should come to be tacitly recognised among the members of the Church of Jerusalem that, so long as he and those dear to him survived, the great wonder of their lives was a thing to be remembered with awe by those who knew it, not to be talked or written about to those who knew it not?

The facts of the case are, at any rate, singularly in harmony with this last explanation. St. Matthew and St. Mark, who (the one writing for the Hebrews, the other under the guidance of St. Peter) represent what may be described as the feeling of the Jerusalem Church, omit equally all mention of the three names. They use words which may indeed have been *φανάντα συνετοῖσιν*, but they avoid the names. Mary's costly offering is that of "a woman" (Matt. xxvi. 7; Mark xiv. 3). The house in which the feast was made is described so as to indicate it sufficiently to those who knew the place, and yet to keep the name of Lazarus out of sight. The hypotheses stated above would add two more instances of the same reticence. St. Luke, coming later (probably after St. Matthew and St. Mark had left the Church of Jerusalem with the materials afterwards shaped into their Gospels), collecting from all informants all the facts they will communicate, comes across one in which the two sisters are mentioned by name, and records it, suppressing, or not having learnt, that of the locality. St. John, writing long afterwards, when all three had "fallen asleep," feels that the restraint is no longer necessary, and puts on record, as the Spirit brings all things to his remembrance, the whole of the wonderful history. The circumstances of his life, too, his residence in or near Jerusalem as the protector of the bereaved mother of his Lord (John xix. 27), his retirement from prominent activity for so long a period [JOHN THE APOSTLE], the insight we find he had into the thoughts and feelings of those who would be the natural companions and friends of the sisters of Lazarus (John xx. 1, 11-18); all these indicate that he more than any other Evangelist was likely to have lived in that inmost circle of disciples, where these things would be most lovingly and reverently remembered. Thus much of truth there is, as usual, in the idealism of some interpreters, that what to most other disciples would seem simply a *miracle* (*τέρας*), a work of power (*δύναμις*), like other works, and therefore one which they could without much reluctance omit, would be also a *sign* (*σημεῖον*), manifesting the glory of God, witnessing that Jesus was "the resurrection and the life," which he could in no wise pass over, but must when the right time came record in its fulness. (Comp. for this significance of the miracle, and for its probable use in the spiritual education of Lazarus, Olshausen, *ad loc.*) It is of course obvious, that if this supposition accounts for the omission in the three Gospels of the name and history of Lazarus, it accounts also for the chronological dislocation and harmonistic difficulties which were its inevitable consequences.

2. The name Lazarus occurs also in the well-known parable of Luke xvi. 19-31. What is there chiefly remarkable is, that while in all other cases persons are introduced as in certain stations, belonging to certain classes, here, and here only, we meet with a proper name. Is this exceptional fact to be looked on as simply one of the accessories of the parable, giving as it were a dramatic semblance of reality to what was, like other parables, only an illustration? Were the thoughts of men called to the etymology of the name, as signifying that he who bore it had in his poverty no help but God (comp. Germ. "Gotthilf"), or as meaning, in the shortened form, one who had become altogether "helpless"? (So Theophyl. *ad loc.*, who explains it as = *ἀβοήθητος*, recognising possibly the derivation which has been suggested by later critics from לֹא עֵזֶר, "there is no help." Comp. Suicer, *s. v.*; Lampe, *ad loc.*) Or was it again not a parable but, in its starting-point at least, a history, so that Lazarus was some actual beggar, like him who lay at the beautiful gate of the Temple, familiar therefore both to the disciples and the Pharisees? (So Theophyl. *ad loc.*; Chrysost., Maldon.; Suicer, *s. v.* Λάζαρος.) Whatever the merit of either of these suggestions, no one of them can be accepted as quite satisfactory, and it adds something to the force of the hypothesis ventured on above, to find that it connects itself with this question also. The key which has served to open other doors fits into the wards here. If we assume the identity suggested in (5), or if, leaving that as unproved, we remember only that the historic Lazarus belonged by birth to the class of the wealthy and influential Pharisees, as in (3), then, though we may not think of him as among those who were "covetous," and who therefore derided by scornful look and gesture (*ἐξεμυκτήριζον*, Luke xvi. 14) Him who taught that they could not serve God and Mammon, we may yet look on him as one of the same class, known to them, associating with them, only too liable, in spite of all the promise of his youth, to be drawn away by that which had corrupted them. Could anything be more significant, if this were so, than the introduction of this name into such a parable? Not Eleazar the Pharisee, rich, honoured, blameless among men, but Eleazar the beggar, full of leprous sores, lying at the rich man's gate, was the true heir of blessedness, for whom was reserved the glory of being in Abraham's bosom. Very striking too, it must be added, is the coincidence between the teaching of the parable and of the history in another point. The Lazarus of the one remains in Abraham's bosom because "if men hear not Moses and the prophets, neither will they be persuaded, though one rose from the dead." The Lazarus of the other returned from it, and yet bears no witness to the unbelieving Jews of the wonders or the terrors of Hades.

In this instance also the name of Lazarus has

been perpetuated in an institution of the Christian Church. The parable did its work, even in the dark days of her life, in leading men to dread simply selfish luxury, and to help even the most loath some forms of suffering. The leper of the Middle Ages appears as a Lazzaro.[a] Among the orders, half-military and half-monastic, of the 12th century, was one which bore the title of the Knights of St. Lazarus (A.D. 1119), whose special work it was to minister to the lepers, first of Syria, and afterwards of Europe. The use of *lazaretto* and *lazar-house* for the leper-hospitals then founded in all parts of Western Christendom, no less than that of *lazzarone* for the mendicants of Italian towns, are indications of the effect of the parable upon the mind of Europe in the Middle Ages, and thence upon its later speech. In some cases there seems to have been a singular transfer of the attributes of the one Lazarus to the other. Thus in Paris the prison of St. Lazare (the Clos S. Lazare, so famous in 1848) had been originally an hospital for lepers. In the 17th century it was assigned to the Society of Lazarists, who took their name, as has been said, from Lazarus of Bethany, and St. Vincent de Paul died there in 1660. In the immediate neighbourhood of the prison, however, are two streets, the Rue d'Enfer and Rue de Paradis, the names of which indicate the earlier associations with the Lazarus of the parable.

It may be mentioned incidentally, as there has been no article under the head of DIVES, that the occurrence of this word, used as a quasi-proper name, in our early English literature, is another proof of the impression which was made on the minds of men, either by the parable itself, or by dramatic representations of it in the mediaeval mysteries. The writer does not know where it is found for the first time in this sense, but it appears as early as Chaucer ("Lazar and Dives," Sompnoure's Tale) and Piers Ploughman ("Dives in the deyntees lyvede," l. 9158), and in later theological literature its use has been all but universal. In no other instance has a descriptive adjective passed in this way into the received name of an individual. The name Nimeusis, which Euthymius gives as that of the rich man (Trench, *Parables*, l. c.), seems never to have come into any general use.

[E. H. P.]

LEAD (עוֹפֶרֶת: μόλιβος, μόλιβδος), one of the most common of metals, found generally in veins of rocks, though seldom in a metallic state, and most commonly in combination with sulphur. It was early known to the ancients, and the allusions to it in Scripture indicate that the Hebrews were well acquainted with its uses. The rocks in the neighbourhood of Sinai yielded it in large quantities, and it was found in Egypt. That it was common in Palestine is shown by the expression in Ecclus. xlvii. 18, where it is said, in apostrophising Solomon, "Thou didst multiply silver as *lead*;" the writer having in view the hyperbolical description of Solomon's wealth in 1 K. x. 27: "the king made the silver to be in Jerusalem as *stones*." It was among the spoils of the Midianites which the children of Israel brought with them to the plains of Moab, after their return from the slaughter of the tribe (Num. xxxi. 22). The ships of Tarshish supplied the market of Tyre with lead, as with other metals (Ez. xxvii. 12). Its heaviness, to which allusion is made in Ex. xv. 10, and Ecclus. xxii. 14, caused it to be used for weights, which were either in the form of a round flat cake (Zech. v. 7), or a rough unfashioned lump or "stone" (ver. 8); stones having in ancient times served the purpose of weights (comp. Prov. xvi. 11). This fact may perhaps explain the substitution of "lead" for "stones" in the passage of Ecclesiasticus above quoted; the commonest use of the commonest metal being present to the mind of the writer. If Gesenius is correct in rendering אֲנָךְ, *ănâc*, by "lead," in Am. vii. 7, 8, we have another instance of the purposes to which this metal was applied in forming the ball or bob of the plumb-line. [PLUMB-LINE.] Its use for weighting fishing-lines was known in the time of Homer (*Il.* xxiv. 80). But Bochart and others identify *ănâc* with tin, and derive from it the etymology of "Britain."

In modern metallurgy lead is used with tin in the composition of solder for fastening metals together. That the ancient Hebrews were acquainted with the use of solder is evident from the description given by the prophet Isaiah of the processes which accompanied the formation of an image for idolatrous worship. The method by which two pieces of metal were joined together was identical with that employed in modern times; the substances to be united being first clamped before being soldered. No hint is given as to the composition of the solder, but in all probability lead was one of the materials employed, its usage for such a purpose being of great antiquity. The ancient Egyptians used it for fastening stones together in the rough parts of a building, and it was found by Mr. Layard among the ruins at Nimroud (*Nin. and Bab.* p. 357). Mr. Napier (*Metallurgy of the Bible*, p. 130) conjectures that "the solder used in early times for lead, and termed lead, was the same as is now used—a mixture of lead and tin."

But, in addition to these more obvious uses of this metal, the Hebrews were acquainted with another method of employing it, which indicates some advance in the arts at an early period. Job (xix. 24) utters a wish that his words, "with a pen of iron and lead, were graven in the rock for ever." The allusion is supposed to be to the practice of carving inscriptions upon stone, and pouring molten lead into the cavities of the letters, to render them legible, and at the same time preserve them from the action of the air. Frequent references to the use of leaden tablets for inscriptions are found in ancient writers. Pausanias (ix. 31) saw Hesiod' Works and Days graven on lead, but almost illegible with age. Public proclamations, according to Pliny (xiii. 21), were written on lead, and the name of Germanicus was carved on leaden tablets (Tac. *Ann.* ii. 69). Eutychius (*Ann. Alex.* p. 390) relates that the history of the Seven Sleepers was engraved on lead by the Cadi.

Oxide of lead is employed largely in modern pottery for the formation of glazes, and its presence has been discovered in analyzing the articles of earthenware found in Egypt and Nineveh, proving that the ancients were acquainted with its use for the same purpose. The A. V. of Ecclus. xxxviii. 30 assumes that the usage was known to the Hebrews;

[a] It is interesting, as connected with the traditions given above under (1), to find that the first occurrence of the name with this generic meaning is in the old Provençal dialect, under the form Ladre. (Comp. Diez, *Romanisches Wörterbuch*, s. v. "Lazzaro.")

though the original is not explicit upon the point. Speaking of the potter's art in finishing off his work, "he applieth himself to *lead* it over," is the rendering of what in the Greek is simply "he giveth his heart to complete the smearing," the material employed for the purpose not being indicated.

In modern metallurgy lead is employed for the purpose of purifying silver from other mineral products. The alloy is mixed with lead, exposed to fusion upon an earthen vessel, and submitted to a blast of air. By this means the dross is consumed. This process is called the cupelling operation, with which the description in Ex. xxii. 18-22, in the opinion of Mr. Napier (*Met. of Bible*, pp. 20-24), accurately coincides. "The vessel containing the alloy is surrounded by the fire, or placed in the midst of it, and the blowing is not applied to the fire, but to the fused metals. . . . And when this is done, nothing but the perfect metals, gold and silver, can resist the scorifying influence." And in support of his conclusion he quotes Jer. vi. 28-30, adding, "This description is perfect. If we take silver having the impurities in it described in the text, namely iron, copper, and tin, and mix it with lead, and place it in the fire upon a cupell, it soon melts; the lead will oxidise and form a thick coarse crust upon the surface, and thus consume away, but effecting no purifying influence. The alloy remains, if anything, worse than before. . . . The silver is not refined, because 'the bellows were burned'—there existed nothing to blow upon it. Lead is the purifier, but only so in connexion with a blast blowing upon the precious metals." An allusion to this use of lead is to be found in Theognis (*Gnom.* 1127, 8; ed. Welcker), and it is mentioned by Pliny (xxxiii. 31) as indispensable to the purification of silver from alloy. [W. A. W.]

LEBA'NA (לְבָנָא: Λαβανά; Cod. Fr. Aug. Λαβάν: *Lebana*), one of the Nethinim whose descendants returned from Babylon with Zerubbabel (Neh. vii. 48). He is called LABANA in the parallel list of 1 Esdras, and

LEBA'NAH (לְבָנָה: Λαβανά: *Lebana*) in Ezr. ii. 45.

LEAF, LEAVES. The word occurs in the A. V. either in the singular or plural number in three different senses—(1) *Leaf* or *leaves* of trees. (2) *Leaves* of the doors of the Temple. (3) *Leaves* of the roll of a book.

1. LEAF (עָלֶה,[a] *deleh*; טָרֶף,[b] *tereph*; עָפֶה,[c] *aphi*: φύλλον, στέλεχος, ἀνάβασις: *folium, frons, cortex*). The olive-leaf is mentioned in Gen. viii. 11. Fig-leaves formed the first covering of our parents in Eden. The barren fig-tree (Matt. xxi. 19; Mark xi. 13) on the road between Bethany and Jerusalem "had on it nothing but *leaves*." The fig-leaf is alluded to by our Lord (Matt. xxiv. 32; Mark xiii. 28): "When his branch is yet tender, and putteth forth leaves, ye know that summer is nigh." The oak-leaf is mentioned in Is. i. 30, and vi. 13. The righteous are often compared to green leaves (Jer. xvii. 8): "her leaf shall be green"—to leaves that fade not (Ps. i. 3)—"his leaf also shall not wither." The ungodly on the other hand are as "an oak whose leaf fadeth" (Is. i. 30); as a tree which "shall wither in all the leaves of her spring" (Ez. xvii. 9); the "sound of a shaken leaf shall chase them" (Lev. xxvi. 36). In Ezekiel's vision of the holy waters, the blessings of the Messiah's kingdom are spoken of under the image of trees growing on a river's bank; there "shall grow all" trees for food, whose leaf shall not fade" (Ez. xlvii. 12). In this passage it is said that "the fruit of these trees shall be for food, and the leaf thereof for medicine" (margin, *for bruises and sores*). With this compare (Rev. xxii. 1, 2) St. John's vision of the heavenly Jerusalem. "In the midst of the street of it, and on either side of the river, was there the tree of life and the leaves of the tree were for the healing of the nations." There is probably here an allusion to some tree whose leaves were used by the Jews as a medicine or ointment; indeed, it is very likely that many plants and leaves were thus made use of by them, as by the old English herbalists.

2. LEAVES of doors (צְלָעִים, *tsēlāīm*; דֶּלֶת, *deleth*: πτυχή, θύρωμα: *ostium, ostiolum*). The Hebrew word, which occurs very many times in the Bible, and which in 1 K. vi. 32 (margin) and 34 is translated "leaves" in the A. V., signifies *beams, ribs, sides*, &c. In Ex. xli. 24, "And the doors had two leaves apiece," the Hebrew word *deleth* is the representative of both *doors* and *leaves*. By the expression two-leaved doors, we are no doubt to understand what we term folding-doors.

3. LEAVES of a book or roll (דֶּלֶת, *deleth*: σελίς: *pagella*) occurs in this sense only in Jer. xxxvi. 23. The Hebrew word (literally *doors*) would perhaps be more correctly translated *columns*. The Latin *columna*, and the English *column*, as applied to a book, are probably derived from resemblance to a column of a building. [W. H.]

LE'AH (לֵאָה: Λεία, Λία: *Lia*), the elder daughter of Laban (Gen. xxix. 16). The dulness or weakness of her eyes was so notable, that it is mentioned as a contrast to the beautiful form and appearance of her younger sister Rachel. Her father took advantage of the opportunity which the local marriage-rite afforded to pass her off in her sister's stead on the unconscious bridegroom, and excused himself to Jacob by alleging that the custom of the country forbade the younger sister to be given first in marriage. Rosenmüller cites instances of these customs prevailing to this day in some parts of the East. Jacob's preference of Rachel grew into hatred of Leah, after he had married both sisters. Leah, however, bore to him in quick succession Reuben, Simeon, Levi, Judah, then Issachar, Zebulun, and Dinah, before Rachel had a child. Leah was conscious and resentful (ch. xxx.) of the smaller share she possessed in her husband's affections; yet in Jacob's differences with his father-in-law, his two wives appear to be attached to him with equal fidelity. In the critical moment when he expected an attack from Esau, his discriminate regard for the several members of his family was shown by his placing Rachel

[a] From עָלָה, to ascend or grow up. Precisely identical in ἀνάβασις, from ἀναβαίνω, to ascend.

[b] Strictly, "a green and tender leaf," "one easily plucked off;" from טָרַף, "to tear, or pluck off," whence "all the leaves of her spring" (Ez. xvii. 9). Comp. the Syr. ܛܪܦܐ, *folium*, from ܛܪܦ, to strike off (Castell. *Lex. Hept.* s. v.).

[c] From the unused root עָפָה, to flower: Syr. ܥܦܝ; Arab. عفى.

and her child hindermost, in the least exposed situation, Leah and her children next, and the two handmaids with their children in the front. Leah probably lived to witness the dishonour of her daughter (ch. xxxiv.), so cruelly avenged by two of her sons; and the subsequent deaths of Deborah at Bethel, and of Rachel near Bethlehem. She died some time after Jacob reached the south country in which his father Isaac lived. Her name is not mentioned in the list of Jacob's family (ch. xlvi. 5) when they went down into Egypt. She was buried in the family grave in Machpelah (ch. xlix. 31). [W. T. B.]

LEASING, "falsehood." This word is retained in the A. V. of Ps. iv. 2, v. 6, from the older English versions; but the Hebrew word of which it is the rendering is elsewhere almost uniformly translated "lies" (Ps. xl. 4, lviii. 3, &c.). It is derived from the Anglo-Saxon *leas*, "false," whence *leasung*, "leasing," "falsehood," and is of frequent occurrence in old English writers. So in Piers Ploughman's *Vision*, 2113:

> "Tel me no tales,
> Ne *lesynge* to laughen of."

And in Wiclif's New Testament, John viii. 44, "Whanne he spekith a *lesinge*, he spekith of his owne thingis, for he is a lyiere, and fadir of it." It is used both by Spenser and Shakspere. [W. A. W.]

LEATHER (עוֹר, *'or*). The notices of leather in the Bible are singularly few; indeed the word occurs but twice in the A. V., and in each instance in reference to the same object, a girdle (2 K. i. 8; Matt. iii. 4). There are, however, other instances in which the word "leather" might with propriety be substituted for "skin," as in the passages in which vessels (Lev. xi. 32; Num. xxxi. 20) or raiment (Lev. xiii. 48) are spoken of; for in these cases the skins must have been prepared. Though the material itself is seldom noticed, yet we cannot doubt that it was extensively used by the Jews; shoes, bottles, thongs, garments, kneading-troughs, ropes, and other articles, were made of it. For the mode of preparing it see TANNER. [W. L. B.]

LEAVEN (שְׂאֹר, *seor*: ζύμη: *fermentum*). The Hebrew word *seor* has the radical sense of *effervescence* or *fermentation*, and therefore corresponds in point of etymology to the Greek ζύμη (from ζέω), the Latin *fermentum* (from *ferveo*), and the English *leaven* (from *levare*). It occurs only five times in the Bible (Ex. xii. 15, 19, xiii. 7: Lev. ii. 11; Deut. xvi. 4), and is translated "leaven" in the first four of the passages quoted, and "leavened bread" in the last. In connexion with it, we must notice the terms *khamets*[a] and *matstsóth*,[b] the former signifying "fermented" or "leavened," literally "sharpened," bread; the latter "unleavened," the radical force of the word being variously understood to signify *sweetness* or *purity*. The three words appear in juxtaposition in Ex. xiii. 7: "Unleavened bread (*matstsóth*) shall be eaten seven days; and there shall no leavened bread (*khametz*) be seen with thee, neither shall there be leaven (*seor*) seen with thee in all thy quarters." Various substances were known to have fermenting properties; but the ordinary leaven consisted of a lump of old dough in a high state of fermentation, which was inserted into the mass of dough prepared for baking. [BREAD.] As the process of producing the leaven itself, or even of leavening bread when the substance was at hand, required some time, unleavened cakes were more usually produced on sudden emergencies (Gen. xviii. 6; Judg. vi. 19). The use of leaven was strictly forbidden in all offerings made to the Lord by fire; as in the case of the meat-offering (Lev. ii. 11), the trespass-offering (Lev. vii. 12), the consecration-offering (Ex. xxix. 2; Lev. viii. 2), the Nazarite-offering (Num. vi. 15), and more particularly in regard to the feast of the Passover, when the Israelites were not only prohibited on pain of death from eating leavened bread, but even from having any leaven in their houses (Ex. xii. 15, 19) or in their land (Ex. xiii. 7; Deut. xvi. 4) during seven days commencing with the 14th of Nisan. It is in reference to these prohibitions that Amos (iv. 5) ironically bids the Jews of his day to "offer a sacrifice of thanksgiving *with leaven*;" and hence even honey was prohibited (Lev. ii. 11), on account of its occasionally producing fermentation. In other instances, where the offering was to be consumed by the priests, and not on the altar, leaven might be used, as in the case of the peace-offering (Lev. vii. 13), and the Pentecostal loaves (Lev. xxiii. 17). Various ideas were associated with the prohibition of leaven in the instances above quoted; in the feast of the Passover it served to remind the Israelites both of the haste with which they fled out of Egypt (Ex. xii. 39), and of the sufferings that they had undergone in that land, the insipidity of unleavened bread rendering it a not inapt emblem of affliction (Deut. xvi. 3). But the most prominent idea, and the one which applies equally to all the cases of prohibition, is connected with the *corruption* which leaven itself had undergone, and which it communicated to bread in the process of fermentation. It is to this property of leaven that our Saviour points when he speaks of the "leaven (*i. e.* the corrupt doctrine) of the Pharisees and of the Sadducees" (Matt. xvi. 6); and St. Paul, when he speaks of the "old leaven" (1 Cor. v. 7). This association of ideas was not peculiar to the Jews; it was familiar to the Romans, who forbade the priest of Jupiter to touch flour mixed with leaven (Gell. x. 15, 19), and who occasionally used the word *fermentum* as = "corruption" (Pers. *Sat.* i. 24). Plutarch's explanation is very much to the point: "The leaven itself is born from corruption, and corrupts the mass with which it is mixed" (*Quaest. Rom.* 109). Another quality in leaven is noticed in the Bible, viz. its *secretly penetrating* and *diffusive* power hence the proverbial saying, "a little leaven leaveneth the whole lump" (1 Cor. v. 6; Gal. v. 9). In this respect it was emblematic of moral influence generally, whether good or bad, and hence our Saviour adopts it as illustrating the growth of the kingdom of heaven in the individual heart and in the world at large (Matt. xiii. 33). [W. L. B.]

LEB'ANON (in prose with the art. הַלְּבָנוֹן, 1 K. v. 20; in poetry without the art. לְבָנוֹן, Ps. xxix. 6: Λίβανος: *Libanus*), a mountain range in the north of Palestine. The name *Lebanon* signifies "white," and was applied either on account of the snow, which, during a great part of the year, covers

[a] חָמֵץ. Another form of the same root, *khomets* חֹמֶץ, is applied to sharpened or sour wine [VINEGAR]: *khamets* is applied exclusively to bread.

[b] מַצּוֹת.

its whole summit,[a] or on account of the white colour of its limestone cliffs and peaks. It is the "white mountain"—the *Mont Blanc* of Palestine; an appellation which seems to be given, in one form or another, to the highest mountains in all the countries of the old world. Lebanon is represented in Scripture as lying upon the northern border of the land of Israel (Deut. i. 7, xi. 24; Josh. i. 4). Two distinct ranges bear this name. They both begin in lat. 33° 20', and run in parallel lines from S.W. to N.E. for about 90 geog. miles, enclosing between them a long fertile valley from 5 to 8 miles wide, anciently called *Coele-Syria*. The modern name is *el-Bukâ'a*,[b] "the valley," corresponding exactly to "the valley of Lebanon" in Joshua (xi. 17).[c] It is a northern prolongation of the Jordan valley, and likewise a southern prolongation of that of the Orontes (Porter's *Handbook*, p. xvi.). The western range is the "Libanus" of the old geographers, and the Lebanon of Scripture, where Solomon got timber for the temple (1 K. v. 9, &c.), and where the Hivites and Giblites dwelt (Judg. iii. 3; Josh. xiii. 5). The eastern range was called "Anti-Libanus" by geographers, and "Lebanon toward the sun-rising" by the sacred writers (Josh. xiii. 5). Strabo describes (xvi. p. 754) the two as commencing near the Mediterranean—the former at Tripolis, and the latter at Sidon—and running in parallel lines toward Damascus; and, strange to say, this error has, in part at least, been followed by most modern writers, who represent the mountain-range between Tyre and the lake of Merom as a branch of Anti-Libanus (Winer, *Realwb.*, s. v. "Libanon;" Robinson, 1st ed. iii. 346; but see the corrections in the new edition). The topography of Anti-Libanus was first clearly described in Porter's *Damascus* (i. 297, &c., ii. 309, &c.). A deep valley called *Wady et-Teim* separates the southern section of Anti-Libanus from both Lebanon and the hills of Galilee.[d]

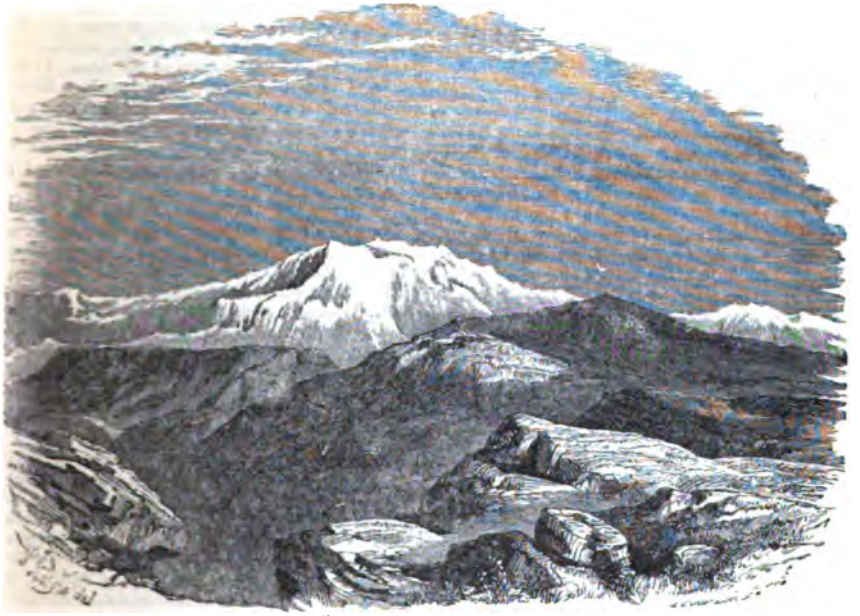
Lebanon—the western range—commences on the south at the deep ravine of the *Litâny*, the ancient river Leontes, which drains the valley of Coele-Syria, and falls into the Mediterranean five miles north of Tyre. It runs N.E. in a straight line parallel to the coast, to the opening from the Mediterranean into the plain of Emesa, called in Scripture the "Entrance of Hamath" (Num. xxxiv. 8). Here *Nahr el-Kebîr*—the ancient river Eleutherus—sweeps round its northern end, as the Leontes does round its southern. The average elevation of the range is from 6000 to 8000 ft.; but two peaks rise considerably higher. One of these is *Sunnîn*, nearly on the parallel of *Beyrout*, which is more than 9000 feet; the other is *Jebel Mukhmel*, which was measured in September, 1860, by the hydrographer of the Admiralty, and found to be very nearly 10,200 feet high (*Nat. Hist. Rev.*, No. V. p. 11). It is the highest mountain in Syria. On the summits of both these peaks the snow remains in patches during the whole summer.

The central ridge or backbone of Lebanon has smooth, barren sides, and gray rounded summits. It is entirely destitute of verdure, and is covered with small fragments of limestone, from which white crowns and jagged points of naked rock shoot up at intervals. Here and there a few stunted pine-trees or dwarf oaks are met with. The line of cultivation runs along at the height of about 6000 ft.; and below this the features of the western slopes are entirely different. The descent is gradual; but is everywhere broken by precipices and towering rocks which time and the elements have chiselled into strange, fantastic shapes. Ravines of singular wildness and grandeur furrow the whole mountain side, looking in many places like huge rents. Here and there, too, bold promontories shoot out, and dip perpendicularly into the bosom of the Mediterranean. The rugged limestone banks are scantily clothed with the evergreen oak, and the sandstone with pines; while every available spot is carefully cultivated. The cultivation is wonderful, and shows what all Syria might be if under a good government. Miniature fields of grain are often seen where one would suppose the eagles alone, which hover round them, could have planted the seed. Fig-trees cling to the naked rock; vines are trained along narrow ledges; long ranges of mulberries, on terraces like steps of stairs, cover the more gentle declivities; and dense groves of olives fill up the bottoms of the glens. Hundreds of villages are seen—here built amid labyrinths of rocks; there clinging like swallows' nests to the sides of cliffs; while convents, no less numerous, are perched on the top of every peak. When viewed from the sea on a morning in early spring, Lebanon presents a picture which once seen is never forgotten; but deeper still is the impression left on the mind when one looks down over its terraced slopes clothed in their gorgeous foliage, and through the vistas of its magnificent glens, on the broad and bright Mediterranean. How beautifully do these noble features illustrate the words of the prophet: "Israel shall grow as the lily, and strike forth his roots as Lebanon" (Hos. xiv. 5). And the fresh mountain breezes, filled in early summer with the fragrance of the budding vines, and throughout the year with the rich odours of numerous aromatic shrubs, call to mind the words of Solomon—"The smell of thy garments is like the smell of Lebanon" (Cant. iv. 11; see also Hos. xiv. 6). When the plains of Palestine are burned up with the scorching sun, and when the air in them is like the breath of a furnace, the snowy tops and ice-cold streams of Lebanon temper the breezes, and make the mountain-range a pleasant and luxurious retreat,—"Shall a man leave the snow of Lebanon . . . or shall the cold-flowing waters be forsaken?" (Jer. xviii. 14). The vine is still largely cultivated in every part of the mountain; and the wine is excellent, notwithstanding the clumsy apparatus and unskilful workmen employed in its manufacture (Hos. xiv. 7). Lebanon also abounds in olives, figs, and mulberries; while some remnants exist of the forests of pine, oak, and cedar, which formerly covered it (1 K. v. 6; Ps. xxix. 5; Is. xiv. 8; Ezr. iii. 7; Diod. Sic.

[a] So Tacitus (*Hist.* v. 6): "Praecipuum montium Libanum erigit, mirum dictu, tantos inter ardores opacum fidumque nivibus."

[b] البقاع.

[c] בִּקְעַת הַלְּבָנוֹן



[d] Pliny was more accurate than Strabo. He says (v. 20): "A tergo (Sidonis) mons Libanus oritur, millo quingentis stadiis Simyram usque porrigitur, qua Coele-Syria cognominatur. Huic par interjacente valle mons adversus obtenditur, muro conjunctus." Ptolemy (v. 15) follows Strabo; but Eusebius (*Onom.* s. v. "Antilibanus") says, Ἀντιλίβανος, τὸ ὑπὲρ τὸν Λίβανον πρὸς ἀνατολὰς, πρὸς Δαμασκηνῶν χώραν.

xix. 58). Considerable numbers of wild beasts still inhabit its retired glens and higher peaks; the writer has seen jackals, hyenas, wolves, bears, and panthers (2 K. xiv. 9; Cant. iv. 8; Hab. ii. 17).

Some noble streams of classic celebrity have their sources high up in Lebanon, and rush down in sheets of foam through sublime glens, to stain with their ruddy waters the transparent bosom of the Mediterranean. The Leontes is on the south. Next comes *Nahr Auwuly*—the "graceful Boetrenos" of Dionysius Periegetes (905). Then follows the *Damûr*—the "Tamuras" of Strabo (xvi. p. 726), and the "Damuras" of Polybius (v. 68). Next, just on the north side of Beyrout, *Nahr Beyrout*, the "Magoras" of Pliny (v. 20). A few miles beyond it is *Nahr el-Kelb*, the "Lycus flumen" of the old geographers (Plin. v. 20). At its mouth is the celebrated pass where Egyptian, Assyrian, and Roman conquerors have left on tablets of stone, records of their routes and their victories (Porter's *Handbook*, p. 407). *Nahr Ibrahim*, the classic river "Adonis," follows, bursting from a cave beneath the lofty brow of *Sunnin*, beside the ruins of Apheca. From its native rock it runs

> "Purple to the sea, supposed with blood
> Of Thammuz, yearly wounded."

(Lucian *de Syr. Dea*, 6-8; Strab. xvi. 755; Plin. v. 17; Porter's *Damascus*, ii. 295.) Lastly, we have the "sacred river," *Kadisha*—descending

The grand range of Lebanon.

from the side of the loftiest peak in the whole range, through a gorge of surpassing grandeur. Upon its banks, in a notch of a towering cliff, is perched the great convent of *Kanobin*, the residence of the Maronite patriarch.

The situation of the little group of cedars—the last remnant of that noble forest, once the glory of Lebanon—is very remarkable. Round the head of the sublime valley of the Kadisha sweep the highest summits of Lebanon in the form of a semicircle. Their sides rise up, bare, smooth, majestic, to the rounded snow-capped heads. In the centre of this vast recess, far removed from all other foliage and verdure, stand, in strange solitude, the cedars of Lebanon, as if they scorned to mingle their giant arms, and graceful fan-like branches, with the degenerate trees of a later age.[a]

Along the base of Lebanon runs the irregular plain of Phoenicia; nowhere more than two miles wide, and often interrupted by bold rocky spurs, that dip into the sea.

The eastern slopes of Lebanon are much less imposing and less fertile than the western. In the southern half of the range there is an abrupt descent from the summit into the plain of Coele-Syria, which has an elevation of about 2500 ft. Along the proper base of the northern half runs a low side ridge partially covered with dwarf oaks.

The northern half of the mountain-range is peopled, almost exclusively, by Maronite Christians—a brave, industrious, and hardy race; but sadly oppressed by an ignorant set of priests. In the southern half the Druzes predominate, who, though they number only some 20,000 fighting men, form one of the most powerful parties in Syria.

The main ridge of Lebanon is composed of Jura limestone, and abounds in fossils. Long belts of more recent sandstone run along the western slopes, which is in places largely impregnated with iron. Some strata towards the southern end are said to yield as much as 90 per cent. of pure iron (Deut. viii. 9, xxxiii. 25). Coal is found in the district of

[a] The height of the grove is now ascertained to be 6172 ft. above the Mediterranean (Dr. Hooker, in *Nat. Hist. Rev.* No. V. p. 11).

Metn, east of *Beyrout*, near the village of *Kurnâyil*. A mine was opened by Ibrahîm Pasha, but soon abandoned. Cretaceous strata of a very late period lie along the whole western base of the mountain-range.

Lebanon was originally inhabited by the Hivites and Giblites (Judg. iii. 3; Josh. xiii. 5, 6). The latter either gave their name to, or took their name from, the city of Gebal, called by the Greeks Byblus (LXX. of Ez. xxvii. 9; Strabo, xvi. p. 755). The old city—now almost in ruins,—and a small district round it, still bear the ancient name, in the Arabic form *Jebail*[g] (Porter's *Handbook*, p. 586). The whole mountain range was assigned to the Israelites, but was never conquered by them (Josh. xiii. 2-6; Judg. iii. 1-3). During the Jewish monarchy it appears to have been subject to the Phoenicians (1 K. v. 2-6; Ezr. iii. 7). From the Greek conquest until modern times Lebanon had no separate history.

Anti-Libanus.—The main chain of Anti-Libanus commences in the plateau of Bashan, near the parallel of Caesarea-Philippi, runs north to Hermon, and then north-east in a straight line till it sinks down into the great plain of Emesa, not far from the site of Riblah. HERMON is the loftiest peak, and has already been described; the next highest is a few miles north of the site of Abila, beside the village of *Bludân*, and has an elevation of about 7000 ft. The rest of the ridge averages about 5000 ft.; it is in general bleak and barren, with shelving gray declivities, gray cliffs, and gray rounded summits. Here and there we meet with thin forests of dwarf oak and juniper. The western slopes descend abruptly into the *Bukâ'a*; but the features of the eastern are entirely different. Three side-ridges here radiate from Hermon, like the ribs of an open fan, and form the supporting walls of three great terraces. The last and lowest of these ridges takes a course nearly due east, bounding the plain of Damascus, and running out into the desert as far as Palmyra. The greater part of the terraces thus formed are parched flinty deserts, though here and there are sections with a rich soil. Anti-Libanus can only boast of two streams—the Pharpar, now *Nahr el-'Awaj*, which rises high up on the side of Hermon; and the Abana, now called *Barâda*. The fountain of the latter is in the beautiful little plain of *Zebdâny*, on the western side of the main chain, through which it cuts in a sublime gorge, and then divides successively each of the side-ridges in its course to Damascus. A small streamlet flows down the valley of Helbon parallel to the Abana.

Anti-Libanus is more thinly peopled than its sister range; and it is more abundantly stocked with wild beasts. Eagles, vultures, and other birds of prey, may be seen day after day sweeping in circles round the beetling cliffs. Wild swine are numerous; and vast herds of gazelles roam over the bleak eastern steppes.

Anti-Libanus is only once distinctly mentioned in Scripture, where it is accurately described as "Lebanon toward the sun-rising"[h] (Josh. xiii. 5); but the southern section of the chain is frequently referred to under other names. [See HERMON.] The words of Solomon in Cant. iv. 8 are very striking—"Look from the top of Amana, from the top of Shenir and Hermon, from the lions' den, from the mountains of the leopards."[i] The reference is in all probability, to the two highest peaks of Anti-Libanus,—Hermon, and that near the fountain of the Abana; and in both places panthers[k] still exist, "The tower of Lebanon which looketh toward Damascus" (Cant. vii. 4) is doubtless Hermon, which forms the most striking feature in the whole panorama round that city. Josephus mentions Lebanon as lying near Dan and the fountains of the Jordan (*Ant.* v. 3, §1), and as bounding the province of Gaulanitis on the north (*B. J.* iii. 3, §5); he of course means Anti-Libanus.[l] The old city of Abila stood in one of the wildest glens of Anti-Libanus, on the banks of the Abana, and its territory embraced a large section of the range. [ABILENE.] Damascus owes its existence to a stream from these mountains; so did the once great and splendid city of Heliopolis; and the chief sources of both the Leontes and Orontes lie along their western base (Porter's *Handbook*, pp. xviii., xix.). [J. L. P.]

LEB'AOTH (לְבָאוֹת: Λαβάς; Alex. Λαβαθ: *Lebaoth*), a town which forms one of the last group of the cities of "the South" in the enumeration of the possessions of Judah (Josh. xv. 32). It is named between Sansannah and Shilhim; and is very probably identical with BETH-LEBAOTH, elsewhere called BETH-BIREI. No trace of any names answering to these appears to have been yet discovered. If we may adopt the Hebrew signification of the name ("lionesses"), it furnishes an indication of the existence of wild animals in the south of Palestine. [G.]

LEBBAE'US. This name occurs in Matt. x. 3, according to Codex D (Bezae Cantabrigiensis) of the sixth century, and in the received Text. In Mark iii. 18, it is substituted in a few unimportant MSS. for Thaddeus. The words, "Lebbaeus who is called" (Matt. x. 3), are not found in the Vatican MS. (B), and Lachmann rejects them as, in his opinion, not received by the most ancient Eastern churches. The Vulgate omits them; but Jerome (*Comm. in Matt.*) says that Thaddeus, or Judas *the brother* of James, is elsewhere called Lebbaeus; and he concludes that this apostle had three names. It is much easier to suppose that a strange name has been omitted than that it has been inserted by later transcribers. It is admitted into the ancient versions of the N. T., and into all the English versions (except the Rhemish) since Tyndale's in 1534. For the signification of the name, and for the life of the apostle, see JUDE, vol. i. p. 1163. [W. T. B.]

LEBO'NAH (לְבוֹנָה: τῆς Λεβωνα; Alex. τοῦ Λιβανου της Λεβωνα: *Lebona*), a place named in Judg. xxi. 19 only; and there but as a landmark to determine the position of Shiloh, which is stated to have lain south of it. Lebonah has survived to our times under the almost identical form of *el-Lubbân*.

[g] جبيل.

[h] הַלְּבָנוֹן מִזְרַח הַשֶּׁמֶשׁ.

[i] Amana and Abana seem to be identical, for in 2 K. v. 12 the Keri reading is אֲמָנָה.

[k] The Heb. נָמֵר is identical with the Arabic نمر, "a panther."

[l] Strabo says (xvi. p. 755), ὁ Μασσύας ἔχων τινὰ καὶ ὀρεινά, ἐν οἷς ἡ Χαλκὶς, ὥστερ ἀκρόπολις τοῦ Μασσύου. Ἀρχὴ δ' αὐτοῦ Λαοδίκεια ἡ πρὸς Λιβάνῳ. From this it appears that the province of Massyas in his day embraced the whole of Anti-Libanus; for Laodicea ad Libanum lies at the northern end of the range (Porter's *Damascus*, ii. 339), and the site of Chalcis is at its western base, twenty miles south of Ba'albek (id. i. 14).

It lies to the west of, and close to, the *Nablus* road, about eight miles north of *Beitîn* (Bethel), and two from *Seilûn* (Shiloh), in relation to which it stands, however, nearer W. than N. The village is on the northern acclivity of the wady to which it gives its name. Its appearance is ancient; and in the rocks above it are excavated sepulchres (Rob. ii. 272). To Eusebius and Jerome it does not appear to have been known. The earliest mention of it yet met with is in the Itinerary of the Jewish traveller hap-Parchi (A.D. cir. 1320), who describes it under the name of *Lubin*, and refers especially to its correspondence with the passage in Judges (See Asher's *Benj. of Tudela*, ii. 435). It was visited by Maundrell (March 24, 25), who mentions the identification with Lebonah, but in such terms as may imply that he was only repeating a tradition. Since then it has been passed and noticed by most travellers to the Holy Land (Rob. ii. 272; Wilson, ii. 292, 3; Bonar, 363; Mislin, iii. 319, &c. &c.). [G.]

LE'CAH (לֶכָה: Ληχᾶ; Alex. Ληχαδ: *Lecha*), a name mentioned in the genealogies of Judah (1 Chr. iv. 21 only) as one of the descendants of Shelah, the third son of Judah by the Canaanitess Bath-shua. The immediate progenitor of Lecah was Er. Many of the names in this genealogy, especially when the word "father" is attached, are towns (comp. Eshtemoa, Keilah, Mareshah, &c.); but this, though probably the case with Lecah, is not certain, because it is not mentioned again, either in the Bible or the *Onomasticon*, nor have any traces of it been since discovered. [G.]

LEECH. [HORSE-LEECH, Appendix A.]

LEEKS (חָצִיר, *châtsîr*: τὰ πράσα, βοτάνη, χλόη, χόρτος, χλωρός: *herba, porrus, foenum, gramen*). The word *châtsîr*, which in Num. xi. 5 is translated *leeks*, occurs twenty times in the Hebrew text. In 1 K. xviii. 5; Job xl. 15; Ps. civ. 14, cxlvii. 8, cxxix. 6, xxxvii. 2, xc. 5, ciii. 15; Is. xxxvii. 27, xl. 6, 7, 8, xliv. 4, li. 12, it is rendered *grass*; in Job viii. 12, it is rendered *herb*; in Prov. xxvii. 25, Is. xv. 6, it is erroneously translated *hay*; in Is. xxxiv. 14, the A. V. has *court* (see note). The word *leeks* occurs in the A. V. only in Num. xi. 5; it is there mentioned as one of the good things of Egypt for which the Israelites longed in their journey through the desert, just before the terrible plague at Kibroth-hattaavah, "the cucumbers, and the melons, and the leeks, and the onions, and the garlic." The Hebrew term, which properly denotes *grass*, is derived from a root signifying "to be green,"[a] and may therefore stand in this passage for any green food, lettuce, endive, &c., as Ludolf and Maillet have conjectured; it would thus be applied somewhat in the same manner as we use the term "greens;" yet as the *châtsîr* is mentioned together with onions and garlick in the text, and as the most ancient versions, Onkelos, the LXX., and the Vulgate, together with the Syriac and the Arabic of Saadias,[b] unanimously understand *leeks* by the Hebrew word, we may be satisfied with our own translation. Moreover, *châtsîr* would apply to the *leek* appropriately enough, both from its green colour and the grass-like form of the leaves.

There is, however, another and a very ingenious interpretation of *châtsîr*, first proposed by Hengstenberg, and received by Dr. Kitto (*Pictor. Bibl.* Num. xi. 5), which adopts a more literal translation

Common leek (*Allium porrum*).

of the original word, for, says Dr. Kitto, "among the wonders in the natural history of Egypt, it is mentioned by travellers that the common people there eat with special relish a kind of *grass similar to clover*." Mayer (*Reise nach Aegyptien*, p. 226) says of this plant (whose scientific name is *Trigonella foenum Graecum*, belonging to the natural order *Leguminosae*), that it is similar to clover, but its leaves more pointed, and that great quantities of it are eaten by the people. Forskål mentions the *Trigonella* as being grown in the gardens at Cairo; its native name is *Halbeh* (*Flor. Aegypt.* p. 81).

Trigonella foenum-graecum.

Sonnini (*Voyage*, i. 379) says, "In this fertile country, the Egyptians themselves eat the *fenu-grec*

[a] חָצִיר, *viruit*, i. q. Arab. حضر (*hadsir*). Gesenius has shown that this word is identical with חָצַר, *circumsaepsit*. He compares the Greek χόρτος, which primarily means a *court* (for cattle); hence, a *pasture*; hence, in an extended sense, *grass* or *herbage*. But see the different derivation of Fürst.

[b] The word employed here is still the name in Egypt for leek (Hasselquist, 562).

so largely, that it may be properly called the food of man. In the month of November they cry 'green halbeh for sale!' in the streets of the town; it is tied up in large bunches, which the inhabitants purchase at a low price, and which they eat with incredible greediness without any kind of seasoning."

The seeds of this plant, which is also cultivated in Greece, are often used; they are eaten boiled or raw, mixed with honey. Forskål includes it in the Materia Medica of Egypt (*Mat. Med. Kahir.* p. 155). However plausible may be this theory of Hengstenberg, there does not appear sufficient reason for ignoring the old versions, which seem all agreed that the *leek* is the plant denoted by *chătsîr*, a vegetable from the earliest times a great favourite with the Egyptians, as both a nourishing and savoury food. Some have objected that, as the Egyptians held the *leek*, *onion*, &c., sacred, they would abstain from eating these vegetables themselves, and would not allow the Israelites to use them.[c] We have, however, the testimony of Herodotus (ii. 125) to show that *onions* were eaten by the Egyptian poor, for he says that on one of the pyramids is shown an inscription, which was explained to him by an interpreter, showing how much money was spent in providing *radishes*, *onions*, and *garlic*, for the workmen. The priests were not allowed to eat these things, and Plutarch (*De Is. et Osir.* ii. p. 353) tells us the reasons. The Welshman reverences his leek, and wears one on St. David's Day—he *eats the leek* nevertheless; and doubtless the Egyptians were not over-scrupulous (*Scrip. Herbal.* p. 230). The *leek*[d] is too well-known to need description. Its botanical name is *Allium porrum*; it belongs to the order *Liliaceae*. [W. H.]

LEES (שְׁמָרִים: τρυγίαι: *faeces*). The Hebrew *shemer* bears the radical sense of *preservation*, and was applied to "lees" from the custom of allowing the wine to stand on the lees in order that its colour and body might be better preserved. Hence the expression "wine on the lees," as meaning a generous full-bodied liquor (Is. xxv. 6). The wine in this state remained, of course, undisturbed in its cask, and became thick and syrupy; hence the proverb, "to settle upon one's lees," to express the sloth, indifference, and gross stupidity of the ungodly (Jer. xlviii. 11; Zeph. i. 12). Before the wine was consumed, it was necessary to strain off the lees; such wine was then termed "well refined" (Is. xxv. 6). To drink the lees, or "dregs," was an expression for the endurance of extreme punishment (Ps. lxxv. 8). [W. L. B.]

LEGION (Λεγεών: *Legio*), the chief subdivision of the Roman army, containing about 6000 infantry, with a contingent of cavalry. The term does not occur in the Bible in its primary sense, but appears to have been adopted in order to express any large number, with the accessory ideas of order and subordination. Thus it is applied by our Lord to the angels (Matt. xxvi. 53), and in this sense it answers to the "hosts" of the Old Testament (Gen. xxxii. 2; Ps. cxlviii. 2).[e] It is again the name which the demoniac assumes, "My name is Legion (Λεγιών); for we are many" (Mark v. 9), implying the presence of a spirit of superior power in addition to subordinate ones. [W. L. B.]

LEHA'BIM (לְהָבִים: Λαβιείμ: *Laabim*), occurring only in Gen. x. 13, the name of a Mizraite people or tribe, supposed to be the same as the Lubim, mentioned in several places in the Scriptures as mercenaries or allies of the Egyptians. There can be no doubt that the Lubim are the same as the ReBU or LeBU of the Egyptian inscriptions, and that from them Libya and the Libyans derived their name. These primitive Libyans appear, in the period at which they are mentioned in these two historical sources, that is from the time of Menptah, B.C. cir. 1250, to that of Jeremiah's notice of them late in the 6th century B.C., and probably in the case of Daniel's, prophetically to the earlier part of the second century B.C., to have inhabited the northern part of Africa to the west of Egypt, though latterly driven from the coast by the Greek colonists of the Cyrenaica, as is more fully shown under LUBIM. Philologically, the interchange of ה as the middle letter of a root into י quiescent, is frequent, although it is important to remark that Gesenius considers the form with ה to be more common in the later dialects, as the Semitic languages are now found (*Thes.* art. ה). There seems however to be strong reason for considering many of these later forms to be recurrences to primitive forms. Geographically, the position of the Lehabim in the enumeration of the Mizraites immediately before the Naphtuhim, suggests that they at first settled to the westward of Egypt, and nearer to it, or not more distant from it than the tribes or peoples mentioned before them. [MIZRAIM.] Historically and ethnologically, the connexion of the ReBU and Libyans with Egypt and its people suggests their kindred origin with the Egyptians. [LUBIM.] On these grounds there can be no reasonable doubt of the identity of the Lehabim and Lubim. [R. S. P.]

LE'HI (with the def. article, הַלֶּחִי, except in ver. 14: Λευεί, in ver. 9; Alex. Λευΐ; Σιαγών: *Lechi, id est maxilla*), a place in Judah, probably on the confines of the Philistines' country, between it and the cliff Etam; the scene of Samson's well-known exploit with the jawbone (Judg. xv. 9, 14, 19). It contained an eminence—Ramath-lehi, and a spring of great and lasting repute—En hak-kore.

Whether the name existed before the exploit or the exploit originated the name cannot now be determined from the narrative.[a] On the one hand, in vers. 9 and 19, Lehi is named as if existing before this occurrence, while on the other the play of the story and the statement of the bestowal of the name Ramath-lehi look as if the reverse were intended. The analogy of similar names in other countries[b] is

[c] Juvenal's derision of the Egyptians for the reverence they paid to the leek may here be quoted:

"Porrum et coepe nefas violare ac frangere morsu,
O sanctas gentes, quibus haec nascuntur in hortis
Numina!"—*Sat.* xv. 9.

Cf. Plin. *H. N.* xix. 6; Celsii *Hierob.* ii. 263; Hiller. *Hierophyt.* pt. ii. p. 36; Diosc. ii. 4.

[d] "Leek" is from the Anglo-Saxon *leac*, German *Lauch*

[e] This application of the term is illustrated by the Rabbinical usage of לְגְיוֹן as = "leader, chief" (Buxtorf, *Lex. Talm.* p. 1123).

[a] It is unusually full of plays and paronomastic turns. Thus לֶחִי signifies a jaw, and לֶחִי is the name of the place; חֲמוֹר is both a he-ass and a heap, &c.

[b] Compare the somewhat parallel case of Dunchurch and Dunsmoor, which, in the local traditions, derive their names from an exploit of Guy of Warwick.

in favour of its having existed previously. Even taken as a Hebrew word, "Lechi" has another meaning besides a jawbone; and after all there is throughout a difference between the two words, which, though slight to our ears, would be much more marked to those of a Hebrew, and which so far betrays the accommodation.[c]

A similar discrepancy in the case of Beer Lahai-roi, and a great similarity between the two names in the original (Gesen. *Thes.* 175 *b*), has led to the supposition that that place was the same as Lehi. But the situations do not suit. The well Lahai-roi was below Kadesh, very far from the locality to which Samson's adventures seem to have been confined. The same consideration would also appear fatal to the identification proposed by M. Van de Velde (*Memoir*, 343) at *Tell el-Lekhiyeh*, in the extreme south of Palestine, only four miles above Beersheba, a distance to which we have no authority for believing that either Samson's achievements or the possessions of the Philistines (at least in those days) extended. As far as the name goes, a more feasible suggestion would be *Beit-Likhyah*, a village on the northern slopes of the great *Wady Suleiman*, about two miles below the upper Beth-horon (see Tobler, *3te Wanderung*). Here is a position at once on the borders of both Judah and the Philistines, and within reasonable proximity to Zorah, Eshtaol, Timnath, and other places familiar to the history of the great Danite hero. On this, however, we must await further investigation; and in the meantime it should not be overlooked that there are reasons for placing the cliff Etam—which seems to have been near Lehi—in the neighbourhood of Bethlehem. [ETAM, THE ROCK.]

The spring of En hak-kore is mentioned by Jerome (*Epitaph. Paulae*, §14) in such terms as to imply that it was then known, and that it was near Morasthi, the native place of the prophet Micah, which he elsewhere (*Onom.* s. v.; *Pref. ad Mich.*) mentions as east of Eleutheropolis (*Beit Jibrîn*).

Lehi is possibly mentioned in 2 Sam. xxiii. 11—the relation of another encounter with the Philistines hardly less disastrous than that of Samson. The word[d] rendered in the A. V. "into a troop," by alteration of the vowel-points becomes "to Lehi," which gives a new and certainly an appropriate sense. This reading first appears in Josephus (*Ant.* vii. 12, §4), who gives it "a place called Siagona"—the jaw—the word which he employs in the story of Samson (*Ant.* v. 8, §9). It is also given in the Complutensian[e] LXX., and among modern interpreters by Bochart (*Hieroz.* i. 2, ch. 13), Kennicott (*Dissert.* 140), J. D. Michaelis (*Bibel für Ungelehrt.*), Ewald (*Geschichte*, iii. 180, *note*). [G.]

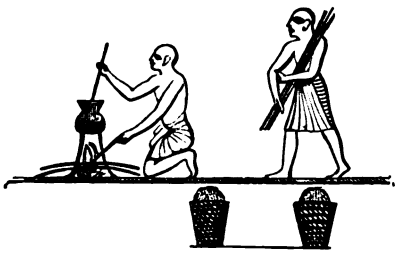
LEMUEL (לְמוּאֵל and לְמוֹאֵל: *Lamuel*), the name of an unknown king to whom his mother addressed the prudential maxims contained in Prov. xxxi. 1-9. The version of this chapter in the LXX. is so obscure that it is difficult to discover what text they could have had before them. In the rendering of Lemuel by ὑπὸ θεοῦ, in Prov. xxxi. 2, some traces of the original are discernible, but in ver. 4 it is entirely lost. The Rabbinical commentators identify Lemuel with Solomon, and tell a strange tale how that when he married the daughter of Pharaoh, on the day of the dedication of the Temple, he assembled musicians of all kinds, and passed the night awake. On the morrow he slept till the fourth hour, with the keys of the Temple beneath his pillow, when his mother entered and upbraided him in the words of Prov. xxxi. 2-9. Grotius, adopting a fanciful etymology from the Arabic, makes Lemuel the same as Hezekiah. Hitzig and others regard him as king or chief of an Arab tribe dwelling on the borders of Palestine, and elder brother of Agur, whose name stands at the head of Prov. xxx. [See JAKEH.] According to this view *massâ* (A. V. "the prophecy") is Massa in Arabia; a region mentioned twice in close connexion with Dumah, and peopled by the descendants of Ishmael. In the reign of Hezekiah a roving band of Simeonites drove out the Amalekites from Mount Seir and settled in their stead (1 Chr. iv. 38-43), and from these exiles or Israelitish origin Hitzig conjectures that Lemuel and Agur were descended, the former having been born in the land of Israel; and that the name Lemuel is an older form of Nemuel, the first-born of Simeon (*Die Sprüche Salomo's*, p. 310-314). But it is more probable, as Eichhorn and Ewald suggest, that Lemuel is a poetical appellation, selected by the author of these maxims for the guidance of a king, for the purpose of putting in a striking form the lessons which they conveyed. Signifying as it does "to God," *i. e.* dedicated or devoted to God, like the similar word Lael, it is in keeping with the whole sense of the passage, which contains the portraiture of a virtuous and righteous king, and belongs to the latest period of the proverbial literature of the Hebrews. [W. A. W.]

LENTILES (עֲדָשִׁים, *ădâshîm*: φακός: *lens*). There cannot be the least doubt that the A. V. is correct in its translation of the Hebrew word which occurs in the four following passages:—Gen. xxv. 34, 2 Sam. xvii. 28, 2 Sam. xxiii. 11, and Ez. iv. 9· from which last we learn that in times of scarcity lentiles were sometimes used in making bread. There are three or four kinds of lentiles, all of which are still much esteemed in those countries where they are grown, viz. the South of Europe, Asia, and North Africa: the red lentile is still a favourite article of food in the East; it is a small kind, the seeds of which after being decorticated, are commonly sold in the bazaars of India. The modern Arabic name of this plant is identical with the Hebrew; it is known in Egypt and Arabia, Syria, &c., by the name *'Adas*, as we learn from the testimony of several travellers.[a] When Dr. Robinson was staying at the castle of *'Akabah*, he partook of

[c] לְחִי=Lechi, is the name of the place in vers. 9, 14, 19, and in Ramath-Lehi, ver. 17; whereas L'chi, לֶחִי, is the usual for jawbone. In ver. 19 the words "in the jaw" should be "in Lehi:" the original is בַּלֶּחִי, exactly as in 9; not בִּלְחִי, as in 16. See Milton, *Samson Ag.*, line 582.

[d] לִחְיָה, as if חָיָה, from the root חָיָה (Gesen. *Thes.* p. 470). In this sense the word very rarely occurs (see A. V. of Ps. lxviii. 10, 30; lxxv. 19). It elsewhere has the sense of "living," and thence of wild animals, which is adopted by the LXX. in this place, as remarked above. In ver. 13 it is again rendered "troop." In the parallel narrative of 1 Chronicles (xi. 15), the word מַחֲנֵה, a "camp," is substituted.

[e] The Vatican and Alex. MSS. read εἰς θηρία (לְחָיִם), as if the Philistines had come on a hunting expedition.



[a] See also Catafago's *Arabic Dictionary*, "Lentiles," عدس, *adas*.

lentiles, which he says he "found very palatable and could well conceive that to a weary hunter, faint with hunger, they would be quite a dainty"

Lentile (*Ervum lens*).

(*Bib. Res.* i. 246). Dr. Kitto also says that he has often partaken of red pottage, prepared by seething the lentiles in water, and then adding a little suet, to give them a flavour; and that he found it better food than a stranger would imagine; "the mess," he adds, "had the redness which gained for it the name of *adom*" (*Pict. Bib.*, Gen. xxv. 30,34). From Sonnini we learn that lentile bread is still eaten by the poor of Egypt, even as it was in the time of Ezekiel; indeed, that towards the cataracts of the Nile there is scarce any other bread in use, because corn is very rare; the people generally add a little barley in making their bread of lentiles, which "is by no means bad, though heavy" (Sonnini's *Travels*, Hunter's transl. iii. 288). Shaw and Russell bear similar testimony.

Egyptians cooking Lentiles (Wilkinson).

The Arabs have a tradition that Hebron is the spot where Esau sold his birthright, and in memory of this event the dervises distribute from the kitchen of a mosque there a daily supply of lentile soup to travellers and poor inhabitants (D'Arvieux, *Mem.* ii. 237).

The lentile, *Ervum lens*, is much used with other pulse in Roman Catholic countries during Lent; and some say that from hence the season derives its name. It is occasionally cultivated in England, but only as fodder for cattle; it is also imported from Alexandria. From the quantity of gluten the ripe seeds contain they must be highly nutritious, though they have the character of being heating if taken in large quantities. In Egypt the haulm is used for packing. The lentile belongs to the natural order *Leguminosae*. [W. H.]

LEOPARD (נָמֵר, *nâmer*: πάρδαλις: *pardus*) is invariably given by the A. V. as the translation of the Hebrew word,[a] which occurs in the seven following passages,—Is. xi. 6; Jer. v. 6, xiii. 23; Dan. vii. 6; Hos. xiii. 7; Cant. iv. 8; Hab. i. 8. *Leopard* occurs also in Ecclus. xxviii. 23, and in Rev. xiii. 2. The swiftness of this animal, to which Habakkuk compares the Chaldaean horses, and to which Daniel alludes in the winged leopard, the emblem in his vision of Alexander's rapid conquests, is well known: so great is the flexibility of its body, that it is able to take surprising leaps, to climb trees, or to crawl snake-like upon the ground. Jeremiah and Hosea allude to the insidious habit of this animal, which is abundantly confirmed by the observations

Leopard (*Leopardus varius*)

of travellers, the leopard will take up its position in some spot near a village, and watch for some favourable opportunity for plunder. From the passage of Canticles, quoted above, we learn that the hilly ranges of Lebanon were in ancient times frequented by these animals, and it is now not uncommonly seen in and about Lebanon, and the southern maritime mountains of Syria[b] (Kitto, note on *Cant.* iv. 8). Burckhardt mentions that leopards have sometimes been killed in "the low and rocky chain of the Richel mountain," but he calls them ounces (Burck. *Syria*, p. 132). In another passage (p. 335) he says, "in the wooded parts of Mount Tabor are wild boars and ounces." Mariti says that the "grottoes at Kedron cannot be entered at all seasons without danger, for in the middle of summer it is frequented by tigers, who retire hither to shun the heat" (Mariti, *Trav.* (translated), iii. 58). By *tigers* he undoubtedly means *leopards*, for the tiger does not occur in Palestine. Under the name

[a] The word נָמֵר means "spotted" (see the derivations of Fürst and Gesenius). The same word for "leopard" occurs in all the cognate languages. The Arabic is نمر (*nemir*), نمر (*nimr*), with which the modern Arabic is identical, though this name is also applied to the tiger; but perhaps "tiger" and "leopard" are synonymous in those countries where the former animal is not found.

[b] Beth-nimrah, Nimrah, the waters of Nimrim, possibly derive their names from *Nêmer* (Bochart, *Hieroz.* ii. 107, ed. Rosenmüll.).

נָמֵר,[c] which means "spotted," it is not improbable that another animal, namely the cheetah (*Guepardu jubata*), may be included; which is tamed by the Mahometans of Syria, who employ it in hunting the gazelle. These animals are represented on the Egyptian monuments; they were chased as an amusement for the sake of their skins, which were worn by the priests during their ceremonies, or they were hunted as enemies of the farmyard (Wilkinson, *Anc. Egypt.* ch. viii. 20). Sir G. Wilkinson also draws attention to the fact that there is no appearance of the leopard (cheetah), having been employed for the purpose of the chase, on the monuments of Egypt;[d] nor is it now used by any of the African races for hunting. The natives of Africa seem in some way to connect the leopard skin with the idea of royalty, and to look upon it as part of the insignia of majesty (Wood's *Nat. Hist.* i. 160). The leopard (*Leopardus varius*) belongs to the family *Felidae*, sub-order *Digitigradae*, order *Carnivora*. The panther is now considered to be only a variety of the same animal. [W. H.]

LEPER, LEPROSY. The Egyptian and Syrian climates, but especially the rainless atmosphere of the former, are very prolific in skin-diseases; including, in an exaggerated form, some which are common in the cooler regions of western Europe. The heat and drought acting for long periods upon the skin, and the exposure of a large surface of the latter to their influence, combine to predispose it to such affections. Even the modified forms known to our western hospitals show a perplexing variety, and at times a wide departure from the best-known and recorded types; much more then may we expect departure from any routine of symptoms amidst the fatal fecundity of the Levant in this class of disorders (Good's *Study of Medicine*, vol. iv. p. 445. &c., ed. 4th). It seems likely that diseases also tend to exhaust their old types, and to reappear under new modifications. [MEDICINE.] This special region, however, exhibiting in wide variety that class of maladies which disfigures the person and makes the presence horrible to the beholder, it is no wonder that notice was early drawn to their more popular symptoms. The Greek imagination dwelt on them as the proper scourge of an offended deity, and perhaps foreign forms of disease may be implied by the expressions used (Aeschyl. *Coeph.* 271, &c.), or such as an intercourse with Persia and Egypt would introduce to the Greeks. But, whatever the variety of form, there seems strong general testimony to the cause of all alike, as being to be sought in hard labour in a heated atmosphere, amongst dry or powdery substances, rendering the proper care of the skin difficult or impossible. This would be aggravated by unwholesome or innutritious diet, want of personal cleanliness, of clean garments, &c. Thus a "baker's" and a "bricklayer's itch," are recorded by the faculty (Bateman, *On Skin Diseases, Psoriasis*; Good's *Study of Med.*, ib. p. 459 and 484).[a]

The predominant and characteristic form of leprosy in Scripture is a white variety, covering either the entire body or a large tract of its surface; which has obtained the name of *lepra Mosaica*. Such were the cases of Moses, Miriam, Naaman, and Gehazi (Ex. iv. 6; Num. xii. 10; 2 K. v. 1, 27; comp. Lev. xiii. 13). But, remarkably enough, in the Mosaic ritual-diagnosis of the disease (Lev. xiii., xiv), this kind, when overspreading the whole surface, appears to be regarded as "clean" (xiii. 12, 13, 16, 17). The first question which occurs as we read the entire passage is, have we any right to assume *one* disease as spoken of throughout? or rather—for the point of view in the whole passage is ceremonial, not medical—is not a register of certain symptoms, marking the afflicted person as under a Divine judgment, all that is meant, without raising the question of a plurality of diseases? But beyond this preliminary question, and supposing the symptoms ascertained, there are circumstances which, duly weighed, will prevent our expecting the identity of these with modern symptoms in the same class of maladies. The Egyptian bondage, with its studied degradations and privations, and especially the work of the kiln under an Egyptian sun, must have had a frightful tendency to generate this class of disorders; hence Manetho (Joseph. *cont. Ap.* i. 26) asserts that the Egyptians drove out the Israelites as infected with leprosy—a strange reflex, perhaps, of the Mosaic narrative of the "plagues" of Egypt, yet probably also containing a germ of truth. The sudden and total change of food, air, dwelling, and mode of life, caused by the Exodus, to this nation of newly-emancipated slaves may possibly have had a further tendency to skin-disorders, and novel and severe repressive measures may have been required in the desert-moving camp to secure the public health, or to allay the panic of infection. Hence it is possible that many, perhaps most, of this repertory of symptoms may have disappeared with the period of the Exodus, and the snow-white form, which had preexisted, may alone have ordinarily continued in a later age. But it is observable that, amongst these Levitical symptoms, the scaling, or peeling off of the surface, is nowhere mentioned, nor is there any expression in the Hebrew text which points to exfoliation of the cuticle.[b] The principal morbid features are a rising or swelling,[c] a scab or baldness,[d] and a bright or white[e] spot (xiii. 2). [BALDNESS.] But especially a white swelling in the skin, with a change of the hair of the part from the natural black to white or yellow (3, 10, 4, 20, 25, 30), or an appearance of a taint going "deeper than the skin," or again, "raw flesh" appearing in the swelling (10, 14, 15), were critical signs of pollution. The mere swelling, or scab, or bright spot, was remanded for a week as doubtful (4,

[c] The leopard is called by the natives of India *lahree-bang*, "tree-tiger." In Africa also "tiger" is applied to the "leopard," the former animal not existing there.

[d] The lion was always employed by the Egyptians for the purpose of the chase. See Diodor. i. 48; and Wilkinson, *Anc. Egyp.* ch. viii. 17.

[a] The use of the word נֶגַע, in association with the proper term, צָרַעַת, marks the outward appearance as the chief test of the malady. For נֶגַע means "a blow" or "touch," and is etymologically represented by *plaga*, our "plague."

[b] The raw flesh of xiii. 10 *might* be discovered in this way, or by the skin merely cracking, an abscess forming, or the like. Or—what is more probable—"raw flesh" means granulations forming on patches where the surface had become excoriated. These granulations would form into a fungous flesh which might be aptly called "raw flesh."

[c] שְׂאֵת.

[d] סַפַּחַת, מִסְפַּחַת. Gesenius, *s.v.*, says, "strictly a bald place on the head occasioned by the scab or itch."

[e] בַּהֶרֶת. The root appears to be בָּהַר, which in Chald. and Arab. means "to be white, shining" (Gesen. *s. v.*).

21 26, 31), and for a second such period, if it had not yet pronounced (5). If it then spread (7, 22, 27, 35), it was decided as polluting. But if after the second period of quarantine the trace died away[f] and showed no symptom of spreading, it was a mere scab, and he was adjudged clean (6, 23, 34). This tendency to spread seems especially to have been relied on. A spot most innocent in all other respects, if it "spread much abroad," was unclean; whereas, as before remarked, the man so wholly overspread with the evil that it could find no farther range, was on the contrary "clean" (12, 13). These two opposite criteria seem to show that whilst the disease manifested activity, the Mosaic law imputed pollution to and imposed segregation on the sufferer, but that the point at which it might be viewed as having run its course was the signal for his readmission to communion. The question then arises, supposing contagion were dreaded, and the sufferer on that account suspended from human society, would not one who offered the whole area of his body as a means of propagating the pest be more shunned than the partially afflicted? This leads us to regard the disease in its sacred character. The Hebrew was reminded on every side, even on that of disease, that he was of God's peculiar people. His time, his food and raiment, his hair and beard, his field and fruit-tree, all were touched by the finger of ceremonial; nor was his bodily condition exempt. Disease itself had its sacred relations arbitrarily imposed. Certainly contagion need not be the basis of our views in tracing these relations. In the contact of a dead body there was no notion of contagion, for the body the moment life was extinct was as much ceremonially unclean as in a state of decay. Many of the unclean of beasts, &c., are as wholesome as the clean. Why then in leprosy must we have recourse to a theory of contagion? To cherish an undefined horror in the mind was perhaps the primary object; such horror, however, always tends to some definite dread, in this case most naturally to the dread of contagion. Thus religious awe would ally itself with and rest upon a lower motive, and there would thus be a motive to weigh with carnal and spiritual natures alike. It would perhaps be nearer the truth to say, that uncleanness was imputed, rather to inspire the dread of contagion, than in order to check contamination as an actual process. Thus this disease was a living plague set in the man by the finger of God whilst it showed its life by activity—by "spreading;" but when no more showing signs of life, it lost its character as a curse from Him. Such as dreaded contagion—and the immense majority in every country have an exaggerated alarm of it—would feel on the safe side through the Levitical ordinance; if any did not fear, the loathsomeness of the aspect of the malady would prevent them from wishing to infringe the ordinance.

It is not our purpose to enter into the question whether the contagion existed, nor is there perhaps any more vexed question in pathology than how to fix a rule of contagiousness; but whatever was currently believed, unless opposed to morals or humanity, would have been a sufficient basis for the lawgiver on this subject. The panic of infection is often as distressing, or rather far more so, in proportion as it is far more widely diffused, than actual disease. Now need we exclude popular notions, so far as they do not conflict with higher views of the Mosaic economy. A degree of deference to them is perhaps apparent in the special reference to the "head" and "beard" as the seat of some form of polluting disorder. The sanctity and honour attaching to the head and beard (1 Cor. xi. 3, 4, 5; see also BEARD) made a scab thereon seem a heinous disfigurement, and even baldness, though not unclean, yet was unusual and provoked reproach (2 K. ii. 23), and when a diseased appearance arose "out of a baldness" even without "spreading abroad," it was at once adjudged "unclean." On the whole, though we decline to rest leprous defilement merely on popular notions of abhorrence, dread of contagion, and the like, yet a deference to them may be admitted to have been shown, especially at the time when the people were, from previous habit and associations, up to the moment of the actual Exodus, most strongly imbued with the scrupulous purity and refined ceremonial example of the Egyptians on these subjects.

To trace the symptoms, so far as they are recorded, is a simple task, if we keep merely to the text of Leviticus, and do not insist on finding nice definitions in the broad and simple language of an early period. It appears that not only the beforementioned appearances but any open sore which exposed raw flesh was to be judged by its effect on the hair, by its being in sight lower than the skin, by its tendency to spread; and that any one of these symptoms would argue uncleanness. It seems also that from a boil and from the effects of a burn a similar disease might be developed. Nor does modern pathology lead us to doubt that, given a constitutional tendency, such causes of inflammation may result in various disorders of the skin or tissues. Cicatrices after burns are known sometimes to assume a peculiar tuberculated appearance, thickened and raised above the level of the surrounding skin—the keloid tumour—which, however, may also appear independently of a burn.

The language into which the LXX. has rendered the simple phrases of the Hebrew text shows traces of a later school of medicine, and suggests an acquaintance with the terminology of Hippocrates. This has given a hint, on which, apparently wishing to reconcile early Biblical notices with the results of later observation, Dr. Mason Good and some other professional expounders of leprosy have drawn out a comparative table of parallel terms.[g]

It is clear then that the leprosy of Lev. xiii., xiv. means any severe disease spreading on the surface of the body in the way described, and so shocking of aspect, or so generally suspected of infection, that public feeling called for separation. No doubt such diseases as syphilis, elephantiasis, cancer, and all others which not merely have their seat in the skin, but which invade and disorganise the underlying and deeper-seated tissues, would have been classed Levitically as "leprosy," had they been so generally prevalent as to require notice.

It is now undoubted that the "leprosy" of modern Syria, and which has a wide range in Spain, Greece, and Norway, is the *Elephantiasis Graeco-*

The word in the Heb. is כָּהָה, which means to languish or fade away; hence the A. V. hardly conveys the sense adequately by "be somewhat dark." Perhaps the expressions of Hippocrates, who speaks of a milder form of leprosy, and of Celsus, who mentions one *umbrae similis*, may have led our translators to endeavour to find equivalents for them in the Hebrew.

[g] Thus we have in Kitto's *Cyclopaedia of Biblical Literature* the following table, based apparently on a

rum. The Arabian physicians perhaps caused the confusion of terms, who, when they translated the Greek of Hippocrates, rendered his elephantiasis by leprosy, there being another disease to which they gave a name derived from the elephant, and which is now known as *Elephantiasis Arabum*,—the "Barbadoes leg," "Bouenemia Tropica." The *Elephantiasis Graecorum* is said to have been brought home by the crusaders into the various countries of Western and Northern Europe. Thus an article on "Leprosy," in the Proceedings of the Royal Medical and Chirurgical Society of London, Jan. 1860, vol. iii. 3, p. 164, &c., by Dr. Webster, describes what is evidently this disease. Thus Michaelis (Smith's translation, vol. iii. p. 283, Art. ccx.) speaks of what he calls *lepra Arabum*, the symptoms of which are plainly elephantisiac. For a discussion of the question whether this disease was known in the early Biblical period, see MEDICINE. It certainly was not that distinctive white leprosy of which we are now speaking, nor do any of the described symptoms in Lev. xiii. point to elephantiasis. "White as snow" (2 K. v. 27) would be as inapplicable to elephantiasis as to small-pox. Further, the most striking and fearful results of this modern so-called "leprosy" are wanting in the Mosaic description—the transformation of the features to a leonine expression, and the corrosion of the joints, so that the fingers drop piecemeal, from which the Arabic name, جذام, *Judhâm*, i. e. mutilation, seems derived.[h] Yet before we dismiss the question of the affinity of this disease with Mosaic leprosy, a description of Rayer's (*Traité Théorique, &c., des Maladies de la Peau*, s. v. *Elephantiasis*) is worth quoting. He mentions *two* characteristic species, the one tuberculated, probably the commoner kind at present (to judge from the concurrence of modern authorities in describing this type), the other "characterisée par des plaques fauves, larges, étendues, flétries, ridées, insensibles, accompagnées d'une legère desquamation et d'une déformation particulière des pieds et des mains," and which he deems identical with the "lépre du moyen âge." This certainly appears to be at least a link between the tuberculated elephantiasis and the Mosaic leprosy.[i] Celsus, after distinguishing the three Hippocratic varieties of *vitiligo* = leprosy, separately describes elephantiasis. Avicenna (Dr. Mead, *Medica Sacra*, "the Leprosy") speaks of leprosy as a sort of universal cancer of the whole body. But amidst the evidence of a redundant variety of diseases of the skin and adjacent tissues, and of the probable rapid production and evanescence of some forms of them, it would be rash to assert the identity of any from such resemblance as this.

Nor ought we in the question of identity of symptoms to omit from view, that not only does observation become more precise with accumulated experience; but, that diseases also, in proportion as they fix their abiding seat in a climate, region, or race of men, tend probably to diversity of type, and that in the course of centuries, as with the fauna and flora, varieties originate in the modifying influence of circumstances, so that Hippocrates might find three kinds of leprosy, where one variety only had existed before. Whether, therefore, we regard Lev. xiii. as speaking of a group of diseases having mutually a mere superficial resemblance, or a real affinity, it need not perplex us that they do not correspond with the threefold leprosy of Hippocrates (the ἀλφός, λεύκη, and μέλας), which are said by Bateman (*Skin Diseases*, Plates vii. and viii.) to prevail still respectively as *lepra alphoides*, *lepra vulgaris*, and *lepra nigricans*. The first has more minute and whiter scales, and the circular patches in which they form are smaller than those of the *vulgaris*, which appears in scaly discs of different sizes, having nearly always a circular form, first presenting small distinct red shining elevations of the cuticle, then white scales which accumulate sometimes into a thick crust; or, as Dr. Mason Good describes its appearance (vol. iv. p. 451), as having a spreading scale upon an elevated base; the elevations depressed in the middle, but without a change of colour; the black hair on the patches, which is the prevailing colour of the hair in Palestine, participating in the whiteness, and the patches themselves perpetually widening in their outline. A phosphate of lime is probably what gives their bright glossy colour to the scaly patches,

more extensive one in Dr. Mason Good (*ub. sup.* pp. 448, 452), which is chiefly characterised by an attempt to fix modern specific meanings on the general terms of Lev. xiii.: *e. g.* שְׂאֵת, *lepra*, or tetter; נֶגַע, *ictus*, "blow" or "bruise," &c.

בַּהֶרֶת, Lev.			λέπρα, Hipp.			*vitiligo*, Cels.	
comprehending			comprehending			comprehending	
(1) בֹּהַק,			(1) ἀλφός,			(1) *albida*,	
(2) בַּהֶרֶת לְבָנָה,	=		(2) λεύκη,	=		(2) *candida*,	
(3) בַּהֶרֶת כֵּהָה.			(3) μέλας.			(3) *nigrescens*, or *umbrae similis*.	

But the Hebrew of (1) is in Lev. xiii. 39 predicated of a subject compounded of the phraseology of (2) and (3), whereas the (1), (2), and (3) of Hipp. and of Celsus are respectively distinct and mutually exclusive of one another. Further, the word כֵּהָה appears mistranslated by "black" or "dark;" meaning rather "languid," "dim," as an old man's eyes, an expiring and feeble flame, &c. Now it is remarkable that the Hippocratic terms ἀλφός and λεύκη are found in the LXX. The phraseology of the latter is also more specific than will adequately represent the Hebrew, suggesting shades of meaning * where this has a wide general word, or substituting a word denoting one symptom as θραῦσμα,† "crust," formed probably by humour oozing, for נֶתֶק, "expilation."

[h] This is clearly and forcibly pointed out in an article by Dr. Robert Sim in the *Medical Times*, April 14, 1860, whose long hospital experience in Jerusalem entitles his remarks to great weight.

[i] On the question how far elephantiasis may probably have been mixed up with the leprosy of the Jews, see Paul. Aegin. vol. ii. p. 6 and 32, 33, ed. *Syd. Soc.*

* Thus the expression עָמֹק מַרְאֵהוּ בָשֵׂר, "deeper than the skin of the flesh," is rendered in ver. 3 by ἐπιπολῆς ἀπὸ τοῦ βλάματος, in 30 by ἐγκοιλοτέρα τοῦ δέρματος, in 34 by κοίλη ἀπὸ τοῦ δ.

† So Dr. M. Good, who improves on the θραῦσμα by ἐκπύησις, "suppuration," wishing to substitute moist scall for the "dry scall" of the A. V., which latter is no doubt nearer the mark.

and this in the kindred disease of icthyosis is deposited in great abundance on the surface. The third, *nigricans*, or rather *subfusca*,[k] is rarer, in form and distribution, resembling the second, but differing in the dark livid colour of the patches. The scaly incrustations of the first species infest the flat of the fore-arm, knee, and elbow joints, but on the face seldom extend beyond the forehead and temples; comp. 2 Chr. xxvi. 19: "the leprosy rose up in his forehead." The cure of this is not difficult; the second scarcely ever heals (Celsus, *De Med.* v. 28, §19). The third is always accompanied by a cachetic condition of body. Further, elephantiasis itself has also passed current under the name of the "black leprosy." It is possible that the "freckled spot" of the A. V. Lev. xiii. 39[m] may correspond with the harmless l. alphoides, since it is noted as "clean." The ed. of Paulus Aegin. by the Sydenham Society (vol. ii. p. 17, foll.) gives the following summary of the opinions of classical medicine on this subject:—"Galen is very deficient on the subject of lepra, having nowhere given a complete description of it, though he notices it incidentally in many parts of his works. In one place he calls elephas, leuce, and alphos cognate affections. Alphos, he says, is much more superficial than leuce. Psora is said to partake more of the nature of ulceration. According to Oribasius, lepra affects mostly the deep-seated parts, and psora the superficial. Aetius on the other hand, copying Archigenes, represents lepra as affecting only the skin. Actuarius states that lepra is next to elephantia in malignity, and that it is distinguished from psora by spreading deeper and having scales of a circular shape like those of fishes. Leuce holds the same place to alphos that lepra does to psora; that is to say, leuce is more deep-seated and affects the colour of the hair, while alphos is more superficial, and the hair in general unchanged. . . . Alexander Aphrodisiensis mentions psora among the contagious diseases, but says that lepra and leuce are not contagious. Chrysostom alludes to the common opinion that psora was among the contagious diseases. . . . Celsus describes alphos, melas, and leuce, very intelligibly, connecting them together by the generic term of vitiligo."

There is a remarkable concurrence between the Aeschylean description of the disease which was to produce "lichens coursing over the flesh, eroding with fierce voracity the former natural structure, and white hairs shooting up over the part diseased,"[n] and some of the Mosaic symptoms; the spreading energy of the evil is dwelt upon both by Moses and by Aeschylus, as vindicating its character as a scourge of God. But the symptoms of "white hairs" is a curious and exact confirmation of the genuineness of the detail in the Mosaic account, especially as the poet's language would rather imply that the disease spoken of was *not* then domesticated in Greece, but the strange horror of some other land. Still, nothing very remote from our own experience is implied in the mere changed colour of the hair; it is common to see horses with galled backs, &c., in which the hair has turned white through the destruction of those follicles which secrete the colouring matter.

There remains a curious question, before we quit Leviticus, as regards the leprosy of garments and houses. Some have thought garments worn by leprous patients intended. The discharges of the diseased skin absorbed into the apparel would, if infection were possible, probably convey disease; and it is known to be highly dangerous in some cases to allow clothes which have so imbibed the discharges of an ulcer to be worn again.[o] And the words of Jude v. 23, may seem to countenance this,[p] "hating even the garment spotted by the flesh." But 1stly, no mention of infection occurs; 2ndly, no connexion of the leprous garment with a leprous human wearer is hinted at; 3rdly, this would not help us to account for a leprosy of stone-walls and plaster. Thus Dr. Mead (*ut sup.*) speaks at any rate plausibly of the leprosy of garments, but becomes unreasonable when he extends his explanation to that of walls. Michaelis thought that wool from sheep which had died of a particular disease might fret into holes, and exhibit an appearance like that described, Lev. xiii. 47-59 (Michaelis, art. ccxi. iii. 290-1). But woollen cloth is far from being the only material mentioned; nay, there is even some reason to think that the words rendered in the A. V. "warp" and "woof" are not those distinct parts of the texture, but distinct materials. Linen, however, and leather are distinctly particularised, and the latter not only as regards garments, but "any thing (lit. vessel) made of skin," for instance, bottles. This classing of garments and house-walls with the human epidermis, as leprous, has moved the mirth of some, and the wonder of others. Yet modern science has established what goes far to vindicate the Mosaic classification as more philosophical than such cavils. It is now known that there are some skin-diseases which originate in an acarus, and others which proceed from a fungus. In these we may probably find the solution of the paradox. The analogy between the insect which frets the human skin and that which frets the garment that covers it, between the fungous growth that lines the crevices of the epidermis and that which creeps in the interstices of masonry,[q] is close enough for the purposes of a ceremonial law, to which it is essential that there should be an arbitrary element intermingled with provisions manifestly reasonable. Michaelis (*ib.* art ccxi. iii. 293-9) has suggested a nitrous efflorescence on the surface of the stone, produced by saltpetre, or rather an acid containing it, and issuing in red spots, and cites the example of a house in Lubeck; he mentions also exfoliation of the stone from other

[k] Still it is known that black secretions, sometimes carried to the extent of negro blackness, have been produced under the skin, as in the *rete mucosum* of the African. See *Medico-Chirurgical Rev.*, New Series, vol. v. p. 215, Jan. 1847.

[m] Heb. בֹּהֶרֶת; Arab. بهق.

[n] σαρκῶν ἐπαμβατῆρας ἀγρίαις γνάθοις
λιχῆνας ἐξέσθοντας ἀρχαίαν φύσιν
λευκὰς δὲ κόρσας τῇδ' ἀναστέλλειν νόσῳ.
Choeph. 271-274.

[o] So Surenhusius (Mishna, *Negaim*) says, "Maculae aliquando subviridos, aliquando subrubidae, cujusmodi videri solent in aegrotorum indusiis, et praecipue eâ in parte ubi vis morbi medicinâ sudoriferâ e corpore exterius prodierit."

[p] See, however, Lev. xv. 3, 4, which suggests another possible meaning of the words of St. Jude.

[q] The word λειχὴν (the "lichen" of botany), the Aeschylean word to express the dreaded scourge in *Choephor.* 271-274 (comp. *Eumen.* 785, see note [n]), is also the technical term for a disease akin to leprosy. The ed. of Paulus Aegin., Sydenh. Soc., vol. ii. p. 19, says that the poet here means to describe leprosy. In the Isagoge, generally ascribed to Galen (*ib.* p. 25), two varieties are described, the lichen mitis and the lichen agrius, in both of which scales are formed upon the skin. Galen remarks on the tendency of this disease to pass into lepra and scabies.

causes; but probably these appearances would not be developed without a greater degree of damp than is common in Palestine and Arabia. It is manifest also that a disease in the human subject caused by an acarus or by a fungus would be certainly contagious, since the propagative cause could be transferred from person to person. Some physicians indeed assert that *only* such skin-diseases *are* contagious. Hence perhaps arose a further reason for marking, even in their analogues among lifeless substances, the strictness with which forms of disease so arising were to be shunned. The sacrificial law attending the purgation of the leper will be more conveniently treated of under UNCLEANNESS.

The lepers of the New Testament do not seem to offer occasion for special remark, save that by the N. T. period the disease, as known in Palestine, probably did not differ materially from the Hippocratic record of it, and that when St. Luke at any rate uses the words λέπρα, λέπρος, he does so with a recognition of their strict medical signification.

From Surenhusius (Mishna, *Negaim*), we find that some Rabbinical commentators enumerate 16, 36, or 72 diverse species of leprosy, but they do so by including all the phases which each passes through, reckoning a red and a green variety in garments, the same in a house, &c., and counting *calvitium*, *recalvatio*, *adustio*, and even *ulcus*, as so many distinct forms of leprosy.

For further illustrations of this subject see Schilling, *de Lepra*; Reinhard, *Bibelkrankheiten*; Schmidt, *Biblischer Medecin*; Rayer, *ut sup.*, who refers to Roussille-Chamseru, *Recherches sur le véritable Caractère de la Lèpre des Hébreux*, and *Relation Chirurgicale de l'Armée de l'Orient*, Faria, 1804; Cazenave and Schedel, *Abrégé Pratique des Maladies de la Peau*; Dr. Mead, *ut sup.*, who refers to Aretaeus,[a] *Morb. Chron.* ii. 13; Franciscus, *de Morbis Contagiosis*; Johannes Mesardus, *Epist. Medic.* vii. 2, and to iv. 3, 3, §1; Avicenna, *de Medicina*, v. 28, §19; also Dr. Sim in *the North American Chirur. Rev.* Sept. 1859, p. 876. The ancient authorities are Hippocrates, *Prorrhetica*, lib. xii. *ap. fin.*; Galen, *Explicatio Lexicorum Hippocratis*, and *de Art. Curat.* lib. i.; Celsus, *de Medic.* v. 28, §19. [H. H.]

LE'SHEM (לֶשֶׁם: *Lesem.*), a variation in the form of the name of LAISH, afterwards DAN, occurring only in Josh. xix. 47 (twice). The Vat. LXX. is very corrupt, having Λαχεὶς and Λεσεννδάκ (see Mai's ed.); but the Alex., as usual, is in the second case much closer to the Hebrew, Λεσεμ and Λεσενδαν.

The commentators and lexicographers afford no clue to the reason of this variation in form. [G.]

LETT'US (Λαττούς; Alex. Ἀττούς: *Acchus*), the same as HATTUSH (1 Esd. viii. 29). The Alex. MS. has evidently the correct reading, of which the name as it appears in the Vat. MS. is an easy corruption, from the similarity of the uncial Λ and Α.

LETU'SHIM (לְטוּשִׁים: Λατουσιείμ: *Latusim*, *Latussim*), the name of the second of the sons of Dedan, son of Jokshan, Gen. xxv. 3 (and 1 Chr. i. 32, Vulg.). Fresnel (*Journ. Asiat.* III^e^ serie, vol. vi. p. 217, 8) identifies it with *Tasm*,[a] one of the ancient and extinct tribes of Arabia, like as he compares Leummim with Umeiyim. The names may perhaps be regarded as commencing with the Hebrew article. Nevertheless, the identification in each case seems to be quite untenable. (Respecting these tribes, see LEUMMIM and ARABIA.) It is noteworthy that the three sons of the Keturahite Dedan are named in the plural form, evidently as tribes descended from him. [E. S. P.]

LEUM'MIM (לְאֻמִּים, from לְאֹם: Λαομείμ: *Loomim*, *Laomim*), the name of the third of the descendants of Dedan, son of Jokshan, Gen. xxv. 3 (1 Chr. i. 32, Vulg.), being in the plural form like his brethren, Asshurim and Letushim. It evidently refers to a tribe or people sprung from Dedan, and indeed in its present form literally signifies "peoples," "nations;" but it has been observed in art. LETUSHIM, that these names perhaps commence with the Hebrew article. Leummim has been identified with the Ἀλλουμαιτῶται of Ptolemy (vi. 7. §24: see *Dict. of Geogr.*), and by Fresnel (in the *Journ. Asiat.* III^e^ serie, vol. vi. p. 217) with an Arab tribe called *Umeiyim*.[b] Of the former, the writer knows no historical trace: the latter was one of the very ancient tribes of Arabia of which no genealogy is given by the Arabs, and who appear to have been ante-Abrahamic, and possibly aboriginal inhabitants of the country. [ARABIA.] [E. S. P.]

LEVI. 1. (לֵוִי: Λευεί: *Levi*), the name of the third son of Jacob by his wife Leah. This, like most other names in the patriarchal history, was connected with the thoughts and feelings that gathered round the child's birth. As derived from לָוָה, "to adhere," it gave utterance to the hope of the mother that the affections of her husband, which had hitherto rested on the favoured Rachel, would at last be drawn to her. "This time will my husband be joined unto me, because I have borne him three sons" (Gen. xxix. 34). The new-born child was to be a κοινωνίας βεβαιωτής (Jos. *Ant.* i. 19, §8), a new link binding the parents to each other more closely than before.[c] But one fact is recorded in which he appears prominent. The sons of Jacob have come from Padan-Aram to Canaan with their father, and are with him "at Shalem, a city of Shechem." Their sister Dinah goes out "to see the daughters of the land" (Gen. xxxiv. 1), *i. e.* as the words probably indicate, and as Josephus distinctly states (*Ant.* i. 21), to be present at one of their great annual gatherings for some festival of nature-worship, analogous to that which we meet with afterwards among the Midianites (Num. xxv. 2). The license of the time or the absence of her natural guardians exposes her, though yet in earliest youth, to lust and outrage. A stain is left, not only on her, but on the honour of her kindred, which, according to the rough justice of the time, nothing but blood could wash out. The duty of extorting that revenge fell, as in the case of Amnon and Tamar (2 Sam. xiii. 22), and in most other states of society in which polygamy has prevailed (comp. for the customs of modern Arabs, J. D. Michaelis, quoted by Kurtz, *Hist. of Old Covenant*, i. §82, p. 340, on the brothers rather

[a] Dr. Mead's reference is *de Morbis Contagiosis*, ii. cap. 9. There is no such title extant to any portion Aretaeus' work; see, however, the Sydenham Society's edition of that writer, p. 370.

[a] طسم. [b] اميم.

[c] The same etymology is recognised, though with a higher significance, in Num. xviii. 2.

than the father, just as, in the case of Rebekah, it belonged to the brother to conduct the negotiations for the marriage. We are left to conjecture why Reuben, as the first-born, was not foremost in the work, but the sin of which he was afterwards guilty, makes it possible that his zeal for his sister's purity was not so sensitive as theirs. The same explanation may perhaps apply to the non-appearance of Judah in the history. Simeon and Levi, as the next in succession to the first-born, take the task upon themselves. Though not named in the Hebrew text of the O. T. till xxxiv. 25, there can be little doubt that they were "the sons of Jacob" who heard from their father the wrong over which he had brooded in silence, and who planned their revenge accordingly. The LXX. version does introduce their names in ver. 14. The history that follows is that of a cowardly and repulsive crime. The two brothers exhibit, in its broadest contrasts, that union of the noble and the base, of characteristics above and below the level of the heathen tribes around them, which marks the whole history of Israel. They have learned to loathe and scorn the impurity in the midst of which they lived, to regard themselves as a peculiar people, to glory in the sign of the covenant. They have learnt only too well from Jacob and from Laban, the lessons of treachery and falsehood. They lie to the men of Shechem as the Druses and the Maronites lie to each other in the prosecution of their blood-feuds. For the offence of one man, they destroy and plunder a whole city. They cover their murderous schemes with fair words and professions of friendship. They make the very token of their religion the instrument of their perfidy and revenge.[d] Their father, timid and anxious as ever, utters a feeble lamentation (Blunt's *Script. Coincidences*, Part i. §8), "Ye have made me to stink among the inhabitants of the land . . . I being few in number, they shall gather themselves against me." With a zeal that, though mixed with baser elements, foreshadows the zeal of Phinehas, they glory in their deed, and meet all remonstrance with the question, "Should he deal with our sister as with a harlot?" Of other facts in the life of Levi, there are none in which he takes, as in this, a prominent and distinct part. He shares in the hatred which his brothers bear to Joseph, and joins in the plots against him (Gen. xxxvii. 4). Reuben and Judah interfere severally to prevent the consummation of the crime (Gen. xxxvii. 21, 26). Simeon appears, as being made afterwards the subject of a sharper discipline than the others, to have been foremost—as his position among the sons of Leah made it likely that he would be—in this attack on the favoured son of Rachel; and it is at least probable that in this, as in their former guilt, Simeon and Levi were brethren. The rivalry of the mothers was perpetuated in the jealousies of their children; and the two who had shown themselves so keenly sensitive when their sister had been wronged, make themselves the instruments and accomplices of the hatred which originated, we are told, with the baser-born sons of the concubines (Gen. xxxvii. 2). Then comes for him, as for the others, the discipline of suffering and danger, the special education by which the brother whom they had wronged leads them back to faithfulness and natural affection. The detention of Simeon in Egypt may have been designed at once to be the punishment for the large share which he had taken in the common crime, and to separate the two brothers who had hitherto been such close companions in evil. The discipline does its work. Those who had been relentless to Joseph become self-sacrificing for Benjamin.

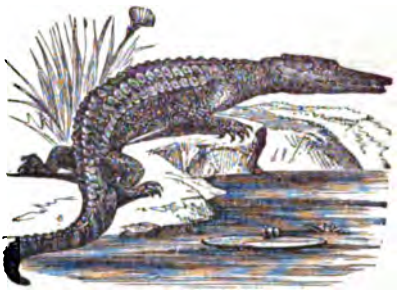
After this we trace Levi as joining in the migration of the tribe that owned Jacob as its patriarch. He, with his three sons, Gershon, Kohath, Merari, went down into Egypt (Gen. xlvi. 11). As one of the four eldest sons we may think of him as among the five (Gen. xlvii. 2) that were specially presented before Pharaoh[e]. Then comes the last scene in which his name appears. When his father's death draws near, and the sons are gathered round him, he hears the old crime brought up again to receive its sentence from the lips that are no longer feeble and hesitating. They, no less than the incestuous first-born, had forfeited the privileges of their birthright. "In their anger they slew men, and in their wantonness they maimed oxen" (marg. reading of A. V.; comp. LXX. ἐνευροκόπησαν ταῦρον). And therefore the sentence on those who had been united for evil was, that they were to be "divided in Jacob and scattered in Israel." How that condemnation was at once fulfilled and turned into a benediction, how the zeal of the patriarch reappeared purified and strengthened in his descendants; how the very name came to have a new significance, will be found elsewhere. [LEVITES.]

The history of Levi has been dealt with here in what seems the only true and natural way of treating it, as a history of an individual person. Of the theory that sees in the sons of Jacob the mythical Eponymi of the tribes that claimed descent from them—which finds in the crimes and chances of their lives the outlines of a national or tribal chronicle—which refuses to recognise that Jacob had twelve sons, and insists that the history of Dinah records an attempt on the part of the Canaanites to enslave and degrade a Hebrew tribe (Ewald, *Geschichte*, i. 466–496)—of this one may be content to say, as the author says of other hypotheses hardly more extravagant, "die Wissenschaft verscheucht alle solche Gespenster" (*Ibid.* i. 466). The book of Genesis tells us of the lives of men and women, not of ethnological phantoms.

A yet wilder conjecture has been hazarded by another German critic. P. Redslob (*Die alttestamentl. Namen*, Hamb. 1846, p. 24, 25), recognizing the meaning of the name of Levi as given above, finds in it evidence of the existence of a confederacy or synod of the priests that had been connected with the several local worships of Canaan, and who, in the time of Samuel and David, were gathered together, *joined*, "round the Central Pantheon in Jerusalem." Here also we may borrow the terms of our judgment from the language of the writer himself. If there are "abgeschmackten etymologischen Mährchen" (Redslob, p. 82) connected with the name of Levi, they are hardly those we meet with in the narrative of Genesis. [E. H. P.]

2. (Λευεί; Rec. Text, Λευΐ; *Levi*) Son of Melchi, one of the near ancestors of our Lord, in fact the great-grandfather of Joseph (Luke iii. 24). This name is omitted in the list given by Africanus.

[d] Josephus (*Ant.* l. c.) characteristically glosses over all that connects the attack with the circumcision of the Shechemites, and represents it as made in a time of feasting and rejoicing.



[e] The Jewish tradition (*Targ. Pseudojon.*) states the five to have been Zebulun, Dan, Naphtali, Gad, and Asher

3. A more remote ancestor of Christ, son of Simeon (Luke iii. 29). Lord A. Hervey considers that the name of Levi reappears in his descendant Lebbaeus (*Geneal. of Christ*, 132, and see 36, 46).

4. (Λευΐς; R. T. Λευΐς.) Mark ii. 14; Luke v. 27, 29. [MATTHEW.]

LEVI'ATHAN (לִוְיָתָן, *liv'yáthán*: τὸ μεγα κῆτος, δράκων; Complut. Job iii. 8, λεβιαθάν, *leviathan*, *draco*) occurs five times in the text of the A. V., and once in the margin of Job iii. 8, where the text has "mourning." In the Hebrew Bible the word *liv'yathan*," which is, with the foregoing exception, always left untranslated in the A. V., is found only in the following passages: Job iii. 8, xl. 25 (xli. 1, A. V.); Ps. lxxiv. 14, civ. 26; Is. xxvii. 1. In the margin of Job iii. 8, and text of Job xli. 1,[b] the crocodile is most clearly the animal denoted by the Hebrew word. Ps. lxxiv. 14 also clearly points to this same saurian. The context of Ps. civ. 26, "There go the ships: *there is* that leviathan, *whom* thou hast made to play therein," seems to show that in this passage the name represents some animal of the whale tribe; but it is somewhat uncertain what animal is denoted in Is. xxvii. 1. It would be out place here to attempt any detailed explanation of the passages quoted above, but the following remarks are offered. The passage in Job iii. 8 is beset with difficulties, and it is evident from the two widely different readings of the text and margin that our translators were at a loss. There can however be little doubt that the margin is the correct rendering, and this is supported by the LXX., Aquila, Theodotion, Symmachus, the Vulgate and the Syriac. There appears to be some reference to those who practised enchantments. Job is lamenting the day on which he was born, and he says, "Let them curse it that curse the day, who are ready to raise up a leviathan:" *i. e.* "Let those be hired to imprecate evil on my natal day who say they are able by their incantations to render days propitious or unpropitious, yea, let such as are skilful enough to raise up even leviathan (the crocodile) from his watery bed be summoned to curse that day:" or, as Mason Good has translated the passage, "Oh! that night! let it be a barren rock! let no sprightliness enter into it! let the sorcerers of the day curse it! the expertest among them that can conjure up leviathan!"

The detailed description of leviathan given in Job xli. indisputably belongs to the crocodile, and it is astonishing that it should ever have been understood to apply to a whale or a dolphin; but Lee (*Comm. on Job* xli.), following Hasaeus (*Disq. de Lev. Jobi et Ceto Jonae*," Brem. 1723), has laboured hard, though unsuccessfully, to prove that the leviathan of this passage is some species of *whale*, probably, he says, the *Delphinus orca*, or common grampus. That it can be said to be the pride of any cetacean that his "scales shut up together as with a close seal," is an assertion that no one can accept, since every member of this group has a body almost bald and smooth.

Crocodile of the Nile (*C. vulgaris*)

The Egyptian crocodile also is certainly the animal denoted by *leviathan* in Ps. lxxiv. 14:[c] "Thou, O God, didst destroy the princes of Pharaoh, the great crocodile or 'dragon that lieth in the midst of his rivers' (Ez. xxix. 3) in the Red Sea, and didst give their bodies to be food for the wild beasts of the desert."[d] The leviathan of Ps. civ. 26 seems clearly enough to allude to some great cetacean. The "great and wide sea" must surely be the Mediterranean, "the great sea," as it is usually called in Scripture; it would certainly be stretching the point too far to understand the expression to represent any part of the Nile. The crocodile, as is well known, is a fresh-water, not a marine animal:[e] it is very probable therefore that some *whale* is signified by the term *leviathan* in this passage, and it is quite an error to assert, as Dr. Harris (*Dict. Nat. Hist. Bib.*), Mason Good (*Book of Job translated*), Michaelis (*Supp.* 1297), and Rosenmüller (quoting Michaelis in *not. ad Bochart Hieroz.* iii. 738) have done, that the whale is not found in the Mediterranean. The *Orca gladiator* (Gray)—the grampus mentioned above by Lee—the *Physalus antiquorum* (Gray), or the *Rorqual de la Méditerranée* (Cuvier), are not uncommon in the Mediterranean (Fischer, *Synops. Mam.* 525, and Lacepède, *H. N. des Cetac.* 115), and in ancient times the species may have been more numerous.

There is some uncertainty about the *leviathan* of Is. xxvii. 1. Rosenmüller (*Schol. in l. c.*) thinks that the word *nachash*, here rendered *serpent*, is to be taken in a wide sense as applicable to any great monster; and that the prophet, under the term "leviathan that crooked serpent," is speaking of Egypt, typified by the *crocodile*, the usual emblem of the prince of that kingdom. The Chaldee paraphrase understands the "leviathan that piercing serpent" to refer to Pharaoh, and "leviathan that crooked serpent" to refer to Sennacherib.

[a] לִוְיָתָן, from לָוָה, an animal *wreathed*.

[b] *Whirlpool*, i. e. some *sea-monster*: vid. Trench's *Select Glossary*, p. 226.

[c] The modern Arabic name of crocodile is *Timsáh*. The word is derived from the Coptic, *Emsaḥ*, *Amsaḥ*, whence with the aspirate χάμψαι (Herod. ii. 69). Wilkins, however (*de L. Copt.* p. 101), contends that the word is of Arabic origin. See Jablonsk. *Opera* i. 387, 287, ed. Te Water, 1804.

[d] "The people inhabiting the wilderness"—a poetical expression to denote the wild beasts: comp. "the rats are a *people* not strong," "the conies are but a feeble *folk*" (Prov. xxx. 25, 26). For other interpretations of this passage see Rosenmüll. *Schol.*, and Bochart, *Phaleg*, 316.

[e] According to Warburton (*Orac. & Cr.* 85) the crocodile is never now seen below Minyeh, but it should be stated that Pliny (*N. H.* viii. 25), not Herodotus, as Mr. Warburton asserts, speaks of crocodiles being attacked by dolphins at the mouth of the Nile. Seneca (*Nat. Quaest.* iv. 2) gives an account of a contest between these animals. Cuvier thinks that a species of dog-fish is meant (*Acanthias vulgaris*), on account of the dorsal spines of which Pliny speaks, and which no species of dolphin possesses.

As the term *leviathan* is evidently used in no limited sense, it is not improbable that the "leviathan the piercing serpent," or "leviathan the crooked serpent," may denote some species of the great rock-snakes (*Boidae*) which are common in South and West Africa, perhaps the *Hortulia Sebae*, which Schneider (*Amph.* ii. 266), under the synonym *Boa hieroglyphica*, appears to identify with the huge serpent represented on the Egyptian monuments. This python, as well as the crocodile, was worshipped by the Egyptians, and may well therefore be understood in this passage to typify the Egyptian power. Perhaps the English word *monster* may be considered to be as good a translation of *liv'yâthân* as any other that can be found; and though the *crocodile* seems to be the animal more particularly denoted by the Hebrew term, yet, as has been shown, the *whale*, and perhaps the *rock-snake* also, may be signified under this name.[f] [WHALE.] Bochart (iii. 769, ed. Rosenmüller) says that the Talmudists use the word *liv'yâthân* to denote the crocodile; this however is denied by Lewysohn (*Zool. des Talm.* 155, 355), who says that in the Talmud it always denotes a *whale*, and never a *crocodile*. For the Talmudical fables about the leviathan, see Lewysohn (*Zool. des Talm.*), in passages referred to above, and Buxtorf, *Lex. Chal. Talm.* s. v. לויתן. [W. H.]

LEV'IS (Λευΐς: *Levis*), improperly given as a proper name in 1 Esd. ix. 14. It is simply a corruption of "the Levite" in Ezr. x. 15.

LEV'ITES (הַלְוִיִּם: Λευῖται: *Levitae*: also בְּנֵי לֵוִי: *vlol* Λευΐ: *filii Levi*). The analogy of the names of the other tribes of Israel would lead us to include under these titles the whole tribe that traced its descent from Levi. The existence of another division, however, within the tribe itself, in the higher office of the priesthood as limited to the "sons of Aaron," gave to the common form, in this instance, a peculiar meaning. Most frequently the Levites are distinguished, as such, from the priests (1 K. viii. 4; Ezr. ii. 70; John i. 19, &c.), and this is the meaning which has perpetuated itself. Sometimes the word extends to the whole tribe, the priests included (Num. xxxv. 2; Josh. xxi. 3, 41; Ex. vi. 25; Lev. xxv. 32, &c.). Sometimes again it is added as an epithet of the smaller portion of the tribe, and we read of "the priests the Levites" (Josh. iii. 3; Ez. xliv. 15). The history of the tribe, and of the functions attached to its several orders, is obviously essential to any right apprehension of the history of Israel as a people. They are the representatives of its faith, the ministers of its worship. They play at least as prominent a part in the growth of its institutions, in fostering or repressing the higher life of the nation, as the clergy of the Christian Church have played in the history of any European kingdom. It will be the object of this article to trace the outlines of that history, marking out the functions which at different periods were assigned to the tribe, and the influence which its members exercised. This is, it is believed, a truer method than that which would attempt to give a more complete picture by combining into one whole the fragmentary notices which are separated from each other by wide intervals of time, or treating them as if they represented the permanent characteristics of the order. In the history of all priestly or quasi-priestly bodies, functions vary with the changes of time and circumstances, and to ignore those changes is a sufficient proof of incompetency for dealing with the history. As a matter of convenience, whatever belongs exclusively to the functions and influence of the priesthood, will be found under that head [PRIEST]; but it is proposed to treat here of all that is common to the priests and Levites, as being together the sacerdotal tribe, the *clergy* of Israel. The history will fall naturally into four great periods.

I. The time of the Exodus.
II. The period of the Judges.
III. That of the Monarchy.
IV. That from the Captivity to the destruction of Jerusalem.

I. The absence of all reference to the consecrated character of the Levites in the book of Genesis is noticeable enough. The prophecy ascribed to Jacob (Gen. xlix. 5-7) was indeed fulfilled with singular precision; but the terms of the prophecy are hardly such as would have been framed by a later writer,[a] after the tribe had gained its subsequent pre-eminence; and unless we frame some hypothesis to account for this omission as deliberate, it takes its place, so far as it goes, among the evidence of the antiquity of that section of Genesis in which these prophecies are found. The only occasion on which the patriarch of the tribe appears—the massacre of the Shechemites—may indeed have contributed to influence the history of his descendants, by fostering in them the same fierce wild zeal against all that threatened to violate the purity of their race; but generally what strikes us is the absence of all recognition of the later character. In the genealogy of Gen. xlvi. 11, in like manner, the list does not go lower down than the three sons of Levi, and they are given in the order of their birth, not in that which would have corresponded to the official superiority of the Kohathites.[b] There are no signs, again, that the tribe of Levi had any special pre-eminence over the others during the Egyptian bondage. As tracing its descent from Leah, it would take its place among the six chief tribes sprung from the wives of Jacob, and share with them a recognised superiority over those that bore the names of the sons of Bilhah and Zilpah. Within the tribe itself there are some slight tokens that the Ko-

[f] The Heb. word נָחָשׁ occurs about thirty times in the O. T., and it seems clear enough that in every case its use is limited to the *serpent tribe*. If the LXX. interpretation of בָּרִחַ be taken, the *fleeing* and not *piercing* serpent is the rendering: the Heb. עֲקַלָּתוֹן, *tortuosus*, is more applicable to a serpent than to any other animal. The expression, "He shall slay the dragon that is in the sea," refers also to the Egyptian power, and is merely explicative—the dragon being the crocodile, which is in this part of the verse an emblem of Pharaoh, as the serpent is in the former part of the verse.

[a] Ewald (*Gesch.* ii. 454) refers the language of Gen. xlix. 7 not to the distribution of the Levites in their 48 cities, but to the time when they had fallen into disrepute, and become, as in Judg. xvii. a wandering, half-mendicant order. But see Kalisch *Genesis, ad loc.*

[b] The later genealogies, it should be noticed, reproduce the same order. This was natural enough; but a genealogy originating in a later age, and reflecting its feelings, would probably have changed the order (Comp. Ex. vi. 16, Num. iii. 17, 1 Chr. vi. 16.)

hallowed are gaining the first place. The classification of Ex. vi. 16-25, gives to that section of the tribe four clans or houses, while those of Gershon and Merari have but two each.[a] To it belonged the house of Amram; and "Aaron the Levite" (Ex. iv. 14) is spoken of as one to whom the people will be sure to listen. He marries the daughter of the chief of the tribe of Judah (Ex. vi. 23). The work accomplished by him, and by his yet greater brother, would tend naturally to give prominence to the family and the tribe to which they belonged; but as yet there are no traces of a caste-character, no signs of any intention to establish an hereditary priesthood. Up to this time the Israelites had worshipped the God of their fathers after their fathers' manner. The first-born of the people were the priests of the people. The eldest son of each house inherited the priestly office. His youth made him, in his father's lifetime, the representative of the purity which was connected from the beginning with the thought of worship (Ewald, *Alterthüm.* 273, and comp. PRIEST). It was apparently with this as their ancestral worship that the Israelites came up out of Egypt. The "young men" of the sons of Israel offer sacrifices[b] (Ex. xxiv. 5). They, we may infer, are the priests who remain with the people while Moses ascends the heights of Sinai (xix. 22-24). They represented the truth that the whole people were "a kingdom of priests" (xix. 6). Neither they, nor the "officers and judges" appointed to assist Moses in administering justice (xviii. 25) are connected in any special manner with the tribe of Levi. The first step towards a change was made in the institution of an hereditary priesthood in the family of Aaron, during the first withdrawal of Moses to the solitude of Sinai (xxviii. 1). This, however, was one thing: it was quite another to set apart a whole tribe of Israel as a priestly caste. The directions given for the construction of the tabernacle imply no pre-eminence of the Levites. The chief workers in it are from the tribes of Judah and of Dan (Ex. xxxi. 2-6). The next extension of the idea of the priesthood grew out of the terrible crisis of Ex. xxxii. If the Levites had been sharers in the sin of the golden calf, they were at any rate the foremost to rally round their leader when he called on them to help him in stemming the progress of the evil. And then came that terrible consecration of themselves, when every man was against his son and against his brother, and the offering with which they filled their hands (מִלֵּאתֶם יֶדְכֶם, Ex. xxxii. 29, comp. Ex. xxviii. 41) was the blood of their nearest of kin. The tribe stood forth, separate and apart, recognising even in this stern work the spiritual as higher than the natural, and therefore counted worthy to be the representative of the ideal life of the people, "an Israel within an Israel" (Ewald, *Alterthüm.* 279), chosen in its higher representatives to offer incense and burnt-sacrifice before the Lord (Deut. xxxiii. 9, 10), not without a share in the glory of the Urim and Thummim that were worn by the prince and chieftain of the tribe. From this time accordingly they occupied a distinct position. Experience had shown how easily the people might fall back into idolatry—how necessary it was that there should be a body of men, an *order*, numerically large, and when the people were in their promised home, equally diffused throughout the country, as witnesses and guardians of the truth. Without this the individualism of the older worship would have been fruitful in an ever-multiplying idolatry. The tribe of Levi was therefore to take the place of that earlier priesthood of the first-born as representatives of the holiness of the people. The minds of the people were to be drawn to the fact of the substitution by the close numerical correspondence of the consecrated tribe with that of those whom they replaced. The first-born males were numbered, and found to be 22,273; the census of the Levites gave 22,000, reckoning in each case from children of one month upwards[c] (Num. iii.). The fixed price for the redemption of a victim vowed in sacrifice (comp. Lev. xxvii. 6; Num. xviii. 16) was to be paid for each of the odd number by which the first-born were in excess of the Levites (Num. iii. 47). In this way the latter obtained a sacrificial as well as a priestly character.[f] They for the first-born of men, and their cattle for the firstlings of beasts, fulfilled the idea that had been asserted at the time of the destruction of the first-born of Egypt (Ex. xiii. 12, 13). The commencement of the march from Sinai gave a prominence to their new character. As the Tabernacle was the sign of the presence among the people of their unseen King, so the Levites were, among the other tribes of Israel, as the royal guard that waited exclusively on Him. The warlike title of "host" is specially applied to them (comp. use of צָבָא, in Num. iv. 3, 30; and of מַחֲנֶה, in 1 Chr. ix. 19). As such they were not included in the number of the armies of Israel (Num. i. 47, ii. 33, xxvi. 62), but reckoned separately by themselves. When the people were at rest they encamped as

[a] As the names of the lesser houses recur, some of them frequently, it may be well to give them here.

- Gershon: Libni, Shimei
- Kohath:
 - Amram: Moses; Aaron: Eleazar, Ithamar
 - Izhar: Korah, Nepheg, Zithri
 - Hebron
 - Uzziel: Mishael, Elzaphan, Zithri.
- Merari: Mahali, Mushi.

[b] This is expressly stated in the *Targ. Pseudojon.* on this verse:—"And he sent the first-born of the Ch. of Isr., for even to that time the worship was by the first-born, because the Tabernacle was not yet made, nor the priesthood given to Aaron," &c.

[c] The separate numbers in Num. iii. (Gershon, 7500; Kohath, 8600; Merari, 6200) give a total of 22,300. The received solution of the discrepancy is that 300 were the first-born of the Levites, who as such were already consecrated, and therefore could not take the place of others. Talmudic traditions (*Gemar. Bab. tit. Sanhedrim*, quoted by Patrick) add that the question, which of the Israelites should be redeemed by a Levite, or which should pay the five shekels, was settled by lot. The number of the first-born appears disproportionately small, as compared with the population. It must be remembered, however, that the conditions to be fulfilled were that they should be at once (1) the first child of the father, (2) the first child of the mother, (3) males. (Comp. on this question, and on that of the difference of numbers, Kurtz, *History of the Old Covenant*, iii. 201.)

[f] Comp. the recurrence of the same thought in the ἀκλησία πρωτοτόκων of Heb. xii. 23.

guardians round the sacred tent; no one else might come near it under pain of death (Num. i. 51, xviii. 22). They were to occupy a middle position in that ascending scale of consecration, which, starting from the idea of the whole nation as a priestly people, reached its culminating point in the high-priest who, alone of all the people, might enter "within the veil." The Levites might come nearer than the other tribes; but they might not sacrifice, nor burn incense, nor see the "holy things" of the sanctuary till they were covered (Num. iv. 15). When on the march, no hands but theirs might strike the tent at the commencement of the day's journey, or carry the parts of its structure during it, or pitch the tent once again when they halted (Num i. 51). It was obviously essential for such a work that there should be a fixed assignment of duties; and now accordingly we meet with the first outlines of the organisation which afterwards became permanent. The division of the tribe into the three sections that traced their descent from the sons of Levi, formed the groundwork of it. The work which they all had to do required a man's full strength, and therefore, though twenty was the starting-point for military service (Num. i.) they were not to enter on their active service till they were thirty[g] (Num. iv. 23, 30, 35). At fifty they were to be free from all duties but those of superintendence (Num. viii. 25, 26). The result of this limitation gave to the Kohathites 2750 on active service out of 8600; to the sons of Gershon 2630 out of 7500; to those of Merari 3200 out of 6200 (Num. iv.). Of these the Kohathites, as nearest of kin to the priests, held from the first the highest offices. They were to bear all the vessels of the sanctuary, the ark itself included[h] (Num. iii. 31, iv. 15; Deut. xxxi. 25), after the priests had covered them with the dark-blue cloth which was to hide them from all profane gaze; and thus they became also the guardians of all the sacred treasures which the people had so freely offered. The Gershonites in their turn, had to carry the tent-hangings and curtains (Num. iv. 22-26). The heavier burden of the boards, bars, and pillars of the tabernacle fell on the sons of Merari. The two latter companies were allowed, however, to use the oxen and the waggons which were offered by the congregation, Merari, in consideration of its heavier work, having two-thirds of the number (Num. vii. 1-9). The more sacred vessels of the Kohathites were to be borne by them on their own shoulders (Num. vii. 9). The Kohathites in this arrangement were placed under the command of Eleazar, Gershon and Merari under Ithamar (Num. iv. 28, 33). Before the march began the whole tribe was once again solemnly set apart. The rites (some of them at least) were such as the people might have witnessed in Egypt, and all would understand their meaning. Their clothes were to be washed. They themselves, as if they were, prior to their separation, polluted and unclean, like the leper, or those that had touched the dead, were to be sprinkled with "water of purifying" (Num. viii. 7, comp with xix. 13; Lev. xiv. 8, 9), and to shave all their flesh.[i] The people were then to lay their hands upon the heads of the consecrated tribe and offer them up as their representatives (Num. viii. 10). Aaron, as high-priest, was then to present them as a wave-offering (turning them, *i. e.* this way and that, while they bowed themselves to the four points of the compass; comp. Abarbanel on Num viii. 11, and Kurtz, iii. 208), in token that all their powers of mind and body were henceforth to be devoted to that service.[k] They, in their turn, were to lay their hands on the two bullocks which were to be slain as a sin-offering and burnt-offering for an atonement (כִּפֶּר, Num. viii. 12). Then they entered on their work; from one point of view given by the people to Jehovah, from another given by Jehovah to Aaron and his sons (Num. iii. 9, viii. 19, xviii. 6). Their very name is turned into an omen that they will cleave to the service of the Lord (comp. the play on יִלָּוֹ and לֵוִי in Num. xviii. 2, 4).

The new institution was, however, to receive a severe shock from those who were most interested in it. The section of the Levites whose position brought them into contact with the tribe of Reuben[l] conspired with it to reassert the old patriarchal system of a household priesthood. The leader of that revolt may have been impelled by a desire to gain the same height as that which Aaron had attained; but the ostensible pretext, that the "whole congregation were holy" (Num. xvi. 3), was one which would have cut away all the distinctive privileges of the tribe of which he was a member. When their self-willed ambition had been punished, when all danger of the sons of Levi "taking too much upon them" was for the time checked, it was time also to provide more definitely for them, and so to give them more reason to be satisfied with what they actually had; and this involved a permanent organisation for the future as well as for the present. If they were to have, like other tribes, a distinct territory assigned to them, their influence over the people at large would be diminished, and they themselves would be likely to forget, in labours common to them with others, their own peculiar calling. Jehovah therefore was to be their inheritance (Num. xviii. 20; Deut. x. 9, xviii. 2). They were to have no territorial possessions. In place of them they were to receive from the others the tithes of the produce of the land, from which they, in their turn, offered a tithe to the priests, as a recognition of their higher consecration (Num xviii. 21, 24, 26; Neh. x. 37). As if to provide for the contingency of failing crops or the like, and the consequent inadequacy of the tithes thus assigned to them, the Levite not less than the widow and the orphan, was commended to the special kindness of the people (Deut. xii. 19, xiv. 27, 29). When the

[g] The mention of twenty-five in Num. viii. 24, as the age of entrance, must be understood either of a probationary period during which they were trained for their duties, or of the lighter work of keeping the gates of the tabernacle.

[h] On more solemn occasions the priests themselves appear as the bearers of the ark (Josh. iii. 3, 15, vi. 6; 1 K. viii. 6).

[i] Comp. the analogous practice (differing, however, in being constantly repeated) of the Egyptian priests (Herod. ii. 37; comp. Spencer, *De Leg. Heb.* b. iii. c. 8).

[k] Solemn as this dedication is, it fell short of the consecration of the priests, and was expressed by a different word. [Palmer.] The Levites were purified, not consecrated (comp. Gesen. *s. v.* טָהֵר and קִדֵּשׁ, and Oehler, *s. v.* "Levi," in Herzog's *Real. Encycl.*).

In the encampment in the wilderness, the sons of Aaron occupied the foremost place of honour on the east. The Kohathites were at their right, on the south, the Gershonites on the west, the sons of Merari on the north of the tabernacle. On the south were also Reuben, Simeon, and Gad (Num. ii. and iii.).

wanderings of the people should be over and the tabernacle have a settled place, great part of the labour that had fallen on them would come to an end, and they too would need a fixed abode. Concentration round the tabernacle would lead to evils nearly as great, though of a different kind, as an assignment of special territory. Their ministerial character might thus be intensified, but their pervading influence as witnesses and teachers would be sacrificed to it. Distinctness and diffusion were both to be secured by the assignment to the whole tribe (the priests included) of forty-eight cities, with an outlying "suburb" (מִגְרָשׁ, προάστεια; Num. xxxv. 2) of meadow-land for the pasturage of their flocks and herds.[m] The reverence of the people for them was to be heightened by the selection of six of these as cities of refuge, in which the Levites were to present themselves as the protectors of the fugitives who, though they had not incurred the guilt, were yet liable to the punishment of murder.[n] How rapidly the feeling of reverence gained strength, we may judge from the share assigned to them out of the flocks and herds and women, of the conquered Midianites (Num. xxxi. 27, &c.). The same victory led to the dedication of gold and silver vessels of great value, and thus increased the importance of the tribe as guardians of the national treasures (Num. xxxi. 50-54).

The book of Deuteronomy is interesting as indicating more clearly than had been done before the other functions, over and above their ministrations in the tabernacle, which were to be allotted to the tribe of Levi. Through the whole land they were to take the place of the old household priests (subject, of course, to the special rights of the Aaronic priesthood), sharing in all festivals and rejoicings (Deut. xii. 19, xiv. 26, 27, xxvi. 11). Every third year they were to have an additional share in the produce of the land (Deut. xiv. 28, xxvi. 12). The people were charged never to forsake them. To "the priests the Levites"[o] was to belong the office of preserving, transcribing, and interpreting the law (Deut. xvii. 9-12; xxxi. 26). They were solemnly to read it every seventh year at the Feast of Tabernacles (Deut. xxxi. 9-13). They were to pronounce the curses from Mount Ebal (Deut. xxvii. 14).

Such, if one may so speak, was the ideal of the religious organisation which was present to the mind of the lawgiver. Details were left to be developed as the altered circumstances of the people might require.[p] The great principle was, that the warrior-caste who had guarded the tent of the captain of the hosts of Israel, should be throughout the land as witnesses that the people still owed allegiance to Him. It deserves notice that, as yet, with the exception of the few passages that refer to the priests, no traces appear of their character as a learned caste, and of the work which afterwards belonged to them as hymn-writers and musicians. The hymns of this period were probably occasional, not recurring (comp. Ex. xv.; Num. xxi. 17; Deut. xxxii.). Women bore a large share in singing them (Ex. xv. 20; Ps. lxviii. 25). It is not unlikely that the wives and daughters of the Levites, who must have been with them in all their encampments, as afterwards in their cities, took the foremost part among the "damsels playing with their timbrels,"[q] or among the "wise-hearted," who wove hangings for the decoration of the tabernacle. There are at any rate signs of their presence there, in the mention of the "women that assembled" at its door (Ex. xxxviii. 8, and comp. Ewald, *Alterthüm.* p. 297).

II. The successor of Moses, though belonging to another tribe, did faithfully all that could be done to convert this idea into a reality. The submission of the Gibeonites, after they had obtained a promise that their lives should be spared, enabled him to relieve the tribe-divisions of Gershon and Merari of the most burdensome of their duties. The conquered Hivites became "hewers of wood and drawers of water" for the house of Jehovah and for the congregation (Josh. ix. 27).[r] As soon as the conquerors had advanced far enough to proceed to a partition of the country, the forty-eight cities were assigned to them. Whether they were to be the sole occupiers of the cities thus allotted, or whether —as the rule for the redemption of their houses in Lev. xxv. 32 might seem to indicate—others were allowed to reside when they had been provided for, must remain uncertain. The principle of a widely diffused influence was maintained by allotting, as a rule, four cities from the district of each tribe; but it is interesting to notice how, in the details of the distribution, the divisions of the Levites in the order of their precedence coincided with the relative importance of the tribes with which they were connected. The following table will help the reader to form a judgment on this point, and to trace the influence of the tribe in the subsequent events of Jewish history.

I. Kohathites:			
	A. Priests	Judah and Simeon	9
		Benjamin	4
	B. Not Priests	Ephraim	4
		Dan	4
		Half Manasseh (West)	2
II. Gershonites		Half Manasseh (East)	2
		Issachar	4
		Asher	4
		Naphtali	3
III. Merarites		Zebulun	4
		Reuben	4
		Gad	4
			48

[m] Heliopolis (Strabo, xvii. 1), Thebes and Memphis in Egypt, and Benares in Hindostan, have been referred to as parallels. The aggregation of priests round a great national sanctuary, so as to make it as it were the centre of a collegiate life, was however different in its object and results from that of the polity of Israel. (Comp. Ewald, *Gesch.* ii. 402.)

[n] The importance of giving a sacred character to such an asylum is sufficient to account for the assignment of the cities of refuge to the Levites. Philo, however, with his characteristic love of an inner meaning, sees in it the truth that the Levites themselves were, according to the idea of their lives, fugitives from the world of sense, who had found their place of refuge in God.

[o] This phraseology, characteristic of Deuteronomy and Joshua, appears to indicate that the functions spoken of belonged to them, as the chief members of the sacred tribe, as a clerisy rather than as priests in the narrower sense of the word.

[p] To this there is one remarkable exception. Deut. xviii. 6 provides for a permanent dedication as the result of personal zeal going beyond the fixed period of service that came in rotation, and entitled accordingly to its reward.

[q] Comp., as indicating their presence and functions at a later date, 1 Chr. xxv. 5, 6.

[r] The Nethinim (*Dedi dati*) of 1 Chr. ix. 2, Ezr. ii. 43, were probably sprung from captives taken by David in later wars, who were assigned to the service of the tabernacle, replacing possibly the Gibeonites who had been slain by Saul (2 Sam. xxi. 1).

The scanty memorials that are left us in the book of Judges fail to show how far, for any length of time, the reality answered to the idea. The ravages of invasion, and the pressure of an alien rule, marred the working of the organisation which seemed so perfect. Levitical cities, such as Aijalon (Josh. xxi. 24; Judg. i. 35) and Gezer (Josh. xxi. 21; 1 Chr. vi. 67), fall into the hands of their enemies. Sometimes, as in the case of Nob, others apparently took their place. The wandering unsettled habits of the Levites who are mentioned in the later chapters of Judges are probably to be traced to this loss of a fixed abode, and the consequent necessity of taking refuge in other cities, even though their tribe as such had no portion in them. The tendency of the people to fall into the idolatry of the neighbouring nations showed either that the Levites failed to bear their witness to the truth or had no power to enforce it. Even in the lifetime of Phinehas, when the high-priest was still consulted as an oracle, the reverence which the people felt for the tribe of Levi becomes the occasion of a rival worship (Judg. xvii.). The old household priesthood revives,[s] and there is the risk of the national worship breaking up into individualism. Micah first consecrates one of his own sons, and then tempts a homeless Levite to dwell with him as "a father and a priest" for little more than his food and raiment. The Levite, though probably the grandson of Moses himself, repeats the sin of Korah. [JONATHAN.] First in the house of Micah, and then for the emigrants of Dan, he exercises the office of a priest with "an ephod, and a teraphim and a graven image." With this exception the whole tribe appears to have fallen into a condition analogous to that of the clergy in the darkest period and in the most outlying districts of the Mediæval Church, going through a ritual routine, but exercising no influence for good, at once corrupted and corrupting. The shameless license of the sons of Eli may be looked upon as the result of a long period of decay, affecting the whole order. When the priests were such as Hophni and Phinehas, we may fairly assume that the Levites were not doing much to sustain the moral life of the people.

The work of Samuel was the starting-point of a better time. Himself a Levite, and, though not a priest, belonging to that section of the Levites which was nearest to the priesthood (1 Chr. vi. 28), adopted as it were, by a special dedication into the priestly line and trained for its offices (1 Sam. ii. 18), he appears as infusing a fresh life, the author of a new organisation. There is no reason to think, indeed, that the companies or schools of the sons of the prophets which appear in his time (1 Sam. x. 5), and are traditionally said to have been founded by him, consisted exclusively of Levites; but there are many signs that the members of that tribe formed a large element in the new order, and received new strength from it. It exhibited, indeed, the ideal of the Levite life as one of praise, devotion, teaching, standing in the same relation to the priests and Levites generally as the monastic institutions of the fifth century, or the mendicant orders of the thirteenth did to the secular clergy of Western Europe. The fact that the Levites were thus brought under the influence of a system which addressed itself to the mind and heart in a greater degree than the sacrificial functions of the priesthood, may possibly have led them on to apprehend the higher truths as to the nature of worship which begin to be asserted from this period, and which are nowhere proclaimed more clearly than in the great hymn that bears the name of Asaph (Ps. l. 7-15). The man who raises the name of prophet to a new significance is himself a Levite (1 Sam. ix. 9). It is among them that we find the first signs of the musical skill which is afterwards so conspicuous in the Levites (1 Sam. x. 5). The order in which the Temple services were arranged is ascribed to two of the prophets, Nathan and Gad (2 Chr. xxix. 25), who must have grown up under Samuel's superintendence, and in part to Samuel himself (1 Chr. ix. 22). Asaph and Heman, the Psalmists, bear the same title as Samuel the Seer (1 Chr. xxv. 5; 2 Chr. xxix. 30). The very word "prophesying" is applied not only to sudden bursts of song, but to the organised psalmody of the Temple (1 Chr. xxv. 2, 3). Even of those who bore the name of a prophet in a higher sense, a large number are traceably of this tribe.[t]

III. The capture of the Ark by the Philistines did not entirely interrupt the worship of the Israelites, and the ministrations of the Levites went on, first at Shiloh (1 Sam. xiv. 3), then for a time at Nob (1 Sam. xxii. 11), afterwards at Gibeon (1 K. iii. 2; 1 Chr. xvi. 39). The history of the return of the ark to Beth-shemesh after its capture by the Philistines, and its subsequent removal to Kirjath-jearim, points apparently to some strange complications, rising out of the anomalies of this period, and affecting, in some measure, the position of the tribe of Levi. Beth-shemesh was, by the original assignment of the conquered country, one of the cities of the priests (Josh. xxi. 16). They, however, do not appear in the narrative, unless we assume, against all probability, that the men of Beth-shemesh who were guilty of the act of profanation were themselves of the priestly order. Levites indeed are mentioned as doing their appointed work (1 Sam. vi. 15), but the sacrifices and burnt-offerings are offered by the men of the city, as though the special function of the priesthood had been usurped by others; and on this supposition it is easier to understand how those who had set aside the Law of Moses by one offence should defy it also by another. The singular reading of the LXX. in 1 Sam. vi. 19 (καὶ οὐκ ἠσμένισαν οἱ υἱοὶ Ἰεχονίου ἐν τοῖς ἀνδράσι Βαιθσαμὺς ὅτι εἶδον κιβωτὸν Κυρίου) indicates, if we assume that it rests upon some corresponding Hebrew text, a struggle between two opposed parties, one guilty of the profanation, the other—possibly the Levites who had been before mentioned—zealous in their remonstrances against it. Then comes, either as the result of this collision, or by direct supernatural infliction, the great slaughter of the Beth-shemites, and they shrink from retaining the ark any longer among them. The great Eben (stone) becomes, by a slight paronomastic change in its form, the "great Abel" (lamentation), and the name remains as a me-

[s] Compare, on the extent of this relapse into an earlier system, Kalisch, *On Genesis* xliv. 7.

[t] It may be worth while to indicate the extent of this connexion. As prophets, who are also priests, we have Jeremiah (Jer. i. 1). Ezekiel (Ez. i. 3), Azariah the son of Oded (2 Chr. xv 1), Zechariah (2 Chr. xxiv. 20). Internal evidence tends to the same conclusion as to Joel, Micah, Habakkuk, Haggai, Zechariah, and even Isaiah himself. Jahaziel (2 Chr. xx. 14) appears as at once a prophet and a Levite. There is a balance of probability on the same side as to Jehu, Hanani, the second Oded, and Ahijah of Shiloh.

moral of the sin and of its punishment. [BETHSHEMESH.] We are left entirely in the dark as to the reasons which led them, after this, to send the ark of Jehovah, not to Hebron or some other priestly city, but to Kirjath-jearim, round which, so far as we know, there gathered legitimately no sacred associations. It has been commonly assumed indeed that Abinadab, under whose guardianship it remained for twenty years, must necessarily have been of the tribe of Levi. [ABINADAB.] Of this, however, there is not the slightest direct evidence, and against it there is the language of David in 1 Chr. xv. 2, "None ought to carry the ark of God but the Levites, for them hath Jehovah chosen," which would lose half its force if it were not meant as a protest against a recent innovation, and the ground of a return to the more ancient order. So far as we can see one's way through these perplexities of a dark period, the most probable explanation—already suggested under KIRJATH-JEARIM—seems to be the following. The old names of Baaleh (Josh. xv. 9) and Kirjath-baal (Josh. xv. 60) suggest there had been of old some special sanctity attached to the place as the centre of a Canaanite local worship. The fact that the ark was taken to the house of Abinadab in the *hill* (1 Sam. vii. 1), the Gibeah of 2 Sam. vi. 3, connects itself with that old Canaanitish reverence for high places, which, through the whole history of the Israelites, continued to have such strong attractions for them. These may have seemed to the panic-stricken inhabitants of that district, mingling old things and new, the worship of Jehovah with the lingering superstitions of the conquered people, sufficient grounds to determine their choice of a dwelling. The consecration (the word used is the special sacerdotal term) of Eleazar as the guardian of the ark is, on this hypothesis, analogous in its way to the other irregular assumptions which characterise this period, though here the offence was less flagrant, and did not involve apparently the performance of any sacrificial acts. While, however, this aspect of the religious condition of the people brings the Levitical and priestly orders before us, as having lost the position they had previously occupied, there were other influences at work tending to reinstate them.

The rule of Samuel and his sons, and the prophetical character now connected with the tribe, tended to give them the position of a ruling caste. In the strong desire of the people for a king, we may perhaps trace a protest against the assumption by the Levites of a higher position than that originally assigned. The reign of Saul, in its later period, was at any rate the assertion of a self-willed power against the priestly order. The assumption of the sacrificial office, the massacre of the priests at Nob, the slaughter of the Gibeonites who were attached to their service, were parts of the same policy, and the narrative of the condemnation of Saul for the two former sins, no less than of the expiation required for the latter (2 Sam. xxi.), shows by what strong measures the truth, of which that policy was a subversion, had to be impressed on the minds of the Israelites. The reign of David, however, brought the change from persecution to honour. The Levites were ready to welcome a king who, though not of their tribe, had been brought up under their training, was skilled in their arts, prepared to share even in some of their ministrations, and to array himself in their apparel (2 Sam. vi. 14), and 4600 of their number with 3700 priests waited upon David at Hebron—itself, it should be remembered, one of the priestly cities—to tender their allegiance (1 Chr. xii. 26). When his kingdom was established, there came a fuller organisation of the whole tribe. Its position in relation to the priesthood was once again definitely recognised. When the ark was carried up to its new resting-place in Jerusalem, their claim to be the bearers of it was publicly acknowledged (1 Chr. xv. 2). When the sin of Uzzah stopped the procession, it was placed for a time under the care of Obed-Edom of Gath—probably Gath-rimmon—as one of the chiefs of the Kohathites (1 Chr. xiii. 13; Josh. xxi. 24; 1 Chr. xv. 18).

In the procession which attended the ultimate conveyance of the ark to its new resting-place the Levites were conspicuous, wearing their linen ephods, and appearing in their new character as minstrels (1 Chr. xv. 27, 28). In the worship of the tabernacle under David, as afterwards in that of the Temple, we may trace a development of the simpler arrangements of the wilderness and of Shiloh. The Levites were the gatekeepers, vergers, sacristans, choristers of the central sanctuary of the nation. They were, in the language of 1 Chr. xxiii. 24-32, to which we may refer as almost the *locus classicus* on this subject, "to wait on the sons of Aaron for the service of the house of Jehovah, in the courts, and the chambers, and the purifying of all holy things." This included the duty of providing "for the shew-bread, and the fine flour for meat-offering, and for the unleavened bread." They were, besides this, "to stand every morning to thank and praise Jehovah, and likewise at even." They were lastly "to offer"—*i. e.* to assist the priests in offering—"all burnt-sacrifices to Jehovah in the sabbaths and on the set feasts." They lived for the greater part of the year in their own cities, and came up at fixed periods to take their turn of work (1 Chr. xxv., xxvi.). How long it lasted we have no sufficient data for determining. The predominance of the number twelve as the basis of classification[u] might seem to indicate monthly periods, and the festivals of the new moon would naturally suggest such an arrangement. The analogous order in the civil and military administration (1 Chr. xxvii. 1) would tend to the same conclusion. It appears, indeed, that there was a change of some kind every week (1 Chr. ix. 25; 2 Chr. xxiii. 4, 8); but this is of course compatible with a system of rotation, which would give to each a longer period of residence, or with the permanent residence of the leader of each division within the precincts of the sanctuary. Whatever may have been the system, we must bear in mind that the duties now imposed upon the Levites were such as to require almost continuous practice. They would need, when their turn came, to be able to bear their parts in the great choral hymns of the Temple, and to take each his appointed share in the complex structure of a sacrificial liturgy, and for this a special study would be required. The education which the Levites received for their peculiar duties, no less than their connexion, more or less intimate, with the schools of the prophets (see above), would tend to make them, so far as there was any education at all, the teachers of the others,[x] the tran-

[u] There are 24 courses of the priests, 24,000 Levites in the general business of the Temple (1 Chr. xxiii. 4). The number of singers is 288 = 12 × 24 (1 Chr. xxv. 7).

[x] There is, however, a curious Jewish tradition that the schoolmasters of Israel were of the tribe of Simeon (Solom. Jarchi on Gen. xlix. 7, in Godwyn's *Moses and Aaron*).

scribers and interpreters of the Law, the chroniclers of the times in which they lived. We have some striking instances of their appearance in this new character. One of them, Ethan the Ezrahite,[7] takes his place among the old Hebrew sages who were worthy to be compared with Solomon, and (Ps. lxxxix. title) his name appears as the writer of the 39th Psalm (1 K. iv. 31; 1 Chr. xv. 17). One of the first to bear the title of "Scribe" is a Levite (1 Chr. xxiv. 6), and this is mentioned as one of their special offices under Josiah (2 Chr. xxxiv. 13). They are described as "officers and judges" under David (1 Chr. xxvi. 29), and as such are employed "in all the business of Jehovah, and in the service of the king." They are the agents of Jehoshaphat and Hezekiah in their work of reformation, and are sent forth to proclaim and enforce the law (2 Chr. xvii. 8, xxx. 22). Under Josiah the function has passed into a title, and they are "the Levites that taught all Israel" (2 Chr. xxxv. 3). The two books of Chronicles bear unmistakeable marks of having been written by men whose interests were all gathered round the services of the Temple, and who were familiar with its records. The materials from which they compiled their narratives, and to which they refer as the works of seers and prophets, were written by men who were probably Levites themselves, or, if not, were associated with them.

The former subdivisions of the tribe were recognised in the assignment of the new duties, and the Kohathites retained their old pre-eminence. They have four "princes" (1 Chr. xv. 5-10), while Merari and Gershon have but one each. They supplied, from the families of the Izharites and Hebronites, the "officers and judges" of 1 Chr. xxvi. 30. To them belonged the sons of Korah, with Heman at their head (1 Chr. ix. 19), playing upon psalteries and harps. They were "over the work of the service, keepers of the gates of the tabernacle" (*l. c.*). It was their work to prepare the shew-bread every Sabbath (1 Chr. ix. 32). The Gershonites were represented in like manner in the Temple-choir by the sons of Asaph (1 Chr. vi. 39, xv. 17); Merari by the sons of Ethan or Jeduthun (1 Chr. vi. 44, xvi. 42, xxv. 1-7). Now that the heavier work of conveying the tabernacle and its equipments from place to place was no longer required of them, and that psalmody had become the most prominent of their duties, they were to enter on their work at the earlier age of twenty (1 Chr. xxiii. 24-27).[8]

As in the old days of the Exodus, so in the organisation under David, the Levites were not included in the general census of the people (1 Chr. xxi. 6), and formed accordingly no portion of its military strength. A separate census, made apparently before the change of age just mentioned (1 Chr. xxiii. 3), gives—

24,000 over the work of the Temple.
6,000 officers and judges.
4,000 porters, *i. e.* gate-keepers,[9] and, as such, bearing arms (1 Chr. xxi. 2).

[7] In 1 Chr. ii. 6 the four names of 1 K. iv. 31 appear as belonging to the tribe of Judah, and in the third generation after Jacob. On the other hand the names of Heman and Ethan are prominent among the Levites under Solomon (*infra*); and two psalms, one of which belongs manifestly to a later date, are ascribed to them, with this title of Ezrahite attached (Ps. lxxxviii. and lxxxix.). The difficulty arises probably out of some confusion of the later and the earlier names. Ewald's conjecture, that conspicuous minstrels of other tribes were received into the choir of the Temple, and then reckoned as Levites, would give a new aspect to the influence of the tribe. (Co

Temple.

Temple (2 Chr. xxix. 12-15); and the hymns of David and of Asaph were again renewed. In this instance it was thought worthy of special record that those who were simply Levites were more "upright in heart" and zealous than the priests themselves (2 Chr. xxix. 34); and thus, in that great passover, they took the place of the unwilling or unprepared members of the priesthood. Their old privileges were restored, they were put forward as teachers (2 Chr. xxx. 22), and the payment of tithes, which had probably been discontinued under Ahaz, was renewed (2 Chr. xxxi. 4). The genealogies of the tribe were revised (ver. 17), and the old classification kept its ground. The reign of Manasseh was for them, during the greater part of it, a period of depression. That of Josiah witnessed a fresh revival and reorganisation (2 Chr. xxxiv. 9-13). In the great passover of his eighteenth year they took their place as teachers of the people, as well as leaders of their worship (2 Chr. xxxv. 3, 13). Then came the Egyptian and Chaldaean invasions, and the rule of cowardly and apostate kings. The sacred tribe itself showed itself unfaithful. The repeated protests of the priest Ezekiel coincide that they had shared in the idolatry of the people. The prominence into which they had been brought in the reigns of the two reforming kings had apparently tempted them to think that they might encroach permanently on the special functions of the priesthood, and the sin of Korah was renewed (Ez. xliv. 10-14, xlviii. 11). They had, as the penalty of their sin, to witness the destruction of the Temple, and to taste the bitterness of exile.

IV. *After the Captivity.* The position taken by the Levites in the first movements of the return from Babylon indicates that they had cherished the traditions and maintained the practices of their tribe. They, we may believe, were those who were specially called on to sing to their conquerors one of the songs of Zion (De Wette on Ps. cxxxvii.). It is noticeable, however, that in the first body of returning exiles they are present in a disproportionately small number (Ezr. ii. 36-42). Those who do come take their old parts at the foundation and dedication of the second Temple (Ezr. iii. 10, v. 18). In the next movement under Ezra their reluctance (whatever may have been its origin[b]) was even more strongly marked. None of them presented themselves at the first great gathering (Ezr. viii. 15). The special efforts of Ezra did not succeed in bringing together more than 38, and their place had to be filled by 220 of the Nethinim (vv. 20).[c] Those who returned with him resumed their functions at the Feast of Tabernacles as teachers and interpreters (Neh. viii. 7), and those who were most active in that work were foremost also in chanting the hymn-like prayer which appears in Neh. ix. as the last great effort of Jewish psalmody. They are recognised in the great national covenant, and the offerings and tithes which were their due are once more solemnly secured to them (Neh. x. 37-39). They take their old places in the Temple and in the villages near Jerusalem (Neh. xii. 29), and are present in full array at the great feast of the Dedication of the Wall. The two prophets who were active at the time of the Return, Haggai and Zechariah, if they did not belong to the tribe, helped it forward in the work of restoration. The strongest measures are adopted by Nehemiah, as before by Ezra, to guard the purity of their blood from the contamination of mixed marriages (Ezr. x. 23); and they are made the special guardians of the holiness of the Sabbath (Neh. xiii. 22). The last prophet of the O. T. sees, as part of his vision of the latter days, the time when the Lord "shall purify the sons of Levi" (Mal. iii. 3).

The guidance of the O. T. fails us at this point, and the history of the Levites in relation to the national life becomes consequently a matter of inference and conjecture. The synagogue worship, then originated, or receiving a new development, was organised irrespectively of them [SYNAGOGUE], and thus throughout the whole of Palestine there were means of instruction in the Law with which they were not connected. This would tend naturally to diminish their peculiar claim on the reverence of the people; but where a priest or Levite was present in the synagogue they were still entitled to some kind of precedence, and special sections in the lessons for the day were assigned to them (Lightfoot, *Hor. Heb.* on Matt. iv. 23). During the period that followed the Captivity they contributed to the formation of the so-called Great Synagogue. They, with the priests, theoretically constituted and practically formed the majority of the permanent Sanhedrim (Maimonides in Lightfoot, *Hor. Heb.* on Matt. xxvi. 3), and as such had a large share in the administration of justice even in capital cases. In the characteristic feature of this period, as an age of scribes succeeding to an age of prophets, they too were likely to be sharers. The training and previous history of the tribe would predispose them to attach themselves to the new system as they had done to the old. They accordingly may have been among the scribes and elders who accumulated traditions. They may have attached themselves to the sects of Pharisees and Sadducees.[d] But in proportion as they thus acquired fame and reputation individually, their functions as Levites became subordinate, and they were known simply as the inferior ministers of the Temple. They take no prominent part in the Maccabaean struggles, though they must have been present at the great purification of the Temple.

They appear but seldom in the history of the N. T. Where we meet with their names it is as the type of a formal heartless worship, without sympathy and without love (Luke x. 32). The same parable indicates Jericho as having become—what it had not been originally (see Josh. xxi., 1 Chr. vi.)—one of the great stations at which they and the priests resided (Lightfoot, *Cent. Chorograph.* c. 47). In John i. 19 they appear as delegates of the Jews, that is of the Sanhedrim, coming to inquire into the credentials of the Baptist, and giving utterance to their own Messianic expectations. The mention of a Levite of Cyprus in Acts iv. 36 shows that the changes of the previous century had carried that tribe also into "the dispersed among the Gentiles." The conversion of Barnabas and Mark was probably no solitary instance of the reception by them of the new faith, which was the fulfilment of the old.

[b] May we conjecture that the language of Ezekiel had led to some jealousy between the two orders?

[c] There is a Jewish tradition (Surenhusius, *Mishna*, Yoma, iii. 10) to the effect that, as a punishment for this backwardness, Ezra deprived them of their tithes, and transferred the right to the priests.

[d] The life of Josephus may be taken as an example of the education of the higher members of the order (Jos. *Vita*, c. i.).

If "a great company of the priests were obedient to the faith" (Acts vi. 7), it is not too bold to believe that their influence may have led Levites to follow their example; and thus the old psalms, and possibly also the old chants of the Temple-service, might be transmitted through the agency of those who had been specially trained in them, to be the inheritance of the Christian Church. Later on in the history of the first century, when the Temple had received its final completion under the younger Agrippa, we find one section of the tribe engaged in a new movement. With that strange unconsciousness of a coming doom which so often marks the last stage of a decaying system, the singers of the Temple thought it a fitting time to apply for the right of wearing the same linen garment as the priests, and persuaded the king that the concession of this privilege would be the glory of his reign (Joseph. *Ant.* xx. 8, §6). The other Levites at the same time asked for and obtained the privilege of joining in the Temple choruses, from which hitherto they had been excluded.[e] The destruction of the Temple so soon after they had attained the object of their desires came as with a grim irony to sweep away their occupation, and so to deprive them of every vestige of that which had distinguished them from other Israelites. They were merged in the crowd of captives that were scattered over the Roman world, and disappear from the stage of history. The Rabbinic schools, that rose out of the ruins of the Jewish polity, fostered a studied and habitual depreciation of the Levite order as compared with their own teachers (M'Caul, *Old Paths*, p. 435). Individual families, it may be, cherished the tradition that their fathers, as priests or Levites, had taken part in the services of the Temple.[f] If their claims were recognised, they received the old marks of reverence in the worship of the synagogue (comp. the Regulations of the Great Synagogue of London, in Margoliouth's *History of Jews in Great Britain*, iii. 270), took precedence in reading the lessons of the day (Lightfoot, *Hor. Heb.* on Matt. iv. 23), and pronounced the blessing at the close (Basnage, *Hist. des Juifs*, vi. 790). Their existence was acknowledged in some of the laws of the Christian emperors (Basnage, *l. c.*). The tenacity with which the exiled race clung to these recollections is shown in the prevalence of the names (Cohen, and Levita or Levy) which imply that those who bear them are of the sons of Aaron or the tribe of Levi; and in the custom which exempts the first-born of priestly or Levite families from the payments which are still offered, in the case of others, as the redemption of the first-born (Leo of Modena, in Picart's *Cérémonies Religieuses*, i. 26; Allen's *Modern Judaism*, p. 297). In the meantime the old name had acquired a new signification. The early writers of the Christian Church applied to the later hierarchy the language of the earlier, and gave to the bishops and presbyters the title (*ἱερεῖς*) that had belonged to the sons of Aaron; while the deacons were habitually spoken of as Levites (Suicer, *Thes.* s. v. *Λευίτης*).[g]

The extinction or absorption of a tribe which had borne so prominent a part in the history of Israel, was, like other such changes, an instance of the order in which the shadow is succeeded by the substance—that which is decayed, is waxing old and ready to vanish away, by a new and more living organisation. It had done its work, and it had lost its life. It was bound up with a localised and exclusive worship, and had no place to occupy in that which was universal. In the Christian Church—supposing, by any effort of imagination, that it had had a recognised existence in it—it would have been simply an impediment. Looking at the long history of which the outline has been here traced, we find in it the light and darkness, the good and evil, which mingle in the character of most corporate or caste societies. On the one hand, the Levites, as a tribe, tended to fall into a formal worship, a narrow and exclusive exaltation of themselves and of their country. On the other hand, we must not forget that they were chosen, together with the priesthood, to bear witness of great truths which might otherwise have perished from remembrance, and that they bore it well through a long succession of centuries. To members of this tribe we owe many separate books of the O. T., and probably also in great measure the preservation of the whole. The hymns which they sung, in part probably the music of which they were the originators, have been perpetuated in the worship of the Christian Church. In the company of prophets who have left behind them no written records they appear conspicuous, united by common work and common interests with the prophetic order. They did their work as a national *clerisy*, instruments in raising the people to a higher life, educating them in the knowledge on which all order and civilization rest. It is not often, in the history of the world, that a religious caste or order has passed away with more claims to the respect and gratitude of mankind than the tribe of Levi.

(On the subject generally may be consulted, in addition to the authorities already quoted, Carpzov, *Appar. Crit.* b. i. c. 5, and *Annotat.*; Saalschütz, *Archäol. der Hebr.* c. 78; Michaelis, *Comm. on Laws of Moses*, i. art. 52.) [E. H. P.]

LEVITICUS (וַיִּקְרָא), the first word in the book giving it its name: Λευϊτικόν: *Leviticus*: called also by the later Jews תּוֹרַת כֹּהֲנִים, "Law of the priests;" and תּוֹרַת קָרְבָּנוֹת, "Law of offerings."

CONTENTS.—The Book consists of the following principal sections:—

I. The laws touching sacrifices (chap. i.–vii.).

II. An historical section containing, first, the consecration of Aaron and his sons (chap. viii.), next, his first offering for himself and the people (chap. ix.); and lastly, the destruction of Nadab and Abihu, the sons of Aaron, for their presumptuous offence (chap. x.).

III. The laws concerning purity and impurity, and the appropriate sacrifices and ordinances for putting away impurity (chap. xi.–xvi.).

[e] The tone of Josephus is noticeable as being that of a man who looked on the change as a dangerous innovation. As a priest, he saw in this movement of the Levites an intrusion on the privileges of his order; and this was, in his judgment, one of the sins which brought on the destruction of the city and the Temple.

[f] Dr. Joseph Wolff, in his recent *Travels and Adventures* (p. 2), claims his descent from this tribe.

[g] In the literature of a later period the same name meets us applied to the same or nearly the same order, no longer, however, as the language of reverence, but as that of a cynical contempt for the less worthy portion of the clergy of the English Church (Macaulay, *Hist. of England*, iii. 327).

IV. Laws chiefly intended to mark the separation between Israel and the heathen nations (chap. xvii.–xx.).

V. Laws concerning the priests (xxi., xxii.); and certain holy days and festivals (xxiii., xxv.), together with an episode (xxiv.). The section extends from chap. xxi. 1 to xxvi. 2.

VI. Promises and threats (xxvi. 2-46).

VII. An appendix containing the laws concerning vows (xxvii.).

I. The book of Exodus concludes with the account of the completion of the tabernacle. "So Moses finished the work," we read (xl. 33): and immediately there rests upon it a cloud, and it is filled with the glory of Jehovah. From the tabernacle, thus rendered glorious by the Divine Presence, issues the legislation contained in the book of Leviticus. At first God spake to the people out of the thunder and lightning of Sinai, and gave them His holy commandments by the hand of a mediator. But henceforth His Presence is to dwell not on the secret top of Sinai, but in the midst of His people, both in their wanderings through the wilderness, and afterwards in the Land of Promise. Hence the first directions which Moses receives after the work is finished have reference to the offerings which were to be brought to the door of the tabernacle. As Jehovah draws near to the people in the tabernacle, so the people draw near to Jehovah in the offering. Without offerings none may approach Him. The regulations respecting the sacrifices fall into three groups, and each of these groups again consists of a decalogue of instructions. Bertheau has observed that this principle runs through all the laws of Moses. They are all modelled after the pattern of the ten commandments, so that each distinct subject of legislation is always treated of under ten several enactments or provisions.

Baumgarten in his *Commentary on the Pentateuch*, has adopted the arrangement of Bertheau, as set forth in his *Sieben Gruppen des Mos. Rechts*. On the whole, his principle seems sound. We find Bunsen acknowledging it in part, in his division of the 19th chapter (see below). And though we cannot always agree with Bertheau, we have thought it worth while to give his arrangement as suggestive at least of the main structure of the Book.

1. The first group of regulations (chap. i.–iii.) deals with three kinds of offerings: the burnt-offering (עֹלָה), the meat-offering[a] (מִנְחָה), and the thank-offering (זֶבַח שְׁלָמִים).

i. The burnt-offering (chap. i.) in three sections. It might be either (1.) a male without blemish from the *herds* (מִן הַבָּקָר), ver. 3-9; or (2) a male without blemish from the *flocks*, or lesser cattle (וְהַצֹּאן), ver. 10-13; or (3) it might be fowls, an offering of turtle-doves or young pigeons, ver. 14-17. The subdivisions are here marked clearly enough, not only by the the three *kinds* of sacrifice, but also by the *forms* in which the enactment is put. Each begins with קָרְבָּנוֹ אִם, "If his offering," &c., and each ends with עֹלָה אִשֶּׁה רֵיחַ נִיחוֹחַ לַיהוָה, "an offering made by fire, of a sweet savour unto Jehovah."

The next group (chap. ii.) presents many more difficulties. Its parts are not so clearly marked either by prominent features in the subject-matter, or by the more technical boundaries of certain initial and final phrases. We have here—

ii. The meat-offering, or bloodless offering in four sections: (1) in its uncooked form, consisting of fine flour with oil and frankincense, ver. 1-3; (2) in its cooked form, of which three different kinds are specified—baked in the oven, fried, or boiled, ver. 4-10; (3) the prohibition of leaven, and the direction to use salt in all the meat-offerings, 11-13; (4) the oblation of first-fruits, 14-16. This at least seems on the whole to be the best arrangement of the group, though we offer it with some hesitation.

(*a*.) Bertheau's arrangement is different. He divides (1) ver. 1-4 (thus including the meat-offering baked in the oven with the uncooked offering; (2) ver. 5 and 6, the meat-offering when fried in the pan; (3) ver. 7-13, the meat-offering when boiled; (4) ver. 14-16, the offering of the first-fruits. But this is obviously open to many objections. For, first, it is exceedingly arbitrary to connect ver. 4 with ver. 1-3, rather than with the verses which follow. Why should the meat-offering baked in the oven be classed with the uncooked meat-offering rather than with the other two which were in different ways supposed to be dressed with fire? Next, two of the divisions of the chapter are clearly marked by the recurrence of the formula, "It is a thing most holy of the offerings of Jehovah made by fire," ver. 3 and 10. Lastly, the directions in ver. 11-13, apply to every form of meat-offering, not only to that immediately preceding. The Masoretic arrangement is in five sections: vers. 1-3; 4; 5, 6; 7-13; 14-16.

iii. The Shelamim—"peace-offering" (A. V.), or "thank-offering" (Ewald), (chap. iii.) in three sections. Strictly speaking this falls under two heads: first, when it is of the *herd*; and secondly, when it is of the *flock*. But this last has again its subdivision; for the offering when of the flock may be either a lamb or a goat. Accordingly the three sections are, vers. 1-5; 7-11; 12-16. Ver. 6 is merely introductory to the second class of sacrifices, and ver. 17 a general conclusion, as in the case of other laws. This concludes the first Decalogue of the book.

2. Chap. iv., v. The laws concerning the sin-offering and the trepass- (or guilt-) offering.

The sin-offering (chap. iv.) is treated of under four specified cases, after a short introduction to the whole in ver. 1, 2: (1) the sin-offering for the priest, 3-12; (2) for the whole congregation, 13-21; (3) for a ruler, 22-26; (4) for one of the common people, 27-35.

After these four cases in which the offering is to be made for four different classes, there follow provisions respecting three several kinds of transgression for which atonement must be made. It is not quite clear whether these should be ranked under the head of the sin-offering or of the trespass-offering (see Winer, *Rwb.*). We may however follow Bertheau, Baumgarten, and Knobel, in regarding them as special instances in which a *sin*-offering was to be brought. The three cases are: first, when any one hears a curse and conceals what he hears (v. 1); secondly, when any one touches without knowing or intending it, any unclean thing (vers. 2, 3); lastly, when any one takes an oath inconsiderately (ver. 4). For each of these cases the same trespass-offering, "a female from the flock, a lamb or kid of the goats," is appointed; but with that mercifulness which characterises the Mosaic law

[a] "Meat" is used by our translators in the sense of food of any kind, whether flesh or farinaceous.

express provision is made for a less costly offering where the offerer is poor.

The Decalogue is then completed by the three regulations respecting the guilt-offering (or trespass-offering): first, when any one sins "through ignorance in the holy things of Jehovah" (ver. 14, 16); next, when a person without knowing it "commits any of these things which are forbidden to be done by the commandments of Jehovah" (17-19); lastly, when a man lies and swears falsely concerning that which was entrusted to him, &c. (ver. 20-26).[a] This Decalogue, like the preceding one, has its characteristic words and expressions. The prominent word which introduces so many of the enactments, is נֶפֶשׁ, "soul" (see iv. 2, 27, v. 1, 2, 4, 15, 17, vi. 2); and the phrase, "if a soul shall sin" (iv. 2) is, with occasional variations having an equivalent meaning, the distinctive phrase of the section.

As in the former Decalogue, the nature of the offerings, so in this the person and the nature of the offence are the chief features in the several statutes.

3. Chap. vi., vii. Naturally upon the law of sacrifices follows the law of the priests' duties when they offer the sacrifices. Hence we find Moses directed to address himself immediately to Aaron and his sons (vi. 2, 18, = vi. 9, 25, A. V.).

In this group the different kinds of offerings are named in nearly the same order as in the two preceding Decalogues, except that the offering at the consecration of a priest follows, instead of the thank-offering, immediately after the meat-offering, which it resembles; and the thank-offering now appears after the trespass-offering. There are therefore, in all, six kinds of offering, and in the case of each of these the priest has his distinct duties. Bertheau has very ingeniously so distributed the enactments in which these duties are prescribed as to arrange them all in five Decalogues. We will briefly indicate his arrangement.

3. (*a.*) "This is the law of the burnt-offering" (vi. 9; A. V.) in five enactments, each verse (ver. 9-13) containing a separate enactment.

(*b.*) "And this is the law of the meat-offering" (ver. 14), again in five enactments, each of which is, as before, contained in a single verse (ver. 14-18).

4. The next Decalogue is contained in ver. 19-30.

(*a.*) Verse 19 is merely introductory; then follow, in five verses, five distinct directions with regard to the offering at the time of the consecration of the priests, the first in ver. 20, the next two in ver. 21, the fourth in the former part of ver. 22, and the last in the latter part of ver. 22 and ver. 23.

(*b.*) "This is the law of the sin-offering" (ver. 25). Then the five enactments, each in one verse, except that two verses (27, 28) are given to the third.

5. The third Decalogue is contained in chap. vii. 1-10, the laws of the trespass-offering. But it is impossible to avoid a misgiving as to the soundness of Bertheau's system when we find him making the words "It is most holy," in ver. 1, the first of the ten enactments. This he is obliged to do, as ver. 3 and 4 evidently form but one.

6. The fourth Decalogue, after an introductory verse (ver. 11), is contained in ten verses (12-21).

7. The last Decalogue consists of certain general laws about the fat, the blood, the wave-breast, &c., and is comprised again in ten verses (23-33), the verses as before marking the divisions.

The chapter closes with a brief *historical* notice of the fact that these several commands were given to Moses on Mount Sinai (ver. 35-38).

II. Chap. viii., ix., x. This section is entirely historical. In chapter viii. we have the account of the consecration of Aaron and his sons by Moses before the whole congregation. They are washed, he is arrayed in the priestly vestments and anointed with the holy oil; his sons also are arrayed in their garments, and the various offerings appointed are offered. In chap. ix. Aaron offers, eight days after his consecration, his first offering for himself and the people: this comprises for himself a sin- and burnt-offering (1-14), for the people a sin-offering, burnt-offering, and a peace- (or thank-) offering. He blesses the people, and fire comes down from heaven and consumes the burnt-offering. Chap. x. tells how Nadab and Abihu, the sons of Aaron, eager to enjoy the privileges of their new office, and perhaps too much elated by its dignity, forgot or despised the restrictions by which it was fenced round (Ex. xxx. 7, &c.), and daring to "offer strange fire before Jehovah," perished because of their presumption.

With the house of Aaron began this wickedness in the sanctuary; with them therefore began also the divine punishment. Very touching is the story which follows. Aaron, though forbidden to mourn his loss (ver. 6, 7), will not eat the sin-offering in the holy place; and when rebuked by Moses, pleads in his defence, "Such things have befallen me: and if I had eaten the sin-offering to-day, should it have been accepted in the sight of Jehovah?" And Moses, the lawgiver and the judge, admits the plea, and honours the natural feeling of the father's heart, even when it leads to a violation of the letter of the divine commandment.

III. Chap. xi.–xvi. The first seven Decalogues had reference to the putting away of *guilt*. By the appointed sacrifices the separation between man and God was healed. The next seven concern themselves with the putting away of *impurity*. That chapters xi.–xv. hang together so as to form one series of laws there can be no doubt. Besides that they treat of kindred subjects, they have their characteristic words, טָמֵא, טֻמְאָה, "unclean," "uncleanness," טָהוֹר, טָהֳרָה, "clean," which occur in almost every verse. The only question is about chap. xvi., which by its opening is connected immediately with the occurrence related in chap. x. Historically it would seem therefore that chap. xvi. ought to have followed chap. x. And as this order is neglected, it would lead us to suspect that some other principle of arrangement than that of historical sequence has been adopted. This we find in the solemn significance of the Great Day of Atonement. The high-priest on that day made atonement, "because of the *uncleanness* of the children of Israel, and because of their transgressions in all their sins" (xvi. 16), and he "reconciled the holy place and the tabernacle of the congregation, and the altar" (ver. 20). Delivered from their guilt and cleansed from their pollutions, from that day forward the children of Israel entered upon a new and holy life. This was typified both by the ordinance that the bullock and the goat for the sin-offering were burnt without the camp (ver. 27), and also by the sending away of the goat laden with the iniquities of the people into the wilderness. Hence chap. xvi. seems to stand most fitly at the end of this second group of seven Decalogues.

[a] In the English Version this is chap. vi. 1-7. This is only one of those instances in which the reader marvels at the perversity displayed in the division of chapters.

It has reference, we believe, not only (as Bertheau supposes) to the putting away, as by one solemn act, of all those uncleannesses mentioned in chap. xi.–xv., and for which the various expiations and cleansings there appointed were temporary and insufficient; but also to the making atonement, in the sense of hiding sin or putting away its guilt. For not only do we find the idea of cleansing as from defilement, but far more prominently the idea of reconciliation. The often-repeated word כִּפֶּר, "to cover, to atone," is the great word of the section.

1. The first Decalogue in this group refers to clean and unclean flesh. Five classes of animals are pronounced unclean. The first four enactments declare what animals may and may not be eaten, whether (1) beasts of the earth (2-8), or (2) fishes (9-12), or (3) birds (13-20), or (4) creeping things with wings. The next four are intended to guard against pollution by contact with the carcase of any of these animals: (5) ver. 24-26; (6) ver. 27, 28; (7) ver. 29-38; (8) ver. 39, 40. The ninth and tenth specify the last class of animals which are unclean for food, (9) 41, 42, and forbid any other kind of pollution by means of them, (10) 43-45. Ver. 46 and 47 are merely a concluding summary.

2. Chap. xii. Women's purification in childbed. The whole of this chapter, according to Bertheau, constitutes the first law of this Decalogue. The remaining nine are to be found in the next chapter, which treats of the signs of leprosy in man and in garments. (2) ver. 1-8; (3) ver. 9-17; (4) ver. 18-23; (5) ver. 24-28; (6) ver. 29-37; (7) ver. 38, 39; (8) ver. 40, 41; (9) ver. 42-46; (10) ver. 47-59. This arrangement of the several sections is not altogether free from objection; but it is certainly supported by the characteristic mode in which each section opens. Thus for instance, chap. xii. 2, begins with אִשָּׁה כִּי תַזְרִיעַ; chap. xiii. 2, with אָדָם כִּי יִהְיֶה, ver. 9, נֶגַע צָרַעַת כִּי תִהְיֶה, and so on, the same order being always observed, the subst. being placed first, then כִּי, and then the verb, except only in ver. 42, where the subst. is placed after the verb.

3. Chap. xiv. 1-32. "The law of the leper in the day of his cleansing," *i. e.* the law which the *priest* is to observe in purifying the leper. The priest is mentioned in ten verses, each of which begins one of the ten sections of this law: ver. 3, 4, 5, 11, 12, 14, 15, 16, 19, 20. In each instance the word וְהִבֵּהוּ is preceded by ו consecut. with the perfect. It is true that in ver. 3, and also in ver. 14, the word וְהַכֹּהֵן occurs twice; but in both verses there is MS. authority, as well as that of the Vulg. and Arab. versions for the absence of the second. Verses 21-32 may be regarded as a supplemental provision in cases where the leper is too poor to bring the required offering.

4. Chap. xiv. 33-57. The leprosy in a house. It is not so easy here to trace the arrangement noticed in so many other laws. There are no characteristic words or phrases to guide us. Bertheau's division is as follows: (1) ver. 34, 35; (2) ver. 36, 37; (3) ver. 38; (4) ver. 39; (5) ver. 40; (6) ver. 41, 42; (7) ver. 43-45. Then as usual follows a short summary which closes the statute concerning leprosy, ver. 54-57.

5. Chap. xv. 1-15. 6. Chap. xv. 16-31. The law of uncleanness by issue, &c., in two decalogues. The division is clearly marked, as Bertheau observes, by the form of cleansing, which is so exactly similar in the two principal cases, and which closes each series, (1) ver. 13-15; (2) ver. 28-30. We again give his arrangement, though we do not profess to regard it as in all respects satisfactory.

6. (1) ver. 2, 3; (2) ver. 4; (3) ver. 5; (4) ver. 6; (5) ver. 7; (6) ver. 8; (7) ver. 9; (8) ver. 10; (9) ver. 11, 12;—these Bertheau considers as one enactment, because it is another way of saying that either the *man* or *thing* which the unclean person touches is unclean; but on the same principle ver. 4 and 5 might just as well form one enactment—(10) v. 13-15.

6. (1) ver. 16; (2) ver. 17; (3) ver. 18; (4) ver. 19; (5) ver. 20; (6) ver. 21; (7) ver. 22; (8) ver. 23; (9) ver. 24: (10) ver. 28-30. In order to complete this arrangement, he considers verses 25-27 as a kind of supplementary enactment provided for an irregular uncleanness, leaving it as quite uncertain however whether this was a later addition or not. Verses 32 and 33 form merely the same general conclusion which we have had before in xiv. 54-57.

The last Decalogue of the second group of seven Decalogues is to be found in chap. xvi., which treats of the great Day of Atonement. The Law itself is contained in ver. 1-28. The remaining verses, 29-34, consist of an exhortation to its careful observance. In the act of atonement three persons are concerned. The high-priest,—in this instance Aaron; the man who leads away the goat for Azazel into the wilderness; and he who burns the skin, flesh, and dung of the bullock and goat of the sin-offering without the camp. The two last have special purifications assigned them; the first because he has touched the goat laden with the guilt of Israel; the last because he has come in contact with the sin-offering. The 9th and 10th enactments prescribe what these purifications are, each of them concluding with the same formula: וְאַחֲרֵי כֵן יָבוֹא אֶל הַמַּחֲנֶה, and hence distinguished from each other. The duties of Aaron consequently ought, if the division into decads is correct, to be comprised in eight enactments. Now the name of Aaron is repeated eight times, and in six of these it is preceded by the Perfect with ו consecut. as we observed was the case before when "the priest" was the prominent figure. According to this then the Decalogue will stand thus:—(1) ver. 2, Aaron not to enter the Holy Place at all times; (2) ver. 3-5, With what sacrifices and in what dress Aaron is to enter the Holy Place; (3) ver. 6, 7, Aaron to offer the bullock for himself, and to set the two goats before Jehovah; (4) Aaron to cast lots on the two goats; (5) ver. 9, 10, Aaron to offer the goat on which the lot falls for Jehovah, and to send away the goat for Azazel into the wilderness, (6) ver. 11-19, Aaron to sprinkle the blood both of the bullock and of the goat to make atonement for himself, for his house, and for the whole congregation, as also to purify the altar of incense with the blood; (7) ver. 20-22, Aaron to lay his hands on the living goat, and confess over it all the sins of the children of Israel; (8) ver. 23-25, Aaron after this to take off his linen garments, bathe himself and put on his priestly garments, and then offer his burnt-offering and that of the congregation; (9) ver. 26, The man by whom the goat is sent into the wilderness to purify himself; (10) ver. 27, 28, What is to be done by him who burns the sin-offering without the camp.

We have now reached the great central point of the book. All going before was but a preparation for this. Two great truths have been established; first, that God can only be approached by means of appointed sacrifices; next, that man in nature and life is full of pollution, which must be cleansed. And now a third is taught, viz. that not by several cleansings for several sins and pollutions can guilt be put away. The several acts of sin are but so many manifestations of the sinful nature. For this, therefore, also must atonement be made; one solemn act, which shall cover all transgressions, and turn away God's righteous displeasure from Israel.

IV. Chap. xvii.–xx. And now Israel is reminded that it is the holy nation. The great atonement offered, it is to enter upon a new life. It is a separate nation, sanctified and set apart for the service of God. It may not therefore do after the abominations of the heathen by whom it is surrounded. Here consequently we find those laws and ordinances which especially distinguish the nation of Israel from all other nations of the earth.

Here again we may trace, as before, a group of seven decalogues. But the several decalogues are not so clearly marked; nor are the characteristic phrases and the introductions and conclusions so common. In chap. xviii. there are twenty enactments, and in chap. xix. thirty. In chap. xvii., on the other hand, there are only six, and in chap. xx. there are fourteen. As it is quite manifest that the enactments in chap. xviii. are entirely separated by a fresh introduction from those in chap. xvii., Bertheau, in order to preserve the usual arrangement of the laws in decalogues, would transpose this chapter, and place it after chapter xix. He observes, that the laws in chap. xvii., and those in chap. xx. 1-9, are akin to one another, and may very well constitute a single decalogue; and, what is of more importance, that the words in xviii. 1-5 form the natural introduction to this whole group of laws: "And Jehovah spake unto Moses, saying, Speak unto the children of Israel, and say unto them, I am Jehovah your God. After the doings of the land of Egypt, wherein ye dwelt, shall ye not do: and after the doings of the land of Canaan, whither I bring you, shall ye not do: neither shall ye walk in their ordinances," &c.

There is, however, a point of connexion between chaps. xvii. and xviii. which must not be overlooked, and which seems to indicate that their position in our present text is the right one. All the six enactments in chap. xvii. (ver. 3-5, ver. 6, 7, ver. 8, 9, ver. 10-12, ver. 13, 14, ver. 15) bear upon the nature and meaning of the sacrifice to Jehovah as compared with the sacrifices offered to false gods. It would seem too that it was necessary to guard against any license to idolatrous practices, which might possibly be drawn from the sending the goat for Azazel into the wilderness [ATONEMENT, DAY OF], especially perhaps against the Egyptian custom of appeasing the Evil Spirit of the wilderness and averting his malice (Hengstenberg *Mose u. Aegypten*, 178; Movers, *Phönizier*, 369). To this there may be an allusion in ver. 7. Perhaps however it is better and more simple to regard the enactments in these two chapters (with Bunsen, *Bibelwerk*, 2te abth., 1te th. p. 245) as directed against two prevalent heathen practices, the eating of blood and fornication. It is remarkable, as showing how intimately moral and ritual observances were blended together in the Jewish mind, that abstinence "from blood and things strangled, and fornication," was laid down by the Apostles as the only condition of communion to be required of Gentile converts to Christianity. Before we quit this chapter one observation may be made. The rendering of the A. V. in ver. 11, "for it is the blood that maketh an atonement for the soul" should be "for it is the blood that maketh an atonement *by means of the life*." This is important. It is not blood merely as such, but blood as having in it the principle of life that God accepts in sacrifice. For by thus giving vicariously the life of the dumb animal the sinner confesses that his own life is forfeit.

In chap. xviii., after the introduction to which we have already alluded, ver. 1-5,—and in which God claims obedience on the double ground that He is Israel's God, and that to keep His commandments is life (ver. 5),—there follow twenty enactments concerning unlawful marriages and unnatural lusts. The first ten are contained one in each verse, vers. 6-15. The next ten range themselves in like manner with the verses, except that ver. 17 and 23 contain each two.[b] Of the twenty the first fourteen are alike in form, as well as in the repeated עֶרְוָה לֹא תְגַלֵּה.

Chap. xix. Three Decalogues, introduced by the words, "Ye shall be holy, for I Jehovah your God am holy," and ending with, "Ye shall observe all my statutes, and all my judgments, and do them. I am Jehovah." The laws here are of a very mixed character, and many of them a repetition merely of previous laws. Of the three Decalogues, the first is comprised in ver. 3-13, and may be thus distributed:—(1) ver. 3, to honour father and mother; (2) ver. 3, to keep the sabbath; (3) ver. 4, not to turn to idols; (4) ver. 4, not to make molten gods (these two enactments being separated on the same principle as the first and second commandments of the Great Decalogue or Two Tables); (5) ver. 5-8, of thank-offerings; (6) ver. 9, 10, of gleaning; (7) ver. 11, not to steal or lie; (8) ver. 12, not to swear falsely; (9) ver. 13, not to defraud one's neighbour; (10) ver. 13, the wages of him that is hired, &c.[c]

[b] The interpretation of ver. 18 has of late been the subject of so much discussion, that we may perhaps be permitted to say a word upon it, even in a work which excludes all dogmatic controversy. The rendering of the English Version is supported by a whole catena of authorities of the first rank, as may be seen by reference to Dr. M'Caul's pamphlet, *The Ancient Interpretation of Leviticus XVIII.* 18, &c. We may further remark, that the whole controversy, so far as the Scriptural question is concerned, might have been avoided if the Church had but acted in the spirit of Luther's golden words:—"Ad rem veniamus et dicamus Mosem esse mortuum, vixisse autem populo Judaico, nec obligari nos legibus illius. Ideo quidquid ex Mose ut legislatore nisi idem ex legibus nostris, *e. g.* naturalibus et politicis probetur, non admittamus nec confundamus totius orbis politias."—*Briefe*, De Wette's edit. iv. 305.

[c] It is not a little remarkable that six of these enactments should only be repetitions, for the most part in a shorter form, of Commandments contained in the Two Tables. This can only be accounted for by remembering the great object of this section, which is to remind Israel that it is a separate nation, its laws being expressly framed to be a fence and a hedge about it, keeping it from profane contact with the heathen. Bunsen divides chapter xix. into two tables of ten commandments each, and one of five (See his *Bibelwerk*.)

The next Decalogue, ver. 14-25, Bertheau arranges thus: ver. 14, ver. 15, ver. 16*a*, ver. 16*b*, ver. 17, ver. 18, ver. 19*a*, ver. 19*b*, ver. 20-22, ver. 23-25. We object, however, to making the words in 19*a*, "Ye shall keep my statutes," a separate enactment. There is no reason for this. A much better plan would be to consider ver. 17 as consisting of two enactments, which is manifestly the case.

The third decalogue may be thus distributed:—ver. 26*a*, ver. 26*b*, ver. 27, ver. 28, ver. 29, ver. 30, ver. 31, ver. 32, ver. 33, 34, ver. 35, 36.

We have thus found five decalogues in this group. Bertheau completes the number seven by transposing, as we have seen, chap. xvii., and placing it immediately before chap. xx. He also transfers ver. 27 of chapter xx. to what he considers its proper place, viz. after ver. 6. It must be confessed that the enactment in ver. 27 stands very awkwardly at the end of the chapter, completely isolated as it is from all other enactments; for ver. 23-26 are the natural conclusion to this whole section. But admitting this, another difficulty remains, that according to him the 7th decalogue begins at ver. 10, and another transposition is necessary, so that ver. 7, 8, may stand after ver. 9, and so conclude the preceding series of ten enactments. It is better perhaps to abandon the search for complete symmetry than to adopt a method so violent in order to obtain it.

It should be observed that chap. xviii. 6-23 and chap. xx. 10-21 stand in this relation to one another; that the latter declares the penalties attached to the transgression of many of the commandments given in the former. But though we may not be able to trace seven decalogues, in accordance with the theory of which we have been speaking, in chap. xvii.-xx., there can be no doubt that they form a distinct section of themselves, of which xx. 22-26 is the proper conclusion.

Like the other sections it has some characteristic expressions:—(*a*) "Ye shall keep my judgments and my statutes" (חֻקֹּתַי, וְשָׁמַרְתֶּם) occurs xviii. 4, 5, 26, xix. 37, xx. 8, 23, but is not met with either in the preceding or the following chapters. (*b*) The constantly recurring phrases, "I am Jehovah;" "I am Jehovah your God;" "Be ye holy, for I am holy;" "I am Jehovah which hallow you." In the earlier sections this phraseology is only found in Lev. xi. 44, 45, and Ex. xxxi. 13. In the section which follows (xxi.-xxv.) it is much more common, this section being in a great measure a continuation of the preceding.

V. We come now to the last group of decalogues—that contained in ch. xxi.-xxvi. 2. The subjects comprised in these enactments are—First, the personal purity of the priests. They may not defile themselves for the dead; their wives and daughters must be pure, and they themselves must be free from all personal blemish (ch. xxi.). Next, the eating of the holy things is permitted only to priests who are free from all uncleanness: they and their household only may eat them (xxii. 1-16). Thirdly, the offerings of Israel are to be pure and without blemish (xxii. 17-33). The fourth series provides for the due celebration of the great festivals when priests and people were to be gathered together before Jehovah in holy convocation.

Up to this point we trace system and purpose in the order of the legislation. Thus, for instance, chap. xi.-xvi. treats of external purity; ch. xvii.-xx. of moral purity; chap. xxi.-xxiii. of the holiness of the priests, and their duties with regard to holy things; the whole concluding with provisions for the solemn feasts on which all Israel appeared before Jehovah. We will again briefly indicate Bertheau's groups, and then append some general observations on the section.

1. Chap. xxi. Ten laws, as follows:—(1) ver. 1-3; (2) ver. 4; (3) ver. 5, 6; (4) ver. 7, 8. (5) ver. 9; (6) ver. 10, 11; (7) ver. 12; (8) ver 13, 14; (9) ver. 17-21; (10) ver. 22, 23. The first five laws concern all the priests; the sixth to the eighth the high-priest; the ninth and tenth the effects of bodily blemish in particular cases.

2. Chap. xxii. 1-16. (1) ver. 2; (2) ver. 3; (3) ver. 4; (4) ver. 4-7; (5) ver. 8, 9; (6) ver. 10; (7) ver. 11; (8) ver. 12; (9) ver. 13; (10) ver. 14-16.

3. Chap. xxii. 17-33. (1) ver. 18-20; (2) ver. 21; (3) ver. 22; (4) ver. 23; (5) ver. 24; (6) ver. 25; (7) ver. 27; (8) ver. 28; (9) ver. 29; (10) ver. 30; and a general conclusion in ver. 31-33.

4. Chap. xxiii. (1) ver. 3; (2) ver. 5-7; (3) ver. 8; (4) ver. 9-14; (5) ver. 15-21; (6) ver. 22; (7) ver. 24, 25; (8) ver. 27-32; (9) ver. 34, 35; (10) ver. 36: ver. 37, 38 contain the conclusion or general summing up of the Decalogue. On the remainder of the chapter, as well as chap. xxiv., see below.

5. Chap. xxv. 1-22. (1) ver. 2; (2) ver. 3, 4; (3) ver. 5; (4) ver. 6; (5) ver. 8-10; (6) ver. 11, 12; (7) ver. 13; (8) ver. 14; (9) ver. 15; (10) ver. 16: with a concluding formula in ver. 18-22.

6. Chap. xxv. 23-38. (1) ver. 23, 24; (2) ver. 25; (3) ver. 26, 27; (4) ver. 28; (5) ver. 29; (6) ver. 30; (7) ver. 31; (8) ver. 32, 33; (9) ver. 34; (10) ver. 35-37: the conclusion to the whole in ver. 38.

7. Chap. xxv. 39–xxvi. 2. (1) ver. 39; (2) ver. 40-42; (3) ver. 43; (4) ver. 44, 45; (5) ver. 46; (6) ver. 47-49; (7) ver. 50; (8) ver. 51, 52; (9) ver. 53; (10) ver. 54.

It will be observed that the above arrangement is only completed by omitting the latter part of chap. xxiii. and the whole of chap. xxiv. But it is clear that chap. xxiii. 39-44 is a later addition, containing further instructions respecting the Feast of Tabernacles. Ver. 39, as compared with ver. 34, shows that the same feast is referred to; while ver. 37, 38, are no less manifestly the original conclusion of the laws respecting the feasts which are enumerated in the previous part of the chapter. Chap. xxiv., again, has a peculiar character of its own. First we have a command concerning the oil to be used in the lamps belonging to the Tabernacle, which is only a repetition of an enactment already given in Ex. xxvii. 20, 21, which seems to be its natural place. Then follow directions about the shew-bread. These do not occur previously. In Ex. the shew-bread is spoken of always as a matter of course, concerning which no regulations are necessary (comp. Ex. xxv. 30, xxxv. 13, xxxix. 36). Lastly come certain enactments arising out of an historical occurrence. The son of an Egyptian father by an Israelitish woman blasphemes the name of Jehovah, and Moses is commanded to stone him in consequence: and this circumstance is the occasion of the following laws being given:—(1) That a blasphemer, whether Israelite or stranger, is to be stoned (comp. Ex. xxii. 28). (2) That he that kills any man shall surely be put to death (comp. Ex. xxi. 12-27). (3) That he that kills a beast

shall make it good (not found where we might have expected it, in the series of laws Ex. xxi. 28-xxii. 16). (4) That if a man cause a blemish in his neighbour he shall be requited in like manner (comp. Ex. xxi. 22-25). (5) We have then a repetition in an inverse order of ver. 17, 18; and (6) the injunction that there shall be one law for the stranger and the Israelite. Finally, a brief notice of the infliction of the punishment in the case of the son of Shelomith, who blasphemed. Not another instance is to be found in the whole collection in which any historical circumstance is made the occasion of enacting a law. Then again the laws (2), (3), (4), (5), are mostly repetitions of existing laws, and seem here to have no connexion with the event to which they are referred. Either therefore some other circumstances took place at the same time with which we are not acquainted, or these isolated laws, detached from their proper connexion, were grouped together here, in obedience perhaps to some traditional association.

VI. The seven decalogues are now fitly closed by words of promise and threat—promise of largest, richest blessing to those that hearken unto and do these commandments; threats of utter destruction to those that break the covenant of their God. Thus the second great division of the Law closes like the first, except that the first part, or Book of the Covenant, ends (Ex. xxiii. 20-33) with promises of blessing only. *There* nothing is said of the judgments which are to follow transgression, because as yet the Covenant had not been made. But when once the nation had freely entered into that Covenant, they bound themselves to accept its sanctions, its penalties, as well as its rewards. And we cannot wonder if in these sanctions the punishment of transgression holds a larger place than the rewards of obedience. For already was it but too plain that "Israel would not obey." From the first they were a stiffnecked and rebellious race, and from the first the doom of disobedience hung like some fiery sword above their heads.

VII. The legislation is evidently completed in the last words of the preceding chapter:—"These are the statutes and judgments and laws which Jehovah made between Him and the children of Israel in Mount Sinai by the hand of Moses." Chap. xxvii. is a later appendix, again however closed by a similar formula, which at least shows that the transcriber considered it to be an integral part of the original Mosaic legislation, though he might be at a loss to assign it its place. Bertheau classes it with the other less regularly grouped laws at the beginning of the book of Numbers. He treats the section Lev. xxvii.–Num. x. 10 as a series of supplements to the Sinaitic legislation.

Integrity.—This is very generally admitted. Those critics even who are in favour of different documents in the Pentateuch assign nearly the whole of this book to one writer, the Elohist, or author of the original document. According to Knobel the only portions which are not to be referred to the Elohist are—Moses' rebuke of Aaron because the goat of the sin-offering had been burnt (x. 16-20); the group of laws in chap. xvii.-xx.; certain additional enactments respecting the Sabbath and the Feasts of Weeks and of Tabernacles (xxiii., part of ver. 2, from מֹועֲדֵי יְהוָה, and ver. 3, ver. 18, 19, 22, 39-44); the punishments ordained for blasphemy, murder, &c. (xxiv. 10-23); the directions respecting the Sabbatical year (xxv. 18-22), and the promises and warnings contained in chap. xxvi.

With regard to the section chap. xvii.-xx., he does not consider the whole of it to have been borrowed from the same sources. Chap. xvii he believes was introduced here by the Jehovist from some ancient document, whilst he admits nevertheless that it contains certain Elohistic forms of expression, as כָּל בָּשָׂר, "all flesh," ver. 14; נֶפֶשׁ "soul," (in the sense of "person"), ver. 10-12, 15; חַיָּה, "beast," ver. 13; קָרְבָּן, "offering," ver. 4; רֵיחַ נִיחֹחַ, "a sweet savour," ver. 6; "a statute for ever," and "after your generations," ver. 7. But it cannot be from the Elohist, he argues, because (*a*) he would have placed it after chap. vii., or at least after chap. xv.; (*b*) he would not have repeated the prohibition of blood, &c., which he had already given; (*c*) he would have taken a more favourable view of his nation than that implied in ver. 7; and lastly (*d*) the phraseology has something of the colouring of chap. xviii.-xx. and xxvi., which are certainly not Elohistic. Such reasons are too transparently unsatisfactory to need serious discussion. He observes further that the chapter is not altogether Mosaic. The first enactment (ver. 1-7) does indeed apply only to Israelites, and holds good therefore for the time of Moses. But the remaining three contemplate the case of strangers living amongst the people, and have a reference to all time.

Chap. xviii.-xx., though it has a Jehovistic colouring, cannot have been originally from the Jehovist. The following peculiarities of language, which are worthy of notice, according to Knobel (*Exod. und Leviticus erklärt*, in Kurzg. Exeg. Hdbuch, 1857) forbid such a supposition, the more so as they occur nowhere else in the O. T.:—רֶבַע, "lie down to" and "gender," xviii. 23, xix. 19, xx. 16; תֶּבֶל, "confusion," xviii. 23, xx. 12; לָקַט, "gather," xix. 9, xxiii. 22; פֶּרֶט, "grape," xix. 10 שְׁאֵרָה, "near kinswomen," xviii. 17; נִשְׂרֶטֶת, "scourged," xix. 20; חָפְשִׁי, "free," *ibid.*; מַעֲקָה, "print marks," xix. 28; הֵקִיא, "vomit," in the metaphorical sense, xviii. 25, 28, xx. 22; עָרְלָה, "uncircumcised," as applied to fruit-trees, xix. 23; and מוֹלֶדֶת, "born," xviii. 9, 11; as well as the Egyptian word (for such it probably is) שַׁעַטְנֵז, "garment of divers sorts," which, however, does occur once beside in Deut. xxii. 11.

According to Bunsen, chap. xix. is a genuine part of the Mosaic legislation, given however in its original form not on Sinai, but on the east side of the Jordan; whilst the general arrangement of the Mosaic laws may perhaps be as late as the time of the Judges. He regards it as a very ancient document, based on the Two Tables, of which, and especially of the first, it is in fact an extension, and consisting of two decalogues and one pentad of laws. Certain expressions in it he considers imply that the people were already settled in the land (ver. 9, 10, 13, 15), while on the other hand ver. 23 supposes a *future* occupation of the land. Hence he concludes that the revision of this document by the transcribers was incomplete: whereas all the passages may fairly be interpreted as looking forward to a future settlement in Canaan.

The great simplicity and lofty moral character of this section compel us, says Bunsen, to refer it at least to the earlier time of the Judges, if not to that of Joshua himself.

We must not quit this book without a word on what may be called its spiritual meaning. That an elaborate a ritual looked beyond itself we cannot doubt. It was a prophecy of things to come; a shadow whereof the substance was Christ and His kingdom. We may not always be able to say what the exact relation is between the type and the antitype. Of many things we may be sure that they belonged only to the nation to whom they were given, containing no prophetic significance, but serving as witnesses and signs to them of God's covenant of grace. We may hesitate to pronounce with Jerome that "every sacrifice, nay almost every syllable—the garments of Aaron and the whole Levitical system—breathe of heavenly mysteries."[d] But we cannot read the Epistle to the Hebrews and not acknowledge that the Levitical priests "served the pattern and type of heavenly things"—that the sacrifices of the Law pointed to and found their interpretation in the Lamb of God—that the ordinances of outward purification signified the true inner cleansing of the heart and conscience from dead works to serve the living God. The idea moreover penetrates the whole of this vast and burdensome ceremonial, and gives it a real glory even apart from any prophetic significance. Holiness is its end. Holiness is its character. The tabernacle is holy—the vessels are holy—the offerings[e] are most holy unto Jehovah—the garments of the priests are holy.[f] All who approach Him whose name is "Holy," whether priests[g] who minister unto Him, or people who worship Him, must themselves be holy.[h] It would seem as if, amid the camp and dwellings of Israel, was ever to be heard an echo of that solemn strain which fills the courts above, where the seraphim cry one unto another, Holy, Holy, Holy.[i]

Other questions connected with this book, such as its authorship, its probable age in its present form, and the relation of the laws contained in it to those, either supplementary or apparently contradictory, found in other parts of the Pentateuch, will best be discussed in another article, where opportunity will be given for a comprehensive view of the Mosaic legislation as a whole. [PENTATEUCH.] [J. S. P.]

LIBANUS (ὁ Λίβανος), the Greek form of the name LEBANON (1 Esd. iv. 48; v. 55; 2 Esd. xv. 20; Jud. i. 7; Ecclus. xxiv. 13; l. 12). ANTI-LIBANUS (Ἀντιλίβανος) occurs only in Jud. i. 7. [G.]

LIBERTINES (Λιβερτῖνοι: *Libertini*). This word occurs once only in the N. T. In Acts vi. 9, we find the opponents of Stephen's preaching described as τίνες τῶν ἐκ τῆς συναγωγῆς τῆς λεγομένης Λιβερτίνων, καὶ Κυρηναίων καὶ Ἀλεξανδρέων καὶ τῶν ἀπὸ Κιλικίας καὶ Ἀσίας. The question is, who were these "Libertines," and in what relation did they stand to the others who are mentioned with them? The structure of the passage leaves it doubtful how many synagogues are implied in it. Some (Calvin, Beza, Bengel) have taken it as if there were but one synagogue, including men from all the different cities that are named. Winer (*N. T. Gramm.* p. 179), on grammatical grounds, takes the repetition of the article as indicating a fresh group, and finds accordingly two synagogues, one including Libertines, Cyrenians, Alexandrians; the other those of Cilicia and Asia. Meyer (*ad loc.*) thinks it unlikely that out of the 480 synagogues at Jerusalem (the number given by Rabbinic writers, *Megill.* § 73, 4; *Ketub.* t. 105, 1), there should have been one, or even two only, for natives of cities and districts in which the Jewish population was so numerous,[a] and on that ground assigns a separate synagogue to each of the proper names.

Of the name itself there have been several explanations. (1.) The other name being local, this also has been referred to a town of Libertum in the proconsular province of Africa. This, it is said, would explain the close juxta-position with Cyrene. Suidas recognises Λιβερτῖνοι as ἔθνος ἔθνους, and in the Council of Carthage in 411 (Mansi. vol. iv. p. 265-274, quoted in Wiltsch, *Handbuch der Kirchlich. Geogr.* §96), we find an Episcopus Libertinensis (Simon. *Onomast. N. T.* p. 99; and Gerdes. *de Synag. Libert.* Groning. 1736, in Winer, *Rwb.*). Against this hypothesis it has been urged, (1) that the existence of a *town* Libertum, in the first century, is not established; and (2) that if it existed, it can hardly have been important enough either to have a synagogue at Jerusalem for the Jews belonging to it, or to take precedence of Cyrene and Alexandria in a synagogue common to the three.[b]

(2.) Conjectural readings have been proposed. Λιβυστίνων (Oecumen., Beza, Clericus, Valckenaer) Λιβύων τῶν κατὰ Κυρήνην (Schultness, *de Char. Sp. S.* p. 162, in Meyer, *ad loc.*). The difficulty is thus removed; but every rule of textual criticism is against the reception of a reading unsupported by a single MS. or version.

(3.) Taking the word in its received meaning as = freedmen, Lightfoot finds in it a description of natives of Palestine, who having fallen into slavery, had been manumitted by Jewish masters (*Exc. on Acts* vi. 9). In this case, however, it is hardly likely that a body of men so circumstanced would have received a Roman name.

(4.) Grotius and Vitringa explain the word as describing Italian freedmen who had become converts to Judaism. In this case, however, the word "proselytes" would most probably have been used; and it is at least unlikely that a body of converts would have had a synagogue to themselves, or that proselytes from Italy would have been united with Jews from Cyrene and Alexandria.

(5.) The earliest explanation of the word (Chrysost.) is also that which has been adopted by the most recent authorities (Winer, *Rwb. s. v.*; Meyer, *Comm. ad loc.*). The *Libertini* are Jews who, having been taken prisoners by Pompey and other Roman generals in the Syrian wars, had been re-

[d] "In promptu est Leviticus liber in quo singula sanctia, immo singulae penè syllabae et vestes sanctæ et totus ordo Leviticus spirant cœlestia sacramenta" (Hieron. *Ep. ad Paulin.*).

[e] ii. 3, 10; vi. 17, 25, 29; vii. 1, 6; x. 12, 17; xiv. 13. [f] xvi. 4. [g] xxi. 6-8, 15.

[h] xi. 44, 27; vii. 21; x. 3, 10; xi. 43, 45; xv. 31 (xvii. 21); xix. 2; xx. 7, 26.

[i] In chaps. xviii.-xxv. observe the phrase, "I am Jehovah," "I am Jehovah your God." Latter part of xxv. and xxvi. somewhat changed, but recurring in xxvi. The reason given for this holiness, "I am holy," xi. 44, &c., xix. 2, xx. 7, 26.

[a] In Cyrene one-fourth, in Alexandria two-fifths of the whole (Jos. *Ant.* xiv. 7, §2, xiv. 10, §1, xix. 5, §2; *B. J.* ii. 18, §7; *c. Ap.* 2, §4).

[b] Wiltsch gives no information beyond the fact just mentioned

duced to slavery, and had afterwards been emancipated, and returned, permanently or for a time, to the country of their fathers. Of the existence of a large body of Jews in this position at Rome we have abundant evidence. Under Tiberius, the *Senatus-Consultum* for the suppression of Egyptian and Jewish mysteries led to the banishment of 4000 "libertini generis" to Sardinia, under the pretence of military or police duty, but really in the hope that the malaria of the island might be fatal to them. Others were to leave Italy unless they abandoned their religion (Tacit. *Annal.* ii. 85; comp. Suet. *Tiber.* c. 36). Josephus (*Ant.* xviii. 3, §5), narrating the same fact, speaks of the 4000 who were sent to Sardinia as Jews, and thus identifies them with the "libertinum genus" of Tacitus. Philo (*Legat. ad Caium*, p. 1014, C.) in like manner says, that the greater part of the Jews of Rome were in the position of freedmen (ἀπελευθερωθέντες), and had been allowed by Augustus to settle in the Trans-Tiberine part of the city, and to follow their own religious customs unmolested (comp. Horace, *Sat.* i. 4, 143, i. 9, 70). The expulsion from Rome took place A.D. 19; and it is an ingenious conjecture of Mr. Humphrey's (*Comm. on Acts, ad loc.*) that those who were thus banished from Italy may have found their way to Jerusalem, and that, as having suffered for the sake of their religion, they were likely to be foremost in the opposition to a teacher like Stephen, whom they looked on as impugning the sacredness of all that they most revered. [E. H. P.]

LIB'NAH (לִבְנָה: Λεβνᾶ, also Λεμνᾶ, Λόμνα, Λημνᾶ, Ζεννᾶ; Alex. Λεβμνα, Λοβενα: *Lĭbna, Labana, Lebna, Lobna*), a city which lay in the south-west part of the Holy Land. It was taken by Joshua immediately after the rout of Beth-horon. That eventful day was ended by the capture and destruction of MAKKEDAH (Josh. x. 28); and then the host—"Joshua, and all Israel with him"—moved on to Libnah, which was also totally destroyed, its king and all its inhabitants (Josh. x. 29, 30, 32, 39, xii. 15). The next place taken was Lachish.

Libnah belonged to the district of the Shefelah, the maritime lowland of Judah, among the cities of which district it is enumerated (Josh. xv. 42), not in close connexion with either Makkedah or Lachish, but in an independent group of nine towns, among which are Keilah, Mareshah, and Nezib.[a] Libnah was appropriated with its "suburbs" to the priests (Josh. xxi. 13; 1 Chr. vi. 57). In the reign of Jehoram the son of Jehoshaphat it "revolted" from Judah at the same time with Edom (2 K. viii. 22; 2 Chr. xxi. 10); but, beyond the fact of their simultaneous occurrence, there is no apparent connexion between the two events. On completing or relinquishing the siege of Lachish—which of the two is not quite certain—Sennacherib laid siege to Libnah (2 K. xix. 8; Is. xxxvii. 8). While there he was joined by Rabshakeh and the part of the army which had visited Jerusalem (2 K. xix. 8; Is. xxxvii. 8), and received the intelligence of Tirhakah's approach; and it would appear that at Libnah the destruction of the Assyrian army took place, though the statements of Herodotus (ii 141) and of Josephus (*Ant.* x. 1, §4) place it at Pelusium.[b] (Rawlinson, *Herod.* i. 480.)

It was the native place of Hamutal, or Hami the queen of Josiah, and mother of Jehoahaz (2 xxiii. 31) and Zedekiah (xxiv. 18; Jer. lii. 1). is in this connexion that its name appears for last time in the Bible.

Libnah is described by Eusebius and Jerome the *Onomasticon* (*s. v.* Λόβνα and "Lebna") me as a village of the district of Eleutheropolis. site has hitherto escaped not only discovery, b until lately, even conjecture. Professor Stan (*S. & P.* 207 *note*, 258 *note*), on the ground of accordance of the name Libnah (white) with "Blanchegarde" of the Crusaders, and of both w the appearance of the place, would locate it *Tell es-Safieh*, "a white-faced hill . . . which fo a conspicuous object in the eastern part of plain," and is situated 5 miles N.W. of *B jibrîn*. But *Tell es-Safieh* has claims to be id tified with GATH, which are considered un that head in this work. Van de Velde places with confidence at *Arâk el-Menshîyeh*, a hill ab 4 miles W. of *Beit-jibrîn*, on the ground of its be "the only site between *Sumeil* (Makkedah) *Um Lakhis* (Lachish) shewing an ancient forti position" (*Memoir*, 330; in his *Syria and Palest* it is not named). But as neither *Um Lakhis* *Sumeil*, especially the latter, are identified w certainty, the conjecture must be left for furt exploration. One thing must not be overlook that although Libnah is in the lists of Josh. specified as being in the lowland, yet 3 of t 8 towns which form its group have been actual identified as situated among the mountains to t immediate S. and E. of *Beit-jibrîn*.—The name also found in SHIHOR-LIBNATH. [G.

LIB'NAH (לִבְנָה; Sam. לבונה; and so t LXX. Λεμνᾶ; Alex. Λεβνᾶ: *Lobna*), one of t stations at which the Israelites encamped, on th journey between the wilderness of Sinai and Kade It was the fifth in the series, and lay betwe Rimmon-parez and Rissah (Num. xxxiii. 20, 21 If *el-Hûdherah* be Hazeroth, then Libnah would situated somewhere on the western border of t Aelanitic arm of the Red Sea. But no trace of t name has yet been discovered; and the only co jecture which appears to have been made concerni it is that it was identical with Laban, mentioned Deut. i. 1. The word in Hebrew signifies "white and in that case may point either to the colour the spot or to the presence of white poplar (Stanle *S. & P.* App. §77). Count Bertou in his rece *Etude, le Mont Hor*, &c. 1860, endeavours to ide tify Libnah with the city of Judah noticed in t foregoing article. But there is little in his arg ments to support this theory, while the positi assigned to Libnah of Judah—in the *Shefelah* maritime district, not amongst the towns of "t South," which latter form a distinct division of t territory of the tribe, in proximity to Edom—seem of itself to be fatal to it.

The reading of the Samaritan Codex and Versio

[a] The sites of these have all been discovered, *not in the lowland*, as they are specified, but in the mountains immediately to the south and east of *Beit-jibrîn*.

[b] The account of Berosus, quoted by Josephus (*Ant.* x. , §6), is that the destruction took place when Sennacherib ea[illegible] reached Jerusalem, after his Egyptian expedition, on the first night of the siege. His words are, Ὑποστρέψαν[illegible] εἰς τὰ Ἱεροσόλυμα κατὰ τὴν πρώτην τ πολιορκίαν νύκτα διαφθείρονται, &c. Professor Stanley on the other hand, inclines to agree with the Jewish tr dition which places the event in the pass of Bethhoro and therefore on the road betw[illegible]n Libnah and Jerusale (*S. & P.* 207 *note*).

Lebonah, as supported by the LXX., but not apparently by any other authority. The Targum Pseudojonathan on the passage, plays with the name, according to the custom of the later Jewish writings: "Libnah, a place; the boundary of which is a building of brickwork," as if the name were לְבֵנָה, *Lebhnah*, a brick. [G.]

LIBNI (לִבְנִי: Λοβενί: *Lobni*, and once, Num. iii. 18, *Lebni*). 1. The eldest son of Gershom, the son of Levi (Ex. vi. 17; Num. iii. 18; 1 Chr. vi. 17, 20), and ancestor of the family of the LIBNITES.

2. The son of Mahli, or Mahali, son of Merari (1 Chr. vi. 29), as the Text at present stands. It is probable, however, that he is the same with the preceding, and that something has been omitted (comp. ver. 29 with 20, 42). [MAHLI, 1.]

LIBNITES, THE (הַלִּבְנִי: ὁ Λοβενί: *Lobni*, *Lebnitica*, sc. *familia*), the descendants of Libni, eldest son of Gershom, who formed one of the chief branches of the great Levitical family of Gershonites (Num. iii. 21, xxvi. 58).

LIBYA (Λιβύη, Λιβύα) occurs only in Acts ii. 10, in the periphrasis "the parts of Libya about Cyrene" (τὰ μέρη τῆς Λιβύης τῆς κατὰ Κυρήνην), which obviously means the Cyrenaica. Similar expressions are used by Dion Cassius (Λιβύη ἡ περὶ Κυρήνην, liii. 12) and Josephus (ἡ πρὸς Κυρήνην Λιβύη, *Ant.* xvi. 6, §1), as noticed in the article CYRENE. The name Libya is applied by the Greek and Roman writers to the African continent, generally however excluding Egypt. The consideration of this and its more restricted uses has no place in this work. The Hebrews, whose geography deals with nations rather than countries, and, in accordance with the genius of Shemites, never generalizes, had no names for continents or other large tracts comprising several countries ethnologically or otherwise distinct: the single mention is therefore of Greek origin. Some account of the Lubim, or primitive Libyans, as well as of the Jews in the Cyrenaica, is given in other articles. [LUBIM; CYRENE.] [R. S. P.]

LICE (כִּנִּים, כִּנִּם, כִּנָּם; *chinnim*, *chinnam*: σκνίφες, σκνίπες: *sciniphes*, *cinifes*). This word occurs in the A. V. only in Ex. viii. 16, 17, 18, and in Ps. cv. 31; both of which passages have reference to the third great plague of Egypt. In Exodus the miracle is recorded, while in the Psalm grateful remembrance of it is made. The Hebrew word,[a]—which, with some slight variation, occurs only in Ex. viii. 16, 17, 18, and in Ps. cv. 31—has given occasion to the whole pages of discussion; some commentators, amongst whom may be cited Michaelis (*Suppl.* s. v.), Oedmann (in *Vermisch. Samm.* i. vi. p. 80), Rosenmüller (*Schol.* in Ex. viii. 12), Harenberg (*Obs. Crit. de* כִּנִּים, in *Miscell. Lips. Nov.* vol. ii. p. v. p. 617), Dr. Geddes (*Crit. Rem.* Ex. viii. 17), Dr. Harris (*Dict. Nat. H. of Bible*), to which is to be added the authority of Philo (*De Vit. Mos.* ii. 97, ed. Mangey) and Origen (*Hom. Tert. in Exod.*), and indeed modern writers generally—suppose that gnats are the animals intended by the original word; while, on the other hand, the Jewish Rabbis, Josephus (*Ant.* ii. 14, §3), Bochart (*Hieroz.* iii. 457, ed. Rosenm.), Montanus, Munster (*Crit. Sac.* in Ex. viii. 12), Bryant (*Plagues of Egypt*, p. 56), and Dr. Adam Clarke are in favour of the translation of the A. V. The old versions, the Chaldee paraphrase, the Targums of Jonathan and Onkelos, the Syriac, the Samaritan Pentateuch, the Arabic, are claimed by Bochart as supporting the opinion that *lice* are here intended. Another writer believes he can identify the *chinnim* with some worm-like creatures (perhaps some kind of *Scolopendridae*) called *tarrentes*, mentioned in Vinisauf's account of the expedition of Richard I. into the Holy Land, and which by their bites during the night-time occasioned extreme pain (Harmer's *Observat.* Clarke's ed. iii. 549). With regard to this last theory it may fairly be said that, as it has not a word of proof or authority to support it, it may at once be rejected as fanciful. Those who believe that the plague was one of *gnats* or *mosquitoes* appear to ground their opinion solely on the authority of the LXX., or rather on the interpretation of the Greek word *σκνίφες*, as given by Philo (*De Vit. Mos.* ii. 97), and Origen (*Hom. III. in Exodum*). The advocates of the other theory, that *lice* are the animals meant by *chinnim*, and not *gnats*, base their arguments upon these facts:—(1) because the *chinnim* sprang from the dust, whereas gnats come from the waters; (2) because *gnats*, though they may greatly irritate men and beasts, cannot properly be said to be "in" them; (3) because their name is derived from a root[b] which signifies "to establish," or "to fix," which cannot be said of *gnats*; (4) because if *gnats* are intended, then the fourth plague of flies would be unduly anticipated; (5) because the Talmudists use the word *chinnah* in the singular number to mean a *louse*; as it is said in the *Treatise on the Sabbath* "As is the man who slays a camel on the Sabbath, so is he who slays a *louse* on the Sabbath."[c]

Let us examine these arguments as briefly as possible. First, the LXX. has been quoted as a direct proof that *chinnim* means *gnats*; and certainly in such a matter as the one before us it is almost impossible to exaggerate the authority of the translators, who dwelt in Egypt, and therefore must be considered good authorities on this subject. But is it quite clear that the Greek word they made use of has so limited a signification? Does the Greek *σκνίψ* or *κνίψ* mean a *gnat*?[d] Let the reader,

[a] Considerable doubt has been entertained by some scholars as to the origin of the word. See the remarks of Gesenius and Fürst.

[b] כָּנַן. But see Gesen. *Thes.* s. v. כָּנַן.

[c] *De Shabb.* cap. 14, fol. 107, 3.

[d] *σκνίψ. Ζῶον χλωρὸν τε καὶ τετράπτερον* and *Κνιφ* (*Κνίφ*). *Ζῶον πτηνὸν, ὅμοιον κώνωπι.* (Hesych. *Lex.* s. v.)

Κνίφ, ζωύφιον, ἡ γενικὴ τοῦ κνιπός.

Κνίπες, ἄμματα τὰ περιβεβρώμενα, καὶ ζωύφια τῶν ξυλοφάγων.

σκνίψ, Ζῶον χλωρὸν τε καὶ τετράπτερον. Ζῶον κωνωπῶδες.

Ζῶον μικρὸν ξυλόφαγον. (Phavorin. s. v.)

ἡ σκνὶψ ἐν χώρᾳ.

Phryn. (Lob.) 400. Plut. ii. 636, D.

Theophrastus (*Hist. Plant.* ii. cap. ult.) speaks of *σκνίπες*, and calls them *worms*. Dioscorides (iii. *de Vino*) speaks of the well-known viscid secretion on the leaves of plants and trees, and says that when this moisture is dried up, animalcules like gnats appear (*θήρδια Κωνωπωειδῆ*). In another place (v. 181) he calls them *σκώληκες*. No doubt plant-lice are meant. Aëtius (ii. 9) speaks of *κνίφες*, by which word he clearly means plant-lice, or *aphides*. Aristophanes associates the *κνίπες* (aphides) with *ψῆνες* (gall-flies), and speaks of them as injuring the young shoots of the vines (*Aves*, 427). Aristotle (*Hist. An.* viii. 3, §9) speaks of a bird, *woodpecker*, which he tells us

however, read carefully the passages quoted in the foot-notes, and he will see at once that at any rate there is very considerable doubt whether *any one* particular animal is denoted by the Greek word. In the few passages where it occurs in Greek authors the word seems to point in some instances clearly enough to the well-known pests of field and garden, the *plant-lice* or *aphides*. By the σκνὶψ ἐν χώρᾳ, the proverb referred to in the note, is very likely meant one of those small active jumping insects, common under leaves and under the bark of trees, known to entomologists by the name of spring-tails (*Poduridae*). The Greek lexicographers, having the derivation of the word in view, generally define it to be some small worm-like creature that eats away wood; if they used the term winged, the winged aphis is most likely intended, and perhaps *vermiculus* may sometimes refer to the wingless individual. Because, however, the lexicons occasionally say that the σκνὶψ is like a *gnat* (the "green and four-winged insect" of Hesychius), many commentators have come to the hasty conclusion that some species of *gnat* is denoted by the Greek term; but resemblance by no means constitutes identity, and it will be seen that this insect, the aphis, even though it be winged, is far more closely allied to the wingless louse (*pediculus*) than it is to the *gnat*, or to any species of the family *Culicidae*; for the term *lice*, as applied to the various kinds of *aphides* (*Phytophthiria*, as is their appropriate scientific name), is by no means merely one of analogy. The wingless aphis is in appearance somewhat similar to the *pediculus*; and indeed a great authority, Burmeister, arranges the *Anoplura*, the order to which the *pediculus* belongs, with the *Rhyncota*, which contains the sub-order *Homoptera*, to which the aphides belong. Hence, by an appropriate transfer, the same word which in Arabic means *pediculus* is applied in one of its significations to the "thistle black with plant-lice." Every one who has observed the thistles of this country black with the peculiar species that infests them can see the force of the meaning assigned to it in the Arabic language.[e]

Again, almost all the passages where the Greek word occurs speak of the animal, be it what it may, as being injurious to plants or trees; it cannot therefore be applied in a restricted sense to any *gnat* (*culex* or *simulium*), for the *Culicidae* are eminently blood-suckers, not vegetable-feeders.[f]

Oedman (*Vermisch. Sammlung.* i. ch. vi.) is of opinion that the species of mosquito denoted by the *chinnâm* is probably some minute kind allied to the *Culex reptans*, *s. pulicaris* of Linnaeus. That such an insect might have been the instrument God made use of in the third plague with which He visited the Egyptians is readily granted, so far as the irritating powers of the creature are concerned, for the members of the genus *Simulium* (sand-fly) are a terrible pest in those localities where they abound. But no proof at all can be brought forward in support of this theory.

Bryant, in illustrating the propriety of the plague being one of lice, has the following very just remarks:—"The Egyptians affected great external purity, and were very nice both in their persons and clothing. . . . Uncommon care was taken not to harbour any vermin. They were particularly solicitous on this head; thinking it would be a great profanation of the temple which they entered if any animalcule of this sort were concealed in their garments." And we learn from Herodotus that so scrupulous were the priests on this point that they used to shave the hair off their heads and bodies every third day for fear of harbouring any *louse* while occupied in their sacred duties (Herod. ii. 37). "We may hence see what an abhorrence the Egyptians showed towards this sort of vermin, and that the judgments inflicted by the hand of Moses were adapted to their prejudices" (Bryant's *Observations*, &c., p. 56).

The evidence of the old versions, adduced by Bochart in support of his opinion, has been called in question by Rosenmüller and Geddes, who will not allow that the words used by the Syriac, the Chaldee, and the Arabic versions, as the representatives of the Hebrew word *chinnâm*, can properly be translated *lice*; but the interpretations which they themselves allow to these words apply better to *lice* than to *gnats*; and it is almost certain that the normal meaning of the words in all these three versions, and indisputably in the Arabic, applies to *lice*. It is readily granted that some of the arguments brought forward by Bochart (*Hieroz.* iii. 457, ed. Rosenm.) and his consentients are unsatisfactory. As the plague was certainly miraculous, nothing can be deduced from the assertion made that the *chinnâm* sprang from the dust; neither is Bochart's derivation of the Hebrew word accepted by scholars generally. Much force however is contained in the Talmudical use of the word *chinnah*, to express a *louse*, though Gesenius asserts that nothing can be adduced thence.

On the whole, therefore, this much appears certain, that those commentators who assert that *chinnâm* means *gnats* have arrived at this conclusion without sufficient authority; they have based their arguments solely on the evidence of the LXX., though it is by no means proved that the Greek word used by these translators has any reference to *gnats*;[g] the Greek word, which probably originally denoted any small irritating creature, being derived

κνιπαλόγοι. Gnats are for the most part taken on the wing; but the κνίπες here alluded to are doubtless the various kinds of *ants*, *larvae*, *aphides*, *lepismidae*, *coccinae*, *oniscidae*, &c. &c., which are found on the leaves and under the bark of trees.

[e] قمل. "Nigricans et quasi pediculis obsitus apparuit cardnus" (Gol. *Arab. Lex.* s. v.).

[f] The mosquito and gnat belong to the family of *Culicidae*. The *Simulium*, to which genus the *Culex reptans* (Lin.) belongs, is comprised under the family *Tipulidae*. This is a northern species, and probably not found in Egypt. The *Simulia*, or sand-flies, are most inveterate blood-suckers, whose bites often give rise to very painful swellings.

Although Origen and Philo both understand by the Greek σκνὶψ some minute winged insect that stings, yet their testimony by no means proves that a similar use of the term was restricted to it by the LXX. translators. It has been shown, from the quotations given above, that the Greek word has a wide signification: it is an *aphis*, a *worm*, a *flea*, or a *spring-tail*—in fact any small insect-like animal that *bites*; and all therefore that should legitimately be deduced from the words of these two writers is that they applied in this instance to some irritating winged insect a term which, from its derivation, so appropriately describes its irritating properties. Their insect seems to refer to some species of *midge* (*Ceratopogon*).

[g] If the LXX. understood *gnats* by the Hebrew

from a root which means to *bite*, to *gnaw*, was used in this general sense, and selected by the LXX. translators to express the original word, which has an origin kindred to that of the Greek word, but the precise meaning of which they did not know. They had in view the derivation of the Hebrew term *chinnâh*, from *chânâh*, "to gnaw," and most appropriately rendered it by the Greek word κνίψ, from κνάω, "to gnaw." It appears therefore that there is not sufficient authority for departing from the translation of the A. V., which renders the Hebrew word by *lice*; and as it is supported by the evidence of many of the old versions, it is best to rest contented with it. At any rate the point is still open, and no hasty conclusion can be adopted concerning it. [W. H.]

LIEUTENANTS (אֲחַשְׁדַּרְפְּנִים). The Hebrew *achashdarpan* was the official title of the satraps[a] or viceroys who governed the provinces of the Persian empire; it is rendered "lieutenant" in Esth. iii. 12, viii. 9, ix. 3; Ezr. viii. 36, and "prince" in Dan. iii. 2, vi. 1, &c. [W. L. B.]

LIGN ALOES. [ALOES.]

LIGURE (לֶשֶׁם, *leshem*: λιγύριον; Ald. δρυγύριον; Alex. διδυνθος: *ligurius*). A precious stone mentioned in Ex. xxviii. 19, xxxix. 12, as the first in the third row of the high-priest's breastplate. "And the third row, a ligure, an agate, and an amethyst." It is impossible to say, with any certainty, what stone is denoted by the Hebrew term. The LXX. version generally, the Vulgate and Josephus (*B. J.* v. 5, §7), understand the *lyncurium* or *ligurium*; but it is a matter of considerable difficulty to identify the *ligurium* of the ancients with any known precious stone. Dr. Woodward and some old commentators have supposed that it was some kind of *belemnite*, because, as these fossils contain bituminous particles, they have thought that they have been able to detect, upon heating or rubbing pieces of them, the absurd origin which Theophrastus (*Frag.* ii. 28, 31, xv. 2, ed. Schneider) and Pliny (*H. N.* xxxvii. iii.) ascribe to the *lyncurium*. Others have imagined that *amber* is denoted by this word; but Theophrastus, in the passage cited above, has given a detailed description of the stone, and clearly distinguishes it from *electron*, or amber. Amber, moreover, is too soft for engraving upon; while the *lyncurium* was a hard stone, out of which seals were made. Another interpretation seeks the origin of the word in the country of Liguria (Genoa), where the stone was found, but makes no attempt at identification. Others again, without reason, suppose the *opal* to be meant (Rosenmüll. *Sch. in Ex.* xxviii. 19). Dr. Watson (*Phil. Trans.* vol. li. p. 394) identifies it with the *tourmaline*. Beckmann (*Hist. Invent.* i. 87, Bohn) believes, with Braun, Epiphanius, and J. de Laet, that the description of the *lyncurium* agrees well with the *hyacinth stone* of modern mineralogists.[b] With this supposition Hill (*Notes on Theophrastus on Stones*, §50, p. 166) and Rosenmüller (*Mineral. of Bible*, p. 36, *Bib. Cab.*) agree. It must be confessed, however, that this opinion is far from satisfactory, for there is the following difficulty in the identification of the *lyncurium* with the *hyacinth*. Theophrastus, speaking of the properties of the *lyncurium*, says that it attracts not only light particles of wood, but fragments of iron and brass. Now there is no peculiar attractive power in the hyacinth; nor is Beckmann's explanation of this point sufficient. He says: "If we consider its (the *lyncurium's*) attracting of small bodies in the same light which our hyacinth has in common with all stones of the glassy species, I cannot see anything to controvert this opinion, and to induce us to believe the *lyncurium* and the *tourmaline* to be the same." But surely the *lyncurium*, whatever it be, had in a marked manner *magnetic properties*; indeed the term was applied to the stone on this very account, for the Greek name *ligurion* appears to be derived from λείχειν, "to lick," "to attract;" and doubtless was selected by the LXX. translators for this reason to express the Hebrew word, which has a similar derivation.[c] More probable, though still inconclusive, appears the opinion of those who identify the *lyncurium* with the *tourmaline*, or more definitely with the red variety known as *rubellite*, which is a hard stone and used as a gem, and sometimes sold for *red sapphire*. *Tourmaline* becomes, as is well known, electrically polar when heated. Beckmann's objection, that "had Theophrastus been acquainted with the *tourmaline*, he would have remarked that it did not acquire its attractive power till it was heated," is answered by his own admission on the passage, quoted from the *Histoire de l'Académie* for 1717, p. 7 (see Beckmann, i. 91).

Tourmaline is a mineral found in many parts of the world. The Duke de Noya purchased two of these stones in Holland, which are there called *aschentrikker*. Linnaeus, in his preface to the *Flora Zeylandica*, mentions the stone under the name of *lapis electricus* from Ceylon. The natives call it *tournamal* (vid. *Phil. Trans.* in loc. cit.). Many of the precious stones which were in the possession of the Israelites during their wanderings were no doubt obtained from the Egyptians, who might have procured from the Tyrian merchants specimens from even India and Ceylon, &c. The fine specimen of *rubellite* now in the British Museum belonged formerly to the King of Ava.

The word *ligure* is unknown in modern mineralogy. Phillips (*Mineral.* 87) mentions *ligurite* the fragments of which are uneven and transparent, with a vitreous lustre. It occurs in a sort of talcose rock in the banks of a river in the Apennines.

The claim of *rubellite* to be the *leshem* of Scripture is very uncertain, but it is perhaps better than that of the other minerals which writers have from time to time endeavoured to identify with it. [W. H.]

term, why did not these translators use some well-known Greek name for *gnat*, as κώνωψ or ἰμπίς?

[a] The LXX. gives σατράπην, στρατηγός, and ὕπαρχος; the Vulgate *satrapes* and *princeps*. Both the Hebrew and the Greek words are modifications of the same Sanscrit root: but philologists are not agreed as to the form or meaning of the word. Gesenius (*Thes.* p. 74) adopts the opinion of Von Bohlen that it comes from *kshatriya-pati*, meaning "warrior of the host." Pott (*Etym. Forsch.* Pref. p. 68) suggests other derivations more in consonance with the position of the satraps as *civil* rather than military rulers.

[b] Büsching. p. 342, from Dutens *Des Pierres precieuses*, p. 61, says "the *hyacinth* is not found in the East." This is incorrect, for it occurs in Egypt, Ceylon, and the East Indies (v. Mineral. and Crystall. Orr's *Circle of Sciences*, 515).

[c] *Thes.* s. v. לֶשֶׁם. Firmt says of לֶשֶׁם, cujus nos fugit origo. Targ. vertit, קַנְכִּירָא, h. e. Gr. κάγκρος, de quo *Smiris* (*Schmirgel*) genere v. Plin. xxxiv. 4.

LIK'HI (לִקְחִי: Λακείμ; Alex. Λακεία: *Lecî*), a Manassite, son of Shemida, the son of Manasseh (1 Chr. vii. 19).

LILY (שׁוֹשַׁן, *shûshân*, שׁוֹשַׁנָּה, *shôshannâh*: κρίνον, Matt. vi. 28, 29). The Hebrew word is rendered "rose" in the Chaldee Targum, and by Maimonides and other rabbinical writers, with the exception of Kimchi and Ben Melech, who in 1 K. vii. 19, translated it by "violet." In the Judaeo-Spanish version of the Canticles, *shûshân* and *shôshannâh* are always translated by *rosa*; but in Hos. xiv. 5 the latter is rendered *lirio*. But κρίνον, or "lily," is the uniform rendering of the LXX., and is in all probability the true one, as it is supported by the analogy of the Arabic and Persian *susan*, which has the same meaning to this day, and by the existence of the same word in Syriac and Coptic. The Spanish *azuçena*, "a white lily," is merely a modification of the Arabic.

But although there is little doubt that the word denotes some plant of the lily species, it is by no means certain what individual of this class it especially designates. Father Souciet (*Recueil de diss. Crit.* 1715) laboured to prove that the lily of Scripture is the "crown-imperial," the Persian *tusal*, the κρίνον βασιλικόν of the Greeks, and the *Fritillaria imperialis* of Linnaeus. So common was this plant in Persia, that it is supposed to have given its name to Susa, the capital (Athen. xii. 1; Bochart, *Phaleg.* ii. 14). But there is no proof that it was at any time common in Palestine, and "*the* lily" *par excellence* of Persia would not of necessity be "the lily" of the Holy Land. Dioscorides (i. 62) bears witness to the beauty of the lilies of Syria and Pisidia, from which the best perfume was made. He says (iii. 106 [116]) of the κρίνον βασιλικόν that the Syrians call it σασᾶ (= *shushan*), and the Africans ἀβίβλαβον, which Bochart renders in Hebrew characters אביב לבן "white shoot." Kühn, in his note on the passage, identifies the plant in question with the *Lilium candidum* of Linnaeus. It is probably the same as that called in the Mishna "king's lily" (*Kilaim*, v. 8). Pliny (xxi. 5) defines κρίνον as "rubens lilium;" and Dioscorides, in another passage, mentions the fact that there are lilies with purple flowers; but whether by this he intended the *Lilium Martagon* or *Chalcedonicum*, Kühn leaves undecided. Now in the passage of Athenaeus above quoted it is said, Ἴουσον γὰρ εἶναι τῇ Ἑλλήνων φωνῇ τὸ κρίνον. But in the *Etymologicum Magnum* (s. v. Ἴουσα) we find τὰ γὰρ λείρια ὑπὸ τῶν φοινίκων σοῦσα λέγεται. As the *shushan* is thus identified both with κρίνον, the red or purple lily, and with λείριον, the white lily, it is evidently impossible from the word itself to ascertain exactly the kind of lily which is referred to. If the *shushan* or *shoshannah* of the O. T. and the κρίνον of the Sermon on the Mount be identical, which there seems no reason to doubt, the plant designated by these terms must have been a conspicuous object on the shores of the Lake of Gennesaret (Matt. vi. 28; Luke xii. 27); it must have flourished in the deep broad valleys of Palestine (Cant. ii. 1), among thorny shrubs (*ib.* ii. 2) and pastures of the dea (*ib.* ii. 16, iv. 5, vi. 3), and must have been markable for its rapid and luxuriant growth (H xiv. 5; Ecclus. xxxix. 14). That its flowers w brilliant in colour would seem to be indicated Matt. vi. 28, where it is compared with the gorge robes of Solomon; and that this colour was scar or purple is implied in Cant. v. 13.[a] There appe to be no species of lily which so completely answ all these requirements as the *Lilium Chalcedonicu* or Scarlet Martagon, which grows in profusion the Levant. But direct evidence on the point still to be desired from the observation of travelle We have, however, a letter from Dr. Bowring, ferred to (*Gard. Chron.* ii. 854), in which, und the name of *Lilia Syriaca*, Lindley identifies wi the *L. Chalcedonicum* a flower which is "abunda in the district of Galilee" in the months of Ap and May. Sprengel (*Ant. Bot. Spec.* i. p. identifies the Greek κρίνον with the *L. Martagon*

Lilium Chalcedonicum.

With regard to the other plants which have been identified with the *shushan*, the difficulties are many and great. Gesenius derives the word from a root signifying "to be white," and it has hence been inferred that the *shushan* is the white lily. But it is by no means certain that the *Lilium candidum* grows wild in Palestine, though a specimen was found by Forskål at Zambak in Arabia Felix.[b] Dr. Royle (Kitto's *Cyclop.* art. "Shushan") identified the "lily" of the Canticles with the *lotus* of Egypt, in spite of the many allusions to "feeling among the lilies." The purple flowers of the *khoh*, or wild artichoke, which abounds in the plain north of Tabor and in the valley of Esdraelon, have been thought by some to be the "lilies of the field" alluded to in Matt. vi. 28 (Wilson, *Lands of the Bible*, ii. 110). A recent traveller mentions a plant, with lilac flowers like the hyacinth, and called by the Arabs *usweih*, which he considered to be of the especial mention of the *L. candidum* growing in Palestine; and in connexion with the habitat given by Strand it is worth observing that the lily is mentioned (Cant. ii. 1) with the rose of *Sharon*. Now let this be compared with Jerome's *Comment. ad Is.* xxxiii. 9: "Saron omnis juxta *Joppen* Lyddamque appellatur regio in qua latissimi campi fertilesque tenduntur." [W. H.]

[a] According to another opinion, the allusion in this verse is to the fragrance and not the colour of the lily, and, if so, the passage is favourable to the claims of the *L. candidum*, which is highly fragrant, while the *L. Chalcedonicum* is almost destitute of odour. The lily of the N. T. may still be the latter.

[b] But Strand (*Flor. Palaest.*) mentions it as growing near Joppa, and Kitto (*Phys. Hist. of Pal.* 219) makes

species denominated lily in Scripture (Bonar, *Desert of Sinai*, p. 329). Lynch enumerates the "lily" as among the plants seen by him on the shores of the Dead Sea, but gives no details which could lead to its identification (*Exped. to Jordan*, p. 286). He had previously observed the water-lily on the Jordan (p. 173), but omits to mention whether it was the yellow (*Nuphar lutea*) or the white (*Nymphæa alba*). "The only 'lilies' which I saw in

Lilium candidum.

Palestine," says Prof. Stanley, "in the months of March and April, were large yellow water-lilies, in the clear spring of 'Ain Mellahah, near the Lake of Merom" (*S. & P.* p. 429). He suggests that the name "lily" "may include the numerous flowers of the tulip or amaryllis kind, which appear in the early summer, or the autumn of Palestine." The following description of the Hûleh-lily by Dr. Thomson (*The Land and the Book*, i. 394), were it more precise, would perhaps have enabled botanists to identify it: "This Hûleh-lily is very large, and the three inner petals meet above and form a gorgeous canopy, such as art never approached, and king never sat under, even in his utmost glory. We call it Hûleh-lily, because it was here that it was first discovered. Its botanical name, if it have one, I am unacquainted with. Our flower delights most in the valleys, but is also found on the mountains. It grows among thorns, and I have sadly lacerated my hands in extricating it from them. Nothing can be in higher contrast than the luxuriant velvety softness of this lily, and the crabbed tangled hedge of thorns about it. Gazelles still delight to feed among them; and you can scarcely ride through the woods north of Tabor, where these lilies abound, without frightening them from their flowery pasture." If some future traveller would give a description of the Hûleh-lily somewhat less vague than the above, the question might be at once resolved. [FLOWERS, Appendix A.]

The Phœnician architects of Solomon's temple decorated the capitals of the columns with "lily-work," that is, with leaves and flowers of the lily (1 K. vii. 1, corresponding to the lotus-headed capitals of Egyptian architecture. The rim of the "brazen sea" was possibly wrought in the form of the recurved margin of a lily flower (1 K. vii. 26). Whether the *shôshannah* and *shushan* mentioned in the titles of Ps. xlv., lx., lxix., and lxxx. were musical instruments in the form of lilies, or whether the word denote a musical air, will be discussed under the article SHOSHANNIM. [W. A. W.]

LIME (שִׂיד: *κονία*: *calx*). This substance is noticed only three times in the Bible, viz., in Deut. xxvii. 2, 4, where it is ordered to be laid on the great stones whereon the law was to be written (A. V. "thou shalt plaister them with plaister"); in Is. xxxiii. 12, where the "burnings of lime" are figuratively used to express *complete destruction*; and in Am. ii. 1, where the prophet describes the outrage committed on the memory of the king of Edom by the Moabites, when they took his bones and burned them *into lime*, i. e. calcined them—an indignity of which we have another instance in 2 K. xxiii. 16. That the Jews were acquainted with the use of the lime-kiln, has been already noticed. [FURNACE.] [W. L. B.]

LINEN. Five different Hebrew words are thus rendered, and it is difficult to assign to each its precise significance. With regard to the Greek words so translated in the N. T. there is less ambiguity.

1. As Egypt was the great centre of the linen manufacture of antiquity, it is in connexion with that country that we find the first allusion to it in the Bible. Joseph, when promoted to the dignity of ruler of the land of Egypt, was arrayed "in vestures of *fine linen*" (*shêsh*,[a] marg. "silk," Gen. xli. 42), and among the offerings for the tabernacle of the things which the Israelites had brought out of Egypt were "blue, and purple, and scarlet, and *fine linen*" (Ex. xxv. 4, xxxv. 6). Of twisted threads of this material were composed the ten embroidered hangings of the tabernacle (Ex. xxvi. 1), the vail which separated the holy place from the holy of holies (Ex. xxvi. 31), and the curtain for the entrance (ver. 36), wrought with needlework. The ephod of the high-priest, with its "curious," or embroidered girdle, and the breastplate of judgment, were of "*fine* twined *linen*" (Ex. xxviii. 6, 8, 15). Of fine linen woven in checker-work were made the high-priest's tunic and mitre (Ex. xxviii. 39). The tunics, turbans, and drawers of the inferior priests (Ex. xxxix. 27, 28) are simply described as of woven work of fine linen.

2. But in Ex. xxviii. 42, and Lev. vi. 10, the drawers of the priests and their flowing robes are said to be of *linen* (*bad*[b]), and the tunic of the high-priest, his girdle, and mitre, which he wore on the day of atonement, were made of the same material (Lev. xvi. 4). Cunæus (*De Rep. Hebr.* ii. c. i.) maintained that the robes worn by the high-priest throughout the year, which are called by the Talmudists "the golden vestments," were thus named because they were made of a more valuable kind of linen (*shêsh*) than that of which "the white vestments," worn only on the day of atonement, were composed (*bad*). But in the Mishna (*Cod. Joma*, iii. 7) it is said that the dress worn by the high-priest on the morning of the day of atonement was of linen of Pelusium, that is, of the finest description. In the evening of the same day he wore garments of Indian linen, which was less costly than the Egyptian. From a comparison of Ex. xxviii. 42 with xxxix. 28 it seems clear that *bad* and *shêsh* were synonymous, or, if there be any difference between them, the latter probably de

[a] שֵׁשׁ, or שֵׁשׁ, as in Ex. xvi. 13. [b] בַּד.

notes the spun threads, while the former is the linen woven from them. Maimonides (*Cele hammikdash*, c. 8) considered them as identical with regard to the material of which they were composed, for he says, "wherever in the Law *bad* or *shêsh* are mentioned, they signify flax, that is, *byssus*." And Abarbanel (on Ex. xxv.) defines *shêsh* to be Egyptian flax, and distinguishes it as composed of *six* (Heb. *shêsh*, "six") threads twisted together, from *bad*, which was single. But in opposition to this may be quoted Ex. xxxix. 28, where the drawers of the priests are said to be *linen* (*bad*) of *fine* twined *linen* (*shêsh*). The wise-hearted among the women of the congregation spun the flax which was used by Bezaleel and Aholiab for the hangings of the tabernacle (Ex. xxxv. 25), and the making of linen was one of the occupations of women, of whose dress it formed a conspicuous part (Prov. xxxi. 22, A. V. "silk;" Ex. xvi. 10, 13; comp. Rev. xviii. 16). In Ex. xxvii. 7 *shêsh* is enumerated among the products of Egypt, which the Tyrians imported and used for the sails of their ships; and the vessel constructed for Ptolemy Philopator is said by Athenaeus to have had a sail of *byssus* (*βύσσινον ἔχων ἱστίον*, *Deipn.* i. 27 F). Hermippus (quoted by Athenaeus) describes Egypt as the great emporium for sails:—

ἐκ δ' Αἰγύπτου τὰ κρεμαστὰ
ἱστία καὶ βύβλους.

Cleopatra's galley at the battle of Actium had a sail of purple canvas (Plin. xix. 5). The ephods worn by the priests (1 Sam. xxii. 18), by Samuel, though he was a Levite (1 Sam. ii. 18), and by David when he danced before the ark (2 Sam. vi. 14; 1 Chr. xv. 27), were all of linen (*bad*). The man whom Daniel saw in vision by the river Hiddekel was clothed in linen (*bad*, Dan. x. 5, xii. 6, 7; comp. Matt. xxviii. 3). In no case is *bad* used for other than a dress worn in religious ceremonies, though the other terms rendered "linen" are applied to the ordinary dress of women and persons in high rank.

3. *Buts*,[c] always translated "fine linen," except 2 Chr. v. 12, is apparently a late word, and probably the same with the Greek *βύσσος*, by which it is represented by the LXX. It was used for the dresses of the Levite choir in the temple (2 Chr. v. 12), for the loose upper garment worn by kings over the close-fitting tunic (1 Chr. xv. 27), and for the vail of the temple, embroidered by the skill of the Tyrian artificers (2 Chr. iii. 14). Mordecai was arrayed in robes of *fine linen* (*bûts*) and purple (Esth. viii. 15) when honoured by the Persian king, and the dress of the rich man in the parable was purple and *fine linen* (*βύσσος*, Luke xvi. 19). The Tyrians were celebrated for their skill in linen-embroidery (2 Chr. ii. 14), and the house of Ashbea, a family of the descendants of Shelah the son of Judah, were workers in fine linen, probably in the lowland country (1 Chr. iv. 21). Tradition adds that they wove the robes of the kings and priests (Targ. Joseph), and, according to Jarchi, the hangings of the sanctuary. The cords of the canopy over the garden-court of the palace at Shushan were of fine linen (*bûts*, Esth. i. 6). "Purple and broidered work and fine linen" were brought by the Syrians to the market of Tyre (Ez. xxvii. 16). the *bûts* of Syria being distinguished from the *shêsh* of Egypt, mentioned in ver. 7, as being in all probability an Aramaic word, while *shêsh* is referred to an Egyptian original.[d] "Fine linen" (*βύσσος*) with purple and silk are enumerated in Rev. xviii. 12 as among the merchandise of the mystical Babylon; and to the Lamb's wife (xix. 8) it "was granted that she should be arrayed in *fine linen* (*βύσσινον*) clean and white:" the symbolical significance of this vesture being immediately explained, "for the fine linen is the righteousness of saints." And probably with the same intent the armies in heaven, who rode upon white horses and followed the "Faithful and True," were clad in "*fine linen*, white and clean," as they went forth to battle with the beast and his army (Rev. xix. 14).

4. *Êtûn*[e] occurs but once (Prov. vii. 16), and then in connexion with Egypt. Schultens connects it with the Greek *ὀθόνη*, *ὀθόνιον*, which he supposes were derived from it. The Talmudists translate it by חֲבֶל, *chebel*, a cord or rope, in consequence of its identity in form with *ἄτῶν*,[f] which occurs in the Targ. on Josh. ii. 15, and Esth. i. 6. R. Parchon interprets it "a girdle of Egyptian work." But in what way these cords were applied to the decoration of beds is not clear. Probably *êtûn* was a kind of thread made of fine Egyptian flax, and used for ornamenting the coverings of beds with tapestry-work. In support of this may be quoted the *ἀμφιτάποι* of the LXX., and the *pictas tapetes* of the Vulgate, which represent the חֲשֻׁבוֹת אֵטוּן of the Hebrew. But Celsius renders the word "linen," and appeals to the Greek *ὀθόνη*, *ὀθόνιον*, as decisive upon the point. See Jablonski, *Opusc.* i. 72, 73.

Schultens (Prov. vii. 16) suggests that the Greek *σινδών* is derived from the Hebrew *sâdîn*,[g] which is used of the thirty linen garments which Samson promised to his companions (Judg. xiv. 12, 13) at his wedding, and which he stripped from the bodies of the Philistines whom he slew at Ashkelon (ver. 19). It was made by women (Prov. xxxi. 24), and used for girdles and under-garments (Is. iii. 23; comp. Mark xiv. 51). The LXX. in Judg. and Prov. render it *σινδών*, but in Judg. xiv. 13 *ὀθόνια* is used synonymously; just as *σινδών* in Matt. xxvii. 59, Mark xv. 46, and Luke xxiii. 53 is the same as *ὀθόνια* in Luke xxiv. 12; John xx. 5, 6, xix. 40. In these passages it is seen that linen was used for the winding-sheets of the dead by the Hebrews as well as by the Greeks (Hom. *Il.* xviii. 353, xxiii. 254; comp. Eur. *Bacch.* 819). Towels were made of it (*λέντιον*, John xiii. 4, 5), and napkins (*σουδάρια*, John xi. 44), like the coarse linen of the Egyptians. The dress of the poor (Ecclus. xl. 4) was probably unbleached flax (*ὀμόλινον*), such as was used for barbers' towels (Plut. *De Garrul.*).

The general term which included all those already mentioned was *pishtch*,[h] corresponding to the Greek *λίνον*, which was employed—like our "cotton"—to denote not only the flax (Judg. xv. 14) or raw material from which the linen was made, but also the

[a] בּוּץ, *βύσσος*, *byssus*.

[b] In Gen. xli. 42, the Targum of Onkelos gives בּוּץ as the equivalent of שֵׁשׁ. See also Ex. xxv. 4, xxxv. 35.

[c] אֵטוּן.

[d] אֵטוּן, Veneto-Gr. σχοινος.

[e] חֲדִין. Jablonski (*Opusc.* i. 297, &c.) claims for the word an Egyptian origin. The Coptic ahente is the representative of *σινδών* in the N. T.

[f] פִּשְׁתָּה.

shut itself (Josh. ii. 6), and the manufacture from it. It is generally opposed to wool, as a vegetable product to an animal (Lev. xiii. 47, 48, 52, 59; Deut. xxii. 11; Prov. xxxi. 13; Hos. ii. 5, 9), and was used for nets (Is. xix. 9), girdles (Jer. xiii. 1), and measuring-lines (Ez. xl. 3), as well as for the dress of the priests (Ez. xliv. 17, 18). From a comparison of the last-quoted passages with Ex. xxviii. 42, and Lev. vi. 10 (3), xvi. 4, 23, it is evident that *bad* and *pishtch* denote the same material, the latter being the more general term. It is equally apparent, from a comparison of Rev. xv. 6 with xix. 8, 14, that λίνον and βύσσινον are essentially the same. Mr. Yates (*Textrinum Antiquorum*, p. 276) contends that λίνον denotes the common flax, and βύσσος the finer variety, and that in this sense the terms are used by Pausanias (vi. 26, §4). Till the time of Dr. Forster it was never doubted that byssus was a kind of flax, but it was maintained by him to be cotton. That the mummy-cloths used by the Egyptians were cotton and not linen was first asserted by Rouelle (*Mem. de l'Acad. Roy. des Scien.* 1750), and he was supported in his opinion by Dr. Forster and Dr. Solander, after an examination of the mummies in the British Museum. But a more careful scrutiny by Mr. Bauer of about 400 specimens of mummy-cloth has shown that they were universally linen. He (Dr.) arrived independently at the same conclusion (Yates, *Textr. Ant.* b. ii.).

One word remains to be noticed, which our A. V. has translated "linen yarn" (1 K. x. 28; 2 Chr. i. 16), brought out of Egypt by Solomon's merchants. The Hebrew *mikveh*,[1] or *miknéh*,[2] is variously explained. In the LXX. of 1 Kings it appears as a proper name, Θεκουέ, and in the Vulgate *Coa*, a place in Arabia Felix. By the Syriac (2 Chr.) and Arabic translators it was also regarded as the name of a place. Bochart once referred it to Troglodyte Egypt, anciently called *Michoe*, according to Pliny (vi. 34), but afterwards decided that it signified "a tax" (*Hieroz.* pt. 1, b. 2, c. 9). To these Michaelis adds a conjecture of his own, that *Ku* in the interior of Africa, S.W. of Egypt, might be the place referred to, as the country whence Egypt procured its horses (*Laws of Moses*, trans. Smith, ii. 493). In translating the word "*linen* yarn" the A. V. followed Junius and Tremellius, who are supported by Sebastian Schmid, De Dieu, and Clericus. Gesenius has recourse to a very unnatural construction, and, rendering the word "troop," refers it in the first clause to the king's merchants, and in the second to the horses which they brought.

From time immemorial Egypt was celebrated for its linen (Ez. xxvii. 7). It was the dress of the Egyptian priests (Her. ii. 37, 81), and was worn by them, according to Plutarch (*Is. et Osir.* 4), because the colour of the flax-blossom resembled that of the circumambient ether (comp. Juv. vi. 532, of the priests of Isis). Panopolis or Chemmis (the modern *Akhmim*) was anciently inhabited by linen-weavers (Strabo, xvii. 41, p. 813). According to Herodotus (ii. 86) the mummy-cloths were of linen; and Josephus (*Ant.* iii. 6, §1) mentions among the contributions of the Israelites for the tabernacle, "*byssus* of flax;" the hangings of the tabernacle were "sindon of *byssus*" (§2), of which material the tunics of the priests were also made (*Ant.* iii. 7, §2), the drawers being of *byssus* (§1). Philo also says that the high-priest wore a garment of the finest *byssus*. Combining the testimony of Herodotus as to the mummy-cloths with the results of microscopic examination, it seems clear that *byssus* was linen, and not cotton; and moreover, that the dresses of the Jewish priests were made of the same, the purest of all materials. For further information see Dr. Kalisch's *Comm. on Exodus*, pp. 487-489; also article WOOLLEN. [W. A. W.]

[1] מִקְוֵה, 1 Kings. [2] מִקְנֵה, 2 Chron.

LINTEL. The beam which forms the upper part of the framework of a door. In the A. V. "lintel" is the rendering of three Hebrew words.

1. אַיִל, *ayil* (1 K. vi. 31); translated "post" throughout Ez. xl., xli. The true meaning of this word is extremely doubtful. In the LXX. it is left untranslated (αἰλ, αἰλεῦ, αἰλάμ); and in the Chaldee version it is represented by a modification of itself. Throughout the passages of Ezekiel in which it occurs the Vulg. uniformly renders it by *frons*; which Gesenius quotes as favourable to his own view, provided that by *frons* be understood the projections in front of the building. The A. V. of 1 K. vi. 31, "lintel," is supported by the versions of Aquila, Symmachus, and Theodotion of Ez. xl. 21; while Kimchi explains it generally by "post." The Peshito-Syriac uniformly renders the word by a modification of the Greek παραστάδες, "pillars." Jarchi understands by *ayil* a round column like a large tree; Aquila (Ez. xl. 14), having in view the meaning "ram," which the word elsewhere bears, renders it κρίωμα, apparently intending thereby to denote the volutes of columns, curved like rams' horns. J. D. Michaelis (*Supp. ad Lex.* s. v.) considers it to be the tympanum or triangular area of the pediment above a gate, supported by columns. Gesenius himself, after reviewing the passages in which the word occurs, arrives at the conclusion that in the singular it denotes the whole projecting framework of a door or gateway, including the jambs on either side, the threshold, and the lintel or architrave, with frieze and cornice. In the plural it is applied to denote the projections along the front of an edifice ornamented with columns or palm-tetes, and with recesses or intercolumniations between them sometimes filled up by windows. Under the former head he places 1 K. vi. 31; Ez. xl. 9, 21, 24, 26, 29, 31, 33, 34, 36-38, 48, 49, xli. 3; while to the latter he refers xl. 10, 14, 16, xli. 1. Another explanation still is that of Boettcher (quoted by Winer, *Realw.* ii. 575), who says that *ayil* is the projecting entrance- and passage-wall—which might appropriately be divided into compartments by panelling; and this view is adopted by Fürst (*Handw.* s. v.).

2. כַּפְתֹּר, *caphtôr* (Amos ix. 1; Zeph. ii. 14). The marginal rendering, "chapiter or knop," of both these passages is undoubtedly the more correct, and in all other cases where the word occurs it is translated "knop." [KNOP.]

3. מְשֻׁקֹּף, *mashkôph* (Ex. xii. 22, 23); also rendered "upper door-post" in Ex. xii. 7. That this is the true rendering is admitted by all modern philologists, who connect it with a root which in Arabic and the cognate dialects signifies "to overlay with beams." The LXX. and Vulgate coincide in assigning to it the same meaning. Rabbi Sol. Jarchi derives it from a Chaldee root signifying "to beat," because the door in being shut beats

against it. The signification "to look" or "peep," which was acquired by the Hebrew root, induced Aben Ezra to translate *mashkôph* by "window," such as the Arabs have over the doors of their houses; and in assenting to this rendering, Bochart observes "that it was so called on account of the grates and railings over the tops of the doors, through which those who desire entrance into the house could be seen before they were admitted" (Kalisch, *Exodus*). An illustration of one of these windows is given in the art. HOUSE, vol. i. p. 837 *a*. [W. A. W.]

LI'NUS (Λῖνος), a Christian at Rome, known to St. Paul and to Timothy (2 Tim. iv. 21). That the first bishop of Rome after the apostles was named Linus is a statement in which all ancient writers agree (*e. g.* Jerome, *De Viris Illustr.* 15; August. *Ep.* liii. 2). The early and unequivocal assertion of Irenaeus (iii. 3, §3), corroborated by Eusebius (*H. E.* iii. 2) and Theodoret, (*in* 2 Tim. iv. 21), is sufficient to prove the identity of the bishop with St. Paul's friend.

The date of his appointment, the duration of his episcopate, and the limits to which his episcopal authority extended, are points which cannot be regarded as absolutely settled, although they have been discussed at great length. Eusebius and Theodoret, followed by Baronius and Tillemont (*Hist. Eccl.* ii. 165 and 591), state that he became bishop of Rome after the death of St. Peter. On the other hand, the words of Irenaeus—"[Peter and Paul] when they founded and built up the church [of Rome] committed the office of its episcopate to Linus"—certainly admit, or rather imply the meaning, that he held that office before the death of St. Peter: as if the two great apostles, having, in the discharge of their own peculiar office, completed the organisation of the church at Rome, left it under the government of Linus, and passed on to preach and teach in some new region. This proceeding would be in accordance with the practice of the apostles in other places. And the earlier appointment of Linus is asserted as a fact by Ruffinus (*Praef. in Clem. Recogn.*), and by the author of ch. xlvi. bk. vii. of the *Apostolic Constitutions*. It is accepted as the true statement of the case by Bishop Pearson (*De Serie et Successione Priorum Romae Episcoporum*, ii. 5, §1) and by Fleury (*Hist. Eccl.* ii. 26). Some persons have objected that the undistinguished mention of the name of Linus between the names of two other Roman Christians in 2 Tim. iv. 21, is a proof that he was not at that time bishop of Rome. But even Tillemont admits that such a way of introducing the bishop's name is in accordance with the simplicity of that early age. No lofty pre-eminence was attributed to the episcopal office in the apostolic times.

The arguments by which the exact years of his episcopate are laid down are too long and minute to be recited here. Its duration is given by Eusebius (whose *H. E.* iii. 16 and *Chronicon* give in-

consistent evidence) as A.D. 68–8 who however reproaches Pearson from the chronology of Eusebiu Baronius as 67-78; and by Pe Pearson, in the treatise already gives weighty reasons for distrustin of Eusebius as regards the years of of Rome; and he derives his ow certain very ancient (but interpolate bishops (see i. 13 and ii. 5). This subsequently considered by Barat *cessione Antiquissimâ Episc. Rom.* 1 A.D. 56-67 as the date of the episco

The statement of Ruffinus, that Li were bishops in Rome whilst St. Pe has been quoted in support of a sprang up in the 17th century, rece tion even of Hammond in his con Blondel (*Works*, ed. 1684, iv. 825 *Jura*, v. 1, §11), was held with som fication by Baraterius, and has been rec It is supposed that Linus was bishop of the Christians of Gentile origin, whil time another bishop exercised the sa over the Jewish Christians there. assertion (*De Praescr. Haeret.* §32) t [the third bishop] of Rome was con St. Peter, has been quoted also as c this theory. But it does not follow fro of Tertullian that Clement's consecratio immediately before he became bishop of the statement of Ruffinus, so far as it support to the above-named theory, is a without foundation by Pearson (ii. 3 lemont's observations (p. 590) in repl son only show that the establishment o temporary bishops in one city was conten ancient times as a possible provisional ar to meet certain temporary difficulties. limitation of the authority of Linus to a the church in Rome remains to be proved.

Linus is reckoned by Pseudo-Hippolyt the Greek *Menaea*, among the seventy Various days are stated by different auth the Western Church, and by the Eastern as the day of his death. A narrative of t tyrdom of St. Peter and St. Paul, printe *Bibliotheca Patrum*, and certain pontifical are incorrectly ascribed to Linus. He is have written an account of the dispute St. Peter and Simon Magus. [W.

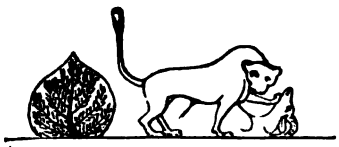
LION. Rabbinical writers discover in th seven names of the lion, which they assign animal at seven periods of its life. 1. גּוּר, *gûr*, a cub (Gen. xlix. 9; Deut. xxxii Jer. li. 38; Nah. ii. 12). 2. כְּפִיר, *cephîr*, a lion (Judg. xiv. 5; Job iv. 10; Ez. xix. 2, 3. אַרְיֵה, *ârî*, or אַרְיוֵה, *aryêh*, a full-grow (Gen. xlix. 9; Judg. xiv. 5, 8, &c.). 4. *shakhal*, a lion more advanced in age and str

[a] Ruffinus' statement ought, doubtless, to be interpreted in accordance with that of his contemporary Epiphanius (*Adv. Haer.* xxvii. 6, p. 107), to the effect that Linus and Cletus were bishops of Rome in succession, not contemporaneously. The facts were, however, differently viewed: (1) by an interpolater of the *Gesta Pontificum Damasi*, quoted by J. Voss in his second epistle to A. Rivet (App. to Pearson's *Vindiciae Ignatianae*); (2) by Bede (*Vita S. Benedicti*, §7, p. 146, ed. Stevenson) when he was seeking a precedent for two contemporar abbots presiding in one monastery; and (3) by Rat Maurus (*De Chorepiscopis*: Opp. ed. Migne, tom. 1197), who ingeniously claims primitive authority fo institution of chorepiscopi on the supposition that L and Cletus were never bishops with full powers, but contemporaneous chorepiscopi employed by St. Pete his absence from Rome, and at his request, to or clergymen for the church at Rome.

(Job iv. 10; Ps. xci. 13, &c.). 5. שַׁחַץ, *shakhats*, a lion in full vigour (Job xxviii. 8). 6. לָבִיא, *lâbî*, or לָבִיָּא, *lebiyyâ*, an old lion (Gen. xlix. 9; Job v. 11, &c.). 7. לַיִשׁ, *laish*, a lion decrepit with age (Job iv. 11; Is. xxx. 6, &c.) Well might Bochart (*Hieroz.* pt. i. b. iii. 1) say, "Hic grammaticè videntur mire sibi indulgere." He differs from this arrangement in every point but the second. In the first place, *gûr* is applied to the young of other animals besides the lion; for instance, the sea monsters in Lam. iv. 3. Secondly, *kephîr* differs from *gûr*, as *juvencus* from *vitulus*. *Ari* or *aryêh* is a generic term, applied to all lions without regard to age. In Judg. xiv. the "young lion" (*kephîr ârâyôth*) of ver. 5 is in ver. 8 called the "lion" (*aryêh*). Bochart is palpably wrong in rendering *shakhal* "a black lion" of the kind which, according to Pliny (viii. 17), was found in Syria. The word is only used in the poetical books, and most probably expresses some attribute of the lion. It is connected with an Arabic root, which signifies "to bray" like an ass, and is therefore simply "the brayer." *Shakhats* does not denote a lion at all. *Labi* is properly a "lioness," and is connected with the Coptic *labai*, which has the same signification. *Laish* (comp. λῑ́ς, Hom. *Il.* iv. 253) is another poetic name. So far from being applied to a lion weak with age, it denotes one in full vigour (Job iv. 11; Prov. xxx. 30). It has been derived from an Arabic root, which signifies "to be strong," and, if this etymology be true, the word would be an epithet of the lion, "the strong one."

At present lions do not exist in Palestine, though they are said to be found in the desert on the road to Egypt (Schwarz, *Desc. of Pal.*: see Is. xxx. 6). They abound on the banks of the Euphrates between Bussorah and Bagdad (Russell, *Aleppo*, p. 61), and in the marshes and jungles near the rivers of Babylonia (Layard, *Nin. & Bab.* p. 506). This species, according to Layard, is without the dark and shaggy mane of the African lion (*id.* 487), though he adds in a note that he had seen lions on the river Karoon with a long dark mane.

But, though lions have now disappeared from Palestine, they must in ancient times have been numerous. The names Lebaoth (Josh. xv. 32), Beth-Lebaoth (Josh. xix. 6), Arieh (2 K. xv. 25), and Laish (Judg. xviii. 7; 1 Sam. xxv. 44) were probably derived from the presence of or connexion with lions, and point to the fact that they were at one time common. They had their lairs in the forests which have vanished with them (Jer. v. 6, xii. 8; Am. iii. 4), in the tangled brushwood (Jer. iv. 7, xxv. 38; Job xxxviii. 40), and in the caves of the mountains (Cant. iv. 8; Ez. xix. 9; Nah. ii. 12). The cane-brake on the banks of the Jordan, the "pride" of the river, was their favourite haunt (Jer. xlix. 19, l. 44; Zech. xi. 3), and in this reedy covert (Lam. iii. 10) they were to be found at a comparatively recent period; as we learn from a passage of Johannes Phocas, who travelled in Palestine towards the end of the 12th century (Reland, *Pal.* i. 274). They abounded in the jungles which skirt the rivers of Mesopotamia (Ammian. Marc. xviii. 7, §5), and in the time of Xenophon (*de Venat.* xi.) were found in Nysa.



Syrian Lion. (From specimen in Zoological Gardens.)

Persian Lion. (From specimen in the Zoological Gardens.)

The lion of Palestine was in all probability the Asiatic variety, described by Aristotle (*H. A.* ix. 44) and Pliny (viii. 18), as distinguished by its short curly mane, and by being shorter and rounder in shape, like the sculptured lion found at Arban (Layard, *Nin. & Bab.* p. 278). It was less daring than the longer maned species, but when driven by hunger it not only ventured to attack the flocks in the desert in presence of the shepherd (Is. xxxi. 4; 1 Sam. xvii. 34), but laid waste towns and villages (2 K. xvii. 25, 26; Prov. xxii. 13, xxvi. 13), and devoured men (1 K. xiii. 24, xx. 36; 2 K. xvii. 25; Ez. xix. 3, 6). The shepherds sometimes ventured to encounter the lion single handed (1 Sam. xvii. 34), and the vivid figure employed by Amos (iii. 12), the herdsman of Tekoa, was but the transcript of a scene which he must have often witnessed. At other times they pursued the animal in large bands, raising loud shouts to intimidate him (Is. xxxi. 4), and drive him into the net or pit they had prepared to catch him (Ez. xix. 4, 8). This method of capturing wild beasts is described by Xenophon (*de Ven.* xi. 4) and by Shaw, who says, "The Arabs dig a pit where they are observed to enter; and, covering it over lightly with reeds or small branches of trees, they frequently decoy and catch them" (*Travels*, 2nd ed. p. 172). Benaiah, one of David's heroic body-guard, had distinguished himself by slaying a lion in his den (2 Sam. xxiii. 20). The kings of Persia had a menagerie of lions (גֻּבִּי, *gôb*, Dan. vi. 7, &c.). When captured alive they were put in a cage (Ez. xix. 9), but it does not appear that they were tamed. In the hunting scenes at Beni-Hassan tame lions are represented as used in hunting (Wilkinson,

Anc. Egypt. iii. 17). On the bas-reliefs at Kouyunjik a lion led by a chain is among the presents brought by the conquered to their victors (Layard, *Nin. & Bab.* p. 138).

Hunting with a lion, which has seized an ibex. (From Wilkinson's *Egyptians*, vol. i. p 221.)

The strength (Judg. xiv. 18; Prov. xxx. 30; 2 Sam. i. 23), courage (2 Sam. xvii. 10; Prov. xxviii. 1; Is. xxxi. 4; Nah. ii. 11), and ferocity (Gen. xlix. 9; Num. xxiv. 9), of the lion were proverbial. The "lion-faced" warriors of Gad were among David's most valiant troops (1 Chr. xii. 8); and the hero Judas Maccabeus is described as "like a lion, and like a lion's whelp roaring for his prey" (1 Macc. iii. 4). The terrible roar of the lion is expressed in Hebrew by four different words, between which the following distinction appears to be maintained:— שָׁאַג, *shâag* (Judg. xiv. 5; Ps. xxii. 13, civ. 21; Am. iii. 4), also used of the thunder (Job xxxvii. 4), denotes the roar of the lion while seeking his prey; נָהַם, *nâham* (Is. v. 29), expresses the cry which he utters when he seizes his victim; הָגָה, *hâgâh* (Is. xxxi. 4), the growl with which he defies any attempt to snatch the prey from his teeth; while נָעַר, *nâ'ar* (Jer. li. 38), which in Syriac is applied to the braying of the ass and camel, is descriptive of the cry of the young lions. If this distinction be correct the meaning attached to *nâham* will give force to Prov. xix. 12. The terms which describe the movements of the animal are equally distinct:— רָבַץ, *râbats* (Gen. xlix. 9; Ex. xix. 2), is applied to the crouching of the lion, as well as of any wild beast, in his lair; שָׁחָה, יָשַׁב, *shâchâh*, *yâshab* (Job xxxviii. 40), and אָרַב, *ârab* (Ps. x. 9), to his lying in wait in his den, the two former denoting the position of the animal, and the latter the secrecy of the act; רָמַשׂ, *râmas* (Ps. civ. 20), is used of the stealthy creeping of the lion after his prey; and זָנַק, *zinnâk* (Deut. xxxiii. 22) of the leap with which he hurls himself upon it.

The lion was the symbol of strength and sovereignty, as in the human-headed figures of the Nimroud gateway, the symbols of Nergal, the Assyrian Mars, and tutelary god of Babylon. In Egypt it was worshipped at the city of Leontopolis, as typical of Dom, the Egyptian Hercules (Wilkinson, *Anc. Egypt.* v. 169). Plutarch (*de Isid.* §38) says that the Egyptians ornamented their temples with gaping lions' mouths, because the Nile began to rise when the sun was in the constellation Leo. Among the Hebrews, and throughout the O. T., the lion was the achievement of the princely tribe of Judah, while in the closing book of the canon it received a deeper significance as the emblem of him who "prevailed to open the book and loose the seven seals thereof" (Rev. v. 5). On the other hand its fierceness and cruelty rendered it an appropriate metaphor for a fierce and malignant enemy (Ps. vii. 2, xxii. 21, lvii. 4; 2 Tim. iv. 17), and hence for the arch-fiend himself (1 Pet. v. 8).

The figure of the lion was employed as an ornament both in architecture and sculpture. On each of the six steps leading up to the great ivory throne of Solomon stood two lions on either side, carved by the workmen of Hiram, and two others were beside the arms of the throne (1 K. x. 19, 20). The great brazen laver was in like manner adorned with cherubim, lions, and palm-trees in graven work (1 K. vii. 29, 36). [W. A. W.]

LIZ'ARD (לְטָאָה, *letââh*: Vat. and Alex. χαλαβώτης; Compl. ἀσχαλαβώτης; Ald. καλαβώτης: *stellio*). The Hebrew word, which with its English rendering occurs only in Lev. xi. 30, appears to be correctly translated by the A. V. Some species of *lizard* is mentioned amongst those "creeping things that creep upon the earth" which were to be considered unclean by the Israelites.

Lizards of various kinds abound in Egypt, Palestine, and Arabia; some of these are mentioned in the Bible under various Hebrew names, notices of which will be found under other articles. [FERRET; SNAIL.] All the old versions agree in identifying the *letââh* with some *saurian*, and some concur as to the particular genus indicated. The LXX., the Vulg., the Targ. of Jonathan,[a] with the Arabic versions, understand a lizard by the Hebrew word. The Syriac has a word which is generally translated *salamander*, but probably this name was applied also to the *lizard*. The Greek word, with its slight variations, which the LXX. use to express the *letââh*, appears from what may be gathered from Aristotle,[b] and perhaps also from its derivation,[c] to point to some lizard belonging to the *Geckotidae*.

Foot of Gecko.

Many members of this family of *Sauria* are characterised by a peculiar lamellated structure on the under surface of the toes, by means of which they are enabled to run over the smoothest surfaces, and

[a] שְׁמִטִּיתָא; "stellio, reptile immundum."

[b] The following are the references to the Greek word ἀσκαλαβώτης in Aristot. *de Anim. Hist.* (ed. Schneider), iv. 11, §2; viii. 17, §1; viii. 19, §2; viii. 28, §2; ix. 2, §5; ix. 10, §2. That Aristotle understands some species of Gecko by the Greek word is clear; for he says of the woodpecker, πορεύεται ἐπὶ τοῖς δένδρεσι ταχέως καὶ ἅνισος, καθάπερ οἱ ἀσκαλαβῶται (ix. 10, §2). He alludes also to a species in Italy, perhaps the *Homidactylus verrucatus*, whose bite, he says, is fatal (?).

[c] Ἀσκαλαβώτης, Σαύρίου εἶδός σαύρᾳ ἐν τοῖς τοίχοις ἀνέρπον τῶν οἰκημάτων. This seems to identify it with one of the *Geckotidae*: perhaps the *Tarentola* was best known to the Greeks. The *noiseless* (ψοφώσης) and *ill times*, *fixed* habits of this lizard are referred to below (See Galen. *Etym. Mag.*)

ous in an inverted position, like house-flies on a ceiling. Mr. Broderip observes that they can remain suspended beneath the large leaves of the tropical vegetation, and remain for hours in positions as extraordinary as the insects for which they watch; the wonderful apparatus with which their feet are furnished enabling them to overcome gravity. Now the Hebrew *letâdâh* appears to be derived from a root which, though not extant in that language, is found in its sister-tongue the Arabic: this root means *to adhere to the ground*,[d] an expression which well agrees with the peculiar sucker-like properties of the feet of the Geckos. Bochart has successfully argued that the lizard denoted by the Hebrew word is that kind which the Arabs call wabara, the translation of which term is thus given by Golius: "An animal like a lizard, of a red colour, and adhering to the ground, *cibo potuive venenum inspirat quemcunque contigerit*." This description will be found to agree with the character of the Fan-Foot Lizard (*Ptyodactylus Gecko*), which is

The Fan-Foot. (*Ptyodactylus Gecko.*)

common in Egypt and in parts of Arabia, and perhaps is also found in Palestine. It is reddish brown, spotted with white.[e] Hasselquist thus speaks of it: "The poison of this animal is very singular, as it exhales from the *lobuli* of the toes. At Cairo I had an opportunity of observing how acrid the exhalations of the toes of this animal are. As it ran over the hand of a man who was endeavouring to catch it, there immediately rose little red pustules over all those parts which the animal had touched" (*Voyages*, p. 220). Forskâl (*Descr. Anim.* 13) says that the Egyptians call this lizard *Abu burs*, "father of leprosy," in allusion to the leprous sores which contact with it produces; and to this day the same term is used by the Arabs to denote a lizard, probably of this same species.[f] The Geckos live on insects and worms, which they swallow whole. They derive their name from the peculiar sound which some of the species utter. This sound has been described as being similar to the double click often used in riding; they make it by some movement of the tongue against the palate. The *Geckotidae* are nocturnal in their habits, and frequent houses, cracks in rocks, &c. They move very rapidly, and without making the slightest sound; hence probably the derivation of the Greek word for this lizard. They are found in all parts of the world; in the greatest abundance in warm climates. It is no doubt owing to their repulsive appearance that they have the character of being highly venomous, just as the unscientific in England attach similar properties to *toads*, *newts*, *blind worms*, &c. &c., although these creatures are perfectly harmless. At the same time it must be admitted that there may be species of lizards which do secrete a venomous fluid, the effects of which are no doubt aggravated by the heat of the climate, the unhealthy condition of the subject, or other causes. The Geckos belong to the sub-order *Pachyglossa*, order *Saura*. They are oviparous, producing a round egg, with a hard calcareous shell. [W. H.]

[d] See Gesen. (*Thes.* s. v.). A similar root has the force of "sliding;" to which case the word will refer to the lizard's habit of frequenting holes in walls, &c.

[e] The Gr. ἀσπαλαβάτης, and perhaps Lat. *stellio*, probably the genus, the red colour the species.

[f] أبو بريص *abu burays*, Lizard. (Catafago, *Arab. Lex.*)

LO-AM'MI (לֹא עַמִּי: *οὐ λαός μου*: *non populus meus*), *i. e.* "not my people," the figurative name given by the prophet Hosea to his second son by Gomer, the daughter of Diblaim (Hos. i. 9), to denote the rejection of the kingdom of Israel by Jehovah. Its significance is explained in ver. 9, 10.

LOAN. The law of Moses did not contemplate any raising of loans for the purpose of obtaining capital, a condition perhaps alluded to in the parables of the "pearl" and "hidden treasure" (Matt. xiii. 44, 45; Michaelis, *Comm. on Laws of Moses*, art. 147, ii. 297, ed. Smith). [COMMERCE.] Such persons as bankers and sureties, in the commercial sense (Prov. xxii. 26; Neh. v. 3), were unknown to the earlier ages of the Hebrew commonwealth. The Law strictly forbade any interest to be taken for a loan to any poor person, either in the shape of money or of produce, and at first, as it seems, even in the case of a foreigner; but this prohibition was afterwards limited to Hebrews only, from whom, of whatever rank, not only was no usury on any pretence to be exacted, but relief to the poor by way of loan was enjoined, and excuses for evading this duty were forbidden (Ex. xxii. 25; Lev. xxv. 35, 37; Deut. xv. 3, 7-10, xxiii. 19, 20). The instances of extortionate conduct mentioned with disapprobation in the book of Job probably represent a state of things previous to the Law, and such as the Law was intended to remedy (Job xxii. 6, xxiv. 3, 7). As commerce increased, the practice of usury, and so also of suretiship, grew up; but the exaction of it from a Hebrew appears to have been regarded to a late period as discreditable (Prov. vi. 1, 4, xi. 15, xvii. 18, xx. 16, xxii. 26; Ps. xv. 5, xxvii. 13; Jer. xv. 10; Ez. xviii. 13, xxii. 12). Systematic breach of the law in this respect was corrected by Nehemiah after the return from captivity (see No. 6) (Neh. v. 1, 13; Michaelis, *ib.*, arts. 148, 151). In later times the practice of borrowing money appears to have prevailed without limitation of race, and to have been carried on on systematic principles, though the original spirit of the Law was approved by our Lord (Matt. v. 42, xxv. 27; Luke vi. 35, xix. 23). The money-changers (κερματισταί, and κολλυβισταί), who had seats and tables in the Temple were traders whose profits arose chiefly from the exchange of money with those who came to pay their annual half-shekel (Pollux, iii. 84, vii. 170 Schleusner, *Lex. N. T. s. v.*; Lightfoot, *Hor. Hebr.*; Matt. xxi. 12). The documents relating to loans of money appear to have been deposited in public offices in Jerusalem (Joseph. *B. J.* ii. 17, §6).

In making loans no prohibition is pronounced in the Law against taking a pledge of the borrower, but certain limitations are prescribed in favour of the poor.

1. The outer garment, which formed the poor man's principal covering by night as well as by day, if taken in pledge, was to be returned before sunset. A bedstead, however, might be taken (Ex. xxii. 26, 27; Deut. xxiv. 12, 13: comp. Job xxii. 6; Prov. xxii. 27; Shaw, *Trav.* 224; Burckhardt, *Notes on Bed.* i. 47, 231; Niebuhr, *Descr. de l'Ar.* 56; Lane, *Mod. Eg.* i. 57, 58; Ges. *Thes.* 403; Michaelis, *Laws of Moses*, arts. 143 and 150).

2. The prohibition was absolute in the case of (*a*) the widow's garment (Deut. xxiv. 17), and (*b*) a millstone of either kind (Deut. xxiv. 6). Michaelis (art. 150, ii. 321) supposes also all indispensable animals and utensils of agriculture; see also Mishna, *Maaser Sheni*, i.

3. A creditor was forbidden to enter a house to reclaim a pledge, but was to stand outside till the borrower should come forth to return it (Deut. xxiv. 10, 11).

4. The original Roman law of debt permitted the debtor to be enslaved by his creditor until the debt was discharged; and he might even be put to death by him, though this extremity does not appear to have been ever practised (Gell. xx. 1, 45, 52; *Dict. of Antiq.* "Bonorum Cessio," "Nexum"). The Jewish law, as it did not forbid temporary bondage in the case of debtors, so it forbade a Hebrew debtor to be detained as a bondsman longer than the 7th year, or at farthest the year of Jubilee (Ex. xxi. 2; Lev. xxv. 39, 42; Deut. xv. 9). If a Hebrew was sold in this way to a foreign sojourner, he might be redeemed at a valuation at any time previous to the Jubilee year, and in that year was, under any circumstances, to be released. Foreign sojourners, however, were not entitled to release at that time (Lev. xxv. 44, 46, 47, 54; 2 K. iv. 2; Is. l. 1, lii. 3). Land sold on account of debt was redeemable either by the seller himself, or by a kinsman in case of his inability to repurchase. Houses in walled towns, except such as belonged to Levites, if not redeemed within one year after sale, were alienated for ever. Michaelis doubts whether all debt was extinguished by the Jubilee; but Josephus' account is very precise (*Ant.* iii. 12, §3; Lev. xxv. 23, 34; Ruth iv. 4, 10; Michaelis, §158, ii. 360). In later times the sabbatical or jubilee release was superseded by a law, probably introduced by the Romans, by which the debtor was liable to be detained in prison until the full discharge of his debt (Matt. v. 26). Michaelis thinks this doubtful. The case imagined in the parable of the Unmerciful Servant belongs rather to despotic Oriental than Jewish manners (Matt. xviii. 34; Michaelis, ibid. art. 149; Trench, *Parables*, p. 141). Subsequent Jewish opinions on loans and usury may be seen in the Mishna, *Baba Metziah*, c. iii. x. [JUBILEE.]

[H. W. P.]

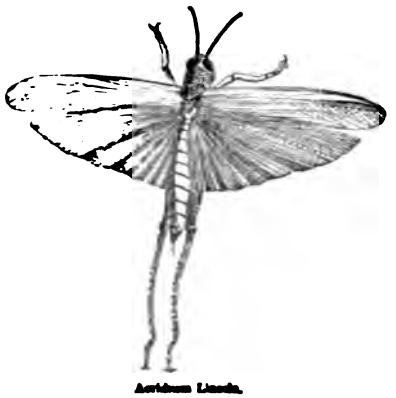
LOAVES. [BREAD.]

LOCK.[a] Where European locks have not been introduced, the locks of Eastern houses are usually of wood, and consist of a partly hollow bolt from 14 inches to 2 feet long for external doors or gates, or from 7 to 9 inches for interior doors. The bolt passes through a groove in a piece attached to the door into a socket in the door-post. In the groove-piece are from 4 to 9 small iron or wooden sliding-pins or wires, which drop into corresponding holes in the bolt, and fix it in its place. The key is a piece of wood furnished with a like number of pins, which, when the key is introduced sideways, raise the sliding-pins in the lock, and allow the bolt to be drawn back. Ancient Egyptian doors were fastened with central bolts, and sometimes with bars passing from one door-post to the other. They were also sometimes sealed with clay. [CLAY.] Keys were made of bronze or iron, of a simple construction. The gates of Jerusalem set up under Nehemiah's direction had both bolts and locks. (Judg. iii. 23, 25; Cant. v. 5; Neh. iii. 3, &c.; Rauwolff, *Trav.* in Ray, ii. 17; Russell, *Aleppo*, i. 22; Volney, *Travels*, ii. 438; Lane, *Mod. Eg.* i. 42; Chardin, *Voy.* iv. 123; Wilkinson, *Anc. Eg.*, abridgm. i. 15, 16). [H. W. P.]

LOCUST,[b] a well-known insect, which commits terrible devastation to vegetation in the countries which it visits. In the Bible there are frequent allusions to locusts; and there are nine or ten Hebrew words which are supposed to denote different varieties or species of this destructive family. They belong to that order of insects known by the term *Orthoptera*.[c] This order is divided into two large groups or divisions, viz. *Cursoria* and *Saltatoria*. The first, as the name imports, includes only those families of *Orthoptera* which have legs formed for *creeping*, and which were considered unclean by the Jewish law. Under the second are comprised those whose two posterior legs, by their peculiar structure, enable them to move on the ground by *leaps*. This group contains, according to Serville's arrangement, three families, the *Gryllides*, *Locustariae*, and the *Acridites*, distinguished one from the other by some peculiar modifications of structure. The common house-cricket (*Gryllus domesticus*, Oliv.) may be taken as an illustration of the *Gryllides*; the green grasshopper (*Locusta viridissima*, Fabr.), which the French call *Sauterelle verte*, will represent the family *Locustariae*; and the *Acridites* may be typified by the common migratory locust (*Oedipoda migratoria*, Aud. Serv.),

Oedipoda migratoria.

which is an occasional visitor to this country.[d] Of the *Gryllides*, *G. cerisyi* has been found in Egypt,



[a] מַנְעוּל. κλεῖθρον, *sera*; Ges. *Thes.* 892.

[b] From the Latin *locusta*, derived by the old etymologists from *locus* and *ustus*, "quod tacta multa *urit*, morsu vero omnia erodat."

[c] From ὀρθόν and πτερόν: an order of insects characterized by their anterior wings being semi-coriaceous and overlapping at the tips. The posterior wings are large and membranous, and *longitudinally folded* when at rest.

[d] In the year 1748 locusts (the *Oedipoda migratoria*, doubtless) invaded Europe in immense multitudes. Charles XII. and his army, then in Bessarabia, were stopped in their course. It is said that the swarms were four hours passing over Breslau. Nor did England escape for a swarm fell near Bristol, and ravaged the country in the month of July of the same year. They did great damage in Shropshire and Staffordshire, by eating the blossoms of the apple-trees, and especially the leaves of oaks, which looked as bare as at Christmas. The rooks did a good service in this case at least. See *Gentleman's Magazine*, July 1748, pp. 331 and 414; also *The Times* Oct. 4, 1845.

and *G. domesticus*, on the authority of Dr. Kitto, in Palestine; but doubtless other species also occur in these countries. Of the *Locustariae*, *Pneumoptera falcata*, Serv. (*G. falc.* Scopoli), has also, according to Kitto, been found in Palestine, *Bradyporus dasypus* in Asia Minor, Turkey, &c., *Saga Natoliae* near Smyrna. Of the locusts proper, or *Acridites*, four species of the genus *Truxalis* are recorded as having been seen in Egypt, Syria, or Arabia: viz. *T. nasuta*, *T. variabilis*, *T. procera*, and *T. miniata*. The following kinds also occur: *Opsomala pisciformis*, in Egypt and the oasis of Harrat; *Poekilocerus hieroglyphicus*, *P. bufonius*, *P. punctiventris*, *P. vulcanus*, in the deserts of Cairo; *Dericorys albidula* in Egypt and Mount Lebanon. Of the genus *Acridium*, *A. maestum*, the most formidable perhaps of all the *Acridites*, *A. lineola* (= *G. Aegypt.* Linn.), which is a species commonly sold for food in the markets of Bagdad

Acridium Lineola.

(Serv. *Orthop.* 657), *A. semifasciatum*, *A. peregrinum*, one of the most destructive of the species, and *A. morbosum*, occur either in Egypt or Arabia. *Calliptamus serapis* and *Chrotogonus lugubris* are found in Egypt, and in the cultivated lands about Cairo; *Eremobia carinata*, in the rocky places about Sinai. *E. cisti*, *E. pulchripennis*, *Oedipoda coerulescens*, and *Oe. migratoria* (= *G. migrat.* Linn.), complete the list of the *Saltatorial Orthoptera* of the Bible-lands. From the above catalogue it will be seen how perfectly unavailing, for the most part, must be any attempt to identify the Hebrew names with ascertained species, especially when it is remembered that some of these names occur but seldom, others (Lev. xi. 21) only once in the Bible—that the only clue is in many instances the mere etymology of the Hebrew word—that such etymology has of necessity, from the fact of there being but a *single word*, a very wide meaning—and that the etymology is frequently very uncertain. The LXX. and Vulg. do not contribute much help, for the words used there are themselves of a very uncertain signification, and moreover employed in a most promiscuous manner. Still, though the possibility of identifying with certainty any one of the Hebrew names is a hopeless task, yet in one or two instances a fair approximation to identification may be arrived at.

From Lev. xi. 21, 22, we learn the Hebrew names of four different kinds of *Saltatorial Orthoptera*. "These may ye eat of every flying creeping thing that goeth upon all four,[d] which have legs above their feet[e] to leap withal upon the earth; even those of them ye may eat, the *arbeh* after his kind, and the *sôlâm* after his kind, and the *chargôl* (wrongly translated *beetle* by the A. V., an insect which would be included amongst the flying *creeping* things forbidden as food in vers. 23 and 42) after his kind, and the *châgâb* after his kind." Besides the names mentioned in this passage, there occur five others in the Bible, all of which Bochart (iii. 251, &c.) considers to represent so many distinct species of locusts, viz. *gôb*, *gâzâm*, *châsîl*, *yelek*, and *tselâtsâl*.

(1.) *Arbeh* (אַרְבֶּה: ἀκρίς, βροῦχος, ἀττέλεβος, ἀττέλαβος; in Joel ii. 25, ἐρυσίβη: *locusta*, *bruchus*: "locust," "grasshopper") is the most common name for locust, the word occurring about twenty times in the Hebrew Bible, viz., in Ex. x. 4, 12, 13, 14, 19; Judg. vi. 5, vii. 12; Lev. xi. 22; Deut. xxviii. 38; 1 K. viii. 37; 2 Chr. vi. 28; Job xxxix. 20; Ps. cv. 34, cix. 23, lxxviii. 46; Prov. xxx. 27; Jer. xlvi. 23; Joel i. 4, ii. 25; Nah. iii. 15, 17. The LXX. generally render *arbeh* by ἀκρίς, the general Greek name for *locust*: in two passages, however, viz., Lev. xi. 22, and 1 K. viii. 37, they use βροῦχος as the representative of the original word. In Nah. iii. 17, *arbeh* is rendered by ἀττέλεβος; while the Aldine version, in Joel ii. 25, has ἐρυσίβη, *mildew*. The Vulg. has *locusta* in every instance except in Lev. xi. 22, where it has *bruchus*. The A. V. in the four following passages has *grasshopper*, Judg. vi. 5, vii. 12; Job xxxix. 20; and Jer. xlvi. 23: in all the other places it has *locust*. The word *arbeh*,[f] which is derived from a root signifying "to be numerous," is probably sometimes used in a wide sense to express any of the larger devastating species. It is the locust of the Egyptian plague. In almost every passage where *arbeh* occurs reference is made to its terribly destructive powers. It is one of the flying creeping creatures that were allowed as food by the law of Moses (Lev. xi. 21). In this passage it is clearly the representative of some species of winged *saltatorial orthoptera*, which must have possessed indications of form sufficient to distinguish the insect from the three other names which belong to the same division of orthoptera, and are mentioned in the same context. The opinion

[d] It is well known that all insects, properly so called, have *six* feet. But the Jews considered the two anterior pair only as true legs in the locust family, regarding them as additional instruments for leaping.

[e] אֲשֶׁר לוֹ כְרָעַיִם מִמַּעַל לְרַגְלָיו. The rendering of the A. V., "which have legs above their feet," is certainly awkward. כְּרָעַיִם, which occurs only in the dual number, properly denotes "that part of the leg between the knee and ankle" which is bent in bowing down, *i. e.* the *tibiae*. The passage may be thus translated, "which have their *tibiae* so placed above their feet [*femora*] as to enable them to leap upon the earth." Dr. Harris, adopting the explanation of the author of *Scripture Illustrated*, understands כְּרָעַיִם to mean "joints," and רַגְלַיִם "hind legs;" which rendering Niebuhr (*Quaest.* xxx) gives. But there is no reason for a departure from the literal and general significations of the Hebrew terms.

[f] אַרְבֶּה, locust, so called from its multitude, רֻבָּה. See Gesen. *Thes.* s. v., who adopts the explanation of Michaelis that the four names in Lev. xi. 22 are not the representatives of four distinct genera or species, but denote the different stages of growth.

of Michaelis (*Suppl.* 667, 910), that the four words mentioned in Lev. xi. 22 denote the same insect in four different ages or stages of its growth, is quite untenable, for, whatever particular species are intended by these words, it is quite clear from ver. 21 that they must all be *winged orthoptera*. From the fact that almost in every instance where the word *arbeh* occurs, reference is made either to the devouring and devastating nature of this insect, or else to its multiplying powers (Judg. vi. 5, vii. 12, wrongly translated "grasshopper" by the A. V., Nah. iii. 15, Jer. xlvi. 23), it is probable that either the *Acridium peregrinum*,[g] or the *Oedipoda migratoria* is the insect denoted by the Hebrew word *arbeh*, for these two species are the most destructive of the family. Of the former species M. Olivier

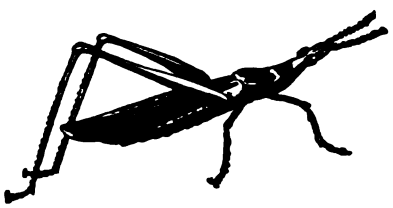
Acridium Peregrinum

(*Voyage dans l'Empire Othoman*, ii. 424) thus writes: "With the burning south winds (of Syria) there come from the interior of Arabia and from the most southern parts of Persia clouds of locusts (*Acridium peregrinum*), whose ravages to these countries are as grievous and nearly as sudden as those of the heaviest hail in Europe. We witnessed them twice. It is difficult to express the effect produced on us by the sight of the whole atmosphere filled on all sides and to a great height by an innumerable quantity of these insects, whose flight was slow and uniform, and whose noise resembled that of rain: the sky was darkened, and the light of the sun considerably weakened. In a moment the terraces of the houses, the streets, and all the fields were covered by these insects, and in two days they had nearly devoured all the leaves of the plants. Happily they lived but a short time, and seemed to have migrated only to reproduce themselves and die; in fact, nearly all those we saw the next day had paired, and the day following the fields were covered with their dead bodies." This species is found in Arabia, Egypt, Mesopotamia, and Persia. Or perhaps *arbeh* may denote the *Oedipoda migratoria*, the *Sauterelle de passage*, concerning which Michaelis inquired of Carsten Niebuhr, and received the following reply: "Sauterelle de passage est la même que les Arabes mangent et la même qu'on a vû en Allemagne" (*Recueil*, quest. 32 in Niebuhr's *Desc. de l'Arabie*). This species appears to be as destructive as the *Acridium peregrinum*.

(2.) *Chágâb* (חָגָב: ἀκρίς: *locusta*: "grasshopper," "locust"), occurs in Lev. xi. 22, Num. xiii. 33, 2 Chr. vii. 13, Eccl. xii. 5, Is. xl. 22; in all of which passages it is rendered ἀκρίς by the LXX., and *locusta* by the Vulg. In 2 Chr. vii. 13 the A. V. reads "locust," in the other passages "grasshopper." From the use of the word in Chron., "If I command the locusts to devour the land," compared with Lev. xi. 22, it would appear that some species of devastating locust is intended. In the passage of Numbers, "There we saw the giants the sons of Anak and we were in our own sight as grasshoppers" (*chágâb*), as well as in Ecclesiastes and Isaiah, reference seems to be made to some small species of locust; and with this view Oedman (*Verm. Samm.* ii. 90) agrees. Tychsen (*Comment. de Locust.* p. 76) supposes that *chágâb* denotes the *Gryllus coronatus*, Linn.; but this is the *Acanthodis coron.* of Aud. Serv., a S. American species, and probably confined to that continent. Michaelis (*Supp.* 668), who derives the word from an Arabic root signifying "to veil,"[h] conceives that *chágâb* represents either a locust at the fourth stage of its growth, "ante quartas exuvias quod adhuc velata est," or else at the last stage of its growth, "post quartas exuvias, quod jam volans solem cœlumque obvelat." To the first theory the passage in Lev. xi. is opposed. The second theory is more reasonable, but *chágâb* is probably derived not from the Arabic but the Hebrew. From what has been stated above it will appear better to own our complete inability to say what species of locust *chágâb* denotes, than to hazard conjectures which must be grounded on no solid foundation. In the Talmud[i] *chágâb* is a collective name for many of the locust tribe, no less than eight hundred kinds of *chagâblim* being supposed by the Talmud to exist! (Lewysohn, *Zoolog. des Talm.* §384). Some kinds of locusts are beautifully marked, and were sought after by young Jewish children as playthings, just as butterflies and cockchafers are now-a-days. M. Lewysohn says (§384) that a regular traffic used to be carried on with the *chagâblim*, which were caught in great numbers, and sold after wine had been sprinkled over them; he adds that the Israelites were only allowed to buy them before the dealer had thus prepared them.[k]

(3.) *Chargôl* (חַרְגֹּל: ὀφιομάχης: *ophiomachus*: "beetle"). The A. V. is clearly in error in translating this word "beetle;" it occurs only in Lev. xi. 22, but it is clear from the context that it denotes some species of winged *Saltatorial orthopterous* insect which the Israelites were allowed to use as food. The Greek word used by the LXX. is one of most uncertain meaning, and the story about any kind of locust attacking a serpent is an absurdity which requires no Cuvier to refute it.[m] As to this word see Bochart, *Hieroz.* iii. 264; Rosenm. notes; the Lexicons of Suidas, Hesychius, &c., Pliny xi. 29. *Adnotat. ad Arist. H. A.* tom. iv. 47, ed. Schneider. Some attempts have been made to identify the *chârgôl*, "meræ conjecturæ!" as Rosenmüller truly remarks. The Rev. J. F. Denham, in *Cyclop. Bib. Lit.* (arts. *Chargôl* and *Locust*), endeavours to shew that the Greek word *ophiomachus* denotes some species of *Truxalis*, perhaps *T. Nasutus*. "The

[g] The *Gryllus gregarius* of Forskâl (*Desc. Anim.* 81) is perhaps identical with the *Acrid pereg.* Forskâl says, "Arabes ubique vocant *Djerad* (جَرَاد) et Judaei in Yemen habitantes illum esse אַרְבֶּה asseverabant."



[h] Cf. حاجب (*hadjab*), *qui velum obtendit*, from حاجب *intercessit, seclusit.*

[i] Fürst derives חָגַב from v. inus. חָגַב, *se fungere, coire* a radice, *gab.* גָּב, to which root he refers גֹּב and גֻּבִּי.

[k] The Talmudists have the following law: "He that voweth to abstain from flesh (מן הבשר) is forbidden the flesh of fish and of locusts" (בשר דגים וחגבים) *Hieros. Nedar.* fol. 40, 2

[m] See Pliny. Paris, 1828, ed. Grandsagne, p. 451, note

word instantly suggests a reference to the *ichneumon*, the celebrated destroyer of serpents . . . if then any species of locust can be adduced whose habits resemble those of the *ichneumon*, may not this resemblance account for the name, *quasi* the ichneumon (locust), just as the whole genus (?) (family) of insects called *Ichneumonidae* were so denominated because of the *supposed* analogy between their services and those of the Egyptian ichneumon? and might not this name given to that species (?) of locust at a very early period have afterwards originated the erroneous notion referred to by Aristotle and Pliny?" But is it a fact that the genus *Truxalis* is an exception to the rest of the *Acridiles*, and is pre-eminently *insectivorous*. Serville (*Orthopt.* 579) believes that in their manner of living the *Truxalides* resemble the rest of the *Acridiles*, but seems to allow that further investigation is necessary. Fischer (*Orthop. Europ.* p. 292) says that the nutriment of this family is *plants* of various kinds. Mr. F. Smith, in a letter to the writer of this article, says he has no doubt that the *Truxalides* feed on *plants*. What is Mr. Denham's authority for asserting that they are insectivorous? It is granted that there is a *quasi* resemblance in external form between the *Truxalides* and some of the larger *Ichneumonidae*, but the likeness is far from striking. Four species of the genus *Truxalis* are inhabitants of the Bible lands (see above).

Truxalis Nasuta.

The Jews, however, interpret *chârgôl* to mean a species of *grasshopper*, German, *heuschrecke*, which M. Lewysohn identifies with *Locusta viridissima*, adopting the etymology of Bochart and Gesenius, who refer the name to an Arabic origin.[a] The Jewish women used to carry the eggs of the *chargôl* in their ears to preserve them from the ear-ache, (Buxtorf, *Lex. Chald. et Rabbin.* s. v. *chargôl*).

(4.) *Sôlâm* (סֹלָעָם: ἀττάκης, Compl. ἀτταλός: *attacus*: "bald locust") occurs only in Lev. xi. 22, as one of the four edible kinds of leaping insects. All that can possibly be known of it is that it is some kind of *Saltatorial orthopterous* insect, winged, and good for food. Tychsen, however, arguing from what is said of the *sôlâm* in the Talmud (Tract, *Cholin*), viz. that "this insect has a smooth head,[c] and that the female is without the sword-shaped tail," conjectures that the species here intended is *Gryllus ensifer* (Asso), a synonym that it is difficult to identify with any recorded species.

(5.) *Gôzâm* (גָּזָם). See PALMER-WORM.

(6.) *Gôb* (גֹּבַי: ἀκρίς, ἐπιγονὴ ἀκρίδων: Aq. in Am. vii. 1, Βαρράδων: *locusta*; *locustae locus tarum* = גֹּבַי בֹּבַי in Nah. iii. 17: "great grasshoppers;" "grasshoppers;" marg n "green worms," in Amos). This word is found only in Is. xxxiii. 4, and in the two places cited above. There is nothing in any of these passages that will help to point out the species denoted. That some kind of locust is intended seems probable from the passage in Nahum, "thy captains are as the great *gôbai* which camp in the hedges in the cool of the day, but when the sun ariseth they flee away, and their place is not known where they are." Some writers led by this passage, have believed that the *gôbai* represent the larva state of some of the large locusts; the habit of halting at night, however, and encamping under the hedges, as described by the prophet, in all probability belongs to the *winged* locust as well as to the *larvae*, see Ex. x. 13, "the Lord brought an east wind upon the land all that day, and all that night; and when it was *morning*, the east wind brought the locusts." Mr. Barrow (i. 257-8), speaking of some species of S. African locusts, says, that when the larvae, which are still more voracious than the parent insect, are on the march, it is impossible to make them turn out of the way, which is usually that of the wind. At sunset the troop halts and divides into separate groups, each occupying in bee-like clusters the neighbouring eminences for the night. It is quite possible that the *gôb* may represent the *larva* or *nympha* state of the insect; nor is the passage from Nahum, "when the sun ariseth they flee away," any objection to this supposition, for the last stages of the *larva* differ but slightly from the *nympha*, both which states may therefore be comprehended under one name; the *gôbai* of Nah. iii. 17, may

Locust flying.

easily have been the *nymphae* (which in all the *Ametabola* continue to feed as in their larva condition) encamping at night under the hedges, and, obtaining their wings as the sun arose, are then represented as flying away.[g] It certainly is improbable that the Jews should have had no name for the locust in its

[a] חַרְגֹּל, *locustae species alata*, a *saltando*. Gesenius refers the word to the Arabic حرجل (*hardjal*), *saltit*, comparing the Germ. Heuschrecke from *schrecken*, *saltire*.

[b] Hence perhaps the epithet *bald*, applied to *sôlâm* in the text of the A. V.

[c] גֹּבַי, according to Gesenius (*Thes* s. v.), is from an unused root, גָּבָה, the Arab. جبا, to emerge from the ground. Fürst refers the word to a Hebrew origin. See note, ARBEH.

[g] Since the above was written it has been discovered that Dr. Kitto (*Pict. Bible*, note on Nah. iii 17) is of a similar opinion, that the *gôb* probably denotes the *nympha*,

larva or nympha state, for they must have been quite familiar with the sight of such devourers of every green thing, the larvae being even more destructive than the imago; perhaps some of the other nine names, all of which Bochart considers to be the names of so many species, denote the insect in one or other of these conditions. The A. V. were evidently at a loss, for the translators read "green worms," in Am. vii. 1. Tychsen (p. 93) identifies the *gôb* with the *Gryllus migratorius*, Linn., "qua vero ratione motus," observes Rosenmüller, "non exponit."

(7.) *Chanâmâl* (חֲנָמָל: ἐν τῇ πάχνῃ; Aq. ἐν κρύει: *in pruinâ*; "frost"). Some writers have supposed that this word, which occurs only in Ps. lxxviii. 47, denotes some kind of locust (see Bochart, *Hieroz.* iii. 255, ed. Rosenm.). Mr. J. F. Denham (in Kitto, s. v. *Locust*) is of a similar opinion; but surely the concurrent testimony of the old versions, which interpret the word *chanâmâl* to signify *hail* or *frost*, ought to forbid the conjecture. We have already more locusts than it is possible to identify; let *chanâmâl*, therefore, be understood to denote *hail* or *frost*, as it is rendered by the A. V., and all the important old versions.

(8.) *Yelek* (יֶלֶק[1]: ἀκρὶς, βροῦχος: *bruchus*: *bruchus aculeatus*, in Jer. li. 27: "cankerworm," "caterpillar") occurs in Ps. cv. 34; Nah. iii. 15, 16; Joel i. 4, ii. 25; Jer. li. 14, 27; it is rendered by the A. V. *cankerworm* in four of these places, and *caterpillar* in the two remaining. From the epithet of "rough," which is applied to the word in Jeremiah, some have supposed the *yelek* to be the larva of some of the destructive *Lepidoptera*: the epithet *samar*, however (Jer. li. 27), more properly means *having spines*, which agrees with the Vulgate, *aculeatus*. Michaelis (*Suppl.* p. 1080) believes the *yelek* to be the cockchafer (Maykäfer). Oedman (ii. vi. 126) having in view this *spiny* character, identifies the word with the *Gryllus cristatus*, Linn., a species, however, which is found only in S. America, though Linnaeus has erroneously given Arabia as a locality. Tychsen arguing from the epithet *rough*, believes that the *yelek* is represented by the *G. haematopus*, Linn. (*Calliptamus haemat.* Aud. Serv.) a species found in S. Africa.

How purely conjectural are all these attempts at identification! for the term *spined* may refer not to any particular species, but to the very spinous nature of the tibiae in all the locust tribe, and *yelek*, the *cropping, licking off* insect (Num. xxii. 4), may be a synonym of some of the names already mentioned, or the word may denote the larvae or pupae of the locust, which from Joel i. 4, seems not improbable, "that which the locust (*arbeh*) hath left, hath the cankerworm (*yelek*) eaten," after the winged *arbeh* had departed, the young larvae of the same appeared and consumed the residue. The passage in Nah. iii. 16, "the *yelek* spreadeth himself (margin) and fleeth away," is no objection to the opinion that the *yelek* may represent the larva or nympha for the same reason as was given in a former part of this article (*Gôb*).

(9.) *Châsîl* (חָסִיל). See CATERPILLAR.

(10.) *Tselâtsâl* (צְלָצַל: ἐρυσίβη: *rubigo*: "locust"). The derivation of this word seems to imply that some kind of locust is indicated by it. It occurs only in this sense in Deut. xxviii. 42, "All thy trees and fruit of thy land shall the locust consume." In the other passages where the Hebrew word occurs, it represents some kind of tinkling musical instrument, and is generally translated *cymbals* by the A. V. The word is evidently onomatopoietic, and is here perhaps a synonym for some one of the other names for locust. Michaelis (*Suppl.* p. 2094) believes the word is identical with *châsîl*, which he says denotes perhaps the mole-cricket, *Gryllus talpiformis*, from the stridulous sound it produces. Tychsen (p. 79, 80) identifies it with the *Gryllus stridulus*, Linn. (= *Oedipoda stridula*, Aud. Serv.). The notion conveyed by the Hebrew word will however apply to almost any kind of locust, and indeed to many kinds of insects; a similar word *tsalsalza*, was applied by the Ethiopians to a fly which the Arabs called *zimb*, which appears to be identical with the *tsetse* fly of Dr. Livingstone and other African travellers. All that can be positively known respecting the *tselâtsâl* is, that it is some kind of insect injurious to trees and crops. The LXX. and Vulg. understand *blight* or *mildew* by the word.

The most destructive of the locust tribe that occur in the Bible lands are the *Oedipoda migratoria* and the *Acridium peregrinum*, and as both these species occur in Syria and Arabia, &c., it is most probable that one or other is denoted in those passages which speak of the dreadful devastations committed by these insects; nor is there any occasion to believe with Bochart, Tychsen, and others, that nine or ten distinct species are mentioned in the Bible. Some of the names may be synonyms; others may indicate the larva or nympha conditions of the two pre-eminent devourers already named.

Locusts occur in great numbers, and sometimes obscure the sun—Ex. x. 15; Jer. xlvi. 23; Judg. vi. 5, vii. 12; Joel ii. 10; Nah. iii. 15; Livy, xlii. 2; Aelian, *N. A.* iii. 12; Pliny, *N. H.* xi. 29; Shaw's *Travels*, p. 187 (fol. 2nd ed.); Ludolf, *Hist. Aethiop.* i. 13; and *de Locustis*, i. 4; Volney's *Trav. in Syria*, i. 236.

Their voracity is alluded to in Ex. x. 12, 15; Joel i. 4, 7, 12, and ii. 3; Deut. xxviii. 38; Ps. lxxviii. 46, cv. 34; Is. xxxiii. 4; Shaw's *Trav.* 187; and travellers in the East, *passim*.

They are compared to horses—Joel ii. 4; Rev. ix. 7. The Italians call the locust "Cavaletta;" and Ray says, "Caput oblongum, equi instar prona spectans." Comp. also the Arab's description to Niebuhr, *Descr. de l'Arabie*.

They make a fearful noise in their flight—Joel ii. 5; Rev. ix. 9.

Forskål, *Descr.* 81, "transeuntes grylli super verticem nostrum sono magnae cataractae fervebant." Volney, *Trav.* i. 235.

They have no king—Prov. xxx. 27; Kirby and Sp. *Int.* ii. 17.

Their irresistible progress is referred to in Joel ii. 8, 9; Shaw, *Trav.* 187.

They enter dwellings, and devour even the woodwork of houses—Ex. x. 6; Joel ii. 9, 10; Pliny, *N. H.* xi. 29.[2]

They do not fly in the night—Nah. iii. 17; Niebuhr, *Descr. de l'Arabie*, 173.

Birds devour them—Russel, *N. Hist. of Aleppo*,

[1] יֶלֶק, a. v. imus. יָלַק, i. q. לָקַק, *lingere*, inde lambendo *haurire* (Gesen. *Thes.* s. v.).

[2] "Omnia vero morsu erodentes et *fores* penes *tectorum*.

137; Volney, *Trav.* i. 237: Kitto's *Phys. Hist. Pal.* (p. 410).[1]

Samarmar. Rose-coloured Starling. (*Pastor roseus.*)

The sea destroys the greater number—Ex. x. 19; Joel ii. 20; Pliny, xi. 35; Hasselq. *Trav.* 445 (Engl. transl. 1766); cf. also *Iliad*, xxi. 12.

Their dead bodies taint the air—Joel ii. 20; Hasselq. *Trav.* 445.

They are used as food—Lev. xi. 21, 22; Matt. iii. 4; Mark i. 6; Plin. *N. H.* vi. 35, xi. 35; Died. Sic. iii. 29 (the *Acridophagi*); Aristoph. *Achar.* 1116; Ludolf, *H. Aethiop.* 67 (Gent's transl.); Jackson's *Marocco*, 52; Niebuhr, *Descr. de l'Arabie*, 150; Sparman's *Trav.* i. 367, who says the Hottentots are glad when the locusts come, for they fatten upon them; Hasselq. *Trav.* 232, 419; Kirby and Spence, *Entom.* i. 305.

There are different ways of preparing locusts for food: sometimes they are ground and pounded, and then mixed with flour and water and made into cakes, or they are salted and then eaten; sometimes smoked; boiled or roasted; stewed, or fried in butter. Dr. Kitto (*Pict. Bib.* not. on Lev. xi. 21), who tasted locusts, says they are more like shrimps than anything else; and an English clergyman, some years ago, cooked some of the green grasshoppers, *Locusta viridissima*, boiling them in water half an hour, throwing away the head, wings, and legs, and then sprinkling them with pepper and salt, and adding butter; he found them excellent. How strange then, nay, "how idle," to quote the words of Kirby and Spence (*Entom.* i. 305), "was the controversy concerning the locusts which formed part of the sustenance of John the Baptist, ... and how apt even learned men are to perplex a plain question from ignorance of the customs of other countries[a]!"

The following are some of the works which treat of locusts:—Ludolf, *Dissertatio de Locustis*, Francof. ad Moen. 1694. This author believes that the *quails* which fed the Israelites in the wilderness were locusts (vid. his *Diatriba qua sententia nova ac Selavis, sivè Locustis defenditur*). A more absurd opinion was that held by Norrelius, who maintained that the four names of Lev. xi. 22 were *birds* (see his *Schediasma de Avibus sacris, Arbeh, Chagab, Solam, et Chargol*, in Bib. Brem Cl. iii. p. 36). Faber, *De Locustis Biblicis, et sigillatim de Avibus Quadrupedibus, ex Lev.* xi. 20, Wittemb. 1710-11. Asso's *Abhandlung von den Heuschrecken*, Rostock, 1787; and Tychsen's *Comment. de Locustis*. Oedman's *Vermischte Sammlung*, ii. c. vii. Kirby and Spence's *Introd. to Entomology*, i. 305, &c. Bochart's *Hierozoicon*, iii. 251, &c., ed. Rosenmüll. Kitto's *Phys. History of Palestine*, 419, 420. Kitto's *Pictorial Bible*, see Index, "Locust." Dr. Harris's *Natural History of the Bible*, art. "Locust," 1833. Kitto's *Cyclopaedia*, arts. "Locust," "Chesil," &c. Harmer's *Observations*, London, 1797. The travels of Shaw, Russel, Hasselquist, Volney, &c. &c. For a systematic description of the *Orthoptera*, see Serville's *Monograph* in the *Suites à Buffon*, and Fischer's *Orthoptera Europaea*; and for an excellent summary, see Winer's *Realwörterbuch*, vol. i. p. 574, art. "Heuschrecken." For the locusts of St. John, Mr. Denham refers to Suicer's *Thesaurus*, i. 169, 179, and Gutherr, *De Victu Johannis*, Franc. 1785; and for the symbolical locusts of Rev. ix., to Newton *On Prophecies*, and Woodhouse *On the Apocalypse*.[b] [W. H.]

LOD (לֹד: ἡ Λύδ; Ἀοδαρόθ, Λοδαδία, both by inclusion of the following name; Alex. in Ezra, Αυδδων Λοδαδιδ: *Lod*), a town of Benjamin, stated to have been founded by Shamed or Shamer (1 Chr. viii. 12). It is always mentioned in connexion with ONO, and, with the exception of the passage just quoted, in the post-captivity records only. It would appear that after the boundaries of Benjamin, as given in the book of Joshua, were settled, that enterprising tribe extended itself further westward, into the rich plain of Sharon, between the central hills and the sea, and occupied or founded the towns of Lod, Ono, Hadid, and others named only in the later lists. The people belonging to the three places just mentioned returned from Babylon to the number of 725 (Ezr. ii. 33; Neh. vii. 37), and again took possession of their former habitations (Neh. xi. 35).

Lod has retained its name almost unaltered to the present day; it is now called *Lüdd*; but is most familiar to us from its occurrence in its Greek garb, as LYDDA, in the Acts of the Apostles. [G.]

[1] The locust-bird (see woodcut) referred to by travellers, and which the Arabs call *samarmar*, is no doubt, from Dr. Kitto's description, the "rose-coloured starling," *Pastor roseus*. The Rev. H. B. Tristram saw one specimen in the orange groves at Jaffa in the spring of 1858; but makes no allusion to its devouring locusts. Dr. Kitto in one place (p. 410) says the locust-bird is about the size of a starling; in another place (p. 420) he compares it in size to a swallow. The bird is about eight inches and a half in length. Yarrell (*Brit. Birds*, ii. 51, 2nd ed.) says "it is held sacred at Aleppo because it feeds on the locust;" and Pal. Sykes bears testimony to the immense flocks in which they fly. He says (*Catalogue of Birds of Dukhan*) "they darken the air by their numbers forty or fifty have been killed at a shot." But he says "they prove a calamity to the husbandman, as they are as destructive as locusts, and not much less numerous."

[a] There are people at this day who gravely assert that the locusts which formed part of the food of the Baptist were not the insect of that name, but the long sweet pods of the locust-tree (*Ceratonia siliqua*), *Johannis bredt*, "St. John's bread," as the monks of Palestine call it. For other equally erroneous explanations, or unauthorised alterations, of ἀκρίδες, see Celsii *Hierob.* i. 74.

[b] For the judgment of locusts referred to in the prophet Joel, see Dr. Pusey's "Introduction" to that book. This writer maintains that the prophet, under the figure of the locust, foretold "a judgment far greater, an enemy far mightier than the locust" (p. 99), namely, the Assyrian invasion of Palestine, because Joel calls the scourge the "northern army," which Dr. Pusey says cannot be said of the locusts, because almost always by a sort of law of their being they make their inroads from their birthplace in the south. This one point, however, may be fairly questioned. The usual direction of the flight of this insect is from East to West, or from South to North; but the *Oedipoda migratoria* is believed to have its birthplace in Tartary (Serv. *Orthop.* 738), from whence it visits Africa, the Mauritius, and part of the South of Europe. If this species be considered to be the locust of Joel, the expression *northern army* is most applicable to it.

LO-DEBAR (לוֹ דְבָר; but in xvii. 27 לֹא דְ׳: ἡ Λαδαβάρ, Λωδαβάρ: *Lodabar*), a place named with Mahanaim, Rogelim, and other trans-Jordanic towns (2 Sam. xvii. 27), and therefore no doubt on the eastern side of the Jordan. It was the native place of Machir ben-Ammiel, in whose house Mephibosheth found a home after the death of his father and the ruin of his grandfather's house (ix. 4, 5). Lo-debar receives a bare mention in the *Onomasticon*, nor has any trace of the name been encountered by any later traveller. Indeed it has probably never been sought for. Reland (*Pal.* 734) conjectures that it is intended in Josh. xiii. 26, where the word rendered in the A. V. "of Debir" (לִדְבִר), is the same in its consonants as Lodebar, though with different vowel-points. In favour of this conjecture, which is adopted by J. D. Michaelis (*Bib. für Ungel.*), is the fact that such a use of the preposition לְ is exceedingly rare (see Keil, *Josua*, ad loc.).

If taken as a Hebrew word, the root of the name is possibly "pasture," the driving out of flocks (Gesen. *Thes.* 735*b*; Stanley, *S. & P.* App. §9); but this must be very uncertain. [G.]

LODGE, TO. This word in the A. V.—with one exception only, to be noticed below—is used to translate the Hebrew verb לוּן or לִין, which has, at least in the narrative portions of the Bible, almost invariably the force of "passing the night." This is worthy of remark, because the word lodge —probably only another form of the Saxon *liggan*, "to lie"—does not appear to have had exclusively that force in other English literature at the time the Authorised Version was made. A few examples of its occurrence, where the meaning of passing the night would not at first sight suggest itself to an English reader, may be of service:—1 K. xix. 9; 1 Chr. ix. 27; Is. x. 29 (where it marks the halt of the Assyrian army for bivouac); Neh. iv. 22, xiii. 20, 21; Cant. vii. 11; Job xxiv. 7, xxxi. 32, &c. &c. The same Hebrew word is otherwise translated in the A. V. by "lie all night" (2 Sam. xii. 16; Cant. i. 13; Job xxix. 19); "tarry the night" (Gen. xix. 2; Judg. xix. 10; Jer. xiv. 8); "remain," *i. e.* until the morning (Ex. xxiii. 18).

The force of passing the night is also present in the words מָלוֹן, "a sleeping-place," hence an INN [vol. i. 867*b*], and מְלוּנָה, "a hut," erected in vineyards or fruit-gardens for the shelter of a man who watched all night to protect the fruit. This is rendered "lodge" in Is. i. 8, and "cottage" in xxiv. 20, the only two passages[7] in which it is found.

2. The one exception above-named occurs in Josh. ii. 1, where the word in the original is שָׁכַב, a word elsewhere rendered "to lie," generally in allusion to sexual intercourse. [G.]

LOFT. [HOUSE, vol. i. 838*b*.]

LOG. [WEIGHTS AND MEASURES.]

LOIS (Λωΐς), the grandmother (μάμμη) of TIMOTHY, and doubtless the mother of his mother EUNICE (2 Tim. i. 5). From the Greek form of these three names we should naturally infer that the family had been Hellenistic for three generations at least. It seems likely also that Lois had resided long at Lystra; and almost certain that from her, as well as from Eunice, Timothy obtained his intimate knowledge of the Jewish Scriptures (2 Tim. iii. 15). Whether she was surviving at either of St. Paul's visits to Lystra, we cannot say: she is not alluded to in the Acts: nor is it absolutely certain, though St. Paul speaks of her "faith," that she became a Christian. The phrase might be used of a pious Jewess, who was ready to believe in the Messiah. Calvin has a good note on this subject. [J. S. H.]

LOOKING-GLASSES. [MIRRORS.]

LORD, as applied to the Deity, is the almost uniform rendering in the A. V. of the O. T. of the Heb. יְהוָה, *Jehovah*, which would be more properly represented as a proper name. The reverence which the Jews entertained for the sacred name of God forbade them to pronounce it, and in reading they substituted for it either *Adônâi*, "Lord," or *Elôhîm*, "God," according to the vowel-points by which it was accompanied. [JEHOVAH, vol. i. p. 952*b*]. This custom is observed in the version of the LXX., where Jehovah is most commonly translated by κύριος, as in the N. T. (Heb. i. 10, &c.), and in the Vulgate, where *Dominus* is the usual equivalent. The title *Adônâi* is also rendered "Lord" in the A. V., though this, as applied to God, is of infrequent occurrence in the historical books. For instance, it is found in Genesis only in xv. 2, 8, xviii. 3 (where "my Lord" should be "O Lord"), 27, 30, 31, 32, xx. 4; once in Num. xiv. 17; twice in Deut. iii. 24, ix. 26; twice in Josh. vii. 7, 8; four times in Judges; and so on. In other passages of these books "Lord" is the translation of "Jehovah;" except Ex. xxiii. 17, xxxiv. 23; Deut. x. 17; Josh. iii. 11, 13, where *âdôn* is so rendered. But in the poetical and historical books it is more frequent, excepting Job, where it occurs only in xxviii. 28, and the Proverbs, Ecclesiastes, and Song of Songs, where it is not once found.

The difference between *Jehovah* and *Adonai* (or *Adon*) is generally marked in the A. V. by printing the word in small capitals (LORD) when it represents the former (Gen. xv. 4, &c.), and with an initial capital only when it is the translation of the latter (Ps. xcvii. 5; Is. i. 24, x. 16); except in Ex. xxiii. 17, xxxiv. 23, where "the LORD God" should be more consistently "the Lord Jehovah." A similar distinction prevails between יְהוָה (the letters of *Jehovah* with the vowel-points of *Elohim*) and אֱלֹהִים, *elôhîm*; the former being represented in the A. V. by "GOD" in small capitals (Gen. xv. 2, &c.), while *Elohim* is "God" with an initial capital only. And, generally, when the name of the Deity is printed in capitals, it indicates that the corresponding Hebrew is יהוה, which is translated LORD or GOD according to the vowel-points by which it is accompanied.

In some instances it is difficult, on account of the pause accent, to say whether *Adonai* is the title of the Deity, or merely one of respect addressed to men. These have been noticed by the Masorites, who distinguish the former in their notes as "holy," and the latter as "profane." (See Gen. xviii. 3, xix. 2, 18; and compare the Masoretic notes on Gen. xx. 13, Is. xix. 4.) [W. A. W.]

LORD'S DAY, THE ('Η κυριακὴ Ἡμέρα: ἡ μία σαββάτων). It has been questioned, though not seriously until of late years, what is the mean-

[7] What can have led the LXX. to translate the word עִיִּים "heaps," in Ps. lxxix. 1, by ἰνωσοφυλάκιον, which they employ for מְלוֹנוֹת in the above two passages, the writer is unable to conjecture.

ing of the phrase ἡ Κυριακὴ Ἡμέρα, which occurs in one passage only of the Holy Scripture, Rev. i. 10, and is, in our English version, translated "the Lord's Day." The general consent both of Christian antiquity and of modern divines has referred it to the weekly festival of our Lord's resurrection, and identified it with "the first day of the week," on which He rose, with the patristical "eighth day," or "day which is both the first and the eighth," in fact with the ἡ τοῦ Ἡλίου Ἡμέρα," "Solis Dies," or "Sunday," of every age of the Church.

But the views antagonistic to this general consent deserve at least a passing notice. 1. Some have supposed St. John to be speaking, in the passage above referred to, of the Sabbath, because that institution is called in Isaiah lviii. 13, by the Almighty Himself, "My holy day."[a] To this it is replied—If St. John had intended to specify the sabbath, he would surely have used that word which was by no means obsolete, or even obsolescent, at the time of his composing the book of the Revelation. And it is added, that if an apostle had set the example of confounding the seventh and the first days of the week, it would have been strange indeed that every ecclesiastical writer for the first five centuries should have avoided any approach to such confusion. They *do* avoid it—for as Σάββατον is never used by them for the first day, so Κυριακὴ is never used by them for the seventh day. 2. Another theory is, that by "the Lord's Day," St. John intended "the day of judgment," to which a large portion of the book of Revelations may be conceived to refer. Thus "I was in the spirit on the Lord's day" (ἐγενόμην ἐν πνεύματι ἐν τῇ Κυριακῇ Ἡμέρᾳ) would imply that he was rapt, in spiritual vision, to the *date* of that "great and terrible day," just as St. Paul represents himself as caught up *locally* into Paradise. Now, not to dispute the interpretation of the passage from which the illustration is drawn (2 Cor. xii. 4), the abettors of this view seem to have put out of sight the following considerations. In the preceding sentence, St. John had mentioned the place in which he was writing, Patmos, and the causes which had brought him thither. It is but natural that he should further particularise the circumstances under which his mysterious work was composed, by stating the exact day on which the Revelations were communicated to him, and the employment, spiritual musing, in which he was then engaged. To suppose a mixture of the metaphorical and the literal would be strangely out of keeping. And though it be conceded that the day of judgment is in the New Testament spoken of as Ἡ τοῦ Κυρίου Ἡμέρα, the employment of the adjectival form constitutes a remarkable difference, which was observed and maintained ever afterwards.[b] There is also a critical objection to this interpretation.[c] This second theory then, which is sanctioned by the name of Augusti, must be abandoned. 3. A third opinion is, that St. John intended by the "Lord's Day," that on which the Lord's resurrection was *annually* celebrated or, as we now term it, Easter-day. On this it need only be observed, that though it was never questioned that the *weekly* celebration of that event should take place on the first day of the hebdomadal cycle, it was for a long time doubted on what day in the *annual* cycle it should be celebrated. Two schools at least existed on this point until considerably after the death of St. John. It therefore seems unlikely that, in a book intended for the whole Church, he would have employed a method of dating which was far from generally agreed upon. And it is to be added that no patristical authority can be quoted, either for the interpretation contended for in this opinion, or for the employment of ἡ Κυριακὴ Ἡμέρα to denote Easter-day.

All other conjectures upon this point may be permitted to confute themselves; but the following cavil is too curious to be omitted. In Scripture the first day of the week is called ἡ μία σαββάτων, in post-Scriptural writers it is called ἡ Κυριακὴ Ἡμέρα as well; *therefore*, the book of Revelations is not to be ascribed to an apostle; or in other words, is not part of Scripture. The logic of this argument is only to be surpassed by its boldness. It says, in effect, because post-Scriptural writers have these two designations for the first day of the week; *therefore*, Scriptural writers must be confined to one of them. It were surely more reasonable to suppose that the adoption by post-Scriptural writers of a phrase so pre-eminently Christian as ἡ Κυριακὴ Ἡμέρα to denote the first day of the week, and a day so especially marked, can be traceable to nothing else than an apostle's use of that phrase in the same meaning.

Supposing then that ἡ Κυριακὴ Ἡμέρα of St. John is the Lord's Day,—What do we gather from Holy Scripture concerning that institution? How is it spoken of by early writers up to the time of Constantine? What change, if any, was brought upon it by the celebrated edict of that emperor, whom some have declared to have been its originator?

1. Scripture says very little concerning it. But that little seems to indicate that the divinely inspired apostles, by their practice and by their precepts, marked the first day of the week as a day for meeting together to break bread, for communicating and receiving instruction, for laying up offerings in store for charitable purposes, for occupation in holy thought and prayer. The first day of the week so devoted seems also to have been the day of the Lord's Resurrection, and therefore, to have been especially likely to be chosen for such purposes by those who "preached Jesus and the Resurrection."

The Lord rose on the first day of the week (τῇ μιᾷ σαββάτων), and appeared, on the very day of His rising, to His followers on five distinct occasions—to Mary Magdalene, to the other women, to the two disciples on the road to Emmaus, to St. Peter separately, to ten Apostles collected together. After eight days (μεθ' ἡμέρας ὀκτὼ), that is, according to the ordinary reckoning, on the first day

[a] יוֹם קָדְשִׁי.

[b] ἡ Ἡμέρα τοῦ Κυρίου occurs in 1 Cor. i. 8, and 2 Thess. ii. 2, with the words ἡμῶν Ἰησοῦ Χριστοῦ attached; in 1 Cor. v. 5, and 2 Cor. i. 14, with the word Ἰησοῦ only attached; and in 1 Thess. v. 2, and 2 Pet. iii. 10, with the article τοῦ omitted. In one place, where both the day of judgment, and, as a foreshadowing of it, the day of vengeance upon Jerusalem, seem to be alluded to the Lord himself says, οὕτως ἔσται καὶ ὁ υἱὸς τοῦ ἀνθρώπου ἐν τῇ ἡμέρᾳ αὐτοῦ, Luke xvii. 24.

[c] Ἐγενόμην would necessarily have to be constructed with ἐν ἡμέρᾳ, "I was in the day of judgment, *i. e.* I was passing the day of judgment spiritually." Now γίνεσθαι ἐν ἡμέρᾳ is never used for *diem agere*. But, on the other hand, the construction of ἐγενόμην with ἐν πνεύματι is justified by a parallel passage in Rev. iv. 2, καὶ εὐθέως ἐγενόμην ἐν πνεύματι.

of the next week, He appeared to the eleven. He does not seem to have appeared in the interval—it may be to render that day especially noticeable by the apostles, or, it may be for other reasons. But, however this question be settled, on the day of Pentecost, which in that year fell on the first day of the week (see Bramhall, *Disc. of the Sabbath and Lord's Day*, in *Works*, vol. v. p. 51, Oxford edition), "they were all with one accord in one place," had spiritual gifts conferred on them, and in their turn began to communicate those gifts, as accompaniments of instruction, to others. At Troas (Acts xx. 7), many years after the occurrence at Pentecost, when Christianity had begun to assume something like a settled form, St. Luke records the following circumstances. St. Paul and his companions arrived there, and "abode seven days, and upon the first day of the week when the disciples came together to break bread, Paul preached unto them." In 1 Cor. xvi. 1, 2, that same St. Paul writes thus: "Now concerning the collection for the saints, as I have given order to the churches in Galatia, even so do ye. Upon the first day of the week, let every one of you lay by him in store, as God hath prospered him, that there be no gatherings when I come." In Heb. x. 25, the correspondents of the writer are desired "not to forsake the assembling of themselves together, as the manner of some is, but to exhort one another," an injunction which seems to imply that a regular day for such assembling existed, and was well known; for otherwise no rebuke would lie. And lastly, in the passage given above, St. John describes himself as being in the Spirit "on the Lord's Day."

Taken separately, perhaps, and even all together, these passages seem scarcely adequate to prove that the dedication of the first day of the week to the purposes above mentioned was a matter of apostolic institution, or even of apostolic practice. But, it may be observed, that it is at any rate an extraordinary coincidence, that almost immediately we emerge from Scripture, we find the same day mentioned in a similar manner, and directly associated with the Lord's Resurrection; that it is an extraordinary fact that we never find its dedication questioned or argued about, but accepted as something equally apostolic with Confirmation, with *Infant* Baptism, with Ordination, or at least spoken of in the same way. And as to direct support from Holy Scripture, it is noticeable that those other ordinances which are usually considered Scriptural, and in support of which Scripture is usually cited, are dependent, so far as mere quotation is concerned, upon fewer texts than the Lord's Day is. Stating the case at the very lowest, the Lord's Day has at least "probable insinuations in Scripture,"[4] and so is superior to any other holy day, whether of hebdomadal celebration, as Friday in memory of the Crucifixion, or of annual celebration, as Easter-day in memory of the Resurrection itself. These other days may be, and are, defensible on other grounds; but they do not possess anything like a Scriptural authority for their observance. And if we are inclined still to press for more pertinent Scriptural proof, and more frequent mention of the institution, for such we suppose it to be, in the writings of the apostles, we must recollect how little is said of Baptism and the Lord's Supper, and how vast a difference is naturally to be expected to exist between a sketch of the manners and habits

[4] This phrase is employed by Bishop Sanderson.

of their age, which the authors of the Holy Scriptures did *not* write, and hints as to life and conduct, and regulation of known practices, which they *did* write.

2. On quitting the canonical writings, we turn naturally to Clement of Rome. He does not, however, directly mention "the Lord's Day," but in 1 Cor. i. 40, he says, πάντα τάξει ποιεῖν ὀφείλομεν, and he speaks of ὡρισμένοι καιροὶ καὶ ὧραι, at which the Christian προσφοραὶ καὶ λειτουργίαι should be made.

Ignatius, the disciple of St. John (*ad Magn.* c. 9), contrasts Judaism and Christianity, and as an exemplification of the contrast, opposes σαββατίζειν to living according to the Lord's life (κατὰ τὴν Κυριακὴν Ζωὴν ζῶντες).

The Epistle ascribed to St. Barnabas, which, though certainly not written by that apostle, was in existence in the earlier part of the 2nd century, has (c. 15) the following words, "We celebrate the eighth day with joy, on which too Jesus rose from the dead."[e]

A pagan document now comes into view. It is the well-known letter of Pliny to Trajan, written while he presided over Pontus and Bithynia. "The Christians (says he), affirm the whole of their guilt or error to be, that they were accustomed to meet together on a stated day (*stato die*), before it was light, and to sing hymns to Christ as a God, and to bind themselves by a *Sacramentum*, not for any wicked purpose, but never to commit fraud, theft, or adultery; never to break their word, or to refuse, when called upon to deliver up any trust; after which it was their custom to separate, and to assemble again to take a meal, but a general one, and without guilty purpose."

A thoroughly Christian authority, Justin Martyr, who flourished A.D. 140, stands next on the list. He writes thus: "On the day called Sunday (τῇ τοῦ ἡλίου λεγομένῃ ἡμέρᾳ), is an assembly of all who live either in the cities or in the rural districts, and the memoirs of the apostles and the writings of the prophets are read." Then he goes on to describe the particulars of the religious acts which are entered upon at this assembly. They consist of prayer, of the celebration of the Holy Eucharist, and of collection of alms. He afterwards assigns the reasons which Christians had for meeting on Sunday. These are, "because it is the *First Day*, on which God dispelled the darkness (τὸ σκότος) and the original state of things (τὴν ὕλην), and formed the world, and because Jesus Christ our Saviour rose from the dead upon it" (*Apol. Prim.*). In another work (*Dial. c. Tryph.*), he makes circumcision furnish a type of Sunday. "The command to circumcise infants on the eighth day was a type of the true circumcision by which we are circumcised from error and wickedness through our Lord Jesus Christ, who rose from the dead on the first day of the week (τῇ μιᾷ σαββάτων); therefore it remains the chief and first of days." As for σαββατίζειν, he uses that with exclusive reference to the Jewish law. He carefully distinguishes Saturday (ἡ κρονικὴ), the day after which our Lord was crucified, from Sunday (ἡ μετὰ τὴν κρονικὴν ἥτις ἐστὶν ἡ τοῦ Ἡλίου ἡμέρα), upon which He rose from the dead. (If any surprise is felt at Justin's employment of the heathen designations for the seventh and first days of the week, it may be accounted for thus. Before the death of Ha-

[e] Ἄγομεν τὴν ἡμέραν τὴν ὀγδόην εἰς εὐφροσύνην, ἐν ᾗ καὶ ὁ Ἰησοῦς ἀνέστη ἐκ νεκρῶν.

drus, A.D. 138, the hebdomadal division (which Dion Cassius, writing in the 3rd century, derives, together with its nomenclature, from Egypt), had in matters of common life, almost universally superseded in Greece, and even in Italy, the national divisions of the lunar month. Justin Martyr, writing to and for heathen, as well as to and for Jews, employs it, therefore, with a certainty of being understood.)

The strange heretic, Bardesanes, who however delighted to consider himself a sort of Christian, has the following words in his book on "Fate," or on "the Laws of the Countries," which he addressed to the Emperor M. Aurelius Antoninus: "What then shall we say respecting the new race of ourselves who are Christians, whom in every country and in every region the Messiah established at His coming; for, lo! wherever we be, all of us are called by the one name of the Messiah, Christians; and upon one day, which is the first of the week, we assemble ourselves together, and on the appointed days we abstain from food" (Cureton's *Translation*).

Two very short notices stand next on our list, but they are important from their casual and unstudied character. Dionysius, bishop of Corinth, A.D. 170, in a letter to the Church of Rome, a fragment of which is preserved by Eusebius, says, *τὴν σήμερον οὖν κυριακὴν ἁγίαν ἡμέραν διηγάγομεν, ἐν ᾗ ἀνέγνωμεν ὑμῶν τὴν ἐπιστολήν.* And Melito, bishop of Sardis, his contemporary, is stated to have composed, among other works, a treatise on the Lord's Day (*ὁ περὶ τῆς Κυριακῆς λόγος*).

The next writer who may be quoted is Irenaeus, bishop of Lyons, A.D. 178. He asserts that the Sabbath is abolished; but his evidence to the existence of the Lord's Day is clear and distinct. It is spoken of in one of the best known of his Fragments (see Beaven's *Irenaeus*, p. 202). But a record in Euseb. (v. 23, 2) of the part which he took in the Quarto-Deciman controversy, shows that in his time it was an institution beyond dispute. The point in question was this: Should Easter be celebrated in connexion with the Jewish Passover, on whatever day of the week that might happen to fall, with the Churches of Asia Minor, Syria, and Mesopotamia; or on the Lord's Day, with the rest of the Christian world? The Churches of Gaul, then under the superintendence of Irenaeus, agreed upon a synodical epistle to Victor, bishop of Rome, in which occurred words somewhat to this effect, "The mystery of the Lord's Resurrection may not be celebrated on any other day than the Lord's Day, and on this alone should we observe the breaking off of the Paschal Fast."[f] This confirms what was said above, that while, even towards the end of the 2nd century, tradition varied as to the *yearly* celebration of Christ's Resurrection, the *weekly* celebration of it was one upon which no diversity existed, or was even hinted at.

Clement of Alexandria, A.D. 194, comes next. One does not expect anything very definite from a writer of so mystical a tendency, but he has some things quite to our purpose. In his *Strom.* (iv. §3), he speaks of *τὴν ἀρχήγονον ἡμέραν, τὴν τῷ ὄντι ἀνάπαυσιν ἡμῶν, τὴν δὴ καὶ πρώτην τῷ ὄντι φωτὸς γένεσιν, κ.τ.λ.*, words which Bishop Kaye interprets as contrasting the seventh day of the Law, with the eighth day of the Gospel. And, as the same learned prelate observes, "When Clement says that the gnostic, or transcendental Christian, does not pray in any fixed place, or on any stated days, but throughout his whole life, he gives us to understand that Christians in general did meet together in fixed places and at appointed times for the purposes of prayer." But we are not left to mere inference on this important point, for Clement speaks of the Lord's Day as a well-known and customary festival, and in one place gives a mystical interpretation of the name.[g]

Tertullian, whose date is assignable to the close of the 2nd century, may, in spite of his conversion to Montanism, be quoted as a witness to facts. He terms the first day of the week sometimes Sunday (Dies Solis), sometimes Dies Dominicus. He speaks of it as a day of joy (Diem Solis laetitiae indulgemus, *Apol.* c. 16), and asserts that it is wrong to fast upon it, or to pray kneeling during its continuance (Die Dominico jejunium nefas ducimus, vel de geniculis adorare, *De Cor.* c. 3). "Even business is to be put off, lest we give place to the devil" (Differentes etiam negotia, ne quem Diabolo locum demus, *De Orat.* c. 13).

Origen contends that the Lord's Day had its superiority to the Sabbath indicated by manna having been given on it to the Israelites, while it was withheld on the Sabbath. It is one of the marks of the perfect Christian to keep the Lord's Day.

Minucius Felix, A.D. 210, makes the heathen interlocutor, in his dialogue called Octavius, assert that the Christians come together to a repast "on a solemn day" (solenni die).

Cyprian and his colleagues, in a synodical letter, A.D. 253, make the Jewish circumcision on the eighth day prefigure the newness of life of the Christian, to which Christ's resurrection introduces him, and point to the Lord's Day, which is at once the eighth and the first.

Commodian, circ. A.D. 270, mentions the Lord's Day.

Victorinus, A.D. 290, contrasts it, in a very remarkable passage, with the Parasceve and the Sabbath;

And Peter, Bishop of Alexandria, A.D. 300, says of it, "We keep the Lord's Day as a day of joy, because of Him who rose thereon."[h]

The results of our examination of the principal writers of the two centuries after the death of St. John are as follows. The Lord's Day (a name which has now come out more prominently, and is connected more explicitly with our Lord's resurrection than before) existed during these two centuries as a part and parcel of apostolical, and so of Scriptural Christianity. It was never defended, for it was never impugned, or at least only impugned as other things received from the apostles were. It was never confounded with the Sabbath, but carefully distinguished from it, (though we have not quoted nearly all the passages by which this point might be proved). It was not an institution of severe Sabbatical character, but a day of joy (*χαρμοσύνη*) and cheerfulness (*εὐφροσύνη*), rather encouraging than forbidding relaxation. Religiously

[f] Ὃς ἐν μηδ' ἐν ἄλλῃ τινὶ τῆς Κυριακῆς ἡμέρᾳ τὸ τῆς ἐκ νεκρῶν ἀναστάσεως ἐπιτέλεσιτοῦ Κυρίου μυστήριον, καὶ ἐνταῦθα μόνῃ τῶν ἐκεῖ τὸ πάσχα νηστειῶν διαλυτέον εἶναι ἐπιλύοντας.

[g] Οὕτως ἐντολὴν τὴν κατὰ τὸ εὐαγγέλιον διατηροῦντες. Κυριακὴν τὴν ἡμέραν ποιεῖ, ὅτ' ἐν ἀναβάλλῃ φαῦλον νόημα καὶ γνωστικὸν προσλάβῃ, τὴν ἐν αὐτῷ τοῦ Κυρίου ἀνάστασιν δοξάζων, (*Strom.* v.).

[h] Τὴν γὰρ κυριακὴν χαρμοσύνης ἡμέραν ἄγομεν, διὰ τὸν ἀναστάντα ἐν αὐτῇ. ἐν ᾗ οὐδὲ γόνατα κλίνουσι πᾶσαι λέγομεν.

ugarded, it was a day of solemn meeting for the Holy Eucharist, for united prayer, for instruction, for almsgiving; and though, being an institution under the law of liberty, work does not appear to have been formally interdicted, or rest formally enjoined, Tertullian seems to indicate that the character of the day was opposed to worldly business. Finally, whatever analogy may be supposed to exist between the Lord's Day and the Sabbath, in no passage that has come down to us is the Fourth Commandment appealed to as the ground of the obligation to observe the Lord's Day. Ecclesiastical writers reiterate again and again, in the strictest sense of the words, "Let no man therefore judge you in respect of an holiday, or of the new moon, or of the sabbath days" (*Μὴ τις ὑμᾶς κρινέτω ἐν μέρει ἑορτῆς, ἢ νουμηνίας, ἢ σαββάτων*, Col. ii. 16). Nor, again, is it referred to any Sabbatical foundation anterior to the promulgation of the Mosaic economy. On the contrary, those before the Mosaic era are constantly assumed to have had neither knowledge nor observance of the Sabbath. And as little is it anywhere asserted that the Lord's Day is merely an ecclesiastical institution, dependent on the post-apostolic Church for its origin, and by consequence capable of being done away, should a time ever arrive when it appears to be no longer needed.

Our design does not necessarily lead us to do more than state facts; but if the facts be allowed to speak for themselves, they indicate that the Lord's Day is a purely Christian institution, sanctioned by apostolic practice, mentioned in apostolic writings, and so possessed of whatever divine authority all apostolic ordinances and doctrines (which were not obviously temporary, or were not abrogated by the apostles themselves) can be supposed to possess.

3. But on whatever grounds "the Lord's Day" may be supposed to rest, it is a great and indisputable fact that four years before the Oecumenical Council of Nicæa, it was recognised by Constantine in his celebrated edict, as "the venerable Day of the Sun." The terms of the document are these:—

"*Imperator Constantinus Aug. Helpidio.*

"Omnes judices urbanaeque plebes et cunctarum artium officia venerabili Die Solis quiescant. Ruri tamen positi agrorum culturae liberè licenterque inserviant, quoniam frequenter evenit ut non aptius alio die frumenta sulcis aut vineae scrobibus mandentur, ne occasione momenti pereat commoditas coelesti provisione concessa."—*Dat. Non. Mart. Crispo II. et Constantino II. Coss.*

Some have endeavoured to explain away this document by alleging—1st, that "Solis Dies" is not *the* Christian name of the Lord's Day, and that Constantine did not therefore intend to acknowledge it as a Christian institution.

2nd. That, before his conversion, Constantine had professed himself to be especially under the guardianship of the sun, and that, at the very best, he intended to make a religious compromise between sun-worshippers, properly so called, and the worshippers of the "Sun of Righteousness," *i. e.* Christians.

3rdly. That Constantine's edict was purely a kalendarial one, and intended to reduce the number of public holidays, "Dies Nefasti," or "Feriati," which had, so long ago as the date of the "Actiones Verrinae," become a serious impediment to the transaction of business. And that this was to be effected by choosing a day which, while it would be accepted by the Paganism then in fashion, would of course be agreeable to the Christians.

4thly. That Constantine then instituted Sunday for the first time as a religious day for Christians.

The fourth of these statements is absolutely refuted, both by the quotations made above from writers of the second and third centuries, and by the terms of the edict itself. It is evident that Constantine, accepting as facts the existence of the "Solis Dies," and the reverence paid to it by some one or other, does nothing more than make that reverence practically universal. It is "venerabilis" already. And it is probable that this most natural interpretation would never have been disturbed, had not Sozomen asserted, without warrant from either the Justinian or the Theodosian Code, that Constantine did for the sixth day of the week what the codes assert he did for the first.[1]

The three other statements concern themselves rather with what Constantine *meant* than with what he *did*. But with such considerations we have little or nothing to do. He may have purposely selected an ambiguous appellation. He may have been only half a Christian, wavering between allegiance to Christ and allegiance to Mithras. He may have affected a religious syncretism. He may have wished his people to adopt such syncretism. He may have feared to offend the Pagans. He may have hesitated to avow too openly his inward leanings to Christianity. He may have considered that community of religious days might lead bye and bye to community of religious thought and feeling. And he may have had in view the rectification of the kalendar. But all this is nothing to the purpose. It is a fact, that in the year A.D. 321, in a public edict, which was to apply to Christians as well as to Pagans, he put especial honour upon a day already honoured by the former—judiciously calling it by a name which Christians had long employed without scruple, and to which, as it was in ordinary use, the Pagans could scarcely object. What he did for it was to insist that worldly business, whether by the functionaries of the law or by private citizens, should be intermitted during its continuance. An exception indeed was made in favour of the rural districts, avowedly from the necessity of the case, covertly perhaps to prevent those districts, where Paganism (as the word Pagus would intimate) still prevailed extensively, from feeling aggrieved by a sudden and stringent change. It need only be added here, that the readiness with which Christians acquiesced in the interdiction of business on the Lord's Day affords no small presumption that they had long considered it to be a

[1] *Τὴν δὲ κυριακὴν καλουμένην ἡμέραν, ἣν Ἑβραῖοι πρώτην τῆς ἑβδομάδος ὀνομάζουσιν, Ἕλληνες δὲ τῷ Ἡλίῳ ἀνατιθέασιν, καὶ τὴν πρὸ τῆς ἑβδόμης, ἐνομοθέτησε δικαστηρίων καὶ τῶν ἄλλων πραγμάτων σχολὴν ἄγειν πάντας, καὶ ἐν αὐχαῖς καὶ λιταῖς τὸ Θεῖον θεραπεύειν· ἑτέρα δὲ τὴν κυριακὴν, ὡς ἐν ταύτῃ τοῦ Χριστοῦ ἀναστάντος ἐκ νεκρῶν· τὴν δὲ ἑτέραν, ὡς ἐν αὐτῇ σταυρωθέντος* (Soz. *Eccl. Hist.* i. c. 8). But on this passage Suicer observes very truly, "Non dicit a Constantino appellatam *κυριακὴν*, sed 'jam ante sic vocatam feriatam esse decrevit.'" There is a passage also in Eusebius (*Vit. Const.* iv. 18) which appears to assert the same thing of Saturday. It is, however, manifestly corrupt, and can scarcely be translated at all except by the employment of an emendation; while if we do thus emend it, it will speak of Friday, as Sozomen does, and not of Saturday; and, what is more to our purpose, to whichever of those days it does refer, what is said in it concerning Ἡ *κυριακὴ* will fall under Suicer's remark.

day of rest, and that, so far as circumstances admitted, they had made it so long before.

Were any other testimony wanting to the existence of Sunday as a day of Christian worship at this period, it might be supplied by the Council of Nicæa, A.D. 325. The Fathers there and then assembled make no doubt of the obligation of that day—do not ordain it—do not defend it. They assume it as an existing fact, and only notice it incidentally in order to regulate an indifferent matter, the posture of Christian worshippers upon it.[b]

Richard Baxter has well summed up the history of the Lord's Day at this point, and his words may not unaptly be inserted here:—"That the first Christian emperor, finding all Christians unanimous in the possession of the day, should make a law (as our kings do) for the due observing of it, and that the first Christian council should establish uniformity in the very gesture of worship on that day, are strong confirmations of the matter of fact, that the churches unanimously agreed in the holy use of it as a *separated day even from and in the Apostles' days*" (Richard Baxter, *On the Divine Appointment of the Lord's Day*, p. 41. 1671).

Here we conclude our inquiry. If patristical or ecclesiastical ground has been touched upon, it has been only so far as appeared necessary for the elucidation of the Scripture phrase, ἡ Κυριακὴ Ἡμέρα. What became of the *Sabbath* after Christianity was fairly planted; what Christ said of it in the Gospels, and how His words are to be interpreted; what the apostles said of that day, and how they treated it; what the early ecclesiastical writers held respecting it; and in what sense "There remaineth a *sabbatismus* (σαββατισμὸς, A. V. "rest") to the people of God" (Heb. iv. 9): these are questions which fall rather under the head of SABBATH than under that of "Lord's Day." And as no debate arose in apostolic or in primitive times respecting the relation, by descent, of the Lord's Day to the Mosaic Sabbath, or to any Sabbatical institution of assumed higher antiquity, none need be raised here. [See SABBATH.]

The whole subject of the Lord's Day, including its "origin, history, and present obligation," is treated of by the writer of this article in the Bampton Lecture for 1860. [J. A. H.]

LORD'S SUPPER (Κυριακὸν δεῖπνον: *Coena Dominica*). The words which thus describe the great central act of the worship of the Christian Church occur but in one single passage of the N. T. (1 Cor. xi. 20).[a] Of the fact which lies under the name we have several notices, and from these, incidental and fragmentary as they are, it is possible to form a tolerably distinct picture. To examine these notices in their relation to the life of the Christian society in the first stages of its growth, and so to learn what "the Supper of the Lord" actually was, will be the object of this article. It would be foreign to its purpose to trace the history of the stately liturgies which grew up out of it in the 2nd and 3rd centuries, except so far as they supply or suggest evidence as to the customs of the earlier period, or to touch upon the many controversies which then, or at a later age, have clustered round the original institution.

I. The starting point of this inquiry is found in the history of that night when Jesus and His disciples met together to eat the Passover (Matt. xxvi. 19; Mark xiv. 16; Luke xxii. 13). The manner in which the Paschal feast was kept by the Jews of that period differed in many details from that originally prescribed by the rules of Ex. xii. The multitudes that came up to Jerusalem, met, as they could find accommodation, family by family, or in groups of friends, with one of their number as the celebrant, or "proclaimer" of the feast. The ceremonies of the feast took place in the following order (Lightfoot, *Temple Service*, xiii.; Meyer, *Comm. in Matt.* xxvi. 26). (1) The members of the company that were joined for this purpose met in the evening and reclined on couches, this position being now as much a matter of rule as standing had been originally (comp. Matt. xxvi. 20, ἀνέκειτο; Luke xxii. 14; and John xiii. 23, 25). The head of the household, or celebrant, began by a form of blessing "for the day and for the wine," pronounced over a cup, of which he and the others then drank. The wine was, according to Rabbinic traditions, to be mixed with water; not for any mysterious reason, but because that was regarded as the best way of using the best wine (comp. 2 Macc. xv. 39). (2) All who were present then washed their hands; this also having a special benediction. (3) The table was then set out with the paschal lamb, unleavened bread, bitter herbs, and the dish known as Charoseth (חֲרֹסֶת), a sauce made of dates, figs, raisins, and vinegar, and designed to commemorate the mortar of their bondage in Egypt (Buxtorff, *Lex. Rabb.* 831). (4) The celebrant first, and then the others, dipped a portion of the bitter herbs into the Charoseth and ate them. (5) The dishes were then removed, and a cup of wine again brought. Then followed an interval which was allowed theoretically for the questions that might be asked by children or proselytes, who were astonished at such a strange beginning of a feast, and the cup was passed round and drunk at the close of it. (6) The dishes being brought on again, the celebrant repeated the commemorative words which opened what was strictly the paschal supper, and pronounced a solemn thanksgiving, followed by Ps. cxiii. and cxiv.[b] (7) Then came a second washing

[a] Κυριακὴ τινές εἰσιν ἐν τῇ κυριακῇ γόνυ κλίνοντες καὶ ἐν ταῖς τῆς Πεντηκοστῆς ἡμέραις. ὑπὲρ τοῦ πάντα ἐν τούτῳ παραπλησίᾳ ἁρμόσαι φυλάττεσθαι, ἑστῶτες δόξε τῇ ἁγίᾳ συνόδῳ τὰς εὐχὰς ἀναπέμπειν τῷ Θεῷ (*Conc. Nic.* Can. 20).

[a] Maldonatus (*Comm. on Matt.* xxvi. 26) is bold enough to deny that the "Lord's Supper" of 1 Cor. xi. 20 is the same as the "Eucharistia" of the later Church, and identifies it with the meal that followed. The phraseology to which we are accustomed is to him only an example of the "ridicula Calvinistarum et Lutheranorum inscitia," innovating on the received language of the Church. The keen detector of heresy, however, is in this instance at variance not only with the consensus of the chief fathers of the ancient Church (comp. Suicer. *Thes.* s. v. δεῖπνον), but with the authoritative teaching of his own (*Catechism. Trident.* c. iv. qu. 5).

[b] It may be interesting to give the words, as shewing what kind of forms may have served as types for the first worship of the Christian Church.

1. This is the passover, which we eat because the Lord passed over the houses of our fathers in Egypt.

2. These are the bitter herbs, which we eat in remembrance that the Egyptians made the lives of our fathers bitter in Egypt.

3. This is the unleavened bread, which we eat, because the dough of our fathers had not time to be leavened before the Lord revealed himself and redeemed them out of hand.

4. Therefore are we bound to give thanks, to praise, to

of the hands, with a short form of blessing as before, and the celebrant broke one of the two loaves or cakes of unleavened bread, and gave thanks over it. All then took portions of the bread and dipped them, together with the bitter herbs, into the Charoseth, and so ate them. (8) After this they ate the flesh of the paschal lamb, with bread, &c., as they liked; and after another blessing, a third cup, known especially as the "cup of blessing," was handed round. (9) This was succeeded by a fourth cup, and the recital of Ps. cxv.–cxviii. followed by a prayer, and this was accordingly known as the cup of the Hallel, or of the Song. (10) There might be, in conclusion, a fifth cup, provided that the "great Hallel" (possibly Psalms cxx.-cxxxvii.) was sung over it.

Comparing the ritual thus gathered from Rabbinic writers with the N. T., and assuming (1) that it represents substantially the common practice of our Lord's time; and (2) that the meal of which He and His disciples partook, was either the passover itself, or an anticipation of it,[c] conducted according to the same rules, we are able to point, though not with absolute certainty, to the points of departure which the old practice presented for the institution of the new. To (1) or (3), or even to (8), we may refer the first words and the first distribution of the cup (Luke xxii. 17, 18); to (2) or (7), the dipping of the sop (ψωμίον) of John xiii. 26; to (7), or to an interval during or after (8), the distribution of the bread (Matt. xxvi. 26; Mark xiv. 22; Luke xxii. 19; 1 Cor. xi. 23, 24); to (9) or (10) ("after supper," Luke xxii. 20) the thanksgiving, and distribution of the cup, and the hymn with which the whole was ended. It will be noticed that, according to this order of succession, the question whether Judas partook of what, in the language of a later age, would be called the consecrated elements, is most probably to be answered in the negative.

The narratives of the Gospels show how strongly the disciples were impressed with the words which had given a new meaning to the old familiar acts. They leave unnoticed all the ceremonies of the Passover, except those which had thus been transferred to the Christian Church and perpetuated in it. Old things were passing away, and all things becoming new. They had looked on the bread and the wine as memorials of the deliverance from Egypt. They were now told to partake of them "in remembrance" of their Master and Lord. The festival had been annual. No rule was given as to the time and frequency of the new feast that thus supervened on the old, but the command "Do this as oft as ye drink it" (1 Cor. xi. 25), suggested the more continual recurrence of that which was to be their memorial of one whom they would wish never to forget. The words, "This is my body," gave to the unleavened bread a new character. They had been prepared for language that would otherwise have been so startling, by the teaching of John (vi. 32-58), and they were thus taught to see in the bread that was broken the witness of the closest possible union and incorporation with their Lord. The cup which was "the new testament" (διαθήκη) "in His blood," would remind them, in like manner, of the wonderful prophecy in which that new covenant had been foretold (Jer. xxxi. 31-34) of which the crowning glory was in the promise, "I will forgive their iniquity, and I will remember their sin no more." His blood shed, as He told them, "for them and for many," for that remission of sins which He had been proclaiming throughout his whole ministry, was to be to the new covenant what the blood of sprinkling had been to that of Moses (Ex. xxiv. 8). It is possible that there may have been yet another thought connected with these symbolic acts. The funeral customs of the Jews involved, at or after the burial, the administration to the mourners of bread (comp. Jer. xvi. 7, "neither shall they break bread for them in mourning," in marginal reading of A. V.; Ewald and Hitzig, *ad loc.*; Ex. xxiv. 17; Hos. ix. 4; Tob. iv. 17), and of wine, known, when thus given, as "the cup of consolation." May not the bread and the wine of the Last Supper have had something of that character, preparing the minds of Christ's disciples for His departure by treating it as already accomplished? They were to think of his body as already anointed for the burial (Matt. xxvi. 12, Mark xiv. 8; John xii. 7), of his body as already given up to death, of his blood as already shed. The passover-meal was also, little as they might dream of it, a funeral-feast. The bread and the wine were to be pledges of consolation for their sorrow, analogous to the verbal promises of John xiv. 1, 27, xvi. 20. The word διαθήκη might even have the twofold meaning which is connected with it in the Epistle to the Hebrews.

May we not conjecture, without leaving the region of history for that of controversy, that the thoughts, desires, emotions, of that hour of divine sorrow and communion would be such as to lead the disciples to crave earnestly to renew them? Would it not be natural that they should seek that renewal in the way which their Master had pointed out to them? From this time, accordingly, the words "to break bread." appear to have had for the disciples a new significance. It may not have assumed indeed, as yet, the character of a distinct liturgical act; but when they met to break bread, it was with new thoughts and hopes, and with the memories of that evening fresh on them. It would be natural that the Twelve should transmit the command to others who had not been present, and seek to lead them to the same obedience and the same blessings. The narrative of the two disciples to whom their Lord made himself known "in breaking of bread" at Emmaus (Luke xxiv. 30-35) would strengthen the belief that this was the way to an abiding fellowship with Him.[d]

land, to glorify, to extol, to honour, to praise, to magnify him that hath done for our fathers, and for us, all these wonders; who hath brought us from bondage to freedom, from sorrow to rejoicing, from mourning to a good day, from darkness to a great light, from affliction to redemption; therefore must we say before him, Hallelujah, praise ye the Lord followed by Ps. cxiii. (Lightfoot, *l.* c.).

[c] This reservation is made as being a possible alternative for explaining the differences between the three first Gospels and St. John.

[d] The general consensus of patristic and Roman Catholic interpreters finds in this also a solemn celebration of the Eucharist. Here, they say, are the solemn benediction and the technical words for the distribution of the elements as in the original institution, and as in the later notices of the Acts. It should be remembered, however, that the phrase "to break bread" had been a synonym for the act of any one presiding at a meal (comp. Jer. xvi. 7, Lam iv. 4), and that the Rabbinic rule required a blessing whenever three persons sat down together at it. (Comp Maldonatus and Meyer, *ad loc.*).

II. In the account given by the writer of the Acts of the life of the first disciples at Jerusalem, a prominent place is given to this act, and to the phrase which indicated it. Writing, we must remember, with the definite associations that had gathered round the words during the thirty years that followed the events he records, he describes the baptized members of the Church as continuing stedfast in or to the teaching of the apostles, in fellowship with them and with each other,[a] and in breaking of bread and in prayers (Acts ii. 42). A few verses further on, their daily life is described as ranging itself under two heads: (1) that of public devotion, which still belonged to them as Jews ("continuing daily with one accord in the Temple"); (2) that of their distinctive acts of fellowship "breaking bread from house to house (or "privately," Meyer), they did eat their meat in gladness and singleness of heart, praising God, and having favour with all the people." Taken in connexion with the account given in the preceding verses of the love which made them live as having all things common, we can scarcely doubt that this implies that the chief actual meal of each day was one in which they met as brothers, and which was either preceded or followed by the more solemn commemorative acts of the breaking of the bread and the drinking of the cup. It will be convenient to anticipate the language and the thoughts of a somewhat later date, and to say that, apparently, they thus united every day the Agapè[f] or feast of Love with the celebration of the Eucharist. So far as the former was concerned, they were reproducing in the streets of Jerusalem the simple and brotherly life which the Essenes were leading in their seclusion on the shores of the Dead Sea.[g] It would be natural that in a society consisting of many thousand members there should be many places of meeting. These might be rooms hired for the purpose, or freely given by those members of the Church who had them to dispose of. The congregation assembling in each place would come to be known as "the Church" in this or that man's house (Rom. xvi. 5, 23; 1 Cor. xvi. 19; Col. iv. 15; Philem. ver. 2). When they met, the place of honour would naturally be taken by one of the apostles, or some elder representing him. It would belong to him to pronounce the blessing (εὐλογία) and thanksgiving (εὐχαριστία), with which the meals of devout Jews always began and ended. The materials for the meal would be provided out of the common funds of the Church, or the liberality of individual members. The bread (unless the converted Jews were to think of themselves as keeping a perpetual passover) would be such as they habitually used. The wine (probably the common red wine of Palestine, Prov. xxiii. 31) would, according to their usual practice, be mixed with water. Special stress would probably be laid at first on the office of breaking and distributing the bread, as that which represented the fatherly relation of the pastor to his flock, and his work as ministering to men the word of life. But if this was to be more than a common meal after the pattern of the Essenes, it would be necessary to introduce words that would show that what was done was in remembrance of their Master. At some time, before or after[h] the meal of which they partook as such, the bread and the wine would be given with some special form of words or acts, to indicate its character. New converts would need some explanation of the meaning and origin of the observance. What would be so fitting and so much in harmony with the precedents of the Paschal feast as the narrative of what had passed on the night of its institution (1 Cor. xi. 23-27)? With this there would naturally be associated (as in Acts ii. 42) prayers for themselves and others. Their gladness would show itself in the psalms and hymns with which they praised God (Heb. ii. 46, 47; James v. 13). The analogy of the Passover, the general feeling of the Jews, and the practice of the Essenes may possibly have suggested ablutions, partial or entire, as a preparation for the feast (Heb. x. 22; John xiii. 1-15; comp. Tertull. *de Orat.* c. xi.; and for the later practice of the Church, August. *Serm.* ccxliv.). At some point in the feast those who were present, men and women sitting apart, would rise to salute each other with the "holy kiss" (1 Cor. xvi. 20; 2 Cor. xiii. 12; Clem. Alex. *Paedagog.* iii. c. 11; Tertull. *de Orat.* c. 14; Just. M. *Apol.* ii.). Of the stages in the growth of the new worship we have, it is true, no direct evidence, but these conjectures from antecedent likelihood are confirmed by the fact that this order appears as the common element of all later liturgies.

The next traces that meet us are in 1 Cor., and the fact that we find them is in itself significant. The commemorative feast has not been confined to the personal disciples of Christ, or the Jewish converts whom they gathered round them at Jerusalem. It has been the law of the Church's expansion that this should form part of its life everywhere. Wherever the apostles or their delegates have gone, they have taken this with them. The language of St. Paul, we must remember, is not that of a man who is setting forth a new truth, but of one who appeals to thoughts, words, phrases, that are familiar to his readers, and we find accordingly evidence of a received liturgical terminology. The title of the "cup of blessing" (1 Cor. x. 16),

[a] The meaning of κοινωνία in this passage is probably explained by the ἔχον ἅπαντα κοινά that follows (comp. Meyer, ad loc.). The Vulg. rendering, "et communicatione fractionis panis," originated probably in a wish to give to the word its later liturgical sense.

[f] The *fact* is traceable to the earliest days of the Church. The origin of the name is obscure. It occurs in this sense only in two passages of the N. T., 2 Pet. ii. 13, Jude v. 12; and there the reading (though supported by B and other great MSS.) is not undisputed. The absence of any reference to it in St. Paul's memorable chapter on Agapè (1 Cor. xiii.) makes it improbable that it was then and there in use. In the age after the apostles, however, it is a currently accepted word for the meal here described. Ignat. *Ep. ad Smyrn.* c. 8; Tertull. *Apol.* c. 39, *ad Marc.* c. 2; Cyprian, *Testim. ad Quirin.* iii. 3).

[g] The account given by Josephus (*Bell. Jud.* ii. 8) deserves to be studied, both as coming from an eye-witness (*Vita*, c. 2), and as shewing a type of holiness which could hardly have been unknown to the first Christian disciples. The description of the meals of the Essenes might almost pass for that of an Agapè. "They wash themselves with pure water, and go to their refectory as to a holy place (τέμενος), and sit down calmly The priest begins with a prayer over the food, and it is unlawful for any one to taste of it before the prayer." This is the early meal. The δεῖπνον is in the same order (comp. Pliny, *Ep. ad Trai.*).

[h] Examples of both are found in the history of the early Church: 1 Cor. xi. is an example of the Agapè coming before the Eucharist. The order of the two words in Ignat. *Epist. ad Smyrn.* c. 4 implies priority. The practice continued in some parts of Egypt even to the time of Sozomen (*Hist. Eccl.* vii. c. 19), and the rule of the Council of Carthage (can. xii.) forbidding it, implies that it had been customary.

Hebrew in its origin and form (see above), has been imported into the Greek Church. The synonym of "the cup of the Lord" (1 Cor. x. 21) distinguishes it from the other cups that belonged to the Agapè. The word "fellowship" (Κοινωνία) is passing by degrees into the special signification of "Communion." The apostle refers to his own office as breaking the bread and blessing the cup (1 Cor. x. 16).[f] The table on which the bread was placed was the Lord's Table, and that title was to the Jew not, as later controversies have made it, the antithesis of altar (Θυσιαστήριον), but as nearly as possible a synonym (Mal. i. 7, 12; Ez. xli. 22). But the practice of the Agapè, as well as the observance of the commemorative feast, had been transferred to Corinth, and this called for a special notice. Evils had sprung up which had to be checked at once. The meeting of friends for a social meal, to which all contributed, was a sufficiently familiar practice in the common life of Greeks of this period; and these club-feasts were associated with plans of mutual relief or charity to the poor (comp. Smith's *Dictionary of Antiquities*, s. v. Ἔρανοι). The Agapè of the new society would seem to them to be such a feast, and hence came a disorder that altogether frustrated the object of the Church in instituting it. Richer members came, bringing their supper with them, or appropriating what belonged to the common stock, and sat down to consume it without waiting till others were assembled and the presiding elder had taken his place. The poor were put to shame, and defrauded of their share in the feast. Each was thinking of his own supper, not of that to which we now find attached the distinguishing title of "the Lord's Supper."[g] And when the time for that came, one was hungry enough to be looking to it with physical not spiritual craving, another so overpowered with wine as to be incapable of receiving it with any reverence. It is quite conceivable that a life of excess and excitement, of overwrought emotion and unrestrained indulgence, such as this epistle brings before us, may have proved destructive to the physical as well as the moral health of those who were affected by it, and so the sicknesses and the deaths of which St. Paul speaks (1 Cor. xi. 30), as the consequences of this disorder may have been so, not by supernatural infliction, but by the working of those general laws of the divine government, which make the punishment the traceable consequence of the sin. In any case, what the Corinthians needed was, to be taught to come to the Lord's table with greater reverence, to distinguish (διακρίνειν) the Lord's body from their common food. Unless they did so, they would bring upon themselves condemnation. What was to be the remedy for this terrible and growing evil he does not state explicitly. He reserves formal regulations for a later personal visit. In the meantime he gives a rule which would make the union of the Agapè and the Lord's Supper possible without the risk of profanation. They were not to come even to the former with the keen edge of appetite. They were to wait till all were met, instead of scrambling tumultuously to help themselves (1 Cor. xi. 33, 34). In one point, however, the custom of the Church of Corinth differed apparently from that of Jerusalem. The meeting for the Lord's Supper was no longer daily (1 Cor. xi. 20, 33). The directions given in 1 Cor. xvi. 2, suggest the constitution of a celebration on the first day of the week (comp. Just. Mart. *Apol.* i. 67; Pliny, *Ep. ad Traj.*). The meeting at Troas is on the same day (Acts xx. 7).

The tendency of this language, and therefore probably of the order subsequently established, was to separate what had hitherto been united.[m] We stand as it were at the dividing point of the history of the two institutions, and henceforth each takes its own course. One, as belonging to a transient phase of the Christian life, and varying in its effects with changes in national character or forms of civilisation, passes through many stages[n]—becomes more and more a merely local custom—is found to be productive of evil rather than of good—is discouraged by bishops and forbidden by councils—and finally dies out.[o] Traces of it linger in some of the traditional practices of the Western Church.[p] There have been attempts to revive it among the Moravians and other religious communities. The other also has its changes. The morning celebration takes the place of the evening. New names—Eucharist, Sacrifice, Altar, Mass, Holy Mysteries—gather round it. New epithets and new ceremonies express the growing reverence of the people. The mode of celebration at the high altar of a basilica in the 4th century differs so widely from the circumstances of the original institution, that a careless eye would have found it hard to recognise their identity. Speculations, controversies, superstitions crystallise round this as their nucleus. Great disruptions and changes threaten to destroy the life and unity of the Church. Still, through all the changes, the Supper of the Lord vindicates its claim to universality, and bears a permanent witness of the truths with which it was associated.

In Acts xx. 11 we have an example of the way in which the transition may have been effected.

[f] The plural κλῶμεν has been understood as implying that the congregation took part in the act of breaking (Stanley, Corinthians; and Estius, *ad loc.*). It may be questioned, however, whether this is sufficient ground for an interpretation for which there is no support either in the analogous custom of the Jews or in the traditions of the Church. The εὐλογοῦμεν, which stands parallel to κλῶμεν, can hardly be referred to the whole body of partakers. When the act is described historically, the singular is always used (Acts xx. 11, xxvii. 35). Tertullian, in the passage to which Prof. Stanley refers, speaks of the other practice ("nec de aliorum quam praesidentium manibus," *de Cor. Mil.* c. 3) as an old tradition, not as a change.

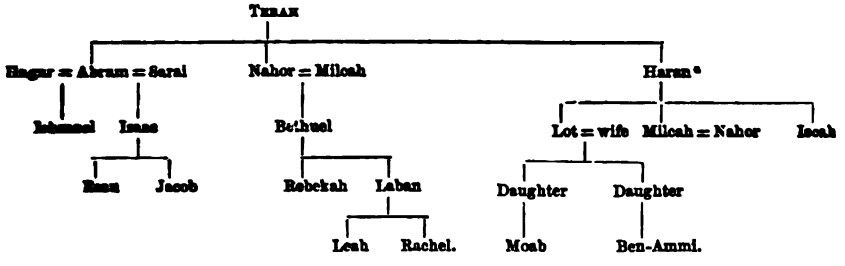
[g] The word κυριακὸν appears to have been coined for the purpose of expressing the new thought.

[m] It has been ingeniously contended that the change from evening to morning was the *direct* result of St. Paul's interposition (*Christian Remembrancer*, art. on "Evening Communions" July, 1860).

[n] That presented by the Council of Gangra (can. xi.) is noticeable as an attempt to preserve the primitive custom of an Agapè in church against the assaults of a false asceticism.

[o] The history of the Agapae, in their connexion with the life of the Church, is full of interest, but would be out of place here. An outline of it may be found in August *Christl. Archaeol.* iii. 704-711.

[p] The practice of distributing bread, which has been blessed but not consecrated, to the congregation generally (children included), at the greater festivals of the Church, presents a vestige, or at least an analogue, of the old Agapè. Liturgical writers refer it to the period (A.D. 158-385) when the earlier practice was falling into disuse, and this taking its place as the expression of the same feeling. The bread thus distributed is known in the Eastern Church as εὐλογία, in the Western as the *panis benedictus*, the "pain bénî" of the modern French Church. The practice is still common in France and other parts of Europe. (Comp. Moroni, *Dizionar. Eccles.*, Pascal, *Liturg Cathol.*, in Migne's *Encyc. Theol.*, s. v. "Eulogia."



The disciples at Troas meet together to break bread. The hour is not definitely stated, but the fact that St. Paul's discourse was protracted till past midnight, and the mention of the many lamps, indicate a later time than that commonly fixed for the Greek δεῖπνον. If we are not to suppose a scene at variance with St. Paul's rule in 1 Cor. xi. 34, they must have had each his own supper before they assembled. Then came the teaching and the prayers, and then, towards early dawn, the breaking of bread, which constituted the Lord's Supper, and for which they were gathered together. If this midnight meeting may be taken as indicating a common practice, originating in reverence for an ordinance which Christ had enjoined, we can easily understand how the next step would be (as circumstances rendered the midnight gatherings unnecessary or inexpedient) to transfer the celebration of the Eucharist permanently to the morning hour, to which it had gradually been approximating.[q] Here also in later times there were traces of the original custom. Even when a later celebration was looked on as at variance with the general custom of the Church (Socomen, *supra*) it was recognised as legitimate to hold an evening communion, as a special commemoration of the original institution, on the Thursday before Easter (August. *Ep.* 118; *ad Jan.* c. 5-7); and again on Easter-eve, the celebration in the latter case probably taking place "very early in the morning while it was yet dark" (Tertull. *ad Uxor.* ii. c. 4).

The recurrence of the same liturgical words in Acts xxvii. 35 makes it probable, though not certain, that the food of which St. Paul thus partook was intended to have, for himself and his Christian companions, the character at once of the Agapè and the Eucharist. The heathen soldiers and sailors, it may be noticed, are said to have followed his example, not to have partaken of the bread which he had broken. If we adopt this explanation, we have in this narrative another example of a celebration in the early hours between midnight and dawn (comp. v. 27, 39), at the same time, *i. e.*, as we have met with in the meeting at Troas.

All the distinct references to the Lord's Supper which occur within the limits of the N. T. have, it is believed, been noticed. To find, as a recent writer has done (*Christian Remembrancer for April*, 1860), quotations from the Liturgy of the Eastern Church in the Pauline Epistles, involves (ingeniously as the hypothesis is supported) assumptions too many and too bold to justify our acceptance of it.[r] Extending the inquiry, however, to the times as well as the writings of the N. T., we find reason to believe that we can trace in the later worship of the Church some fragments of that which belonged to it from the beginning. The agreement of the four great families of liturgies implies the substratum of a common order. To that order may well have belonged the Hebrew words Hallelujah, Amen, Hosanna, Lord of Sabaoth; the salutations "Pence to all," "Peace to thee;" the Sursum Corda (ἄνω σχῶμεν τὰς καρδίας), the Trisagion, the Kyrie Eleison. We are justified in looking at these as having been portions of a liturgy that was really primitive; guarded from change with the tenacity with which the Christians of the second century clung to the traditions (the παραδόσεις of 2 Thess. ii. 15, iii. 6) of the first, forming part of the great deposit (παραθήκη) of faith and worship which they had received from the apostles and have transmitted to later ages (comp. Bingham, *Eccles. Antiq.* b. xv. c. 7; Augusti, *Christl. Archäol.* b. viii.; Stanley on 1 Cor. x. and xi.). [E. H. P.]

LO-RUH'AMAH (לֹא רֻחָמָה: οὐκ ἠλεημένη: *absque misericordia*), i. e. "the uncompassionated," the name of the daughter of Hosea the prophet, given to denote the utterly ruined and hopeless condition of the kingdom of Israel, on whom Jehovah would no more have mercy (Hos. i. 6).

LOT (לוֹט: Λώτ; Joseph. Λώτος, and so Veneto-Greek Vers.: *Lot*), the son of Haran, and therefore the nephew of Abraham (Gen. xi. 27, 31). His sisters were MILCAH the wife of Nahor, and ISCAH, by some identified with Sarah. The following genealogy exhibits the family relations:—

Haran died before the emigration of Terah and his family from Ur of the Chaldees (ver. 28), and Lot was therefore born there. He removed with the rest of his kindred to Charan, and again subsequently with Abram and Sarai to Canaan (xii. 4, 5). With them he took refuge in Egypt from a famine, and with them returned, first to the "South" (xiii. 1), and then to their original settlement between Bethel

[q] Comp. the "antelucanis coetibus" of Tertull. (*de Cor. Mil.* c. 3). The amalgamation in the ritual of the monastic orders, of the Nocturns, and Matin-Lauds, into the single office of Matins, presents an instance of an analogous transition (Palmer, *Orig. Liturg.* i. 302).

[r] 1 Cor. ii. 9, compared with the recurrence of the same words in the Liturgy with an antecedent to the relative which appears in the Epistle without one, is the passage on which most stress is laid. 1 Pet. ii. 16, and Eph. v. 14, are adduced as further instances.

[s] Terah's sons are given above in the order in which they occur in the record (Gen. xi. 27-32). But the facts that Nahor and Isaac (and if Iscah be Sarai, Abram also) married wives not of their own generation, but of the next below them, and that Abram and Lot travel together and behave as if exactly on equal terms, seem to show that Haran was the eldest of Terah's three descendants, and Abram the youngest. It would be a parallel to the case of Shem, Ham, and Japhet, where Japhet was really the eldest, though enumerated last.

and Ai (ver. 3, 4), where Abram had built his first altar (xiii. 4; comp. xii. 7), and invoked on it the name of Jehovah. But the pastures of the hills of Bethel, which had with ease contained the two strangers on their first arrival, were not able any longer to bear them, so much had their possessions of sheep, goats, and cattle increased since that time. It was not any disagreement between Abram and Lot—their relations continued good to the last; but between the slaves who tended their countless herds disputes arose, and a parting was necessary. The exact equality with which Abram treats Lot is very remarkable. It is as if they were really, according to the very ancient idiom of these records (Ewald on Gen. xxii.), "brethren," instead of uncle and nephew. From some one of the round swelling hills which surround Bethel—from none more likely than that which stands immediately on its east [BETHEL, vol. i. 199]—the two Hebrews looked over the comparatively empty land, in the direction of Sodom, Gomorrah, and Zoar (xiii. 10). "The occasion was to the two lords of Palestine—then almost 'free before them where to choose'—what in Grecian legends is represented under the figure of the Choice of Hercules; in the fables of Islam under the story of the Prophet turning back from Damascus." And Lot lifted up his eyes towards the left, and beheld all the precinct of the Jordan that it was well watered everywhere; like a garden of Jehovah; like that unutterably green and fertile land of Egypt he had only lately quitted. Even from that distance, through the clear air of Palestine, can be distinctly discovered the long and thick masses of vegetation which fringe the numerous streams that descend from the hills on either side, to meet the central stream in its tropical depths. And what it now is immediately opposite Bethel, such it seems then to have been "even to Zoar," to the farthest extremity of the sea which now covers the "valley of the fields[b]"—the fields of Sodom and Gomorrah. "No crust of salt, no volcanic convulsions, had as yet blasted its verdure, or alarmed the secure civilisation of the early Phoenician settlements which had struck root in its fertile depths." It was exactly the prospect to tempt a man who had no fixed purpose of his own, who had not like Abram obeyed a stern inward call of duty. So Lot left his uncle on the barren hills of Bethel, and he "chose all the precinct of the Jordan, and journeyed east," down the ravines which give access to the Jordan valley; and then when he reached it turned again southward and advanced as far as Sodom (11, 12). Here he "pitched his tent," for he was still a nomad. But his nomad life was virtually at an end. He was now to relinquish the freedom and independence of the simple life of the tent—a mode of life destined to be one of the great methods of educating the descendants of Abram—and encounter the corruptions which seem always to have attended the life of cities in the East—"the men of Sodom were wicked, and sinners before Jehovah exceedingly."

2. The next occurrence in the life of Lot is his capture by the four kings of the East, and his rescue by Abram (Gen. xiv.). Whatever may be the age of this chapter in relation to those before and after it, there is no doubt that, as far as the history of Lot is concerned, it is in its right position in the narrative. The events which it narrates must have occurred after those of ch. xiii., and before those of xviii. and xix. Abram has moved further south, and is living under the oaks of Mamre the Amorite, where he remained till the destruction of Sodom. There is little in it which calls for remark here. The term "brother" is once used (ver. 16) for Lot's relation to Abram (but comp. ver. 12, "brother's son"): and a word is employed for the possessions of Lot (ver. 11, A. V. "goods"), which from its being elsewhere in these early records (xlvi. 6; Num. xxxv 3) distinguished from "cattle," and employed specially for the spoil of Sodom and Gomorrah, may perhaps denote that Lot had exchanged the wealth of his pastoral condition for other possessions more peculiar to his new abode. Women are also named (ver. 16), though these may belong to the people of Sodom.

3. The last scene preserved to us in the history of Lot is too well known to need repetition. He is still living in Sodom (Gen. xix.). Some years have passed, for he is a well-known resident in the town, with wife, sons, and daughters, married and marriageable. But in the midst of the licentious corruption of Sodom—the eating and drinking, the buying and selling, the planting and building (Luke xvii. 28), and of the darker evils exposed in the ancient narrative—he still preserves some of the delightful characteristics of his wandering life, his fervent and chivalrous hospitality (xix. 2, 8), the unleavened bread of the tent of the wilderness (ver. 3), the water for the feet of the wayfarers (ver. 2), affording his guests a reception identical with that which they had experienced that very morning in Abraham's tent on the heights of Hebron (comp. xviii. 3, 6). It is this hospitality which receives the commendation of the author of the Epistle to the Hebrews in words which have passed into a familiar proverb, "be not forgetful to entertain strangers, for thereby some have entertained angels[c] unawares" (Heb. xiii. 2). On the other hand, it is his deliverance from the guilty and condemned city—the one just[d] man in that mob of sensual lawless wretches—which points the allusion of St. Peter, to "the godly delivered out of temptations, the unjust reserved unto the day of judgment to be punished, an ensample to those that after should live ungodly" (2 Pet. ii. 6-9). Where Zoar was situated, in which he found a temporary refuge during the destruction of the other cities of the plain, we do not know with absolute certainty. If, as is most probable, it was at the mouth of *Wady Kerak* (Rob. ii. 188, 517), then by "the mountain" is meant the very elevated ground east of the Dead Sea. If with De Saulcy we place it in *es-Zouara*, on the precipitous descent from Hebron, "the mountain" was the high ground of Judah. Either would afford caves for his subsequent dwelling. The former situation—on the eastern side of the Dead Sea, has in its favour the fact that it is in accordance with the position subsequently occupied by the Ammonites and Moabites. But this will be best examined under ZOAR.

The end of Lot's wife[e] is commonly treated as

[b] "Valley of Siddim"—Siddim = fields.

[c] The story of Baucis and Philemon, who unwittingly entertained Jupiter and Mercury (see *Dict. of Biography*, &c.), has been often compared with this.

[d] Δίκαιος, possibly referring to Gen. xviii. 23-33, where the LXX. employ this word throughout. The rabbinical tradition is that he was actually "judge" of Sodom, and sate in the gate in that capacity. (See quotations in Otho, *Lex. Rabb.* "Loth," and "Sodomah.")

[e] In the Jewish traditions her name is Edith—עידית. One of the daughters was called Plutith—פלוטית. See Fabricius, *Cod. Pseudep. V. T.* 431.

use of the "difficulties" of the Bible. But it surely need not be so. It cannot be necessary, as some have done, to create the details of the story where none are given—to describe "the unhappy woman struck dead"—"a blackened corpse—smothered and stiffened as she stood, and fixed for the time to the soil by saline or bituminous incrustations—like a pillar of salt." On these points the record is silent. Its words are simply these: "His wife looked back from behind him,[f] and became a pillar of salt;"—words which neither in themselves nor in their position in the narrative afford any warrant for such speculations. In fact, when taken with what has gone before, they contradict them, for it seems plain, from vers. 22, 23, that the work of destruction by fire did not commence till after Lot had entered Zoar. But this, like the rest of her fate, is left in mystery.

The value and the significance of the story to us are contained in the allusion of Christ (Luke xvii. 32):—"In that day he that is in the field let him not return back: remember Lot's wife," who did. "Whosoever shall seek to save his life shall lose it." It will be observed that there is no attempt in the narrrative to invest the circumstance with permanence; no statement—as in the case of the pillar erected over Rachel's grave (xxxv. 20)—that it was to be seen at the time of the compilation of the history. And in this we surely have a remarkable instance of that sobriety which characterises the statements of Scripture, even where the events narrated are most out of the ordinary course.

Later ages have not been satisfied so to leave the matter, but have insisted on identifying the "pillar" with some one of the fleeting forms which the perishable rock of the south end of the Dead Sea is constantly assuming in its process of decomposition and liquefaction (Anderson's *Off. Narr.* 180, 1). The first allusion of this kind is perhaps that in Wisd. x. 7, where "a standing pillar of salt, the monument (*μνημεῖον*) of an unbelieving soul," is mentioned with the "waste land that smoketh," and the "plants bearing fruit that never come to ripeness," as remaining to that day, a testimony to the wickedness of Sodom. Josephus also (*Ant.* i. 11, §4) says that he had seen it, and that it was then remaining. So too do Clemens Romanus and Irenaeus (quoted by Kitto, *Cycl.* "Lot").[g] So does Benjamin of Tudela, whose account is more than usually circumstantial (ed. Asher, i. 72).[h] And so doubtless have travellers in every age—they certainly have in our own times. See Maundrell, March 30; Lynch, *Report*, p. 15; and Anderson's *Off. Narrative*, 181, where an account is given of a pillar or spur standing out detached from the general mass of the *Jebel Usdum*, about 40 feet in height, and which was recognised by the sailors of the expedition as "Lot's wife."

The story of the origin of the nations of Moab and Ammon from the incestuous intercourse between Lot and his two daughters, with which his history abruptly concludes, has been often treated as if it were a Hebrew legend which owed its origin to the bitter hatred existing from the earliest to the latest times between the "Children of Lot" and the Children of Israel.[i] The horrible nature of the transaction—not the result of impulse or passion, but a plan calculated and carried out, and that not once but twice, would prompt the wish that the legendary theory were true.[k] But even the most destructive critics (as, for instance, Tuch) allow that the narrative is a continuation without a break of that which precedes it, while they fail to point out any marks of later date in the language of this portion; and it cannot be questioned that the writer records it as an historical fact.

Even if the legendary theory were admissible, there is no doubt of the fact that Ammon and Moab sprang from Lot. It is affirmed in the statements of Deut. ii. 9 and 19, as well as in the later document of Ps. xxxiii. 8, which Ewald ascribes to the time when Nehemiah and his newly-returned colony were suffering from the attacks and obstructions of Tobiah the Ammonite and Sanballat the Horonite (Ewald, *Dichter*, Ps. 83).

The Mohammedan traditions of Lot are contained in the Koran, chiefly in chaps. vii. and xi.: others are given by D'Herbelot (*s. v.* "Loth"). According to these statements he was sent to the inhabitants of the five cities as a preacher, to warn them against the unnatural and horrible sins which they practised—sins which Mohammed is continually denouncing, but with less success than that of drunkenness, since the former is perhaps the most common, the latter the rarest vice, of Eastern cities. From Lot's connexion with the inhabitants of Sodom, his name is now given not only to the vice in question (Freytag, *Lexicon*, iv. 136 *a*), but also to the people of the five cities themselves—the *Lothi*, or *Kaûm Loth*. The local name of the Dead Sea is *Bahr Lût*—Sea of Lot. [G.]

LOT. The custom of deciding doubtful questions by lot is one of great extent and high antiquity, recommending itself as a sort of appeal to the Almighty, secure from all influence of passion or bias, and is a sort of divination employed even by the gods themselves (Hom. *Il.* xxii. 209; Cic. *de Div.* i. 34, ii. 41). The word *sors* is thus used for an oracular response (Cic. *de Div.* ii. 56). [DIVINATION.] Among heathen instances the following may be cited:—1. Choice of a champion or of priority in combat (*Il.* iii. 316, vii. 171; Her. iii. 108). 2. Decision of fate in battle (*Il.* xx. 209). 3. Appointment of magistrates, jurymen, or other functionaries (Arist. *Pol.* iv. 16; Schol. *On Aristoph.* Plut. 277; Her. vi. 109; Xen. *Cyr.* iv. 5, 55; Demosth. *c. Aristog.* i. p. 778, 1; *Dict. of Antiq.* "Dicastes"). 4. Priests (Aesch. *in Tim.* p. 188, Bekk.). 5. A German practice of deciding by marks on twigs, mentioned by Tacitus (*Germ.* 10), 6. Division of conquered or colonized land (Thuc iii. 50; Plut. *Pericl.* 84; Boeckh, *Public Econ. of Ath.* ii. 170).

Among the Jews also the use of lots, with a religious intention, direct or indirect, prevailed extensively. The religious estimate of them may

[g] So the quotations from the Fathers and others in Suicer's *Lexicon* (*s. v.* "Lot"), and in Mislin, *Lieux Saints* (ii. 234).

[h] Rabbi Petachia, on the other hand, looked for it "but did not see it; it no longer exists" (Ed. Benisch, 81

[i] See Tuch, *Genesis*, 369. Von Bohlen ascribes the legend to the latter part of the reign of Josiah.

[k] For the pretty legend of the repentance of Lot, and of the tree which he planted, which, being cut down for use in the building of the Temple, was afterwards employed for the Cross, see Fabricius, *Cod. Pseudep. V. T.*, 428-31

be gathered from Prov. xvi. 33. The following historical or ritual instances correspond in most respects to those of a heathen kind mentioned above:—

1. Choice of men for an invading force (Judg i. 1, xx. 10).

2. Partition, (*a*) of the soil of Palestine among the tribes (Num. xxvi. 55; Josh. xviii. 10; Acts xiii. 19). (*b*) of Jerusalem; *i. e.* probably its spoil or captives among captors (Obad. 11); of the land itself in a similar way (1 Macc. iii. 36). (*c*) After the return from captivity, Jerusalem was populated by inhabitants drawn by lot in the proportion of $\frac{1}{10}$ of the tribes of Judah and Benjamin (Neh. xi. 1, 2; see Ps. xvi. 5, 6, Ez. xxiv. 6). (*d*) Apportionment of possessions, or spoil, or of prisoners, to foreigners or captors (Joel iii. 3; Nah. iii. 10; Matt. xxvii. 35).

3. (*a*) Settlement of doubtful questions (Prov. xvi. 33, where "lap" is perhaps = urn; xviii. 18). (*b*) A mode of divination among heathens by means of arrows, two inscribed, and one without mark, *βελομαντεία* (Hos. iv. 12; Ez. xxi. 21; Mauritius, *de Sortitione*, c. 14, §4: see also Esth. iii. 7, ix. 24-32; Mishna, *Taanith*, ii. 10. [DIVINATION; PURIM.] (c) Detection of a criminal, as in the case of Achan (Josh. vii. 14, 18). A notion prevailed among the Jews that this detection was performed by observing the shining of the stones in the high-priest's breastplate (Mauritius, c. 21, §4). Jonathan was discovered by lot (1 Sam. xiv. 41, 42). (*d*) Appointment of persons to offices or duties. Saul (1 Sam. x. 20, 21), said to have been chosen as above in Achan's case. St. Matthias, to replace Judas among the Twelve (Acts i. 24-26). Distribution of priestly offices in the Temple-service among the sixteen of the family of Eleazar, and the eight of that of Ithamar (1 Chr. xxiv. 3, 5, 19; Luke i. 9). Also of the Levites for similar purposes (1 Chr. xxiii. 28, xxiv. 20-31, xxv. 8, xxvi. 13; Mishna, *Tamid*, i. 2, iii. 1, v. 2; *Joma*, ii. 2, 3, 4; *Shabb.* xxiii. 2; Lightfoot, *Hor. Hebr.* in Luke i. 8, 9. vol. ii. p. 489).

Election by lot appears to have prevailed in the Christian Church as late as the 7th century (Bingham, *Eccles. Antiq.* iv. 1, 1, vol i. p. 426; Bruns, *Conc.* ii. 66).

(*e*) Selection of the scape-goat on the Day of Atonement (Lev. xvi. 8, 10). The two inscribed tablets of boxwood, afterwards of gold, were put into an urn, which was shaken, and the lots drawn out (*Joma*, iii. 9, iv. 1). [ATONEMENT, DAY OF.]

4. The use of words heard or passages chosen at random from Scripture. *Sortes Biblicae*, like the *Sortes Virgilianae*, prevailed among Jews, as they have also among Christians, though denounced by several Councils (*Dict. of Antiq.* "Sortes;" Johnson, "Life of Cowley," *Works*, ix. 8; Bingham, *Eccl. Ant.* xvi. 5, 3, id. vi. 53, &c.; Bruns, *Conc.* ii. 145-154, 166; Mauritius, c. 15; Hofmann, *Lex.* "Sortes"). [H. W. P.]

LO'TAN (לוֹטָן: Λωτάν: *Lotan*), the eldest son of Seir the Horite, and a "duke" or chief of his tribe in the land of Edom (Gen. xxxvi. 20, 22, 29; 1 Chr. i. 38, 39).

LOTHASU'BUS (Λωθάσουβος: *Abusthas, Sabus*), a corruption of HASHUM in Neh. viii. 4, for which it is not easy to account (1 Esd. ix. 44). The Vulg is a further corruption of the LXX.

LOTS, FEAST OF. [PURIM.]

LOVE-FEASTS (ἀγάπαι: *epulae, convivia*, in this sense used only twice, Jude 12, and 2 Pet. ii. 13, in which latter place, however, ἀπάταις is also read), an entertainment in which the poorer members of the Church partook, furnished from the contributions of Christians resorting to the Eucharistic celebration, but whether before or after it may be doubted. The true account of the matter is probably that given by Chrysostom, who says that after the early community of goods had ceased, the richer members brought to the Church contributions of food and drink, of which, after the conclusion of the services and the celebration of the Eucharist, all partook together, by this means helping to promote the principle of love among Christians (*Hom. in* 1 *Cor.* xi. 19, vol. iii. p. 293, and *Hom.* xxvii. *in* 1 *Cor.* xi. vol. x. p. 281, ed. Gaume). The intimate connexion, especially in early times, between the Eucharist itself and the love-feast, has led several writers to speak of them almost as identical. Of those who either take this view, or regard the feast as subsequent to the Eucharist, may be mentioned Pliny, who says the Christians met and exchanged sacramental pledges against all sorts of immorality; after which they separated, and met again to partake in an entertainment.[a] The same view is taken by Ignatius, *ad Smyrn.* c. 8; Tertull. *Apol.* 39; Clem. Alex. *Strom.* vii. 322 (vol. ii. p. 892). iii. 185 (vol. i. 514), but in *Paed.* ii. 61 (vol. i. p. 165) he seems to regard them as distinct; *Apost. Const.* ii. 28, 1: and besides these, Jerome on 1 Cor. xi.; Theodoret and Oecumenius, quoted by Bingham, who considers that the Agapē was subsequent (*Orig. Eccl.* xv. 6, 7; vol. v. p. 284); Hofmann, *Lex.* "Agapae." On the other side may be mentioned Grotius (on 2 Pet. ii. 13, in *Crit. Sacr.*), Suicer (*Thes. Eccl.* vol. i. s. v.), Hammond, Whitby, Corn. à Lapide, and authorities quoted by Bingham, *l. c.*[b] The almost universal custom to receive the Eucharist fasting proves that in later times the love-feasts must have followed, not preceded, the Eucharist (Sozomen, *H. E.* vii. 19; Aug. *c. Faust.* xx. 20; *Ep.* liv. (alias cxviii.); *ad Januar.* c. 6, vol. ii. p. 203, ed. Migne; Conc. Carth. iii. A.D. 397. c. 29; Bruns, *Conc.* i. p. 127): but the exception of one day from the general rule (the day called Coena Domini, or Maunday Thursday) seems to argue a previously different practice. The love-feasts were forbidden to be held in churches by the Council of Laodicea, A.D. 320, Conc. Quinisext., A.D. 692, c. 74, Aix-la-Chapelle, A.D. 816; but in some form or other they continued to a much later period. Entertainments at births, deaths, and marriages were also in use under the names of *agapae natalitiae, nuptiales*, and *funerales*. (Bede, *Hist. Eccl. Gent. Angl.* i. 30; Ap. Const. viii. 44, 1; Theodoret, *Evang. Verit.* viii. p. 923, 924, ed. Schulz; Greg. Naz. *Ep.* i. 14, and *Carm.* x.; Hofmann, *Lex.* l. c.) [H. W. P.]

LOZ'ON (Λοζών: *Dedon*), one of the sons of "Solomon's servants" who returned with Zorobabel (1 Esd. v. 33). The name corresponds with DARKON in the parallel lists of Ezr. ii. 56 and Neh. vii. 58, and the variation may be an error of the

[a] "Promiscuum et innoxium, quod ipsum" (*i. e.* the entertainment, surely not the *sacramentum*) "facere desisse post edictum meum" (*Ep.* x. 97).

[b] This subject is also discussed under LORD'S SUPPER.

transcriber, which is easily traceable when the word is written in the uncial character.

LUBIM (לוּבִים, 2 Chr. xii. 3, xvi. 8; Nah. iii. 9, לֻבִים, Dan. xi. 43: Λίβυες: *Libyes*; except Daniel, *Libyi*), a nation mentioned as contributing, together with Cushites and Sukkiim, to Shishak's army (2 Chr. xii. 3); and apparently as forming with Cushites the bulk of Zerah's army (xvi. 8), spoken of by Nahum (iii. 9) with Put or Phut, as helping No-Amon (Thebes), of which Cush and Egypt were the strength; and by Daniel (xi. 43) as paying court with the Cushites to a conqueror of Egypt or the Egyptians. These particulars indicate an African nation under tribute to Egypt, if not under Egyptian rule, contributing, in the 10th century B.C., valuable aid in mercenaries or auxiliaries to the Egyptian armies, and down to Nahum's time, and a period prophesied of by Daniel, probably the reign of Antiochus Epiphanes [ANTIOCHUS IV.], assisting, either politically or commercially, to sustain the Egyptian power, or, in the last case, dependent on it. These indications do not fix the geographical position of the Lubim, but they favour the supposition that their territory was near Egypt, either to the west or south.

For more precise information we look to the Egyptian monuments, upon which we find representations of a people called REBU, or LEBU (R and L having no distinction in hieroglyphics), who cannot be doubted to correspond to the Lubim. These Rebu were a warlike people, with whom Menptah (the son and successor of Rameses II.) and Rameses III., who both ruled in the 13th century B.C., waged successful wars. The latter king routed them with much slaughter. The sculptures of the great temple he raised at Thebes, now called that of Medeenet Haboo, give us representations of the Rebu, showing that they were fair, and of what is called a Semitic type, like the Berbers and Kabyles. They are distinguished as northern, that is, as parallel to, or north of, Lower Egypt. Of their being African there can be no reasonable doubt, and we may assign them to the coast of the Mediterranean, commencing not far to the westward of Egypt. We do not find them to have been mercenaries of Egypt from the monuments, but we know that the kindred Mashawasha-u were so employed by the Bubastite family, to which Shishak and probably Zerah also belonged; and it is not unlikely that the latter are intended by the Lubim, used in a more generic sense than Rebu, in the Biblical mention of the armies of these kings (Brugsch, *Geogr. Inschr.* ii. 79, *seq.*). We have already shown that the Lubim are probably the Mizraite LEHABIM: if so, their so-called Semitic physical characteristics, as represented on the Egyptian monuments, afford evidence of great importance for the inquirer into primeval history. The mention in Manetho's Dynasties that, under Necherophes, or Necherochis, the first Memphite king, and head of the third dynasty (B.C. cir. 2600), the Libyans revolted from the Egyptians, but returned to their allegiance through fear on a wonderful increase of the moon,[a] may refer to the Lubim, but may as probably relate to some other African people, perhaps the Naphtuhim, or Phut (Put).

[a] Νεχερώφης . . . ὑφ' οὗ Λίβυες ἀπέστησαν Αἰγυπτίων . . . τῆς σελήνης τότε μὲν αὐξηθείσης διὰ δέος ἑαυτοῖς ὑπὸ τῶν Λιβύων (Africanus ap. Cory. *Anc. Frag.* 2nd ed. p. 100, comp. 102.)

The historical indications of the Egyptian monuments thus lead us to place the seat of the Lubim, or primitive Libyans, on the African coast to the westward of Egypt, perhaps extending far beyond the Cyrenaica. From the earliest ages of which we have any record, a stream of colonization has flowed from the East along the coast of Africa, north of the Great Desert, as far as the Pillars of Hercules. The oldest of these colonists of this region were doubtless the Lubim and kindred tribes, particularly the Mashawasha-u and Tahen-nu of the Egyptian monuments, all of which appear to have ultimately taken their common name of Libyans from the Lubim. They seem to have been first reduced by the Egyptians about 1250 B.C., and to have been afterwards driven inland by the Phoenician and Greek colonists. Now, they still remain on the northern confines of the Great Desert, and even within it, and in the mountains, while their later Shemite rivals pasture their flocks in the rich plains. Many as are the Arab tribes of Africa, one great tribe, that of the Benee 'Alee, extends from Egypt to Morocco, illustrating the probable extent of the territory of the Lubim and their cognates. It is possible that in Ezek. xxx. 5, Lub, לוּב, should be read for Chub, כוּב; but there is no other instance of the use of this form: as, however, לוּד and לוּדִים are used for one people, apparently the Mizraite Ludim, most probably kindred to the Lubim, this objection is not conclusive [CHUB; LUDIM.] In Jer. xlvi. 9, the A. V renders Phut "the Libyans;" and in Ezek. xxxviii 5, "Libya." [R. S. P.]

LU'CAS (Λουκᾶς: *Lucas*), a friend and companion of St. Paul during his imprisonment at Rome (Philem. 24). He is the same as Luke, the beloved physician, who is associated with Demas in Col. iv. 14, and who remained faithful to the apostle when others forsook him (2 Tim. iv. 11), on his first examination before the emperor. For the grounds of his identification with the evangelist St. Luke, see article LUKE.

LU'CIFER (הֵילֵל: Ἑωσφόρος: *Lucifer*). The name is found in Is. xiv. 12, coupled with the epithet "son of the morning," and (being derived from הָלַל, "to shine") clearly signifies a "bright star," and probably what we call the morning star.[a] In this passage it is a symbolical representation of the king of Babylon, in his splendour and in his fall; perhaps also it refers to his glory as paling before the unveiled presence of God. Its application (from St. Jerome downwards) to Satan in his fall from heaven, arises probably from the fact that the Babylonian Empire is in Scripture represented as the type of tyrannical and self-idolising power, and especially connected with the empire of the Evil One in the Apocalypse. The fall of its material power before the unseen working of the providence of God is therefore a type of the defeat of all manifestations of the tyranny of Satan. This application of the name "Lucifer" as a proper name of the devil is plainly ungrounded; but the magnificence of the imagery of the prophet, far transcending in grandeur the fall of Nebuchadnezzar to

[a] The other interpretation, which makes הֵילֵל an imperative of the verb יָלַל, in the sense of "wail" or "lament," injures the parallelism, and is generally regarded as untenable.

which it immediately refers, has naturally given a colour to the symbolical interpretation of the passage, and fixed that application in our modern language. [A. B.]

LU'CIUS (Λεύκιος, Λούκιος), a Roman consul (ὕπατος Ῥωμαίων), who is said to have written the letter to Ptolemy (Euergetes), which assured Simon I. of the protection of Rome (cir. B.C. 139-8; 1 Macc. xv. 10, 15-24). The whole form of the letter—the mention of one consul only, the description of the consul by the praenomen, the omission of the senate and of the date (comp. Wernsdorf, *De fide Macc.* § cxix.)—shows that it cannot be an accurate copy of the original document; but there is nothing in the substance of the letter which is open to just suspicion.

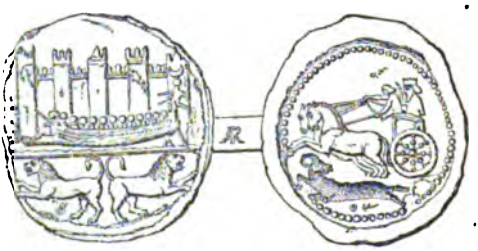
The imperfect transcription of the name has led to the identification of Lucius with three distinct persons—(1.) [Lucius] Furius Philus (the lists, Clinton, *Fasti Hell.* ii. 112, give P. Furius Philus), who was not consul till B.C. 136, and is therefore at once excluded. (2.) Lucius Caecilius Metellus Calvus, who was consul in B.C. 142, immediately after Simon assumed the government. On this supposition it might seem not unlikely that the answer which Simon received to an application for protection, which he made to Rome directly on his assumption of power (comp. 1 Macc. xiv. 17, 18) in the consulship of Metellus, has been combined with the answer to the later embassy of Numenius (1 Macc. xiv. 24, xv. 18). (3.) But the third identification with Lucius Calpurnius Piso, who was consul B.C. 139, is most probably correct. The date exactly corresponds, and, though the praenomen of Calpurnius is not established beyond all question, the balance of evidence is decidedly against the common lists. The *Fasti Capitolini* are defective for this year, and only give a fragment of the name of Popillius, the fellow-consul of Calpurnius. Cassiodorus (*Chron.*), as edited, gives *Cn.* Calpurnius, but the eye of the scribe (if the reading is correct) was probably misled by the names in the years immediately before. On the other hand Valerius Maximus (i. 3) is wrongly quoted from the printed text as giving the same praenomen. The passage in which the name occurs is in reality no part of Valerius Maximus, but a piece of the abstract of Julius Paris inserted in the text. Of eleven MSS. of Valerius which the writer has examined, it occurs only in one (Mus. Brit. *Burn.* 209), and there the name is given *Lucius* Calpurnius, as it is given by Mai in his edition of Julius Paris (*Script. Vet. Nova Coll.* iii. 7). Sigonius says rightly (*Fasti Cons.* p. 207): "Cassiodorus prodit consules Cn. Pisonem epitoma L. Calpurnium" The chance of an error of transcription in Julius Paris is obviously less than in the *Fasti* of Cassiodorus; and even if the evidence were equal, the authority of 1 Macc. might rightly be urged as decisive in such a case.

Josephus omits all mention of the letter of "Lucius" in his account of Simon, but gives one very similar in contents (*Ant.* xiv. 8, §5), as written on the motion of *Lucius* Valerius in the ninth (nineteenth) year of Hyrcanus II.; and unless the two letters and the two missions which led to them were purposely assimilated, which is not wholly improbable, it must be supposed that he has been guilty of a strange oversight in removing the incident from its proper place. [B. F. W.]

LU'CIUS (Λούκιος: *Lucius*), a kinsman or fellow-tribesman of St. Paul (Rom. xvi. 21), by whom he is said by tradition to have been ordained bishop of the church of Cenchreae, from whence the Epistle to the Romans was written (*Apost. Const.* vii. 46). He is thought by some to be the same with Lucius of Cyrene. (See the following article.)

LU'CIUS OF CYRE'NE (Λούκιος ὁ Κυρηναῖος). Lucius, thus distinguished by the name of his city—the capital of a Greek colony in Northern Africa, and remarkable for the number of its Jewish inhabitants—is first mentioned in the N. T. in company with Barnabas, Simeon called Niger, Manaen, and Saul, who are described as prophets and teachers of the church at Antioch (Acts xiii. 1). These honoured disciples having, while engaged in the office of common worship, received commandment from the Holy Ghost to set apart Barnabas and Saul for the special service of God, proceeded after fasting and prayer, to lay their hands upon them. This is the first recorded instance of a formal ordination to the office of Evangelist, but it cannot be supposed that so solemn a commission would have been given to any but such as had themselves been ordained to the ministry of the Word, and we may therefore assume that Lucius and his companions were already of that number. Whether Lucius was one of the seventy disciples, as stated by Pseudo-Hippolytus, is quite a matter of conjecture, but it is highly probable that he formed one of the congregation to whom St. Peter preached on the day of Pentecost (Acts ii. 10); and there can hardly be a doubt that he was one of "the men of Cyrene" who, being "scattered abroad upon the persecution that arose about Stephen," went to Antioch preaching the Lord Jesus (Acts xi. 19, 20).

It is commonly supposed that Lucius is the kinsman of St. Paul mentioned by that apostle as joining with him in his salutation to the Roman brethren (Rom. xvi. 21). There is certainly no sufficient reason for regarding him as identical with St. Luke the Evangelist, though this opinion was apparently held by Origen (*in loco*), and is supported by Calmet, as well as by Wetstein, who adduces in confirmation of it the fact reported by Herodotus (iii. 121), that the Cyrenians had throughout Greece a high reputation as physicians. But it must be observed that the names are clearly distinct. The missionary companion of St. Paul was not Lucius, but Lucas or Lucanus, "the beloved physician," who, though named in three different Epistles (Col. iv. 14; 2 Tim. iv. 11; Philem. 24), is never referred to as a relation. Again, it is hardly probable that St. Luke, who suppresses his own name as the companion of St. Paul, would have mentioned himself as one among the more distinguished prophets and teachers at Antioch. Olshausen, indeed, asserts confidently that the notion of St. Luke and Lucius being the same person has nothing whatever to support it (Clark's *Theol. Lib.* iv. 513). In the *Apostolical Constitutions*, vii. 46, it is stated that St. Paul consecrated Lucius bishop of Cenchreae. Different traditions make Lucius the first bishop of Cyrene and of Laodicea in Syria. [E. H—e.]



LUD (לוּד: Λούδ: *Lud*), the fourth name in the list of the children of Shem (Gen. x. 22; comp. 1 Chr. i. 17), that of a person or tribe, or both, descended from him. It has been supposed that Lud was the ancestor of the Lydians (Jos. *Ant.* i. 6, §4;

are represented by the Lydus of their mythical ancestor (Herod. i. 7). The Shemite character of their manners, and the strong orientalism of the art of the Lydian kingdom during its latest period and after the Persian conquest, but before the predominance of Greek art in Asia Minor, favour this idea; but, on the other hand, the Egyptian monuments show us in the 13th, 14th, and 15th centuries B.C. a powerful people called RUTEN or LUDEN, probably seated near Mesopotamia, and apparently north of Palestine, whom some, however, make the Assyrians. We may perhaps conjecture that the Lydians first established themselves near Palestine, and afterwards spread into Asia Minor; the occupiers of the old seat of the race being destroyed or removed by the Assyrians. For the question whether the Lud or Ludim mentioned by the prophets be of this stock or the Mizraite Ludim of Gen. x., see the next article. [R. S. P.]

LUDIM (לוּדִים, Gen. x. 13, לוּדִיִּם, 1 Chr. i. 11: Ἀουδιείμ: *Ludim*), a Mizraite people or tribe. From their position at the head of the list of the Mizraites, it is probable that the Ludim were settled to the west of Egypt, perhaps further than any other Mizraite tribe. Lud and the Ludim are mentioned in four passages of the prophets. It is important to ascertain, if possible, whether the Mizraite Ludim or the Shemite Lud be referred to in each of these passages. Isaiah mentions "Tarshish, Pul, and Lud, that draw the bow (מֹשְׁכֵי קָשֶׁת), Tubal, and Javan, the isles afar off" (lxvi. 19). Here the expression is the plural, "that draw the bow" (*tendentes sagittas*, Vulg.), may refer only to Lud, and therefore not connect it with one or both of the names preceding. A comparison with the other three passages, in all which Phut is mentioned immediately before or after Lud or the Ludim, makes it almost certain that the LXX. reading, Phut, Φούδ, for Pul, a word not occurring in any other passage, is the true one, extraordinary as is the change from מֹשְׁכֵי to Μοσόχ. [PUL.] Jeremiah, in speaking of Pharaoh Necho's army, makes mention of "Cush and Phut that handle the buckler; and the Ludim that handle [and] bend the bow"[a] (xlvi 9). Here the Ludim are associated with African nations, as mercenaries or auxiliaries of the king of Egypt, and therefore it would seem probable, *primâ facie*, that the Mizraite Ludim are intended. Ezekiel, in the description of Tyre,[b] speaks thus of Lud: "Persia and Lud and Phut were in thine army, thy men of war: buckler (מָגֵן) and helmet hung they up in thee; they set thine adorning" (xxvii. 10). In this place Lud might seem to mean the Shemite Lud, especially if the latter be connected with Lydia; but the association with Phut renders it as likely that the nation or country is that of the African Ludim. In the prophecy against Gog a similar passage occurs. "Persia, Cush, and Phut (A.V. "Libya") with them [the army of Gog]; all of them [with] buckler (מָגֵן) and helmet" (xxxviii. 5). It seems from this that there were Persian mercenaries at this time, the prophet perhaps, if speaking of a remote future period, using their name and that of other well-known mercenaries in a general sense. The association of Persia and Lud in the former passage loses therefore somewhat of its weight. In one of the prophecies against Egypt Lud is thus mentioned among the supports of that country: "And the sword shall come upon Mizraim, and great pain shall be in Cush, at the falling of the slain in Mizraim, and they shall take away her multitude (הֲמוֹנָהּ),[c] and her foundations shall be broken down. Cush, and Phut, and Lud, and all the mingled people (עֶרֶב), and Chub, and the

[a] The manner in which these foreign troops in the Egyptian army are characterized is perfectly in accordance with the evidence of the monuments, which, although about six centuries earlier than the prophet's time, no doubt represent the same condition of military matters. The only people of Africa beyond Egypt, portrayed on the monuments, whom we can consider as most probably of the same stock as the Egyptians, are the ReBU, who are the Libim of the Bible, almost certainly the same as the Mizraite Lehabim. [LEHABIM; LUBIM.] Therefore we may take the ReBU as probably illustrating the Ludim, supposing the latter to be Mizraites, in which case they may indeed be included under the same name as the Libim, if the appellation ReBU be wider than the Lubim of the Bible, and also as illustrating Cush and Phut. The archers are spoken of as handling the buckler. The Egyptians are generally represented with small shields, frequently round; the ReBU with small round shields, for which the term here used, מָגֵן, the small shield, and the expression "that handle," are perfectly appropriate. That the Ludim should have been archers, and apparently armed with a long bow that was strung with the aid of the foot by treading (הֹרְכֵי קָשֶׁת), is note-worthy, since the Africans were always famous for their archery. The ReBU, and one other of the foreign nations that served in the Egyptian army—the monuments show the former only in enemies—were bowmen, being armed with a bow of moderate length; the other mercenaries—of whom we can easily identify the Philistine Cherethim, though they probably include certain of the mercenaries or auxiliaries termed in the Bible—carrying swords and javelins, not bows. These points of agreement, founded on our examination of the monuments, are of no little weight, as proving the accuracy of the Bible.

[b] The description of Tyre in this prophecy of Ezekiel receives striking illustration from what we believe to be its earliest coins. These coins were held to be most probably of Tyre, or some other Phoenician city, or possibly of Babylon, on numismatic evidence alone, by the writer's lamented colleague at the British Museum, Mr Burgon. They probably date during the 5th century B.C., they may possibly be a little older; but it is most reasonable to consider them as of the time of, and issued by Darius Hystaspis. The chief coins are octodrachms of the earlier Phoenician weight [MONEY], bearing, on the obverse, a war-galley beneath the towered walls of a city, and, on the reverse, a king in a chariot, with an incuse

goat beneath. This combination of galley and city is exactly what we find in the description of Tyre in Ezekiel, which mainly portrays a state-galley, but also refers to a port, and speaks of towers and walls

[c] There may perhaps be here a reference by paronomasia to Amon, the chief divinity of Thebes, the Hebrew name of which נֹא אָמוֹן contains his name. [AMON.]

children of the land of the covenant, shall fall by the sword with them" (xxx. 4, 5). Here Lud is associated with Cush and Phut, as though an African nation. The Ereb, whom we have called "mingled people" rather than "strangers," appear to have been an Arab population of the Sinaitic peninsula, perhaps including Arab or half-Arab tribes of the Egyptian desert to the east of the Nile. Chub is a name nowhere else occurring, which perhaps should be read Lub, for the country or nation of the Lubim. [CHUB; LUBIM.] The "children of the land of the covenant" may be some league of tribes, as probably were the Nine Bows of the Egyptian inscriptions; or the expression may mean nations or tribes allied with Egypt, as though a general designation for the rest of its supporters besides those specified. It is noticeable that in this passage, although Lud is placed among the close allies or supporters of Egypt, yet it follows African nations, and is followed by a nation or tribe at least partly inhabiting Asia, although possibly also partly inhabiting Africa.

There can be no doubt that but one nation is intended in these passages, and it seems that thus far the preponderance of evidence is in favour of the Mizraite Ludim. There are no indications in the Bible known to be positive of mercenary or allied troops in the Egyptian armies, except of Africans, and perhaps of tribes bordering Egypt on the east. We have still to inquire how the evidence of the Egyptian monuments and of profane history may affect our supposition. From the former we learn that several foreign nations contributed allies or mercenaries to the Egyptian armies. Among them we identify the REBU with the Lubim, and the SHARYATANA with the Cherethim, who also served in David's army. The latter were probably from the coast of Palestine, although they may have been drawn in the case of the Egyptian army from an insular portion of the same people. The rest of these foreign troops seem to have been of African nations, but this is not certain. The evidence of the monuments reaches no lower than the time of the Bubastite line. There is a single foreign contemporary inscribed record on one of the colossi of the temple of Aboo-Simbel in Nubia, recording the passage of Greek mercenaries of a Psammetichus, probably the first (Wilkinson, *Modern Egypt and Thebes*, ii. 329).[d] From the Greek writers, who give us information from the time of Psammetichus I. downwards, we learn that Ionian, Carian, and other Greek mercenaries, formed an important element in the Egyptian army in all times when the country was independent, from the reign of that king until the final conquest by Ochus. These mercenaries were even settled in Egypt by Psammetichus. There does not seem to be any mention of them in the Bible, excepting they be intended by Lud and the Ludim in the passages that have been considered. It must be recollected that it is reasonable to connect the Shemite Lud with the Lydians, and that at the time of the prophets by whom Lud and the Ludim are mentioned, the Lydian kingdom generally or always included the more western part of Asia Minor, so that the terms Lud and Ludim might well apply to the Ionian and Carian mercenaries drawn from this territory.[e] We must therefore hesitate before absolutely concluding that this important portion of the Egyptian mercenaries is not mentioned in the Bible, upon the *primâ facie* evidence that the only name which could stand for it would seem to be that of an African nation. [R. S. P.]

[d] The leader of these mercenaries is called in the inscription "Psammatichus, son of Theocles;" which shows, in the adoption of an Egyptian name, the domestication of these Greeks in Egypt.

[e] Any indications of an alliance with Lydia under Amasis are insufficient to render it probable that even then Lydians fought in the Egyptian army, and threw no light on the earlier relations of the Egyptians and Lydians.

LU'HITH, THE ASCENT OF (מַעֲלֵה הַלְּחִית, in Isaiah; and so also in the *Kri* or corrected text of Jeremiah, although there the original text has הַלְּחוֹת, *i. e.* hal-Luhôth: ἡ ἀνάβασις Λουείθ; in Jeremiah, Ἀλαθ,[a] Alex. Ἀλαείθ: *ascensus Luith*), a place in Moab; apparently the ascent to a sanctuary or holy spot on an eminence. It occurs only in Is. xv. 5, and the parallel passage of Jeremiah (xlviii. 5). It is mentioned with ZOAR and HORONAIM, but whether because they were locally connected, or because they were all sanctuaries, is doubtful. In the days of Eusebius and Jerome (*Onomasticon*, "Luith") it was still known, and stood between Areopolis (Rabbath-Moab) and Zoar, the latter being probably at the mouth of the *Wady Kerak*. M. de Saulcy (*Voyage*, ii. 19, and *Map*, sheet 9) places it at "Kharbet-Noushin;" but this is north of Areopolis, and cannot be said to lie between it and Zoar, whether we take Zoar on the east or the west side of the sea. The writer is not aware that any one else has attempted to identify the place.

The signification of the name hal-Luhith must remain doubtful. As a Hebrew word it signifies "made of boards or posts" (Gesen. *Thes.* 748); but why assume that a Moabite spot should have a Hebrew name? By the Syriac interpreters it is rendered "paved with flagstones" (Eichhorn, *Allg. Bibliothek*, i. 845, 872). In the Targums (*Pseudojon.* and *Jerus.* on Num. xxi. 16, and *Jonathan* on Is. xv. 1) Lechaiath is given as the equivalent of Ar-Moab. This may contain an allusion to Luchith; or it may point to the use of a term meaning "jaw" for certain eminences, not only in the case of the Lehi of Samson, but also elsewhere. (See Michaelis, *Suppl.* No. 1307; but, on the other hand, Buxtorf, *Lex. Rabb.* 1134.) It is probably, like AKRABBIM, the name of the ascent, and not of any town at the summit, as in that case the word would appear as Luhithah, with the particle of motion added. [G.]

LUKE. The name Luke (Λουκᾶς), is an abbreviated form of Lucanus or of Lucilius (Meyer). It is not to be confounded with Lucius (Acts xiii. 1; Rom. xvi. 21), which belongs to a different person. The name Luke occurs three times in the New Testament (Col. iv. 14; 2 Tim. iv. 11; Philem. 24), and probably in all three, the third evangelist is the person spoken of. To the Colossians he is described as "the beloved physician," probably because he had been known to them in that faculty. Timothy needs no additional mark for identification; to him the words are, "only Luke is with me." To Philemon Luke sends his salutation in common with other "fellow-labourers" of St. Paul. As there is every reason to believe that the Luke of these passages is the author of the Acts of the Apostles as well as of the Gospel which bears his name, it is natural to seek in the former book for

[a] The LXX. follow the *Cethîb* rather than the *Kri*, as they frequently do elsewhere, and also include the definite article of the Hebrew.

some traces of that connexion with St. Paul which these passages assume to exist; and although the name of St. Luke does not occur in the Acts, there is reason to believe that under the pronoun "we," several references to the evangelist are to be added to the three places just quoted.

Combining the traditional element with the scriptural, the uncertain with the certain, we are able to trace the following dim outline of the Evangelist's life. He was born at Antioch in Syria (Eusebius, *Hist.* iii. 4); in what condition of life is uncertain. That he was taught the science of medicine does not prove that he was of higher birth than the rest of the disciples; medicine in its earlier and ruder state was sometimes practised even by a slave. The well-known tradition that Luke was also a painter, and of no mean skill, rests on the authority of Nicephorus (ii. 43), of the Menology of the Emperor Basil, drawn up in 980, and of other late writers; but none of them are of historical authority, and the Acts and Epistles are wholly silent upon a point so likely to be mentioned. He was not born a Jew, for he is not reckoned among them "of the circumcision" by St. Paul (comp. Col. iv. 11 with ver. 14). If this be not thought conclusive, nothing can be argued from the Greek idioms in his style, for he might be a Hellenist Jew, nor from the Gentile tendency of his Gospel, for this it would share with the inspired writings of St. Paul, a Pharisee brought up at the feet of Gamaliel. The date of his conversion is uncertain. He was not indeed "an eye-witness and minister of the word from the beginning" (Luke i. 2), or he would have rested his claim as an evangelist upon that ground. Still he may have been converted by the Lord Himself, some time before His departure; and the statement of Epiphanius (*Cont. Haer.* li. 11) and others, that he was one of the seventy disciples, has nothing very improbable in it; whilst that which Theophylact adopts (on Luke xxiv.) that he was one of the two who journeyed to Emmaus with the risen Redeemer, has found modern defenders. Tertullian assumes that the conversion of Luke is to be ascribed to Paul—"Lucas non apostolus, sed apostolicus; non magister, sed discipulus, utique magistro minor, certe tanto posterior quanto posterioris Apostoli sectator, Pauli sine dubio" (*Adv. Marcion*, iv. 2); and the balance of probability is on this side.

The first ray of historical light falls on the Evangelist when he joins St. Paul at Troas, and shares his journey into Macedonia. The sudden transition to the first person plural in Acts xvi. 9, is most naturally explained, after all the objections that have been urged, by supposing that Luke, the writer of the Acts, formed one of St. Paul's company from this point. His conversion had taken place before, since he silently assumes his place among the great Apostle's followers without any hint that this was his first admission to the knowledge and ministry of Christ. He may have found his way to Troas to preach the Gospel, sent possibly by St Paul himself. As far as Philippi the Evangelist journeyed with the Apostle. The resumption of the third person on Paul's departure from that place (xvii. 1) would show that Luke was now left behind. During the rest of St. Paul's second missionary journey we hear of Luke no more. But on the third journey the same indication reminds us that Luke is again of the company (Acts xx. 5), having joined it apparently at Philippi, where he had been left. With the Apostle he passed through Miletus, Tyre, and Caesarea to Jerusalem (xx. 5, xxi. 18). Between the two visits of Paul to Philippi seven years had elapsed (A.D. 51 to A.D. 58), which the Evangelist may have spent in Philippi and its neighbourhood, preaching the Gospel.

There remains one passage, which, if it refers to St. Luke, must belong to this period. "We have sent with him" (*i. e.* Titus) "the brother whose praise is in the gospel throughout all the churches" (2 Cor. viii. 18). The subscription of the epistle sets out that it was "written from Philippi, a city of Macedonia, by Titus *and Lucas*," and it is an old opinion that Luke was the companion of Titus, although he is not named in the body of the Epistle. If this be so, we are to suppose that during the "three months" of Paul's sojourn at Philippi (Acts xx. 3) Luke was sent from that place to Corinth on this errand; and the words "whose praise is in the Gospel throughout all the churches," enable us to form an estimate of his activity during the interval in which he has not been otherwise mentioned. It is needless to add that the praise lay in the activity with which he preached the Gospel, and not, as Jerome understands the passage, in his being the author of a written gospel. "Lucas . . . scripsit Evangelium de quo idem Paulus 'Misimus, inquit, cum illo fratrem, cujus laus est in Evangelio per omnes ecclesias'" (*De Viris Ill.* ch. 7).

He again appears in the company of Paul in the memorable journey to Rome (Acts xxvii. 1). He remained at his side during his first imprisonment (Col. iv. 14; Philem. 24); and if it is to be supposed that the Second Epistle to Timothy was written during the second imprisonment, then the testimony of that Epistle (iv. 11) shows that he continued faithful to the Apostle to the end of his afflictions.

After the death of St. Paul, the acts of his faithful companion are hopelessly obscure to us. In the well-known passage of Epiphanius (*cont. Haer.* li. 11, vol. ii. 464, in Dindorf's recent edition), we find that "receiving the commission to preach the Gospel, [Luke] preaches first in Dalmatia and Gallia, in Italy and Macedonia, but first in Gallia, as Paul himself says of some of his companions, in his epistles, '*Crescens in Gallia*,' for we are not to read '*in Galatia*' as some mistakenly think, but '*in Gallia*.'" But there seems to be as little authority for this account of St. Luke's ministry as there is for the reading *Gallia* in 2 Tim. iv. 10. How scanty are the data, and how vague the results, the reader may find by referring to the *Acta Sanctorum*, October, vol. viii., in the recent Brussels edition. It is, as perhaps the Evangelist wishes it to be: we only know him whilst he stands by the side of his beloved Paul; when the master departs the history of the follower becomes confusion and fable. As to the age and death of the Evangelist there is the utmost uncertainty. It seems probable that he died in advanced life; but whether he suffered martyrdom or died a natural death; whether Bithynia or Achaia, or some other country witnessed his end, it is impossible to determine amidst contradictory voices. That he died a martyr, between A.D. 75 and A.D. 100, would seem to have the balance of suffrages in its favour. It is enough for us, so far as regards the Gospel of St. Luke, to know that the writer was the tried and constant friend of the Apostle Paul, who shared his labours, and was not driven from his side by danger. [W. T.]

LUKE, GOSPEL OF. The third Gospel is ascribed, by the general consent of ancient Christendom, to "the beloved physician," Luke, the friend and companion of the Apostle Paul. In the well-known Muratorian fragment (see vol. i. p. 712) we find "Tertio evangelii librum secundum Lucam. Lucas iste medicus post ascensum Christi cum eum Paulus, quasi ut juris studiosum secundum adsumsisset, nomine suo ex opinione conscripsit. Dominum tamen nec ipse vidit in carne. Et idem prout, assequi potuit. Ita et ab nativitate Johannis incipit dicere." (Here Credner's restoration of the text is followed; see his *Geschichte des N. T. Kanon*, p. 153, §76; comp. Routh's *Reliquiae*, vol. iv.). The citations of Justin Martyr from the Gospel narrative show an acquaintance with and use of St. Luke's account (see Kirchhofer, *Quellensammlung*, p. 132, for the passages). Irenaeus (*cont. Haer.* iii. 1) says that "Luke, the follower of Paul, preserved in a book the Gospel which that apostle preached." The same writer affords (iii. 14) an account of the contents of the Gospel, which proves that in the book preserved to us we possess the same which he knew. Eusebius (iii. iv.) speaks without doubting, of the two books, the Gospel and the Acts, as the work of St. Luke. Both he and Jerome (*Catal. Script. Eccl.* p. 7) mention the opinion that when St. Paul uses the words "according to my Gospel" it is to the work of St. Luke that he refers: both mention that St. Luke derived his knowledge of divine things, not from Paul only, but from the rest of the Apostles, with whom (says Eusebius) he had active intercourse. Although St. Paul's words refer in all probability to no written Gospel at all, but to the substance of his own inspired preaching, the error is important, as showing how strong was the opinion in ancient times that Paul was in some way connected with the writing of the third Gospel.

It has been shown already [GOSPELS, vol. i. p. 712] that the Gospels were in use as one collection, and were spoken of undoubtingly as the work of those whose names they bear, towards the end of the second century. But as regards the genuineness of St. Luke any discussion is entangled with a somewhat difficult question, namely, what is the relation of the Gospel we possess to that which was used by the heretic Marcion? The case may be briefly stated.

The religion of Jesus Christ announced salvation to Jew and Gentile, through Him who was born a Jew, of the seed of David. The two sides of this fact produced very early two opposite tendencies in the Church. One party thought of Christ as the Messiah of the Jews; the other as the Redeemer of the human race. The former viewed the Lord as the Messiah of Jewish prophecy and tradition; the other as the revealer of a doctrine wholly new, in which atonement and salvation and enlightenment were offered to men for the first time. Marcion of Sinope, who flourished in the first half of the second century, expressed strongly the tendency opposed to Judaism. The scheme of redemption, so full of divine compassion and love, was adopted by him, though in a perverted form, with his whole heart. The aspersions on his sincerity are thrown out in the loose rhetoric of controversy, and are to be received with something more than caution. The heathen world, into the discord of which the music of that message had never come, appeared to him as the kingdom of darkness and of Satan. So far Marcion and his opponents would go together. But how does Marcion deal with the O. T.? He views it, not as a preparation for the coming of the Lord, but as something hostile in spirit to the Gospel. In God, as revealed in the O. T., he saw only a being jealous and cruel. The heretic Cerdo taught that the just and severe God of the Law and the Prophets was not the same as the merciful Father of the Lord Jesus. This dualism Marcion carried further, and blasphemously argued that the God of the O. T. was represented as doing evil and delighting in strife, as repenting of His decrees and inconsistent with Himself.[a] This divorcement of the N. T. from the Old was at the root of Marcion's doctrine. In his strange system the God of the O. T. was a lower being, to whom he gave the name of Δημιουργός, engaged in a constant conflict with matter (ΥΛΗ), over which he did not gain a complete victory. But the holy and eternal God, perfect in goodness and love, comes not in contact with matter, and creates only what is like to and cognate with himself. In the O. T. we see the "Demiurgus;" the history of redemption is the history of the operation of the true God. Thus much it is necessary to state as bearing upon what follows: the life and doctrine of Marcion have received a much fuller elucidation from Neander, *Kirchengeschichte*, vol. ii.; *Antignostikus*, and *Dogmengeschichte*; and from Volckmar, *Das Evangelium Marcions*, p. 25. The data in older writers are found in the apology of Justin Martyr in Tertullian against Marcion i.–v.; Irenaeus, i ch. xxvii.; and Epiphanius, *Haer.* xlii.

For the present purpose it is to be noticed that a teacher, determined as Marcion was to sever the connexion between the Old and New Testament, would approach the Gospel history with strong prejudices, and would be unable to accept as it stands the written narrative of any of the three Evangelists, so far as it admitted allusions to the Old Testament as the soil and root of the New. It is clear, in fact, that he regarded Paul as the only apostle who had remained faithful to his calling. He admitted the Epistles of St. Paul, and a Gospel which he regarded as Pauline, and rejected the rest of the N. T., not from any idea that the books were not genuine, but because they were, as he alleged, the genuine works of men who were not faithful teachers of the Gospel they had received.

But what was the Gospel which Marcion used? The ancient testimony is very strong on this point; it was the Gospel of St. Luke, altered to suit his peculiar tenets. "Et super haec," says Irenaeus, "id quod est secundum Lucam Evangelium circumcidens, et omnia quae sunt de generatione Domini conscripta auferens, et de doctrina sermonum Domini multa auferens, in quibus manifestissime conditorem hujus universitatis suum Patrem confitens Dominus conscriptus est; semetipsum esse veraciorem quam sunt hi, qui Evangelium tradiderunt apostoli, suasit discipulis suis; non Evange-

[a] "Cerdon autem docuit eum qui a lege et prophetis annuntiatus sit Deus, non esse patrem Domini nostri Christi Jesu. Hunc enim cognosci, illum autem ignorari; et alterum quidem justum, alterum autem bonum esse. Succedens autem ei Marcion Ponticus adamplavit doctrinam, impudorate blasphemans eum, qui a lege et prophetis annuntiatus est Deus; malorum factorem et bellorum concupiscentem et inconstantem quoque sententia, et contrarium sibi ipsum dicens" (Irenaeus, I xxvii. 1 and 2, p. 256, Stieren's ed.).

...tum et particulam Evangelii tradens eis. Similiter quam et apostoli Pauli Epistolas abscidit, auferens quæcunque manifeste dicta sunt ab apostolo de eo Deo, qui mundum fecit, quoniam hic Pater Domini nostri Jesu Christi, et quæcumque ex propheticis assumeras apostolus docuit, praenuntiantibus adventum Domini" (*cont. Haer.* i. xxvii. 2). "Lucam videtur Marcion elegisse," says Tertullian, "quem solum haberet" (*cont. Marc.* iv. 2; comp. Origen, *cont. Celsum*, ii. 27; Epiphanius, *Haer.* xlii. 11; Theodoret. *Haeret. Fab.* i. 24). Marcion, however, did not ascribe to Luke by name the Gospel thus corrupted (Tert. *cont. Marc.* iv. 6), calling it simply the Gospel of Christ.

From these passages the opinion that Marcion formed for himself a Gospel, on the principle of rejecting all that savoured of Judaism in an existing narrative, and that he selected the Gospel of St. Luke as needing the least alteration, seems to have been held universally in the Church, until Semler started a doubt, the prolific seed of a large controversy; from the whole result of which, however, the cause of truth has little to regret. His opinion was that the Gospel of St. Luke and that used by Marcion were drawn from one and the same original source, neither being altered from the other. He thinks that Tertullian erred from want of historical knowledge. The charge of Epiphanius of omissions in Marcion's Gospel, he meets by the fact of Tertullian's silence. Griesbach, about the same time, cast doubt upon the received opinion. Eichhorn applied his theory of an "original Gospel" [see article GOSPELS, vol. i. p. 715] to this question, and maintained that the Fathers had mistaken the short and unadulterated Gospel used by Marcion for an abridgment of St. Luke, whereas it was probably more near the "original Gospel" than St. Luke. Hahn has more recently shown, in an elaborate work, that there were sufficient motives, of a doctrinal kind, to induce Marcion to wish to get rid of parts of St. Luke's Gospel; and he refutes Eichhorn's reasoning on several passages which he had misunderstood from neglecting Tertullian's testimony. He has the merit, admitted on all hands, of being the first to collect the data for a restoration of Marcion's text in a satisfactory manner, and of tracing out in detail the bearing of his doctrines on particular portions of it. Many were disposed to regard Hahn's work as conclusive; and certainly most of its results are still undisturbed. Ritschl, however, took the other side, and held that Marcion only used the Gospel of St. Luke as an older and more primitive form, and that what he charged against the former as omissions are rather interpolations in the latter. A controversy, in which Baur, Hilgenfeld, and Volckmar took part, has resulted in the confirmation, by an overpowering weight of argument, of the old opinion that Marcion corrupted the Gospel of Luke for his own purposes. Volckmar, whose work contains the best account of the whole controversy, sweeps away, it is to be hoped for ever, the opinion of Ritschl and Baur that Marcion quoted the "original Gospel of Luke," as well as the later view of Baur, for which there is really not a particle of evidence, that the Gospel had passed through the hands of two authors or editors, the former with strong inclinations against Judaism, a zealous follower of St. Paul, and the latter with leanings to Judaism and against the Apostle! He considers the Gospel of St. Luke, as we now possess it, to be in all its general features that which Marcion found ready to his hand, and which for doctrinal reasons he abridged and altered. In certain passages, indeed, he considers that the Gospel used by Marcion, as cited by Tertullian and Epiphanius, may be employed to correct our present text. But this is only putting the copy used by Marcion on the footing of an older MS. The passages which he considers to have certainly suffered alteration since Marcion's time are only these:—Luke x. 21 (*εὐχαριστῶ καὶ ἐξομολογοῦμαι*), 22 (*καὶ οὐδεὶς ἔγνω τίς ἐστιν ὁ πατὴρ εἰ μὴ ὁ υἱός, καὶ τίς ἐστιν ὁ υἱὸς εἰ μὴ ὁ πατὴρ καὶ ᾧ ἐὰν βούληται κ. τ. λ.*), xi 2 (*ὃς ἡμῖν τὸ ἅγιον πνεῦμά σου*), xii. 38 (*τῇ ἐσπερινῇ φυλακῇ*), xvii. 2 (supply *εἰ μὴ ἐγεννήθη ἢ κ.τ.λ.*), xviii. 19 (*μή με λέγε ἀγαθόν· εἷς ἐστιν ἀγαθὸς ὁ πατὴρ ὁ ἐν τοῖς οὐρανοῖς*). In all these places the deviations are such as may be found to exist between different MSS. A new witness as to the last, which is of the greatest importance, appears in Hippolytus, *Refutatio Haeresium*, p. 254, Oxford edition, where the *τί με λέγετε ἀγαθόν* appears. See, on all these passages, Tischendorf's *Greek Testament*, ed. vii., and critical notes. Of four other places Volckmar speaks more doubtfully, as having been disturbed, but possibly before Marcion (vi. 17, xii. 32, xvii. 12, xxiii. 2).

From this controversy we gain the following result:—Marcion was in the height of his activity about A.D. 138, soon after which Justin Martyr wrote his Apology; and he had probably given forth his Gospel some years before, *i. e.* about A. D. 130. At the time when he composed it he found the Gospel of St. Luke so far diffused and accepted that he based his own Gospel upon it, altering and omitting. Therefore we may assume that, about A.D. 120, the Gospel of St. Luke which we possess was in use, and was familiarly known. The theory that it was composed about the middle or end of the 2nd century is thus overthrown; and there is no positive evidence of any kind to set against the harmonious assertion of all the ancient Church that this Gospel is the genuine production of St. Luke.

(On St. Luke's Gospel in its relation to Marcion, see, besides the fathers quoted above, Hahn, *Das Evangelium Marcions*, Königsberg, 1823; Olshausen, *Echtheit der vier Kanon. Evangelien*, Königsberg, 1823; Ritschl, *Das Evangelium Marcions*, &c., Tübingen, 1846, with his retractation in *Theol. Jahrb.* 1851; Baur, *Krit. Untersuchung über d. Kan. Evangelien*, Tübingen, 1847; Hilgenfeld, *Krit. Untersuchungen* &c., Halle, 1850; Volckmar, *Das Evangelium Marcions*, Leipzig, 1852; Bishop Thirlwall's *Introduction to Schleiermacher on St. Luke*; De Wette, *Lehrbuch d. N. T.*, Berlin, 1848. These are but a part of the writers who have touched the subject. The work of Volckmar is the most comprehensive and thorough; and, though some of his views cannot be adopted, he has satisfactorily proved that our Gospel of St. Luke existed before the time of Marcion.)

II. *Date of the Gospel of Luke.*—We have seen that this Gospel was in use before the year 120. From internal evidence the date can be more nearly fixed. From Acts i. 1, it is clear that it was written before the Acts of the Apostles. The latest time actually mentioned in the Acts is the term of two years during which Paul dwelt at Rome "in his own hired house, and received all that came in unto him" (xxviii. 30, 31). The writer who

has tracked the footsteps of Paul hitherto with such exactness, leaves him here abruptly, without making known the result of his appeal to Caesar, or the works in which he engaged afterwards. No other motive for this silence can be suggested than that the writer, at the time when he published the Acts, had no more to tell; and in that case the book of the Acts was completed about the end of the second year of St. Paul's imprisonment, that is, about A.D. 63 (Wieseler, Olshausen, Alford). How much earlier the Gospel, described as "the former treatise" (Acts i. 1), may have been written is uncertain. But Dean Alford (*Prolegomena*) remarks that the words imply some considerable interval between the two productions. The opinion of the younger Thiersch (*Christian Church*, p. 148, Carlyle's translation) thus becomes very probable, that it was written at Caesarea during St. Paul's imprisonment there, A.D. 58-60. The Gospel of St. Matthew was probably written about the same time; and neither Evangelist appears to have used the other, although both made use of that form of oral teaching which the apostles had gradually come to employ. [GOSPELS.] It is painful to remark how the opinions of many commentators, who refuse to fix the date of this Gospel earlier than the destruction of Jerusalem, have been influenced by the determination that nothing like prophecy shall be found in it. Believing that our Lord did really prophesy that event, we have no difficulty in believing that an Evangelist reported the prophecy before it was fulfilled (see Meyer's *Commentary*, Introduction).

III. *Place where the Gospel was written.*—If the time has been rightly indicated, the place would be Caesarea. Other suppositions are—that it was composed in Achaia and the region of Boeotia (Jerome), in Alexandria (Syriac version), in Rome (Ewald, &c.), in Achaia and Macedonia (Hilgenfeld), and Asia Minor (Köstlin). It is impossible to verify these traditions and conjectures.

IV. *Origin of the Gospel.*—The preface, contained in the four first verses of the Gospel, describes the object of its writer. "Forasmuch as many have taken in hand to set forth in order a declaration of those things which are most surely believed among us, even as they delivered them unto us, which from the beginning were eye-witnesses and ministers of the word; it seemed good to me also, having had perfect understanding of all things from the very first, to write unto thee in order, most excellent Theophilus, that thou mightest know the certainty of those things wherein thou hast been instructed." Here are several facts to be observed. There were many narratives of the life of our Lord current at the early time when Luke wrote his Gospel. The word "many" cannot apply to Matthew and Mark, because it must at any rate include more than two, and because it is implied that former labourers leave something still to do, and that the writer will supersede or supplement them either in whole or in part. The ground of fitness for the task St. Luke places in his having carefully followed out the whole course of events from the beginning. He does not claim the character of an eye-witness from the first; but possibly he may have been a witness of some part of our Lord's doings (see above LUKE, LIFE).

The ancient opinion, that Luke wrote his Gospel under the influence of Paul, rests on the authority of Irenaeus, Tertullian, Origen, and Eusebius. The two first assert that we have in Luke the Gospel preached by Paul (Iren. *cont. Haer.* iii. 1; Tert. *cont. Marc.* iv. 5); Origen calls it "the Gospel quoted by Paul," alluding to Rom. ii. 16 (Euseb. *E. Hist.* vi. 25); and Eusebius refers Paul's words "according to my Gospel" (2 Tim. ii. 8), to that of Luke (*E. Hist.* iii. 4), in which Jerome concurs (*De Vir. Ill.* 7). The language of the preface is against the notion of any exclusive influence of St. Paul. The Evangelist, a man on whom the Spirit of God was, made the history of the Saviour's life the subject of research, and with materials so obtained wrote, under the guidance of the Spirit that was upon him, the history now before us. The four verses could not have been put at the head of a history composed under the exclusive guidance of Paul or of any one apostle, and as little could they have introduced a gospel simply communicated by another. Yet if we compare St. Paul's account of the institution of the Lord's Supper (1 Cor. xi. 23-25) with that in St. Luke's Gospel (xxii. 19, 20), none will think the verbal similarity could be accidental. A less obvious parallel between 1 Cor. xv. 3 and Luke xxiv. 26, 27, more of thought than of expression, tends the same way. The truth seems to be that St. Luke, seeking information from every quarter, sought it from the preaching of his beloved master, St. Paul; and the apostle in his turn employed the knowledge acquired from other sources by his disciple. Thus the preaching of the apostle, founded on the same body of facts, and the same arrangement of them as the rest of the apostles used, became assimilated especially to that which St. Luke set forth in his narrative. This does not detract from the worth of either. The preaching and the Gospel proceeded each from an inspired man; for it is certain that Luke, employed as he was by Paul, could have been no exception in that plentiful effusion of the Holy Ghost to which Paul himself bears witness. That the teaching of two men so linked together (see LIFE) should have become more and more assimilated is just what would be expected. But the influence was mutual, and not one-sided; and Luke still claims with right the position of an independent inquirer into historic facts.

Upon the question whether Luke made use of the Gospels of Matthew and Mark, no opinion given here could be conclusive. [GOSPELS, vol. i. p. 714.] Each reader should examine it for himself, with the aid of a Greek Harmony. It is probable that Matthew and Luke wrote independently, and about the same time. Some of their coincidences arise from their both incorporating the oral teaching of the apostles, and others, it may be, from their common use of written documents, such as are hinted at in Luke i. 1. As regards St. Mark, some regard his Gospel as the oldest New Testament writing, whilst others infer, from apparent abbreviations (Mark i. 12, xvi. 12), from insertions of matter from other places (Mark iv. 10-34, ix. 38-48), and from the mode in which additional information is introduced—now with a seeming connexion with Matthew and now with Luke—that Mark's Gospel is the last, and has been framed upon the other two (De Wette, *Einleitung*, §94). The result of the controversy should be to inspire distrust of all such seeming proofs, which conduct different critics to exactly opposite results.

V. *Purpose for which the Gospel was written.*—The Evangelist professes to write that Theophilus "might know the certainty of those things wherein he had been instructed" (i. 4). Who was this Theophilus? Some have supposed that it is a sig-

efficient name, applicable not to one man, but to any among *Pisi*; but the addition of *κράτιστος*, a term of honour which would be used towards a man of station, or sometimes (see passages in Kuinöl and Wetstein) towards a personal friend, seems against this. He was, then, an existing person. Conjecture has been wildly busy in endeavouring to identify him with some person known to history. Some indications are given in the Gospel about him, and beyond them we do not propose to go. He was not an inhabitant of Palestine, for the Evangelist minutely describes the position of places which to such a one would be well known. It is so with Capernaum (iv. 31), Nazareth (i. 26), Arimathea (xxiii. 51), the country of the Gadarenes (viii. 26), the distance of Mount Olivet and Emmaus from Jerusalem (Acts i. 12; Luke xxiv. 13). If places in England—say Bristol, and Oxford, and Hampstead—were mentioned in this careful minute way, it would be a fair inference that the writer meant his work for other than English readers.

By the same test he probably was not a Macedonian (Acts xvi. 12), nor an Athenian (Acts xvii. 21), nor a Cretan (Acts xxvii. 8, 12). But that he was a native of Italy, and perhaps an inhabitant of Rome, is probable from similar data. In tracing St. Paul's journey to Rome, places which an Italian might be supposed not to know are described minutely (Acts xxvii. 8, 12, 16); but when he comes to Sicily and Italy this is neglected. Syracuse and Rhegium, even the more obscure Puteoli, and Appii Forum and the Three Taverns, are mentioned as to one likely to know them. (For other theories see Rhesa's *Michaelis*, vol. iii. Part i. p. 236; Kuinöl's *Prolegomena*, and Winer's *Realwbuch*, art. "Theophilus.") All that emerges from this argument is, that the person for whom Luke wrote in the first instance was a Gentile reader. We must admit, but with great caution, on account of the abuses to which the notion has led, that there are traces in the Gospel of a leaning towards Gentile rather than Jewish converts. The genealogy of Jesus is traced to Adam, not from Abraham; so as to connect Him with the whole human race, and not merely with the Jews. Luke describes the mission of the Seventy, which number has been usually supposed to be typical of all nations; as twelve, the number of the apostles, represents the Jews and their twelve tribes. As each Gospel has within certain limits its own character and mode of treatment, we shall recognise with Olshausen that "St. Luke has the peculiar power of exhibiting with great clearness of conception and truth (especially in the long account of Christ's journey, from ix. 51 to xviii. 34), not so much the discourses of Jesus as His conversations, with all the incidents that gave rise to them, with the remarks of those who were present, and with the final results."

On the supposed "doctrinal tendency" of the Gospel, however, much has been written which it is painful to dwell on, but easy to refute. Some have endeavoured to see in this divine book an attempt to engraft the teaching of St. Paul on the Jewish representations of the Messiah, and to elevate the doctrine of universal salvation, of which Paul was the most prominent preacher, over the Judaizing tendencies, and to put St. Paul higher than the twelve Apostles! (See Zeller, *Apost.*; Baur, *Kan. Evang.*; and Hilgenfeld.) How two impartial historical narratives, the Gospel and the Acts, could have been taken for two tracts written for polemical and personal ends, is to an English mind hardly conceivable. Even its supporters found that the inspired author had carried out his purpose so badly, that they were forced to assume that a second author or editor had altered the work with a view to work up together Jewish and Pauline elements into harmony (Baur, *Kanon. Evang.* p. 502). Of this editing and re-editing there is no trace whatever; and the invention of the second editor is a gross device to cover the failure of the first hypothesis. By such a machinery, it will be possible to prove in after ages that Gibbon's History was originally a plea for Christianity, or any similar paradox.

The passages which are supposed to bear out this "Pauline tendency," are brought together by Hilgenfeld with great care (*Evangelien*, p. 220); but Reuss has shown, by passages from St. Matthew which have the same "tendency" against the Jews, how brittle such an argument is, and has left no room for doubt that the two Evangelists wrote facts and not theories, and dealt with those facts with pure historical candour (Reuss, *Histoire de la Théologie*, vol. ii. b. vi. ch. vi.). Writing to a Gentile convert, and through him addressing other Gentiles, St. Luke has adapted the form of his narrative to their needs; but not a trace of a subjective bias, not a vestige of a personal motive, has been suffered to sully the inspired page. Had the influence of Paul been the exclusive or principal source of this Gospel, we should have found in it more resemblance to the Epistle to the Ephesians, which contains (so to speak) the Gospel of St. Paul.

VI. *Language and style of the Gospel.*—It has never been doubted that the Evangelist wrote his Gospel in Greek. Whilst Hebraisms are frequent, classical idioms and Greek compound words abound. The number of words used by Luke only is unusually great, and many of them are compound words for which there is classical authority (see Dean Alford's valuable *Greek Test.*).

Some of the leading peculiarities of style are here noted: a more minute examination will be found in Prof. Davidson's *Introduction to N. T.* (Bagster, 1848).

1. The very frequent use of *ἐγένετο* in introducing a new narrative or a transition, and of *ἐγένετο ἐν τῷ* with an infinitive, are traceable to the Hebrew.

2. The same may be said of the frequent use of *καρδία*, answering to the Hebrew לֵב.

3. *Νομικοί*, used six times instead of the usual *γραμματεῖς*, and *ἐπιστάτης* used six times for *ῥαββί*, *διδάσκαλος*, are cases of a preference for words more intelligible to Greeks or Gentiles.

4. The neuter participle is used frequently for a substantive, both in the Gospel and the Acts.

5. The infinitive with the genitive of the article, to indicate design or result, as in i. 9, is frequent in both books.

6. The frequent use of *δὲ καί*, for the sake of emphasis, as in iii. 9.

7. The frequent use of *καὶ αὐτός*, as in i. 17.

8. The preposition *σύν* is used about seventy-five times in Gospel and Acts: in the other Gospels rarely.

9. *Ἀτενίζειν* is used eleven times in Gospel and Acts; elsewhere only twice, by St. Paul (2 Cor.).

10. *Εἰ δὲ μή γε* is used five times for the *εἰ δὲ μή* of Mark and John.

11. Εἰπεῖν πρός, which is frequent in St. Luke, is used elsewhere only by St. John: λαλεῖν πρός, also frequent, is only thrice used by other writers.

12. St. Luke very frequently uses the auxiliary verb with a participle for the verb, as in v. 17, i. 20.

13. He makes remarkable use of verbs compounded with διὰ and ἐπί.

14. Χάρις, very frequent in Luke, is only used thrice by John, and not at all by Matthew and Mark. Σωτήρ, σωτηρία, σωτήριον, are frequent with Luke; the two first are used once each by John, and not by the other Evangelists.

15. The same may be said of εὐαγγελίζεσθαι, once in Matthew, and not at all in Mark and John; ἀποστρέφειν, once in Mark, not in other Gospels; ἐφιστάναι, not used in the other three Gospels; διέρχεσθαι, thirty-two times in Luke's Gospel and the Acts, and only twice each in Matthew, Mark, and John; παραχρῆμα frequent in Luke, and only twice elsewhere, in Matthew.

16. The words ὁμοθυμαδόν, εὐλαβής, ἀνήρ, as a form of address and before substantives, are also characteristic of Luke.

17. Some Latin words are used by Luke: λεγεών (viii. 30), δηνάριον (x. 35), σουδάριον (xix. 20), κολωνία (Acts xvi. 12).

On comparing the Gospel with the Acts it is found that the style of the latter is more pure and free from Hebrew idioms; and the style of the later portion of the Acts is more pure than that of the former. Where Luke used the materials he derived from others, oral or written, or both, his style reflects the Hebrew idioms of them; but when he comes to scenes of which he was an eye-witness and describes entirely in his own words, these disappear.

VII. *Quotations from the Old Testament.*—In the citations from the O. T., of the principal of which the following is a list, there are plain marks of the use of the Septuagint version:—

Luke i. 17.	Mal. iv. 4, 5.
„ ii. 23.	Ex. xiii. 2.
„ ii. 24.	Lev. xii. 8.
„ iii. 4, 5, 6.	Is. xl. 3, 4, 5.
„ iv. 4.	Deut. viii. 3.
„ iv. 8.	Deut. vi. 13.
„ iv. 10, 11.	Ps. xci. 11, 12.
„ iv. 12.	Deut. vi. 14.
„ iv. 18.	Is. lxi. 1, 2.
„ vii. 27.	Mal. iii. 1.
„ viii. 10.	Is. vi. 9.
„ x. 27.	Deut. vi. 5; Lev xix. 18.
„ xviii. 20.	Ex. xx. 12.
„ xix. 46.	Is. lvi. 7; Jer. viii. 11.
„ xx. 17.	Ps. cxviii. 22, 23.
„ xx. 28.	Deut. xxv. 5.
„ xx. 42, 43.	Ps. cx. 1.
„ xxii. 37.	Is. liii. 12.
„ xxiii. 46.	Ps. xxxi. 5.

VIII. *Integrity of the Gospel — the first two Chapters.*—The Gospel of Luke is quoted by Justin Martyr and by the author of the Clementine Homilies. The silence of the apostolic fathers only indicates that it was admitted into the Canon somewhat late, which was probably the case. The result of the Marcion controversy is, as we have seen, that our Gospel was in use before A.D. 120. A special question, however, has been raised about the two first chapters. The critical history of these is best drawn out perhaps in Meyer's note. The chief objection against them is founded on the garbled opening of Marcion's Gospel, who omits the two first chapters, and connects iii. 1 immediately with iv. 31. (So Tertullian, "Anno quintodecimo principatus Tiberiani proponit Deum descendisse in civitatem Galilaeae Capharnaum," *cont. Marc.* iv. 7). But any objection founded on this would apply to the third chapter as well; and the history of our Lord's childhood seems to have been known to and quoted by Justin Martyr (see *Apology*, i. §33, and an allusion, *Dial. cum Tryph.* 100) about the time of Marcion. There is therefore no real ground for distinguishing between the two first chapters and the rest; and the arguments for the genuineness of St. Luke's Gospel apply to the whole inspired narrative as we now possess it (see Meyer's note; also Volckmar, p. 130).

IX. *Contents of the Gospel.*—This Gospel contains—1. A preface, i. 1-4. 2. An account of the time preceding the ministry of Jesus, i. 5 to ii. 52. 3. Several accounts of discourses and acts of our Lord, common to Luke, Matthew, and Mark, related for the most part in their order, and belonging to Capernaum and the neighbourhood, iii. 1 to ix. 50. 4. A collection of similar accounts, referring to a certain journey to Jerusalem, most of them peculiar to Luke, ix. 51 to xviii. 14. 5. An account of the sufferings, death, and resurrection of Jesus, common to Luke with the other Evangelists, except as to some of the accounts of what took place after the resurrection, xviii. 15 to the end.

SOURCES. Works of Irenaeus (ed. Stieren) Justin Martyr (ed. Otto); Tertullian, Origen, and Epiphanius (ed. Dindorf); Hippolytus (ed. Miller); and Eusebius (ed. Valesius); Marsh's *Michaelis*; De Wette, *Einleitung*; Meyer, *Kommentar*; the work of Hahn, Ritschl, Baur, and Volckmar, quoted above; Credner, *Kanon*; Dean Alford's *Commentary*; Dictionaries of Winer and Herzog; Commentaries of Kuinöl, Wetstein, and others; Thiersch, *Church History* (Eng. Trans.); Olshausen, *Echtheit*; Hug, *Einleitung*; Weisse, *Evangelienfrage*; Greek Testament, Tischendorf, ed. vii., and notes there. [W. T.]

LUNATICS (σεληνιαζόμενοι). This word is used twice in the N. T. In the enumeration of Matt. iv. 24, the "lunatics" are distinguished from the demoniacs; in Matt. xvii. 15, the name is applied to a boy who is expressly declared to have been possessed. It is evident, therefore, that the word itself refers to some disease, affecting both the body and the mind, which might, or might not, be a sign of possession (see on this subject DEMONIACS) By the description of Mark ix. 17-26, it is concluded that this disease was epilepsy (see Winer, *Realw.* "Besessene;" Trench, *On the Miracles*, p. 363). The origin of the name (as of σεληνιασμός and σεληνόβλητος in earlier Greek, "lunaticus" in Latin, and equivalent words in modern languages), is to be found in the belief that diseases of a paroxysmal character were affected by the light, or by the changes of the moon. [A. B.]

LUZ (לוּז, and perhaps לְוּזָה,[a] i. e. Luzah, which is also the reading of the Samar. Codex and

[a] The ground for this suggestion, besides the remarkable agreement of the ancient versions as given above, is Josh. xviii. 13, where the words אֶל־כֵּתֵף לוּזָה should, according to ordinary usage, be rendered "to the shoulder of Luzah;" the *ah*, which is the particle of motion in Hebrew, not being required here, as it is in the former part of the same verse. Other names are found both with and without a similar termination, as Jotbah, Jotbathah; Timnath, Timnathah; Ribiah, Ribathah. Laish and Laishah are probably distinct places.

of its two versions: of the LXX. and Eusebius, Λουζά and Λουζᾶ:[b] and the Vulgate *Luza*). The uncertainty which attends the name attaches in a greater degree to the place itself. It seems impossible to discover with precision whether Luz and Bethel represent one and the same town—the former the Canaanite, the latter the Hebrew name—or whether they were distinct places, though in close proximity. The latter is the natural inference from two of the passages in which Luz is spoken of. Jacob "called the name of the *place* Bethel, but the name of the *city* was called Luz in the beginning" (Gen. xxviii. 19); as if the spot—the "certain place"—in which he had "lighted," where he saw his vision and erected his pillar, were outside the walls of the Canaanite town. And with this agree the terms of the specification of the common boundary of Ephraim and Benjamin. It ran "from Bethel to Luz" (Josh. xvi. 2), or "from the wilderness of Bethaven . . . to Luz, to the shoulder of Luzah southward, that is Bethel" (xviii. 13); as if Bethel were on the south side of the hill on which the other city stood.

Other passages, however, seem to speak of the two as identical—"Luz in the land of Canaan, that is Bethel" (Gen. xxxv. 6); and in the account of the capture of Bethel, after the conquest of the country, it is said that "the name of the city before was Luz" (Judg. i. 23). Nor should it be overlooked that in the very first notice of Abram's arrival in Canaan, Bethel is mentioned without Luz (Gen. xii. 8, xiii. 3), just as Luz is mentioned by Jacob without Bethel (xlviii. 3).

Perhaps there never was a point on which the evidence was so curiously contradictory. In the passages just quoted we find Bethel mentioned in the most express manner two generations before the occurrence of the event which gave it its name; while the patriarch to whom that event occurred, and who made there the most solemn vow of his life, in recurring to that very circumstance, calls the place by its heathen name. We further find the Amorite name attached, before the conquest of the country by the Israelites, to a city of the building of which we have no record, and which city is then in the possession of the Canaanites.

The conclusion of the writer is that the two places were, during the times preceding the conquest, distinct, Luz being the city and Bethel the house and altar of Jacob: that after the destruction of Luz by the tribe of Ephraim the town of Bethel arose: that the close proximity of the two was sufficient to account for their being taken as identical in cases where there was no special reason for discriminating them, and that the great subsequent reputation of Bethel will account for the occurrence of its name in Abram's history in reference to a date prior to its existence, as well as in the records of the conquest.

When the original Luz was destroyed, through the treachery of one of its inhabitants, the man who had introduced the Israelites into the town went into the "land of the Hittites" and built a city, which he named after the former one. This city was standing at the date of the record (Judg. i. 26). But its situation, as well as that of the "land of the Hittites," has never been discovered since, and is one of the favourite puzzles of Scripture geographers. Eusebius (*Onom.* Λουζά) mentions a place of the name as standing near Shechem, nine (Jerome, three) miles from Neapolis (*Nablus*). The objection to this is the difficulty of placing in central Palestine, and at that period, a district exclusively Hittite. Some have imagined it to be in Cyprus, as if Chittim were the country of the Hittites; others in Arabia, as at Lysa, a Roman town in the desert south of Palestine, on the road to Akabah (Rob. i. 187).

The signification of the name is quite uncertain. It is usually taken as meaning "hazel," and denoting the presence of such trees; but the latest lexicographer (Fuerst, *Hdwbh.* 666) has returned to the opinion of an earlier scholar (Hiller, *Onom.* 70), that the notion at the root of the word is rather "bending" or "sinking," as of a valley. [G.]

LYCAO'NIA (Λυκαονία). This is one of those districts of Asia Minor, which, as mentioned in the N. T., are to be understood rather in an ethnological than a strictly political sense. From what is said in Acts xiv. 11 of "the speech of Lycaonia," it is evident that the inhabitants of the district, in St. Paul's day, spoke something very different from ordinary Greek. Whether this language was some Syrian dialect [CAPPADOCIA], or a corrupt form of Greek, has been much debated (Jablonsky, *Opusc.* iii. 3; Gukling, *De Ling. Lycaon.* 1726). The fact that the Lycaonians were familiar with the Greek mythology is consistent with either supposition. It is deeply interesting to see these rude country people, when Paul and Barnabas worked miracles among them, rushing to the conclusion that the strangers were Mercury and Jupiter, whose visit to this very neighbourhood forms the subject of one of Ovid's most charming stories (Ovid, *Metam.* viii. 626). Nor can we fail to notice how admirably St. Paul's address on the occasion was adapted to a simple and imperfectly civilised race (xiv. 15-17). This was at LYSTRA, in the heart of the country. Further to the east was DERBE (ver. 6), not far from the chief pass which leads up through Taurus, from CILICIA and the coast, to the central table-land. At the western limit of Lycaonia was ICONIUM (ver. 1), in the direction of ANTIOCH IN PISIDIA. A good Roman road intersected the district along the line thus indicated. On St. Paul's first missionary journey he traversed Lycaonia from west to east, and then returned on his steps (ver. 21; see 2 Tim. iii. 11). On the second and third journeys he entered it from the east; and after leaving it, travelled in the one case to Troas (Acts xvi. 1-8), in the other to Ephesus (Acts xviii. 23, xix. 1). Lycaonia is for the most part a dreary plain, bare of trees, destitute of fresh water, and with several salt lakes. It is, however, very favourable to sheep-farming. In the first notices of this district, which occur in connexion with Roman history, we find it under the rule of robber-chieftains. After the provincial system had embraced the whole of Asia Minor, the boundaries of the provinces were variable; and Lycaonia was, politically, sometimes in Cappadocia, sometimes in Galatia. A question has been raised in connexion with this point, concerning the chronology of parts of St. Paul's life. This subject is noticed in the article on GALATIA. [J. S. H.]

[b] In one case only do the LXX. omit the termination, namely, in Gen. xxviii. 19, and here they give the name = Οὐλαμμαούν, incorporating with it the preceding Hebrew word Ulam, אוּלָם, as they have also done in the case of Laish (see p. 55*b* note). The eagerness with which Jerome attacks this monstrous name at every possible opportunity is very curious and characteristic.

LYCIA (Λυκία) is the name of that south-western region of the peninsula of Asia Minor which is immediately opposite the island of Rhodes It is a remarkable district both physically and historically. The last eminences of the range of Taurus come down here in majestic masses to the sea, forming the heights of Cragus and Anticragus, with the river Xanthus winding between them, and ending in the long series of promontories called by modern sailors the "seven capes," among which are deep inlets favourable to seafaring and piracy. In this district are those curious and very ancient architectural remains, which have been so fully illustrated by our English travellers, Sir C. Fellows, and Messrs. Spratt and Forbes, and many specimens of which are in the British Museum. Whatever may have been the political history of the earliest Lycians, their country was incorporated in the Persian empire, and their ships were conspicuous in the great war against the Greeks (Herod. vii. 91, 92). After the death of Alexander the Great, Lycia was included in the Greek Seleucid kingdom, and was a part of the territory which the Romans forced Antiochus to cede (Liv. xxxvii. 55). It was made in the first place one of the continental possessions of Rhodes [CARIA]: but before long it was politically separated from that island, and allowed to be an independent state. This has been called the golden period of the history of Lycia. It is in this period that we find it mentioned (1 Macc. xv. 23) as one of the countries to which the Romans sent despatches in favour of the Jews under Simon Maccabaeus. It was not till the reign of Claudius that Lycia became part of the Roman provincial system. At first it was combined with Pamphylia: and the governor bore the title of "Proconsul Lyciae et Pamphyliae" (Gruter, *Thes.* p. 458). Such seems to have been the condition of the district when St. Paul visited the Lycian towns of PATARA (Acts xxi. 1) and MYRA (Acts xxvii. 5). At a later period of the Roman empire it was a separate province, with Myra for its capital. [J. S. H.]

LYD'DA (Λύδδα: *Lydda*), the Greek form of the name which originally appears in the Hebrew records as LOD. It is familiar to us as the scene of one of St. Peter's acts of healing, on the paralytic Aeneas, one of "the saints who dwelt at Lydda" (Acts ix. 32), the consequence of which was the conversion of a very large number of the inhabitants of the town and of the neighbouring plain of Sharon (ver. 35). Here Peter was residing when the disciples of Joppa fetched him to that city in their distress at the death of Tabitha (ver. 38).

Quite in accordance with these and the other scattered indications of Scripture is the situation of the modern town, which exactly retains its name, and probably its position. *Lidd* (Tobler, 3*tte. Wand.* 69, 456), or *Lŭdd* (Robinson, *B. R.* ii. 244), stands in the *Merj*, or meadow, of *ibn Omeir*, part of the great maritime plain which anciently bore the name of SHARON, and which, when covered with its crops of corn, reminds the traveller of the rich wheat-fields of our own Lincolnshire (Rob. iii. 145; and see Thomson, *L. & B.* ch. xxxiv.). It is 9 miles from Joppa, and is the first town on the northernmost of the two roads between that place and Jerusalem. Within a circle of 4 miles still stand (*Kefr Auna*), Hadid (*el-Haditheh*), and Neba (*Beit-Neballah*), three places constantly associa with Lod in the ancient records. The great course outside the town is said still to bear the na of *Abi-Butrus* (Peter), in memory of the Apos (Rob. ii. 248; Tobler, 471). Lying so conspicuous in this fertile plain, and upon the main road from t sea to the interior, Lydda could hardly escape eventful history. It was in the time of Joseph a place of considerable size, which gave its name one of the three (or four, xi. 57) "governments or toparchies (see Joseph. *B. J.* iii. 3, §5) wh Demetrius Soter (B.C. cir. 152), at the request Jonathan Maccabaeus, released from tribute, a transferred from Samaria to the estate of the Temp at Jerusalem (1 Macc. xi. 34; comp. x. 30, 3 xi. 28, 57); though by whom these districts we originally defined does not appear (see Michaeli *Bib. für Ungel.*). A century later (B.C. cir. 4 Lydda, with Gophna, Emmaus, and Thamna, becam the prey of the insatiable Cassius, by whom th whole of the inhabitants were sold into slavery raise the exorbitant taxes imposed (Joseph. *Ant.* xi 11, §2). From this they were, it is true, soon re leased by Antony; but a few years only elapse before their city (A.D. 66) was burnt by Cestiu Gallus on his way from Caesarea to Jerusalem. H entered it when all the people of the place but fift were absent at the feast of Tabernacles in Jerusalem (Joseph. *B. J.* ii. 19, §1). He must have passe the hardly cold ruins not more than a fortnigh after, when flying for his life before the infuriate Jews of Jerusalem. Some repair appears to hav been immediately made, for in less than two years early in A.D. 68, it was in a condition to be again taken by Vespasian, then on his way to his cam paign in the south of Judaea. Vespasian introduce fresh inhabitants from the prisoners lately taken i Galilee (Joseph. *B. J.* iv. 8, §1). But the sub stantial rebuilding of the town—lying as it did i the road of every invader and every countermarch— can hardly have been effected till the disorders o this unhappy country were somewhat composed Hadrian's reign, after the suppression of the revol of Bar-Cocheba (A.D. cir. 136), when Paganism wa triumphant, and Jerusalem rebuilding as Aelia Capitolina, would not be an improbable time for this, and for the bestowal on Lydda of the new name o Diospolis[a]—City of Zeus—which is stated by Jerome to have accompanied the rebuilding. (See Quaresmius, *Peregr.* i., lib. 4, cap. 3.) We have already seen that this new name, as is so often the case in Palestine, has disappeared in favour of the ancient one. [ACCHO; KENATH, &c.]

When Eusebius wrote (A.D. 320-330) Diospolis was a well-known and much-frequented town, to which he often refers, though the names of neither it nor Lydda occur in the actual catalogue of his *Onomasticon*. In Jerome's time (*Epitaph. Paulae* §8),[b] A.D. 404, it was an episcopal see. Tradition reports that the first bishop was "Zenas the lawyer" (Tit. iii. 13), originally one of the seventy disciples (Dorotheus, in Reland, 879); but the first historical mention of the see is the signature of "Aetius Lyd-

[a] Was this the Diospolis mentioned by Josephus (*Ant.* xv. 5, 91, and *B. J.* i. 4, §6? But it is difficult to discover if two places are not intended, possibly neither of them identical with Lydda.

Can there be any connexion, etymological or other, between the two names? In the *Dict. of Geogr.* i. 778, a modern Egyptian village is mentioned named *Lydda*, of which the ancient name was also Diospolis.

[b] Jerome is wrong here in placing the raising of Dorcas at Lydda. So also Ritter (*Palästina*, 851) ascribes the miracle to *St. Paul*.

[illegible]" to the acts of the Council of Nicæa (A.D. 325; Reland, 878). After this the name is found, as Diospolis, now Lydda, amongst the lists of the Councils down to A.D. 518 (Roo. ii. 245; Mislin, i. 149). The bishop of Lydda, originally subject to Cæsarea, became at a later date suffragan to Jerusalem (see the two lists in Von Raumer, 401); and this is still the case. In the latter end of 415 a Council of 14 bishops was held here, before which Pelagius appeared, and by whom, after much tumultuous debate, and in the absence of his two accusers, he was acquitted of heresy, and received as a Christian brother[c] (Milner, *Hist. of Ch. of Christ*, cent. V. ch. iii.). St. George, the patron saint of England, was a native of Lydda. After his martyrdom his remains were buried there (see quotations in Robinson, ii. 245), and over them a church was afterwards built and dedicated to his honour. The erection of this church is commonly ascribed to Justinian, but there seems to be no real ground for the assertion,[d] and at present it is quite uncertain by whom it was built. When the country was taken possession of by the Saracens in the early part of the 8th cent, the church was destroyed; and in the ruined condition it was found by the Crusaders in A.D. 1099, who reinstituted the see, and added to its endowment the neighbouring city and lands of Ramleh. Apparently at the same time the church was rebuilt and strongly fortified (Rob. ii. 247). It appears at that time to have been outside the city. Again destroyed by Saladin after the battle of Hattin in 1191, it was again rebuilt, if we are to believe the tradition, which, however, is not so consistent or trustworthy as one would desire, by Richard Cœur-de-lion (Will. Tyr.; but see Rob. ii. 245, 246). The remains of the church still form the most remarkable object in the modern village. A minute and picturesque account of them will be found in Robinson (ii. 244), and a view in Van de Velde's *Pays d'Israel* (plate 55). The town is, for a Mohammedan place, busy and prosperous (see Thomson, *Land and Book*; Van de Velde, *S. & P.* 441). Buried in palms, and with a large well close to the entrance, it looks from a distance inviting enough, but its interior is very repulsive on account of the extraordinary number of persons, old and young, whom one encounters at every step, either totally blind or afflicted with loathsome diseases of the eyes. Indeed it is proverbial for this; and the writer was told on the spot in 1858, as a common saying, that in *Lydd* every man has either but one eye or none at all.

Lydda was, for some time previous to the destruction of Jerusalem, the seat of a very famous Jewish school, scarcely second to that of Jabneh. About the time of the siege it was presided over by Rabbi Gamaliel, second of the name (Lightfoot, *Chor. Cent.* xvi.). Some curious anecdotes and short notices from the Talmuds concerning it are preserved by Lightfoot. One of these states that "Queen Helena celebrated the Feast of Tabernacles there"!

In the city of St. George, who is one with the Moslem personage *El-Khudr*, Lydda is held in much honour by the Muslims. In their traditions the gate of the city will be the scene of the final combat between Christ and Antichrist (Sale's *Koran*, note to ch. 43; and *Prel. Diss.* iv. §4; also Jalal al-Din, *Temple of Jerusalem*, 434). [G.]

LYD'IA (Λυδία), a maritime province in the west of Asia Minor, bounded by Mysia on the N. Phrygia on the E., and Caria on the S. The name occurs only in 1 Macc. viii. 8 (the rendering of the A. V. in Ez. xxx. 5 being incorrect for Ludim); it is there enumerated among the districts which the Romans took away from Antiochus the Great after the battle of Magnesia in B.C. 190, and transferred to Eumenes II., king of Pergamus. Some difficulty arises in the passage referred to from the names "India and Media" found in connexion with it: but if we regard these as incorrectly given either by the writer or by a copyist for "Ionia and Mysia," the agreement with Livy's account of the same transaction (xxxvii. 56) will be sufficiently established, the notice of the *maritime* provinces alone in the book of Maccabees being explicable on the ground of their being best known to the inhabitants of Palestine. For the connexion between Lydia and the Lud and Ludim of the O. T., see LUDIM. Lydia is included in the "Asia" of the N. T. [W. L. B.]

LYD'IA (Λυδία), the first European convert of St. Paul, and afterwards his hostess during his first stay at Philippi (Acts xvi. 14, 15, also 40). She was a Jewish proselyte (*σεβομένη τὸν Θεόν*) at the time of the Apostle's coming; and it was at the Jewish Sabbath-worship by the side of a stream (ver. 13) that the preaching of the Gospel reached her heart. She was probably only a temporary resident at Philippi. Her native place was THYATIRA, in the province of Asia (ver. 14; Rev. ii. 18); and it is interesting to notice that through her, indirectly, the Gospel may have come into that very district, where St. Paul himself had recently been forbidden directly to preach it (Acts xvi. 6). Thyatira was famous for its dyeing-works; and Lydia was connected with this trade (*πορφυρόπωλις*), either as a seller of dye, or of dyed goods. We infer that she was a person of considerable wealth, partly from the fact that she gave a home to St. Paul and his companions, partly from the mention of the conversion of her "household," under which term, whether children are included or not, slaves are no doubt comprehended. Of Lydia's character we are led to form a high estimate, from her candid reception of the Gospel, her urgent hospitality, and her continued friendship to Paul and Silas when they were persecuted. Whether she was one of "those women who laboured with Paul in the Gospel" at Philippi, as mentioned afterwards in the Epistle to that place (Phil. iv. 3), it is impossible to say. As regards her name, though it is certainly curious that Thyatira was in the district anciently called "Lydia," there seems no reason for doubting that it was simply a proper name, or for supposing with Grotius that she was "ita dicta a solo natali." [J. S. H.]

LYSA'NIAS (Λυσανίας), mentioned by St. Luke in one of his chronological passages (iii. 1) as being tetrarch of ABILENE (*i. e.* the district round Abila) in the 15th year of Tiberius, at the time when Herod Antipas was tetrarch of Galilee,

[c] "In memorabilis Synodus Diospolitana" (Jerome, *Dial. adv. Pelag. fin.*).

[d] The church which Justinian built to St. George was 2 leagues (*ἐν Βεζανεῖ*), somewhere in Armenia (Procop. *de Ædif. Justin.* 3, 4; in Rob. 246). See the remarks of Robinson against the possibility of Constantine having built the church at Lydda. But were there not probably two churches at Lydda, one dedicated to St. George, and one to the Virgin? See Reland, 878.

and Herod Philip tetrarch of Ituraea and Trachonitis. It happens that Josephus speaks of a prince named Lysanias who ruled over a territory in the neighbourhood of Lebanon in the time of Antony and Cleopatra, and that he also mentions Abilene as associated with the name of a tetrarch Lysanias, while recounting events of the reigns of Caligula and Claudius. These circumstances have given to Strauss and others an opportunity for accusing the Evangelist of confusion and error: but we shall see that this accusation rests on a groundless assumption.

What Josephus says of the Lysanias who was contemporary with Antony and Cleopatra (*i. e.* who lived 60 years before the time referred to by St. Luke) is, that he succeeded his father Ptolemy, the son of Mennaeus, in the government of Chalcis, under Mount Lebanon (*B. J.* i. 13, §1; *Ant.* xiv. 7, §4); and that he was put to death at the instance of Cleopatra (*Ant.* xv. 4, §1), who seems to have received a good part of his territory. It is to be observed that Abila is not specified here at all, and that Lysanias is not called tetrarch.

What Josephus says of Abila and the tetrarchy in the reigns of Caligula and Claudius (*i. e.* about 20 years after the time mentioned in St. Luke's Gospel) is, that the former emperor promised the "tetrarchy of Lysanias" to Agrippa (*Ant.* xviii. 6, §10), and that the latter actually gave to him "Abila of Lysanias" and the territory near Lebanon (*Ant.* xix. 5, §1, with *B. J.* ii. 12, §8).

Now, assuming Abilene to be included in both cases, and the former Lysanias and the latter to be identical, there is nothing to hinder a prince of the same name and family from having reigned as tetrarch over the territory in the intermediate period. But it is probable that the Lysanias mentioned by Josephus in the second instance is actually the prince referred to by St. Luke. Thus, instead of a contradiction, we obtain from the Jewish historian a confirmation of the Evangelist; and the argument becomes very decisive if, as some think, Abilene is to be excluded from the territory mentioned in the story which has reference to Cleopatra.

Fuller details are given in Davidson's *Introduction to the N. T.* i. 214-220; and there is a good brief notice of the subject in Rawlinson's *Bampton Lectures for* 1859, p. 203, and note 113. [J. S. H.]

LYSIAS (Λυσίας), a nobleman of the blood-royal (1 Macc. iii. 32; 2 Macc. xi. 1), who was entrusted by Antiochus Epiphanes (cir. B.C. 166) with the government of southern Syria, and the guardianship of his son Antiochus Eupator (1 Macc. iii. 32; 2 Macc. x. 11). In the execution of his office Lysias armed a very considerable force against Judas Maccabaeus. Two detachments of this army under Nicanor (2 Macc. viii.) and Gorgias were defeated by the Jews near Emmaus (1 Macc. iv.), and in the following year Lysias himself met with a much more serious reverse at Bethsura (B.C. 165), which was followed by the purification of the Temple. Shortly after this Antiochus Epiphanes died (B.C. 164), and Lysias assumed the government as guardian of his son, who was yet a child (App. *Syr.* 46, ἐναετὲς παιδίον; 1 Macc. vi. 17). The war against the Jews was renewed, and, after a severe struggle, Lysias, who took the young king with him, captured Bethsura, and was besieging Jerusalem, when he received tidings of the approach of Philip, to whom Antiochus had transferred the guardianship of the prince (1 Macc. vi. 18; 2 Macc. xiii.). He defeated Philip (B.C. 163), and was supported at Rome; but in the next year, gether with his ward, fell into the hands of Demetrius Soter [DEMETRIUS I.], who put them both death (1 Macc. vii. 2-4; 2 Macc. xiv. 2; *Ant.* xii. 12, §15, 16; App. *Syr.* 45-47; Pol xxxi. 15, 19).

There are considerable differences between first and second books of Maccabees with reg to the campaigns of Gorgias and the subsequ one of Lysias: the former places the defeat Lysias in the reign of Antiochus Epiphanes bef the purification of the Temple (1 Macc. iv. 26-3 the latter in the reign of Antiochus Eupator aft the purification (2 Macc. x. 10, xi. 1, &c.). Th is no sufficient ground for believing that the eve recorded are different (Patricius, *De Consen Macc.* §xxvii. xxxvii.), for the mistake of date 2 Maccabees is one which might easily arise (com Wernsdorf, *De fide Macc.* §lxvi.; Grimm, *ad Macc.* xi. 1). The idea of Grotius that 2 Macc. and 2 Macc. xiii. are duplicate records of the sa event, in spite of Ewald's support (*Geschichte*, 365 *note*), is scarcely tenable, and leaves half t difficulty unexplained. [B. F. W.]

LYSIM'ACHUS (Λυσίμαχος). 1. "A son Ptolemaeus of Jerusalem" (Α. Πτολεμαίου ὁ Ἱερουσαλήμ), the Greek translator of the book Esther (ἐπιστολή. Comp. Esth. ix. 20), accordi to the subscription of the LXX. There is, howeve no reason to suppose that the translator was al the author of the additions made to the Hebre text. [ESTHER.]

2. A brother of the high-priest Menelaus, wh was left by him as his deputy (διάδοχος) duri his absence at the court of Antiochus. H tyranny and sacrilege excited an insurrection, duri which he fell a victim to the fury of the peop cir. B.C. 170 (2 Macc. iv. 29-42). The Vulgate, b a mistranslation (Menelaus amotus est a sacerdotio succedente Lysimacho fratre suo, 2 Macc. iv. 29 makes Lysimachus the successor instead of the de puty of Menelaus. [B. F. W.]

LYSTRA (Λύστρα) has two points of extrem interest in connexion respectively with St. Paul' first and second missionary journeys—(1) as th place where divine honours were offered to him, and where he was presently stoned; (2) as th home of his chosen companion and fellow-missionary TIMOTHEUS.

We are told in the 14th chapter of the Acts, that Paul and Barnabas, driven by persecution from ICONIUM (ver. 2), proceeded to Lystra and its neighbourhood, and there preached the Gospel. In the course of this service a remarkable miracle was worked in the healing of a lame man (ver. 8). This occurrence produced such an effect on the minds of the ignorant and superstitious people of the place, that they supposed that the two gods, MERCURY and JUPITER, who were said by the poets to have formerly visited this district in human form [LYCAONIA] had again bestowed on it the same favour, and consequently were proceeding to offer sacrifice to the strangers (ver. 13). The apostles rejected this worship with horror (ver. 14), and St. Paul addressed a speech to them, turning their minds to the true Source of all the blessings of nature. The distinct proclamation of Christian doctrine is not mentioned, but it is implied, inasmuch as a church was founded at Lystra. The adoration of the Lystrians was rapidly followed by a change of feeling. The persecuting Jews arrived

from Antioch in Pisidia and Iconium, and had such influence that Paul was stoned and left for dead (ver. 19). On his recovery he withdrew, with Barnabas, to DERBE (ver. 20), but before long retraced his steps through Lystra (ver. 21), encouraging the new disciples to be stedfast.

It is evident from 2 Tim. iii. 10, 11, that Timotheus was one of those who witnessed St. Paul's sufferings and courage on this occasion: and it can hardly be doubted that his conversion to Christianity resulted partly from these circumstances, combined with the teaching of his Jewish mother and grandmother, EUNICE and LOIS (2 Tim. i. 5). Thus, when the apostle, accompanied by Silas, came, on his second missionary journey, to this place again (and here we should notice how accurately Derbe and Lystra are here mentioned in the inverse order), Timotheus was already a Christian (Acts xvi. 1). Here he received circumcision, "because of the Jews in those parts" (ver. 3); and from this point began his connexion with St. Paul's travels. We are doubly reminded here of Jewish residents in and near Lystra. Their first settlement, and the ancestors of Timotheus among them, may very probably be traced to the establishment of Babylonian Jews in Phrygia by Antiochus three centuries before (Joseph. *Ant.* xii. 3, §4). Still it is evident that there was no influential Jewish population at Lystra: no mention is made of any synagogue; and the whole aspect of the scene described by St. Luke (Acts xiv.) is thoroughly heathen. With regard to St. Paul, it is not absolutely stated that he was ever in Lystra again, but from the general description of the route of the third missionary journey (Acts xviii. 23) it is almost certain that he was.

Lystra was undoubtedly in the eastern part of the great plain of Lycaonia; and there are very strong reasons for identifying its site with the ruins called *Bin-bir-Kilisseh*, at the base of a conical mountain of volcanic structure, named the *Karadagh*. Hamilton, *Res. in A. M.* ii. 313). Here are the remains of a great number of churches: and it should be noticed that Lystra has its post-apostolic Christian history, the names of its bishops appearing in the records of early councils.

PLINY (v. 42) places this town in Galatia, and PTOLEMY (v. 4, 12) in Isauria: but these statements are quite consistent with its being placed in Lycaonia by St. Luke, as it is by Hierocles (*Synecd.* p. 675). As to its condition in heathen times, it is worth while to notice that the words in Acts xiv. 13 (τοῦ Διὸς τοῦ ὄντος πρὸ τῆς πόλεως) would lead us to conclude that it was under the tutelage of Jupiter. Walch, in his *Spicilegium Antiquitatum Lystrensium* (*Diss. in Acta Apostolorum*, Jena, 1766, vol. iii.), thinks that in this passage a statue, not a temple, of the god is intended. [J. S. H.]

M

MA'ACAH (מַעֲכָה: Μααχά; Alex. Μααχάθ, *Maacha*). 1. The mother of Absalom = MAACHAH 5 (2 Sam. iii. 3).

2. MAACAH, and (in Chron.) MAACHAH: in Samuel Ἀμαλήκ,[a] and so Josephus; in Chron. Μωχᾶ and Μοοχᾶ; Alex. in both, Μααχα: *Machati, Maacha*. A small kingdom in close proximity to Palestine, which appears to have lain outside Argob (Deut. iii. 14) and Bashan (Josh. xii. 5). These districts, probably answering to the *Lejah* and *Jaulân* of modern Syria, occupied the space from the Jordan on the west to Salcah (*Sulkhad*) on the east and Mount Hermon on the north. There is therefore no alternative but to place Maacah somewhere to the east of the *Lejah*, in the country that lies between that remarkable district and the *Sufá*, namely the stony desert of *el-Krá*[b] (see Kiepert's *map* to Wetzstein's *Hauràn*, &c., 1860), and which is to this day thickly studded with villages. In these remote eastern regions was also probably situated Tibchath, Tebach, or Betach, which occurs more than once in connexion with Maacah[c] (1 Chr. xviii. 8; Gen. xxii. 24; 2 Sam. viii. 8). Maacah is sometimes assumed to have been situated about ABEL-BETH-MAACAH; but, if *Abil* be the modern representative of that town, this is hardly probable, as it would bring the kingdom of Maacah west of the Jordan, and within the actual limits of Israel. It is possible that the town was a colony of the nation, though even this is rendered questionable by the conduct of Joab towards it (2 Sam. xx. 22). That implacable soldier would hardly have left it standing and unharmed had it been the city of those who took so prominent a part against him in the Ammonite war.

That war was the only occasion on which the Maacathites came into contact with Israel, when their king assisted the Bene-Ammon against Joab with a force which he led himself (2 Sam. x. 6, 8; 1 Chr. xix. 7. In the first of these passages "of" is inaccurately omitted in the A. V.). The small

[a] Jerome (*Thes.* 811 *a*) suggests that the name may have been originally מַלְכָּה, the ל having changed into ע in accordance with Phoenician custom. (See also Gesen. *Mich.* 766 *b*; though he derives the name itself from a root signifying depression—lowland.) It is perhaps some support to this idea, that Eusebius in the *Onomasticon* gives the name Μαλαχά, and that the LXX. read in one passage "Amalek," as above. Is it not also possible that in 2 Sam. viii. 12 "Amalek" may more accurately be Maacah? At least, no campaign against Amalek is recorded in these wars—none since that before the death of Saul (1 Sam. xxx.), which can hardly be referred to in this connexion.

[b] This is probably the origin of the name *Crau* attached to the great stony plain north of Marseilles.

[c] The ancient versions do not assist us much in fixing the position of Maacah. The Syriac Peshito in 1 Chr. xix. has Chavva, ܚܘܐ. If this could be identified with *El-Chavva*, the district east of *Sulkhad*, and south of the *Sufá* (see Wetzstein, and Cyril Graham), it would support the view taken in the text, and would also fall in with the suggestion of Ewald (*Gesch.* iii. 197), that the *Sufá* is connected with Zobah. In Josh. xiii. the Peshito has *Kuros*, ܩܘܪܘܣ, of which the writer can make nothing.

The Targums of Onkelos, Jonathan, and Jerusalem have Aphikeros, אַפִּיקְרוֹם (with some slight variations in spelling). This is probably intended for the Ἐπίκαιρος of Ptolemy, which he mentions in company with Livias, Callirhoë, and Jazer (?). (See Reland, *Pal.* 462; and compare the expression of Josephus with regard to Machaerus, *B. J.* vii. 6, §2). But this would surely be too far south for Maacah. The Targum Pseudojon. has *Antikeros*, אַנְטִיקֵירוֹס, which remains obscure. It will be observed, however, that every one of these names contains *Kr* or *Chr*.

extent of the country may be inferred from a comparison of the number of this force with that of the people of Zobah, Ishtob, and Rehob (2 Sam. x. 6), combined with the expression "his people" in 1 Chr. xix. 7, which perhaps imply that a thousand men were the whole strength of his army. [MAACHATHI.]

To the connexion which is always implied between Maacah and Geshur we have no clue. It is perhaps illustrated by the fact of the daughter of the king of Geshur—wife of David and mother of Absalom—being named Maacah. [G.]

MA'ACHAH (מַעֲכָה: Μοχά; Alex. Μωχα: *Maacha*). 1. The daughter of Nahor by his concubine Reumah (Gen. xxii. 24). Ewald connects her name with the district of Maachah in the Hermon range (*Gesch.* i. 414, *note* 1).

2. (Μααχά.) The father of Achish, who was king of Gath at the beginning of Solomon's reign (1 K. ii. 39). [MAOCH.]

3. The daughter, or more probably granddaughter, of Absalom, named after his mother; the third and favourite wife of Rehoboam, and mother of Abijah (1 K. xv. 2; 2 Chr. xi. 20-22). According to Josephus (*Ant.* viii. 10. §1) her mother was Tamar, Absalom's daughter. But the mother of Abijah is elsewhere called "Michaiah, the daughter of Uriel of Gibeah" (2 Chr. xiii. 2). The LXX. and Syriac, in the latter passage, have Maachah, as in xi. 20. If Michaiah were a mere variation of Maachah, as has been asserted (the resemblance in English characters being much more close than in Hebrew), it would be easy to understand that Uriel of Gibeah married Tamar the daughter of Absalom, whose granddaughter therefore Maachah was. But it is more probable that "Michaiah" is the error of a transcriber, and that "Maachah" is the true reading in all cases (Capelli, *Crit. Sacr.* vi. 7, §3). Houbigant proposed to alter the text, and to read "Maachah, the daughter of Abishalom (or Absalom), the son of Uriel." During the reign of her grandson Asa she occupied at the court of Judah the high position of "King's Mother" (comp. 1 K. ii. 19), which has been compared with that of the *Sultana Valide* in Turkey. It may be that at Abijah's death, after a short reign of three years, Asa was left a minor, and Maachah acted as regent, like Athaliah under similar circumstances. If this conjecture be correct, it would serve to explain the influence by which she promoted the practice of idolatrous worship. The idol or "horror" which she had made for Asherah (1 K. xv. 13; 2 Chr. xv. 16) is supposed to have been the emblem of Priapus, and was so understood by the Vulgate. [IDOL, vol. i. p. 849 *a*.] It was swept away in Asa's reformation, and Maachah was removed from her dignity. Josephus calls Maachah Μαχάρη, perhaps a corruption of Μαχά, and makes Asa the son of Μαχαία. See Burrington's *Genealogies*, i. 222-228, where the two Maachahs are considered distinct.

4. (Μωχά.) The concubine of Caleb the son of Hezron (1 Chr. ii. 48).

5. (Μωχά.) The daughter of Talmai, king of Geshur, and mother of Absalom (1 Chr. iii. 2): also called MAACAH in A. V. of 2 Sam. iii. 3. Josephus gives her name Μαχάμη (*Ant.* vii. 1, §4). She is said, according to a Hebrew tradition recorded by Jerome (*Qu. Hebr. in Reg.*), to have been taken by David in battle and added to the number of his wives.

6. (Μωχά; Alex. Μοχά.) The wife of Machir the Manassite, the father or founder of Gilead, and sister of Huppim and Shuppim (1 Chr. vii 15, 16), who were of the tribe of Benjamin (1 Chr. vii. 12). In the Peshito Syriac Maachah is made the mother of Machir.

7. (Μοαχά; Alex. Μααχα.) The wife of Jehiel, father or founder of Gibeon, from whom was descended the family of Saul (1 Chr. viii. 29, ix. 35).

8. (Μωχά; Alex. Μαχά.) The father of Hanan, one of the heroes of David's body-guard (1 Chr. xi. 43), who is classed among the warriors selected from the eastern side of the Jordan. It is not impossible that Maachah in this instance may be the same as Syria-Maachah in 1 Chr. xix. 6, 7.

9. (Μααχά.) A Simeonite, father of Shephatiah, prince of his tribe in the reign of David (1 Chr. xxvii. 16). [W. A. W.]

MA'CHATHI, and MA'CHATHITES, THE (הַמַּעֲכָתִי: Ὁμαχαθεί, ἡ Μαχεί, ὁ Μαχαρεί; Alex. Μαχαθι: *Machathi, Machathi*), two words—the former taking the form of the Hebrew—which denote the inhabitants of the small kingdom of MAACHAH (Deut. iii. 14; Josh. xii. 5, xiii. 11, 13). Individual Maachathites were not unknown among the warriors of Israel. One, recorded simply as "son of the Maachathite," or possibly "Eliphelet, son of Ahasbai the Maachathite" (see Kennicott, *Dissertation*, 205, 206), was a member of David's guard (2 Sam. xxiii. 34). Another, Jezaniah, was one of the chiefs who rallied round Gedaliah the superintendent, after the first destruction of Jerusalem (Jer. xl. 8; 2 K. xxv. 23). Eshtemoa the Maachathite (1 Chr. iv. 19) more probably derives that title from the concubine of Caleb (ii. 48) than from the Syrian kingdom. [MAACAH, 2.] [G.]

MAADA'I (מַעֲדַי: Μοσδία; Alex. Μοσδεα Cod. Fr. Aug. Δεδία: *Maaddi*), one of the sons of Bani who returned with Ezra and had intermarried with the people of the land (Ezr. x. 34). He is called MOMDIS in 1 Esd. ix. 34.

MAADI'AH (מַעַדְיָה: om. in Vat. MS.: Alex. Μααδιας: *Madia*), one of the priests, or families of priests, who returned with Zerubbabel and Jeshua (Neh. xii. 5); elsewhere (v. 17) called MOADIAH.

MAA'I (מַעַי: Ἀία: *Maai*), one of the Bene-Asaph who took part in the solemn musical service by which the wall of Jerusalem was dedicated after it had been rebuilt by Nehemiah (Neh. xii. 36).

MA'ALEH-ACRABBIM (מַעֲלֵה עַקְרַבִּים· ἡ προσανάβασις Ἀκραβείν; *ascensus Scorpionis*). The full form of the name which in its other occurrences (in the original identical with the above) is given in the A. V. as "the ascent of, or the going up to, Akrabbim." It is found only in Josh. xv. 3. For the probable situation of the pass, see AKRABBIM. [G.]

MA'ANI (Βανί: *Banni*), 1 Esd. ix. 34 identical with BANI, 4.

MA'ARATH (מַעֲרָת: Μαγαράθ: *Maralh*), one of the towns of Judah, in the district of the mountains, and in the same group which contains HALHUL, BETH-ZUR, and GEDOR (Josh. xv. 58). The places which occur in company with it have

[a] The LXX. here represent the Hebrew Ain by γ: compare Gomorrah.

has identified at a few miles to the north of Hebron, but Maarath has hitherto eluded observation. It does not seem to have been known to Eusebius or Jerome, although its name is mentioned by them (*Onomasticon*, "Maroth").

By Gesenius (*Thes.* 1069*a*) the name is derived from a root signifying openness or bareness; but may it not with equal accuracy and greater plausibility be derived from that which has produced the similar word, *Mearah*, a cave? It would thus point to a characteristic feature of the mountainous districts of Palestine, one of which, the Mearath-Adullam, or cave of Adullam, was probably at no great distance from this very locality. [G.]

MAASEI'AH (מַעֲשֵׂיָה: *Maaseía*; Alex. **Maaσηα**; Cod. Fr. Aug. **Maaσήα**: *Maasia*). 1. A descendant of Judah the priest, who in the time of Ezra had married a foreign wife, and was divorced from her (Ezr. x. 18). He is called MATTHELAS in 1 Esd. ix. 19, but in the margin, MAASIAS.

2. (**Μαασήλ**; Alex. **Μαασειας**.) A priest, of the sons of Harim, who put away his foreign wife at Ezra's command (Ezr. x. 21). MAASIAH in margin of 1 Esd. ix. 19.

3. (Cod. Fr. Aug. **Maaσσala**.) A priest, of the sons of Pashur, who had married a foreign wife in the time of Ezra (Ezr. x. 22). He is called MASSIAS in 1 Esd. ix. 22.

4. (Alex. **Μαασηα**; Cod. Fr. Aug. **Μασή**: *Maasia*.) One of the laymen, a descendant of Pahath-Moab, who put away his foreign wife in the time of Ezra (Ezr. x. 30). Apparently the same as MASSIAS in 1 Esd. ix. 31.

5. (**Μααδίας**; Cod. Fr. Aug. **Μαδασήλ**: *Maadias*.) The father of Azariah, one of the priests from the cities of the Jordan, who assisted Nehemiah in rebuilding the wall of Jerusalem (Neh. iii. 23).

6. (Cod. Fr. Aug. **Maaσσala**.) One of those who stood at the right hand of Ezra when he read the law to the people (Neh. viii. 4). He was probably a priest, but whether one of those mentioned in ch. x. 41, 42, is uncertain. The corresponding name in 1 Esd. ix. 43 is BALASAMUS.

7. (Om. in LXX.) A Levite who assisted on the same occasion in expounding the law to the people (Neh. viii. 7). He is called MAIANEAS in 1 Esd. ix. 48.

8. (Alex. **Μααλσια**; Cod. Fr. Aug. **Maaσσala**.) One of the heads of the people whose descendants signed the covenant with Nehemiah (Neh. x. 25).

9. (Alex. **Μαλσια**.) Son of Baruch and descendant of Pharez, the son of Judah. His family dwelt at Jerusalem after the return from Babylon (Neh. xi. 5). In the corresponding narrative of 1 Chr. ix. 5 he is called ASAIAH.

10. (**Μααείας**; *Masiæ*.) A Benjamite, ancestor of Uzziah, who dwelt at Jerusalem after the captivity (Neh. xi. 7).

11. (Om. in Vat. MS.; Alex. **Μαασιας**.) Two priests of this name are mentioned (Neh. xii. 41, 42) as taking part in the musical service which accompanied the dedication of the wall of Jerusalem by Ezra. One of them is probably the same as 6.

12. (**Μασαίας**; Cod. Fr. Aug. **Μασέας** in Jer. xxi.; **Μαασαίας**; Alex. **Μασσιας**, Jer. xxxvii. 3.) Father of Zephaniah, who was a priest in the reign of Jehoiakim (Jer. xxix. 25).

13. (Om. in LXX.) The father of Zedekiah the false prophet, in the reign of Zedekiah king of Judah (Jer. xxix. 21).

14. מַעֲשִׂיָּהוּ: **Maaσσala**; Alex. **Μαασια**: *Maasias*), one of the Levites of the second rank, appointed by David to sound "with psalteries on Alamoth," when the ark was brought from the house of Obed-edom. He was also one of the "porters" or gate-keepers for the ark (1 Chr. xv. 18, 20).

15. (Alex. **Μασια**.) The son of Adaiah, and one of the captains of hundreds in the reign of Joash king of Judah. He assisted Jehoiada in the revolution by which Joash was placed on the throne (2 Chr. xxiii. 1).

16. (**Μαασίας**; Alex. **Μασσαίας**.) An officer of high rank (*shôtêr*) in the reign of Uzziah (2 Chr. xxvi. 11). He was probably a Levite (comp. 1 Chr. xxiii. 4), and engaged in a semi-military capacity, corresponding to the civic functions of the judges, with whom the *shôterim* are frequently coupled.

17. (**Μαασίας**; Alex. **Μασια**.) The "king's son," killed by Zichri the Ephraimitish hero in the invasion of Judah by Pekah king of Israel, during the reign of Ahaz (2 Chr. xxviii. 7). The personage thus designated is twice mentioned in connexion with the "governor of the city" (1 K. xxii. 26; 2 Chr. xviii. 23), and appears to have held an office of importance at the Jewish court (perhaps acting as viceroy during the absence of the king), just as the queen dowager was honoured with the title of "king's mother" (comp. 2 K. xxiv. 12 with Jer. xxix. 2), or *gebîrâh*, *i. e.* "mistress," or "powerful lady." [MALCHIAH, 8.] For the conjecture of Geiger see JOASH, 4.

18. (**Μασσά**.) The governor of Jerusalem in the reign of Josiah, appointed by the king, in conjunction with Shaphan and Joah, to superintend the restoration of the temple (2 Chr. xxxiv. 8).

19. (**Μασσαίας**; Alex. **Μασσιας**.) The son of Shallum, a Levite of high rank, and one of the gate-keepers of the Temple in the reign of Jehoiakim (Jer. xxxv. 4; comp. 1 Chr. ix. 19).

20. (מַחְסֵיָה: **Μαασαίας**: Alex. **Μασσιας**: *Maasias*, Jer. xxxii. 12; Alex. **Μασσσαίας**; *Masias*, Jer. li. 59). A priest; ancestor of Baruch and Seraiah, the sons of Neriah. [W. A. W.]

MAASIA'I (מַעְשַׂי: **Μασσαία**; Alex. **Μασσαί**: *Maasaï*), a priest who after the return from Babylon dwelt in Jerusalem (1 Chr. ix. 12). He is apparently the same as AMASHAI in Neh. xi. 13.

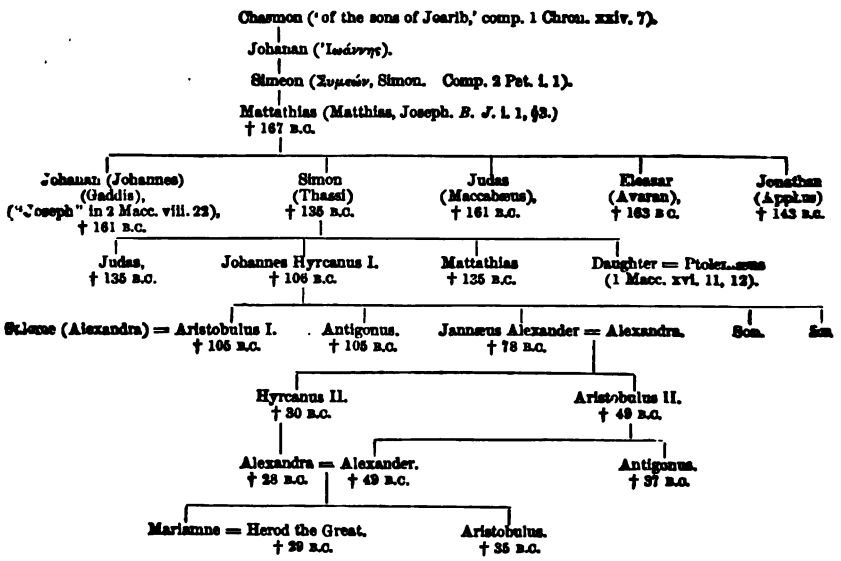
MASSIAS (**Μασσίας**: *Massias*). The same as MASSEIAH, 20, the ancestor of Baruch (Bar. i. 1).

MA'AZ (מַעַץ: **Μαάς**: *Moos*), son of Ram, the firstborn of Jerahmeel (1 Chr. ii. 27).

MAAZI'AH (מַעַזְיָה: **Μααζία**; Cod. Fr. Aug. **Αζία**: *Maazia*). 1. One of the priests who signed the covenant with Nehemiah (Neh. x. 8). From the coincidence between many of the names of the priests in the lists of the twenty-four courses established by David, of those who signed the covenant with Nehemiah (Neh. x.), and those who returned with Zerubbabel (Neh. xii.), it would seem either that these names were hereditary in families, or that they were applied to the families themselves. This is evidently the case with the names of the "heads of the people" enumerated in Neh. x. 14-27.

2. (מַעַזְיָהוּ: **Μαασσαί**; Alex. **Μοοζαλ**: *Maaziaï*). A priest in the reign of David, head of the twenty-fourth course (1 Chr. xxiv. 18). See the preceding.

MABDA'I (**Μαββαί**; Alex. **Μανδαι**: *Bamaas*). The same as BENAIAH (1 Esd. ix. 34; see EZR x. 35).



MACALON (**Μακάλων**, in both MSS.: *Bastaro*), 1 Esd. v. 21. This name is the equivalent of MICHMASH in the lists of Ezra and Nehemiah. [G.]

MACCABEES, THE (*οἱ Μακκαβαῖοι*). This title, which was originally the surname of Judas, one of the sons of Mattathias (*infr.* §2), was afterwards extended to the heroic family of which he was one of the noblest representatives, and in a still wider sense to the Palestinian martyrs in the persecution of Antiochus Epiphanes [4 MACCABEES], and even to the Alexandrine Jews who suffered for their faith at an earlier time [3 MACCABEES]. The original term *Maccabi* (*ὁ Μακκαβαῖος*) has been variously derived. Some have maintained that it was formed from the combination of the initial letters of the Hebrew sentence, "Who among the gods is like unto thee, Jehovah?" (Ex. xv. 11, Hebr. מ, ב, כ, י), which is supposed to have been inscribed upon the banner of the patriots; or, again, of the initials of the simply descriptive title, "Mattathias, a priest, the son of Johanan." But even if the custom of forming such words was in use among the Jews at this early time, it is obvious that such a title would not be an individual title in the first instance, as Maccabee undoubtedly was (1 Macc. ii. 4), and still remains among the Jews (Raphall, *Hist. of Jews*, i. 249). Moreover the orthography of the word in Greek and Syriac (Ewald, *Geschichte*, iv. 352 *note*) points to the form מקבי, and not מכבי. Another derivation has been proposed, which, although direct evidence is wanting, seems satisfactory. According to this, the word is formed from מַקֶּבָה, "a hammer" (like *Malachi*, Ewald, 353 *note*), giving a sense not altogether unlike that in which Charles *Martel* derived a surname from his favourite weapon, and still more like the *Malleus Scotorum* and *Malleus Haereticorum* of the Middle Ages.

Although the name *Maccabees* has gained the widest currency, that of *Asmonaeans*, or *Hasmonaeans*, is the proper name of the family. The origin of this name also has been disputed, but the obvious derivation from Chashmon (חַשְׁמוֹן, *Ἀσαμωναῖος*; comp. Ges. *Thes.* 534*b*), great-grandfather of Mattathias, seems certainly correct. How it came to pass that a man, otherwise obscure, gave his name to the family, cannot now be discovered; but no stress can be laid upon this difficulty, nor upon the fact that in Jewish prayers (Herzfeld, *Gesch. d. Jud.* i. 264) Mattathias himself is called *Hashmonai*.[a]

The connexion of the various members of the Maccabaean family will be seen from the accompanying table:—

THE ASMONAEAN FAMILY.

The original authorities for the history of the Maccabees are extremely scanty; but for the course of the war itself the first book of Maccabees is a most trustworthy, if an incomplete witness. [MACCABEES, BOOKS OF.] The second book adds some important details to the history of the earlier part of the struggle, and of the events which immediately preceded it; but all the statements which it contains require close examination, and must be received with caution. Josephus follows 1 Macc., for the period which it embraces, very closely, but slight additions of names and minute particulars indicate that he was in possession of other materials, probably oral traditions, which have not been elsewhere preserved. On the other hand there are cases, in which, from haste or carelessness, he has misinterpreted his authority. From other sources little can be gleaned. Hebrew and classical literature furnishes nothing more than a few trifling fragments which illustrate Maccabaean history. So long an interval elapsed before the Hebrew traditions were committed to writing, that facts, when not embodied in rites or precepts, became wholly distorted. Classical writers, again, were little likely

[a] Herzfeld derives the name from חָשַׁם, "to temper steel;" so that it becomes in sense a synonym of "Maccabee."

to caricature a conflict which probably they could not have understood. Of the great work of Polybius—who alone might have been expected to appreciate the importance of the Jewish war—only fragments remain which refer to this period; but the omission of all mention of the Maccabaean campaign in the corresponding sections of Livy, who follows very closely in the track of the Greek historian, seems to prove that Polybius also omitted them. The account of the Syrian kings in Appian is too meagre to make his silence remarkable; but indifference or contempt must be the explanation of a general silence which is too widespread to be accidental. Even when the fall of Jerusalem had directed unusual attention to the past fortunes of its defenders, Tacitus was able to dismiss the Maccabaean conflict in a sentence remarkable for scornful carelessness. "During the dominion of the Assyrians, the Medes, and the Persians, the Jews," he says, "were the most abject of their dependent subjects. After the Macedonians obtained the supremacy of the East, King Antiochus endeavoured to do away with their superstition, and introduce Greek habits, but was hindered by a Parthian war from reforming a most repulsive people" (*teterrimam gentem*, Tac. *Hist.* v. 8).[b]

1. The essential causes of the Maccabaean War have been already pointed out [ANTIOCHUS IV. vol. i. p. 75*a*]. The annals of the Maccabaean family, "by whose hand deliverance was given unto Israel" (1 Macc. v. 62), present the record of its progress. The standard of independence was first raised by MATTATHIAS, a priest[a] of the course of Joarib, which was the first of the twenty-four courses (1 Chr. xxiv. 7), and consequently of the noblest blood (comp. Jos. *Vit.* i.; Grimm, on 1 *Macc.* ii. 1). The persecutions of Antiochus Epiphanes had already roused his indignation, when emissaries of the king, headed by Apelles (Jos. *Ant.* xii. 6, §2), came to MODIN, where he dwelt, and required the people to offer idolatrous sacrifice (1 Mac. ii. 15, &c.). Mattathias rejected the overtures which were made to him first, and when a Jew came to the altar to renounce his faith, slew him, and afterwards Apelles, "as Phinees—from whom he was descended—did unto Zambri." After this he fled with his sons to the mountains (B.C. 168), whither he was followed by numerous bands of fugitives. Some of them, not in close connexion with Mattathias, being attacked on the Sabbath, offered no resistance, and fell to the number of a thousand. When Mattathias heard of the disaster he asserted the duty of self-defence, and continued the war with signal success, destroying the idolatrous altars, and restoring the observance of the Law. He seems, however, to have been already advanced in years when the rising was made, and he did not long survive the fatigues of active service. He died B.C. 166, and "was buried in the sepulchre of his fathers at Modin." The speech which he is said to have addressed to his sons before his death is remarkable as containing the first distinct allusion to the contents of Daniel, a book which seems to have exercised the most powerful influence on the Maccabaean conflict (1 Macc. ii. 60; comp. Jos. *Ant.* xii. 6, §3).

2. Mattathias himself named JUDAS—apparently his third son—as his successor in directing the war of independence (1 Macc. ii. 66). The energy and skill of "THE MACCABEE" (*ὁ Μακκαβαῖος*), as Judas is often called in 2 Macc., fully justified his father's preference. It appears that he had already taken a prominent part in the first secession to the mountains (2 Macc. v. 27, where Mattathias is not mentioned); and on receiving the chief command he devoted himself to the task of combining for common action those who were still faithful to the religion of their fathers (2 Macc. viii. 1). His first enterprises were night attacks and sudden surprises, which were best suited to the troops at his disposal (2 Macc. viii. 6, 7); and when his men were encouraged by these means, he ventured on more important operations, and defeated Apollonius (1 Macc. iii. 10-12) and Seron (1 Macc. iii. 13-24), who hearing of his success came against him with very superior forces, at Bethhoron, the scene of the most glorious victories of the Jews in earlier and later times. [BETH-HORON.] Shortly afterwards Antiochus Epiphanes, whose resources had been impoverished by the war (1 Macc. iii. 27-31), left the government of the Palestinian provinces to Lysias, while he himself undertook an expedition against Persia in the hope of recruiting his treasury. Lysias organised an expedition against Judas; but his army, a part of which had been separated from the main body to effect a surprise, was defeated by Judas at Emmaus with great loss (B.C. 166), after the Jews had kept a solemn fast at Mizpeh (1 Macc. iii. 46-53); and in the next year Lysias himself was routed at Bethsura. After this success Judas was able to occupy Jerusalem, except the "tower" (1 Macc. vi. 18, 19), and he purified the Temple (1 Macc. iv. 36, 41-53) on the 25th of Cisleu, exactly three years after its profanation (1 Macc. i. 59 [DEDICATION]; Grimm, on 1 Macc. iv. 59). The next year was spent in wars with frontier nations (1 Macc. v.); but in spite of continued triumphs the position of Judas was still precarious. In B.C. 163 Lysias, with the young king Antiochus Eupator, took Bethsura, which had been fortified by Judas as the key of the Idumaean border (1 Macc. iv. 61), after having defeated the patriots who came to its relief; and next laid siege to Jerusalem. The city was on the point of surrendering, when the approach of Philip, who claimed the guardianship of the king, induced Lysias to guarantee to the Jews complete liberty of religion. The compact thus made was soon broken, but shortly afterwards Lysias fell into the hands of Demetrius, a new claimant of the throne, and was put to death. The accession of Demetrius brought with it fresh troubles to the patriot Jews. A large party of their countrymen, with ALCIMUS at their head, gained the ear of the king, and he sent Nicanor against Judas. Nicanor was defeated, first at Capharsalama, and again in a decisive battle at Adasa, near to the glorious field of Bethhoron (B.C. 161, on the 13th Adar; 1 Macc. vii. 49; 2 Macc. xv. 36), where he was slain. This victory was the greatest of Judas's successes, and practically decided the question of Jewish independence, but it was followed by an unexpected reverse. Judas employed the short interval of peace which followed in negotiating a favourable league with the Romans. But in the same year before the answer of the senate was returned, a new

[a] The short notice of the Jews in Diodorus Siculus (*Lib.* xl. *fol.* 1) is singularly free from popular misrepresentations, many of which, however, he quotes as used by the counsellors of Antiochus to urge the king to extirpate the nation (*Lib.* xxxiv., *fol.* 1).

[b] The later tradition, by a natural exaggeration, made him high-priest. Comp. Hersfeld, *Gesch.* i. 264, 379.

invasion under Bacchides took place. The Roman alliance seems to have alienated many of the extreme Jewish party from Judas (*Midr. Hhanuka*, quoted by Raphall, *Hist. of Jews*, i. 325), and he was able only to gather a small force to meet the sudden danger. Of this a large part deserted him on the eve of the battle; but the courage of Judas was unshaken, and he fell at Eleasa, the Jewish Thermopylae, fighting at desperate odds against the invaders. His body was recovered by his brothers, and buried at Modin "in the sepulchre of his fathers" (B.C. 161).[d]

3. After the death of Judas the patriotic party seems to have been for a short time wholly disorganised, and it was only by the pressure of unparalleled sufferings that they were driven to renew the conflict. For this purpose they offered the command to JONATHAN, surnamed Apphus (אַפּוּס, *the wary*), the youngest son of Mattathias.

The policy of Jonathan shows the greatness of the loss involved in his brother's death. He made no attempt to maintain himself in the open country, but retired to the lowlands of the Jordan (1 Macc. ix. 42), where he gained some advantage over Bacchides (B.C. 161), who made an attempt to hem in and destroy his whole force. Not long afterwards Alcimus died (B.C. 160), and Bacchides losing, as it appears, the active support of the Grecizing party, retired from Palestine. Meanwhile Jonathan made such use of the interval of rest as to excite the fears of his Jewish enemies; and after two years Bacchides, at their request, again took the field against Jonathan (B.C. 158). This time he seems to have been but feebly supported, and after an unsuccessful campaign he accepted terms which Jonathan proposed; and after his departure Jonathan "judged the people at Michmash" (1 Macc. ix. 73), and gradually extended his power. The claim of Alexander Balas to the Syrian crown gave a new importance to Jonathan and his adherents. Demetrius I. empowered him to raise an army, a permission which was followed by the evacuation of all the outposts occupied by the Syrians except Bethsura, but Jonathan espoused the cause of Alexander, and refused the liberal offers which Demetrius made, when he heard that the Jews had resolved to join his rival (B.C. 153). The success of Alexander led to the elevation of Jonathan, who assumed the high-priestly office after the royal nomination[e] at the feast of tabernacles (1 Macc. x. 21), "the greatest and holiest feast" (Joseph. *Ant.* viii. 4, §1); and not long after he placed the king under fresh obligations by the defeat of Apollonius, a general of the younger Demetrius (1 Macc. x.). [APOLLONIUS.] On the death of Alexander, Demetrius II., in spite of the reverse which he had experienced, sought to gain the support of the Jews (B.C. 145); but after receiving important assistance from them he failed to fulfil his promises, and on the appearance of Antiochus VI., Jonathan attached himself to his party, and though he fell into a position of great peril gained an important victory over the generals of Demetrius. He then strengthened his position by alliances with Rome and "the Lacedaemonians [SPARTANS], and gained several additional successes in the field (B.C. 144); but at last fell a victim to the treachery of Tryphon (B.C. 144) who feared that he would prove an obstacle to the design which he had formed of usurping the crown after the murder of the young Antiochus (1 Macc. xi. 8-xii. 4).

4. As soon as SIMON, the last remaining brother of the Maccabaean family, heard of the detention of Jonathan in Ptolemais by Tryphon he placed himself at the head of the patriot party, who were already beginning to despond, and effectually opposed the progress of the Syrians. His skill in war had been proved in the lifetime of Judas (1 Macc. v. 17-23), and he had taken an active share in the campaigns of Jonathan, when he was intrusted with a distinct command (1 Macc. xi. 59). He was soon enabled to consummate the object for which his family had fought gloriously, but in vain. Tryphon, after carrying Jonathan about as a prisoner for some little time, put him to death, and then, having murdered Antiochus, seized the throne. On this Simon made overtures to Demetrius II. (B.C. 143), which were favourably received, and the independence of the Jews was at length formally recognised. The long struggle was now triumphantly ended, and it remained only to reap the fruits of victory. This Simon hastened to do. In the next year he reduced "the tower" at Jerusalem, which up to this time had always been occupied by the Syrian faction; and during the remainder of his command extended and confirmed the power of his countrymen on all sides, in spite of the hostility of Antiochus Sidetes, who after a time abandoned the policy of Demetrius. [CENDEBAEUS.] The prudence and wisdom for which he was already distinguished at the time of his father's death (1 Macc. ii. 65), gained for the Jews the active support of Rome (1 Macc. xv. 16-21), in addition to the confirmation of earlier treaties. After settling the external relations of the new state upon a sure basis, Simon regulated its internal administration. He encouraged trade and agriculture, and secured all the blessings of peace (1 Macc. xiv. 4-15). But in the midst of successes abroad and prosperity at home, he fell a victim to domestic treachery. Ptolemaeus, the governor of Jericho, his son-in-law, aspired to usurp the supreme power, and having invited Simon and two of his sons to a banquet in his castle at Dŏk, he murdered them there B.C. 135 (1 Macc. xvi. 11-16).

5. The treason of Ptolemaeus failed in its object. JOHANNES HYRCANUS, one of the sons of Simon, escaped from the plot by which his life was threatened, and at once assumed the government (B.C. 135). At first he was hard pressed by Antiochus Sidetes, and only able to preserve Jeru-

[d] Judas (like Mattathias) is represented in later times as high-priest. Even Josephus (*Ant.* xii. 11, §2) speaks of the high-priesthood of Judas, and also says that he was elected by "the people" on the death of Alcimus (xii. 10, §6). But it is evident from 1 Macc. ix. 18, 56, that Judas died some time before Alcimus; and elsewhere (*Ant.* xx. 10, §3) Josephus himself says that the high-priesthood was vacant for seven years after the death of Alcimus, and that Jonathan was the first of the Asmonaean family who held the office.

[e] It does not appear that any direct claimant to the high-priesthood remained. Onias the younger, who inherited the claim of his father Onias, the last legitimate high-priest, had retired to Egypt.

[f] He was surnamed "Thassi" (Θασσί, Θασσίς); but the meaning of the title is uncertain. Michaelis (Grimm. on 1 Macc. ii.) thinks that it represents the Chaldee תַּרְשִׁישׁ.

salem on condition of dismantling the fortifications and submitting to a tribute, B.C. 133. The foreign and civil wars of the Seleucidæ gave him afterwards abundant opportunities to retrieve his losses. He reduced Idumæa (Joseph. *Ant.* xiii. 9, §1), confirmed the alliance with Rome, and at length succeeded in destroying Samaria, the hated rival of Jerusalem, B.C. 109. The external splendour of his government was marred by the growth of internal divisions (Jos. *Ant.* xii. 10, §5, 6); but John escaped the fate of all the older members of his family, and died in peace B.C. 106-5. His eldest son Aristobulus I., who succeeded, was the first who assumed the kingly title, though Simon had enjoyed the fulness of the kingly power.

6. Two of the first generation of the Maccabæan family still remain to be mentioned. These, though they did not attain to the leadership of their countrymen like their brothers, shared their fate—Eleazer [ELEAZER, 8] by a noble act of self-devotion, John [JOHN, 2], apparently the eldest brother, by treachery. The sacrifice of the family was complete, and probably history offers no parallel to the undaunted courage with which such a band dared to face death, one by one, in the maintenance of a holy cause. The result was worthy of the sacrifice. The Maccabees inspired a subject-people with independence; they found a few personal followers, and they left a nation.

7. The great outlines of the Maccabæan contest, which are somewhat hidden in the annals thus briefly epitomised, admit of being traced with fair distinctness, though many points must always remain obscure from our ignorance of the numbers and distribution of the Jewish population, and of the general condition of the people at the time. The disputed succession to the Syrian throne (B.C. 153) was the political turning point of the struggle, which may thus be divided into two great periods. During the first period (B.C. 168-153) the patriots maintained their cause with varying success against the whole strength of Syria: during the second (B.C. 153-139), they were courted by rival factions, and their independence was acknowledged from time to time, though pledges given in times of danger were often broken when the danger was over. The paramount importance of Jerusalem is conspicuous throughout the whole war. The loss of the Holy City reduced the patriotic party at once to the condition of mere guerilla bands, issuing from "the mountains" or "the wilderness," to make sudden forays on the neighbouring towns. This was the first aspect of the war (2 Macc. viii. 1-7; comp. 1 Macc. ii. 45); and the scene of the early exploits of Judas was the hill-country to the N.E. of Jerusalem, from which he drove the invading armies at the famous battle-fields of BETH-HORON and EMMAUS (Nicopolis). The occupation of Jerusalem closed the first act of the war (B.C. 165); and after this Judas made rapid attacks on every side—in Idumæa, Ammon, Gilead, Galilee—but he made no permanent settlement in the countries which he invaded. Bethsura was fortified as a defence of Jerusalem on the S.; but the authority of Judas seems to have been limited to the immediate neighbourhood of Jerusalem, though the influence of his name extended more widely (1 Macc. vii. 50, ἡ γῆ Ἰούδα). On the death of Judas the patriots were reduced to as great distress as at their first rising: and as Bacchides had the keys of the "mountains of Ephraim" (ix. 50) they were forced to find a refuge in the lowlands near Jericho, and after some slight successes Jonathan was allowed to settle at Michmash undisturbed, though the whole country remained absolutely under the sovereignty of Syria. So far it seemed that little had been gained when the contest between Alexander Balas and Demetrius I. opened a new period (B.C. 153). Jonathan was empowered to raise troops: the Jewish hostages were restored; many of the fortresses were abandoned; and apparently a definite district was assigned to the government of the high-priest. The former unfruitful conflicts at length produced their full harvest. The defeat at Eleasa, like the Swiss St. Jacob, had shown the worth of men who could face all odds, and no price seemed too great to secure their aid. When the Jewish leaders had once obtained legitimate power they proved able to maintain it, though their general success was chequered by some reverses. The solid power of the national party was seen by the slight effect which was produced by the treacherous murder of Jonathan. Simon was able at once to occupy his place, and carry out his plans. The Syrian garrison was withdrawn from Jerusalem; Joppa was occupied as a sea-port; and "four governments" (τέσσαρες νομοί, xi. 57, xiii. 37)—probably the central parts of the old kingdom of Judah, with three districts taken from Samaria (x. 38, 39)—were subjected to the sovereign authority of the high-priest.

8. The war, thus brought to a noble issue, if less famous is not less glorious than any of those in which a few brave men have successfully maintained the cause of freedom or religion against overpowering might. The answer of Judas to those who counselled retreat (1 Macc. ix. 10) was as true-hearted as that of Leonidas; and the exploits of his followers will bear favourable comparison with those of the Swiss, or the Dutch, or the Americans. It would be easy to point out parallels in Maccabæan history to the noblest traits of patriots and martyrs in other countries; but it may be enough here to claim for the contest the attention which it rarely receives. It seems, indeed, as if the indifference of classical writers were perpetuated in our own days, though there is no struggle—not even the wars of Joshua or David—which is more profoundly interesting to the Christian student. For it is not only in their victory over external difficulties that the heroism of the Maccabees is conspicuous: their real success was as much imperilled by internal divisions as by foreign force. They had to contend on the one hand against open and subtle attempts to introduce Greek customs, and on the other against an extreme Pharisaic party, which is seen from time to time opposing their counsels (1 Macc. vii. 12-18; comp. §2, end). And it was from Judas and those whom he inspired that the old faith received its last development and final impress before the coming of our Lord.

9. For that view of the Maccabæan war which regards it only as a civil and not as a religious conflict, is essentially one-sided. If there were no other evidence than the book of Daniel—whatever opinion be held as to the date of it—that alone would show how deeply the noblest hopes of the theocracy were centred in the success of the struggle. When the feelings of the nation were thus again turned with fresh power to their ancient faith, we might expect that there would be a new creative epoch in the national literature; or, if the form of Hebrew composition was already fixed by sacred

types, a prophet or psalmist would express the thoughts of the new age after the models of old time. Yet in part at least the leaders of Maccabaean times felt that they were separated by a real chasm from the times of the kingdom or of the exile. If they looked for a prophet in the future, they acknowledged that the spirit of prophecy was not among them. The volume of the prophetic writings was completed, and, as far as appears, no one ventured to imitate its contents. But the Hagiographa, though they were already long fixed as a definite collection [CANON], were not equally far removed from imitation. The apocalyptic visions of Daniel [DANIEL, §1] served as a pattern for the visions incorporated in the book of Enoch [ENOCH, BOOK OF]; and it has been commonly supposed that the Psalter contains compositions of the Maccabaean date. This supposition, which is at variance with the best evidence which can be obtained on the history of the Canon can only be received upon the clearest internal[g] proof; and it may well be questioned whether the hypothesis is not as much a variance with sound interpretation as with the history of the Canon. The extreme forms of the hypothesis, as that of Hitzig, who represents Ps. 1, 2, 44, 60, and all the last three books of the Psalms (Ps. 73-150) as Maccabaean (Grimm, 1 *Macc. Einl.* §9, 3), or of Just. Olshausen (quoted by Ewald, *Jahrb.* 1853, pp. 250 ff.), who is inclined to bring the whole Psalter with very few exceptions to that date, need only be mentioned as indicating the kind of conjecture which finds currency on such a subject. The real controversy is confined to a much narrower field; and the psalms which have been referred with the greatest show of reason to the Maccabaean age are Ps. 44, 60, 74, 79, 80, 83. It has been argued that all these speak of the dangers to which the house and people of God were exposed from heathen enemies, at a period later than the captivity; and the one ground for referring them to the time of the Maccabees is the general coincidence which they present with some features of the Greek oppression. But if it be admitted that the psalms in question are of a later date than the captivity, it by no means follows that they are Maccabaean. On the contrary they do not contain the slightest trace of those internal divisions of the people which were the most marked features of the Maccabaean struggle. The dangers then were as much from within as from without; and party jealousies brought the divine cause to the greatest peril (Ewald, *Psalmen*, 355). It is incredible that a series of Maccabaean psalms should contain no allusion to a system of enforced idolatry, or to a temporising priesthood, or to a faithless multitude. And while the obscurity which hangs over the history of the Persian supremacy from the time of Nehemiah to the invasion of Alexander, makes it impossible to fix with any precision a date to which the psalms can be referred, the one glimpse which is given of the state of Jerusalem in the interval (Joseph. *Ant.* xi. 7) is such as to show that they may well have found some sufficient occasion in the wars and disorders which attended the decline of the Persian power (comp. Ewald). It may, however, be doubted whether the arguments for a post-Babylonian date are conclusive. There is nothing in the psalms themselves which may not apply to the circumstances which attended the overthrow of the kingdom; and it seems incredible that the desolation of the Temple should have given occasion to no hymns of pious[h] sorrow.

10. The collection of the so-called *Psalms of Solomon* furnishes a strong confirmation of the belief that all the canonical Psalms are earlier than the Maccabaean era. This collection, which bears the clearest traces of unity of authorship, is, almost beyond question, a true Maccabaean work. There is every reason to believe (Ewald, *Geschichte*, iv. 343) that the book was originally composed in Hebrew; and it presents exactly those characteristics which are wanting in the other (conjectural) Maccabaean Psalms. "The holy ones" (*οἱ ὅσιοι*, חסידים [ASSIDAEANS]; *οἱ φοβούμενοι τὸν κύριον*) appear throughout as a distinct class, struggling against hypocrites and men-pleasers, who make the observance of the law subservient to their own interests (Ps. Sol. iv., xiii.–xv.). The sanctuary is polluted by the abominations of professing servants of God before it is polluted by the heathen (Ps. Sol. i. 8, ii. 1 ff., viii. 8 ff., xvii. 15 ff.). National unfaithfulness is the cause of national punishment; and the end of trial is the "justification" of God (Ps. Sol. ii. 16, iii. 3, iv. 9, viii. 7 ff., ix.). On the other hand there is a holiness of works set up in some passages which violates the divine mean of Scripture (Ps. Sol. i. 2, 3, iii. 9); and, while the language is full of echoes of the Old Testament, it is impossible not to *feel* that it wants something which we find in *all* the canonical writings. The historical allusions in the Psalms of Solomon are as unequivocal as the description which they give of the state of the Jewish nation. An enemy "threw down the strong walls" of Jerusalem, and "Gentiles went up to the altar" (Ps. Sol. ii. 1-3; comp. 1 Macc. i. 31). In his pride "he wrought all things in Jerusalem, as the Gentiles in their cities do for their gods" (Ps. Sol. xvii. 16). "Those who loved the assemblies of the saints (*συναγωγὰς ὁσίων*), wandered (lege *ἐπλανῶντο*) in deserts" (Ps. Sol. xvii. 19; comp. 1 Macc. i. 54, ii. 28); and there "was no one in the midst of Jerusalem who did mercy and truth" (Ps. Sol. xvii. 17; comp. 1 Macc. i. 38). One Psalm (viii.) appears to refer to a somewhat later period. The people wrought wickedly, and God sent upon them a spirit of error. He brought one "from the extremity of the earth" (viii. 16; comp. 1 Macc. vii. 1,—"Demetrius from Rome"). "The princes of the land met him with joy" (1 Macc. vii. 5-8); and he entered the land in safety (1 Macc. vii. 9-12,—Bacchides his general), "as a father in peace" (1 Macc. vii. 15). Then "he slew the princes and every one wise in counsel" (1 Macc. vii. 16), and "poured out the blood of those who dwelt in Jerusalem" (1 Macc. vii. 17).[i] The pur-

[g] The historical argument for the completion of the present collection of the Psalms before the compilation of Chronicles is very well given by Ewald (*Jahrb.* 1853, 4, pp. 30-32) In 1 Chr. xvi. 7-36 passages occur which are derived from Ps. cv., cvi., xcvi., of which the first two are among the latest hymns in the Psalter.

[h] It must, however, be noticed that the formula of quotation prefixed to the words from Ps. lxxix. in 1 Macc. vii. 17 is not that in which Scripture is quoted in later books, as is commonly said. It is not *ὡς γέγραπται*, or *κατὰ τὸ γεγραμμένον*, but *κατὰ τὸν λόγον ὃν ἔγραψε*, which is variously altered by different authorities.

[i] The prominence given to the slaughter of the Assideans both in 1 Macc. and in the psalm, and the share which the Jews had directly in the second pollution of Jerusalem, seem to fix the events of the psalm to the time of Demetrius; but the close similarity (with this exception) between the invasions of Apollonius and Bacchides may leave some doubt as to the identification. (Compare 1 Macc. i. 29-38, with Ps. Sol. viii. 16-24.)

part of these evils, as a retributive and purifying judgment, leads to the most remarkable feature of the Psalms, the distinct expression of Messianic hopes. In this respect they offer a direct contrast to the books of Maccabees (1 Macc. xiv. 41). The sorrow and the triumph are seen together in their spiritual aspect, and the expectation of "an anointed Lord" (*χριστὸς Κύριος*, Ps. Sol. xvii. 36 (xviii. 8); comp. Luke ii. 11) follows directly after the description of the impious assaults of Gentile enemies (Ps. Sol. xvii.; comp. Dan. xi. 45, xii.). "Blessed," it is said, "are they who are born in those days, to see the good things which the Lord shall do for the generation to come. [When men are brought] beneath the rod of correction of an anointed Lord (*or* the Lord's anointed, *ὑπὸ ῥάβδον παιδείας χριστοῦ Κυρίου*) in the fear of his God, in wisdom of spirit and of righteousness and of might" . . . then there shall be a "good generation in the fear of God, in the days of mercy" (Ps. Sol. xviii. 6-10).

11. Elsewhere there is little which marks the distinguishing religious character of the era. The notice of the Maccabaean heroes in the book of Daniel is much more general and brief than the corresponding notice of their great adversary; but it is not on that account less important as illustrating the relation of the famous chapter to the simple history of the period which it embraces. Nowhere is it more evident that facts are shadowed forth by the prophet only in their typical bearing on the development of God's kingdom. In this aspect the passage itself (Dan. xi. 29-35) will supersede in a great measure the necessity of a detailed comment. "*At the time appointed* [in the spring of 168 B.C.] *he* [Antiochus Epiph.] *shall return and come toward the south* [Egypt]; *but it shall not be as the first time, so also the last time* [though his first attempts shall be successful, in the end he shall fail]. *For the ships of Chittim* [the Romans] *shall come against him, and he shall be cast down, and return, and be very wroth against the holy covenant; and he shall do* [his will]; *yea he shall return, and have intelligence with them that forsake the holy covenant* (comp. Dan. viii. 24, 25). *And forces from him* [at his bidding] *shall stand* [remain in Judaea as garrisons; comp. 1 Macc. i. 33, 34]; *and they shall pollute the sanctuary, the stronghold, and shall take away the daily* [sacrifice]; *and they shall set up the abomination that maketh desolate* [1 Macc. i. 45-47]. *And such as do wickedly against* (or rather *such as condemn*) *the covenant shall he corrupt* [to apostasy] *by smooth words; but the people that know their God shall be strong and do* [exploits]. *And they that understand* [know God and His law] *among the people, shall instruct many: yet they shall fall by the sword and by flame, by captivity and by spoil* [some] *days* (1 Macc. i. 60-64). *Now when they shall fall, they shall be holpen with a little help* (1 Macc. i. 28; 2 Macc. v. 27, Judas Macc. with nine others); *and many shall cleave to them* [the faithful followers of the law] *with hypocrisy* [dreading the prowess of Judas: 1 Macc. ii. 46, and yet ready to fall away at the first opportunity, 1 Macc. vii. 6]. *And some of them of understanding shall fall, to make trial among them, and to purge and to make them white, even to the time of the end; because* [the end is] *yet for a time appointed.*" From this point the prophet describes in detail the godlessness of the great oppressor (ver. 36-39), and then his last fortunes and death (ver. 40-45), but says nothing of the triumph of the Maccabees or of the restoration of the Temple, which preceded the last event by some months. This omission is scarcely intelligible unless we regard the facts as symbolising a higher struggle—a truth wrongly held by those who from early times referred verses 36-45 only to Antichrist, the antitype of Antiochus—in which that recovery of the earthly temple had no place. And at any rate it shows the imperfection of that view of the whole chapter by which it is regarded as a mere transcription of history.

12. The history of the Maccabees does not contain much which illustrates in detail the religious or social progress of the Jews. It is obvious that the period must not only have intensified old beliefs but also have called out elements which were latent in them. One doctrine at least, that of a resurrection, and even of a material resurrection (2 Macc. xiv. 46), was brought out into the most distinct apprehension by suffering. "It is good to look for the hope from God, to be raised up again by Him" (*πάλιν ἀναστήσεσθαι ὑπ' αὐτοῦ*), was the substance of the martyr's answer to his judge; "as for thee, thou shalt have no resurrection to life" (*ἀνάστασις εἰς ζωήν*, 2 Macc. vii. 14; comp. vi. 26, xiv. 46). "Our brethren," says another, "have fallen, having endured a short pain leading to everlasting life, being under the covenant of God" (2 Macc. vii. 36, *πόνον ἀενάου ζωῆς*). And as it was believed that an interval elapsed between death and judgment, the dead were supposed to be in some measure still capable of profiting by the intercession of the living. Thus much is certainly expressed in the famous passage, 2 Macc. xii. 43-45 though the secondary notion of a purgatorial state is in no way implied in it. On the other hand it is not very clear how far the future judgment was supposed to extend. If the punishment of the wicked heathen in another life had formed a definite article of belief, it might have been expected to be put forward more prominently (2 Macc. vii. 17, 19, 35, &c.), though the passages in question may be understood of sufferings after death, and not only of earthly sufferings; but for the apostate Jews there was a certain judgment in reserve (vi. 26). The firm faith in the righteous providence of God shown in the chastening of His people, as contrasted with His neglect of other nations, is another proof of the widening view of the spiritual world, which is characteristic of the epoch (2 Macc. iv. 16, 17, v. 17-20, vi. 12-16, &c.). The lessons of the captivity were reduced to moral teaching; and in the same way the doctrine of the ministry of angels assumed an importance which is without parallel except in patriarchal times [2 MACCABEES]. It was perhaps from this cause also that the Messianic hope was limited in its range. The vivid perception of spiritual truths hindered the spread of a hope which had been cherished in a material form; and a pause, as it were, was made, in which men gained new points of sight from which to contemplate the old promises.

13. The various glimpses of national life which can be gained during the period, show on the whole a steady adherence to the Mosaic law. Probably the law was never more rigorously fulfilled. The importance of the Antiochian persecution in fixing the Canon of the Old Testament has been already noticed. [CANON, vol. i. 251.] The books of the law were specially sought out for destruction (1 Macc. i. 56, 57, iii. 48); and their distinctive value was in consequence proportionately increased To use the words of 1 Macc., "the holy books'

(τὰ βιβλία τὰ ἅγια τὰ ἐν χερσὶν ἡμῶν) were felt to make all other comfort superfluous (1 Macc. xii. 9). The strict observance of the sabbath (1 Macc. ii. 32; 2 Macc. vi. 11, viii. 26, &c.) and of the Sabbatical year (1 Macc. vi. 53), the law of the Nazarites (1 Macc. iii. 49), and the exemptions from military service (1 Macc. iii. 56), the solemn prayer and fasting (1 Macc. iii. 47; 2 Macc. x. 25, &c.), carry us back to early times. The provision for the maimed, the aged, and the bereaved (2 Macc. viii. 28, 30), was in the spirit of the law; and the new feast of the dedication was a homage to the old rites (2 Macc. i. 9) while it was a proof of independent life. The interruption of the succession to the high-priesthood was the most important innovation which was made, and one which prepared the way for the dissolution of the state. After various arbitrary changes the office was left vacant for seven years upon the death of Alcimus. The last descendant of Jozadak (Onias), in whose family it had been for nearly four centuries, fled to Egypt, and established a schismatic worship; and at last, when the support of the Jews became important, the Maccabaean leader, Jonathan, of the family of Joarib, was elected to the dignity by the nomination of the Syrian king (1 Macc. x. 20), whose will was confirmed, as it appears, by the voice of the people (comp. 1 Macc. xiv. 35).

14. Little can be said of the condition of literature and the arts which has not been already anticipated. In common intercourse the Jews used the Aramaic dialect which was established after the return: this was "their own language" (2 Macc. vii. 8, 21, 27, xii. 37); but it is evident from the narrative quoted that they understood Greek, which must have spread widely through the influence of Syrian officers. There is not, however, the slightest evidence that Greek was employed in Palestinian literature till a much later date. The description of the monument which was erected by Simon at Modin in memory of his family (1 Macc. xiii. 27-30), is the only record of the architecture of the time. The description is obscure, but in some features the structure appears to have presented a resemblance to the tombs of Porsena and the Curiatii (Plin. *H. N.* xxxvi. 13), and perhaps to one still found in Idumaea. An oblong basement, of which the two chief faces were built of polished white marble (Joseph. *Ant.* xiii. 6, §5), supported "seven pyramids in a line ranged one against another," equal in number to the members of the Maccabaean family, including Simon himself. To these he added "other works of art (μηχανήματα), placing round (on the two chief faces?) great columns, (Josephus adds, each of a single block), bearing trophies of arms, and sculptured ships, which might be visible from the sea below." The language of 1 Macc. and Josephus implies that these columns were placed upon the basement, otherwise it might be supposed that the columns rose only to the height of the basement supporting the trophies on the same level as the pyramids. So much at least is evident, that the characteristics of this work—and probably of later Jewish architecture generally—bore closer affinity to the styles of Asia Minor and Greece than of Egypt or the East, a result which would follow equally from the Syriar dominion and the commerce which Simon opened by the Mediterranean (1 Macc. xiv. 5).

15. The only recognised relics of the time are the coins which bear the name of "Simon," or "Simon Prince (*Nasi*) of Israel" in Samaritan letters. The privilege of a national coinage was granted to Simon by Antiochus VII. Sidetes (1 Macc. xv. 6, κόμμα δίδιον νόμισμα τῇ χώρᾳ); and numerous examples occur which have the dates of the first, second, third, and fourth years of the liberation of Jerusalem (Israel, Zion); and it is a remarkable confirmation of their genuineness, that in the first year the name Zion does not occur, as the citadel was not recovered till the second year of Simon's supremacy, while after the second year Zion alone is found (Bayer, *de Nummis*, 171). The privilege was first definitely accorded to Simon in B.C. 140, while the first year of Simon was B.C. 143 (1 Macc. xiii. 42); but this discrepancy causes little difficulty, as it is not unlikely that the concession of Antiochus was made in favour of a practice already existing. No date is given later than the fourth year, but coins of Simon occur without a date, which may belong to the four last years of his life. The emblems which the coins bear have generally a connexion with Jewish history—a vine-leaf, a cluster of grapes, a vase (of manna?), a trifid flowering rod, a palm branch surrounded by a wreath of laurel, a lyre (1 Macc. xiii. 51), a bundle of branches symbolic of the feast of tabernacles. The coins issued in the last war of independence by Bar-cochba, repeat many of these emblems, and there is considerable difficulty in distinguishing the two series. The authenticity of all the Maccabaean coins was impugned by Tychsen (*Die Unächtheit d. Jud. Münzen . . . bewiesen* . . . O. G. Tychsen, 1779), but on insufficient grounds. He was answered by Bayer, whose admirable essays (*De Nummis Hebr. Samaritanis*, Val. Ed. 1781; *Vindiciae* . . . 1790), give the most complete account of the coins, though he reckons some apparently later types as Maccabaean. Eckhel (*Doctr. Numm.* iii. p. 455 ff.) has given a good account of the controversy, and an accurate description of the chief types of the coins. Comp. De Saulcy, *Numism. Judaique*; Ewald, *Gesch.* vii. 366, 476. [MONEY.]

The authorities for the Maccabaean history have been given already. Of modern works, that of Ewald is by far the best. Herzfeld has collected a mass of details, chiefly from late sources, which are interesting and sometimes valuable; but the student of the period cannot but feel how difficult it is to realise it as a whole. Indeed, it seems that the instinct was true which named it from one chief hero. In this last stage of the history of Israel, as in the first, all life came from the leader; and it is the greatest glory of the Maccabees that while they found at first all turn upon their personal fortunes they left a nation strong enough to preserve an independent faith till the typical kingdom gave place to a universal Church. [B. F. W.]

MACCABEES, BOOKS OF (Μακκαβαίων α', β', &c.

Four books which bear the common title of "Maccabees," are found in some MSS. of the LXX. Two of these were included in the early current Latin versions of the Bible, and thence passed into the Vulgate. As forming part of the Vulgate they were received as canonical by the council of Trent, and retained among the *apocrypha* by the reformed churches. The two other books obtained no such wide circulation, and have only a secondary connexion with the Maccabaean history. But all the books, though they differ most widely in character and date and worth, possess points of interest which make them a fruitful field for study. If the historic order and

observed, the so-called *third* book would come first, the *fourth* would be an appendix to the *second*, which would retain its place, and the *first* would come last; but it will be more convenient to examine the books in the order in which they are found in the MSS., which was probably decided by some vague tradition of their relative antiquity.

The controversy as to the mutual relations and historic worth of the first two books of Maccabees has given rise to much very ingenious and partial criticism. The subject was very nearly exhausted by a series of essays published in the last century, which contain in the midst of much unfair reasoning the substance of what has been written since. The discussion was occasioned by E. Frölich's *Annals of Syria* (*Annales Syriae nummi veteribus illustrati*. Vindob. 1744). In this great work the author—a Jesuit—had claimed paramount authority for the books of Maccabees. This claim was denied by E. F. Wernsdorf in his *Prolusio de fontibus historiae Syriae in Libris Macc.* (Lips. 1746). Frölich replied to this essay in another. *De fontibus hist. Syriae in Libris Macc. prolusio in examen vocata* (Vindob. 1746); and then the argument fell into other hands. Wernsdorf's brother (Gli. Wernsdorf) undertook to support his cause, which he did in a *Commentatio historico-critica de fide librorum Macc.* (Wratisl. 1747); and nothing has been written on the same side which can be compared with his work. By the vigour and freedom of his style, by his surprising erudition and unwavering confidence—almost worthy of Bentley—he carries his reader often beyond the bounds of true criticism, and it is only after reflection that the littleness and sophistry of many of his arguments are apparent. But in spite of the injustice and arrogance of the book, it contains very much which is of the greatest value, and no abstract can give an adequate notion of its power. The reply to Wernsdorf was published anonymously by another Jesuit:—*Auctoritas utriusque Libri Macc. canonico-historica asserta a quodam Soc. Jesu sacerdote* (Vindob. 1749). The authorship of this was fixed upon J. Khell (Welte, *Einl.* p. 23 *note*); and while in many points Khell is unequal to his adversary, his book contains some very useful collections for the history of the canon. In more recent times, F. X. Patritius (another Jesuit) has made a fresh attempt to establish the complete harmony of the books, and, on the whole, his essay (*De Consensu utriusque Libri Macc.* Romae, 1856), though far from satisfactory, is the most able defence of the books which has been published.

I. THE FIRST BOOK OF MACCABEES.—1. The first book of Maccabees contains a history of the patriotic struggle, from the first resistance of Mattathias to the settled sovereignty and death of Simon, a period of thirty-three years (B.C. 168-135). The opening chapter gives a short summary of the conquests of Alexander the Great as laying the foundations of the Greek empire in the East, and describes at greater length the oppression of Antiochus Epiphanes, culminating in his desperate attempt to extirpate Judaism. The great subject of the book begins with the enumeration of the Maccabean family (ii. 1-5), which is followed by an account of the part which the aged Mattathias took in rousing and guiding the spirit of his countrymen (v. 6-70). The remainder of the narrative is occupied with the exploits of his five sons, three of whom in succession carried on with varying fortune the work which he began, till it reached its triumphant issue. Each of the three divisions, into which the main portion of the book thus naturally falls, is stamped with an individual character derived from its special hero. First Judas, by a series of brilliant successes, and scarcely less noble reverses, fully roused his countrymen to their work, and then fell at a Jewish Thermopylae (iii. 1–ix. 22, B.C. 167-161). Next Jonathan confirmed by policy the advantages which his brother had gained by chivalrous daring, and fell not in open field, but by the treachery of a usurper (ix. 23–xii. 53; B.C. 161-143). Last of all Simon, by wisdom and vigour, gave shape and order to the new state, and was formally installed in the princely office. He also fell, but by domestic and not by foreign treason; and his son succeeded to his power (xiii.–xvi. B.C. 143-135). The history, in this aspect, presents a kind of epic unity. The passing allusion to the achievements of after times (xvi. 23, 24) relieves the impression caused by the murder of Simon. But at his death the victory was already won: the life of Judaism had mastered the tyranny of Greece.

2. While the grandeur and unity of the subject invests the book with almost an epic beauty, it never loses the character of history. The earlier part of the narrative, including the exploits of Judas, is cast in a more poetic mould than any other part, except the brief eulogy of Simon (xiv. 4-15); but when the style is most poetical (i. 37-40, ii. 7-13, 49-68, iii. 3-9, 18-22, iv. 8-11, 30-33, 38, vi. 10-13, vii. 37, 38, 41, 42)—and this poetical form is chiefly observable in the speeches—it seems to be true in spirit. The great marks of trustworthiness are everywhere conspicuous. Victory and failure and despondency are, on the whole, chronicled with the same candour. There is no attempt to bring into open display the working of providence. In speaking of Antiochus Epiphanes (i. 10 ff.) the writer betrays no unjust violence, while he marks in one expressive phrase (i. 10, *ῥίζα ἁμαρτωλός*) the character of the Syrian type of antichrist (cf. Is. xi. 10; Dan. xi. 36); and if no mention is made of the reckless profligacy of Alexander Balas, it must be remembered that his relations to the Jews were honourable and liberal, and these alone fall within the scope of the history. So far as the circumstances admit, the general accuracy of the book is established by the evidence of other authorities; but for a considerable period it is the single source of our information. And, indeed, it has little need of external testimony to its worth. Its whole character bears adequate witness to its essential truthfulness; and Luther—no servile judge—expressed himself as not disinclined, on internal grounds, to see it "reckoned among the books of Holy Scripture" ("Diess Buch fast eine gleiche Weise hält mit Reden und Worten wie andere heilige Bücher und nicht unwürdig gewest wäre, hineinzurechnen, weil es ein sehr nöthig und nützlich Buch ist zu verstehen den Propheten Daniel im 11 Kapitel." *Werke*, von Walch, xiv. 94, ap. Grimm, p. xxii.).

3. There are, however, some points in which the writer appears to have been imperfectly informed, especially in the history of foreign nations; and some, again, in which he has been supposed to have magnified the difficulties and successes of his countrymen. Of the former class of objections two, which turn upon the description given of the foundation of the Greek kingdoms of the East

(1 Macc i. 5-9), and of the power of Rome (viii. 1-16), deserve notice from their intrinsic interest. After giving a rapid summary of the exploits of Alexander—the reading and interpretation of ver. 1 are too uncertain to allow of objections based upon the common text—the writer states that the king, conscious of approaching death "divided his kingdom among his servants who had been brought up with him from his youth" (1 Macc. i. 6, *διείλεν αὐτοῖς τὴν βασιλείαν αὐτοῦ, ἔτι ζῶντος αὐτοῦ*) "and after his death they all put on crowns. Various rumours, it is known (Curt. x. 10), prevailed about a will of Alexander, which decided the distribution of the provinces of his kingdom, but this narrative is evidently a different and independent tradition. It may rest upon some former indication of the king's wishes, but in the absence of all corroborative evidence it can scarcely be accepted as a historic fact (Patritius, *De Cons. Macc.* pref. viii.), though it is a remarkable proof of the desire which men felt to attribute the constitution of the Greek power to the immediate counsels of its great founder. In this instance the author has probably accepted without inquiry the opinion of his countrymen; in the other it is distinctly said that the account of the greatness of Rome was brought to Judas by common report (1 Macc. viii. 1, 2, *ἤκουσεν διηγήσαντο*). The statements made give a lively impression of the popular estimate of the conquerors of the west, whose character and victories are described chiefly with open or covert allusion to the Greek powers. The subjugation of the Galatians, who were the terror of the neighbouring people (Liv. xxxviii. 37), and the conquest of Spain, the Tarshish (comp. ver. 3) of Phoenician merchants, are noticed, as would be natural from the immediate interest of the events; but the wars with Carthage are wholly omitted (Josephus adds these in his narrative, *Ant.* xii. 10, §6). The errors in detail—as the capture of Antiochus the Great by the Romans (ver. 7), the numbers of his armament (ver. 6), the constitution of the Roman senate (ver. 15), the *one* supreme yearly officer at Rome (ver. 16; comp. xv. 16)—are only such as might be expected in oral accounts; and the endurance (ver. 4, *μακροθυμία*), the good faith (ver. 112), and the simplicity of the republic (ver. 14, *οὐκ ἐπέθετο οὐδεὶς αὐτῶν διάδημα καὶ οὐ περιεβάλοντο πορφύραν ὥστε ἀδρυνθῆναι ἐν αὐτῇ*, contrast i. 9), were features likely to arrest the attention of orientals. The very imperfection of the writer's knowledge—for it seems likely (ver. 11) that he remodels the rumours to suit his own time—is instructive, as affording a glimpse of the extent and manner in which fame spread the reputation of the Romans in the scene of their future conquests. Nor are the mistakes as to the condition of foreign states calculated to weaken the testimony of the book to national history. They are perfectly consistent with good faith in the narrator; and even if there are inaccuracies in recording the relative numbers of the Jewish and Syrian forces (xi. 45-47; vii. 46), these need cause little surprise, and may in some degree be due to errors of transcription.[a]

4. Much has been written as to the sources from which the narrative was derived, but there does not seem to be evidence sufficient to indicate them with any certainty. In one passage (ix. 22) the author implies that written accounts of some of the actions of Judas were in existence (*τὰ περισσὰ καταγράφη*); and the poetical character of the first section of the book, due in a great measure to the introduction of speeches, was probably borrowed from the writings on which that part was based. It appears, again, to be a reasonable conclusion from the mention of the official records of the life of Hyrcanus (xvi. 24, *ταῦτα γέγραπται ἐπὶ βιβλίῳ ἡμερῶν ἀρχιερωσύνης αὐτοῦ*), that similar records existed at least for the high-priesthood of Simon. There is nothing certainly to indicate that the writer designed to fill up any gap in the history; and the notice of the change of reckoning which attended the elevation of Simon (xiii. 42) seems to suggest the existence of some kind of public register. The constant appeal to official documents is a further proof both of the preservation of public records and of the sense entertained of their importance. Many documents are inserted in the text of the history, but even when they are described as "copies" (*ἀντίγραφα*) it is questionable whether the writer designed to give more than the substance of the originals. Some bear clear marks of authenticity (viii. 22-28, xii. 6-18), while others are open to grave difficulties and suspicion; but it is worthy of notice that the letters of the Syrian kings generally appear to be genuine (x. 18-20, 25-45, xi. 30-37, xiii. 36-40, xv. 2-9). What has been said will show the extent to which the writer may have used written authorities, but while the memory of the events was still recent it is not possible that he should have confined himself to them. If he was not himself engaged in the war of independence, he must have been familiar with those who were, and their information would supplement and connect the narratives which were already current, and which were probably confined to isolated passages in the history. But whatever were the sources of different parts of the book, and in whatever way written, oral, and personal information was combined in its structure, the writer made the materials which he used truly his own; and the minute exactness of the geographical details carries the conviction that the whole finally rests upon the evidence of eye-witnesses.

5. The language of the book does not present any striking peculiarities. Both in diction and structure it is generally simple and unaffected, with a marked and yet not harsh hebraistic character. The number of peculiar words is not very considerable, especially when compared with those in 2 Macc. Some of these are late forms, as: *ψογέω* (*ψογίζω*), xi. 5, 11; *ἐξουδένωσις*, i. 39; *ὀπλοδοτέω*, xiv. 32; *ἀσωτίαση*, iv. 57; *δειλόομαι*, iv. 8, 21, v. 4, xvi. 6; *ὄμηρα*, viii. 7, ix. 53, &c.; *ἀφαίρεμα*, xv. 5; *τελωνεῖσθαι*, xiii. 39; *ἐξοσιάζεσθαι*, x. 70; or compounds, such as *ἀποσκορπίζω* xi. 55; *ἐπισυν-ρέφω*, xiv. 44; *δειλόψυχος*, viii. 15, xvi. 5; *φονοκτονία*, i. 24. Other words are used in new or strange senses, as *ἀδρύνω*, viii. 14; *παράστασις*, xv. 32; *διαστολή*, viii. 7. Some phrases clearly express a Semitic idiom (ii. 48 *δοῦναι κέρας τῷ ἁμαρτ.* vi. 23, x. 82, xii. 23), and the influence of the LXX. is continually perceptible (*e. g.* i. 54, ii. 63, vii. 17, ix. 23, xiv. 9); but in the main (comp. §6) the hebraisms which exist are such as might have been naturalised in the Hebrew-Greek of Palestine. Josephus undoubtedly made use of the Greek text (*Ant.* xii. 5 ff.); and

[a] The relation of the history of Josephus to that of 1 Macc. is carefully discussed by Grimm, *Exeg. Handb. Einl.* §9 (5).

apart from external evidence, this might have been supposed to be the original. But,

6. The testimony of antiquity leaves no doubt but that the book was first written in Hebrew. Origen, in his famous catalogue of the books of Scripture (ap. Euseb. *H. E.* vi. 25), after enumerating the contents of the O. T. according to the Hebrew canon, adds: "But without (*i. e.* excluded from the number of) these is the Maccabaean history (τὰ Μακκαβαϊκά), which is entitled *Sarbeth Sarbanaiel*."[1] In giving the names of the books of the O. T. he had subjoined the Hebrew to the Greek title in exactly the same manner, and there can be therefore no question but that he was acquainted with a Hebrew original for the *Maccabaica*, as for the other books. The term *Maccabaica* is, however, somewhat vague, though the analogy of the other parts of the list requires that it should be limited to one book; but the statement of Jerome is quite explicit:—"The first book of Maccabees," he says, "I found in Hebrew; the second is Greek, as can be shewn in fact from its style alone" (*Prol. Gal. ad Libr. Reg.*). Admitting the evidence of these two fathers, who were alone able to speak with authority on a subject of Hebrew literature during the first four centuries, the fact of the Hebrew original of the book may be supported by several internal arguments which would be in themselves insufficient to establish it. Some of the hebraisms are such as suggest rather the immediate influence of a Hebrew text than the free adoption of a Hebrew idiom (i. 4, ἤρξατο εἰς φόβον; 16, ἡτοιμάσθη ἡ βασ.; 53, ὅτι ἔτη ἡμερῶν; 36, εἰς διάβολον πονηρόν; 56, ἐν παντὶ μηνὶ καὶ μηνί, &c.; ii. 57, i. 9, ἀναλημπόσεως; iv. 2, v. 37, μετὰ τὰ ῥήματα τοῦτα, &c.), and difficulties in the Greek text are removed by a recurrence to the words which may be supposed to have been used in the original (i. 3, ἐπὶ τοὺς κατοικοῦντας for עַל־יֹשְׁבֵי; i. 8, iv. 19, xvi. 3). A question, however, might be raised whether the book was written in Biblical Hebrew, or in the later Aramaic (Chaldee); but it seems almost certain that the writer took the canonical histories as his model; and the use of the original text of Scripture by the sacred class would preserve the Hebrew as a literary language when it had ceased to be the language of common life. But it is by no means unlikely (Grimm, *Exeg. Handb.* §4) that the Hebrew was corrupted by later idioms, as in the most recent books of the O. T. It seems almost incredible that any one should have imagined that the worthless *Megillath Antiochus*, of which Surenhusius's Latin translation is printed by Fabricius (*Cod. Pseud. V. T.* i. 1165-74), was the Hebrew original of which Origen and Jerome speak.[2] This tract, which occurs in some of the Jewish services for the Feast of Dedication (Fabricius, *l. c.*), is a perfectly unhistorical narrative of some of the incidents of the Maccabaean war, in which John the high-priest, and not Judas, plays by far the most conspicuous part. The order of events is so entirely disregarded in it that, after the death of Judas, Mattathias is represented as leading his other sons to the decisive victory which preceded the purification of the Temple.

7. The whole structure of 1 Macc. points to Palestine as the place of its composition. This fact itself is a strong proof for a Hebrew original, for there is no trace of a Greek Palestinian literature during the Hasmonaean dynasty, though the wide use of the LXX. towards the close of the period prepared the way for the apostolic writings. But though the country of the writer can be thus fixed with certainty, there is considerable doubt as to his date. At the close of the book he mentions, in general terms, the acts of Johannes Hyrcanus as written "in the chronicles of his priesthood from the time that he was made high-priest after his father" (xvi. 23, 24). From this it has been concluded that he must have written after the death of Hyrcanus, B.C. 106; and the note in xiii. 30 (ἕως τῆς ἡμέρας ταύτης), implies the lapse of a considerable time since the accession of Simon (B.C. 143). On the other hand, the omission of all mention of the close of the government of Hyrcanus, when the note of its commencement is given, may be urged as an argument for placing the book late in his long reign, but before his death. It cannot certainly have been composed long after his death; for it would have been almost impossible to write a history so full of simple faith and joyous triumph in the midst of the troubles which, early in the succeeding reign, threatened too distinctly the coming dissolution of the state. Combining these two limits, we may place the date of the original book between B.C. 120-100. The date and person of the Greek translator are wholly undetermined; but it is unlikely that such a book would remain long unknown or untranslated at Alexandria.

8. In a religious aspect the book is more remarkable negatively than positively. The historical instinct of the writer confines him to the bare recital of facts, and were it not for the words of others which he records, it might seem that the true theocratic aspect of national life had been lost. Not only does he relate no miracle, such as occur in 2 Macc., but he does not even refer the triumphant successes of the Jews to divine interposition.[4] It is a characteristic of the same kind that he passes over without any clear notice the Messianic hopes, which, as appears from the Psalms of Solomon and the Book of Enoch, were raised to the highest pitch by the successful struggle for independence. Yet he preserves faint traces of the national belief. He mentions the time from which "a prophet was not seen among them" (1 Macc. ix. 27, οὐκ ὤφθη προφήτης) as a marked epoch; and twice he anticipates the future coming of a prophet as of one who should make a direct revelation of the will of God to His people (iv. 46, μέχρι τοῦ παραγενηθῆναι προφήτην τοῦ ἀποκριθῆναι περὶ αὐτῶν), and supersede the temporary arrangements of a merely civil dynasty (xiv. 41, τοῦ εἶναι Σίμωνα ἡγούμενον καὶ ἀρχιερέα εἰς τὸν αἰῶνα ἕως τοῦ ἀνα-

[1] Σαρβανιασλ. This is undoubtedly the true reading without the β. All the explanations of the word on which I am acquainted start from the false reading Σαρβανασλ—"The rod of the renegades" (סַרְבְּנֵי־אֵל, Hengstenberg), "The sceptre of the prince of the sons of God" (שַׂר בְּנֵי־, Ewald), "The history of the princes of the sons of God" (שִׂיחַ שָׂרֵי בְנֵי); and I cannot propose any satisfactory transcription of the true reading.

[2] The book is found not only in Hebrew, but also in Chaldee (Fabricius, *Cod. Pseud. V. T.* i. 441 *note*).

[4] The passage xi. 71, 2, may seem to contradict this assertion; but though some writers, even from early times, have regarded the event as miraculous, the tone of the writer seems only to be that of one describing a noble act of successful valour.

τὴν προφήτην πιστόν). But the hope or belief occupies no prominent place in the book; and, like the book of Esther, its greatest merit is, that it is throughout inspired by the faith to which it gives no definite expression, and shows, in deed rather than in word, both the action of Providence and a sustaining trust in His power.

9. The book does not seem to have been much used in early times. It offered far less for rhetorical purposes than the second book; and the history itself lay beyond the ordinary limits of Christian study. Tertullian alludes generally to the conduct of the Maccabaean war (*adv. Jud.* 4). Clement of Alexandria speaks of "the book of the Maccabaean history" (τὸ [βιβλίον] τῶν Μακκαβαϊκῶν, *Strom.* i. § 123), as elsewhere (*Strom.* v. § 98) of "the epitome" (ἡ τῶν Μακκαβαϊκῶν ἐπιτομή). Eusebius assumes an acquaintance with the two books (*Praep. Ev.* viii. 9, ἡ δευτέρα τῶν Μακκαβαίων); and scanty notices of the first book, but more of the second, occur in later writers.

10. The books of Maccabees were not included by Jerome in his translation of the Bible. "The first book," he says, "I found in Hebrew" (*Prol. Gal. in Reg.*), but he takes no notice of the Latin version, and certainly did not revise it. The version of the two books which has been incorporated in the Romish Vulgate was consequently derived from the old Latin, current before Jerome's time. This version was obviously made from the Greek, and in the main follows it closely. Besides the common text, Sabatier has published a version of a considerable part of the first book (cap. i.–xiv. 1) from a very ancient Paris MS. (*S. Germ.* 15) (*annorum saltem nongentorum*, in 1751), which exhibits an earlier form of the text. Grimm, strangely misquoting Sabatier (*Exeg. Handb.* §10), inverts the relation of the two versions; but a comparison of the two, even for a few verses, can leave no doubt but that the St. Germain MS. represents the most ancient text, following the Greek words and idioms with a slavish fidelity (Sabatier, p. 1014, "Quemadmodum autem etiamnum inveniri possunt MSS. codices qui Psalmos ante omnem Hieronymi correctionem exhibeant, ita pariter inventus est a nobis codex, qui libri primi Machabaeorum partem continet majorem, minime quidem correctam, sed qualis olim in nonullis MSS. antiquis reperiebatur"). Mai (*Spicil. Rom.* ix. *App.* 60) has published a fragment of another Latin translation (c. ii. 49-64), which differs widely from both texts. The Syriac version given in the Polyglotts is, like the Latin, a close rendering of the Greek. From the rendering of the proper names, it has been supposed that the translator lived while the Semitic forms were still current (Grimm, *Einl.* § 10); but the arguments which have been urged to show that the Syriac was derived directly from the Hebrew original, are of no weight against the overwhelming proof of the influence of the Greek text.

11. Of the early commentators on the first two books of Maccabees, the most important are Drusius and Grotius, whose notes are reprinted in the *Critici Sacri*. The annotations of Calmet (*Commentaire literal*, &c., Paris, 1724) and Michaelis (*Uebersetzung der 1 Macc. B.'s mit Anmerk.* Leipz. 1778), are of permanent interest; but for practical use the manual of Grimm (*Kurzgefasstes Exeg. Handb. zu den Apokryphen*, &c., Leipz. 1853-7) supplies everything which the student can require.

THE SECOND BOOK OF MACCABEES.—1. The history of the Second Book of the Maccabees begins some years earlier than that of the First Book, and closes with the victory of Judas Maccabaeus over Nicanor. It thus embraces a period of twenty years, from B.C. 180 (?) to B.C. 161. For the few events noticed during the earlier years it is the chief authority; during the remainder of the time the narrative goes over the same ground as 1 Macc., but with very considerable differences. The first two chapters are taken up by two letters supposed to be addressed by the Palestinian to the Alexandrine Jews, and by a sketch of the author's plan, which proceeds without any perceptible break from the close of the second letter. The main narrative occupies the remainder of the book. This presents several natural divisions, which appear to coincide with the "five books" of Jason on which it was based. The first (c. iii.) contains the history of Heliodorus, as illustrating the fortunes of the Temple before the schism and apostasy of part of the nation (cir. B.C. 180). The second (iv.–vii.) gives varied details of the beginning and course of the great persecution—the murder of Onias, the crimes of Menelaus, the martyrdom of Eleazar, and of the mother with her seven sons (B.C. 175-167). The third (viii.–x. 9) follows the fortunes of Judas to the triumphant restoration of the Temple service (B.C. 166, 165). The fourth (x. 10–xiii.) includes the reign of Antiochus Eupator (B.C. 164-162). The fifth (xiv., xv.) records the treachery of Alcimus, the mission of Nicanor, and the crowning success of Judas (B.C. 162, 161). Each of these divisions is closed by a phrase which seems to mark the end of a definite subject (iii. 40, vii. 42, x. 9, xiii. 26, xv. 37); and they correspond in fact with distinct stages in the national struggle.

2. The relation of the letters with which the book opens to the substance of the book is extremely obscure. The first (i. 1-9) is a solemn invitation to the Egyptian Jews to celebrate "the feast of tabernacles in the month Casleu" (*i. e.* the feast of the Dedication, i. 9), as before they had sympathised with their brethren in Judaea in "the extremity of their trouble" (i. 7). The second (i. 10–ii. 18, according to the received division), which bears a formal salutation from "the council and Judas" to "Aristobulus . . . and the Jews in Egypt," is a strange, rambling collection of legendary stories of the death of "Antiochus," of the preservation of the sacred fire and its recovery by Nehemiah, of the hiding of the vessels of the sanctuary by Jeremiah, ending—if indeed the letter can be said to have any end—with the same exhortation to observe the feast of dedication (ii. 10-18). For it is impossible to point out any break in the construction or style after ver. 19, so that the writer passes insensibly from the epistolary form in ver. 16 to that of the epitomator in ver. 29 (δοκῶ). For this reason some critics, both in ancient and modern times (Wernsdorf, § 35, 123), have considered that the whole book is intended to be included in the letter.[a] It seems more natural to suppose that the author found the letters already in existence when he undertook to abridge the work of Jason, and attached his own introduction to the second letter for the convenience of transition, without considering that this would necessarily make the whole appear to be a letter. The letters themselves can lay no claims to authenticity. It is possible that

[a] The subscription in *Cod. Alex.* is Ἰούδα τοῦ Μακκαβαίου πραξέων ἐπιστολή.

they may rest upon some real correspondence between Jerusalem and Alexandria; but the extravagance of the fables which they contain makes it impossible to accept them in their present form as the work of the Jewish Council. Though it may readily be admitted that the fabulousness of the contents of a letter is no absolute proof of its spuriousness, yet on the other hand the stories may be (as in this case) so entirely unworthy of what we know of the position of the alleged writers, as to betray the work of an impostor or an interpolator. Some have supposed that the original language of one,[1] or of both the letters was Hebrew, but this cannot be made out by any conclusive arguments. On the other hand there is no ground at all for believing that they were made up by the author of the book.

3. The writer himself distinctly indicates the source of his narrative—"the five books of Jason of Cyrene" (ii. 23), of which he designed to furnish a short and agreeable epitome for the benefit of those who would be deterred from studying the larger work. [JASON.] His own labour, which he describes in strong terms (ii. 26, 7; comp. xv. 38, 39), was entirely confined to condensation and selection; all investigation of detail he declares to be the peculiar duty of the original historian. It is of course impossible to determine how far the colouring of the events is due to Jason, but "the Divine manifestations" in behalf of the Jews are enumerated among the subjects of which he treated; and no sufficient reasons have been alleged to show that the writer either followed any other authority in his later chapters, or altered the general character of the history which he epitomized. Of Jason himself nothing more is known than may be gleaned from this mention of him. It has been conjectured (Hertzfeld, *Gesch. d. Volkes Isr.* i. 455) that he was the same as the son of Eleazer (1 Macc. viii. 17), who was sent by Judas as envoy to Rome after the defeat of Nicanor; and the circumstance of this mission has been used to explain the limit to which he extended his history, as being that which coincided with the extent of his personal observation. There are certainly many details in the book which show a close and accurate knowledge (v. 21, 29 ff., viii. 1 ff., ix. 29, x. 12, 13, xiv. 1), and the errors in the order of events may be due wholly, or in part, to the epitomator. The questionable interpretation of facts in 2 Macc. is no objection to the truth of the facts themselves; and when due allowance is made for the overwrought coloring of many scenes, and for the obvious effort of the writer to discover everywhere signs of providential interference, the historic worth of the book appears to be considerably greater than it is commonly esteemed to be. Though Herzfeld's conjecture may be untenable, the original work of Jason probably extended no farther than the epitome, for the description of its contents (2 Macc. ii. 19-32) does not carry us beyond the close of 1 Macc. The "brethren" of Judas, whose exploits are related, were already distinguished during the lifetime of "the Maccabee" (1 Macc. v. 17 ff., 24 ff., v. 4-6; 2 Macc. viii. 22-29).

4. The district of Cyrene was most closely united with that of Alexandria. In both the predominance of Greek literature and the Greek language was absolute. The work of Jason—like the poems of Callimachus—must therefore have been composed in Greek; and the style of the epitome, as Jerome remarked, proves beyond doubt that the Greek text is the original (*Prol. Gal.* "Secundus [Machabaeorum] Graecus est, quod ex ipsa quoque φράσει probari potest"). It is scarcely less certain that 2 Macc. was compiled at Alexandria. The characteristics of the style and language are essentially Alexandrine; and though the Alexandrine style may have prevailed in Cyrenaica, the form of the allusion to Jason shows clearly that the compiler was not his fellow-countryman. But all attempts to determine more exactly who the compiler was are mere groundless guesses, without even the semblance of plausibility.

5. The style of the book is extremely uneven. At times it is elaborately ornate (iii. 15-39, v. 20, vi. 12-16, 23-28, vii. &c.); and again, it is so rude and broken, as to seem more like notes for an epitome than a finished composition (xiii. 19-26); but it nowhere attains to the simple energy and pathos of the first book. The vocabulary corresponds to the style. It abounds in new or unusual words. Many of these are forms which belong the decay of a language, as: ἀλλοφυλισμός, iv. 13, vi. 24; Ἑλληνισμός, vi. 13 (ἐμφανισμός, iii. 9); ἐτασμός, vii. 37; θωρακισμός, v. 3; σπλαγχνισμός, vi. 7, 21; vii. 42; or compounds which betray a false pursuit of emphasis or precision: διεμπίμπλημι, iv. 40; ἐπευλαβεῖσθαι, xiv. 18; κατευθικτεῖν, xiv. 43; προσαναλέγεσθαι, viii. 19; προσυπομιμνήσκω, xv. 9; συνεκκεντεῖν, v. 26. Others words are employed in novel senses, as: δευτερολογεῖν, xiii. 22; εἰσκυκλεῖσθαι, ii. 24; εὐαπάντητος, xiv. 9; πεφρενωμένος, xi. 4; ψυχικῶς, iv. 37, xiv. 24. Others bear a sense which is common in late Greek, as: ἀκληρεῖν, xiv. 8; ἀναζυγή, ix. 2, xiii. 26; διάληψις, iii. 32; ἐναπερείδω, ix. 4; φρυάσσομαι, vii. 34; περισκυθίζω vii. 4. Others appear to be peculiar to this book, as: διάσταλσις, xiii. 25; δυσπέτημα, v. 20; προσπυροῦν, xiv. 11; πολεμοτροφεῖν, x. 14, 15; ὁπλολογεῖν, viii. 27, 31; ἀπευθαναπίζειν, vi. 28, δοξικός, viii. 35; ἀνδρολογία, xii. 43. Hebraisms are very rare (viii. 15, ix. 5, xiv. 24). Idiomatic Greek phrases are much more common (iv. 40, xii. 22, xv. 12, &c.); and the writer evidently had a considerable command over the Greek language, though his taste was deformed by a love of rhetorical effect.

6. In the absence of all evidence as to the person of Jason—for the conjecture of Herzfeld (§3) is wholly unsupported by proof—there are no data which fix the time of the composition of his original work, or of the epitome given in 2 Macc. within very narrow limits. The superior limit of the age of the epitome, though not of Jason's work, is determined by the year 124 B.C., which is mentioned in one of the introductory letters (i. 10); but there is no ground for assigning so great an antiquity to the present book. It has, indeed, been concluded from xv. 37, ἀπ' ἐκείνων τῶν καιρῶν κρατηθείσης τῆς πόλεως ὑπὸ τῶν Ἑβραίων—which is written in the person of the epitomator, that it must have been composed before the defeat and death of Judas; but the import of the words appears to be satisfied by the religious supremacy and the uninterrupted celebration of the Temple service, which the Jews maintained till the final ruin of their city; for the destruction of Jerusalem is the only inferior limit, below which the book cannot be placed. The supposed reference to the book in the Epistle to the Hebrews (Heb. xi. 35, "and others were tortured;" comp. vi. 12-vii. 42)

[1] F. Schleiermacher, *Epistolae quae, 2 Macc. i. 1-9, leguntur spuriae.* Colon. 1844.

may perhaps be rather a reference to the current tradition than to the written text; and Josephus in his history shows no acquaintance with its contents. On the other hand, it is probable that the author of 4 Macc. used either 2 Macc., or the work of Jason; but this at most could only determine that the book was written before the destruction of Jerusalem, which is already clear from xv. 37. There is no explicit mention of the book before the time of Clement of Alexandria (*Strom.* v. 14, § 98). Internal evidence is quite insufficient to settle the date, which is thus left undetermined within the limits 124 B.C—70 A.C. If a conjecture be admissible, I should be inclined to place the original work of Jason not later than 100 B.C., and the epitome half a century later. It is quite credible that a work might have been long current at Alexandria before it was known to the Jews of Palestine.

7. In order to estimate the historical worth of the book it is necessary to consider separately the two divisions into which it falls. The narrative in iii.–vii. is in part anterior (iii.–iv. 6) and in part (iv. 7–vii.) supplementary to the brief summary in 1 Macc. i. 10-64: that in viii.–xv. is, as a whole, parallel with 1 Macc. iii.–vii. In the first section the book itself is, in the main, the sole source of information: in the second, its contents can be tested by the trustworthy records of the first book. It will be best to take the second section first, for the character of the book does not vary much; and if this can once be determined from sufficient evidence, the result may be extended to those parts which are independent of other testimony. The chief differences between the first and second books lie in the account of the campaigns of Lysias and Timotheus. Differences of detail will always arise where the means of information are partial and separate; but the differences alleged to exist as to these events are more serious. In 1 Macc. iv. 26-35 we read of an invasion of Judaea by Lysias from the side of Idumaea, in which Judas met him at Bethsura and inflicted upon him a severe defeat. In consequence of this Lysias retired to Antioch to make greater preparations for a new attack, while Judas undertook the restoration of the sanctuary. In 2 Macc. the first mention of Lysias is on the accession of Antiochus Eupator (x. 11). Not long after this he is said to have invaded Judaea and suffered a defeat at Bethsura, in consequence of which he made peace with Judas, giving him favourable terms (xi.). A later invasion is mentioned in both books, which took place in the reign of Antiochus Eupator (1 Macc. vi. 17-50; 2 Macc. xiii. 2 ff.), in which Bethsura fell into the hands of Lysias. It is then necessary either to suppose that there were three distinct invasions, of which the first is mentioned only in 1 Macc., the second only in 2 Macc., and the third in both; or to consider the narrative in 2 Macc. x. 1 ff. as a misplaced version of one of the other invasions (for the history in 1 Macc. iv. 26-61 bears every mark of truth): a supposition which is confirmed by the character of the details, and the difficulty of reconciling the supposed results with the events which immediately followed. It is by no means equally clear that there is any mistake in 2 Macc. as to the history of Timotheus. The details in 1 Macc. v. 11 ff. are quite reconcileable with those in 2 Macc. xii. 2 ff., and it seems certain that both books record the same events; but there is no sufficient reason for supposing that 1 Macc. v. 6 ff. is parallel with 2 Macc. x. 24-37. The similarity of the names Jazer and Gazara probably gave rise to the confusion of the two events, which differ in fact in almost all their circumstances; though the identification of the Timotheus mentioned in 2 Macc. viii. 24, with the one mentioned in viii. 30, seems to have been designed to distinguish him from some other of the same name. With these exceptions the general outlines of the history in the two books are the same; but the details are almost always independent and different. The numbers given in 2 Macc. often represent incredible results: *e. g.* vii. 20, 30; x. 23, 31; xi. 11; xii. 16, 19, 23, 26, 28; xv. 27. Some of the statements are obviously incorrect, and seem to have arisen from an erroneous interpretation and embellishment of the original source: vii. 3 (the presence of Antiochus at the death of the Jewish martyrs); ix. (the death of Antiochus); x. 11, &c. (the relation of the boy king Antiochus Eupator to Lysias); xv. 31, 35 (the recovery of Acra); xiv. 7 (the forces of Demetrius). But on the other hand many of the peculiar details seem to be such as must have been derived from immediate testimony: iv. 29-50 (the intrigues of Menelaus); vi. 2 (the temple at Gerizim); x. 12, 13; xiv. 1 (the landing of Demetrius at Tripolis); viii. 1-7 (the character of the first exploits of Judas). The relation between the two books may be not inaptly represented by that existing between the books of Kings and Chronicles. In each case the later book was composed with a special design, which regulated the character of the materials employed for its construction. But as the design in 2 Macc. is openly avowed by the compiler, so it seems to have been carried out with considerable license. Yet his errors appear to be those of one who interprets history to support his cause, rather than of one who falsifies its substance. The groundwork of facts is true, but the dress in which the facts are presented is due in part at least to the narrator. It is not at all improbable that the error with regard to the first campaign of Lysias arose from the mode in which it was introduced by Jason as an introduction to the more important measures of Lysias in the reign of Antiochus Eupator. In other places (as very obviously in xiii. 19 ff.) the compiler may have disregarded the historical dependence of events while selecting those which were best suited for the support of his theme. If these remarks are true, it follows that 2 Macc. viii.–xv. is to be regarded not as a connected and complete history, but as a series of special incidents from the life of Judas, illustrating the providential interference of God in behalf of His people, true in substance, but embellished in form; and this view of the book is supported by the character of the earlier chapters, in which the narrative is unchecked by independent evidence. There is not any ground for questioning the main facts in the history of Heliodorus (ch. iii.) or Menelaus (iv.); and while it is very probable that the narratives of the sufferings of the martyrs (vi. vii.) are highly coloured; yet the grounds of the accusation, the replies of the accused, and the forms of torture, in their essential characteristics, seem perfectly authentic.[s]

[s] The following is the parallelism which Patritius (*De sens. utri. lib. Macc.* 175-246) endeavours to establish between the common narratives of i. and ii. Macc. When two or more passages are placed opposite to one, " is to be understood that the *first* only has a parallel in the other narrative:—

1 MACC.		2 MACC.
i. 11-16.		iv. 7-13; 13-22.

8 Besides the differences which exist between the two books of Maccabees as to the sequence and details of common events, there is considerable difficulty as to the chronological data which they give. Both follow the Seleucian era ("the era of contracts;" "of the Greek kingdom;" 1 Macc. i. 10, ἐν ἔτει . . . βασιλείας Ἑλλήνων), but in some cases in which the two books give the date of the same event, the first book gives a date one year later than the second (1 Macc. vi. 16 ‖ 2 Macc. xi. 21, 33; 1 Macc. vi. 20 ‖ 2 Macc. xiii. 1); yet on the other hand they agree in 1 Macc. vii. 1 ‖ 2 Macc. xv. 4. This discrepancy seems to be due not to a mere error, but to a difference of reckoning; for all attempts to explain away the discrepancy are untenable. The true era of the Seleucidæ began in October (*Dius*) B.C. 312; but there is evidence that considerable variations existed in Syria in the reckoning by it. It is then reasonable to suppose that the discrepancies in the books of Maccabees, which proceeded from independent and widely-separated sources, are to be referred to this confusion; and a very probable mode of explaining (at least in part) the origin of the difference has been supported by most of the best chronologers. Though the Jews may have reckoned two beginnings to the year from the time of the Exodus [CHRONOLOGY, vol. i. p. 315], yet it appears that the biblical dates are always reckoned by the so-called ecclesiastical year, which began with *Nisan* (April), and not by the civil year, which was afterwards in common use (Jos. *Ant.* i. 3, §3), which began with *Tisri* (October: comp. Patritius, *De Cons. Macc.* p. 33 ff.). Now since the writer of 1 Macc. was a Palestinian Jew, and followed the ecclesiastical year in his reckoning of months (1 Macc. iv. 52), it is probable that he may have commenced the Seleucian year not in autumn (*Tisri*), but in spring (*Nisan*).[h] The narrative of 1 Macc. x. in fact demands a longer period than could be obtained (1 Macc. x. 1, 21, fourteen days) on the hypothesis that the year began with *Tisri*. If, however, the year began in *Nisan* (reckoning from spring 312 B.C.),[i] the events which fell in the last half of the true Seleucian year would be dated a year forward, while the true and the Jewish dates would agree in the first half of the year. Nor is there any difficulty in supposing that the two events assigned to different years (Wernsdorf, *De Fide Macc.* §9) happened in one half of the year. On other grounds indeed, it is not unlikely that the difference in the reckoning of the two books is still greater than is thus accounted for. The Chaldaeans, as is proved by good authority (Ptol. Μεγ. συντ. ap. Clinton *F. H.* 111, 350, 370), dated their Seleucian era one year later than the true time from 311 B.C., and probably from October (*Dius*; comp. 2 Macc. xi. 21, 33). If, as is quite possible, the writer of 2 Macc.—or rather Jason of Cyrene, whom he epitomized—used the Chaldaean dates, there may be a maximum difference between the two books of a year and half, which is sufficient to explain the difficulties of the chronology of the events connected with the death of Antiochus Epiphanes (Ideler, i. 531-534, quoted and supported by Browne, *Ordo Saeclorum*, 489, 490. Comp. Clinton, *Fasti Hell.* iii. 367 ff., who takes a different view; Patritius, *l. c.*; and Wernsdorf, §ix. ff., who states the difficulties with great acuteness).

9. The most interesting feature in 2 Macc. is its

This arrangement, however, is that of an apologist for the books; and the tesselation of passages, no less than the large amount of passages peculiar to each book, indicates how little real parallelism there is between them.

[h] In 2 Macc. xv. 36 the same reckoning of months occurs, but with a distinct reference to the Palestinian decree.

[i] It is, however, possible that the years may have been dated from the following spring (311 B.C.); in which case the Jewish and true years would coincide for the last half of the year, and during the first half the Jewish date would fall short by one year (Herzfeld, *Gesch. d. Volkes Isr.* i. 448).

marked religious character, by which it is clearly distinguished from the first book. "The manifestations (ἐπιφάνειαι) made from heaven on behalf of those who were zealous to behave manfully in defence of Judaism" (2 Macc. ii. 21) form the staple of the book. The events which are related historically in the former book are in this regarded theocratically, if the word may be used. The calamities of persecution and the desolation of God's people are definitely referred to a temporary visitation of His anger (v. 17-20, vi. 12-17, vii. 32, 33), which shows itself even in details of the war (xii. 40; comp. Josh. vii.). Before his great victory Judas is represented as addressing "the Lord that worketh wonders" (τερατοποιός) with the prayer that, as once His angel slew the host of the Assyrians, so then He would "send a good angel before His armies for a fear and dread to their enemies" (xv. 22-24; comp. 1 Macc. vii. 41, 42). A great "manifestation" wrought the punishment of Heliodorus (iii. 24-29): a similar vision announced his cure (iii. 33, 4). Heavenly portents for "forty days" (ἐπιφάνεια, v. 4) foreshewed the coming judgment (v. 2, 3). "When the battle waxed strong five comely men upon horses" appear, of whom two cover Maccabaeus from all danger (x. 29, 30). Again, in answer to the supplication of the Jews for "a good angel to deliver them," "there appeared before them on horseback one in white clothing," and "they marched forward" to triumph, "having an helper from heaven" (xi. 6-11). And where no special vision is recorded, the rout of the enemy is still referred to "a manifestation of Him that seeth all things" (xii. 22). Closely connected with this belief in the active energy of the beings of the unseen world, is the importance assigned to dreams (xv. 11, ὄνειρον ἀξιόπιστον ὅραρ); and the distinct assertion, not only of a personal "resurrection to life" (vii. 14, ἀνάστασις εἰς ζωήν; v. 9, αἰώνιος ἀναβίωσις ζωῆς), but of the influence which the living may yet exercise on the condition of the dead (xii. 43-45). The doctrine of Providence is carried out in a most minute parallelism of great crimes and their punishment. Thus, Andronicus was put to death on the very spot where he had murdered Onias (iv. 38, τοῦ Κυρίου τὴν ἀξίαν αὐτῷ κόλασιν ἀποδόντος): Jason, who had "driven many out of their country," died an exile, without "solemn funeral," as he had "cast out many unburied" (v. 9, 10): the torments suffered by Antiochus are likened to those which he had inflicted (ix. 5, 6): Menelaus, who "had committed many sins about the altar," "received his death in ashes" (xiii. 4-8): the hand and tongue of Nicanor, with which he had blasphemed, were hung up "as an evident and manifest sign unto all of the help of the Lord" (xv. 32-35). On a larger scale the same idea is presented in the contrasted relations of Israel and the heathen to the Divine Power. The former is "God's people," "God's portion" (ἡ μερίς, i. 26; xiv. 15), who are chastised in love: the latter are left unpunished till the full measure of their sins ends in destruction (vi. 12-17). For in this book, as in 1 Macc., there are no traces of the glorious visions of the prophets, who foresaw the time when all nations should be united in one bond under one Lord.

10. The history of the book, as has been already noticed (§9), is extremely obscure. It is first mentioned by Clement of Alexandria (*l. c.*); and Origen, in a Greek fragment of his commentaries on Exodus (*Philoc.* 26), quotes vi. 12-16, with very considerable variations of text, from "the Maccabaean history" (τὰ Μακκαβαϊκά: comp. 1 MACC. §6). At a later time the history of the martyred brothers was a favourite subject with Christian writers (Cyp. *Ep.* lvi. 6, &c.); and in the time of Jerome (*Prol. Galeat.*) and Augustine (*De Doctr. Christ.* ii. 8 *De Civ. Dei*, xviii. 36) the book was in common and public use in the Western Church, where it maintained its position till it was at last definitely declared to be canonical at the council of Trent [CANON, vol. i. p. 259.]

11. The Latin version adopted in the Vulgate as in the case of the first book, is that current before Jerome's time, which Jerome left wholly untouched in the apocryphal books, with the exception of Judith and Tobit. The St. Germain MS., from which Sabatier edited an earlier text of 1 Macc., does not, unfortunately, contain the second book, being imperfect at the end; but the quotations of Lucifer of Cagliari (Sabatier, *ad Capp.* vi. vii.) and a fragment published by Mai (*Spicil. Rom.* l. c. 1 MACC. §10), indicate the existence and character of such a text. The version is much less close to the Greek than in the former book, and often gives no more than the sense of a clause (i. 13, vi. 21, vii. 5, &c.). The Syriac version is of still less value. The Arabic so-called version of 2 Macc. is really an independent work. [FIFTH BOOK OF MACCABEES.]

12. The chief commentaries on 2 Macc. have been already noticed. [FIRST BOOK OF MACCABEES, §11.] The special edition of Hasse (Jena, 1786), seems, from the account of Grimm, to be of no value. There are, however, many valuable historical observations in the essay of Patritius (*De Consensu*, &c. already cited.)

III. THE THIRD BOOK OF THE MACCABEES contains the history of events which preceded the great Maccabaean struggle. After the decisive battle of Raphia (B.C. 217), envoys from Jerusalem, following the example of other cities, hastened to Ptolemy Philopator to congratulate him on his success. After receiving them the king resolved to visit the holy city. He offered sacrifice in the Temple, and was so much struck by its majesty that he urgently sought permission to enter the sanctuary. When this was refused he resolved to gratify his curiosity by force, regardless of the consternation with which his design was received (ch. i.). On this Simon the high-priest, after the people had been with difficulty restrained from violence, kneeling in front of the Temple implored divine help. At the conclusion of the prayer the king fell paralysed into the arms of his attendants, and on his recovery returned at once to Egypt without prosecuting his intention. But angry at his failure he turned his vengeance on the Alexandrine Jews. Hitherto these had enjoyed the highest rights of citizenship, but the king commanded that those only who were voluntarily initiated into the heathen mysteries should be on an equal footing with the Alexandrians, and that the remainder should be enrolled in the lowest class (εἰς λαογραφίαν καὶ οἰκετικὴν διάθεσιν ἀχθῆναι, ii. 28), and branded with an ivy-leaf (ch. ii.). [DIONYSUS.] Not content with this order, which was evaded or despised, he commanded all the Jews in the country to be arrested and sent to Alexandria (ch. iii.). This was done as well as might be, though the greater part escaped (iv. 18), and the gathered multitudes were confined in the Hippodrome outside the city (comp. Joseph. *Ant.* xvii. 6, §5). The resident Jews, who shewed sympathy for their countrymen, were imprisoned with them; and the

king ordered the names of all to be taken down preparatory to their execution. Here the first marvel happened: the scribes to whom the task was assigned toiled for forty days from morning till evening, till at last reeds and paper failed them, and the king's plan was defeated (ch. iv.). However, regardless of this, the king ordered the keeper of his elephants to drug the animals, five hundred in number, with wine and incense, that they might trample the prisoners to death on the morrow. The Jews had no help but in prayer; and here a second marvel happened. The king was overpowered by a deep sleep, and when he awoke the next day it was already time for the banquet which he had ordered to be prepared, so that the execution was deferred. The Jews still prayed for help; but when the dawn came, the multitudes were assembled to witness their destruction, and the elephants stood ready for their bloody work. Then was there another marvel. The king was visited by deep forgetfulness, and chided the keeper of the elephants for the preparations which he had made, and the Jews were again saved. But at the evening banquet the king recalled his purpose, and with terrible threats prepared for its immediate accomplishment at daybreak (ch. v.). Then Eleazer, an aged priest, prayed for his people, and as he ended the royal train came to the Hippodrome. On this there was seen a heavenly vision by all but the Jews (vi. 18). The elephants trampled down their attendants, and the wrath of the king was turned to pity. So the Jews were immediately set free, and a great feast was prepared for them; and they resolved to observe a festival, in memory of their deliverance, during the time of their sojourn in strange lands (ch. vi.). A royal letter to the governors of the provinces set forth the circumstances of their escape, and assured them of the king's protection. Permission was given them to take vengeance on their renegade countrymen, and the people returned to their homes in great triumph, "crowned with flowers, and singing praises to the God of their fathers."

2. The form of the narrative, even in this bald outline, sufficiently shows that the object of the book has modified the facts which it records. The writer, in his zeal to bring out the action of Providence, has coloured his history, so that it has lost all semblance of truth. In this respect the book offers an instructive contrast to the book of Esther, with which it is closely connected both in its purpose and in the general character of its incidents. In both a terrible calamity is averted by faithful prayer; royal anger is changed to royal favour; and the punishment designed for the innocent is directed to the guilty. But here the likeness ends. The divine reserve, which is the peculiar characteristic of Esther, is exchanged in 3 Macc. for rhetorical exaggeration; and once again the words of inspiration stand ennobled by the presence of their later counterpart.

3. But while it is impossible to accept the details of the book as historical, some basis of truth must be supposed to lie beneath them. The yearly festival (vi. 36; vii. 19) can hardly have been a mere fancy of the writer; and the pillar and synagogue (προσευχή) at Ptolemais (vii. 20) must have been connected in some way with a signal deliverance. Besides this, Josephus (*c. Ap.* ii. 5) relates a very similar occurrence which took place in the reign of Ptolemy VII. (Physcon). "The king," as he says, "exasperated by the opposition which Onias, the Jewish general of the royal army, made to his usurpation, seized all the Jews in Alexandria with their wives and children, and exposed them to intoxicated elephants. But the animals turned upon the king's friends; and forthwith the king saw a terrible visage which forbad him to injure the Jews. On this he yielded to the prayers of his mistress, and repented of his attempt; and the Alexandrine Jews observed the day of their deliverance as a festival." The essential points of the story are the same as those in the second part of 3 Macc., and there can be but little doubt that Josephus has preserved the events which the writer adapted to his narrative. If it be true that Ptolemy Philopator attempted to enter the temple at Jerusalem, and was frustrated in his design—a supposition which is open to no reasonable objection—it is easily conceivable that tradition may have assigned to him the impious design of his successor; or the author of 3 Macc. may have combined the two events for the sake of effect.

4. Assuming rightly that the book is an adaptation of history, Ewald and (at greater length) Grimm have endeavoured to fix exactly the circumstances by which it was called forth. The writings of Philo, occasioned by the oppressions which the Alexandrine Jews suffered in the reign of Caligula, offer several points of connexion with[h] it; and the panic which was occasioned at Jerusalem by the attempt of the emperor to erect his statue in the Temple is well known (Joseph. *Ant.* xviii. 8, §2). It is then argued that the writer designed to portray Caligula under the name of the sensual tyrant who had in earlier times held Egypt and Syria, while he sought to nerve his countrymen for their struggle with heathen power, by reminding them of earlier deliverances. It is unnecessary to urge the various details in which the parallel between the acts of Caligula and the narrative fail. Such differences may have been part of the writer's disguise; but it may be well questioned whether the position of the Jews in the early time of the empire, or under the later Ptolemies, was not generally such that a narrative like 3 Macc. would find a ready auditory.

5. The language of the book betrays most clearly its Alexandrine origin. Both in vocabulary and construction it is rich, affected, and exaggerated. Some words occur nowhere else (λαογραφία, ii. 28; προσυστέλλεσθαι, ii. 29; ὑπόφρικος, vi. 20; χαρτηρία, iv. 20; βυθοτρεφής, vi. 8; ψυχουλκεῖσθαι, v. 25; μισύβριs, vi. 9; ποντόβροχος, vi. 4; μεγαλοκράτωρ, vi. 2; μυροβρεχής, iv. 6; προκατασκιρροῦσθαι, iv. 1; ἀνεπιστρέπτως, i. 20); others are used in strange senses (ἐκνεύειν, *Met.* iii. 22; παραβασιλεύω, vi. 24; ἐμπορεύω, *Met.* vii. 5); others are very rare or characteristic of late Greek writers (ἐπιβάθρα, ii. 31; κατάπτωσις, ii. 14; ἔνθεσμος, ii. 21; ἀπρόπτωτος, iii. 14; ἀλογιστία, v. 42; ἀπαραπόδιστος, vi. 28; φρικασμός, iii. 17; μεγαλομερῶ, vi. 33; σκυλμός, iii. 25; κισσόφυλλον, ii. 29; ἐξαποστολή, iv. 4). The form of the sentences is strained (*e. g.* i. 15, 17, ii. 31, iii. 23, iv. 11, vii. 7, 19, &c.), and every description is loaded with rhetorical ornament (*e. g.* iv. 2, 5; vi. 45). As a natural consequence the meaning is often obscure (*e. g.* i. 9, 14, 19, iv. 5, 14),

[h] These are pointed out at length by Grimm (*Einl.* §3); but the relation of the Alexandrine Jews to a persecuting civil power would, perhaps, always present the same general features.

and the writer is led into exaggerations which are historically incorrect (vii. 2, 20, v. 2 ; comp. Grimm).

6. From the abruptness of the commencement (*ὁ δὲ Φιλοπάτωρ*) it has been thought (Ewald, *Gesch.* iv. 535) that the book is a mere fragment of a larger work. Against this view it may be urged that the tenor of the book is one and distinct, and brought to a perfect issue. It must, however, be noticed that in some MSS. (44, 125, Parsons) the beginning is differently worded: "*Now in these days king Ptolemy*"; and the reference in ii. 25 (*τῶν προαποδεδειγμένων*) is to some passage not contained in the present narrative. It is possible that the narrative may have formed the sequel to an earlier history, as the *Hellenica* continue, without break or repetition, the history of Thucydides (*μετὰ δὲ ταῦτα*, Xen. *Hell.* i. 1); or we may suppose (Grimm, *Einl.* §4) that the introductory chapter has been lost.

7. The evidence of language, which is quite sufficient to fix the place of the composition of the book at Alexandria, is not equally decisive as to the date. It might, indeed, seem to belong to the early period of the empire (B.C. 40-70), when for a Jew all hope lay in the record of past triumphs, which assumed a fabulous grandeur from the contrast with present oppression. But such a date is purely conjectural; and in the absence of any direct proof it is unsafe to trust to an impression which cannot claim any decisive authority, from the very imperfect knowledge which we possess of the religious history of the Jews of the dispersion. If, however, Ewald's theory be correct, the date falls within the limits which have been suggested.

8. The uncertainty of the date of the composition of the book corresponds with the uncertainty of its history. In the Apostolical Canons (*Can.* 85) "three books of the Maccabees" are mentioned (*Μακκαβαίων τρία*, one MS. reads *δ'*), of which this is probably the third, as it occupies the third place in the oldest Greek MSS., which contain also the so-called fourth book. It is found in a Syriac translation, and is quoted with marked respect by Theodoret (*ad Dan.* xi. 7) of Antioch (died cir. A.D. 457). "Three books of the Maccabees" (*Μακκαβαϊκὰ γ'*) are placed at the head of the *antilegomena* of the O. T. in the catalogue of Nicephorus; and in the *Synopsis*, falsely ascribed to Athanasius, the third book is apparently described as "Ptolemaïca," from the name of the royal hero,[1] and reckoned doubtfully among the disputed books. On the other hand the book seems to have found no acceptance in the Alexandrine or Western churches, a fact which confirms the late date assigned to it, if we assume its Alexandrine origin. It is not quoted, as far as we know, in any Latin writer, and does not occur in the lists of canonical and apocryphal books in the Gelasian Decretals. No ancient Latin version of it occurs; and as it is not contained in the Vulgate it has been excluded from the canon of the Romish church.

9. In modern times it has been translated into Latin (first in the Complutensian Polyglott); German (De Wette and Augusti, *Bibelübersetzung*, 1st ed.; and in an earlier version "by Jo. Circemberger, Wittenberg, 1554;" Cotton, *Five Books*, &c., p. xx.); and French (Calmet). The first English version was appended to "A briefe and compendious table . . . opening the way to the principall histories of the whole Bible . . . London, 1550." This version with a few alterations (Cotton, p. xx.) was included in a folio Bible published next year by J. Day; and the book was again published in 1563. A better translation was published by Whiston in his *Authentic Documents* (1727); and a new version, with short notes by Dr. Cotton (*The five books of Maccabees in English* . . . Oxford, 1832). The Commentary of Grimm (*Kurzgef. Handbuch*) gives ample notices of the opinions of earlier commentators, and supersedes the necessity of using any other.

IV. THE FOURTH BOOK OF MACCABEES (*Μακκαβαίων δ'. εἰς Μακκαβαίους λόγος*) contains a rhetorical narrative of the martyrdom of Eleazer and of the "Maccabaean family," following in the main the same outline as 2 Macc. The second title of the book, *On the Supreme Sovereignty of Reason* (*περὶ αὐτοκράτορος λογισμοῦ*), explains the moral use which is made of the history. The author in the introduction discusses the nature of reason and the character of its supremacy, which he then illustrates by examples taken from Jewish history (§1-3, Hudson). Then turning to his principal proof of the triumphant power of reason, he gives a short summary of the causes which led to the persecution of Antiochus (§ 4), and in the remainder of the book describes at length the death of Eleazer (§ 5-7), of the seven brethren (8-14), and of their mother (15-19), enforcing the lessons which he would teach by the words of the martyrs and the reflections which spring from them. The last section (20) is evidently by another hand.

2. The book was ascribed in early times to Josephus. Eusebius (*H. E.* iii. 10, *πεπόνηται δὲ καὶ ἄλλο οὐκ ἀγεννὲς σπούδασμα τῷ ἀνδρὶ*—i. e. *Ἰωσήπῳ—περὶ αὐτοκράτορος λογισμοῦ, ὅ τινες Μακκαβαϊκὸν ἐπέγραψαν*), and Jerome, following him (*De Vir. ill.* 13, "Alius quoque liber ejus, qui inscribitur *περὶ αὐτοκράτορος λογισμοῦ* valde elegans habetur, in quo et Maccabaeorum sunt digesta martyria," comp. Jerome, *adv. Pal.* ii.), also Photius (ap. Philostorg. *H. E.* 1, *τὸ μέντοιγε τέταρτον ὑπὸ Ἰωσήπου γέγραφθαι καὶ αὐτὸς συνομολογῶν*, so that at that time the judgment was disputed), and Suidas (*s. v.* *Ἰώσηπος*)—give this opinion without reserve; and it is found under his name in many MSS. of the great Jewish historian. On the other hand, Gregory of Nazianzus quotes the book (*Orat.* xv. 22) as though he was unacquainted with the author, and in the Alexandrine and Sinaitic MSS. it is called simply "the fourth of Maccabees." The internal evidence against the authorship by Josephus is so great as to outweigh the testimony of Eusebius, from whom it is probable that the later statements were derived; and there can be no reasonable doubt that the book was assigned to Josephus by a mere conjecture, which the style and contents alike show to be unfounded. It is possible that a tradition was preserved that the author's name was Josephus (*Ἰώσηπος*), in which case the confusion would be more easy.

3. If we may assume that the authorship was attributed to Josephus only by error, no evidence remains to fix the date of the book. It is only certain that it was written before the destruction of Jerusalem, and probably after 2 Macc. The cle-

[1] This title occurs only in the *Synopsis* of the *Pseudo-Athanasius* (p. 432, ed. Migne). Athanasius omits the Maccabees in his detailed list. The text at present stands *Μακκαβαϊκὰ βιβλία δ'. Πτολεμαϊκά*. But Credner (*Zur Gesch. d. Kan.* 144 *note*) conjectures with great probability that the true reading is *Μακκ. βιβλ. καὶ Πτολ.* *Καὶ* and *δ'* can frequently be scarcely distinguished in cursive MSS.

writer of the composition leads the reader to suppose that it was not a mere rhetorical exercise, but an earnest effort to animate the Jewish nation to face real perils. In which case it might be referred not unnaturally, to the troubled times which immediately preceded the war with Vespasian (cir. A.D. 67).

4. As a historical document the narrative is of no value. Its interest centres in the fact that it is a unique example of the didactic use which the Jews made of their history. Ewald (*Gesch.* iv. 556) rightly compares it with the sermon of later times, in which a scriptural theme becomes the subject of an elaborate and practical comment. The style is very ornate and laboured; but it is correct and vigorous, and truly Greek. The richness and boldness of the vocabulary is surprising. Many words, coined in an antique mould, seem to be peculiar to the book, as *αὐτοδέσποτος, ἐθνάλιτος, ἐπταμήτωρ, κοσμοπλανής, κοσμοφορεῖν, μελαγχολιᾶν, οἰστρηλασία, παθοκρατεῖσθαι*, &c.; others belong to later types, as *αὐτεξουσιότης, ἀρχιερᾶσθαι*; others are used in meanings which are found in late writers, as *πηδαλιουχεῖν, ἁγιστεία, δόγμα*; and the number of prepositional compounds is very large—*ἀναπυροφραγίζειν, ἐξευμενίζειν, ἐπισαρπολογεῖσθαι, ἐπιῤῥωγολογεῖσθαι, προσεπικατατείνειν*.

5. The philosophical tone of the book is essentially stoical; but the stoicism is that of a stern legalist. The dictates of reason are supported by the remembrance of noble traditions, and by the hope of a glorious future. The prospect of the life to come is clear and wide. The faithful are seen to rise to endless bliss; the wicked to descend to endless torment, varying in intensity. But while the writer shows, in this respect, the effects of the full culture of the Alexandrine school, and in part advances beyond his predecessors, he offers no trace of that deep spiritual insight which was quickened by Christianity. The Jew stands alone, isolated by character and by blessing (comp. Gfrörer, *Philo*, &c., ii. 173 ff.; Dähne, *Jud. Alex. Relig. Philos.* ii. 190 ff.).

6. The original Greek is the only ancient text in which the book has been published, but a Syriac version is said to be preserved in MS. at Milan (Gramm, *Einl.* §7). In recent times the work has hardly received so much attention as it deserves. The first and only complete commentary is that of Grimm (*Exeg. Handbuch*), which errs only by extreme elaborateness. An English translation has been published by Dr. Cotton (*The five books of Maccabees*, Oxf. 1832). The text is given in the best form by Bekker in his edition of Josephus (Lips. 1855-6).

7. Though it is certain that our present book is not that which old writers described, Sixtus Senensis (*Bibl. Sancta*, p. 37, ed. 1575) gives a very interesting account of another fourth book of Maccabees, which he saw in a library at Lyons, which was afterwards burnt. It was in Greek, and contained the history of John Hyrcanus, continuing the narrative shortly after the close of the first book. Sixtus quotes the first words: *καὶ μετὰ τὸ ἀποκτανθῆναι τὸν Σαμαια ἐγενήθη Ἰωάννης υἱὸς αὐτοῦ ἀρχιερεὺς ἀντ' αὐτοῦ*, but this is the only fragment which remains of it. The history, he says, was nearly the same as that in Jos. *Ant.* xiii., though the style was very different from his, abounding in Hebrew forms. The testimony is so exact and explicit, that we can see no reason for questioning its accuracy, and still less for supposing (with Calmet) that Sixtus saw only the so-called fifth book, which is at present preserved in Arabic.

V. THE FIFTH BOOK OF MACCABEES just mentioned may call for a very brief notice. It is printed in Arabic in the Paris and London Polyglotts; and contains a history of the Jews from the attempt of Heliodorus to the birth of our Lord. The writer made use of the first two books of Maccabees and of Josephus, and has no claim to be considered an independent authority. His own knowledge was very imperfect, and he perverts the statements which he derives from others. He must have lived after the fall of Jerusalem, and probably out of Palestine, though the translation bears very clear traces of Hebrew idioms, so that it has been supposed that the book was originally written in Hebrew, or at least that the Greek was strongly modified by Hebrew influence. The book has been published in English by Dr. Cotton (*Five books, &c.*). [B. F. W.]

MACEDO'NIA (*Μακεδονία*), the first part of Europe which received the Gospel directly from St. Paul, and an important scene of his subsequent missionary labours and the labours of his companions. So closely is this region associated with apostolic journeys, sufferings, and epistles, that it has truly been called by one of our English travellers a kind of Holy Land (Clarke's *Travels*, ch. xi.). For details see NEAPOLIS, PHILIPPI, AMPHIPOLIS, APOLLONIA, THESSALONICA, and BEREA. We confine ourselves here to explaining the geographical and political import of the term "Macedonia" as employed in the N. T., with some allusion to its earlier use in the Apocrypha, and one or two general remarks on St. Paul's journeys through the district, and the churches which he founded there.

In a rough and popular description it is enough to say that Macedonia is the region bounded inland by the range of Haemus or the Balkan northwards, and the chain of Pindus westwards, beyond which the streams flow respectively to the Danube and the Adriatic; that it is separated from Thessaly on the south by the Cambunian hills, running easterly from Pindus to Olympus and the Aegean; and that it is divided on the east from Thrace by a less definite mountain-boundary running southwards from Haemus. Of the space thus enclosed, two of the most remarkable physical features are two great plains, one watered by the Axius, which comes to the sea at the Thermaic gulf, not far from Thessalonica; the other by the Strymon, which, after passing near Philippi, flows out below Amphipolis. Between the mouths of these two rivers a remarkable peninsula projects, dividing itself into three points, on the farthest of which Mount Athos rises nearly into the region of perpetual snow. Across the neck of this peninsula St. Paul travelled more than once with his companions.

This general sketch would sufficiently describe the Macedonia which was ruled over by Philip and Alexander, and which the Romans conquered from Perseus. At first the conquered country was divided by Aemilius Paulus into four districts. Macedonia Prima was on the east of the Strymon, and had Amphipolis for the capital. Macedonia Secunda stretched between the Strymon and the Axius, with Thessalonica for its metropolis. The third and fourth districts lay to the south and the west. This division was only temporary. The whole of Macedonia, along with Thessaly and a large tract along the Adriatic, was made one province and centralised under the jurisdiction of a proconsul, who resided at Thessalonica. We have now reached the definition which corresponds with the usage of the term in the N. T. (Acts xvi. 9, 10, 12,

xviii. 5, xix. 21, 22, 29, xx. 1, 3, xxvii. 2; Rom. xv. 26; 1 Cor. xvi. 5; 2 Cor. i. 16, ii. 13, vii. 5, viii. 1, ix. 2, 4, xi. 9; Phil. iv. 15; 1 Thess i. 7, 8, iv. 10; 1 Tim. i. 3). Three Roman provinces, all very familiar to us in the writings of St. Paul, divided the whole space between the basin of the Danube and Cape Matapan. The border-town of ILLYRICUM was Lissus on the Adriatic. The boundary-line of ACHAIA nearly coincided, except in the western portion, with that of the kingdom of modern Greece, and ran in an irregular line from the Acroceraunian promontory to the bay of Thermopylae and the north of Euboea. By subtracting these two provinces, we define Macedonia.

The history of Macedonia in the period between the Persian wars and the consolidation of the Roman provinces in the Levant is touched in a very interesting manner by passages in the Apocrypha. In Esth. xvi. 10, Haman is described as a Macedonian, and in xvi. 14 he is said to have contrived his plot for the purpose of transferring the kingdom of the Persians to the Macedonians. This sufficiently betrays the late date and spurious character of these apocryphal chapters: but it is curious thus to have our attention turned to the early struggle of Persia and Greece. Macedonia played a great part in this struggle, and there is little doubt that Ahasuerus is Xerxes. The history of the Maccabees opens with vivid allusions to Alexander the son of Philip, the Macedonian king (*Ἀλέξανδρος ὁ τοῦ Φιλίππου ὁ βασιλεὺς ὁ Μακεδών*), who came out of the land of Chettiim and smote Darius king of the Persians and Medes (1 Macc. i. 1), and who reigned first among the Grecians (ib. vi. 2). A little later we have the Roman conquest of Perseus "king of the Citims" recorded (ib. viii. 5). Subsequently in these Jewish annals we find the term "Macedonians" used for the soldiers of the Seleucid successors of Alexander (2 Macc. viii. 20). In what is called the Fifth Book of Maccabees this usage of the word is very frequent, and is applied not only to the Seleucid princes at Antioch, but to the Ptolemies at Alexandria (see Cotton's *Five Books of Maccabees*, Oxford, 1832). It is evident that the words "Macedonia" and "Macedonian" were fearfully familiar to the Jewish mind; and this gives a new significance to the vision by which St. Paul was invited at Troas to the country of Philip and Alexander.

Nothing can exceed the interest and impressiveness of the occasion (Acts xvi. 9) when a new and religious meaning was given to the well-known *ἀνὴρ Μακεδών* of Demosthenes (*Phil.* i. p. 43), and when this part of Europe was designated as the first to be trodden by an Apostle. The account of St. Paul's first journey through Macedonia (Acts xvi. 10–xvii. 15) is marked by copious detail and well-defined incidents. At the close of this journey he returned from Corinth to Syria by sea. On the next occasion of visiting Europe, though he both went and returned through Macedonia (Acts xx. 1-6), the narrative is a very slight sketch, and the route is left uncertain, except as regards Philippi. Many years elapsed before St. Paul visited this province again; but from 1 Tim. i. 3 it is evident that he did accomplish the wish expressed during his first imprisonment (Phil. ii. 24).

The character of the Macedonian Christians is set before us in Scripture in a very favourable light. The candour of the Bereans is highly commended (Acts xvii. 11); the Thessalonians were evidently objects of St. Paul's peculiar affection (1 Thess. ii. 8, 17-20. iii. 10); and the Philippians, besides their general freedom from blame, are noted as remarkable for their liberality and self-denial (Phil. iv. 10, 14-19; see 2 Cor. ix. 2, xi. 9). It is worth noticing, as a fact almost typical of the change which Christianity has produced in the social life of Europe, that the female element is conspicuous in the records of its introduction into Macedonia. The Gospel was first preached there to a small congregation of women (Acts xvi. 13); the first convert was a woman (ib. ver. 14); and, at least at Philippi, women were prominent as active workers in the cause of religion (Phil. iv. 2, 3).

It should be observed that, in St. Paul's time, Macedonia was well intersected by Roman roads, especially by the great Via Egnatia, which connected Philippi and Thessalonica, and also led towards Illyricum (Rom. xv. 19). The antiquities of the country have been well explored and described by many travellers. The two best works are those of Cousinéry (*Voyage dans la Macédoine*, Paris, 1831) and Leake (*Travels in Northern Greece*, London, 1835). [J. S. H.]

Coin of Macedonia.

MACEDO'NIAN (*Μακεδών*) occurs in A.V. only in Acts xxvii. 2. In the other cases (Acts xvi. 9, xix. 29, 2 Cor. ix. 2, 4) our translators render it "of Macedonia."

MACHBANA'I (מַכְבַּנַּי: Μελχαβαναί; Alex. Μαχαβαναί: *Machbanai*), one of the lion-faced warriors of Gad who joined the fortunes of David when living in retreat at Ziklag (1 Chr. xii. 13).

MACHBE'NAH (מַכְבֵּנָה: Μαχαβήνα; Alex. Μαχαμηνά: *Machbena*). Sheva, the father of Machbena, is named in the genealogical list of Judah as the offspring of Maachah, the concubine of Caleb ben-Hezron (1 Chr. ii. 49). Other names similarly mentioned in the passage are known to be those not of persons but of towns. The most feasible inference from this is, that Machbena was founded or colonized by the family of Maachah. To the position of the town, however, whether near Gaza, like MADMANNAH, or between Jerusalem and Hebron, like GIBEA, we possess no clue. It is not named by Eusebius or Jerome, and does not seem to have been met with by any later traveller. [G.]

MA'CHI (מָכִי: Μαχί; Alex. Μαχί: *Machi*), the father of Geuel the Gadite, who went with Caleb and Joshua to spy out the land of Canaan (Num. xiii. 15).

MACH'IR (מָכִיר: Μαχείρ: *Machir*), the eldest son (Josh. xvii. 1) of the patriarch Manasseh by an Aramite or Syrian concubine (1 Chr. vii. 14, and the LXX. of Gen. xlvi. 20). His children are commemorated as having been caressed[a] by Joseph before his death (Gen. l. 23). His wife's name is not preserved, but she was a Benjamite, the "sister

[a] The Targum characteristically says "circumcised."

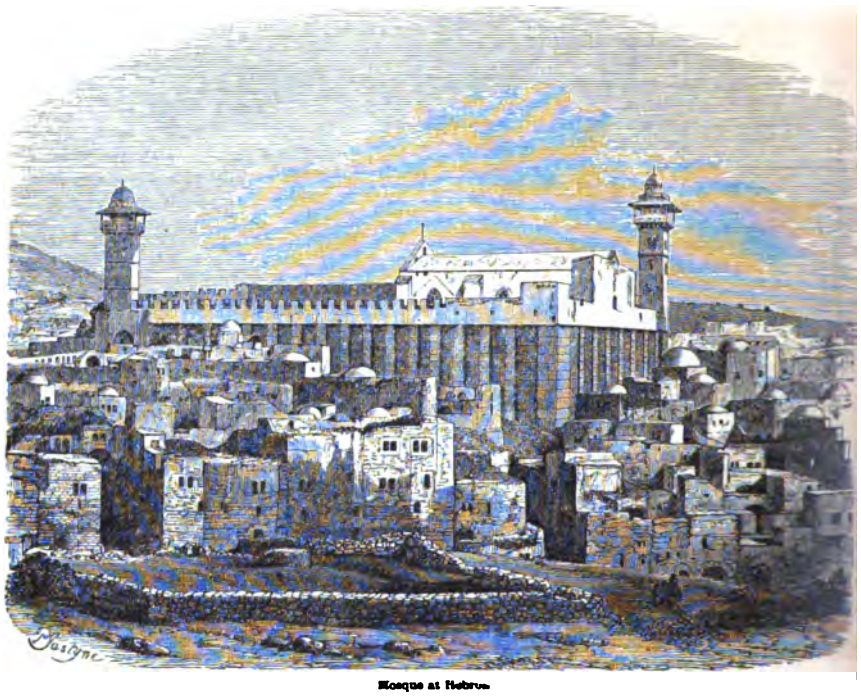
of Huppim and Shuppim" (1 Chr. vii. 15). The only children whose names are given are his son Gilead,[a] who is repeatedly mentioned (Num. xxvi. 29, xxvii. 1, xxxvi. 1; 1 Chr. vii. 14, &c.), and a daughter, Abiah, who married a chief of Judah named Hezron (1 Chr. ii. 21, 24). The connexion with Benjamin may perhaps have led to the selection by Abner of Mahanaim, which lay on the boundary between Gad and Manasseh, as the residence of Ishbosheth (2 Sam. ii. 8); and that with Judah may have also influenced David to go so far north when driven out of his kingdom. At the time of the conquest the family of Machir had become very powerful, and a large part of the country on the east of Jordan was subdued by them (Num. xxxii. 39; Deut. iii. 15). In fact to their warlike tendencies it is probably entirely due that the tribe was divided, and that only the heads or families crossed the Jordan. So great was their power that the name of Machir occasionally supersedes that of Manasseh, not only for the eastern territory, but even for the western half of the tribe also: see Judg. v. 14, where Machir occurs in the enumeration of the western tribes—"Gilead" apparently standing for the eastern Manasseh in ver. 17; and still more unmistakeably in Josh. xiii. 31, compared with 29.

2. The son of Ammiel, a powerful sheykh of one of the trans-Jordanic tribes, but whether of Manasseh—the tribe of his namesake—or of Gad, must remain uncertain till we know where Lo-debar, to which place he belonged, was situated. His name occurs but twice, but the part which he played was by no means an insignificant one. It was his fortune to render essential service to the cause of Saul and of David successively—in each case when they were in difficulty. Under his roof, when a cripple and friendless, after the death of his uncle and the ruin of his house, the unfortunate Mephibosheth found a home, from which he was summoned by David to the honours and the anxieties of a residence at the court of Jerusalem (2 Sam. ix. 4, 5). When David himself, some years later, was driven from his throne to Mahanaim, Machir was one of the three great chiefs who lavished on the exiled king and his soldiers the wealth of the rich pastoral district of which they were the lords—"wheat, and barley, and flour, and parched corn, and beans, and lentiles, and parched pulse, and honey, and butter, and sheep, and cows'-milk cheese" (2 Sam. xvii. 27–29). Josephus calls him the chief of the country of Gilead (*Ant.* vii. 9, §8). [G.]

MACHIRITES, THE (הַמָּכִירִי: ὁ Μαχιρί; Alex. ὁ Μαχειρί: *Machiritae*). The descendants of Machir the father of Gilead (Num. xxvi. 29).

MACHMAS (Μαχμάς: *Machmas*), 1 Macc. ix. 73. [MICHMASH.]

MACHNADEBAI (מַכְנַדְבַּי: Μαχαδραβού; Alex. Μαχναδααβού: *Mechnedebai*), one of the sons of Bani who put away his foreign wife at Ezra's command (Ezr. x. 40). The marginal reading of A. V. is *Mabnadebai*, which is found in some copies. In the corresponding list of 1 Esd. ix. 34 the place of this name is occupied by "of the sons of Ozora," which may be partly traced in the original.



MACH'PELAH (always with the article—הַמַּכְפֵּלָה: τὸ διπλοῦν, also τὸ διπλοῦν σπηλαίον; *duplex*, also *spelunca duplex*), the spot containing the timbered field, in the end of which was the cave which Abraham purchased[a] from the Bene-Heth, and which became the burial place of Sarah, Abraham himself, Isaac, Rebekah, Leah, and Jacob. Abraham resided at Bethel, Hebron and Gerar, but the field which contained his tomb was the only spot which positively belonged to him in the Land of Promise. That the name applied to the general locality, and not to either the field or the cavern,[b] is evident from Gen. xxiii. 17, "the field of Ephron which was in Macpelah . . . the field and the cave which was therein," although for convenience of expression both field and cave are occasionally called by the name. Its position is—with one exception uniformly—specified as "facing (עַל־פְּנֵי) Mamre" (Gen. xxiii. 17, 19, xxv. 9, xlix. 30, l. 13). What the meaning of this ancient name—not met with beyond the book of Genesis—may be, appears quite uncertain. The older interpreters, the LXX., Vulgate, Targums of Onkelos and Pseudo-jonathan, Peschito, Veneto-Greek, &c., explain it as meaning "double"—the double cave or the double field—but the modern lexicographers interpret it, either by comparison with the Ethiopic, as Gesenius (*Thes.* 704 *b*), an allotted or separated place; or again—as Fürst (*Handwb.* 733 *a*)—the undulating spot. The one is probably as near the real meaning as the other.

Beyond the passages already cited, the Bible contains no mention either of the name Macpelah or of the sepulchre of the Patriarchs. Unless this was the sanctuary of Jehovah to which Absalom had vowed or pretended to have vowed a pilgrimage, when absent in the remote Geshur (2 Sam. xv. 7), no allusion to it has been discovered in the records of David's residence at Hebron, nor yet in the struggles of the Maccabees, so many of whose battles were fought in and around it. It is a remarkable instance of the absence among the ancient Hebrews of that veneration for holy places which is so eminently characteristic of modern Orientals. But there are few, if any, of the ancient sites of Palestine of whose genuineness we can feel more assured than Macpelah. The traditional spot has everything in its favour as far as position goes; while the wall which encloses the *Haram*, or sacred precinct in which the sepul-

[a] There are several considerations which may lead us to doubt whether we are warranted by the Biblical narrative in affixing a personal sense to the name of Gilead, such as the very remote period from which that name as attached to the district dates (Gen. xxxi.), and also such passages as Num. xxxii. 39, and Deut. iii. 15. (See Ewald, *Gesch.* i. 477, 478, 483.)

[a] The story of the purchase current amongst the modern Arabs of Hebron, as told by Wilson (*Lands*, &c., i. 351), is a counterpart of the legend of the stratagem by which the Phœnician Dido obtained land enough for her city of Byrsa. "Ibrahim asked only as much ground as could be covered with a cow's hide; but after the agreement was concluded he cut the hide into thongs, and surrounded the whole of the space now forming the Haram. The story is remarkable, not only for its repetition of the older Semitic tale, but for its complete departure from the simple and open character of Abraham, as set forth in the Biblical narrative. A similar story is told of other places, but, like Byrsa, their names contain something suggestive of the hide. The writer has not been able to trace any connexion of this kind in any of the names of Machpelah or Hebron.

[b] The LXX. invariably attach the name to the cave see xxiii. 19, ἐν τῷ σπηλαίῳ τοῦ ἀγροῦ τῷ διπλῷ. This is followed by Jerome

Mosque at Hebron.

ohres themselves are reported, and probably with truth, still to lie—and which is the only part at present accessible to Christians—is a monument certainly equal, and probably superior in age to anything remaining in Palestine. It is a quadrangular building of about 200 feet in length by 115 in width, its dark grey walls rising 50 or 60 in height, without window or opening of any description, except two small entrances at the S.E. and S.W. corners. It stands nearly on the crest of the hill which forms the eastern side of the valley on the slopes and bottom of which the town is strewn, and it is remarkable how this venerable structure, quite affecting in its hoary grey colour and the archaic forms of its masonry, thus rising above the meaner buildings which it has so often beheld in ruins, signifies, and so to speak accentuates, the general monotony of the town of Hebron. The ancient Jewish tradition[c] ascribes its erection to David (*Jichus ha-Aboth* in Hottinger, *Cippi Hebr.* 30), thus making it coeval with the pool in the valley below; but, whatever the worth of this tradition, it may well be of the age of Solomon,[d] for the masonry is even more antique in its character than that of the lower portion of the south and south-western walls of the *Haram* at Jerusalem, and which many critics ascribe to Solomon, while even the severest allows it to be of the date of Herod. The date must always remain a mystery, but there are two considerations which may weigh in favour of fixing it very early. 1. That often as the town of Hebron may have been destroyed, this, being a tomb, would always be spared. 2. It cannot on architectural grounds be later than Herod's time, while on the other hand it is omitted from the catalogue given by Josephus of the places which he rebuilt or adorned. Had Herod erected the enclosure round the tombs of the fathers of the nation, it is hardly conceivable that Josephus would have omitted to extol it, especially when he mentions apparently the very structure now existing. His words on this occasion are "the monuments (*μνημεῖα*) of Abraham and his sons are still to be seen in the town, all of fine stone and admirably wrought" (*πάνυ καλῆς μαρμάρου καὶ φιλοτίμως εἰργασμένα*, *B. J.* iv. 9, §7).

Of the contents of this enclosure we have only the most meagre and confused accounts. The spot is one of the most sacred of the Moslem sanctuaries, and since the occupation of Palestine by them it has been entirely closed to Christians, and partially so to Jews, who are allowed, on rare occasions only, to look in through a hole. A great part of the area is occupied by a building which is now a mosque, and was probably originally a church, but of its

[c] According to hap-Parchi (Asher's *Benj.* 437), "the stones had formerly belonged to the Temple." Ritter (*Erdkunde, Paläst.* 240) goes so far as to suggest Joseph

[d] The peculiarities of the masonry are these:—(1) Some of the stones are very large: Dr. Wilson mentions one 38 ft. long, and 3 ft. 4 in. deep. The largest in the Haram wall at Jerusalem is 24½ ft. But yet (2) the surface—in splendid preservation—is very finely worked, more so than the finest of the stones at the south and south-west portion of the enclosure at Jerusalem; the sunken part round the edges (absurdly called the "bevel") very shallow, with no resemblance at all to more modern "rustic work." (3) The cross joints are not always vertical, but some are at an angle. (4) The wall is divided by pilasters about 2 ft. 6 in. wide, and 5 ft. apart, running the entire height of the ancient wall. It is very much to be wished that careful large photographs were taken of these walls from a near point. The writer is not aware that any such yet exist

the usual style nothing is known. The sepulchres of Abraham and Sarah, Isaac and Rebekah, Jacob and Leah, are shown on the floor of the mosque, covered in the usual Mohammedan style with rich carpets; but the real sepulchres are, as they were in the 15th and 16th centuries, in a cave below the floor (Rest of Tudela: *Jichus ha-Aboth*: Monro). In this they resemble the tomb of Aaron on Mount Hor. [See vol. i. p. 824, 825.] The cave, according to the earliest and the latest testimony, opens to the south. This was the report of Monro's servant in 1853; and Arculf particularly mentions the fact that the bodies lay with their heads to the north, as they would do if deposited from the south. A belief seems to prevail in the town that the cave communicates with some one of the modern sepulchres at a considerable distance, outside of Hebron (Loewe, in *Zeitung des Judenth.* June 1, 1839).

The accounts of the sacred enclosure at Hebron will be found collected by Ritter (*Erdkunde, Palästina*, 209, &c., but especially 236-250); Wilson (*Lands, &c.*, i. 363-367); Robinson (*Bib. Res.* ii. 77-79). The chief authorities are Arculf (A.D. 700); Benjamin of Tudela (A.D. circ. 1170); the Jewish tract *Jichus ha-Aboth* (in Hottinger, *Cippi Hebraici*; and also in Wilson, i. 365); Ali Bey (*Travels*, A.D. 1807, ii. 232, 233); Giovanni Finati (*Life and Exploits*, ii. 236); Monro (*Summer Ramble in Syria*, 1853, i. 243); Loewe, in *Zeitung des Judenth.* 1839, p. 272, 288. In a note by Asher to his edition of Benjamin of Tudela (ii. 92), mention is made of an Arabic MS. in the Bibliothèque Royale at Paris, containing an account of the condition of the mosque under Saladin. This MS. has not yet been published. The travels of Ibrahim el-Khijari in 1669, 70—a small portion of which from the MS. in the Ducal Library at Gotha, has been published by Tuch, with Translation, &c. (Leipzig, Vogel, 1850), are said to contain a minute description of the Mosque (Tuch, p. 2).

A few words about the exterior, a sketch of the masonry, and a view of the town, showing the enclosure standing prominently in the foreground, will be found in Bartlett's *Walks*, &c., 216-219. A photograph of the exterior, from the East (?) is given as No. 63 of *Palestine as it is*, by Rev. G. W. Bridges. A ground-plan exhibiting considerable detail, made by two Moslem architects who lately superintended some repairs in the *Haram*, and given by them to Dr. Barclay of Jerusalem, is engraved in Osborn's *Pal. Past and Present*, p. 364. [G.]

MACRON (Μάκρων: *Macer*), the surname of Ptolemeus, or Ptolemee, the son of Dorymenes (1 Macc. iii. 38) and governor of Cyprus under Ptolemy Philometor (2 Macc. x. 12).

MAD'AI (מָדַי; Μαδαΐ: *Madai*), which occurs in Gen. x. 2, among the list of the sons of Japhet, has been commonly regarded as a personal appellative; and most commentators call Madai the third son of Japhet, and the progenitor of the Medes. But it is extremely doubtful whether, in the mind of the writer of Gen. x., the term *Madai* was regarded as representing a person. That the genealogies in the chapter are to some extent ethnic is universally allowed, and may be seen even in our Authorised Version (ver. 16 18). And as Gomer, Magog, Javan, Tubal, and Meshech, which are conjoined in Gen. x. 2 with Madai, are elsewhere in Scripture always ethnic and not personal appellatives (Ez. xxvii. 13, xxxviii. 6, xxxix. 6; Dan. viii. 21; Joel iii. 6; Ps. cxx. 5; Is. lxvi. 19, &c.), so it is probable that they stand for nations rather than persons here. In that case no one would regard Madai as a person; and we must remember that it is the exact word used elsewhere throughout Scripture for the well-known nation of the Medes. Probably therefore all that the writer intends to assert in Gen. x. 2 is, that the Medes, as well as the Gomerites, Greeks, Tibareni, Moschi, &c., descended from Japhet. Modern science has found that, both in physical type and in language, the Medes belong to that family of the human race which embraces the Cymry and the Greco-Romans. (See Prichard's *Phys Hist. of Mankind*, iv. 6–50; Ch. x. §2–4; and comp. the article on the MEDES.) [G. R.]

MADI'ABUN ('Ημαδαβούν; Alex. 'Ησουὶ 'Ημαδαβούν). The sons of Madiabun, according to 1 Esd. v. 58, were among the Levites who superintended the restoration of the Temple under Zorobabel. The name does not occur in the parallel narrative of Ezr. iii. 9, and is also omitted in the Vulgate; nor is it easy to conjecture the origin of the interpolation. Our translators followed the reading of the Aldine edition.

MA'DIAN (Μαδιάμ: *Madian*, but Cod. Amiat. of N. T. *Madiam*), Jud. ii. 26; Acts vii. 29. [MIDIAN.]

MADMAN'NAH (מַדְמֵנָה: Μαχαρελμ; Alex Βεδεβηνα:[a] *Medemena*), one of the towns in the south district of Judah (Josh. xv. 31). It is named with Hormah, Ziklag, and other remote places, and therefore cannot be identical with the MADMENAH of Isaiah. To Eusebius and Jerome (*Onomasticon*, "Medemana") it appears to have been well-known. It was called in their time Menois, and was not far from Gaza. The first stage southward from Gaza is now *el-Minyây* (Rob. i. 602), which, in default of a better, is suggested by Kiepert (in his *Map*, 1856) as the modern representative of Menois, and therefore of Madmannah.

In the genealogical lists of 1 Chron., Madmannah is derived from Caleb-ben-Hezron through his concubine Maachah, whose son Shaaph is recorded as the founder of the town (ii. 49).

For the termination compare the neighbouring place Sansannah. [G.]

MAD'MEN (מַדְמֵן:[b] σαῦσις: *silens*), a place in Moab, threatened with destruction in the denunciations of Jeremiah (xlviii. 2), but not elsewhere named, and of which nothing is yet known. [G.]

MADMEN'AH (מַדְמֵנָה:[c] Μαδεβηνᾶ: *Medemena*), one of the Benjamite villages north of Jerusalem, the inhabitants of which were frightened away by the approach of Sennacherib along the northern road (Is. x. 31). Like others of the places mentioned in this list, Madmenah is not elsewhere named; for to MADMANNAH and MADMEN it can have no relation. Gesenius (*Jesaia*, 414) points out that the verb in the sentence is

[a] See the change of ם into ב, unusual in the Alex. MS., which usually follows the Hebrew more closely than the ordinary LXX. text: compare also MADMENAH.

[b] The LXX. have translated the name as if from the root with the verb which accompanies it—מָדַמְּנִי, σαῦσιν σαύσεται: in which they are followed by the Vulgate—but the roots, though similar, are really distinct. (See Gesenius, *Thes.* 344*a*, 345*a*.)

[c] For the change of ם into ב comp. MADMANNAH.

active—"Madmenah flies," not, as in A. V., "is removed" (so also Michaelis, *Bibel für Ungelehrten*).

Madmenah is not impossibly alluded to by Isaiah (xxv. 10) in his denunciation of Moab, where the word rendered in A. V. "dunghill" is identical with that name. The original text (or *Cethîb*), by a variation in the preposition (בְּמוֹ for בְּמֵי), reads the "waters of Madmenah." If this is so, the reference may be either to the Madmenah of Benjamin—one of the towns in a district abounding with corn and threshing-floors—or more appropriately still to MADMEN, the Moabite town. Gesenius (*Jesaia*, 786) appears to have overlooked this, which might have induced him to regard with more favour a suggestion which seems to have been first made by Joseph Kimchi. [G.]

MADNESS. The words rendered by "mad," "madman," "madness," &c., in the A. V., vary considerably in the Hebrew of the O. T. In Deut. xxviii. 28, 34, 1 Sam. xxi. 13, 14, 15, &c. (*μανία*, &c., in the LXX.), they are derivatives of the root שָׁגַע, "to be stirred or excited;" in Jer. xxv. 16, l. 38, li. 7, Eccl. i. 17, &c. (*περιφορά*, LXX.), from the root הָלַל, "to flash out," applied (like the Greek *φλέγειν*) either to light or sound; in Is. xliv. 25, from סָכַל, "to make void or foolish" (*μωραίνειν*, LXX.); in Zech. xii. 4, from תָּעָה, "to wander" (*ἔκστασις*, LXX.). In the N. T. they are generally used to render *μαίνεσθαι* or *μανία* (as in John x. 20; Acts xxvi. 24; 1 Cor. xiv. 23); but in 2 Pet. ii. 16 the word is *παραφρονία*, and in Luke vi. 11 *ἄνοια*. These passages show that in Scripture "madness" is recognised as a derangement, proceeding either from weakness and misdirection of intellect, or from ungovernable violence of passion; and in both cases it is spoken of, sometimes as arising from the will and action of man himself, sometimes as inflicted judicially by the hand of God. In one passage alone (John x. 20) is madness expressly connected with demoniacal possession, by the Jews in their cavil against our Lord [see DEMONIACS]; in none is it referred to any physical causes. It will easily be seen how entirely this usage of the word is accordant to the general spirit and object of Scripture, in passing by physical causes, and dwelling on the moral and spiritual influences, by which men's hearts may be affected, either from within or from without.

It is well known that among Oriental, as among most semi-civilised nations, madmen were looked upon with a kind of reverence, as possessed of a quasi-sacred character. This arises partly no doubt from the feeling, that one, on whom God's hand is laid heavily, should be safe from all other harm; but partly also from the belief that the loss of reason and self-control opened the mind to supernatural influence, and gave it therefore a supernatural sacredness. This belief was strengthened by the enthusiastic expression of idolatrous worship (see 1 K. xviii. 26, 28), and (occasionally) of real inspiration (see 1 Sam. xix. 21-24; comp. the application of "mad fellow" in 2 K. ix. 11, and see Jer. xxix. 26; Acts ii. 13). An illustration of it may be seen in the record of David's pretended madness at the court of Achish (1 Sam. xxi. 13-15), which shows it to be not inconsistent with a kind of contemptuous forbearance, such as is often manifested now, especially by the Turks, towards real or supposed madmen. [A. B.]

MA'DON (מָדוֹן: *Μαρρών*; Alex. *Μαδών Μαρών*: *Madon*), one of the principal cities of Canaan before the conquest. Its king joined Jabin and his confederates in their attempt against Joshua at the waters of Merom, and like the rest was killed (Josh. xi. 1, xii. 19). No later mention of it is found, and beyond the natural inference drawn from its occurrence with Hazor, Shimron, &c., that it was in the north of the country, we have no clue to its position. Schwarz (90) proposes to discover Madon at *Kefr Menda*, a village with extensive ancient remains, at the western end of the Plain of *Buttauf*, 4 or 5 miles N. of Sepphoris. His grounds for the identification are of the slightest: (*a*) the frequent transposition of letters in Arabic, and (*b*) a statement of the early Jewish traveller Isaphi (Asher's *Benj. of Tudela*, 430), that the Arabs identify Kefar Mendi with "Midian," or, as Schwarz would read it, Madon. The reader may judge for himself what worth there is in these suggestions.

In the LXX. version of 2 Sam. xxi. 20 the Hebrew words אִישׁ מָדוֹן, "a man of stature," are rendered *ἀνὴρ Μαδών*, "a man of Madon." This may refer to the town Madon, or may be merely an instance of the habit which these translators had of rendering literally in Greek letters Hebrew words which they did not understand. Other instances will be found in 2 K. vi. 8, ix. 13, xii. 9, xv. 10, &c. &c. [G.]

MAELUS (*Μαῆλος*: *Michelus*), for MIAMIN (1 Esd. ix. 26; comp. Ezr. x. 25).

MAG'BISH (מַגְבִּישׁ: *Μαγεβίς*: *Megbis*). A proper name in Ezr. ii. 30, but whether of a man or of a place is doubted by some; it is probably the latter, as all the names from Ezr. ii. 20 to 34, except Elam and Harim, are names of places. The meaning of the name too, which appears to be "freezing" or "congealing," seems better suited to a place than a man. One hundred and fifty-six of its inhabitants, called the children of Magbish, are included in the genealogical roll of Ezr. ii., but have fallen out from the parallel passage in Neh. vii. MAGPIASH, however, is named (Neh. x. 20) as one of those who sealed to the covenant, where Anathoth and Nebo (Nebai) also appear in the midst of proper names of men. Why in these three cases the names of the places are given instead of those of the family, or house, or individual, as in the case of all the other signatures, it is impossible to say for certain, though many reasons might be guessed. From the position of Magbish in the list in Ezr. ii., next to Bethel, Ai, and Nebo, and before Lod, Hadid, Ono, and Jericho, it would seem to be in the tribe of Benjamin. [A. C. H.]

MAG'DALA (*Μαγαδάν*[a] in MSS. B, D, and Sinait.—A being defective in this place; but Rec. Text, *Μαγδαλά*: Syr. *Magedun*: Vulg. *Magedan*).

The name Magdala does not really exist in the Bible. It is found in the received Greek text and the A. V. of Matt. xv. 39 only; but the chief MSS. and versions exhibit the name as Magadan.

[a] It is not necessary to do more than mention the hypothesis of Brocardus, who identifies Magedan and Dalmanutha with the well known circular pool called Phiala (or, as he calls it, Syala), east of Banias, which he says the Saracens call Me-Dan, or water of Dan. (See Brocardus, *Descr.* cap. iii.)

into the limits[a] of Magadan Christ came by land, over the lake of Gennesareth, after His miracle of feeding the four thousand on the mountain of the eastern side (Matt. xv. 39); and from thence, after a short encounter with the Pharisees and Sadducees, He returned in the same boat to the opposite shore. In the present text of the parallel narrative of St. Mark (viii. 10) we find the "parts of Dalmanutha," though in the time of Eusebius and Jerome the two were in agreement, both reading Magedan, as Mark still does in Codex D. They place it "round Gerasa" (*Onomasticon*, sub voce), and if the MAGED or MAKED of Maccabees; but this is at variance with the requirements of the narrative, which indicates a place close to the water, and on its western side. The same, as far as distance is concerned, may be said of Megiddo—in its Greek form, Mageddo, or, as Josephus spells it, Magedo—which, as a well-known locality of Lower Galilee, might not unnaturally suggest itself.

Dalmanutha was probably at or near *Ain el-Barideh*, about a mile below *el-Mejdel*, on the western edge of the lake of Gennesareth. *El-Mejdel* is faceless the representative of an ancient Migdol or Magdala, possibly that from which St. Mary came. Her native place was possibly not far distant from the Magadan of our Lord's history, and we can only suppose that, owing to the familiar recurrence of the word **Magdalene**, the less known name was absorbed in the better, and Magdala usurped the name, and possibly also the position of Magadan. At any rate it has prevented any search being made for the name, which may very possibly still be discovered in the country, though so strangely superseded in the records.[b]

The **Magdala** which conferred her name on "Mary the Magdal-ene" (**M. ἡ Μαγδαληνή**), one of the numerous Migdols, *i. e.* towers, which stood in Palestine—such as the MIGDAL-EL, or tower of God, in Naphtali, and Migdal-Gad of Judah—was probably the place of that name which is mentioned in the Jerusalem Talmud as near Tiberias (Otho, *Lex. Rabb.* 353; Schwarz, 189), and this again is as probably the modern *el-Mejdel*, "a miserable little Muslim village," rather more than an hour, or about three miles,[c] from *Tubariyeh*, lying on the water's edge at the south-east corner of the plain of Gennesareth (Ritt. ii. 396, 397). Professor Stanley's description seems to embrace every point worth notice. "Of all the numerous towns and villages in what must have been the most thickly peopled district of Palestine one only remains. A collection of a few hovels stands at the south-east corner of the plain of Gennesareth, its name hardly altered from the ancient Magdala or Migdol, so called probably from a watch-tower, of which ruins appear to remain, that guarded the entrance to the plain. Through its connexion with her whom the long opinion of the Church identified with the penitent sinner, the name of that ancient tower has now been incorporated into all the languages of Europe. A large solitary thorn-tree stands beside it. The situation, otherwise unmarked, is dignified by the high limestone rock which overhangs it on the south-west, perforated with caves; recalling, by a curious though doubtless unintentional coincidence, the scene of Coreggio's celebrated picture." These caves are said by Schwarz (189)—though on no clear authority—to bear the name of Teliman, *i. e.* Talmanutha. "A clear stream rushes past the rock into the sea, issuing in a tangled thicket of thorn and willow from a deep ravine at the back of the plain" (*S. & P.* 382, 383). Jerome, although he plays upon the name Magdalene—"recte vocatam Magdalenen, id est Turritam, ob ejus singularem fidei ac ardoris constantiam"—does not appear to connect it with the place in question. By the Jews the word מגדלא is used to denote a person who platted or twisted hair, a practice then much in use amongst women of loose character. A certain "Miriam Magdala" is mentioned by the Talmudists, who is probably intended for St. Mary. (See Otho, *Lex. Rabb.* "Maria;" and Buxtorf, *Lex. Talm.* 389, 1459.) Magdalum is mentioned as between Tiberias and Capernaum, as early as by Willibald, A.D. 722; since that time it is occasionally named by travellers, amongst others Quaresmius, *Elucidatio*, 866; Sir R. Guylforde, *Pylgrymage*; Breydenbach, p. 29; Bonar, *Land of Promise*, 433, 434, and 549. Buchanan (*Clerical Furlough*, 375) describes well the striking view of the northern part of the lake which is obtained from *el-Mejdel*.—A ruined site called *Om Moghdala* is pointed out at about 2 hours S. of Jerusalem, apparently N.W. of Bethlehem (Tobler, *3tte Wand.* 81).

[H. B. H.]

MAG'DIEL (מַגְדִּיאֵל: **Μαγεδιήλ**, in Chron. **Μεδιήλ**; Alex. **Μεσοδιήλ**: *Magdiel*). One of the "dukes" of Edom, descended from Esau (Gen. xxxvi. 43; 1 Chr. i. 54). The name does not yet appear to have been met with, as borne by either tribe or place.

MA'GED (**Μακέδ**, in both MSS.: *Mageth*), the form in which the name **MAKED** appears in the A. V. on its second occurrence (1 Macc. v. 36).

MAGI (A.V. "wise men:" **Μάγοι**: *magi*). It does not fall within the scope of this article to enter fully into the history of the Magi as an order, and of the relation in which they stood to the religion of Zoroaster. Only so far as they come within the horizon of a student of the Bible, and present points of contact with its history and language, have they any claim for notice in this place. As might be expected, where two forms of faith and national life run on, for a long period, side by side, each maintaining its distinctness, those points are separated from each other by wide intervals, and it is hard to treat of them with any apparent continuity. What has to be said will be best arranged under the four following heads:—

I. The position occupied by the Magi in the history of the O. T.

II. The transition-stages in the history of the word and of the order between the close of the O. T. and the time of the N. T., so far as they affect the latter.

III. The Magi as they appear in the N. T.

IV. The later traditions which have gathered round the Magi of Matt. ii.

[a] Or *coasts*. Thus the present *el-Mejdel*—whether identical with Magadan or Magdala or not—is surrounded by the *land el-Mejdel* (Wilson, *Lands*, ii. 136).

[b] The original form of the name may have been Migdal; at least so we may infer from the LXX version of Kgam, which is Magado or Magdon.

[c] The statement of the Talmud is, that a person passing by Magdala could hear the voice of the crier in Tiberias. At three miles' distance this would not be impossible in Palestine, where sound travels to a distance far greater than in this country. (See Rob. iii. 17; Stanley *S. & P.*; Thomson, *Land and Book.*)

I. In the Hebrew text of the O. T. the word occurs but twice, and then only incidentally. In Jer. xxxix. 3 and 13 we meet, among the Chaldaean officers sent by Nebuchadnezzar to Jerusalem, one with the name or title of Rab-Mag (רַב־מָג). This word is interpreted, after the analogy of Rab-shakeh and Rab-saris, as equivalent to chief of the Magi (Ewald, *Propheten*, and Hitzig, *in loc.*, taking it as the title of Nergal-Sharezer), and we thus find both the name and the order occupying a conspicuous place under the government of the Chaldaeans. Many questions of some difficulty are suggested by this fact.

Historically the Magi are conspicuous chiefly as a Persian religious caste. Herodotus connects them with another people by reckoning them among the six tribes of the Medes (i. 101). They appear in his history of Astyages as interpreters of dreams (i. 120), the name having apparently lost its ethnological and acquired a caste significance. But in Jeremiah they appear at a still earlier period among the retinue of the Chaldaean king. The very word Rab-Mag (if the received etymology of Magi be correct) presents a hybrid formation. The first syllable is unquestionably Semitic, the last is all but unquestionably Aryan.[a] The problem thus presented admits of two solutions:—(1) If we believe the Chaldaeans to have been a Hamitic people, closely connected with the Babylonians [CHALDAEANS], we must then suppose that the colossal schemes of greatness which showed themselves in Nebuchadnezzar's conquests led him to gather round him the wise men and religious teachers of the nations which he subdued, and that thus the sacred tribe of the Medes rose under his rule to favour and power. His treatment of those who bore a like character among the Jews (Dan. i. 4) makes this hypothesis a natural one; and the alliance which existed between the Medes and the Chaldaeans at the time of the overthrow of the old Assyrian empire would account for the intermixture of religious systems belonging to two different races. (2) If, on the other hand, with Renan (*Histoire des Langues Semitiques*, pp. 66, 67), following Lassen and Ritter, we look on the Chaldaeans as themselves belonging to the Aryan family, and possessing strong affinities with the Medes, there is even less difficulty in explaining the presence among the one people of the religious teachers of the other. It is likely enough, in either case, that the simpler Median religion which the Magi brought with them, corresponding more or less closely to the faith of the Zendavesta, lost some measure of its original purity through this contact with the darker superstitions of the old Babylonian population. From this time onward it is noticeable that the names both of the Magi and Chaldaeans are identified with the astrology, divination, interpretation of dreams, which had impressed themselves on the prophets of Israel as the most characteristic features of the old Babel-religion (Is. xliv. 25, xlvii. 13). The Magi took their places among 'the astrologers and star-gazers and monthly prognosticators.'

It is with such men that we have to think of Daniel and his fellow-exiles as associated. They are described as "ten times wiser than all the magicians (LXX. *μάγους*) and astrologers" (Dan. i. 20). Daniel himself so far sympathises with the order into which he is thus, as it were, enrolled, as to intercede for them when Nebuchadnezzar gives the order for their death (Dan. ii. 24), and accepts an office which, as making him "master of the magicians,[b] astrologers, Chaldaeans, soothsayers" (Dan. v. 11), was probably identical with that of the Rab-Mag who first came before us. May we conjecture that he found in the belief which the Magi had brought with them some elements of the truth that had been revealed to his fathers, and that the way was thus prepared for the strong sympathy which showed itself in a hundred ways when the purest Aryan and the purest Semitic faiths were brought face to face with each other (Dan. vi. 3, 16, 26; Ezr. i. 1-4; Is. xliv. 28), agreeing as they did in their hatred of idolatry and in their acknowledgment of the "God of Heaven"?

The name of the Magi does not meet us in the Biblical account of the Medo-Persian kings. If, however, we identify the Artaxerxes who stops the building of the Temple (Ezr. iv. 17-22) with the Pseudo-Smerdis of Herodotus [ARTAXERXES] and the Gomates of the Behistun inscription, we may see here also another point of contact. The Magian attempt to reassert Median supremacy, and with it probably a corrupted Chaldaized form of Magianism, in place of the purer faith in Ormuzd of which Cyrus had been the propagator,[c] would naturally be accompanied by antagonism to the people whom the Persians had protected and supported. The immediate renewal of the suspended work on the triumph of Darius (Ezr. iv. 24, v. 1, 2, vi. 7, 8 falls in, it need hardly be added, with this hypothesis. The story of the actual massacre of the Magi throughout the dominions of Darius, and of the commemorative Magophonia (Herod. iii. 79, with whatever exaggerations it may be mixed up) indicates in like manner the triumph of the Zoroastrian system. If we accept the traditional date of Zoroaster as a contemporary of Darius, we may see in the changes which he effected a revival of the older system.[d] It is at any rate striking that the

[a] In the Pehlvi dialect of the Zend, Mogh = priest (Hyde, *Relig. Vet. Pers.* c. 31); and this is connected by philologists with the Sanskrit, *mahat* (great), *μέγας*, and *magnus* (Gesenius, *s. v.* מָג; Anquetil du Perron's *Zendavesta*, ii. 555). The coincidence of a Sanskrit *máya*, in the sense of "illusion, magic," is remarkable; but it is probable that this, as well as the analogous Greek word, is the derived, rather than the original meaning (comp. Eichhoff, *Vergleichung der Sprache*, ed. Kaltschmidt, p. 231). Hyde (*l. c.*) notices another etymology, given by Arabian authors, which makes the word = cropt-eared (*parvis auribus*), but rejects it. Prideaux, on the other hand (*Connexion*, under B. C. 522), accepts it, and seriously connects it with the story of the Pseudo-Smerdis who had lost his ears in Herod. iii. 69. Spanheim (*Dub. Evang.* xviii.) speaks favourably, though not decisively, of a Hebrew etymology

[b] רַב חַרְטֻמִּין; *ἀρχοντα ἐπαοιδῶν μάγων*, LXX.

[c] Comp. Sir Henry Rawlinson's translation of the Behistun inscription: "The rites which Gomates the Magian had introduced I prohibited. I restored to the state the chants, and the worship, and to those families which Gomates the Magian had deprived of them" (*Journal of Asiatic Soc.*, vol. x., and Blakesley's *Herodotus*, Excurs. on iii. 74).

[d] The opinion that Zoroaster (otherwise Zerdusht or Zarathrust) and his work belonged to the 6th century B.C. rests chiefly on the mention in his life and in the Zendavesta of a king Gustasp, who has been identified with Hystaspes, the father of Darius (Hyde, c. 24; Du Perron, *Zendavesta*, i. 29). On the other hand, the name of Zoroaster does not appear in any of the monumental or historical notices of Darius; and Bactria, rather than Persia, appears as the scene of his labours. The Magi at any rate, appear as a distinct order, and with a definite

word Magi does not appear in the Zendavesta, the priests being there described as Atharva (Guardians of the Fire), and that there are multiplied prohibitions in it of all forms of the magic which, in the West, and possibly in the East also, took its name from them, and with which, it would appear, they had already become tainted. All such arts, auguries, necromancy, and the like, are looked on as evil, and emanating from Ahriman, and are pursued by the hero-king Feridoun with the most persistent hostility (Du Perron, *Zendavesta*, vol. i. part 2, p. 268, 424).

The name, however, kept its ground, and with it probably the order to which it was attached. Under Xerxes the Magi occupy a position which indicates that they had recovered from their temporary depression. They are consulted by him as soothsayers (Herod. vii. 19), and are as influential as they had been in the court of Astyages. They prescribe the course and terrible sacrifices at the Strymon and the Nine Ways (Herod. vii. 114). They were said to have urged the destruction of the temples of Greece (Cic. *De Legg.* ii. 10). Traces of their influence may perhaps be seen in the regard paid by Mardonius to the oracles of the Greek god that offered the nearest analogue to their own Mithras (Herod. viii. 134), and in the like reverence which had previously been shown by the *Median* Datis towards the island of Delos (Herod. vi. 97). They come before the Greeks as the representatives of the religion of the Persians. No sacrifices may be offered unless one of their order is present chanting the prescribed prayers, as in the ritual of the Zendavesta (Herod. i. 132). No great change is traceable in their position during the decline of the Persian monarchy. The position of Judaea as a Persian province must have kept up some measure of contact between the two religious systems. The histories of Esther and Nehemiah point to the influence which might be exercised by members of the subject-race. It might well be that the religious minds of the two nations would learn to respect each other, and that some measure of the prophetic hopes of Israel might mingle with the belief of the Magi. As an order they perpetuated themselves under the Parthian kings. The name rose to fresh honour under the Sassanidae. The classification which was ascribed to Zoroaster was recognised as the basis of a hierarchical system, after other and lower elements had mingled with the earlier religion, and might be traced even in the religion and worship of the Parsees. According to this arrangement the Magi were divided—by a classification which has been compared to that of bishops, priests, and deacons—into disciples (Harbeds), teachers (Mobeds[a]), and the more perfect teachers of a higher wisdom (Destur Mobeds). This too will connect itself with a tradition further on (Vend. c. 28; Du Perron, *Zendavesta*, ii. 555).

II. In the meantime the word was acquiring a new and wider signification. It presented itself to the Greeks as connected with a foreign system of divination, and the religion of a foe whom they had conquered, and it soon became a bye-word for the worst form of imposture. The rapid growth of this feeling is traceable perhaps in the meanings attached to the word by the two great tragedians. In Aeschylus (*Persae*, 291) it retains its old significance as denoting simply a tribe. In Sophocles (*Oed. Tyr.* 387) it appears among the epithets of reproach which the king heaps upon Teiresias. The fact, however, that the religion with which the word was associated still maintained its ground as the faith of a great nation, kept it from falling into utter disrepute, and it is interesting to notice how at one time the good, and at another the bad, side of the word is uppermost. Thus the *μαγεία* of Zoroaster is spoken of with respect by Plato as a *θεῶν θεραπεία*, forming the groundwork of an education which he praises as far better than that of the Athenians (*Alcib.* i. p. 122 *a*). Xenophon, in like manner, idealises the character and functions of the order (*Cyrop.* iv. 5, §16; 6, §6). Both meanings appear in the later lexicographers. The word Magos is equivalent to *ἀγαθέων καὶ φαρμακευτὴς*, but it is also used for the *θεοσεβὴς καὶ θεόλογος καὶ ἱερεύς* (Hesych.). The Magi as an order are *οἱ παρὰ Περσαῖς φιλόσοφοι καὶ φιλόθεοι* (Suid.). The word thus passed into the hands of the LXX., and from them into those of the writers of the N. T., oscillating between the two meanings, capable of being used in either. The relations which had existed between the Jews and Persia would perhaps tend to give a prominence to the more favourable associations in their use of it. In Daniel (i. 20, ii. 2, 10, 27, v. 11) it is used, as has been noticed, for the priestly diviners with whom the prophet was associated. Philo, in like manner (*Quod omnis probus liber*, p. 792), mentions the Magi with warm praise, as men who gave themselves to the study of nature and the contemplation of the Divine perfections, worthy of being the counsellors of kings. It was perhaps natural that this aspect of the word should commend itself to the theosophic Jew of Alexandria. There were, however, other influences at work tending to drag it down. The swarms of impostors that were to be met with in every part of the Roman empire, known as "Chaldaei," "Mathematici," and the like, bore this name also. Their arts were "artes magicae." Though philosophers and men of letters might recognise the better meaning of which the word was capable (Cic. *De Divin.* i. 23, 41), yet in the language of public documents and of historians, they were treated as a class at once hateful and contemptible (Tacit. *Ann.* i. 32, ii. 27, xii. 22, xii. 59), and as such were the victims of repeated edicts of banishment.

III. We need not wonder accordingly to find that this is the predominant meaning of the word as it appears in the N. T. The noun and the verb derived from it (*μαγεία* and *μαγεύω*) are used by St. Luke in describing the impostor, who is therefore known distinctively as Simon Magus (Acts viii. 9). Another of the same class (Bar-jesus) is described

...ach, before this time; and his work in relation to them, if contemporary with Darius, must have been that of the restorer rather than the founder of a system. The hypothesis of two Zoroasters is hardly more than an attempt to disentangle the conflicting traditions that cluster round the name, so as to give some degree of historical credibility to each group. Most of these traditions lie outside the range of our present inquiry, but one or two come within the borders of Biblical legend, if not of Biblical history. Each in account for the truth they recognized in his person, except on the hypothesis that it had been derived from the faith of Israel, Christian and Mahometan writers have seen in him the disciple of one of the prophets of the O. T. The leper Gehazi, Baruch the friend and disciple of Jeremiah, some unnamed disciple of Ezra,—these (wild as it may sound) have, each in his turn, been identified with the Bactrian sage. His name will meet us again in connexion with the Magi of the N. T. (Hyde, *l. c.*; Prideaux, *Conn.*, a.c. 521-486).

[a] The word "Mobed," a contraction of the fuller form Magovad, is apparently identical with that which appears in Greek as Μάγος

(Acts xiii. 8) as having, in his cognomen Elymas, a title which was equivalent to Magus. [ELYMAS.]

In one memorable instance, however, the word retains (probably, at least) its better meaning. In the Gospel of St. Matthew, written (according to the general belief of early Christian writers) for the Hebrew Christians of Palestine, we find it, not as embodying the contempt which the frauds of impostors had brought upon it through the whole Roman empire, but in the sense which it had had, of old, as associated with a religion which they respected, and an order of which one of their own prophets had been the head. In spite of Patristic authorities on the other side, asserting the Μάγοι ἀπὸ ἀνατολῶν of Matt. ii. 1 to have been sorcerers whose mysterious knowledge came from below, not from above, and who were thus translated out of darkness into light (Just. Martyr, Chrysostom, Theophylact, in Spanheim, *Dub. Evang.* xix.; Lightfoot, *Hor. Heb.* in Matt. ii.) we are justified, not less by the *consensus* of later interpreters (including even Maldonatus) than by the general tenor of St. Matthew's narrative, in seeing in them men such as those that were in the minds of the LXX. translators of Daniel, and those described by Philo—at once astronomers and astrologers, but not mingling any conscious fraud with their efforts after a higher knowledge. The vagueness of the description leaves their country undefined, and implies that probably the Evangelist himself had no certain information. The same phrase is used as in passages where the express object is to include a wide range of country (comp. ἀπὸ ἀνατολῶν, Matt. viii. 11, xxiv. 27; Luke xiii. 29). Probably the region chiefly present to the mind of the Palestine Jew would be the tract of country stretching eastward from the Jordan to the Euphrates, the land of "the children of the East" in the early period of the history of the O. T. (Gen. xxix. 1; Judg. vi. 3, vii. 12, viii. 10). It should be remembered, however, that the language of the O T., and therefore probably that of St. Matthew, included under this name countries that lay considerably to the north as well as to the east of Palestine. Balaam came from "the mountains of the east," *i. e.* from Pethor on the Euphrates (Num. xxiii. 7, xxii. 5). Abraham (or Cyrus?) is the righteous man raised up "from the east" (Is. xli. 2). The Persian conqueror is called "from the east, from a far country" (Is. xlvi. 11).

We cannot wonder that there should have been very varying interpretations given of words that allowed so wide a field for conjecture. Some of these are, for various reasons, worth noticing. (1) The feeling of some early writers that the coming of the wise men was the fulfilment of the prophecy which spoke of the gifts of the men of Sheba and Seba (Ps. lxxii. 10, 15; comp. Is. lx. 6) led them to fix on Arabia as the country of the Magi (Just. Martyr, Tertullian, Epiphanius, Cyprian, in Spanheim, *Dub. Evang.* l. c.),[f] and they have been followed by Baronius, Maldonatus, Grotius, and Lightfoot. (2) Others have conjectured Mesopotamia as the great seat of Chaldaean astrology (Origen, *Hom. in Matt.* vi. and vii.), or Egypt as the country in which Magic was most prevalent (Meyer *ad loc.*). (3) The historical associations of the word led others again, with greater probability, to fix on Persia, and to see in these Magi members of the priestly order, to which the name of right belonged (Chrysostom, Theophylact, Calvin, Olshausen, while Hyde (*Rel. Pers.* l. c.) suggests Parthia, as being at that time the conspicuous eastern monarchy in which the Magi were recognised and honoured.

It is perhaps a legitimate inference from the narrative of Matt. ii. that in these Magi we may recognise, as the Church has done from a very early period, the first Gentile worshippers of the Christ. The name, by itself, indeed, applied as it is in Acts xiii. 8, to a Jewish false prophet, would hardly prove this; but the distinctive epithet "from the east" was probably intended to mark them out as different in character and race from the Western Magi, Jews, and others, who swarmed over the Roman empire. So, when they come to Jerusalem it is to ask not after "our king" or "the king of Israel," but, as the men of another race might do, after "the king of the Jews." The language of the O. T. prophets and the traditional interpretation of it are apparently new things to them.

The narrative of Matt. ii. supplies us with an outline which we may legitimately endeavour to fill up, as far as our knowledge enables us, with inference and illustration.

Some time after the birth of Jesus[g] there appeared among the strangers who visited Jerusalem these men from the far East. They were not idolaters. Their form of worship was looked upon by the Jews with greater tolerance and sympathy than that of any other Gentiles (comp. Wisd. xiii. 6, 7). Whatever may have been their country, their name indicates that they would be watchers of the stars, seeking to read in them the destinies of nations. They say that they have seen a star in which they recognise such a prognostic. They are sure that one is born King of the Jews, and they come to pay their homage. It may have been simply that the quarter of the heavens in which the star appeared indicated the direction of Judaea. It may have been that some form of the prophecy of Balaam that a "star should rise out of Jacob" (Num. xxiv. 17) had reached them, either through the Jews of the Dispersion, or through traditions running parallel with the O. T., and that this led them to recognise its fulfilment (Origen, *c. Cels.* i.; Hom. *in Num.* xiii.; but the hypothesis is neither necessary nor satisfactory; comp. Ellicott, *Hulsean Lectures*, p. 77). It may have been, lastly, that the traditional predictions ascribed to their own prophet Zoroaster, leading them to expect a succession of three deliverers, two working as prophets to reform the world and raise up a kingdom (Tavernier, *Travels*, iv. 8), the third (Zoroch

[f] This is adopted by most Romish interpreters, and is all but authoritatively recognized in the services of the Latin Church. Through the whole Octave of the Epiphany the ever-recurring antiphon is, "Reges Tharsis et insulae munera offerent. Alleluia, Alleluia. Reges Arabum et Saba dona adducent. Alleluia, Alleluia."—*Brev. Rom. in Epiph.*

[g] The discordant views of commentators and harmonists indicate the absence of any trustworthy data. The time of their arrival at Bethlehem has been fixed in each case on grounds so utterly insufficient, that it would be idle to examine them. (1) As in the Church Calendar, on the twelfth day after the nativity (Baronius, *Ann.* i. 9). (2) At some time towards the close of the forty days before the Purification (Spanheim and Stolberg). (3) Four months later (Greswell), on the hypothesis that they saw the star at the nativity, and then started on a journey which would take that time. Or (4) as an inference from Matt. ii. 16, at some time in the second year after the birth of Christ (comp. Spanheim, *Dub. Evang.* l. c.). On the attempt to find a chronological datum in the star itself, see STAR IN THE EAST; also JESUS CHRIST, vol. i. p. 1072 b.

the greatest of the three, coming to be the head of the magians, to conquer Ahriman and to raise the dead (Du Perron, *Zendav.* i. 2. p. 46; Hyde, c. 31; Ellicott, *Hulsean Lect.* l. c.), and in strange fantastic ways connecting these redeemers with the seed of Abraham (Tavernier, *l. c.*; and D'Herbelot, *Bibliot.* Orient. s. v. Zerdascht), had roused their minds to an attitude of expectancy, and that their contact with a people cherishing like hopes on stronger grounds, may have prepared them to see in a king of the Jews, the Oshanderbegha (*Homo Mundi*, ἄνθρωπος κόσμου) or the Zosiosh whom they expected. In any case they shared the "vetus et constans opinio" which had spread itself over the whole East, that the Jews, as a people, crushed and broken as they were, were yet destined once again to give a ruler to the nations. It is not unlikely that they appealed, occupying the position of Destur-Mobeds in the later Zoroastrian hierarchy, as the representatives of many others who shared the same feeling. They came, at any rate, to pay their homage to the king whose birth was thus indicated, and with the gold and frankincense and myrrh, which were the customary gifts of subject nations (comp. Gen. xliii. 11; Ps. lxxii. 15; 1 K. x. 2, 10; 2 Chr. ix. 1; Cant. iii. 6, iv. 14). The arrival of such a company, bound on so strange an errand, in the last years of the tyrannous and distrustful Herod, could hardly fail to attract notice and excite a people, many of whom Messianic expectations had already begun to show themselves (Luke ii. 25, 38). Herod was troubled, and all Jerusalem with him." The Sanhedrim was convened, and the question where the Messiah was to be born was formally placed before them. It was in accordance with the subtle, fox-like character of the king that he should pretend to share the expectations of the people, in order that he might find in what direction they pointed, and then take whatever steps were necessary to crush them [comp. HEROD]. The answer given, based upon the traditional interpretation of Mic. v. 2, that Bethlehem was to be the birthplace of the Christ, determined the king's plans. He had found out the locality. It remained to determine the time: with what was probably a result of astrology, he inquired of them diligently, when they had first seen the star. If he assumed that that was contemporaneous with the birth, he could not be far wrong. The Magi accordingly are sent on to Bethlehem, as if they were to be the forerunners of the king's own homage. As they journeyed they again saw the star, which for a time, it would seem, they had lost sight of, and it guided them on their way. [Comp. STAR IN THE EAST for this and all other questions connected with the appearance.] The pressure of the crowds, which a fortnight, or four months, or well-nigh two years before, had driven Mary and Joseph to the rude shelter of the caravanserai of Bethlehem, had apparently abated, and the Magi entering "the house" (Matt. ii. 11) fell down and paid their homage and offered their gifts. Once more they receive guidance through the channel which their work and their studies had made familiar to them. From first to last, in Media, in Babylon, in Persia, the Magi had been famous as the interpreters of dreams. That which they received now need not have involved a disclosure of the plans of Herod to them. It was enough that it directed them to "return to their own country another way." With this their history, so far as the N. T. carries us, comes to an end.

It need hardly be said that this part of the Gospel narrative has had to bear the brunt of the attacks of a hostile criticism. The omission of all mention of the Magi in a gospel which enters so fully into all the circumstances of the infancy of Christ as that of St. Luke, and the difficulty of harmonising this incident with those which he narrates, have been urged as at least throwing suspicion on what St. Matthew alone has recorded. The advocate of a "mythical theory" sees in this almost the strongest confirmation of it (Strauss, *Leben Jesu*, i. p. 272). "There must be prodigies gathering round the cradle of the infant Christ. Other heroes and kings had had their stars, and so must he. He must receive in his childhood the homage of the representatives of other races and creeds. The facts recorded lie outside the range of history, and are not mentioned by any contemporary historian." The answers to these objections may be briefly stated. (1) Assuming the central fact of the early chapters of St. Matthew no objection lies against any of its accessories on the ground of their being wonderful and improbable. It would be in harmony with our expectations that there should be signs and wonders indicating its presence. The objection therefore postulates the absolute incredibility of that fact, and begs the point at issue (comp. Trench, *Star of the Wise Men*, p. 124). (2) The question whether this, or any other given narrative connected with the nativity of Christ, bears upon it the stamp of a *mythus*, is therefore one to be determined by its own merits, on its own evidence; and then the case stands thus:—A mythical story is characterised for the most part by a large admixture of what is wild, poetical, fantastic. A comparison of Matt. ii. with the Jewish or Mahometan legends of a later time, or even with the Christian mythology which afterwards gathered round this very chapter, will show how wide is the distance that separates its simple narrative, without ornament, without exaggeration, from the overflowing luxuriance of those figments (comp. IV. below). (3) The absence of any direct confirmatory evidence in other writers of the time may be accounted for, partly at least, by the want of any full chronicle of the events of the later years of Herod. The momentary excitement of the arrival of such travellers as the Magi, or of the slaughter of some score of children in a small Jewish town, would easily be effaced by the more agitating events that followed [comp. HEROD]. The silence of Josephus is not more conclusive against this fact than it is (assuming the spuriousness of *Ant.* xviii. 4, §3) against the fact of the Crucifixion and the growth of the sect of the Nazarenes within the walls of Jerusalem.[b] (4) The more perplexing absence of all mention of the Magi

[a] It is perhaps not right to pass over the supposed testimony of heathen authors. These are found (1) in the words of Augustus, recorded by Macrobius ("It is better to be Herod's swine than his son"), as connected with the slaughter of a child under two years of age. (2) In the remarkable passage of Chalcidius (*Comment. in Timaeus*, c. 136), alluding to the star which had heralded the birth of

not of a conqueror or destroyer but of a divine and righteous king. The facts of the Gospel history may have been mixed up with (1), but the expression of Augustus does not point to anything beyond Herod's domestic tragedies. The genuineness of (2) is questionable; and both are too remote in time to be of any worth as evidence (comp W. H. Mill, *Pantheistic Principles*, p. 373)

in St. Luke's Gospel may yet receive some probable explanation. So far as we cannot explain it, our ignorance of all, or nearly all, the circumstances of the composition of the Gospels is a sufficient answer. It is, however, at least possible that St. Luke, knowing that the facts related by St. Matthew were already current among the churches,[1] sought rather to add what was not yet recorded. Something too may have been due to the leading thoughts of the two Gospels. St. Matthew, dwelling chiefly on the kingly office of Christ as the Son of David, seizes naturally on the first recognition of that character by the Magi of the East (comp. on the fitness of this Mill, *Panthcistic Principles*, p. 375). St. Luke, portraying the Son of Man in His sympathy with common men, in His compassion on the poor and humble, dwells as naturally on the manifestation to the shepherds on the hills of Bethlehem. It may be added further, that everything tends to show that the latter Evangelist derived the materials for this part of his history much more directly from the *mother* of the Lord, or her kindred, than did the former; and, if so, it is not difficult to understand how she might come to dwell on that which connected itself at once with the eternal blessedness of peace, good-will, salvation, rather than on the homage and offerings of strangers, which seemed to be the presage of an earthly kingdom, and had proved to be the prelude to a life of poverty, and to the death upon the cross.

IV. In this instance, as in others, what is told by the Gospel-writers in plain simple words, has become the nucleus for a whole cycle of legends. A Christian mythology has overshadowed that which itself had nothing in common with it. The love of the strange and marvellous, the eager desire to fill up in detail a narrative which had been left in outline, and to make every detail the representative of an idea—these, which tend everywhere to the growth of the mythical element within the region of history, fixed themselves, naturally enough, precisely on those portions of the life of Christ where the written records were the least complete. The stages of this development present themselves in regular succession.

(1) The Magi are no longer thought of as simply "wise men," members of a sacred order. The prophecies of Ps. lxxii.; Is. xlix. 7, 23, lx. 16, must be fulfilled in them, and they become princes ("reguli," Tertull. *c. Jud.* 9; *c. Marc.* 5). This tends more and more to be the dominant thought. When the arrival of the Magi, rather than the birth or the baptism of Christ, as the first of His mighty works, comes to be looked on as the great Epiphany of His divine power, the older title of the feast receives as a synonym, almost as a substitute, that of the Feast of the Three Kings. (2) The number of the Wise Men, which St. Matthew leaves altogether undefined, was arbitrarily fixed. They were three (Leo Magn. *Serm. ad Epiph.*), because they became a symbol of the mysterious Trinity (Hilary of Arles), or because then the number corresponded to the threefold gifts, or to the three parts of the earth, or the three great divisions of the human race descended from the sons of Noah (Bede *De Collect.*). (3) Symbolic meanings were found for each of the three gifts. The gold they offered as to a king. With the myrrh they prefigured the bitterness of the Passion, the embalmment for the Burial. With the frankincense they adored the divinity of the Son of God (Suicer, *Thes.* s. v. Μάγοι;[k] *Brev. Rom. in Epiph.* passim). (4) Later on, in a tradition which, though appearing in no Western writer, is traceable probably to reports brought back by pilgrims from Italy or the East, the names are added, and Gaspar, Melchior, and Balthazar, take their place among the objects of Christian reverence, and are honoured as the patron saints of travellers. The passage from Bede (*de Collect.*) is, in many ways, interesting, and as it is not commonly quoted by commentators, though often referred to, it may be worth while to give it: "Primus dicitur fuisse Melchior, qui senex et canus barbâ prolixâ et capillis, aurum obtulit regi Domino. Secundus, nomine Gaspar, juvenis imberbis rubicundus, thure, quasi Deo oblatione dignâ, Deum honoravit. Tertius fuscus, integre barbatus, Balthassar nomine, per myrrham filium hominis moriturum professus." We recognise at once in this description the received types of the early pictorial art of Western Europe. It is open to believe that both the description and the art-types may be traced to early quasi-dramatic representations of the facts of the Nativity. In any such representation names of some kind would become a matter of necessity, and were probably invented at random. Familiar as the names given by Bede now are to us, there was a time when they had no more authority than Bithisarea, Melchior, and Gathaspar (Moroni, Dizion. *s. v.* "Magi"); Magalath, Pangalath, Saracen; Appellius, Amerius, and Damascus, and a score of others (Spanheim, *Dub. Evang.* ii. p. 288).

In the Eastern Church, where, it would seem, there was less desire to find symbolic meaning than to magnify the circumstances of the history, the traditions assume a different character. The Magi arrive at Jerusalem with a retinue of 1[illegible] men, having left behind them, on the further bank of the Euphrates, an army of 7000 (Jacob. Edess. and Bar-hebraeus, in Hyde, *l. c.*). They had been led to undertake the journey, not by the star only, or by expectations which they shared with Israelites, but by a prophecy of the founder of their own faith. Zoroaster had predicted[m] that in the

[1] It will be noticed that this is altogether a distinct hypothesis from that which assumes that he had the Gospel of St. Matthew in its present form before him.

[k] This was the prevalent interpretation; but others read the symbols differently, and with coarser feeling. The gold helped the poverty of the Holy Family. The incense remedied the noisome air of the stable. The myrrh was used, it was said, to give strength and firmness to the bodies of new-born infants. (Suicer, *l. c.*).

[l] The treatise *De Collectaneis* is in fact a miscellaneous collection of memoranda in the form of question and answer. The desire to find names for those who have none given them is very noticeable in other instances as well as in that of the Magi: *e. g.*, he gives those of the penitent and impenitent thief. The passage quoted in the text is followed by a description of their dress, taken obviously either from some early painting, or from the decorations of a miracle-play (comp. the account of such performance in Trench, *Star of the Wise Men*, p. 70). His account of the offerings, it will be noticed, does not agree with the traditional hexameter of the Latin Church:—"Gaspar fert myrrham, thus Melchior, Balthasar aurum."

[m] Hyde quotes from Bar Bahlul the names of the thirteen who appear in the Eastern traditions. The three which the legends of the West have made famous are not among them.

[n] "Vos autem, O filii mei, ante omnes gentes orti ejus percepturi estis" (Abulpharagius, *Dynast. Lib.*, Hyde, p. 31).

latter days there should be a Mighty One and a Redeemer, and that his descendants should see the star which should be the herald of his coming. According to another legend (*Opus imperf. in Matt.* ii. *apud Chrysost.* t. vi. ed. Montfaucon) they came from the remotest East, near the borders of the ocean. They had been taught to expect the star by a writing that bore the name of Seth. That expectation was handed down from father to son. Twelve of the holiest of them were appointed to be ever on the watch. Their post of observation was a rock known as the Mount of Victory. Night by night they washed in pure water, and prayed, and looked out on the heavens. At last the star appeared, and in it the form of a young child bearing a cross. A voice came from it and bade them proceed to Judæa. They started on their two years' journey, and during all that time the meat and the drink with which they started never failed them. The gifts they bring are those which Abraham gave to their progenitors the sons of Keturah (this, of course, on the hypothesis that they were Arabians), which the queen of Sheba had in her turn presented to Solomon, and which had found their way back again to the children of the East (Epiphan. *in Comp. Doctr.* in Moroni, *Dizion.* l. c.). They return from Bethlehem to their own country, and give themselves up to a life of contemplation and prayer. When the twelve apostles leave Jerusalem to carry on their work as preachers, St. Thomas finds them in Parthia. They offer themselves for baptism, and become evangelists of the new faith (*Opus imperf. in Matt.* ii. *l. c.*). The pilgrim-feeling of the 4th century includes them also within its range. Among other relics supplied to meet the demands of the market which the devotion of Helena had created, the bodies of the Magi are discovered somewhere in the East, are brought to Constantinople, and placed in the great church which, as the Mosque of St. Sophia, still bears in its name the witness of its original dedication to the Divine Wisdom. The favour with which the people of Milan had received the emperor's prefect Eustorgius asked for some special mark of favour, and on his consecration as bishop of that city, he obtained for it the privilege of being the resting-place of the precious relics. There the fame of the three kings increased. The prominence given to all the feasts connected with the season of the Nativity—the transfer to that season of the mirth and joy of the old Saturnalia—the setting apart of a distinct day for the commemoration of the Epiphany in the 4th century[1]—all this added to the veneration with which they were regarded. When Milan fell into the hands of Frederick Barbarossa (A.D. 1162) the influence of the archbishop of Cologne prevailed on the emperor to transfer them to that city. The Milanese, at a later period, consoled themselves by founding a special confraternity for perpetuating the veneration for the Magi by the annual performance of a "Mystery" (Moroni, *l. c.*); but the glory of possessing the relics of the first Gentile worshippers of Christ remained with Cologne.[2] In the splendid cathedral which is the glory of Teutonic art the shrine of the Three Kings has, for six centuries, been shown as the greatest of its many treasures. The tabernacle in which the bones of some whose real name and history are lost for ever lie enshrined in honour, bears witness, in its gold and gems, to the faith with which the story of the wanderings of the Three Kings has been received. The reverence has sometimes taken stranger and more grotesque forms. As the patron-saints of travellers they have given a name to the inns of earlier or later date. The names of Melchior, Gaspar, and Balthasar were used as a charm against attacks of epilepsy (Spanheim, *Dub. Evang.* xxi.).

MAGIC, MAGICIANS. The magical arts spoken of in the Bible are those practised by the Egyptians, the Canaanites, and their neighbours, the Hebrews, the Chaldæans, and probably the Greeks. We therefore begin this article with an endeavour to state the position of magic in relation to religion and philosophy with the several races of mankind.

The degree of the civilisation of a nation is not the measure of the importance of magic in its convictions. The natural features of a country are not the primary causes of what is termed superstition in its inhabitants. With nations as with men—and the analogy of Plato in the 'Republic' is not always false—the feelings on which magic fixes its hold are essential to the mental constitution. Contrary as are these assertions to the common opinions of our time, inductive reasoning forbids our doubting them.

With the lowest race magic is the chief part of religion. The Nigritians, or blacks of this race, show this in their extreme use of amulets and their worship of objects which have no other value in their eyes but as having a supposed magical character through the influence of supernatural agents. With the Turanians, or corresponding whites of the same great family,—we use the word white for a group of nations mainly yellow, in contradistinction to black,—incantations and witchcraft occupy the same place, shamanism characterizing their tribes in both hemispheres. In the days of Herodotus the distinction in this matter between the Nigritians and the Caucasian population of north Africa was what it now is. In his remarkable account of the journey of the Nasamonian young men—the Nasamones, be it remembered, were "a Libyan race" and dwellers on the northern coast, as the historian here says,—we are told that the adventurers passed through the inhabited maritime region, and the tract occupied by wild beasts, and the desert, and at last came upon a plain with trees, where they were seized by men of small stature who carried them across marshes to a town of such men black in complexion. A great river, running from west to east and containing crocodiles, flowed by that town, and all that nation were sorcerers (ἐς τοὺς οὗτοι ἀπίκοντο ἀνθρώπους, γόητας εἶναι πάντας, ii. 32, 33). It little matters whether the conjecture that the great river was the Niger be true, which the idea adopted by Herodotus that it was the upper Nile seems to favour:[a] it is quite

[1] The institution of the Feast of the Three Kings is ascribed to Pope Julius, A.D. 336 (Moroni, *Dizion.* l. c.).

[2] For the later mediæval developments of the tradition, comp. Jos. von Hildesheim in *Quarterly Rev.* xxxv. p. 432.

[a] It is perhaps worthy of note that Æschylus calls the upper Nile ποταμὸς Αἰθίοψ, as though the great Æthiopian river (*Prom. Vinct.* 809: comp. Solin 32, 30)

evident that the Nasamones came upon a nation of Nigritians beyond the Great Desert and were struck with their fetishism. So, in our own days, the traveller is astonished at the height to which this superstition is carried among the Nigritians, who have no religious practices that are not of the nature of sorcery, nor any priests who are not magicians, and magicians alone. The strength of this belief in magic in these two great divisions of the lowest race is shown in the case of each by its having maintained its hold in an instance in which its tenacity must have been severely tried. The ancient Egyptians show their partly-Nigritian origin not alone in their physical characteristics and language but in their religion. They retained the strange low nature-worship of the Nigritians, forcibly combining it with more intellectual kinds of belief, as they represented their gods with the heads of animals and the bodies of men, and even connecting with truths which point to a primeval revelation. The Ritual, which was the great treasury of Egyptian belief and explained the means of gaining future happiness, is full of charms to be said, and contains directions for making and for using amulets. As the Nigritian goes on a journey hung about with amulets, so amulets were placed on the Egyptian's embalmed body, and his soul went on its mysterious way fortified with incantations learnt while on earth. In China, although Buddhism has established itself, and the system of Confucius has gained the power its positivism would ensure it with a highly-educated people of low type, another belief still maintains itself which there is strong reason to hold to be older than the other two, although it is usually supposed to have been of the same age as Confucianism; in this religion magic is of the highest importance, the distinguishing characteristic by which it is known.

With the Shemites magic takes a lower place. Nowhere is it even part of religion; yet it is looked upon as a powerful engine, and generally unlawful or lawful according to the aid invoked. Among many of the Shemite peoples there linger the remnants of a primitive fetishism. Sacred trees and stones are reverenced from an old superstition, of which they do not always know the meaning, derived from the nations whose place they have taken. Thus fetishism remains, although in a kind of fossil state. The importance of astrology with the Shemites has tended to raise the character of their magic, which deals rather with the discovery of supposed existing influences than with the production of new influences. The only direct association of magic with religion is where the priests, as the educated class, have taken the functions of magicians; but this is far different from the case of the Nigritians, where the magicians are the only priests. The Shemites, however, when depending on human reason alone, seem never to have doubted the efficacy of magical arts, yet recourse to their aid was not usually with them the first idea of a man in doubt. Though the case of Saul cannot be taken as applying to the whole race, yet, even with the heathen Shemites, prayers must have been held to be of more value than incantations.

The Iranians assign to magic a still less important position. It can scarcely be traced in the relics of old nature-worship, which they with greater skill than the Egyptians interwove with their more intellectual beliefs, as the Greeks gave the objects of reverence in Arcadia and Crete a place in poetical myths, and the Scandinavians animated the last remains of primitive superstition. The character the ancient belief is utterly gone with the assignm of new reasons for the reverence of its sacred object Magic always maintained some hold on most minds; but the stronger intellects despised it like the Roman commander who threw the sacre chickens overboard, and the Greek who defied adverse omen at the beginning of a great battl When any, oppressed by the sight of the calamities of mankind, sought to resolve the myste rious problem, they fixed, like Æschylus, not upo the childish notion of a chance-government b many conflicting agencies, but upon the noble idea of a dominating fate. Men of highly sensitive temperaments have always inclined to a belief i magic, and there has therefore been a section o Iranian philosophers in all ages who have paid attention to its practice; but, expelled from reli gion, it has held but a low and precarious place i philosophy.

The Hebrews had no magic of their own. It was so strictly forbidden by the Law that it could never afterwards have had any recognised existence, save in times of general heresy or apostasy, and the same was doubtless the case in the patriarchal ages. The magical practices which obtained among the Hebrews were therefore borrowed from the nations around. The hold they gained was such as we should have expected with a Shemite race, making allowance for the discredit thrown upon them by the prohibitions of the Law. From the first entrance into the Land of Promise until the destruction of Jerusalem we have constant glimpses of magic practised in secret, or resorted to, not alone by the common but also by the great. The Talmud abounds in notices of contemporary magic among the Jews, showing that it survived idolatry notwithstanding their original connexion, and was supposed to produce real effects. The Kur-án in like manner treats charms and incantations as capable of producing evil consequences when used against a man.[b] It is a distinctive characteristic of the Bible that from first to last it warrants no such trust or dread. In the Psalms, the most personal of all the books of Scripture, there is no prayer to be protected against magical influences. The believer prays to be delivered from every kind of evil that could hurt the body or the soul, but he says nothing of the machinations of sorcerers. Here and everywhere magic is passed by, or if mentioned, mentioned only to be condemned (comp. Ps. cvi. 28). Let those who affirm that they see in the Psalms merely human piety, and in Job and Ecclesiastes merely human philosophy, explain the absence in them, and throughout the Scriptures, of the expression of superstitious feelings that are inherent in the Shemite mind. Let them explain the luxuriant growth in the after-literature of the Hebrews and Arabs, and notably in the Talmud and the Kur-án, of these feelings with no root in those older writings from which that after-literature was derived. If the Bible, the Talmud, and the Kur-án, be but several expressions of the Shemite mind, differing only through the effect of time, how can this contrast be accounted for?—the very opposite of what obtains elsewhere; for superstitions are generally strongest in the earlier lite

[b] The 113th chapter of the Kur-án was written when Mohammad believed that the magical practices of certain persons had affected him with a kind of rheumatism.

nature of a race, and gradually fade, excepting a confusion of barbarism restore their vigour. Those who see in the Bible a Divine work can understand how a God-taught preacher could throw aside the miserable fears of his race, and boldly tell man to trust in his Maker alone. Here, as in all matters, the history of the Bible confirms its doctrine. In the doctrinal Scriptures magic is passed by with contempt, in the historical Scriptures the reasonableness of this contempt is shown. Whenever the practisers of magic attempt to combat the servants of God, they conspicuously fail. Pharaoh's magicians bow to the Divine power shown in the wonders wrought by Moses and Aaron. Balaam, the great enchanter, comes from afar to curse Israel and is forced to bless them.

In examining the mentions of magic in the Bible, we must keep in view the curious inquiry whether there be any reality in the art. We would at the outset protest against the idea, once very prevalent, that the conviction that the seen and unseen worlds were often more manifestly in contact in the Bible ages than now necessitates a belief in the reality of the magic spoken of in the Scriptures. We do indeed see a connexion of a supernatural agency with magic in such a case as that of the damsel possessed with a spirit of divination mentioned in the Acts; yet there the agency appears to have been involuntary in the damsel, and shrewdly made profitable by her employers. This does not establish the possibility of man being able at his will to use supernatural powers to gain his own ends, which is what magic has always pretended to accomplish. Thus much we premise, lest we should be thought to hold latitudinarian opinions because we treat the reality of magic as an open question.

Without losing sight of the distinctions we have drawn between the magic of different races, we shall consider the notices of the subject in the Bible in the order in which they occur. It is impossible in every case to assign the magical practice spoken of to a particular nation, or when this can be done to determine whether it be native or borrowed, and the general absence of details renders any other system of classification liable to error.

The theft and carrying away of Laban's teraphim (תְּרָפִים) by Rachel, seems to indicate the practice of magic in Padan-aram at this early time. It appears that Laban attached great value to these objects, from what he said as to the theft and his determined search for them (Gen. xxxi. 19, 30, 32-35). It may be supposed from the manner in which they were hidden that these teraphim were not very small. The most important point is that Laban calls them his "gods" (ibid. 30, 32), although he was not without belief in the true God (24, 49-53); for this makes it almost certain that we have here not an indication of the worship of strange gods, but the first notice of a superstition that afterwards obtained among those Israelites who added corrupt practices to the true religion.[e] The derivation of the name teraphim is extremely obscure. Gesenius takes it from an "unused" root, רָפָה, which he supposes, from the Arabic, probably signified "to live pleasantly" (*Thes.* s. v.). It may, however, be reasonably conjectured that such a root would have had, if not in Hebrew, in the language whence the Hebrews took it or its derivative, the proper meaning "to dance," corresponding to this, which would then be its tropical meaning.[d] We should prefer, if no other derivation be found, to suppose that the name teraphim might mean "dancers" or "causers of dancing," with reference either to primitive nature-worship[e] or its magical rites of the character of shamanism, rather than that it signifies, as Gesenius suggests, "givers of pleasant life." There seems, however, to be a cognate word, unconnected with the "unused" root just mentioned, in ancient Egyptian, whence we may obtain a conjectural derivation. We do not of course trace the worship of teraphim to the sojourn in Egypt. They were probably those objects of the pre-Abrahamite idolatry, put away by order of Jacob (Gen. xxxv. 2-4), yet retained even in Joshua's time (Josh. xxiv. 14); and, if so, notwithstanding his exhortation, abandoned only for a space (Judg xvii., xviii.); and they were also known to the Babylonians, being used by them for divination (Ez. xxi. 21). But there is great reason for supposing a close connexion between the oldest language and religion of Chaldæa, and the ancient Egyptian language and religion. The Egyptian word TER signifies "a shape, type, transformation,"[f] and has for its determinative a mummy: it is used in the Ritual, where the various transformations of the deceased in Hades are described (*Todtenbuch*, ed. Lepsius, ch. 76 *seq*). The small mummy-shaped figure, SHEBTEE, usually made of baked clay covered with a blue vitreous varnish, representing the Egyptian as deceased, is of a nature connecting it with magic, since it was made with the idea that it secured benefits in Hades;

[a] Laban's expression in Gen. xxx. 27, "I have augured" וְנִחַשְׁתִּי may refer to divination; but the context makes it more reasonable not to take it in a literal sense.

[d] The Arabic root رَقَصَ certainly means "he abounded in the comforts of life," and the like, but the corresponding ancient Egyptian word TERF or TREF, "to dance," suggests that this is a tropical signification, especially as in the Indo-European languages, if our "to trip" preserve the proper sense and the Sanskrit *trip* and the Greek τρέπω the tropical sense of the root, we have the same word with the two meanings. We believe also that, in point of age, precedence should be given to the ancient Egyptian word before the Semitic, and that in the former instance an objective sense is always the proper sense, as a subjective the tropical, when a word is used in both significations. We think that this principle is equally true of the Semitic group, although it may be contested with reference to the Indo-European languages.

[e] In the fragments ascribed to Sanchoniatho, which, whatever their age and author, cannot be doubted to be genuine, the Baetulia are characterised in a manner that illustrates this supposition. The Baetulia, it must be remembered, were sacred stones, the reverence of which in Syria in the historical times was a relic of the early low nature-worship with which fetishism or shamanism is now everywhere associated. The words used, ἐπενόησε θεὸς Οὐρανὸς Βαιτύλια, λίθους ἐμψύχους μηχανησάμενος (Cory, *Anc. Frag.* p. 12), cannot be held to mean more than that Uranus contrived living stones, but the idea of contriving and the term "living" imply motion in these stones.

[f] Egyptologists have generally read this word TER. Mr. Birch, however, reads it CHEFER (SHEPER according to the writer's system of transcription). The balance is decided by the discovery of the Coptic equivalent ϫⲟⲣϩ "transmutare," in which the absence of the final R is explained by a peculiar but regular modification which the writer was the first to point out (HIEROGLYPHICS, *Encyclopædia Britannica*, 8th ed. p. 421).

and it is connected with the word TER, for it represents a mummy, the determinative of that word, and was considered to be of use in the state in which the deceased passed through transformations, TERU. The difficulty which forbids our doing more than conjecture a relation between TER and teraphim is the want in the former of the third radical of the latter; and in our present state of ignorance respecting the ancient Egyptian and the primitive language of Chaldaea in their *verbal* relations to the Semitic family it is impossible to say whether it is likely to be explained. The possible connexion with the Egyptian religious magic is, however, not to be slighted, especially as it is not improbable that the household idolatry of the Hebrews was ancestral worship, and the SHEBTEE was the image of a deceased man or woman, as a mummy, and therefore as an Osiris, bearing the insignia of that divinity, and so in a manner as a deified dead person, although we do not know that it was used in the ancestral worship of the Egyptians. It is important to notice that no singular is found of the word teraphim, and that the plural form is once used where only one statue seems to be meant (1 Sam. xix. 13, 16): in this case it may be a "plural of excellence." If the latter inference be true, this word must have become thoroughly Semiticized. There is no description of these images; but from the account of Michal's stratagem to deceive Saul's messengers, it is evident, if only one image be there meant, as is very probable, that they were at least sometimes of the size of a man, and perhaps in the head and shoulders, if not lower, of human shape, or of a similar form (*Id.* 13-16).

The worship or use of teraphim after the occupation of the Promised Land cannot be doubted to have been one of the corrupt practices of those Hebrews who leant to idolatry, but did not abandon their belief in the God of Israel. Although the Scriptures draw no marked distinction between those who forsook their religion and those who added to it such corruptions, it is evident that the latter always professed to be orthodox. Teraphim therefore cannot be regarded as among the Hebrews necessarily connected with strange gods, whatever may have been the case with other nations. The account of Micah's images in the Book of Judges, compared with a passage in Hosea, shows our conclusion to be correct. In the earliest days of the occupation of the Promised Land, in the time of anarchy that followed Joshua's rule, Micah, "a man of mount Ephraim," made certain images and other objects of heretical worship, which were stolen from him by those Danites who took Laish and called it Dan, there setting up idolatry, where it continued the whole time that the ark was at Shiloh, the priests retaining their post "until the day of the captivity of the land" (Judg. xvii., xviii., esp. 30, 31). Probably this worship was somewhat changed, although not in its essential character, when Jeroboam set up the golden calf at Dan. Micah's idolatrous objects were a graven image, a molten image, an ephod, and teraphim (xvii. 3, 4, 5, xviii. 17, 18, 20). In Hosea there is a retrospect of this period where the prophet takes a harlot, and commands her to be faithful to him "many days." It is added: "For the children of Israel shall abide many days without king, and without a prince, and without a sacrifice, and without an image [or "pillar," מַצֵּבָה], and without an ephod, and teraphim: afterward shall the children of Israel return, and seek Jehovah their God, and David their king; and shall fear Jehovah and His goodness in the latter days" (iii. esp. 4, 5). The apostate people are long to be without their spurious king and false worship, and in the end are to return to their loyalty to the house of David and their faith in the true God. That Dan should be connected with Jeroboam "who made Israel to sin," and with the kingdom which he founded is most natural; and it is therefore worthy of note that the images, ephod, and teraphim made by Micah and stolen and set up by the Danites at Dan should so nearly correspond with the objects spoken of by the prophet. It has been imagined that the use of teraphim and the similar abominations of the heretical Israelites are not so strongly condemned in the Scriptures as the worship of strange gods. This mistake arises from the mention of pious kings who did not suppress the high places, which prove only their timidity, and not any lesser sinfulness in the spurious religion than in false systems borrowed from the peoples of Canaan and neighbouring countries. The cruel rites of the heathen are indeed especially reprobated, but the heresy of the Israelite is too emphatically denounced, by Samuel in a passage to be soon examined, and in the repeated condemnation of Jeroboam the son of Nebat "who made Israel to sin," for it to be possible that we should take a view of it consistent only with modern sophistry.[a]

We pass to the magical use of teraphim. By the Israelites they were consulted for oracular answers. This was apparently done by the Danites who asked Micah's Levite to inquire as to the success of their spying expedition (Judg. xviii. 5, 6). In later times this is distinctly stated of the Israelites when Zechariah says, "For the teraphim have spoken vanity, and the diviners have seen a lie, and have told false dreams" (x. 2). It cannot be supposed that, as this first positive mention of the use of teraphim for divination by the Israelites is after the return from Babylon, and as that use obtained with the Babylonians in the time of Nebuchadnezzar, therefore the Israelites borrowed it from their conquerors; for these objects are mentioned in earlier places in such a manner that their connexion with divination must be intended, if we bear in mind that this connexion is undoubted in a subsequent period. Samuel's reproof of Saul for his disobedience in the matter of Amalek, associates "divination" with "vanity," or "idols" (אָוֶן), and "teraphim," however we render the difficult passage where those words occur (1 Sam. xv. 22, 23). (The word rendered "vanity," אָוֶן, is especially used with reference to idols, and even in some places stands alone for an idol or idols.) When Saul, having put to death the workers in black arts, finding himself rejected of God in his extremity, sought the witch of Endor, and asked to see Samuel, the prophet's apparition denounced his doom as the punishment of this very disobedience as to Amalek. The reproof would seem, therefore, to have been a prophecy that the self-

[a] Kalisch, in his Commentary on Genesis (pp. 533, 534), considers the use of teraphim as a comparatively harmless form of idolatry, and explains the passage in Hosea quoted above as meaning that the Israelites should be deprived not alone of true religion, but even of the resource of their mild household superstitions. He thus entirely misses the sense of the passage, and makes the Bible contradictory.

evident king would at the last alienate himself from God, and take refuge in the very abominations he despised. This apparent reference tends to confirm the inference we have indicated. As to a later time, when Josiah's reform is related, he is said to have put away "the wizards, and the teraphim, and the idols" (2 K. xxiii. 24); where the mention of the teraphim immediately after the wizards, and as distinct from the idols, seems to favour the inference that they are spoken of as objects used in divination.

The only account of the act of divining by teraphim is in a remarkable passage of Ezekiel relating to Nebuchadnezzar's advance against Jerusalem. "Make, thou son of man, appoint thee two ways, that the sword of the king of Babylon may come: both twain [two swords] shall come forth out of one land: and choose thou a place, choose [it] at the head of the way to the city. Appoint a way, that the sword may come to Rabbath of the Ammonites, and to Judah in Jerusalem the defenced. For the king of Babylon stood at the parting of the way, at the head of the two ways, to use divination: he shuffled arrows, he consulted with teraphim, he looked in the liver. At his right hand was the divination for Jerusalem" (xxi. 19-22). The mention together of consulting teraphim and looking into the liver, may not indicate that the victim was offered to teraphim and its liver then looked into, but may mean two separate acts of divining. That the former is the right explanation seems, however, probable from a comparison with the LXX. rendering of the account of Michal's stratagem.[h] Perhaps Michal had been divining, and on the coming of the messengers seized the image and more and hastily put them in the bed.—The accounts which the Rabbins give of divining by teraphim are worthless.

Before speaking of the notices of the Egyptian magicians in Genesis and Exodus, there is one passage that may be examined out of the regular order. Joseph, when his brethren left after their second visit to buy corn, ordered his steward to put his silver cup in Benjamin's sack, and afterwards sent him after them, ordering him to claim it, and say: "[Is] not this [it] in which my lord drinketh, and whereby indeed he divineth?"[i] (Gen. xliv. 5). The meaning of the latter clause has been contested, Gesenius translating "he could surely divine it" (ap. Barrett, *Synopsis, in loc.*), but the other rendering seems far more probable, especially as we read that Joseph afterwards said to his brethren, "Wot ye not that such a man as I can certainly divine?" (xliv. 15),—the same word being used. If so the reference would probably be to the use of the cup in divining, and we should have to infer that here Joseph was acting on his own judgment [JOSEPH],

[h] The Masoretic text reads, "And Michal took the teraphim, and laid [it] upon the bed, and the mattress of הַכָּבִיר of the goats [or goats' hair] she put at its head, and she covered [it] with a cloth" [or garment] (1 Sam. xix. 13). The LXX. has "the liver of goats," having apparently found כֶּבֶד instead of הַכָּבִיר (Καὶ ἔλαβεν ἡ Μιχὸλ τὰ σκευάφια, καὶ ἔθετο ἐπὶ τὴν κλίνην, καὶ ἧπαρ τῶν αἰγῶν ἔθετο πρὸς κεφαλῆς αὐτοῦ, καὶ ἐκάλυψεν τὰ ἱμάτια.)

[i] הֲלוֹא זֶה יִשְׁתֶּה אֲדֹנִי בּוֹ.

[j] The modern Persians apply the word Jám, signifying a cup, mirror, or even glass, to magical vessels of this kind, and relate marvels of two which they say belonged to the ancient king Jemsheed and to Alexander the Great. The former of these, called Jám-i-Jem or Jám-i-Jemsheed, is famous in Persian poetry. D'Herbelot quotes a Turkish poet who thus alludes to this belief in magical cups:—"When I shall have been illuminated by the light of heaven my soul will become the mirror of the world, in which I shall discover the most hidden secrets" (*Bibliothèque Orientale*, s. v. GIAM).

[k] *Modern Egyptians*, 5th edit. chap. xi.

[l] *Nineveh and Babylon*, p. 509, &c. There is an excellent paper on these bowls by Dr. Levy of Breslau, in the *Zeitschrift der Deutsch. Morgenländ. Gesellschaft*, ix. p. 465, &c.

[m] See the *Modern Egyptians*, 5th edit. chap. xii. for an account of the performances of this magician, and Mr. Lane's opinion as to the causes of their occasional apparent success.

divination being not alone doubtless a forbidden act, but one of which he when called before Pharaoh had distinctly disclaimed the practice. Two uses of cups or the like for magical purposes have obtained in the East from ancient times. In one use either the cup itself bears engraved inscriptions, supposed to have a magical influence,[j] or it is plain and such inscriptions are written on its inner surface in ink. In both cases water poured into the cup is drunk by those wishing to derive benefit, as, for instance the cure of diseases, from the inscriptions, which, if written, are dissolved.[m] This use, in both its forms, obtains among the Arabs in the present day, and cups bearing Chaldaean inscriptions in ink have been discovered by Mr. Layard, and probably show that this practice existed among the Jews in Babylonia in about the 7th century of the Christian era.[n] In the other use the cup or bowl was of very secondary importance. It was merely the receptacle for water, in which, after the performance of magical rites, a boy looked to see what the magician desired. This is precisely the same as the practice of the modern Egyptian magicians, where the difference that ink is employed and is poured into the palm of the boy's hand is merely accidental. A gnostic papyrus in Greek, written in Egypt in the earlier centuries of the Christian era, now preserved in the British Museum, describes the practice of the boy with a bowl, and alleges results strikingly similar to the alleged results of the well-known modern Egyptian magician, whose divination would seem, therefore, to be a relic of the famous magic of ancient Egypt.[o] As this latter use only is of the nature of divination, it is probable that to it Joseph referred. The practice may have been prevalent in his time, and hieroglyphic inscriptions upon the bowl may have given colour to the idea that it had magical properties, and perhaps even that it had thus led to the discovery of its place of concealment, a discovery which must have struck Joseph's brethren with the utmost astonishment.

The magicians of Egypt are spoken of as a class in the histories of Joseph and Moses. When Pharaoh's officers were troubled by their dreams, being in prison they were at a loss for an interpreter. Before Joseph explained the dreams he disclaimed the power of interpreting save by the Divine aid, saying, "[Do] not interpretations [belong] to God? tell me [them], I pray you" (Gen. xl. 8). In like manner when Pharaoh had his two dreams we find that he had recourse to those who professed to interpret dreams. We read: "He sent and called for all the scribes of Egypt, and all the wise men thereof: and Pharaoh told them his dream; but [there was] none that could interpret them unto Pharaoh" (xli. 8; comp. ver. 24). Joseph, being sent for on the report of the chief of the cupbearers

was told by Pharaoh that he had heard that he could interpret a dream. Joseph said, "[It is] not in me: God shall give Pharaoh an answer of peace" (ver. 16). Thus, from the expectations of the Egyptians and Joseph's disavowals, we see that the interpretation of dreams was a branch of the knowledge to which the ancient Egyptian magicians pretended. The failure of the Egyptians in the case of Pharaoh's dreams must probably be regarded as the result of their inability to give a satisfactory explanation, for it is unlikely that they refused to attempt to interpret. The two words used to designate the interpreters sent for by Pharaoh are חַרְטֻמִּים, "scribes" (?) and חֲכָמִים, "wise men."[p]

We again hear of the magicians of Egypt in the narrative of the events before the Exodus. They were summoned by Pharaoh to oppose Moses. The account of what they effected requires to be carefully examined, from its bearing on the question whether magic be an imposture. We read: "And the Lord spake unto Moses and unto Aaron, saying, When Pharaoh shall speak unto you, saying, Show a miracle for you: then thou shalt say unto Aaron, Take thy rod, and cast [it] before Pharaoh, [and] it shall become a serpent."[q] It is then related that Aaron did thus, and afterwards: "Then Pharaoh also called the wise men[r] and the enchanters:[s] now they, the scribes[t] of Egypt, did so by their secret arts:[u] for they cast down every man his rod, and they became serpents, but Aaron's rod swallowed up their rods" (Ex. vii. 8-12). The rods were probably long staves like those represented on the Egyptian monuments, not much less than the height of a man. If the word used mean here a serpent, the Egyptian magicians may have feigned a change: if it signify a crocodile they could scarcely have done so. The names by which the magicians are designated are to be noted. That which we render "scribes" seems here to have a general signification, including wise men and enchanters. The last term is more definite in its meaning, denoting users of incantations.[x] On the occasion of the first plague, the turning the rivers and waters of Egypt into blood, the opposition of the magicians again occurs. "And the scribes of Egypt did so by their secret arts" (vii. 22). When the second plague, that of frogs, was sent, the magicians again made the same opposition (viii. 7). Once more they appear in the history. The plague of lice came, and we read that when Aaron had worked the wonder the magicians opposed him: "And the scribes did so by their secret arts to bring forth the lice, but they could not: so there were lice upon man and upon beast. And the scribes said unto Pharaoh, This [is] the finger of God: but Pharaoh's heart was hardened, and he hearkened not unto them, as the Lord had said" (viii. 18, 19, Heb. 14, 15). After this we hear no more of the magicians. All we can gather from the narrative is that the appearances produced by them were sufficient to deceive Pharaoh on three occasions. It is nowhere declared that they actually produced wonders, since the expression "the scribes did so by their secret arts" is used on the occasion of their complete failure. Nor is their statement that in the wonders wrought by Aaron they saw the finger of God any proof that they recognised a power superior to the native objects of worship they invoked, for we find that the Egyptians frequently spoke of a supreme being as God. It seems rather as though they had said, "Our juggles are of no avail against the work of a divinity." There is one later mention of these transactions, which adds to our information, but does not decide the main question. St. Paul mentions Jannes and Jambres as having "withstood Moses," and says that their folly in doing so became manifest (2 Tim. iii. 8, 9). The Egyptian character of these names, the first of which is, in our opinion, found in hieroglyphics, does not favour the opinion, which seems inconsistent with the character of an inspired record, that the Apostle cited a prevalent tradition of the Jews. [JANNES AND JAMBRES.]

We turn to the Egyptian illustrations of this part of the subject. Magic, as we have before remarked, was inherent in the ancient Egyptian religion. The Ritual is a system of incantations and directions for making amulets, with the object of securing the future happiness of the disembodied soul. However obscure the belief of the Egyptians as to the actual character of the state of the soul after death may be to us, it cannot be doubted that

[p] The former word is difficult of explanation. It is to be noticed that it is also used for a class of the Babylonian *magi* (Dan. i. 20, ii. 2); so that it can scarcely be supposed to be an Egyptian word Hebraicized. Egyptian equivalents have however been sought for; and Jablonsky suggests ερχωδε, *thaumaturgus*, and Ignatius Rossi cαρεcτωδε, "guardian of secret things" (ap. Gen. *Thes.* s. v.), both of which are far too unlike the Hebrew to have any probability. To derive it from the Persian خردمند "endued with wisdom" when occurring in Daniel, is puerile, as Gesenius admits. He suggests a Hebrew origin, and takes it either from חָרַט, "a pen or stylus," and ם— formative, or supposes it to be a quadriliteral, formed from the triliteral חָרַט, the "unused" root of הָרַם, and חֲרַם "he or it was sacred." The former seems far more probable at first sight; and the latter would not have had any weight were it not for its likeness to the Greek *ἱερογραμματεύς*, used of Egyptian religious scribes; a resemblance which, moreover, loses much of its value when we find that in hieroglyphics there is no exactly corresponding expression. Notwithstanding these Hebrew derivations, Gesenius inclines to the idea that a similar Egyptian word was imitated: instancing Abrech, Moses, and behemoth (בְּהֵמוֹת, מֹשֶׁה, אַבְרֵךְ); but no one of these can be proved to be Egyptian in origin, and there is no strong ground for seeking any but a Hebrew etymology for the second and third (*Thes.* l. c.). The most similar word is Hashmannim, חַשְׁמַנִּים (Ps. lxviii. 31, Heb. 32), which we suppose to be Egyptian, meaning Hermopolites, with perhaps, in the one place where it occurs, a reference to the wisdom of the citizens of Hermopolis Magna, the city of Thoth, the Egyptian Hermes [HASHMANNIM.] We prefer to keep to the Hebrew derivation simply from חָרַט, and to read "scribes," the idea of magicians being probably understood. The other word, חֲכָמִים, does not seem to mean any special class, but merely the wise men of Egypt generally.

[q] תַּנִּין. [r] חֲכָמִים. [s] מְכַשְּׁפִים.
[t] חַרְטֻמִּים. [u] לַהֲטֻמֵיהֶם.

[x] The word לָטִים, elsewhere לְטִים (ver. 22, viii. 3, 14), signifies "secret" or "hidden arts," from לוּט (לָהַט, לָאַט), "he or it covered over, hid, or wrapped up."

the knowledge and use of the magical amulets and incantations treated of in the Ritual was held to be necessary for future happiness, although it was not believed that they alone could ensure it, since to have done good works, or, more strictly, not to have committed certain sins, was an essential condition of the acquittal of the soul in the great trial in Hades. The thoroughly magical character of the Ritual is most strikingly evident in the minute directions given for making amulets (*Todtenbuch*, ch. 100, 122, 134), and the secrecy enjoined in one case to those then occupied (133). The later chapters of the Ritual (163-165), held to have been added either the compilation or composition of the rest, on such theory, as M. Chabas has well remarked, does not prove their much more modern date (*Le Papyrus Magique Harris*, p. 162), contain mystical names not bearing an Egyptian etymology. These names have been thought to be Ethiopian; they either have no signification, and are mere magical gibberish, or else they are, mainly at least, of foreign origin. Besides the Ritual the ancient Egyptians had books of a purely magical character, such as that which M. Chabas has just edited in his work referred to above. The main source of their belief in the efficacy of magic appears to have been the idea that the souls of the dead, whether justified or condemned, had the power of revisiting the earth and taking various forms. This belief is abundantly used in the moral tale of 'The Two Brothers,' of which the text has been recently published by the Trustees of the British Museum (*Select Papyri*, Part II.), and we learn from this ancient papyrus the age and source of much of the machinery of mediæval fictions, both eastern and western. A lesson that strikes us at once in the case of a fiction is not less true of the Ritual; and the perils encountered by the soul in Hades are the first rude inventions of the adventures of the heroes of Arab and German romance. The regions of terror traversed, the mystic portals that open alone to magical words, and the monsters whom magic alone can disarm of their power to injure, are here already as the book that in part was found in the reign of King Menchres four thousand years ago. Bearing in mind the Nigritian nature of Egyptian magic, we may look for the source of these ideas in primitive Africa. There we find the realities of which the ideal form is not greatly distorted, though greatly intensified. The forests that clothe the southern slopes of snowy Atlas, full of fierce beasts; the vast desert, untenanted save by harmful reptiles, swept by sand-storms, and ever burning under an unchanging sun; the marshes of the south, teeming with brutes of vast size and strength, are the exact zones of the Egyptian Hades. The creatures of the desert and the plains and slopes, the crocodile, the pachydermata, the lion, perchance the gorilla, are the genii that hold this land of fear. In what land must the first scanty population have held dangers and enemies still feared by their swarming society. No wonder then that the imaginative Negroes were struck with a superstitious fear by certain conditions of external nature always present with races of a low type, where a higher being would only be touched by the analogies of life and death, of time and eternity. No wonder that, so struck, the primitive race imagined the evils of the unseen world to be the recurrence of those against which they struggled while on earth. That there is some ground for our theory, besides the generalisation which led us to it, is shown by the usual Egyptian name of Hades, "the West;" and that the wild regions west of Egypt might directly give birth to such fancies as form the common ground of the machinery, not the general belief, of the Ritual, as well as of the machinery of mediæval fiction, is shown by the fables that the rude Arabs of our own day tell of the wonders they have seen.

Like all nations who have practised magic generally, the Egyptians separated it into a lawful kind and an unlawful. M. Chabas has proved this from a papyrus which he finds to contain an account of the prosecution, in the reign of Rameses III., (B.C. cir. 1220) of an official for unlawfully acquiring and using magical books, the king's property. The culprit was convicted and punished with death (p. 169 seq.)

A belief in unlucky and lucky days, in actions to be avoided or done on certain days, and in the fortune attending birth on certain days, was extremely strong, as we learn from a remarkable ancient calendar (*Select Papyri*, Part I.) and the evidence of writers of antiquity. A religious prejudice, or the occurrence of some great calamity, probably lay at the root of this observance of days. Of the former the birthday of Typhon, the fifth of the Epagomenae, is an instance. Astrology was also held in high honour, as the calendars of certain of the tombs of the kings, stating the positions of the stars and their influence on different parts of the body, show us; but it seems doubtful whether this branch of magical arts is older than the xviiith dynasty, although certain stars were held in reverence in the time of the ivth dynasty. The belief in omens probably did not take an important place in Egyptian magic, if we may judge from the absence of direct mention of them. The superstition as to "the evil eye" appears to have been known, but there is nothing else that we can class with phenomena of the nature of animal magnetism. Two classes of learned men had the charge of the magical books: one of these, the name of which has not been read phonetically, would seem to correspond to the "scribes," as we render the word, spoken of in the history of Joseph; whereas the other has the general sense of "wise men," like the other class there mentioned.[y]

There are no representations on the monuments that can be held to relate directly to the practice of this art, but the secret passages in the thickness of the wall, lately opened in the great temple of Dendarah, seem to have been intended for some purpose of imposture.

The Law contains very distinct prohibitions of all magical arts. Besides several passages condemning them, in one place there is a specification which is so full that it seems evident that its object is to include every kind of magical art. The reference is to the practices of Canaan, not to those of Egypt, which indeed do not seem to have been brought away by the Israelites, who, it may be remarked, apparently did not adopt Egyptian idolatry, but only that of foreigners settled in Egypt. [REMPHAN.]

The Israelites are commanded in the place referred to not to learn the abominations of the peoples of the Promised Land. Then follows this prohibition: "There shall not be found with thee one who

[y] For the facts respecting Egyptian magic here stated we are greatly indebted to M. Chabas' remarkable work. We do not, however, agree with some of his deductions: and the theory we have put forth of the origin of Egyptian magic is nearly our own

offereth his son or his daughter by fire, a practiser of divinations (קֹסֵם קְסָמִים), a worker of hidden arts (מְעוֹנֵן), an augurer (מְנַחֵשׁ), an enchanter (מְכַשֵּׁף), or a fabricator of charms (חֹבֵר חָבֶר), or an inquirer by a familiar spirit (שֹׁאֵל אוֹב), or a wizard (יִדְּעֹנִי), or a consulter of the dead (דֹּרֵשׁ אֶל־הַמֵּתִים)." It is added that these are abominations, and that on account of their practice the nations of Canaan were to be driven out (Deut. xviii. 9-14, esp. 10, 11). It is remarkable that the offering of children should be mentioned in connexion with magical arts. The passage in Micah, which has been supposed to preserve a question of Balak and an answer of Balaam, when the soothsayer was sent for to curse Israel, should be here noticed, for the questioner asks, after speaking of sacrifices of usual kinds, "Shall I give my first-born [for] my transgression, the fruit of my body [for] the sin of my soul?" (vi. 5-8). Perhaps, however, child-sacrifice is specified on account of its atrocity, which would connect it with secret arts, which we know were frequently in later times the causes of cruelty. The terms which follow appear to refer properly to eight different kinds of magic, but some of them are elsewhere used in a general sense. 1. קֹסֵם קְסָמִים is literally "a diviner of divinations." The verb קָסַם is used of false prophets, but also in a general sense for divining, as in the narrative of Saul's consultation of the witch of Endor, where the king says "divine unto me (קָסְמִי־נָא לִי בְּאוֹב), I pray thee, by the familiar spirit" (1 Sam. xxviii. 8). 2. מְעוֹנֵן conveys the idea of "one who acts covertly," and so "a worker of hidden arts." The meaning of the root עָנַן is covering, and the supposed connexion with fascination by the eyes, like the notion of "the evil eye," as though the original root were "the eye" (עַיִן), seems untenable.[a] 3. מְנַחֵשׁ, which we render "an augurer," is from נָחַשׁ, which is literally "he or it hissed or whispered," and in Piel is applied to the practice of enchantments, but also to divining generally, as in the case of Joseph's cup, and where, evidently referring to it, he tells his brethren that he could divine, although in both places it has been read more vaguely with the sense to foresee or make trial (Gen. xliv. 5, 15). We therefore render it by a term which seems appropriate but not too definite. The supposed connexion of נָחַשׁ with נָחָשׁ, "a serpent," as though meaning serpent-divination, must be rejected, the latter word rather coming from the former, with the signification "a hisser."[a] 4. מְכַשֵּׁף signifies "an enchanter:" the original meaning of the verb was probably "he prayed," and the strict sense of this word "one who uses incantations." 5. חֹבֵר חָבֶר seems to mean "a fabricator of material charms or amulets," if חָבֶר, when used of practising sorcery, means to bind magical knots, and not to bind a person by spells. 6. שֹׁאֵל אוֹב is "an inquirer by a familiar spirit." The second term signifies a bottle,[b] a familiar spirit consulted by a soothsayer and a soothsayer having a familiar spirit. The LXX. usually render the plural אֹבוֹת by ἐγγαστρίμυθοι, which has been rashly translated ventriloquists, for it may not signify what we understand by the latter, but refer to the mode in which soothsayers of this kind gave out their responses: to this subject we shall recur later. The consulting of familiar spirits may mean no more than invoking them; but in the Acts we read of a damsel possessed with a spirit of divination (xvi. 16-18) in very distinct terms. This kind of sorcery—divination by a familiar spirit—was practised by the witch of Endor. 7. יִדְּעֹנִי, which we render "a wizard," is properly "a wise man." but is always applied to wizards and false prophets. Gesenius (*Thes.* s. v.) supposes that in Lev. xx. 27 it is used of a familiar spirit, but surely the reading "a wizard" is there more probable. 8. The last term, דֹּרֵשׁ אֶל־הַמֵּתִים, is very explicit, meaning "a consulter of the dead:" necromancer is an exact translation if the original signification of the latter is retained, instead of the more general one it now usually bears. In the Law it was commanded that a man or woman who had a familiar spirit, or a wizard, should be stoned (Lev. xx. 27). As "enchantress" (מְכַשֵּׁפָה) was not to live (Ex. xxii. 18; Heb. 17). Using augury and hidden arts was also forbidden (Lev. xix. 26).

The history of Balaam shows the belief of some ancient nations in the powers of soothsayers. When the Israelites had begun to conquer the Land of Promise, Balak the king of Moab and the elders of Midian, resorting to Pharaoh's expedient, sent by messengers with "the rewards of divination (קְסָמִים?) in their hands" (Num. xxii. 7) for Balaam the diviner (הַקּוֹסֵם, Josh. xiii. 22), whose fame was known to them though he dwelt in Aram. Balak's message shows what he believed Balaam's powers to be: "Behold, there is a people come out from Egypt: behold, they cover the face of the earth, and they abide over against me: come now therefore, I pray thee, curse me this people; for they [are] too mighty for me: peradventure I shall prevail, [that] we may smite them, and [that] I may drive them out of the land: for I wot that he whom thou blessest [is] blessed: and he whom thou cursest is cursed" (Num. xxii. 5, 6). We are told, however, that Balaam, warned of God, first said that he could not speak of himself, and then by inspiration blessed those whom he had been sent for to curse. He appears to have received inspiration in a vision or a trance. In one place it is said, "And Balaam saw that it was good in the eyes of the LORD to bless Israel, and he went not, now as before, to the meeting enchantments (נְחָשִׁים), but he set his face to the wilderness" (xxiv. 1). From this it would seem that it was his wont to use enchantments, and that when on other occasions he went away after the

[a] The ancient Egyptians seem to have held the superstition of the evil eye, for an eye is the determinative of a word which appears to signify some kind of magic (Chabas, *Papyrus Magique Harris*, p. 170 and note 4).

[a] The name Nahshon (נַחְשׁוֹן), of a prince of Judah in the second year after the Exodus (Num. i. 7; Ex. vi. 23; Ruth iv. 20, &c.), means "enchanter:" it was probably used as a proper name in a vague sense.

[b] This meaning suggests the probability that the Arab idea of the evil Jinn having been enclosed in bottles by Solomon was derived from some Jewish tradition.

sacrifices had been offered, he hoped that he could prevail to obtain the wish of those who had sent for him, but was constantly defeated. The building new altars of the mystic number of seven, and the offering of seven oxen and seven rams, seem to show that Balaam had some such idea; and the marked manner in which he declared "there is no enchantment (קֶסֶם) against Jacob, and no divination בְּיַעֲקֹב against Israel" (xxiii. 23), that he had come in the hope that they would have availed, the diviner here being made to declare his own powerlessness while he blessed those whom he was sent for to curse. The case is a very difficult one, since it shows a man who was used as an instrument of declaring God's will trusting in practices that could only have incurred His displeasure. The simplest explanation seems to be that Balaam was never a true prophet but on this occasion, when the enemies of Israel were to be signally confounded. This history affords a notable instance of the failure of magicians in attempting to resist the Divine will.

The account of Saul's consulting the witch of Endor is the foremost place in Scripture of those which refer to magic. The supernatural terror with which it is full cannot however be proved to be due to this art, for it has always been held by sober critics that the appearing of Samuel was permitted for the purpose of declaring the doom of Saul, and not that it was caused by the incantations of a sorceress. As, however, the narrative is allowed to be very difficult, we may look for a moment at the evidence of its authenticity. The details are strictly in accordance with the age: there is a simplicity in the manners described that is foreign to a later time. The circumstances are agreeable with the rest of the history, and especially with all we know of Saul's character. Here, as ever, he is seen resolved to gain his ends without caring what wrong he does: he wishes to consult a prophet, and asks a witch to call up his shade. Most of all the vigour of the narrative, showing us the scene in a few words, proves its antiquity and genuineness. We can see no reason whatever for supposing that it is an interpolation.

"Now Samuel was dead, and all Israel had lamented him, and buried him in Ramah, even in his own city. And Saul had put away those that had familiar spirits, and the wizards, out of the land. And the Philistines gathered themselves together, and came and pitched in Shunem; and Saul gathered all Israel together, and they pitched in Gilboa." That the Philistines should have advanced so far, spreading in the plain of Esdraelon, the garden of the Holy Land, shows the straits to which Saul had come. Here in times of faith Sisera was defeated by Barak, and the Midianites were smitten by Gideon, some of the army of the former perishing at Endor itself (Ps. lxxxiii. 9, 10). "And when Saul saw the host of the Philistines, he was afraid, and his heart greatly trembled. And when Saul enquired of the LORD, the LORD answered him not, neither by dreams, nor by Urim, nor by prophets. Then said Saul unto his servants, Seek me a woman that hath a familiar spirit, that I may go to her, and enquire of her. And his servants said to him, Behold, [there is] a woman that hath a familiar spirit at En-dor. And Saul disguised himself, and put on other raiment, and he went, and two men with him, and they came to the woman by night." Endor lay in the territory of Issachar, about 7 or 8 miles to the northward of Mount Gilboa. Its name, the "fountain of Dor," may connect it with the Phoenician city Dor, which was on the coast to the westward.[c] If so, it may have retained its stranger-population, and been therefore chosen by the witch as a place where she might with less danger than elsewhere practise her arts. It has been noticed that the mountain on whose slope the modern village stands is hollowed into rock-hewn caverns, in one of which the witch may probably have dwelt. [ENDOR.] Saul's disguise, and his journeying by night, seem to have been taken that he might not alarm the woman, rather than because he may have passed through a part of the Philistine force. The Philistines held the plain, having their camp at Shunem, whither they had pushed on from Aphek: the Israelites were at first encamped by a fountain at Jezreel, but when their enemies had advanced to Jezreel they appear to have retired to the slopes of Gilboa, whence there was a way of retreat either into the mountains to the south, or across Jordan. The latter seems to have been the line of flight, as, though Saul was slain on Mount Gilboa, his body was fastened to the wall of Beth-shan. Thus Saul could have scarcely reached En-dor without passing at least very near the army of the Philistines. "And he said, divine unto me, I pray thee, by the familiar spirit, and bring me [him] up, whom I shall name unto thee." It is noticeable that here witchcraft, the inquiring by a familiar spirit, and necromancy, are all connected as though but a single art, which favours the idea that the prohibition in Deuteronomy specifies every name by which magical arts were known, rather than so many different kinds of arts, in order that no one should attempt to evade the condemnation of such practices by any subterfuge. It is evident that Saul thought he might be able to call up Samuel by the aid of the witch; but this does not prove what was his own general conviction, or the prevalent conviction of the Israelites on the subject. He was in a great extremity: his kingdom in danger: himself forsaken of God: he was weary with a night-journey, perhaps of risk, perhaps of great length to avoid the enemy, and faint with a day's fasting: he was conscious of wrong as, probably for the first time, he commanded unholy rites and heard in the gloom unholy incantations. In such a strait no man's judgment is steady, and Saul may have asked to see Samuel in a moment of sudden desperation when he had only meant to demand an oracular answer. It may even be thought that, yearning for the counsel of Samuel, and longing to learn if the net that he felt closing about him were one from which he should never escape, Saul had that keener sense that some say comes in the last hours of life, and so, conscious that the prophet's shade was near, or was about to come, at once sought to see and speak with it, though this had not been before purposed. Strange things we know occur at the moment when man feels he is about to die,[d] and if there be any time

[c] Dor is said to have taken its name from Dorus, a son of Neptune, whose name reminds one of Taras, the founder of Tarentum.

[d] We may instance the well-known circumstance that those who have been near death by drowning have asserted that in the last moments of consciousness all the events of their lives have passed before their minds. A friend of the writer assured him that he experienced this sensation, whenever he had a very bad fall in hunting, while he was actually falling. This is alluded to in the epitaph—

when the unseen world is felt while yet unentered, it is when the soul comes first within the chill of its long-projected shadow. "And the woman said unto him, Behold, thou knowest what Saul hath done, how he hath cut off those that have familiar spirits, and the wizards, out of the land: wherefore then layest thou a snare for my life, to cause me to die? And Saul sware to her by the LORD, saying, [As] the LORD liveth, there shall no punishment happen to thee for this thing." Nothing more shows Saul's desperate resolution than his thus swearing when engaged in a most unholy act, a terrible profanity that makes the horror of the scene complete. Everything being prepared, the final act takes place. "Then said the woman, Whom shall I bring up unto thee? And he said, Bring me up Samuel. And when the woman saw Samuel, she cried with a loud voice: and the woman spake to Saul, saying, Why hast thou deceived me? for thou [art] Saul. And the king said unto her, Be not afraid: for what sawest thou? And the woman said unto Saul, I saw gods ascending out of the earth. And he said unto her, What [is] his form? And she said, An old man cometh up; and he [is] covered with a mantle. And Saul perceived that it [was] Samuel, and he stooped with [his] face to the ground, and bowed himself. And Samuel said to Saul, Why hast thou disquieted [or "disturbed"] me, to bring me up? And Saul answered, I am sore distressed; for the Philistines make war against me, and God is departed from me, and answereth me no more, neither by prophets, nor by dreams: therefore I have called thee, that thou mayest make known unto me what I shall do. Then said Samuel, Wherefore then dost thou ask of me, seeing the LORD is departed from thee, and is become thine enemy? And the LORD hath done to him, as he spake by me: for the LORD hath rent the kingdom out of thine hand, and given it to thy neighbour, [even] to David: because thou obeyedst not the voice of the LORD, nor executedst his fierce wrath upon Amalek, therefore hath the LORD done this thing unto thee this day. Moreover, the LORD will also deliver Israel with thee into the hand of the Philistines: and to-morrow [shalt] thou and thy sons [be] with me: the LORD also shall deliver the host of Israel into the hand of the Philistines. Then Saul fell straightway all along on the earth, and was sore afraid, because of the words of Samuel: and there was no strength in him; for he had eaten no bread all the day, nor all the night" (1 Sam. xxviii. 3-20). The woman clearly was terrified by an unexpected apparition when she saw Samuel. She must therefore either have been a mere juggler, or one who had no power of working magical wonders at will. The sight of Samuel at once showed her who had come to consult her. The prophet's shade seems to have been preceded by some majestic shapes which the witch called gods. Saul, as it seems interrupting her, asked his form, and she described the prophet as he was in his last days on earth, an old man, covered either with a mantle, such as the prophets used to wear, or wrapped in his winding-sheet. Then Saul knew it was Samuel, and bowed to the ground, from respect or fear. It seems that the woman saw the appearances, and that Saul only knew of them through her, perhaps not daring to look, else why should he have asked what form Samuel had? The prophet's complaint we cannot understand, in our ignorance as to the separate state: thus much we know, that state is always described as one of perfect rest or sleep. That the woman should have been able to call him up cannot be hence inferred; her astonishment shows the contrary; and it would be explanation enough to suppose that he was sent to give Saul the last warning, or that the earnestness of the king's wish had been permitted to disquiet him in his resting-place. Although the word "disquieted" need not be pushed to an extreme sense, and seems to mean the interruption of a state of rest, our translators wisely, we think, preferring this rendering to "disturbed," it cannot be denied that, if we hold that Samuel appeared, this is a great difficulty. If, however, we suppose that the prophet's coming was ordered, it is not unsurmountable. The declaration of Saul's doom agrees with what Samuel had said before, and was fulfilled the next day, when the king and his sons fell on Mount Gilboa. It may, however, be asked—Was the apparition Samuel himself, or a supernatural messenger in his stead? Some may even object to our holding it to have been aught but a phantom of a sick brain; but if so, what can we make of the woman's conviction that it was Samuel, and the king's horror at the words he heard, or, as these would say, that he thought he heard? It was not only the hearing his doom, but the hearing it in a voice from the other world that stretched the faithless strong man on the ground. He must have felt the presence of the dead, and heard the sound of a sepulchral voice. How else could the doom have come true, and not the king alone, but his sons, have gone to the place of disembodied souls on the morrow? for to be with the dead concerned the soul not the body: it is no difficulty that the king's corpse was unburied till the generous men of Jabesh-gilead, mindful of his old kindness, rescued it from the wall of Beth-shan. If then the apparition was real, should we suppose it Samuel's? A reasonable criticism would say it seems to have been so; for the supposition that a messenger came in his stead must be rejected, as it would make the speech a mixture of truth and untruth; and if asked what sufficient cause there was for such a sending forth of the prophet from his rest, would reply that we know not the reason for such warnings as abound in the Bible, and that perhaps even at the eleventh hour, the door of repentance was not closed against the king, and his impiety might have been pardoned had he repented. Instead, he went forth in despair, and, when his sons had fallen and his army was put to the rout, sore wounded fell on his own sword.

From the beginning to the end of this strange history we have no warrant for attributing supernatural power to magicians. Viewed reasonably, it refers to the question of apparitions of the dead as to which other places in the Bible leave no doubt. The connexion with magic seems purely accidental. The witch is no more than a bystander after the first: she sees Samuel, and that is all. The apparition may have been a terrible fulfilment of Saul's desire, but this does not prove that the measures he used were of any power. We have examined

"Between the saddle and the ground,
I mercy sought, and mercy found."

If this phenomenon be not involuntary, but the result of an effort of will, then there is no reason why it should be confined to the last moments of consciousness. A man sure of his doom might be in this peculiar and unexplained mental state long before. Perhaps, however, the mind before death experiences a change of condition, just as conversely, every physical function does not cease at once with what we term dissolution.

the narrative very carefully, from its detail and its remarkable character: the result leaves the main question unanswered.

In the later days of the two kingdoms magical practices of many kinds prevailed among the Hebrews, as we especially learn from the condemnation of them by the prophets. Every form of idolatry which the people had adopted in succession doubtless brought with it its magic, which seems always to have remained with a strange tenacity that probably made it outlive the false worship with which it was connected. Thus the use of teraphim, dating from the patriarchal age, was not abandoned when the worship of the Canaanite, Phoenician, and Syrian idols had been successively adopted. In the historical books of Scripture there is little notice of magic, excepting that wherever the false prophets are mentioned we have no doubt an indication of the prevalence of magical practices. We are especially told of Josiah that he put away the workers with familiar spirits, the wizards, and the teraphim, as well as the idols and the other abominations of Judah and Jerusalem, in performance of the commands of the book of the Law which had been found (2 K. xxiii. 24). But in the prophets we find several notices of the magic of the Hebrews in their times, and some of the magic of foreign nations. Isaiah says that the people had become "workers of hidden arts (עֹנְנִים) like the Philistines," and apparently alludes in the same place to the practice of magic by the Bene-Kedem (ii. 6). The nation had not only abandoned true religion, but had become generally addicted to magic in the manner of the Philistines, whose Egyptian origin [CAPHTOR] is consistent with such a condition. The origin of the Bene-Kedem is doubtful, but it seems certain that as late as the time of the Egyptian wars in Syria, under the xixth dynasty, B.C. cir. 1300, a race, partly at least Mongolian, inhabited the valley of the Orontes,[a] among whom therefore we should again expect a national practice of magic, and its prevalence with their neighbours. Balaam, too, dwelt with the Bene-Kedem, though he may not have been of their race. In another place the prophet reproves the people for seeking "unto them that have familiar spirits, and unto the wizards that chirp, and that mutter" (viii. 19). The practices of one class of magicians are still more distinctly described, where it is thus said of Jerusalem: "And I will camp against thee round about, and will lay siege against thee with a mount, and I will raise forts against thee. And thou shalt be brought down, [and] shalt speak out of the ground, and thy speech shall be low out of the dust, and thy voice shall be, as of one that hath a familiar spirit, out of the ground, and thy speech shall whisper out of the dust" (xxix. 3, 4). Isaiah alludes to the magic of the Egyptians when he says that in their calamity "they shall seek to the idols, and to the charmers [הַלָּטִים ?],[b] and to them that have familiar spirits, and to the wizards" (xix. 3). And in the same manner he thus taunts Babylon: "stand now with thy charms, and with the multitude of thine enchantments, wherein thou hast laboured from thy youth; if so be thou shalt be able to profit, if so be thou mayest prevail. Thou art wearied in the multitude of thy counsels. Let now the viewers of the heavens [or astrologers] the stargazers, the monthly prognosticators, stand up, and save thee from [these things] that shall come upon thee" (xlvii. 12, 13). The magic of Babylon is here characterized by the prominence given to astrology, no magicians being mentioned excepting practisers of this art; unlike the case of the Egyptians, with whom astrology seems always to have held a lower place than with the Chaldaean nation. In both instances the folly of those who seek the aid of magic is shown.

Micah, declaring the judgments coming for the crimes of his time, speaks of the prevalence of divination among prophets who most probably were such pretended prophets as the opponents of Jeremiah, not avowed prophets of idols, as Ahab's seem to have been. Concerning these prophets it is said, "Night [shall be] unto you, that ye shall not have a vision; and it shall be dark unto you, that ye shall not divine; and the sun shall go down over the prophets, and the day shall be dark over them. Then shall the seers be ashamed, and the diviners confounded: yea, they shall all cover their lip; for [there is] no answer of God" (iii. 6, 7). Later it is said as to Jerusalem, "The heads thereof judge for reward, and the priests thereof teach for hire, and the prophets thereof divine for money: yet will they lean upon the LORD, and say, [Is] not the LORD among us? none evil can come upon us" (ver. 11). These prophets seem to have practised unlawful arts, and yet to have expected revelations.

Jeremiah was constantly opposed by false prophets, who pretended to speak in the name of the Lord, saying that they had dreamt, when they told false visions, and who practised various magical arts (xiv. 14, xxiii. 25, *ad fin.*, xxvii. 9, 10—where the several designations applied to those who counselled the people not to serve the king of Babylon may be used in contempt of the false prophets—xxix. 8, 9).

Ezekiel, as we should have expected, affords some remarkable details of the magic of his time, in the clear and forcible descriptions of his visions. From him we learn that fetishism was among the idolatries which the Hebrews, in the latest days of the kingdom of Judah, had adopted from their neighbours, like the Romans in the age of general corruption that caused the decline of their empire. In a vision, in which the prophet saw the abominations of Jerusalem, he entered the chambers of imagery in the Temple itself: "I went in and saw; and behold every form of creeping things, and abominable beasts, and all the idols of the house of Israel, pourtrayed upon the wall round about." Here seventy elders were offering incense in the dark (viii. 7-12). This idolatry was probably borrowed from Egypt, for the description perfectly answers to that of the dark sanctuaries of Egyptian temples, with the sacred animals pourtrayed upon their walls, and does not accord with the character of the Assyrian sculptures, where creeping things are not represented as objects of worship. With this low form of idolatry an equally low kind of magic obtained, practised by prophetesses who for small rewards made amulets by which the people were deceived (xiii. 17 *ad fin.*). The passage must be allowed to be very difficult, but it can scarcely be doubted that amulets are referred to which were made and sold by these women, and perhaps also worn by them. We may probably read: "Woe to the [women] that sew pillows upon all joints of the hands [elbows or

[a] Let those who doubt this examine the representation in Rosellini's *Monumenti Storici*, i. pl. lxxxviii. seq. of the great battle between Rameses II. and the Hittites and their confederates, near KETESH, on the Orontes.

[b] This word may mean whisperers if it be the plural of לַט "a murmur."

armbands], and make kerchiefs upon the head of every stature to hunt souls!" (xiii. 18). If so, we have a practice analogous to that of the modern Egyptians, who hang amulets of the kind called negáb upon the right side, and of the Nubians, who hang them on the upper part of the arm. We cannot, in any case, see how the passage can be explained as simply referring to the luxurious dress of the women of that time, since the prophet distinctly alludes to pretended visions and to divinations (ver. 23), using almost the same expressions that he applies in another place to the practices of the false prophets (xxii. 28). The notice of Nebuchadnezzar's divination by arrows, where it is said "he shuffled arrows" (xxi. 21), must refer to a practice the same or similar to the kind of divination by arrows called El-Meysar, in use among the pagan Arabs, and forbidden in the Kur-án. [See HOSPITALITY.]

The references to magic in the book of Daniel relate wholly to that of Babylon, and not so much to the art as to those who used it. Daniel, when taken captive, was instructed in the learning of the Chaldaeans and placed among the wise men of Babylon (ii. 18), by whom we are to understand the Magi (חַכְמֵי בָבֶל), for the term is used as including magicians (חַרְטֻמִּים), sorcerers (אַשָּׁפִים), enchanters (מְכַשְּׁפִים), astrologers (גָּזְרִין), and Chaldaeans, the last being apparently the most important class (ii. 2, 4, 5, 10, 12, 14, 18, 24, 27; comp. i. 20). As in other cases the true prophet was put to the test with the magicians, and he succeeded where they utterly failed. The case resembles Pharaoh's, excepting that Nebuchadnezzar asked a harder thing of the wise men. Having forgotten his dream, he not only required of them an interpretation, but that they should make known the dream itself. They were perfectly ready to tell the interpretation if only they heard the dream. The king at once saw that they were impostors, and that if they truly had supernatural powers they could as well tell him his dream as its meaning. Therefore he decreed the death of all the wise men of Babylon; but Daniel, praying that he and his fellows might escape this destruction, had a vision in which the matter was revealed to him. He was accordingly brought before the king. Like Joseph, he disavowed any knowledge of his own. "The secret which the king hath demanded, the wise men, the sorcerers, the magicians, the astrologers, cannot show unto the king; but there is a God in heaven that revealeth secrets" (vers. 27, 28). "But as for me, this secret is not revealed to me for [any] wisdom that I have more than any living" (30). He then related the dream and its interpretation, and was set over the province as well as over all the wise men of Babylon. Again the king dreamt; and though he told them the dream the wise men could not interpret it, and Daniel again showed the meaning (iv. 4, *seqq.*). In the relation of this event we read that the king called him "chief of the scribes," the second part of the title being the same as that applied to the Egyptian magicians (iv. 9; Chald. 6). A third time, when Belshazzar saw the writing on the wall, were the wise men sent for, and on their failing Daniel was brought before the king and the interpretation given (v.). These events are perfectly consistent with what always occurred in all other cases recorded in Scripture when the practisers of magic were placed in opposition to true prophets. It may be asked by some how Daniel could take the post of chief of the wise men when he had himself proved their imposture. If, however, as we cannot doubt, the class were one of the learned generally, among whom some practised magical arts, the case is very different from what it would have been had these wise men been magicians only. Besides, it seems almost certain that Daniel was providentially thus placed that, like another Joseph, he might further the welfare and ultimate return of his people. [MAGI.]

After the Captivity it is probable that the Jews gradually abandoned the practice of magic. Zechariah speaks indeed of the deceit of teraphim and diviners (x. 2), and foretells a time when the very names of idols should be forgotten and false prophets have virtually ceased (xiii. 1-4), yet in neither case does it seem certain that he is alluding to the usages of his own day.

In the Apocrypha we find indications that in the later centuries preceding the Christian era magic was no longer practised by the educated Jews. In the Wisdom of Solomon the writer, speaking of the Egyptian magicians, treats their art as an imposture (xvii. 7). The book of Tobit is an exceptional case. If we hold that it was written in Persia or a neighbouring country, and, with Ewald, date its composition not long after the fall of the Persian empire, it is obvious that it relates to a different state of society to that of the Jews of Egypt and Palestine. If, however, it was written in Palestine about the time of the Maccabees, as others suppose, we must still recollect that it refers rather to the superstitions of the common people than to those of the learned. In either case its pretensions make it unsafe to follow as indicating the opinions of the time at which it was written. It professes to relate to a period of which its writer could have known little, and borrows its idea of supernatural agency from Scripture, adding as much as was judged safe of current superstition.

In the N. T. we read very little of magic. The coming of Magi to worship Christ is indeed related (Matt. ii. 1-12), but we have no warrant for supposing that they were magicians from their name, which the A. V. not unreasonably renders "wise men" [MAGI]. Our Lord is not said to have been opposed by magicians, and the Apostles and other early teachers of the Gospel seem to have rarely encountered them. Philip the deacon, when he preached at Samaria, found there Simon a famous magician, commonly known as Simon Magus, who had had great power over the people; but he is not said to have been able to work wonders, nor, had it been so, is it likely that he would have ever been admitted into the Church (viii. 9-24). When St. Barnabas and St. Paul were at Paphos, as they preached to the proconsul Sergius Paulus, Elymas, a Jewish sorcerer and false prophet (τινα ἄνδρα μάγον ψευδοπροφήτην) withstood them, and was struck blind for a time at the word of St. Paul (xiii. 6-12). At Ephesus, certain Jewish exorcists signally failing, both Jews and Greeks were afraid, and abandoned their practice of magical arts. "And many that believed came, and confessed, and showed their deeds. Many of them also which used curious arts brought their books together, and burned them before all: and they counted the price of them, and found [it] fifty thousand [pieces] of silver" (xix. 18, 19). Here both Jews and Greeks seem to have been greatly addicted to magic, even after they had

nominally joined the Church. In all these cases it appears that though the practisers were generally or always Jews, the field of their success was with Gentiles, showing that among the Jews in general, or the educated class, the art had fallen into disrepute. Here, as before, there is no evidence of any real effect produced by the magicians. We have already noticed the remarkable case of the "damsel having a spirit of divination" (ἔχουσαν πνεῦμα πύθωνα) "which brought her masters much gain by foretelling" (μαντευομένη), from whom St. Paul cast out the spirit of divination (xvi. 16-18). This is a matter belonging to another subject than that of magic.

Our examination of the various notices of magic in the Bible gives us this general result:—They do not, as far as we can understand, once state positively that any but illusive results were produced by magical rites. They therefore afford no evidence that man can gain supernatural powers to use at his will. This consequence goes some way towards showing that we may conclude that there is no such thing as real magic; for although it is dangerous to reason on negative evidence, yet in a case of this kind it is especially strong. Had any real illusions been worked by magicians, surely the Scriptures would not have passed over a fact of so much importance, and one which would have rendered the prohibition of these arts far more necessary. The general belief of mankind in magic, or things akin to it, is of no worth, since the holding such current superstition in some of its branches, if we push it to its legitimate consequences, would lead to the rejection of faith in God's government of the world, and the adoption of a creed far below that of Plato.

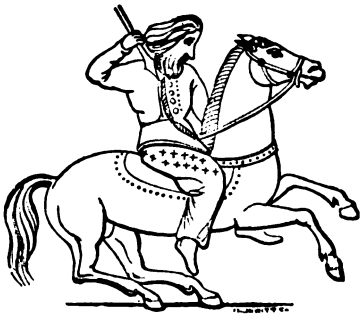
From the conclusion at which we have arrived, that there is no evidence in the Bible of real results having been worked by supernatural agency used by magicians, we may draw this important inference, that the absence of any proof of the same in profane literature, ancient or modern, in no way militates against the credibility of the miracles recorded in Scripture. [R. S. P.]

MA'GIDDO (Μαγεδδώ; but Mai, μετὰ Ἀδδώ; and Alex.[a] Μεγαδδαους: *Magedo*), the Greek form of the name MEGIDDO. It occurs only in 1 Esd. i. 29. [MEGIDDON.] [G.]

MA'GOG (מָגוֹג: Μαγώγ). The name Magog is applied in Scripture both to a person and to a land or people. In Gen. x. 2 Magog appears as the second son of Japheth in connexion with Gomer (the Cimmerians) and Madai (the Medes): in Ez. xxxviii. 2, xxxix. 1, 6, it appears as a country or people of which Gog was the prince,[b] in conjunction with Meshech[c] (the Moschi), Tubal (the Tibareni), and Rosh (the Roxolani). In the latter of these senses there is evidently implied an etymological connexion between Gog and Ma = gog, the *Ma* being regarded by Ezekiel as a prefix significant of a country. In this case Gog contains the original element of the name, which may possibly have its origin in some Persian root.[d] The notices of Magog would lead us to fix a northern locality: not only did all the tribes mentioned in connexion with it belong to that quarter, but it is expressly stated by Ezekiel that he was to come up from "the sides of the north" (xxxix. 2), from a country adjacent to that of Togarmah or Armenia (xxxviii. 6), and not far from "the isles" or maritime regions of Europe (xxxix. 6). The people of Magog further appear as having a force of cavalry (xxxviii. 15), and as armed with the bow (xxxix. 3). From the above *data*, combined with the consideration of the time at which Ezekiel lived, the conclusion has been drawn that Magog represents the important race of the Scythians. Josephus (*Ant.* i. 6, §1) and Jerome (*Quaest.* in Gen. x. 2) among early writers adopted this view and they have been followed in the main by modern writers. In identifying Magog with the Scythians, however, we must not be understood as using the latter term in a strictly ethnographical sense, but as a general expression for the tribes living north of the Caucasus.[e] We regard Magog as essentially a *geographical* term, just as it was applied by the Syrians of the middle ages to Asiatic Tartary, and by the Arabians to the district between the Caspian and Euxine seas (Winer, *Real.* s. v.). The inhabitants of this district in the time of Ezekiel were undoubtedly the people generally known by the classical name of Scythians. In the latter part of the 7th century B.C. they had become well known as a formidable power through the whole of western Asia. Forced from their original quarters north of the Caucasian range by the inroad of the Massagetae, they descended into Asia Minor, where they took Sardis (B.C. 629), and maintained a long war with the Lydian monarchs: thence they spread into Media (B.C. 624), where they defeated Cyaxares. They then directed their course to Egypt, and were bribed off by Psammetichus; on their return[f] they attacked the temple of Venus Urania at Ascalon. They were finally ejected B.C. 596, after having made their name a terror to the whole eastern world (Herod. i. 103 ff.). The Scythians are

[a] This is one of a great number of cases in which the readings of Mai's edition of the Vatican Codex depart from the ordinary "Vatican Text," as usually edited, and agree more or less closely with the Alexandrine (Codex A).

[b] Von Bohlen (*Introd. to Gen.* ii. 211) represents Gog as the people, and not the prince. There can be no doubt that in Rev. xx. 8 the name does apply to a people, but this is not the case in Ezekiel.



[c] In the A. V. Gog is represented as "the *chief prince* of Meshech and Tubal: but it is pretty well agreed that the Hebrew words רֹאשׁ נְשִׂיא cannot bear the meaning thus affixed to them. The true rendering is "prince of Rosh," as given in the LXX. (ἄρχοντα Ῥώς). The other name was adopted by the Vulgate in consequence of the same Rosh not occurring elsewhere in Scripture. [ROSH.]

[d] Various etymologies of the name have been suggested, none of which can be absolutely accepted. Knobel (*Völker.* p. 68) proposes the Sanscrit *mah* or *maha*, "great," and a Persian word signifying "mountain," in which case the reference would be to the Caucasian range. The terms *ghogh* and *moghef* are still applied to some of the heights of that range. This etymology is supported by Von Bohlen (*Introd. to Gen.* ii. 211). On the other hand, Hitzig (*Comm. in Ez.*) connects the first syllable with the Coptic *ma*, "place," or the Sanscrit *maha*, "land," and the second with a Persian root, *koka*, "the moon," as though the term had reference to moon-worshippers.

[e] In the Koran Gog and Magog are localized north of the Caucasus. There appears to have been from the earliest times a legend that the enemies of religion and civilization lived in that quarter (*Haxthausen's Tribes of the Caucasus*, p. 55).

[f] The name of Scythopolis, by which Beth-shean was known in our Saviour's time, was regarded as a trace the Scythian occupation (Plin. v. 16). this, however, doubtful. [SCYTHOPOLIS.]

described by classical writers as skilful in the use of the bow (Herod. i. 73, iv. 132; Xen. *Anab.* iii. 4, §15), and even as the inventors of the bow and arrow (Plin. vii. 57); they were specially famous as mounted bowmen (*ἱππηοτοξόται*; Herod. iv. 46; Thucyd. ii. 96); they also enjoyed an ill-

Scythian horseman (from Kertch).

fame for their cruel and rapacious habits (Herod. i. 106). With the memory of these events yet fresh on the minds of his countrymen, Ezekiel selects the Scythians as the symbol of earthly violence, arrayed against the people of God, but meeting with a signal and utter overthrow. He depicts their avarice and violence (xxxviii. 7-13), and the fearful vengeance executed upon them (xxxviii. 14-23)—a massacre so tremendous that seven months would hardly suffice for the burial of the corpses in the valley which should thenceforth be named Hamon-gog (xxxix. 11-16). The imagery of Ezekiel has been transferred in the Apocalypse to describe the final struggle between Christ and Antichrist (Rev. xx. 8). As a question of ethnology, the origin of the Scythians presents great difficulties: many eminent writers, with Niebuhr and Neumann at their head, regard them as a Mongolian, and therefore a non-Japhetic race. It is unnecessary for us to enter into the general question, which is complicated by the undefined and varying applications of the name Scythia and Scythians among ancient writers. As far as the Biblical notices are concerned, it is sufficient to state that the Scythians of Ezekiel's age—the Scythians of Herodotus—were in all probability a Japhetic race. They are distinguished on the one hand from the Argippaei, a clearly Mongolian race (Herod. iv. 23), and they are connected on the other hand with the Agathyrsi, a clearly Indo-European race (iv. 10). The mere silence of so observant a writer as Herodotus, as to any striking features in the physical conformation of the Scythians, must further be regarded as a strong argument in favour of their Japhetic origin. [W. L. B.]

MA'GOR-MIS'SABIB (מָגוֹר מִסָּבִיב: **Μάγωρ**
σικος: *Pavor undique*), literally, "terror on every side:" the name given by Jeremiah to Pashur the priest, when he smote him and put him in the stocks for prophesying against the idolatry of Jerusalem (Jer. xx. 3). The significance of the appellation is explained in the denunciation with which it was accompanied (ver. 4): "Thus saith Jehovah, Behold I will make thee a *terror* to thyself and to all thy friends." The LXX. must have connected the word with the original meaning of the root "to wander," for they keep up the play upon the name in ver. 4. It is remarkable that the same phrase occurs in several other passages of Jeremiah (vi. 25, xx. 10, xlvi. 5, xlix. 29; Lam. ii. 22), and is only found besides in Ps. xxxi. 13.

MA'GPIASH (מַגְפִּיעָשׁ: **Μαγαφής**; Alex. **Μαγαφής**; Cod. Fr. Aug. **Βαγαφής**: *Magphias*), one of the heads of the people who signed the covenant with Nehemiah (Neh. x. 20). The name is probably not that of an individual, but of a family. It is supposed by Calmet and Junius to be the same as MAGBISH in Ezr. ii. 30.

MAH'ALAH (מַחְלָה: **Μααλά**; Alex. **Μοολά**: *Mohola*), one of the three children of Hammoleketh, the sister of Gilead (1 Chr. vii. 18). The name is probably that of a woman, as it is the same with that of Mahlah, the daughter of Zelophehad, also a descendant of Gilead the Manassite.

MAHA'LALEEL (מַהֲלַלְאֵל: **Μαλελεήλ**: *Malaleel*). 1. The fourth in descent from Adam, according to the Sethite genealogy, and son of Cainan (Gen. v. 12, 13, 15-17; 1 Chr. i. 2). In the LXX. the names of Mahalaleel and Mehujael, the fourth from Adam in the genealogy of the descendants of Cain, are identical. Ewald recognises in Mahalaleel the sun-god, or Apollo of the antediluvian mythology, and in his son Jared the god of water, the Indian Varuna (*Gesch.* i. 357), but his assertions are perfectly arbitrary.

2. (Cod. Fr. Aug. **Μαλελήμ**). A descendant of Perez, or Pharez, the son of Judah, and ancestor of Athaiah, whose family resided in Jerusalem after the return from Babylon (Neh. xi. 4).

MAH'ALATH (מָחְלַת; **Μααλέθ**: *Mahelath*), the daughter of Ishmael, and one of the wives of Esau (Gen. xxviii. 9). In the Edomite genealogy (Gen. xxxvi. 3, 4, 10, 13, 17) she is called BASHEMATH, sister of Nebajoth, and mother of Reuel; but the Hebraeo-Samaritan text has Mahalath throughout. On the other hand Bashemath, the wife of Esau, is described as the daughter of Elon the Hittite (Gen. xxvi. 34). [BASHEMATH.]

MAH'ALATH (מָחְלַת: **ἡ Μαααλέθ**; Alex. **Μολαθ**: *Maalath*), one of the eighteen wives of king Rehoboam, apparently his first (2 Chr. xi. 18 only). She was her husband's cousin, being the daughter of king David's son Jerimoth, who was probably the child of a concubine, and not one of his regular family. Josephus, without naming Mahalath, speaks of her as "a kinswoman" (*συγγενῆ τινα*, *Ant.* viii. 10, §1). No children are attributed to the marriage, nor is she again named. The ancient Hebrew text (*Cethîb*) in this passage has "son" instead of "daughter." The latter, however, is the correction of the *Kri*, and is adopted by the LXX., Vulgate, and Targum, as well as by the A. V. [G.]

MAH'ALATH (מַחֲלַת: **Μααλέθ**: *Mahlath*). The title of Ps. liii., in which this rare word occurs, was rendered in the Geneva version, "To him that excelleth on Mahalath;" which was explained in the margin to be "an instrument or kind of note." This expresses in short the opinions of most commentators. Connecting the word with מָחוֹל *mâchôl* (Ex. xv. 20; Ps. cl. 4), rendered "dance" in the A. V., but supposed by many from its connexion with instruments of music to be one itself (DANCE, vol. i. p. 389), Jerome renders the phrase "on Mahalath," by "per *chorum*," and in this he

is supported by the translations of Theodotion (ὑπὲρ τῶν χορειῶν), Symmachus (διὰ χο, ῶ), and Aquila (ἐπὶ χορείᾳ), quoted by Theodoret (*Comm. in Ps.* lii.). Augustine (*Enarr. in Ps.* lii.) gives the title of the Psalm, "In finem pro *Amalech* intellectus ipsi David;" explaining "pro Amalech," as he says from the Hebrew, "for one in labour or sorrow" (pro parturiente sive dolente), by whom he understands Christ, as the subject of the Psalm. But in another passage (*Enarr. in Ps.* lxxxvii.) he gives the word in the form *meloch*, and interprets it by the Latin *chorus:* having in the first instance made some confusion with עָמָל, *'âmâl*, "sorrow," which forms part of the proper name "Amalek." The title of Ps. liii. in the Chaldee and Syriac versions contains no trace of the word, which is also omitted in the almost identical Ps. xiv. From this fact alone it might be inferred that it was not intended to point enigmatically to the contents of the psalm, as Hengstenberg and others are inclined to believe. Aben Ezra understands by it the name of a melody to which the Psalm was sung, and R. Solomon Jarchi explains it as "the name of a musical instrument," adding however immediately, with a play upon the word, "another discourse on the *sickness* (*machalâh*) of Israel when the Temple was laid waste." Calvin and J. H. Michaelis, among others, regarded it as an instrument of music or the commencement of a melody. Junius derived it from the root חָלַל, *chalal*, "to bore, perforate," and understood by it a wind instrument of some kind, like *Nehiloth* in Ps. vi.; but his etymology is certainly wrong. Its connexion with *machôl* is equally uncertain. Joel Bril, in the second preface to his notes on the Psalms in Mendelssohn's Bible, mentions three opinions as current with regard to the meaning of Mahalath; some regarding it as a feminine form of *machôl*, others as one of the *wind* instruments (the flute, according to De Wette's translation of Ps. liii.), and others again as a *stringed* instrument. Between these conflicting conjectures, he says, it is impossible to decide. That it was a stringed instrument, played either with the fingers or a quill, is maintained by Simonis (*Lex. Hebr.*), who derives it from an unused Arabic root حلث, to sweep. But the most probable of all conjectures, and one which Gesenius approves, is that of Ludolf, who quotes the Ethiopic *machlet*, by which the κιθάρα of the LXX. is rendered in Gen. iv. 21 (Simonis, *Arcanum Formarum*, p. 475). Fürst (*Handw.* s. v.) explains Mahalath as the name of a musical corps dwelling at Abel-*Meholah*, just as by Gittith he understands the band of Levite runstrels at *Gath* Rimmon.

On the other hand, the opinion that Mahalath contains an enigmatical indication of the subject of the Psalm, which we have seen hinted at in the quotations from Jarchi given above, is adopted by Hengstenberg to the exclusion of every other. He translates "on Mahalath" by "on sickness," referring to the spiritual malady of the sons of men (*Comm. über die Psalm.*). Lengerke (*die Psalmen*) adopts the same view, which had been previously advanced by Arias Montanus.

A third theory is that of Delitzsch (*Comm. üb. d. Psalter*), who considers Mahalath as indicating to the choir the manner in which the Psalm was to be sung, and compares the modern terms *mesto, sostenuto, mesto*. Ewald leaves it untranslated and unexplained, regarding it as probably an abbreviation of a longer sentence (*Dichter d. Alt. Bundes*, i. 174). The latest speculation upon the subject is that of Mr. Thrupp, who, after dismissing as mere conjecture the interpretation of Mahalath as a musical instrument, or as *sickness*, propounds, as more probable than either, that it is "a proper name borrowed from Gen. xxviii. 9, and used by David as an enigmatical designation of Abigail, in the same manner as in Psalms vii., xxxiv., the names Cush and Abimelech are employed to denote Shimei and Achish. The real Mahalath, Esau's wife, was the sister of Nebajoth, from whom were descended an Arabian tribe famous for their wealth in sheep; the name might be therefore not unfitly applied to one who, though now wedded to David, had till recently been the wife of the rich sheep-owner of the village of Carmel" (*Introd. to the Psalms*, i. 314). It can scarcely be said that Mr. Thrupp has replaced conjecture by certainty. [W. A. W.]

MAH'ALATH LEAN'NOTH (מַחֲלַת לְעַנּוֹת: Μαελὲθ τοῦ ἀνακριθῆναι: *Maheleth ad respondendum*). The Geneva version of Ps. lxxxviii., in the title of which these words occur, has "upon Malath Leannoth," and in the margin, "that is, to humble. It was the beginning of a song, by the tune whereof this Psalm was sung." It is a remarkable proof of the obscurity which envelops the former of the two words that the same commentator explains it differently in each of the passages in which it occurs. In De Wette's translation it is a "flute" in Ps. liii., a "guitar" in Ps. lxxxviii.; and while Jarchi in the former passage explains it as a musical instrument, he describes the latter as referring to "one sick of love and affliction who was afflicted with the punishments of the captivity." Symmachus, again, as quoted by Theodoret (*Comm. in Ps.* 87), has διχόρου, unless this be a mistake of the copyist for διὰ χοροῦ, as in Ps. liii. Augustine and Theodoret both understand *Leannoth* of responsive singing. Theophylact says "they danced while responding to the music of the organ." Jerome in his version of the Hebrew, has "per chorum ad praecinendum." The Hebrew עָנָה, in the Piel Conj., certainly signifies "to sing," as in Ex. xxxii. 18; Is. xxvii. 2; and in this sense it is taken by Ewald in the title of Ps. lxxxviii. In like manner Junius and Tremellius render "upon Mahalath Leannoth" "to be sung to the wind instruments." There is nothing, however, in the construction of the Psalm to show that it was adapted for responsive singing; and if *leannoth* be simply "to sing," it would seem, as Olshausen observes, almost unnecessary. It has reference, more probably, to the character of the psalm, and might be rendered "to humble, or afflict," in which sense the root occurs in verse 7. In support of this may be compared, "to bring to remembrance," in the titles of Pss. xxxviii. and lxx.; and "to thank," 1 Chr. xvi. 7. Mr. Thrupp remarks that this Psalm (lxxxviii.) "should be regarded as a solemn exercise of humiliation; it is more deeply melancholy than any other in the Psalter" (*Intr. to the Psalms*, ii. 99). Hengstenberg, in accordance with the view he takes of Mahalath, regards Ps. lxxxviii. as the prayer of one recovered from severe bodily sickness, rendering *leannoth* "concerning affliction," and the whole "on the sickness of distress." Lengerke has a similar explanation, which is the same with that of Piscator, but is too forced. [W. A. W.]

MAHALI (מַחְלִי: Μοολί; Alex. Μοολεί: *Moholi*); MAHLI, the son of Merari. His name occurs in the A. V. but once in this form (Ex. vi. 19).

MAHANA'IM (מַחֲנָיִם = two camps or hosts: Παρεμβολαί; Καμελν; Μαναείμ; Μαναελμ; Joseph. Θεοῦ στρατόπεδον: *Manaim*), a town on the east of the Jordan, intimately connected with the early and middle history of the nation of Israel. It purports to have received its name at the most important crisis of the life of Jacob. He had parted from Laban in peace after their hazardous encounter on Mount Gilead (Gen. xxxi.), and the next step in the journey to Canaan brings him to Mahanaim: "Jacob went on his way; and he lifted up his eyes and saw the camp of God[a] encamped; and the angels (or messengers) of God met him. And when he saw them he said, This is God's host (*mahaneh*), and he called the name of that place Mahanaim." It is but rarely, and in none but the earliest of these ancient records, that we meet with the occasion of a name being conferred; and generally, as has been already remarked, such narratives are full of difficulties, arising from the peculiar turns and involutions of words, which form a very prominent feature in this primeval literature, at once so simple and so artificial. [BEER LAHAI ROI, EN-HAKKORE, &c.] The form in which the history of Mahanaim is cast is no exception to this rule. It is in some respects perhaps more characteristic and more pregnant with hidden meaning than any other. Thus the "host" of angels—"God's host"—which is said to have been the occasion of the name, is only mentioned in a cursory manner, and in the singular number—"the [one] host;" while the "two hosts" into which Jacob divided his caravan when anticipating an attack from Esau, the host of Leah and the host of Rachel, agreeing in their number with the name Mahanaim ("two hosts"), are dwelt upon with constant repetition and emphasis. So also the same word is employed for the "messengers" of God and the "messengers" to Esau; and so, further on in the history, the "face" of God and the "face" of Esau are named by the same word (xxxii. 30, xxxiii. 10). It is as if there were a correspondence throughout between the human and the divine, the inner and outer parts of the event,—the host of God and the hosts of Jacob; the messengers of God and the messengers of Jacob; the face of God and the face of Esau.[b] The very name of the torrent on whose banks the event took place seems to be derived from the "wrestling"[c] of the patriarch with the angel. The whole narrative hovers between the real and the ideal, earth and heaven.

How or when the town of Mahanaim arose on the spot thus signalized we are not told. We next meet with it in the records of the conquest. The line separating Gad from Manasseh would appear to have run through or close to it, since it is named in the specification of the frontier of each tribe (Josh. xiii. 26 and 29). It was also on the southern boundary of the district of Bashan (ver. 30). But it was certainly within the territory of Gad (Josh. xxi. 38, 39), and therefore on the south side of the torrent Jabbok, as indeed we should infer from the history of Genesis, in which it lies between Gilead—probably the modern *Jebel Jilad*—and the torrent. The town with its "suburbs" was allotted to the service of the Merarite Levites (Josh. xxi. 39; 1 Chron. vi. 80). From some cause—the same city of its original foundation, or the strength of its position[d]—Mahanaim had become in the time of the monarchy a place of mark. When, after the death of Saul, Abner undertook the establishment of the kingdom of Ishbosheth, unable to occupy any of the towns of Benjamin or Ephraim, which were then in the hands of the Philistines, he fixed on Mahanaim as his head-quarters. There the new king was crowned over all Israel, east as well as west of the Jordan (2 Sam. ii. 9). From thence Abner made his disastrous expedition to Gibeon (ver. 12), and there apparently the unfortunate Ishbosheth was murdered (iv. 5), the murderers making off to Hebron by the way of the valley of the Jordan.

The same causes which led Abner to fix Ishbosheth's residence at Mahanaim probably induced David to take refuge there when driven out of the western part of his kingdom by Absalom. He proceeds thither without hesitation or inquiry, but as if when Jerusalem was lost it was the one alternative (2 Sam. xvii. 24; 1 K. ii. 8). It was then a walled town, capacious enough to contain the "hundreds" and the "thousands" of David's followers (xviii. 1, 4; and compare "ten thousand," ver. 3); with gates, and the usual provision for the watchmen of a fortified town (see the remark of Josephus quoted in the note). But its associations with royal persons were not fortunate. One king had already been murdered within its walls, and it was here that David received the news of the death of Absalom, and made the walls of the "chamber over the gate" resound with his cries.

Mahanaim was the seat of one of Solomon's commissariat officers (1 K. iv. 14); and it is alluded to in the Song which bears his name (vi. 13), in terms which, though very obscure, seem at any rate to show that at the date of the composition of the poem it was still in repute for sanctity, possibly famous for some ceremonial commemorating the original vision of the patriarch: "What will ye see in the Shulamite? We see as it were the dance (*mecholah*, a word usually applied to dances of a religious nature; see vol. i. p. 389) of the two hosts of Mahanaim."

On the monument of Sheshonk (Shishak) at Karnak, in the 22nd cartouch—one of those which are believed to contain the names of Israelite cities conquered by that king—a name appears which is read as *M^a-ha-n-m^a*, that is, Mahanaim. The adjoining cartouches contain names which are read as Beth-shean, Shunem, Megiddo, Beth-horon, Gibeon, and other Israelite names (Brugsch, *Geogr der nachbarländer Aegyptens*, &c., p. 61). If the interpretation may be relied on it shows that the invasion of Shishak was more extensive than we should gather from the records of the Bible (2 Chron. xii.), which are occupied mainly with occurrences at the metropolis. Possibly the army entered by the plains of Philistia and Sharon, ravaged Esdraelon and some towns like Mahanaim just beyond Jordan, and then returned, either by the same route or by

[a] This paragraph is added in the LXX.

[b] For this observation the writer is indebted to a sermon by Prof. Stanley (Marlborough, 1853).

[c] Jabbok, יַבֹּק; "wrestled" יֵאָבֵק

[d] To the latter Josephus testifies: Παρεμβολαί—so he renders the Hebrew Mahanaim—κεκλῆσθαι καὶ ἐχυρὰν τότε πόλιν (*Ant.* vii. 9, § 8).

the Jordan valley, to Jerusalem, attacking it last. This would account for Rehoboam's non-resistance, and also for the fact, of which special mention is made, that many of the chief men of the country had taken refuge in the city. It should, however, be remarked that the names occur in most promiscuous order and that none has been found resembling Jerusalem.

As to the identification of Mahanaim with any modern site or remains little can be said. To Eusebius and Jerome it appears to have been unknown. A place called *Makneh* does certainly exist among the villages of the east of Jordan, though its exact position is not so certain. The earliest mention of it appears to be that of the Jewish traveller Rabbi Parchi, according to whom "Machnajim is *Machneh*, and stands about half a day's journey in a due east direction from Beth-ean" (Zunz, in Asher's *Benj. of Tudela*, 408). *Makneh* is named in the lists of Dr. Eli Smith among the places of *Jebel Ajlun* (Robinson, *B. R.* 1st ed., iii. App. 166). It is marked on Kiepert's map (1856) as exactly east of Bethshan, but about 30 miles distant therefrom—i. e. not half but a long whole day's journey. It is also mentioned, and its identity with Mahanaim upheld, by Porter (*Handbook*, 322). But the distance of *Makneh* from the Jordan and from both the *Wady Zerka* and the *Yarmûk*—each of which has claims to represent the torrent Jabbok—seems to forbid this conclusion. At any rate the point may be recommended to the investigation of future travellers east of the Jordan. [G.]

MAH'ANEH-DAN (מַחֲנֵה־דָן: παρεμβολὴ Δάν: *Castra Dan*: the "Camp-of-Dan:" Luth. *Lager Dans*), a name which commemorated the first encampment of the band of six hundred Danite warriors before setting out on their expedition to Laish. The position of the spot is specified with great precision, as "behind Kirjath-jearim" (Judg. xviii. 12), and as "between Zorah and Eshtaol" (xiii. 25; here the name is translated in the A. V.). Kirjath-jearim is identified with tolerable certainty as *Kuriet-el-Enab*, and Zorah in *Sur'a*, about 7 miles S.W. of it. But no site has yet been suggested for Eshtaol which would be compatible with the above conditions, requiring as they do that Kirjath-jearim should lie between it and Zorah. "Eshtaol, a "remarkable conical hill about an hour from *Kuriet-el-Enab*, towards Jerusalem," south of the road, we have a site which is not dissimilar in name to Eshtaol, while its position sufficiently answers the requirements. Mr. Williams (*Holy City*, i. 12 *note*) was shewn a site on the north side of the *Wady Ismail*, N.N.E. from *Deir el-Ezm*—which bore the name of *Beit Mahanem*, and which he suggests may be identical with Mahaneh Dan. The position is certainly very suitable; but the name does not occur in the lists or maps of other travellers—not even of Tobler (*Dritte Wanderung*, 1859); and the question must be left with that started above, of the identity of *Kustul* and Eshtaol, for the investigation of future explorers and Arabic scholars.

The statement in xviii. 12 of the origin of the name is so precise, and has so historical an air, that it supplies a strong reason for believing that the events there recorded took place earlier than those in xiii. 25, though in the present arrangement of the book of Judges they come after them. [G.]

MAHARA'I (מַחְרַי: Νοεφί; Alex. *Maepael*, in 2 Sam. xxiii. 28; Μαραί; Alex. Μοόμ, 1 Chr. xi. 30; Μεηρά; Alex. *Moopaï*, 1 Chr. xxvii. 13), *Maharai*, *Marai*, 1 Chr. xxvii. 13), an inhabitant of Netophah in the tribe of Judah, and one of David's captains. He was of the family of Zerah, and commanded the tenth monthly division of the army.

MA'HATH (מַחַת: Μαάθ: *Mahath*). 1. The son of Amasai, a Kohathite of the house of Korah, and ancestor of Heman the singer (1 Chr. vi. 35). In ver. 25 he is called AHIMOTH (Hervey, *Geneal.* p. 215).

2. (Alex. Μαάθ, 2 Chr. xxix. 12; Vat. MS. Ναάθ, 2 Chr. xxxi. 13). Also a Kohathite, who, in the reign of Hezekiah, was appointed, as one of the representatives of his house, to assist in the purification of the Levites, by which they prepared themselves to cleanse the Temple from the traces of idolatrous worship. He was apparently the same who, with other Levites, had the charge of the tithes and dedicated offerings, under the superintendence of Cononiah and Shimei.

MAH'AVITE, THE (הַמַּחֲוִים, *i. e.* "the Machavites": ὁ Μίες; Alex. ὁ Μασσεί: *Mausnites*), the designation of Eliel, one of the warriors of king David's guard, whose name is preserved in the catalogue of 1 Chron. only (xi. 46). It will be observed that the word is plural in the Hebrew text, but the whole of the list is evidently in so confused a state, that it is impossible to draw any inference from that circumstance. The Targum has דְּמִן מָחֲוָא, "from Machavua." Kennicott (*Dissert.* 231) conjectures that originally the Hebrew may have stood מֵהַחִוִּים, "from the Hivites." Others have proposed to insert an N and read "the Mahanaimite" (Fürst, *Hdwb.* 721*a*; Bertheau, *Chronik*, 136). [G.]

MAHAZ'IOTH (מַחֲזִיאוֹת: Μααζιόθ; Alex. Μααζιάθ: *Mahazioth*), one of the 14 sons of Heman the Kohathite, who formed part of the Temple choir, under the leadership of their father with Asaph and Jeduthun. He was chief of the 23rd course of twelve musicians (1 Chr. xxv. 4, 30), whose office it was to blow the horns.

MAHER-SHALAL-HASH-BAZ (מַהֵר שָׁלָל חָשׁ בַּז: Ταχέως σκύλευσον δξέως προνόμευσον: *Accelera spolia detrahere festina*), son of Isaiah, and younger brother of Shear-jashub, of whom nothing more is known than that his name was given by Divine direction, to indicate that Damascus and Samaria were soon to be plundered by the king of Assyria (Is. viii. 1-4; comp. vol. i. p. 880). In reference to the grammatical construction of the several parts of the name, whether the verbal parts are imperatives, indicatives, infinitives, or verbal adjectives, leading versions, as well as the opinions of critics differ, though all agree as to its general import (comp. Drechsler *in loc.*). [E. H—e.]

MAH'LAH (מַחְלָה: Μαελά, Num. xxvi. 33; Μααλά, Num. xxvii. 1; Josh. xvii. 3; Μαελά, Num. xxxvi. 11; Μαελά; Alex. Μοολά, 1 Chr. vii. 18: *Maala* in all cases, except *Mohola*, 1 Chr. vii. 18), the eldest of the five daughters of Zelophehad, the grandson of Manasseh, in whose favour the law of succession to an inheritance was altered (Num xxvii. 1 11). She married her cousin, and received as her share a portion of the territory of Manasseh E. of the Jordan.

MAH'LI (מַחְלִי: Μοολί: *Moholi*). 1. The son of Merari, the son of Levi, and ancestor of the family of the MAHLITES (Num. iii. 20; 1 Chr. vi. 19, 29, xxiv. 26). In the last quoted verse there is apparently a gap in the text, Libni and Shimei belonging to the family of Gershom (comp. ver. 20, 42), and Eleazar and Kish being afterwards described as the sons of Mahli (1 Chr. xxiii. 21, xxiv. 28). One of his descendants, Sherebiah, was appointed one of the ministers of the Temple in the days of Ezra (Ezr. viii. 18). He is called MAHALI in the A. V. of Ex. vi. 19, MOLI in 1 Esd. viii. 47, and MACHLI in the margin.

2. The son of Mushi, and grandson of Merari (1 Chr. vi. 47, xxiii. 23, xxiv. 30).

MAH'LITES, THE (הַמַּחְלִי: ὁ Μοολί: *Moholitae, Moholi*), the descendants of Mahli the son of Merari (Num. iii. 33, xxvi. 58).

MAH'LON (מַחְלוֹן: Μαάλων: *Maalon*), the first husband of Ruth. He and his brother Chilion were sons of Elimelech and Naomi, and are described, exactly in the same terms with a subsequent member of their house—Jesse—as "Ephrathites of Bethlehem-judah" (Ruth i. 2, 5; iv. 9, 10; comp. 1 Sam. xvii. 12).

It is uncertain which was the elder of the two. In the narrative (i. 2, 5) Mahlon is mentioned first; but in his formal address to the elders in the gate (iv. 9), Boaz says "Chilion and Mahlon." Like his brother, Mahlon died in the land of Moab without offspring, which in the Targum on Ruth (i. 5) is explained to have been a judgment for their transgression of the law in marrying a Moabitess. In the Targum on 1 Chr. iv. 22, Mahlon is identified with Joash, possibly on account of the double meaning of the Hebrew word which follows, and which signifies both "had dominion" and "married." (See that passage.) [G.]

MA'HOL (מָחוֹל: Μάλ; Alex. Μαούλ: *Mahol*). The father of Ethan the Ezrahite, and Heman, Chalcol, and Darda, the four men most famous for wisdom next to Solomon himself (1 K. iv. 31), who in 1 Chr. ii. 6 are the sons and immediate descendants of Zerah. Mahol is evidently a proper name, but some consider it an appellative, and translate "the sons of Mahol" by "the sons of song," or "sons of the choir," in reference to their skill in music. In this case it would be more correct to render it "sons of the dance;" *mâchôl* corresponding to the Greek χόρος in its original sense of "a dance in a ring," though it has not followed the meanings which have been attached to its derivatives "chorus" and "choir." Jarchi says that "they were skilled in composing hymns which were recited in the dances of song." Another explanation still is that Ethan and his brethren the minstrels were called "the sons of Mahol," because *mâchôl* is the name of an instrument of music in Ps. cl. 4. Josephus (*Ant.* viii. 2, §5) calls him Ἡμάων. [W. A. W.]

MAIA'NEAS (Μαιάννας: om. in Vulg.) = MAASEIAH, 7 (1 Esd. ix. 48); probably a corruption of MAASIAS.

MAK'AZ (מַכָּץ: Μαχεμάς; Alex. Μαχμας: *Macces*), a place, apparently a town, named once only (1 K. iv. 9), in the specification of the jurisdiction of Solomon's commissariat officer, Ben-Hakar. The places which accompany it—Shaalbim, Beth-shemesh, and Elon-beth-hanan—seem to have been on the western slopes of the mountains of Judah and Benjamin, *i. e.* the district occupied by the tribe of Dan. But Makaz has not been discovered. Michmash—the reading of the LXX. (but of no other version)—is hardly possible, both for distance and direction, though the position and subsequent importance of Michmash, and the great fertility of its neighbourhood, render it not an unlikely seat for a commissariat officer. [G.]

MA'KED (Μακέδ; Alex. Μακεβ: Syr. *Mokor*: Vulg. *Mageth*), one of the "strong and great" cities of Gilead—Josephus says Galilee, but this must be an error—into which the Jews were driven by the Ammonites under Timotheus, and from which they were delivered by Judas Maccabaeus (1 Macc. v. 26, 36; in the latter passage the name is given in the A. V. MAGED.) By Josephus (*Ant.* xii. 8, §3) it is not mentioned. Some of the other cities named in this narrative have been identified; but no name corresponding to Maked has yet been discovered; and the conjecture of Schwarz (p. 240) that it is a corruption of MINNITH (מנת for מנת), though ingenious, can hardly be accepted without further proof. [G.]

MAK'HELOTH (מַקְהֵלֹת: Μακηλώθ: *Maceloth*), a place only mentioned in Num. xxxiii. 25 as that of a desert encampment of the Israelites. The name is plural in form, and may signify "places of meeting." [H. H.]

MAK'KEDAH (מַקֵּדָה: Μακηδά, once Μακηδάν; Alex. Μακηδα: Syr. *Mokor*, and *Nakala*. *Maceda*), a place memorable in the annals of the conquest of Canaan as the scene of the execution by Joshua of the five confederate kings: an act by which the victory of Beth-horon was sealed and consummated, and the subjection of the entire southern portion of the country ensured. Makkedah is first mentioned (Josh. x. 10) with Azekah, in the narrative of the battle of Beth-horon, as the point to which the rout extended; but it is difficult to decide whether this refers to one of the operations in the earlier portion of the fight, or is not rather an anticipation of its close—of the circumstances related in detail in verses 11 and 16, &c. But with regard to the event which has conferred immortality on Makkedah—the "crowning mercy"—(if we may be allowed to borrow an expression from a not dissimilar transaction in our own history)—there is fortunately no obscurity or uncertainty. It unquestionably occurred in the afternoon of that tremendous day, which "was like no day before or after it." The order of the events of the twenty-four hours which elapsed after the departure from the ark and tabernacle at the camp seems to have been as follows. The march from the depths of the Jordan valley at Gilgal, through the rocky clefts of the ravines which lead up to the central hills, was made during the night. By or before dawn they had reached Gibeon, then—at the favourite hour for such surprises[a]—came the sudden onset and the first carnage[b]; then the chase and the appeal of Joshua to the rising sun, just darting his level rays over the ridge of the hill of Gibeon in the rear; then the furious storm assisting and completing the rout. In the meantime the

[a] *E. g.* Gideon's, Saul's, and David's attacks. [See EXAMPLES, i. 551 *a*.]

[b] The Moslem tradition is that the attack took place on a Friday, and that the day was prolonged by God that, to prevent the Sabbath being encroached upon. (See Jalaladdin, *Temple of Jerusalem*. 267.)

detection of the five chiefs in their hiding-place has been communicated to Joshua, and, as soon as the matter in hand will allow, he rushes on with the whole of his force to Makkedah (ver. 21). The first thing to be done is to form a regular camp (מַחֲנֶה). The next to dispose of the five chiefs, and that by no hurried massacre, but in so deliberate and judicial a manner as at once to infuse terror into the Canaanites and confidence into his own followers, to shew to both that "thus shall Jehovah do to all the enemies" of Israel. The cave in the recesses of which the wretched kings were hidden was a well-known one.[c] It was close to the town,[d] we may safely conclude that the whole proceeding was in full view of the walls. At last the ceremonial is over, the strange and significant parable has been acted, and the bodies of Adoni-zedek and his companions are swinging[e] from the trees—possibly the trees of some grove sacred to the abominable rites of the Canaanite Ashtaroth—in the afternoon sun. Then Joshua turns to the town itself. To force the walls, to put the king and all the inhabitants to the sword (ver. 28) is to that indomitable energy, still fresh after the gigantic labours and excitements of the last twenty-four hours—the work of an hour or two. And now the evening has arrived, the sun is at last sinking—the first sun that has set since the departure from Gilgal,—and the tragedy is terminated by cutting down the five bodies from the trees, and restoring them to the cave, which is then so blocked up with stones as henceforth never again to become refuge for friend or foe of Israel.

The taking of Makkedah was the first in that series of sieges and destructions by which the Great Captain possessed himself of the main points of defence throughout this portion of the country. Its situation has hitherto eluded discovery. The catalogue of the cities of Judah in Joshua (xv. 41) places it in the *Shefelah* or maritime plain, but unfortunately it forms one of a group of towns of which few or none are identified. The report of Eusebius and Jerome (*Onomasticon*, "Maceda") is that it lay 8 miles to the east of Eleutheropolis, *Beit-Jibrin*, a position irreconcileable with every requirement of the narrative. Porter (*Handbook*, 224, 251) suggests a ruin on the northern slope of the *Wady es Sumt*, bearing the somewhat similar name of *el-Kîddîeh*; but it is difficult to understand how this can have been the position of Makkedah, which we should imagine would be found, if it ever is found, considerably nearer Ramleh or Jimzu.

Van de Velde (*Memoir*, 332) would place it at *Semeil*, a village standing on a low hill 6 or 7 miles N.W. of *Beit-Jibrin*; but the only claim of this site appears to be the reported existence in the neighbourhood of a large cavern, while its position—at least 8 miles further from Beth-horon than even *el-Kîddîeh*—would make the view of the narrative taken above impossible. [G.]

MAK'TESH (הַמַּכְתֵּשׁ,[a] with the def. article: ἡ συντετριμμένη: *Pila*), a place, evidently in Jerusalem, the inhabitants of which are denounced by Zephaniah (i. 11). Ewald conjectures (*Propheten*, 364) that it was the "Phoenician quarter" of the city, in which the traders of that nation—the Canaanites (A. V. "merchants"), who in this passage are associated with Mactesh—resided, after the custom in Oriental towns. As to which part of the city this quarter occupied we have little or no indication. The meaning of "Mactesh" is probably a deep hollow, literally a "mortar."[b] This the Targum identifies with the torrent Kedron, the deep basin or ravine of which sinks down below the eastern wall and south-eastern corner of the city. The Targum, probably with an eye to the traditional uncleanness of this valley, and to the idol-worship perpetrated at its lower end, says, "Howl ye inhabitants of the torrent Kedron, for all the people are broken whose works were like the works of the people of Canaan." But may it not, with equal probability, have been the deep valley which separated the Temple from the upper city, and which at the time of Titus' siege was, as it still is, crowded with the "bazaars" of the merchants? (See vol. i. 1012 *b*.) [G.]

MAL'ACHI (מַלְאָכִי: Μαλαχίας in the title only: *Malachias*), the last, and therefore called "the seal" of the prophets, as his prophecies constitute the closing book of the canon. His name is probably contracted from Malachijah, "messenger of Jehovah," as Abi (2 K. xviii. 2) from Abijah (2 Chr. xxix. 1). Of his personal history nothing is known. A tradition preserved in Pseudo-Epiphanius (*De Vitis Proph.*) relates that Malachi was of the tribe of Zebulun, and born after the captivity at Sopha (Σωφᾶ) in the territory of that tribe. According to the same apocryphal story he died young, and was buried with his fathers in his own country. Jerome, in the preface to his *Commentary on Malachi*, mentions a belief which was current among the Jews, that Malachi was identical with Ezra the priest, because the circumstances recorded in the narrative of the latter are also mentioned by the prophet. The Targum of Jonathan ben Uzziel, on the words "by the hand of Malachi" (i. 1), gives the gloss "whose name is called Ezra the scribe." With equal probability Malachi has been identified with Mordecai, Nehemiah, and Zerubbabel. The LXX. render "by Malachi" (Mal. i. 1), "by the hand of his angel;" and this translation appears to have given rise to the idea that Malachi, as well as Haggai and John the Baptist, was an angel in human shape (comp. Mal. iii. 1; 2 Esd. i. 40; Jerome, *Comm. in Hag.* i. 13). Cyril alludes to this belief only to express his disapprobation, and characterizes those who held it as romancers (οἱ μάτην ἐβραψῳδήκασιν κ. τ. λ.). Another Hebrew tradition associated Malachi with Haggai and Zechariah as the companions of Daniel when he saw the vision recorded in Dan. x. 7 (Smith's *Select Discourses*, p. 214; ed. 1660), and as among the first members of the Great Synagogue, which consisted of 120 elders.

[c] It is throughout distinguished by the definite article, הַמְּעָרָה, "*the* cave."

[d] The preposition used is the same as that employed to describe the position of the five kings in the cave—בַּמַּכְתֵּשׁ, "in Makkedah"—בַּמְּעָרָה, "in the cave."

[e] The word תָּלָה, rendered "hang" in ver. 26, has the force of suspending. See Ps. cxxxvii. 2, 2 Sam. xviii. 10 and other passages where it must have this meaning as it is an entirely distinct term from יָקַע, which, though also translated by "hang" in the A. V., really means to crucify. See MEPHIBOSHETH.

[a] One of the few cases in which our translators have represented the Hebrew letter *Caph* by K, which they commonly reserve for *Koph*. [See also MEKONAH.]

[b] The literal Aquila renders the words by εἰς τὸν ὅλμον; Theodotion, ἐν τῷ βάθει. The Hebrew term is the same as that employed in Judg. xv. 19 for the hollow basin or combe in Lehi from which the spring burst forth for the relief of Samson.

The time at which his prophecies were delivered is not difficult to ascertain. Cyril makes him contemporary with Haggai and Zechariah, or a little later. Syncellus (p. 240 B) places these three prophets under Joshua the son of Josedec. That Malachi was contemporary with Nehemiah is rendered probable by a comparison of ii. 8 with Neh. xiii. 15; ii. 10-16 with Neh. xiii. 23, &c.; and iii. 7-12 with Neh. xiii. 10, &c. That he prophesied after the times of Haggai and Zechariah is inferred from his omitting to mention the restoration of the Temple, and from no allusion being made to him by Ezra. The captivity was already a thing of the long past, and is not referred to. The existence of the Temple-service is presupposed in i. 10, iii. 1, 10. The Jewish nation had still a political chief (i. 8), distinguished by the same title as that borne by Nehemiah (Neh. xii. 26), to which Gesenius assigns a Persian origin. Hence Vitringa concludes that Malachi delivered his prophecies after the second return of Nehemiah from Persia (Neh. xiii. 6), and subsequently to the 32nd year of Artaxerxes Longimanus (cir. B.C. 420), which is the date adopted by Kennicott and Hales, and approved by Davidson (*Introd.* p. 985). It may be mentioned that in the Seder Olam Rabba (p. 55, ed. Meyer) the date of Malachi's prophecy is assigned, with that of Haggai and Zechariah, to the second year of Darius; and his death in the Seder Olam Zuta (p. 105) is placed, with that of the same two prophets, in the 52nd year of the Medes and Persians. The principal reasons adduced by Vitringa, and which appear conclusively to fix the time of Malachi's prophecy as contemporary with Nehemiah, are the following:—The offences denounced by Malachi as prevailing among the people, and especially the corruption of the priests by marrying foreign wives, correspond with the actual abuses with which Nehemiah had to contend in his efforts to bring about a reformation (comp. Mal. ii. 8 with Neh. xiii. 29). The alliance of the high-priest's family with Tobiah the Ammonite (Neh. xiii. 4, 28) and Sanballat the Horonite had introduced neglect of the customary Temple-service, and the offerings and tithes due to the Levites and priests, in consequence of which the Temple was forsaken (Neh. xiii. 4-13), and the Sabbath openly profaned (id. 15-21). The short interval of Nehemiah's absence from Jerusalem had been sufficient for the growth of these corruptions, and on his return he found it necessary to put them down with a strong hand, and to do over again the work that Ezra had done a few years before. From the striking parallelism between the state of things indicated in Malachi's prophecies and that actually existing on Nehemiah's return from the court of Artaxerxes, it is on all accounts highly probable that the efforts of the secular governor were on this occasion seconded by the preaching of "Jehovah's messenger," and that Malachi occupied the same position with regard to the reformation under Nehemiah, which Isaiah held in the time of Hezekiah, and Jeremiah in that of Josiah. The last chapter of canonical Jewish history is the key to the last chapter of its prophecy.

The book of Malachi is contained in four chapters in our version, as in the LXX., Vulgate, and Peshito-Syriac. In the Hebrew the 3rd and 4th form but one chapter. The whole prophecy naturally divides itself into three sections, in the first of which Jehovah is represented as the loving father and ruler of His people (i. 2–ii. 9); in the second, as the supreme God and father of all (ii. 10-16), and in the third, as their righteous and final judge (ii. 17–end). These may be again subdivided into smaller sections, each of which follows a certain order: first, a short sentence; then the sceptical questions which might be raised by the people; and, finally, their full and triumphant refutation. The formal and almost scholastic manner of the prophecy seemed to Ewald to indicate that it was rather delivered in writing than spoken publicly. But though this may be true of the prophecy in its present shape, which probably presents the substance of oral discourses, there is no reason for supposing that it was not also pronounced orally in public, like the warnings and denunciations of the older prophets, however it may differ from them in vigour of conception and high poetic diction. The style of the prophet's language is suitable to the manner of his prophecy. Smooth and easy to a remarkable degree, it is the style of the reasoner rather than of the poet. We miss the fiery prophetic eloquence of Isaiah, and have in its stead the calm and almost artificial discourse of the practised orator, carefully modelled upon those of the ancient prophets: thus blending in one the characteristics of the old prophetical and the more modern dialogistic structures.

I. The first section of the prophet's message consists of two parts; the first (i. 1-8) addressed to the people generally, in which Jehovah, by His messenger, asserts His love for them, and proves it, in answer to their reply, "Wherein hast thou loved us?" by referring to the punishment of Edom as an example. The second part (i. 6–ii. 9) is addressed especially to the priests, who had despised the name of Jehovah, and had been the chief movers of the defection from His worship and covenant. They are rebuked for the worthlessness of their sacrifices and offerings, and their profanation of the Temple thereby (i. 7-14). The denunciation of their offence is followed by the threat of punishment for future neglect (ii. 1-3), and the character of the true priest is drawn as the companion picture to their own (ii. 5-9).

II. In the second section (ii. 10-16) the prophet reproves the people for their intermarriages with the idolatrous heathen, and the divorces by which they separated themselves from their legitimate wives, who wept at the altar of Jehovah; in violation of the great law of marriage which God, the father of all, established at the beginning.

III. The judgment, which the people lightly regard, is announced with all solemnity, ushered in by the advent of the Messiah. The Lord, preceded by His messenger, shall come to His Temple suddenly, to purify the land from its iniquity, and to execute swift judgment upon those who violate their duty to God and their neighbour. The first part (ii. 17–iii. 5) of the section terminates with the threatened punishment; in the second (iii. 6-12) the faithfulness of God to his promises is vindicated, and the people exhorted to repentance, with its attendant blessings; in the third (iii. 13–iv. 6) they are reproved for their want of confidence in God and for confusing good and evil. The final severance between the righteous and the wicked is then set forth, and the great day of judgment is depicted, to be announced by the coming of Elijah, or John the Baptist, the forerunner of Christ (Matt. xi. 14, xvii. 10-13).

The prophecy of Malachi is alluded to in the N. T., and its canonical authority thereby esta-

ished (comp. Mark i. 2, ix. 11, 12; Luke i. 17; Rom. ix. 13). [W. A. W.]

MAL'ACHY (*Malachias*), the prophet Malachi (2 Esd. i. 40).

MAL'CHAM (מַלְכָּם: Μελχάμ; Alex. Μελχάμ· *Molchom*). 1. One of the heads of the fathers of Benjamin, and son of Shaharaim by his wife Hodesh (1 Chr. viii. 9), whom the Targum of R. Joseph identifies with Baara.

2. ὁ βασιλεὺς αὐτῶν: *Melchom*.) The idol Molech, as some suppose (Zeph. i. 5). The word literally signifies "their king," as the margin of our version gives it, and is referred by Gesenius to an idol generally, as invested with regal honours by its worshippers. He quotes Is. viii. 21, and Am. v. 26, in support of this view, though he refers Jer. xlix. 1, 3, to Molech (as the LXX., the present reading being evidently corrupt), and regards Malcham as equivalent to Milcom (1 K. xi. 5, &c.). Ewald (*Kurzg. Hdb.* Jeremia), while he considers the idol Milcom as unquestionably intended in Jer. xlix. 1, renders *Malcham* literally "their king" in ver. 3. The same ambiguity occurs in 2 Sam. xii. 30, where David, after his conquest of the Ammonites, is said to have taken the crown of "their king," or "Malcham" (see LXX. and Vulg. on 1 Chr. xx. 2). A legend is told in Jerome's *Quaestiones Hebr.* (1 Chr. xx. 2) how that, as it was unlawful for a Hebrew to touch anything of gold or silver belonging to an idol, Ittai the Gittite, who was a Philistine, snatched the crown from the head of Milcom, and gave it to David, who thus avoided the pollution. [ITTAI; MILCOM.]

Again, in 2 Sam. xii. 31, the *Cethîb* has בַּמַּלְבֵּן, where the *Keri* is בְּמַלְבֵּן (A. V. "through the brick-kiln"). Kimchi's note on the passage is as follows: "i. e. in the place of Molech, in the fire which the children of Ammon made their children pass through to Molech; for Milcom was the abomination of the children of Ammon, that is Molech, and Milcom and Malcom are one." [W. A. W.]

MALCHI'AH (מַלְכִּיָּה: Μελχία: *Melchias*). 1. A descendant of Gershom, the son of Levi, and ancestor of Asaph the minstrel (1 Chr. vi. 40).

2. *Melchia*.) One of the sons of Parosh, who had married a foreign wife, and put her away at the command of Ezra (Ezr. x. 25). MELCHIAS in 1 Esd. ix. 26.

3. (*Melchias*.) Enumerated among the sons of Harim, who lived in the time of Ezra, and had intermarried with the people of the land (Ezr. x. 31). In 1 Esd. x. 32 he appears as MELCHIAS, and in Neh. iii. 11 as MALCHIJAH 4.

4. Son of Rechab, and ruler of the circuit or district of Bethhaccerem. He took part in the rebuilding of the wall of Jerusalem under Nehemiah, and repaired the dung-gate (Neh. iii. 14).

5. "The goldsmith's son," who assisted Nehemiah in rebuilding the wall of Jerusalem (Neh. iii. 31). The word rendered "the goldsmith" is taken as a proper name by the LXX. (Ζαρφί), and in the Peshito-Syriac Malchiah is called "the son of Zephaniah." The A. V. has followed the Vulgate and Jarchi.

6. (Μελχίας; Alex. Μελχείας: *Melchia*.) One of the priests who stood at the left hand of Ezra when he read the law to the people in the street before the water-gate (Neh. viii. 4). In 1 Esd. x. 44 he is called MELCHIAS.

7. A priest, the father of Pashur = MALCHIJAH 1 (Neh. xi. 12; Jer. xxxviii. 1), and MELCHIAH (Jer. xxi. 1).

8 (מַלְכִּיָּהוּ.) The son of Ham-melech (or "the king's son," as it is translated in 1 K. xxii. 26; 2 Chr. xxviii. 7), into whose dungeon or cistern Jeremiah was cast (Jer. xxxviii. 6). The title "king's son" is applied to Jerahmeel (Jer. xxxvi. 26), who was among those commissioned by the king to take prisoners Jeremiah and Baruch; to Joash, who appears to have held an office inferior to that of the governor of the city, and to whose custody Micaiah was committed by Ahab (1 K. xxii. 26); and to Maaseiah who was slain by Zichri the Ephraimite in the invasion of Judah by Pekah, in the reign of Ahaz (2 Chr. xxviii. 7). It would seem from these passages that the title "king's son" was official, like that of "king's mother," and applied to one of the royal family, who exercised functions somewhat similar to those of Potiphar in the court of Pharaoh. [W. A. W.]

MAL'CHIEL (מַלְכִּיאֵל: Μελχιήλ, Gen. xlvi. 17; Μελχιήλ in Num. and Chr.; as Alex. in all cases: *Melchiel*), the son of Beriah, the son of Asher and ancestor of the family of the MALCHIELITES (Num. xxvi. 45). In 1 Chr. vii. 31 he is called the father, that is founder, of Birzavith or Berazith, as is the reading of the Targum of R. Joseph. Josephus (*Ant.* ii. 7, §4) reckons him with Heber among the six sons of Asher, thus making up the number of Jacob's children and grandchildren to seventy, without reckoning great-grandchildren.

MAL'CHIELITES, THE (הַמַּלְכִּיאֵלִי: Μελχιηλί: *Melchielitae*), the descendants of Malchiel, the grandson of Asher (Num. xxvi. 45).

MALCHI'JAH (מַלְכִּיָּה: Μελχία; Alex. Μελχίας: *Melchias*). 1. A priest, the father of Pashur (1 Chr. ix. 12); the same as MALCHIAH 7, and MELCHIAH.

2. (*Melchia*.) A priest, chief of the fifth of the twenty-four courses appointed by David (1 Chr. xxiv. 9).

3. (Ἀσαβία: *Jammebias*.) An Israelite layman of the sons of Parosh, who at Ezra's command put away his foreign wife (Ezr. x. 25). In 1 Esd. ix. 26 he is called ASIBIAS, which agrees with the reading of the LXX.

4. (Μελχίας; Alex. Μελχείας: *Melchius*.) Son, that is, descendant of Harim, who with Hashub repaired the tower of the furnaces when the wall of Jerusalem was rebuilt by Nehemiah (Neh. iii. 11). He is probably the same as MALCHIAH 3.

5. (Μελχία; Alex. Μελχεία.) One of the priests who sealed the covenant with Nehemiah (Neh. x. 3). It seems probable that the names in the list referred to are rather those of families than of individuals (comp. 1 Chr. xxiv. 7-18, and Neh. xii. 1-7), and in this case Malchijah in Neh. x. 3 would be the same with the head of the fifth course of priests = MALCHIJAH 2.

6. (om. in Vat. MS.; Alex. Μελχείας: *Melchia*.) One of the priests who assisted in the solemn dedication of the wall of Jerusalem under Ezra and Nehemiah (Neh. xii. 42).

MALCH'IRAM (מַלְכִּירָם: Μελχιράμ: *Melchiram*), one of the sons of Jeconiah, or Jehoiachin, the last but one of the kings of Judah (1 Chr. iii. 18).

MAL'CHI-SHUA (מַלְכִּי־שׁוּעַ: Μελχεσυά: *Melchisua*), one of the sons of king Saul. His position in the family cannot be exactly determined. In the two genealogies of Saul's house preserved in Chronicles he is given as the second son next below Jonathan (1 Chr. viii. 33, ix. 39). But in the account of Saul's offspring in 1 Samuel he is named third—Ishui being between him and Jonathan (1 Sam. xiv. 49), and on the remaining occasion the same order is preserved, but Abinadab is substituted for Ishui (1 Sam. xxxi. 2). In both these latter passages the name is erroneously given in the A. V. as Melchi-shua. Nothing is known of Malchi-shua beyond the fact that he fell, with his two brothers, and before his father in the early part of the battle of Gilboa. [G.]

MAL'CHUS (Μάλχος = מַלּוּךְ, *Malluch*, in 1 Chr. vi. 44, Neh. x. 4, &c.; LXX. Μαλούχ or Μαλούγ; and Joseph. Μάλχος, *Ant.* xiii. 5, §1, xiv. 14, §1) is the name of the servant of the high-priest, whose right ear Peter cut off at the time of the Saviour's apprehension in the garden. See the narrative in Matt. xxvi. 51; Mark xiv. 47; Luke xxii. 49-51; John xviii. 10. He was the personal servant (δοῦλος) of the high-priest, and not one of the bailiffs or apparitors (ὑπηρέτης) of the Sanhedrim. The high-priest intended is Caïaphas no doubt (though Annas is called ἀρχιερεύς in the same connexion); for John, who was personally known to the former (John xviii. 15), is the only one of the evangelists who gives the name of Malchus. This servant was probably stepping forward at the moment with others to handcuff or pinion Jesus, when the zealous Peter struck at him with his sword. The blow was meant undoubtedly to be more effective, but reached only the ear. It may be as Stier remarks (*Reden Jesu*, vi. 268), that the man seeing the danger, threw his head or body to the left, so as to expose the right ear more than the other. The allegation that the writers are inconsistent with each other, because Matthew, Mark, and John say either ὠτίον, or ὠτάριον (as if that meant the lappet or tip of the ear), while Luke says οὖς, is groundless. The Greek of the New Testament age, like the modern Romaic, made no distinction often between the primitive and diminutive. In fact, Luke himself exchanges the one term for the other in this very narrative. The Saviour, as His pursuers were about to seize Him, asked to be left free for a moment longer (ἐᾶτε ἕως τούτου), and that moment He used in restoring the wounded man to soundness. The ἁψάμενος τοῦ ὠτίου may indicate (which is not forbidden by ἀφεῖλεν, ἀπέκοψεν) that the ear still adhered slightly to its place. It is noticeable that Luke the physician is the only one of the writers who mentions the act of healing. It is a touching remembrance that this was our Lord's last miracle for the relief of human suffering. The hands which had been stretched forth so often to heal and bless mankind, were then bound, and His beneficial ministry in that form of its exercise was finished for ever. [H. B. H.]

From מָלַח (Arab. ملح), "salt."

[b] Old editions of the text read ἅλιμα, instead of ἄλιμα, as from ἀ priv. and λιμός, "hunger." So Chrysostom ἄλιμα, βοτάνη τίς ἐστιν, ταχὺ πληροῦσα τὴν ἐσθίοντα.

[c] עֲלֵי־שִׂיחַ some translate "on the branch." See Lee's *Comment.* on Job, l. c.

MA L'ELEEL (Μαλελεήλ: *Malaleel*). The same as MAHALALEEL, the son of Cainan (Luke iii. 37; Gen. v. 12, marg.).

MALLOS, THEY OF (Μαλλῶται: *Mallotae*), who, with the people of Tarsus, revolted from Antiochus Epiphanes because he had bestowed them on one of his concubines (2 Macc. iv 30). The absence of the king from Antioch to put down the insurrection, gave the infamous Menelaus the high-priest, an opportunity of purloining some of the sacred vessels from the Temple of Jerusalem (ver. 32, 39), an act which finally led to the murder of the good Onias (ver. 34, 35). Mallos was an important city of Cilicia, lying at the mouth of the Pyramus (*Seihun*), on the shore of the Mediterranean, N.E. of Cyprus, and about 20 miles from Tarsus (*Tersûs*). (See *Dict. of Geography.*) [G.]

MALLO'THI (מַלּוֹתִי: Μαλλωθί; Alex. Μαλωθί, and Μελληθί: *Mellothi*), a Kohathite, one of the fourteen sons of Heman the singer, and chief of the nineteenth course of twelve Levites into which the Temple choir was divided (1 Chr. xxv. 4, 26).

MALLOWS (מַלּוּחַ[a]: *malluach*: ἅλιμα: *herbas et arborum cortices*). By the Hebrew word we are no doubt to understand some species of *Orache*, and in all probability the *Atriplex halimus* of botanists. It occurs only in Job xxx. 4, where the patriarch laments that he is exposed to the derision of the lowest of the people, "whose fathers he would have disdained to have set with the dogs of his flock," and who from poverty were obliged to seek their sustenance in desert places amongst wild herbs—"who pluck off the *sea orache* near the hedges,[c] and eat the bitter roots of the Spanish Broom."

Jew's Mallow (*Corchorus olitorius*).

Some writers, as R. Levi (Job xxx.) and Luther, with the Swedish and the old Danish versions, have understood "nettles" to be denoted by *Malluach*, this troublesome weed having been from time immemorial an article of occasional diet amongst the

poor, even as it is amongst ourselves at this day (Plin. *N. H.* xxi. 15; Athen. iv. c. 15). Others have conjectured that some species of "mallow" (*malva*) is intended, as Deodatius, and the A. V. Sprengel (*Hist. Rei herb.* 14) identifies the "Jew's mallow" (*Corchorus olitorius*) with the *Malluach*, and Lady Callcott (*Script. Herb.* p. 255) is of a similar opinion. "In Purchase's *Pilgrims*," observes this writer, "there is a letter from Master William Biddulph, who was travelling from Aleppo to Jerusalem in 1600, in which he says, 'we saw many poor people gathering mallows and three-leaved grasse, and asked them what they did with it, and they answered that it was all their food and they did eate it'" (see also Harmer's *Observations*, iii. 168). There is no doubt that this same mallow is still eaten in Arabia and Palestine, the leaves and pods being used as a pot-herb. Dr. Shaw (*Travels*, i. 258, 8vo. 1808) mentions *Mellow-Keahs*, which he says is the same with the *Corchorus*, as being cultivated in the gardens of Barbary, and draws attention to the resemblance of this word with the *Malluach* of Job, but he thinks "some other plant of a more saltish taste" is rather intended. The *Atriplex halimus* has undoubtedly the best claim to represent the *Malluach*, as Bochart (*Hieroz.* ii. 725), and before him Drusius (*Quaest. Hebr.* i. qu. 17) have proved. Celsius (*Hierob.* ii. 97), Hiller (*Hierophyt.* i. 457), Rosenmüller (*Schol. in Job* xxx. 4, and *Botany of the Bible*, p. 115), and Dr. Kitto (*Pictor. Bible on Job*) adopt this opinion. The Greek word used by the LXX. is applied by Dioscorides (i. c. 120) to the *Atriplex halimus*, as Sprengel

Atriplex halimus.

(*Comment. in l. c.*) has shown. Dioscorides says of this plant, that "it is a shrub which is used for hedges, and resembles the Rhamnus, being white and without thorns; its leaves are like those of the olive, but broader and smoother, they are cooked as vegetables: the plant grows near the sea, and in hedges." See also the quotation from the Arabian botanist, Aben-Beitar (in Bochart, *l. c.* above), who says that the plant which Dioscorides calls "*halimus*" is the same with that which the Syrians call *Maluch*, Galen (vi. 22), Serapion in Bochart, and Prosper Alpinus (*De Plant. Aegypt.* cxxviii. 45).

The Hebrew name, like the Greek, has reference either to the locality where the plant grows—"nomen graecum a loco natali ἁλίμῳ, παραθαλασσίῳ," says Sprengel—or to its saline taste. The *Atriplex halimus* is a shrub from four to five feet high with many thick branches; the leaves are rather sour to the taste; the flowers are purple and very small; it grows on the sea-coast in Greece, Arabia, Syria, &c., and belongs to the natural Order *Chenopodiaceae*. *Atriplex hortensis*, or garden Orach, is often cooked and eaten as spinach, to which it is by some persons preferred. [W. H.]

MALL'UCH (מַלּוּךְ: Μαλώχ: *Maloch*). 1. A Levite of the family of Merari, and ancestor of Ethan the singer (1 Chr. vi. 44).

2. (Μαλούχ: *Melluch.*) One of the sons of Bani, who put away his foreign wife at Ezra's command (Ezr. x. 29). He was probably of the tribe of Judah and line of Pharez (see 1 Chr. ix. 4). In the parallel list of 1 Esdr. ix. 30, he is called MAMUCHUS.

3. (Βαλούχ; Alex. Μαλούχ: *Maloch.*) One of the descendants of Harim in the time of Ezra, who had married a foreign wife (Ezr. x. 32).

4. (Μαλούχ: *Melluch.*) A priest or family of priests who signed the covenant with Nehemiah (Neh. x. 4).

5. One of the "heads" of the people who signed the covenant on the same occasion (Neh. x. 27).

6. One of the families of priests who returned with Zerubbabel (Neh. xii. 2); probably the same as No. 4. It was represented in the time of Joiakim by Jonathan (ver. 14). The same as MELICU.

MAMAI'AS (Ἀμαία: *Samea*), apparently the same with SHEMAIAH in Ezr. viii. 16. In the Geneva version of 1 Esdr. viii. 44, it is written *Samaian*.

MAM'MON (מָמוֹן: Μαμωνᾶς: Matt. vi. 24, and Luke xvi. 9), a word which often occurs in the Chaldee Targums of Onkelos, and later writers, and in the Syriac Version, and which signifies "riches." This meaning of the word is given by Tertullian, *Adv. Marc.* iv. 33, and by Augustine and Jerome commenting on St. Matthew: Augustine adds that it was in use as a Punic, and Jerome adds that it was a Syriac word. There is no reason to suppose that any idol received divine honours in the east under this name. It is used in St. Matthew as a personification of riches. The derivation of the word is discussed by A. Pfeiffer *Opera*, p. 474. [W. T. B.]

MAMNITANAI'MUS (Μαμνιτάναιμος: *Mathanaeus*), a name which appears in the lists of 1 Esdr. ix. 34, and occupies the place of "Mattaniah, Mattenai," in Ezr. x. 37, of which it is a corruption, as is still more evident from the form "Mamnimatanaius," in which it appears in the Geneva version.

MAMRE (מַמְרֵא: Μαμβρή; Joseph. Μαμβρῆς: *Mamre*), an ancient Amorite,[a] who with

[a] The LXX., except in xiv. 24, give the name with the feminine article. They do the same in other cases; e. g. Baal.

who with his brothers Eshcol and Aner was in alliance with Abram (Gen. xiv. 13, 24), and under the shade of whose oak-grove the patriarch dwelt in the interval between his residence at Bethel and at Beersheba (xiii. 18, xviii. 1). The personality of this ancient chieftain, unmistakeably though slightly brought out[b] in the narrative just cited—a narrative regarded by Ewald and others as one of the most ancient, if not the most ancient, documents in the Bible—is lost in the subsequent chapters. Mamre is there a mere local appellation—"Mamre which faces Machpelah" (xxiii. 17, 19, xxv. 9, xlix. 30, l. 13). It does not appear beyond the book of Genesis. ESHCOL survived to the date of the conquest—survives possibly still—but Mamre and Aner have vanished, at least their names have not yet been met with. If the field and cave of MACHPELAH were on the hill which forms the north-eastern side of the valley of Hebron—and we need not doubt that they were—then Mamre, as "facing" them, must have been on the opposite slope, where the residence of the governor now stands.

In the Vulgate of Jud. ii. 14 (A. V. ii. 24), "torrens Mambre" is found for the *Abronas* of the original text. [G.]

MAMU'CHUS (Μαμοῦχος: *Maluchus*), the same as MALLUCH 2 (1 Esdr. ix. 30). The LXX. was probably Μαλλοῦχος at first, which would easily be corrupted into the present reading.

MAN. Four Hebrew terms are rendered "man" in the A. V. 1. *Ádám*, אָדָם. (A) The name of the man created in the image of God. It appears to be derived from *ádam*,[a] "he or it was red or ruddy," like Edom.[b] The epithet rendered by us "red" has a very wide signification in the Semitic languages, and must not be limited to the English sense. Thus the Arabs speak, in both the literary and the vulgar language, of a "red" camel, using the term *ahmar*,[c] their common word for "red," just as they speak of a "green" ass, meaning in the one case a shade of brown, and in the other a kind of dingy gray. When they apply the term "red" to man, they always mean by it "fair." The name Adam has been supposed by some to be derived from *adámáh*,[d] "earth," or "ground," because Adam was formed of "dust of the ground"[e] (Gen. ii. 7); but the earth or ground derived this appellation from its brownness, which the Hebrews would call "redness." In Egypt, where the alluvial earth of the Nile-valley is of a blackish-brown colour, the name of the country, KEM, signifies "black" in the ancient Egyptian and in Coptic. [EGYPT.] Others have connected the name of Adam with *demuth*, "likeness," from *dámáh*,[f] "he or it was or became like," on account of the use of this word in both narratives of his creation: "And God said, Let us make Adam in our image, after our likeness,"[g] (Gen. i. 26). "In the day of God's creating Adam, in the likeness[h] of God made He him" (v. 1). It should be observed that the usual opinion that by "image" and "likeness" moral qualities are denoted, is perfectly in accordance with Semitic phraseology: the contrary idea, arising from a misapprehension of anthropomorphism, is utterly repugnant to it. This derivation seems improbable, although perhaps more agreeable than that from *ádam* with the derivations of antediluvian names known to us. (B) The name of Adam and his wife (v. 1, 2: comp. i. 27, in which case there is nothing to shew that more than one pair is intended). (C) A collective noun, indeclinable, having neither construct state, plural, nor feminine form, used to designate any or all of the descendants of Adam.

2. *Ish*, אִישׁ, apparently softened from a form unused in the singular by the Hebrews, *énesh*,[i] "man," "woman," "men." It corresponds to the Arabic *ins*,[m] "man," *insán*,[n] softened form *ecsán*,[o] "a man," "a woman," and "man" collectively like *ins*; and perhaps to the ancient Egyptian *as*, "a noble."[p] The variant *Enosh* (mentioned in the note), occurs as the proper name of a son of Seth and grandson of Adam (Gen. iv. 26; 1 Chr i. 1). In the A. V. it is written Enos. It might be supposed that this was a case like that of Adam's name; but this cannot be admitted, since the variant *Ish* and the fem. form *Ishshâh* are used before the birth of Enosh, as in the cases of the naming of Eve (Gen. ii. 23) and Cain (iv. 1). If it be objected that we must not lay too much stress upon verbal criticism, we reply that if so no stress can be laid upon the name of Enosh, which might even be a translation, and that such forms as Methusael and Methuselah, which have the characteristics of a primitive state of Hebrew, oblige us to lay the greatest stress upon verbal criticism.[q]

3. *Geber*, גֶּבֶר, "a man," from *gâbar*,[r] "to be strong," generally with reference to his strength, corresponding to *vir* and ἀνήρ.

4. *Méthim*, מְתִים,[s] "men," always masculine The singular is to be traced in the antediluvian

[b] In the Jewish traditions he appears as encouraging Abraham to undergo the pain of circumcision, from which his brothers would have dissuaded him—by a reference to the deliverance he had already experienced from far greater trials—the furnace of Nimrod and the sword of Chedorlaomer. (Beer, *Leben Abrahams*, 36.)

[a] אָדַם [b] אָדֹם. [c] احمر.

[d] אַדְמָה. [e] עָפָר מִן־הָאֲדָמָה.

[f] דָּמוּת. [g] דָּמָה.

[h] בִּדְמוּתֵנוּ. [i] בִּדְמוּת.

[i] אֱנוֹשׁ; fem. אֱנוֹשָׁה, pl. אֱנוֹשִׁים. variant *enôsh*, אֱנוֹשׁ, which some take to be the primitive form.

[m] انس [n] انسان [o] ايسان

[p] It has been derived from אָנַשׁ, "he was sick," so as to mean weak, mortal; to which Gesenius objects that this verb comes from the theme נָשׁ (*Lex.* s. v. אָנַשׁ) The opposite signification, strength and robustness, has been suggested with a reference to the theme אָשׁ (Fürst, *Concord.* s. v. אִישׁ). It seems more reasonable to suppose, with Gesenius, that this is a primitive word (*Lex.* s. v. אִישׁ). Perhaps the idea of being may lie at its foundation.

[q] The naming of Cain (קַיִן) may suggest how Enosh came to bear a name signifying "man." "I have obtained a man (קָנִיתִי אִישׁ) from the LORD" (Gen. iv. 1)

[r] גָּבַר.

[s] Defective מְתִם, from an unused singular, מָת or מֹת

proper names Methusael and Methuselah.[1] Perhaps it may be derived from the root *mâth*, "he died,"[2] in which case its use would be very appropriate in Is xli. 14, "Fear not, thou worm Jacob, ye men of Israel."[3] If this conjecture be admitted, this word would correspond to *βροτός*, and might be read "mortal."

MANAEN (*Μαναήν*: *Manaên*) is mentioned in Acts xiii. 1 as one of the teachers and prophets in the church at Antioch at the time of the appointment of Saul and Barnabas as missionaries to the heathen. He is not known out of this passage. The name signifies *consoler* (מְנַחֵם, 2 K. xv. 17, &c.); and both that and his relation to Herod render it quite certain that he was a Jew. The Herod with whom he is said to have been brought up (*σύντροφος*, could not have been Herod Agrippa II. (Acts xv. 13), for as he was only seventeen years old at the time of the death of his father, Herod Agrippa I. in A.D. 44 (Joseph. *Ant.* xix. 9, §1), a comrade of that age would have been too young to be so prominent as a teacher at Antioch as Manaen was at the date of Paul's first missionary journey (Acts xiii. 3). The Herod in question must have been Herod Antipas, under whose jurisdiction the Saviour as a Galilean lived, and who beheaded John the Baptist. Since this Antipas was older than Archelaus, who succeeded Herod the Great soon after the birth of Christ, Manaen (his *σύντροφος*) must have been somewhat advanced in years in A.D. 44, when he appears before us in Luke's history—older certainly than forty-five or fifty, as stated in Lange's *Bibelwerk* (v. 182). The point of chief interest relating to him concerns the sense of *σύντροφος*, which the historian regarded as sufficiently remarkable to connect with his name. We have a learned discussion of this question in Walch's *Dissertationes in Acta Apostolorum* (*de Menachemo*, ii. 199-252). For the value of this treatise see Tholuck's *Glaubwürdigkeit*, p. 167.

The two following are the principal views that have been advanced, and have still their advocates. One is that *σύντροφος* means comrade, associate, or, more strictly, one brought up, educated with another. This is the more frequent sense of the word, and Calvin, Grotius, Schott, Baumgarten, and others, adopt it here. It was very common in ancient times for persons of rank to associate other children with their own, for the purpose of sharing their amusements (hence *συμπαίκτορες* in Xenoph. *Cyropæd.* i. 3, §14) and their studies, and thus exciting them to greater activity and emulation. Josephus, Plutarch, Polybius, and others speak of this custom. Walch shows it to have existed among the Medes, Persians, Egyptians, Greeks, and Romans. Herod might have adopted it from the Romans, whom he was so inclined to imitate (see Kuinoel's *Annotationes*, ii. 80, and Wetstein, *ad* Acts xiii. 1).

The other view is that *σύντροφος* denotes *foster-brother*, brought up at the same breast (*ὁμογάλακτος*, *collactaneus*), and as so taken Manaen's mother, or the woman who reared him, would have been also Herod's nurse. So Kuinoel, Olshausen, De Wette, Alford, and others. Walch's conclusion (not correctly represented by some recent writers) combines in a measure these two explanations. He thinks that Manaen was educated in Herod's family along with Antipas and some of his other children, and at the same time that he stood in the stricter relation to Antipas which *σύντροφος* denotes as *collactaneus*. He lays particular stress on the statement of Josephus (*Ant.* xvii. 1, §3) that the brothers Antipas and Archelaus were educated in a private way at Rome (Ἀρχέλαος δὲ καὶ Ἀντίπας ἐπὶ Ῥώμης παρά τινι ἰδιώτῃ τροφὰς εἶχον), though he does not deem it necessary to deny that before their departure thither Manaen may have enjoyed the same course of discipline and instruction (*σύντροφος* in that sense) as the two brothers, who are not likely to have been separated in their earlier, any more than in their later education. Yet as Manaen is called the *σύντροφος* of Herod only, Walch suggests that there may have been the additional tie in their case which resulted from their having had a common nurse.

It is a singular circumstance, to say the least, that Josephus (*Ant.* xv. 10, §5) mentions a certain Manaem (*Μανάημος*), who was in high repute among the Essenes for wisdom and sanctity, and who foretold to Herod the Great, in early life, that he was destined to attain royal honours. After the fulfilment of the prediction the king treated the prophet with special favour, and honoured the entire sect on his account (*πάντας ἂν' ἐκείνου τοὺς Ἐσσηνοὺς τιμῶν διετέλει*). There was a class of the Essenes who had families (others had not); and it has been conjectured with some plausibility that, as one of the results of Herod's friendship for the lucky soothsayer, he may have adopted one of his sons (who took the father's name), so far as to receive him into his family, and make him the companion of his children (see Walch, p. 234, &c.). Lightfoot surmises (*Horæ Hebr.* ii. 726) that the Manaen of Josephus may be the one mentioned in the Acts; but the disparity between his age and that of Herod the Great, to say nothing of other difficulties, puts that supposition out of the question.

The precise interest which led Luke to recal the Herodian connexion is not certain. Meyer's suggestion, that it may have been the contrast between the early relationship and Manaen's later *Christian* position (though he makes it of the first only), applies to one sense of *σύντροφος* as well as the other. A far-fetched motive need not be sought. Even such a casual relation to the great Jewish family of the age (whether it was that of a foster-brother or a companion of princes) was peculiar and interesting, and would be mentioned without any special object merely as a part of the individual's history. Walch's citations show that *σύντροφος*, as used of such intimacies (*συντροφίαι*), was a title greatly esteemed among the ancients; that it was often borne through life as a sort of proper name; and was recounted among the honours of the epitaph after death. It is found repeatedly on ancient monuments.

It may be added that Manaen, as a resident in Palestine (he may have been one of Herod's courtiers till his banishment to Gaul), could hardly fail to have had some personal knowledge of the

[1] מְתוּשָׁאֵל and מְתוּשֶׁלַח, where the word is not, as Gesenius would make it, changed by the construct state, but has a case-ending ָ, to be compared to the Arabic case-ending of the nominative, un, u, ٌ.

[2] The conjecture of Gesenius (*Lex.* s. v.), that the middle radical of מוּת is softened from *r* is not borne out by the Egyptian form, which is MET, "a dead one."

[3] מְתֵי־מִסְפָּר; ὀλιγοστὸς Ἰσραήλ. For the word "worm" compare Job xxv. 6; Ps. xxii. 6.

Saviour's ministry. He must have spent his youth at Jerusalem or in that neighbourhood; and among his recollections of that period, connected as he was with Herod's family, may have been the tragic scene of the massacre at Bethlehem. [H. B. H.]

MANA'HATH (מְנַחַת: Μαχαναθεί: *Manaath*), a place named in 1 Chr. viii. 6 only, in connexion with the genealogies of the tribe of Benjamin. The passage is very obscure, and is not made less so by the translation of the A. V.; but the meaning probably is that the family of Ehud, the heads of the town of Geba, migrated thence, under the guidance of Naaman, Ahiah, and Gera, and settled at Manachath. Of the situation of Manachath we know little or nothing. It is tempting to believe it identical with the Menuchah mentioned, according to many interpreters, in Judg. xx. 43[a] (in the A. V. translated "with ease"). This has in its favour the close proximity in which the place, if a place, evidently stood to Gibeah, which was one of the chief towns of Benjamin, even if not identical with Geba. Manachath is usually identified with a place of similar name in Judah, but, considering how hostile the relations of Judah and Benjamin were at the earlier period of the history, this identification is difficult to receive. The Chaldee Targum adds, "in the land of the house of Esau," *i. e.* in Edom. The Syriac and Arabic versions connect the name with that immediately following, and read "to the plain or pasture of Naaman." But these explanations are no less obscure than that which they seek to explain. [MANAHETHITES.] [G.]

MANA'HATH (מְנַחַת: Μαναχαθ; Alex. Μανναχαθ: *Manahat*: in Gen. xxxvi. 23, Μαχαναθ; Alex. Μαναχαθ: *Manahath*, 1 Chr. i. 40), one of the sons of Shobal, and descendant of Seir the Horite.

MANA'HETHITES, THE (הַמְּנֻחוֹת, *i. e.* the Menuchoth, and הַמְּנַחֲתִי, the Manachti: in 54, τῆς Μαλαθεί; Alex. της Μαναθ: Vulg. translating, *dimidium requietionum*). "Half the Manahethites" are named in the genealogies of Judah as descended from Shobal, the father of Kirjath-jearim (1 Chr. ii. 52), and half from Salma, the founder of Bethlehem (ver. 54). It seems to be generally accepted that the same place is referred to in each passage, though why the vowels should be so different—as it will be seen above they are—is not apparent. Nor has the writer succeeded in discovering why the translators of the A. V. rendered the two differing Hebrew words by the same English one.[b]

Of the situation or nature of the place or places we have as yet no knowledge. The town MANAHATH naturally suggests itself, but it seems impossible to identify a Benjamite town with a place occurring in the genealogies of Judah, and apparently in close connexion with Bethlehem and with the house of Joab, the great opponent and murderer of Abner the Benjamite. It is more probably identical with Manocho (Μανοχώ = מְנֻחוֹת), one of the eleven cities which in the LXX. text are inserted between verses 59 and 60 of Josh. xv., Bethlehem being another of the eleven. The writer of the Targum, playing on the word as if it were *Minchah*, "an offering," renders the passage in 1 Chr. ii. 52, "the disciples and priests who looked to the division of the offerings." His interpretation of ver. 54 is too long to quote here. See the editions of Wilkins and Beck, with the learned notes of the latter. [G.]

MANAS'SEAS (Μανασσίας; Alex. Μανασσήας: *Manasses*) = MANASSEH 3, of the sons of Pahath Moab (1 Esd. ix. 31; comp. Ezr. x. 30).

MANAS'SEH (מְנַשֶּׁה, *i. e.* M'nasseh: Μανασσῆ: *Manasses*), the eldest son of Joseph by his wife Asenath the Egyptian (Gen. xli. 51, xlvi. 20). The birth of the child was the first thing which had occurred since Joseph's banishment from Canaan to alleviate his sorrows and fill the void left by the father and the brother he so longed to behold, and it was natural that he should commemorate his acquisition in the name MANASSEH, "Forgetting"—"For God hath made me forget (*nassheni*) all my toil and all my father's house." Both he and Ephraim were born before the commencement of the famine.

Whether the elder of the two sons was inferior in form or promise to the younger, or whether there was any external reason to justify the preference of Jacob, we are not told. It is only certain that when the youths were brought before their aged grandfather to receive his blessing and his name, and be adopted as foreigners[c] into his family, Manasseh was degraded, in spite of the efforts of Joseph, into the second place. [EPHRAIM, vol. i. 566*b*.] It is the first indication of the inferior rank in the nation which the tribe descended from him afterwards held, in relation to that of his more fortunate brother. But though like his grand-uncle Esau, Manasseh had lost his birthright in favour of his younger brother, he received, as Esau had, a blessing only inferior to the birthright itself. Like his brother he was to increase with the fertility of the fish[d] which swarmed in the great Egyptian stream, to "become a people and also to be great"—the "thousands of Manasseh," no less than those of Ephraim, indeed more, were to become a proverb[e] in the nation, his name, no less than

[a] The Vat. LXX. has ἀνὰ Νοῦα.

[b] They sometimes follow Junius and Tremellius; but in this passage those translators have exactly reversed the A. V., and in both cases use the form Menuchot.

[c] This seems to follow from the expressions of xlviii. 5 and 9: "Thy two sons who were born unto thee in the land of Egypt"—"My sons whom God hath given me in this place," and from the solemn invocation over them of Jacob's "name," and the "names" of Abraham and Isaac (ver. 16), combined with the fact of Joseph having married an Egyptian, a person of different race from his own. The Jewish commentators overcome the difficulty of Joseph's marrying an entire foreigner, by a tradition that Asenath was the daughter of Dinah and Shechem. See Targum Pseudojon on Gen. xli. 45.

[d] "And like fish become a multitude" Such is the literal rendering of the words וְיִרְגּוּ לָרֹב (Gen. xlviii. 16), which in the text of the A. V. are "grow into a multitude." The sense is preserved in the margin. The expression is no doubt derived from that which is to this day one of the most characteristic things in Egypt. Certainly, next to the vast stream itself, nothing could strike a native of Southern Palestine more, on his first visit to the banks of the Nile, than the abundance of its fish.

[e] The word "thousand," (אֶלֶף), in the sense of "family," seems to be more frequently applied to Manasseh than to any of the other tribes. See Deut. xxxiii. 17, and compare Judg. vi. 15, where "family" should be "thousand"—"my thousand is the poor one in Manasseh" and 1 Chr. xii. 20.

[illegible] of Ephraim, was to be the symbol and the expression of the richest blessings for his kindred.[5]

At the time of this interview Manasseh seems to have been about 22 years of age. Whether he married in Egypt we are not told. At any rate the names of no wives or lawful children are extant in the list. As if to carry out most literally the terms of the blessing of Jacob, the mother of MACHIR, his eldest son, is indeed apparently his only son—who was really the foundation of the "thousands of Manasseh"—was no regular wife, but a Syrian or Aramite concubine (1 Chr. vii. 14), possibly a prisoner in some predatory expedition into Palestine, like that in which the sons of Ephraim lost their lives (1 Chr. vii. 21). It is recorded that the children of Machir were embraced by Joseph before his death, but of the personal history of the patriarch Manasseh himself no trait whatever is given in the Bible, either in the Pentateuch or in the curious records preserved in Chronicles. The ancient Jewish traditions are, however, less reticent. According to them Manasseh was the steward of Joseph's house, and the interpreter who intervened between Joseph and his brethren at their interview; and the extraordinary strength which he displayed in the struggle with and binding of Simeon, first caused Judah to suspect that the apparent Egyptians were really his own flesh and blood (see Targums Jerusalem and Pseudojon. on Gen. xlii. 23, xliii. 15; also the quotations in Weil's *Bibl. Legends*, 88 *note*).

The position of the tribe of Manasseh during the march to Canaan was with Ephraim and Benjamin on the west side of the sacred Tent. The standard of the three sons of Rachel was the figure of a boy with the inscription, "The cloud of Jehovah rested over them until they went forth out of the camp" (Targ. Pseudojon. on Num. ii. 18). The Chief of the tribe at the time of the census at Sinai was Gamaliel ben-Pedahzur, and its numbers were then 32,200 (Num. i. 10, 35, ii. 20, 21, vii. 54-59). The numbers of Ephraim were at the same date 40,500. Forty years later, on the banks of Jordan, these proportions were reversed. Manasseh had then increased to 52,700, while Ephraim had diminished to 32,500 (Num. xxvi. 34, 37). On this occasion it is remarkable that Manasseh resumes his position in the catalogue as the eldest son of Joseph. Possibly this is done to the prowess which the tribe had shown in the conquest of Gilead, for Manasseh was certainly at this time the most distinguished of all the tribes. Of the three who had elected to remain on that side of the Jordan, Reuben and Gad had chosen their lot because the country was suitable to their pastoral possessions and tendencies. But Machir, Jair, and Nobah, the sons of Manasseh, were conquerors. They were pure warriors, who had taken the most prominent part in the conquest of those provinces which up to that time had been considered, and whose deeds are constantly referred to (Josh. xvii. 39; Deut. iii. 13, 14, 15) with credit and honour. "Jair the son of Manasseh took all the coast of Argob . . . sixty great cities" (Deut. iii. 14). "Nobah took Kenath and the daughter-towns thereof, and called it after his own name" (Num. xxxii. 42). "Because Machir was a man of war, therefore he had Gilead and Bashan" (Josh. xvii. 1). The district which these ancient warriors conquered was among the most difficult, if not the most difficult, in the whole country. It embraced the hills of Gilead with their inaccessible heights and impassable ravines, and the almost impregnable tract of Argob, which derives its modern name of *Lejah* from the secure "asylum" it affords to those who take refuge within its natural fortifications. Had they not remained in these wild and inaccessible districts, but had gone forward and taken their lot with the rest, who shall say what changes might not have occurred in the history of the nation, through the presence of such energetic and warlike spirits? The few personages of eminence whom we can with certainty identify as Manassites, such as Gideon and Jephthah—for Elijah and others may with equal probability have belonged to the neighbouring tribe of Gad—were among the most remarkable characters that Israel produced. Gideon was in fact "the greatest of the judges, and his children all but established hereditary monarchy in their own line" (Stanley, *S. & P.* 230). But with the one exception of Gideon the warlike tendencies of Manasseh seem to have been confined to the east of the Jordan. There they throve exceedingly, pushing their way northward over the rich plains of *Jaulân* and *Jedûr*—the Gaulanitis and Ituraea of the Roman period—to the foot of Mount Hermon (1 Chr. v. 23). At the time of the coronation of David at Hebron, while the western Manasseh sent 18,000, and Ephraim itself 20,800, the eastern Manasseh, with Gad and Reuben, mustered to the number of 120,000, thoroughly armed—a remarkable demonstration of strength, still more remarkable when we remember the fact that Saul's house, with the great Abner at its head, was then residing at Mahanaim on the border of Manasseh and Gad. But, though thus outwardly prosperous, a similar fate awaited them in the end to that which befel Gad and Reuben; they gradually assimilated themselves to the old inhabitants of the country—they "transgressed against the God of their fathers, and went a-whoring after the gods of the people of the land whom God destroyed before them" (ib. 25). They relinquished too the settled mode of life and the defined limits which befitted the members of a federal nation, and gradually became Bedouins of the wilderness, spreading themselves over the vast deserts which lay between the allotted possessions of their tribe and the Euphrates, and which had from time immemorial been the hunting-grounds and pastures of the wild Hagarites, of Jetur, Nephish, and Nodab (1 Chr. v. 19, 22). On them first descended the punishment which was ordained to be the inevitable consequence of such misdoing. They, first of all Israel, were carried away by Pul and Tiglath-Pileser, and settled in the Assyrian territories (ib. 26). The connexion, however, between east and west had been kept up to a certain degree. In Bethshean, the most easterly city of the cis-Jordanic Manasseh, the two portions all but joined. David had judges or officers there for all matters sacred and secular (1 Chr. xxvi. 32); and Solomon's commissariat officer, Ben-Geber, ruled over the towns of Jair and the whole district of Argob (1 K. iv. 13), and transmitted their productions, doubtless not without their people, to the court of Jerusalem.

The genealogies of the tribe are preserved in

[5] The Targum Pseudojon. on xlviii. 20 seems to intimate that the words of that verse were used as part of the formula at the rite of circumcision. They do not, however, appear in any of the accounts of that ceremony, as given by Buxtorf and others, that the writer has been able to discover.

[6] The Targum characteristically says *circumcised*.

Num. xxvi. 28-34; Josh. xvii. 1, &c.; and 1 Chr. vii. 14-19. But it seems impossible to unravel these so as to ascertain for instance which of the families remained east of Jordan, and which advanced to the west. From the fact that Abi-ezer (the family of Gideon), Hepher (possibly Ophrah, the native place of the same hero), and Shechem (the well-known city of the Bene-Joseph) all occur among the names of the sons of Gilead the son of Machir, it seems probable that Gilead, whose name is so intimately connected with the eastern, was also the immediate progenitor of the western half of the tribe.[h]

Nor is it less difficult to fix the exact position of the territory allotted to the western half. In Josh. xvii. 14-18, a passage usually regarded by critics as an exceedingly ancient document, we find the two tribes of Joseph complaining that only one portion had been allotted to them, viz. Mount Ephraim (ver. 15), and that they could not extend into the plains of Jordan or Esdraelon, because those districts were still in the possession of the Canaanites, and scoured by their chariots. In reply Joshua advises them to go up into the forest (ver. 15, A. V. "wood")—into the mountain which is a forest (ver. 18). This mountain clothed with forest can surely be nothing but CARMEL, the "mountain" closely adjoining the portion of Ephraim, whose richness of wood was so proverbial. And it is in accordance with this view that the majority of the towns of Manasseh—which as the weaker portion of the tribe would naturally be pushed to seek its fortunes outside the limits originally bestowed—were actually on the slopes either of Carmel itself or of the contiguous ranges. Thus TAANACH and MEGIDDO were on the northern spurs of Carmel; IBLEAM appears to have been on the eastern continuation of the range, somewhere near the present *Jenin*. EN-DOR was on the slopes of the so-called "Little Hermon." The two remaining towns mentioned as belonging to Manasseh formed the extreme eastern and western limits of the tribe; the one, BETHSHEAN[i] (Josh. xvii. 11), was in the hollow of the *Ghôr*, or Jordan-Valley; the other, DOR (ibid.), was on the coast of the Mediterranean, sheltered behind the range of Carmel, and immediately opposite to the bluff or shoulder which forms its highest point. The whole of these cities are specially mentioned as standing in the allotments of other tribes, though inhabited by Manasseh; and this, with the absence of any attempt to define a limit to the possessions of the tribe on the north, looks as if no boundary-line had existed on that side, but as if the territory faded off gradually into those of the two contiguous tribes from whom it had borrowed its fairest cities. On the south side the boundary between Manasseh and Ephraim is more definitely described, and may be generally traced with tolerable certainty. It began on the east in the territory of Issachar (xvii. 10) at a place called ASHER,[k] (ver. 7) now *Yasir*, 12 miles N.E. of *Nablus*. Thence it ran to Michmethah, described as facing Shechem (*Nablûs*), though now unknown; then went to the right, *i. e.* apparently[m] northward, to the spring of Tappuah, also unknown; there it fell in with the watercourses of the torrent Kanah—probably the *Nahr Falaik*—along which it ran to the Mediterranean.

From the indications of the history it would appear that Manasseh took very little part in public affairs. They either left all that to Ephraim, or were so far removed from the centre of the nation as to have little interest in what was taking place. That they attended David's coronation at Hebron has already been mentioned. When his rule was established over all Israel, each half had its distinct ruler—the western, Joel ben-Pedaiah, the eastern, Iddo ben-Zechariah (1 Chr. xxvii. 20, 21). From this time the eastern Manasseh fades entirely from our view, and the western is hardly kept before us by an occasional mention. Such scattered notices as we do find have almost all reference to the part taken by members of the tribe in the reforms of the good kings of Judah—the Jehovah-revival under Asa (2 Chr. xv. 9)—the Passover of Hezekiah (xxx. 1, 10, 11, 18), and the subsequent enthusiasm against idolatry (xxxi. 1)—the iconoclasms of Josiah (xxxiv. 6), and his restoration of the buildings of the Temple (ver. 9). It is gratifying to reflect that these notices, faint and scattered as they are, are all coloured with good, and exhibit none of the repulsive traits of that most repulsive heathenism into which other tribes of Israel fell. It may have been at some such time of revival, whether brought about by the invitation of Judah, or, as the title in the LXX. would imply, by the dread of invasion, that Ps. lxxx. was composed. But on the other hand, the mention of Benjamin as in alliance with Ephraim and Manasseh, points to an earlier date than the disruption of the two kingdoms. Whatever its date may prove to be, there can be little doubt that the

[h] If this is correct, it may probably furnish the clue to the real meaning of the difficult allusion to Gilead in Judg. viii. 3. [See vol. i. 695*a*.]

[i] "Bethsan in Manasseh" (Hap-Parchi, in Asher's *B. of T.* 401).

[k] The name of ASHER, as attached to a town, independent of the tribe, was overlooked by the writer at the proper time. (אָשֵׁר: Ἀηλανάθ: Alex. Ασηρ: *Aser*). It is mentioned in Josh. xvii. 7 only as the starting-point—evidently at its eastern end—of the boundary line separating Ephraim and Manasseh. It cannot have been at any great distance from Shechem, because the next point in the boundary is "the Michmethath facing Shechem." By Eusebius and Jerome, in the *Onomasticon* (*sub voce* "Aser"), it is mentioned, evidently from actual knowledge, as still retaining its name, and lying on the high road from Neapolis (*Nablus*), that is Shechem, to Scythopolis (*Beisan*), the ancient Bethshean, fifteen Roman miles from the former. In the *Itinerarium Hieros.* (587) it occurs, between "civitas Sciopoli" (*i. e.* Scythopolis) and "civ. Neapolis" as "Aser, ubi fuit villa Job." Where it lay then, it lies still. Exactly in this position M. Van de Velde (*Syr. and Pal.* ii. 336) has discovered a village called *Yasir*, lying in the centre of a plain or basin surrounded on the north and west by mountains, but on the east sloping away into a *Wady* called the Salt Valley which forms a near and direct descent to the Jordan Valley. The road from *Nablus* to *Beisan* passes by the village. Porter (*Hdbk.* 348) gives the name as *Yesir*.

It does not seem to have been important enough to allow us to suppose that its inhabitants are the ASHERITES, or Asherites of 2 Sam. ii. 9.

Van de Velde suggests that this may have been the spot on which the Midianites encamped when surprised by Gideon; but that was surely further to the north, nearer the spring of Charod and the plain of Esdraelon.

[m] The right (הַיְמִינָה) is generally taken to signify the South; and so Keil understands it in this place: but it seems more consonant with common sense, and also with the probable course of the boundary—which could hardly have gone south of Shechem—to take it as the right of the person tracing the line from East to West, *i. e.* North.

author of the Psalm was a member of the house of Joseph.

A positive connexion between Manasseh and Benjamin is implied in the genealogies of 1 Chr. vii., where Machir is said to have married into the family of Huppim and Shuppim, chief houses in the latter tribe (ver. 15). No record of any such relation appears to have been yet discovered in the historical books, nor is it directly alluded to except in the genealogy just quoted. But we know that a connexion existed between the tribe of Benjamin and the town of Jabesh-Gilead, inasmuch as from that town were procured wives for four hundred out of the six hundred Benjamites who survived the slaughter of Gibeah (Judg. xxi. 12); and if Jabesh-Gilead was a town of Manasseh—as is very probable, though the fact is certainly nowhere stated—it does appear very possible that this was the relationship referred to in the genealogies. According to the statement of the narrative two-thirds of the tribe of Benjamin must have been directly descended from Manasseh. Possibly we have here an explanation of the apparent connexion between King Saul and the people of Jabesh. No appeal could have been more forcible to an Oriental chieftain than that of his blood-relations when threatened with extermination (1 Sam. xi. 4, 5), while no duty was more sacred than that which they in their turn performed to his remains (1 Sam. xxxi. 11). [G.]

MANASSEH (מְנַשֶּׁה: *Μανασσῆς*: *Manasses*), the thirteenth king of Judah. The reign of this monarch is longer than that of any other of the house of David. There is none of which we know so little. In part, it may be, this was the direct result of the character and policy of the man. In part, doubtless, it is to be traced to the abhorrence with which the following generation looked back upon it as the period of lowest degradation to which their country had ever fallen. Chroniclers and prophets pass it over, gathering from its horrors for their readers the great broad lessons in which they saw the foot-prints of a righteous retribution, the workings of a Divine compassion, and then they almost close their eyes and will see and say no more. This is in itself significant. It gives a meaning and a value to every fact which has escaped the sentence of oblivion. The very reticence of the historians of the O. T. shows how free they were from the sensational exaggerations and inaccuracies of a later age. The struggle of opposing worships must have been as fierce under Manasseh, as it was under Antiochus, or Decius, or Diocletian, or Mary. Men must have suffered and died in that struggle, of whom the world was not worthy, and yet no contrast can be greater than that between the short notices of Kings and Chronicles, and the martyrologies which belong to those other periods of persecution.

The birth of Manasseh is fixed twelve years before the death of Hezekiah, B. C. 710 (2 K. xxi. 1). We must, therefore, infer either that there had been no heir to the throne up to that comparatively late period in his reign, or that any that had been born had died, or that, as sometimes happened in the succession of Jewish and other Eastern kings, the elder son was passed over for the younger. There are reasons which make the former the more probable alternative. The exceeding bitterness of Hezekiah's sorrow at the threatened approach of death (2 K. xx. 2, 3; 2 Chr. xxxii. 24; Is. xxxviii. 3) is more natural if we think of him as sinking under the thought that he was dying childless, leaving no heir to his work and to his kingdom. When, a little later, Isaiah warns him of the captivity and shame which will fall on his children, he speaks of those children as yet future (2 K. xx. 18). This circumstance will explain one or two facts in the contemporary history. Hezekiah, it would seem, recovering from his sickness, anxious to avoid the danger that had threatened him of leaving his kingdom without an heir, marries, at or about this time, Hephzibah (2 K. xxi. 1), the daughter of one of the citizens or princes of Jerusalem (Joseph. *Ant.* x. 3, §1). The prophets, we may well imagine, would welcome the prospect of a successor named by a king who had been so true and faithful. Isaiah (in a passage clearly belonging to a later date than the early portions of the book, and apparently suggested by some conspicuous marriage) with his characteristic fondness for tracing auguries in names, finds in that of the new queen a prophecy of the ultimate restoration of Israel and the glories of Jerusalem (Is. lxii. 4, 5; comp. Blunt, *Scriptural Coincid.* Part iii. 5). The city also should be a Hephzibah, a delightsome one. As the bridegroom rejoiceth over the bride, so would Jehovah rejoice over His people.[a] The child that is born from this union is called Manasseh. This name too is strangely significant. It appears nowhere else in the history of the kingdom of Judah. The only associations connected with it were, that it belonged to the tribe which was all but the most powerful of the hostile kingdom of Israel. How are we to account for so singular and unlikely a choice? The answer is, that the name embodied what had been for years the cherished object of Hezekiah's policy and hope. To take advantage of the overthrow of the rival kingdom by Shalmaneser, and the anarchy in which its provinces had been left, to gather round him the remnant of the population, to bring them back to the worship and faith of their fathers, this had been the second step in his great national reformation (2 Chr. xxx. 6). It was at least partially successful. "Divers of Asher, *Manasseh*, and Zebulun, humbled themselves and came to Jerusalem." They were there at the great passover. The work of destroying idols went on in Ephraim and *Manasseh* as well as in Judah (2 Chr. xxxi. 1). What could be a more acceptable pledge of his desire to receive the fugitives as on the same footing with his own subjects than that he should give to the heir to his throne the name in which one of their tribes exulted? What could better show the desire to let all past discords and offences be forgotten than the name which was itself an amnesty? (Gesenius.)

The last twelve years of Hezekiah's reign were not, however, it will be remembered, those which were likely to influence for good the character of his successor. His policy had succeeded. He had thrown off the yoke of the king of Assyria, which Ahaz had accepted, had defied his armies, had been delivered from extremest danger, and had made himself the head of an independent kingdom, receiving tribute from neighbouring princes instead of paying it to the great king, the king of Assyria. But he goes a step further. Not content with independence, he enters on a policy of aggression. He contracts an alliance with the rebellious viceroy of Babylon against their common enemy (2 K. xx. 12; Is.

[a] The bearing of this passage on the controversy as to the authorship and date of the later chapters of Isaiah is at least, worth considering.

xxxix.). He displays the treasures of his kingdom to the ambassadors, in the belief that that will show them how powerful an ally he can prove himself. Isaiah protested against this step, but the ambition of being a great potentate continued, and it was to the results of this ambition that the boy Manasseh succeeded at the age of twelve. His accession appears to have been the signal for an entire change, if not in the foreign policy, at any rate in the religious administration of the kingdom. At so early an age he can scarcely have been the spontaneous author of so great an alteration, and we may infer accordingly that it was the work of the idolatrous, or Ahaz party, which had been repressed during the reign of Hezekiah, but had all along, like the Romish clergy under Edward VI. in England, looked on the reform with a sullen acquiescence, and thwarted it when they dared. The change which the king's measures brought about was after all, superficial. The idolatry which was publicly discountenanced, was practised privately (Is. i. 29, ii. 20, lxv. 3). The priests and the prophets, in spite of their outward orthodoxy, were too often little better than licentious drunkards (Is. xxviii. 7). The nobles of Judah kept the new moons and sabbaths much in the same way as those of France kept their Lents, when Louis XIV. had made devotion a court ceremonial (Is. i. 13, 14). There are signs that even among the king's highest officers of state there was one, Shebna the scribe (Is. xxxvii. 2), the treasurer (Is. xxii. 15) "over the house," whose policy was simply that of a selfish ambition, himself possibly a foreigner (comp. Blunt's *Script. Coinc.* iii. 4), and whom Isaiah saw through and distrusted. It was, moreover, the traditional policy of "the princes of Judah" (comp. one remarkable instance in the reign of Joash, 2 Chr. xxiv. 17), to favour foreign alliances and the toleration of foreign worship, as it was that of the true priests and prophets to protest against it. It would seem, accordingly, as if they urged upon the young king that scheme of a close alliance with Babylon which Isaiah had condemned, and as the natural consequence of this, the adoption, as far as possible, of its worship, and that of other nations whom it was desirable to conciliate. The morbid desire for widening the range of their knowledge and penetrating into the mysteries of other systems of belief, may possibly have contributed now, as it had done in the days of Solomon, to increase the evil (Jer. ii. 10-25; Ewald, *Gesch. Isr.* iii. 666). The result was a debasement which had not been equalled even in the reign of Ahaz, uniting in one centre the abominations which elsewhere existed separately. Not content with sanctioning their presence in the Holy City, as Solomon and Rehoboam had done, he defiled with it the Sanctuary itself (2 Chr. xxxiii. 4). The worship thus introduced was, as has been said, predominantly Babylonian in its character. "He observed times, and used enchantments, and used witchcraft, and dealt with a familiar spirit, and with wizards" (*ibid.* ver. 6). The worship of "the host of heaven," which each man celebrated for himself on the roof of his own house, took the place of that of the Lord God of Sabaoth (2 K. xxiii. 12; Is. lxv. 3, 11; Zeph. i. 5; Jer. viii. 2, xix. 13, xxxii. 29). With this, however, there was associated the old Molech worship of the Ammonites. The fires were rekindled in the valley of Ben-Hinnom. Tophet was (for the first time, apparently), built into a stately fabric (2 K. xvi. 3; Is. xxx. 33, as compared with Jer. vii. 31, xix. 5; Ewald, *Gesch. Isr.* iii. 667). Even the king's sons, instead of being presented to Jehovah, received a horrible fire-baptism dedicating them to Molech (2 Chr. xxxiii. 6), while others were actually slaughtered (Ez. xvi. 37, 39). The Baal and Ashtaroth ritual, which had been imported under Solomon, from the Phœnicians, was revived with fresh splendour, and in the worship of the "Queen of heaven," fixed its roots deep into the habits of the people (Jer. vii. 18). Worse and more horrible than all, the Asherah, the image of Astarte, or the obscene symbol of a phallic worship (comp. ASHERAH, and in addition to the authorities there cited, Mayer, *De Reform. Josiæ*, &c., in the *Thes. Theo. philol.* Amstel. 1701) was seen in the house of which Jehovah had said that He would there put His Name for ever (2 K. xxi. 7). All this was accompanied by the extremest moral degradation. The worship of those old Eastern religions, has been well described as a kind of "sensuous intoxication," simply sensuous, and therefore associated inevitably with a fiendish cruelty, leading to the utter annihilation of the spiritual life of men (Hegel, *Philos. of History*, i. 3). So it was in Jerusalem in the days of Manasseh. Rival priests (the Chemarim of Zeph. i. 4) were consecrated for this hideous worship. Women dedicating themselves to a *cultus* like that of the Babylonian Mylitta, wove hangings for the Asherah, as they did there (Mayer, cap. ii. §4). The Kadeshim, in closest neighbourhood with them, gave themselves up to yet darker abominations (2 K. xxiii. 7). The awful words of Isaiah (i. 10) had a terrible truth in them. Those to whom he spoke were literally "rulers of Sodom and princes of Gomorrah." Every faith was tolerated but the old faith of Israel. This was abandoned and proscribed. The altar of Jehovah was displaced (2 Chr. xxxiii. 16). The very ark of the covenant was removed from the sanctuary (2 Chr. xxxv. 3). The sacred books of the people were so systematically destroyed, that fifty years later, men listened to the Book of the Law of Jehovah as a newly discovered treasure (2 K. xxii. 8). It may well be, according to a Jewish tradition, that this fanaticism of idolatry led Manasseh to order the name Jehovah to be erased from all documents and inscriptions (Patrick, *ad loc.*). All this involved also a systematic violation of the weekly Sabbath rest and the consequent loss of one witness against a merely animal life (Is. lvi. 2, lviii. 13). The tide of corruption carried away some even of those who as priests and prophets, should have been steadfast in resisting it (Zeph. iii. 4; Jer. ii. 26, v. 13, vi. 13).

It is easy to imagine the bitter grief and burning indignation of those who continued faithful. The fiercest zeal of Huguenots in France, of Covenanters in Scotland, against the badges and symbols of the Latin Church, is perhaps but a faint shadow of that which grew to a white heat in the hearts of the worshippers of Jehovah. They spoke out in words of corresponding strength. Evil was coming on Jerusalem which should make the ears of men to tingle (2 K. xxi. 12). The line of Samaria and the plummet of the house of Ahab should be in doom of the Holy City. Like a vessel that had once been full of precious ointment (comp. the LXX. ἀλαβάστρον), but had afterwards become foul, Jerusalem should be emptied and wiped out, and exposed to the winds of Heaven till it was cleansed. Foremost, we may well believe, among those who thus bore their witness was the old prophet, now bent with the weight of fourscore

jean, who had in his earlier days protested with equal courage against the crimes of the king's grandfather. On him too, according to the old Jewish tradition, came the first shock of the persecution. [ISAIAH.] Habakkuk may have shared his martyrdom (Keil on 2 K. xxi.; but comp. HABAKKUK). But the persecution did not stop here. It attacked the whole order of the true prophets, and those who followed them. Every day witnessed an execution (Joseph. *Ant.* x. 3, §1). The slaughter was like that under Alva or Charles IX. (2 K. xxi. 16). The martyrs who were faithful unto death had to endure not torture only, but the taunts and taunts of a godless generation (Is. lvii. 14). Long afterwards the remembrance of that reign of terror lingered in the minds of men as a guilt for which nothing could atone (2 K. xxiv. 4). The persecution, like most other persecutions carried on with entire singleness of purpose, was for a time successful (Jer. ii. 30). The prophets appear no more in the long history of Manasseh's reign. The heart and the intellect of the nation were crushed out, and there would seem to have been no chroniclers left to record this portion of its history.

Retribution came soon in the natural sequence of events. There are indications that the neighbouring nations—Philistines, Moabites, Ammonites—who had been tributary under Hezekiah, revolted at some period in the reign of Manasseh, and asserted their independence (Zeph. ii. 4-19; Jer. xxv. xlvii. xlviii. xlix.). The Babylonian alliance bore the fruits which had been predicted. Hezekiah had been too hasty in attaching himself to the cause of the rebel-prince against Assyria. The rebellion of Merodach-Baladan was crushed, and then the wrath of the Assyrian king fell on those who had supported him. [ESARHADDON.] Judaea was again overrun by the Assyrian armies, and this time the invasion was more successful than that of Sennacherib. The city apparently was taken. The king himself was made prisoner and carried off to Babylon. There his eyes were opened, and he repented, and the prayer was heard, and the Lord delivered him (2 Chr. xxxiii. 12, 13; comp. Maurice, *Prophets and Kings*, p. 362).

Two questions meet us at this point. (1) Have we contemporary grounds for believing that this statement is historically true? (2) If we accept it, to what period in the reign of Manasseh is it to be assigned? It has been urged in regard to (1) that the silence of the writer of the books of Kings is a weighty argument against the trustworthiness of the narrative of 2 Chronicles. In the former there is no mention made of captivity or repentance or restoration. The latter, it has been said, yields to the temptation of pointing a moral, of making history appear more in harmony with his own notions of the Divine government than it actually is. His desire to deal leniently with the successors of David made him to invent at once a reformation and the captivity which is represented as its cause (Winer, *Real-Wörterb.* s. v. Manasseh; Rosenmüller, *Bibl. Alterth.* i. 2, p. 161; Hitzig, *Begr. d. Kritik*, p. 130, quoted by Keil). It will be necessary in dealing with this objection to meet the sceptical critic on his own ground. To say that his reasoning contradicts our belief in the inspiration of the historical books of Scripture, and is destructive of all reverence for them, would involve a *petitio principii*, and however strongly it may influence our feelings, we are bound to find another answer. It is believed that that answer is not far to seek. (1) The silence of a writer who sums up the history of a reign of 55 years in 19 verses as to one alleged event in it is surely a weak ground for refusing to accept that event on the authority of another historian. (2) The omission is in part explained by the character of the narrative of 2 K. xxi. The writer deliberately turns away from the history of the days of shame, and not less from the personal biography of the king. He looks on the reign only as it contributed to the corruption and final overthrow of the kingdom, and no after-repentance was able to undo the mischief that had been done at first. (3) Still keeping on the level of human probabilities, the character of the writer of 2 Chronicles, obviously a Levite, and looking at the facts of the history from the Levite point of view, would lead him to attach greater importance to a partial reinstatement of the old ritual and to the cessation of persecution, and so to give them in proportion a greater prominence. (4) There is one peculiarity in the history which is, in some measure, of the nature of an undesigned coincidence, and so confirms it. The captains of the host of Assyria take Manasseh to Babylon. Would not a later writer, inventing the story, have made the Assyrian, and not the Babylonian capital, the scene of the captivity; or if the latter were chosen for the sake of harmony with the prophecy of Is. xxxix., have made the king of Babylon rather than of Assyria the captor?[b] As it is, the narrative fits in, with the utmost accuracy, to the facts of Oriental history. The first attempt of Babylon to assert its independence of Nineveh failed. It was crushed by Esarhaddon (the first or second of that name; comp. ESARHADDON, and Ewald, *Gesch. Isr.* iii. 675), and for a time the Assyrian king held his court at Babylon, so as to effect more completely the reduction of the rebellious province. There is (5) the fact of agreement with the intervention of the Assyrian king in 2 K. xvii. 24, just at the same time. The king is not named there, but Ezra iv. 2, 10, gives Asnapper, and this is probably only another form of Asardanapar, and this = Esarhaddon (comp. Ewald, *Gesch.* iii. 676: Tob. i. 21 gives Sarchedonus). The importation of tribes from Eastern Asia thus becomes part of the same policy as the attack on Judah. On the whole, then, the objection may well be dismissed as frivolous and vexatious. Like many other difficulties urged by the same school, it has in it something at once captious and puerile. Those who lay undue stress on them act in the spirit of a clever boy asking puzzling questions, or a sharp advocate getting up a case against the evidence on the other side, rather than in that of critics who have learnt how to construct a history and to value its materials rightly (comp. Keil, *Comm. on* 2 K. xxi.). Ewald, a critic of a nobler stamp, whose fault is rather that of fantastic reconstruction than needless scepticism (*Gesch. Isr.* iii. 678), admits the groundwork of truth. Would the prophecy of Isaiah. it may be asked, have been recorded and preserved if it had not been fulfilled? Might not Manasseh's release have been, as Ewald suggests, the direct consequence of the death of Esarhaddon?

The circumstance just noticed enables us to return an approximate answer to the other question. The duration of Esarhaddon's Babylonian reign is calculated as from B.C. 680-667; and Manasseh's cap-

[b] It may be noticed that this was actually done in later apocryphal traditions (see below).

tivity must therefore have fallen within those limits. A Jewish tradition (Seder Olam Rabba, c. 24) fixes the 22nd year of his reign as the exact date; and this, according as we adopt the earlier or the later date of his accession, would give B.C. 676 or 673.

The period that followed is dwelt upon by the writer of 2 Chr. as one of a great change for the better. The discipline of exile made the king feel that the gods whom he had chosen were powerless to deliver, and he turned in his heart to Jehovah, the God of his fathers. The compassion or death of Esarhaddon led to his release, and he returned after some uncertain interval of time to Jerusalem. It is not improbable that his absence from that city had given a breathing time to the oppressed adherents of the ancient creed, and possibly had brought into prominence, as the provisional ruler and defender of the city, one of the chief members of the party. If the prophecy of Is. xxii. 15 received, as it probably did, its fulfilment in Shebna's sharing the captivity of his master, there is nothing extravagant in the belief that we may refer to the same period the noble words which speak of Eliakim the son of Hilkiah as taking the place which Shebna should leave vacant, and rising up to be "a father unto the inhabitants of Jerusalem and to the house of Judah," having "the key of the house of David on his shoulder."

The return of Manasseh was at any rate followed by a new policy. The old faith of Israel was no longer persecuted. Foreign idolatries were no longer thrust, in all their foulness, into the Sanctuary itself. The altar of the Lord was again restored, and peace-offerings and thank-offerings sacrificed to Jehovah (2 Chr. xxxiii. 15, 16). But beyond this the reformation did not go. The ark was not restored to its place. The book of the Law of Jehovah remained in its concealment. Satisfied with the feeling that they were no longer worshipping the gods of other nations by name, they went on with a mode of worship essentially idolatrous. "The people did sacrifice still in the high places, but to Jehovah their God only" (ibid. ver. 17).

The other facts known of Manasseh's reign connect themselves with the state of the world round him. The Assyrian monarchy was tottering to its fall, and the king of Judah seems to have thought that it was still possible for him to rule as the head of a strong and independent kingdom. If he had to content himself with a smaller territory, he might yet guard its capital against attack, by a new wall defending what had been before its weak side, "to the entering in of the fish-gate," and completing the tower of Ophel,[a] which had been begun, with a like purpose, by Jotham (2 Chr. xxvii. 3). Nor were the preparations for defence limited to Jerusalem. "He put captains of war in all the fenced cities of Judah." There was, it must be remembered, a special reason for this attitude, over and above that afforded by the condition of Assyria. Egypt had emerged from the chaos of the Dodecarchy and the Ethiopian intruders, and was become strong and aggressive under Psammitichus. Pushing his arms northwards, he attacked the Philistines; and the twenty-nine years' siege of Azotus must have fallen wholly or in part within the reign of Manasseh. So far his progress would not be unacceptable. It would be pleasant to see the old hereditary enemies of Israel, who had lately grown insolent and defiant, meet with their masters. About this time, accordingly, we find the thought of an Egyptian alliance again beginning to gain favour. The prophets, and those who were guided by them, dreaded this more than anything, and entered their protest against it. Not the less, however, from this time forth, did it continue to be the favourite idea which took possession of the minds of the lay-party of the princes of Judah. The very name of Manasseh's son, Amon, barely admitting a possible Hebrew explanation, but identical in form and sound with that of the great sun-god of Egypt (so Ewald, *Gesch.* iii. 665), is probably an indication of the gladness with which the alliance of Psammitichus was welcomed. As one of its consequences, it involved probably the supply of troops from Judah to serve in the armies of the Egyptian king. Without adopting Ewald's hypothesis that this is referred to in Deut. xxviii. 68, it is yet likely enough in itself, and Jer. ii. 14-16 seems to allude to some such state of things. In return for this Manasseh, we may believe, received the help of the chariots and horses for which Egypt was always famous (Is. xxxi. 1). (Comp. Aristeas, *Epist. ad Philocr.* in Havercamp's *Josephus*, ii. p. 104).[b] If this was the close of Manasseh's reign, we can well understand how to the writer of the books of Kings it would seem hardly better than the beginning, leaving the root-evil uncured, preparing the way for worse evils than itself. We can understand how it was that on his death he was buried as Ahaz had been, not with the burial of a king, in the sepulchres of the house of David, but in the garden of Uzza (2 K. xxi. 26), and that, long afterwards, in spite of his repentance, the Jews held his name in abhorrence, as one of the three kings (the other two are Jeroboam and Ahab) who had no part in eternal life (Sanhedr. ch. xi. 1, quoted by Patrick on 2 Chr. xxxiii. 13).

And the evil was irreparable. The habits of a sensuous and debased worship had eaten into the life of the people; and though they might be repressed for a time by force, as in the reformation of Josiah, they burst out again, when the pressure was removed, with fresh violence, and rendered even the zeal of the best of the Jewish kings fruitful chiefly in hypocrisy and unreality.

The intellectual life of the people suffered in the

[a] A comparison of the description of these fortifications with Zeph. i. 10 gives a special interest and force to the prophet's words. Manasseh had strengthened the city where it was most open to attack. Zephaniah points to the defences, and says that they shall avail nothing. It is useless to trust in them: "There shall be the noise of a cry *from the fish-gate*."

[b] The passage referred to occurs in the opening paragraphs of the letter of the Pseudo-Aristeas. He is speaking of the large number of Jews (100,000) who had been brought into Egypt by Ptolemy, the son of Lagus. "They, however," he says, "were not the only Jews there. Others, though not so many, had come in with the Persian. Before that troops had been sent, by virtue of a treaty of alliance, to help Psammitichus against the Ethiopians." The direct authority of this writer is, of course, not very great; but the absence of any motive for the invention of such a fact makes it probable that he was following some historical records. Ewald, it should be mentioned, claims the credit of having been the first to discover the bearing of this fact on the history of Manasseh's reign. Another indication that Ethiopia was looked on, about this time, as among the enemies of Judah may be found in Zeph. ii. 12, while in Zeph. iii. 10 we have a clear statement of the fact that a great multitude of the people had found their way to that remote country. The story told by Herodotus of the revolt of the Asmoli (ii. 30) indicates the necessity which led Psammitichus to gather mercenary troops from all quarters for defence of that frontier of his kingdom.

many days. The persecution cut off all who, trained in the schools of the prophets, were the teachers and teachers of the people. The reign of Manasseh witnessed the close of the work of Isaiah and Habakkuk at its beginning, and the youth of Jeremiah and Zephaniah at its conclusion, but no prophetic writings illumine that dreary half century of debasement.[1] The most fearful symptom of all when a prophet's voice was again heard during the minority of Josiah, was the atheism which, then as in other ages, followed on the confused adoption of a confluent polytheism (Zeph. i. 12). It is surely a strained, almost a fantastic hypothesis, to assign (as Ewald does) to such a period two such noble works as Deuteronomy and the Book of Job. Nor was this dying-out of a true faith the only evil. The systematic persecution of the worshippers of Jehovah accustomed the people to the horrors of a religious war; and when they in their turn gained the ascendancy, they used the opportunity with a fiercer sternness than had been known before. Jehoshaphat and Hezekiah in their reforms had been content with restoring the true worship and destroying the instruments of the false. In that of Josiah, the destruction extends to the priests of the high places whom he sacrifices on their own altars (2 K. xxiii. 20).

But little is added by later tradition to the O. T. narrative of Manasseh's reign. The prayer that bears his name among the apocryphal books can hardly, in the absence of any Hebrew original, be considered as identical with that referred to in 2 Chr. xxxiii., and is probably rather the result of an attempt to work out the hint there supplied than the reproduction of an older document. There are reasons, however, for believing that there existed at some time or other, a fuller history, more or less legendary, of Manasseh and his conversion, from which the prayer may possibly have been an *excerpt* preserved for devotional purposes (it appears for the first time in the Apostolical Constitutions) when the rest was rejected as worthless. Scattered here and there, we find the *disjecta membra* of such a work. Among the offences of Manasseh, the most prominent is, that he places in the sanctuary an ὑπλοῦν τετραπόδωτον of Zeus (Suidas, *s. v.* Μανασσῆς; Georg. Syncellus, *Chronograph.* i. 404). The charge on which he condemns Isaiah to death is that of blasphemy, the words, "I saw the Lord" (vi. 1) being treated as a presumptuous boast in accordance with Ex. xxxiii. 20 (Nic. de Lyra, from a Jewish treatise: *Jebamoth*, quoted by Amama, *Diss. Sacri* on 2 K. xxi.). Isaiah is miraculously rescued. A cedar opens to receive him. Then came the order that the cedar should be sawn through. That which made this sin the greater was, that the king's mother, Hephzibah, was the daughter of Isaiah. When Manasseh was taken captive by Merodach and taken to Babylon (2 Chr. xxxiii. 11), he was thrown into prison and fed daily with a scanty allowance of bran-bread and water mixed with vinegar. Then came his condemnation. He was caused in a brazen image (the description suggests a punishment like that of the bull of Perillus), but he repented and prayed, and the image came asunder, and he escaped (Suidas and Georg. Syncellus). Then he returned to Jerusalem and ruled righteously and justly. [E. H. P.]

2 Μανασσῆ: *Manasse.*) One of the descendants of Pahath-Moab, who in the days of Ezra had married a foreign wife (Ezr. x. 30). In 1 Esd. ix. 31 he is called MANASSEAS.

3. One of the laymen, of the family of Hashum, who put away his foreign wife at Ezra's command (Ezr. x. 33). He is called MANASSES in 1 Esd. ix. 33.

4. (*Moyses.*) In the Hebrew text of Judg. xviii. 30, the name of the priest of the graven image of the Danites is given as "Jonathan, the son of Gershom, the son of Manasseh"; the last word being written מְנַשֶּׁה, and a Masoretic note calling attention to the "*nun* suspended." "The fate of this superpositious letter," says Kennicott (*Diss.* ii. 53), "has been very various, sometimes placed over the word, sometimes suspended half-way, and sometimes uniformly inserted." Jarchi's note upon the passage is as follows:—"On account of the honour of Moses he wrote *Nun* to change the name; and it is written suspended to signify that it was not Manasseh but Moses." The LXX., Peshito-Syriac, and Chaldee all read "Manasseh," but the Vulgate retains the original and undoubtedly the true reading, *Moyses.* Three of De Rossi's MSS. had originally מֹשֶׁה, "Moses;" and this was also the reading "of three Greek MSS. in the Library of St. Germain at Paris, of one in the Library of the Carmelites of the same place, of a Greek MS., No. 331, in the Vatican, and of a MS. of the Octateuch in University College Library, Oxford" (Burrington, *Genealogies*, i. 86). A passage in Theodoret is either an attempt to reconcile the two readings, or indicates that in some copies at least of the Greek they must have coexisted. He quotes the clause in question in this form, Ἰωνάθαν . . . υἱὸς Μανασσῆ υἱοῦ Γηρσὰμ υἱοῦ Μωσῆ; and this apparently gave rise to the assertion of Hiller (*Arcanum Keri et Kethib*, p. 187, quoted by Rosenmüller on Judg. xviii. 30), that the "Nun suspended" denotes that the previous word is transposed. He accordingly proposes to read יְהוֹנָתָן בֶּן גֵּרְשֹׁם מְנַשֶּׁה בֶּן נַחַשׁ: but although his judgment on the point is accepted as final by Rosenmüller it has not the smallest authority. Kennicott attributes the presence of the *Nun* to the corruption of MSS. by Jewish transcribers. With regard to the chronological difficulty of accounting for the presence of a grandson of Moses at an apparently late period, there is every reason to believe that the last five chapters of Judges refer to earlier events than those after which they are placed. In xx. 28 Phinehas the son of Eleazar, and therefore the grandson of Aaron, is said to have stood before the ark, and there is therefore no difficulty in supposing that a grandson of Moses might be alive at the same time, which was not long after the death of Joshua. Josephus places the episode of the Benjamites before that of the Gadites, and introduces them both before the invasion of Chushan-rishathaim and the deliverance of Israel by Othniel, narrated in Judg. iii. (*Ant.* v. 2, §8–v. 3, §1: see also Kennicott's *Dissertations*, ii. 51-57; *Dissert. Gener.* p. 10). It may be as well to mention a tradition recorded by R. David Kimchi, that in the genealogy of Jonathan, Manasseh is written for Moses because he did the deed of Manasseh, the idolatrous king of Judah. A note from the margin of a Hebrew MS. quoted by Kennicott (*Diss. Gen.* p. 10) is as follows:—"He is called by the

[1] There is a possible exception to this in the existence of a prophet Hozai (the Vulg. rendering, where the LXX. has τῶν ὁρώντων, and the A. V. "the seers" (2 Chr. xxxiii. 19); but nothing else is known of him.

name of Manasseh the son of Hezekiah, for he also made the graven image in the Temple." It must be confessed that the point of this is not very apparent. [W. A. W.]

MANAS'SES (Μανασσῆς: *Manasses*). 1. MANASSEH 4, of the sons of Hashum (1 Esd. ix. 33; comp. Ezr. x. 33).

2. MANASSEH, king of Judah (Matt. i. 10), to whom the apocryphal prayer is attributed.

3. MANASSEH, the son of Joseph (Rev. vii. 6).

4. A wealthy inhabitant of Bethulia, and husband of Judith, according to the legend. He was smitten with a sunstroke while superintending the labourers in his fields, leaving Judith a widow with great possessions (Jud. viii. 2, 7, x. 3, xvi. 22, 23, 24), and was buried between Dothan and Baal-hamon.

MANAS'SES, THE PRAYER OF (προσευχὴ Μανασσῆ). 1. The repentance and restoration of Manasseh (2 Chr. xxxiii. 12 ff.) furnished the subject of many legendary stories (Fabric. *Cod. Apocr. V. T.* 1101 f.). "His prayer unto his God" was still preserved "in the book of the kings of Israel" when the Chronicles were compiled (2 Chr. xxxiii. 18), and, after this record was lost, the subject was likely to attract the notice of later writers.[a] "The Prayer of Manasseh," which is found in some MSS. of the LXX., is the work of one who has endeavoured to express, not without true feeling, the thoughts of the repentant king. It opens with a description of the majesty of God (1-5), which passes into a description of His mercy in granting repentance to sinners (6-8, ἐμοὶ τῷ ἁμαρτάλῳ). Then follows a personal confession and supplication to God as "the God of them that repent," "hymned by all the powers of heaven," to whom belongs "glory for ever" (9-15, σοῦ ἐστιν ἡ δόξα εἰς τοὺς αἰῶνας). "And the Lord heard the voice of Manasses and pitied him," the legend continues, "and there came around him a flame of fire, and all the irons about him (τὰ περὶ αὐτὸν σιδηρᾶ) were melted, and the Lord delivered him out of his affliction" (*Const. Apost.* ii. 22; comp. Jul. Afric. ap. Routh, *Rel. Sac.* ii. 288).

2. The Greek text is undoubtedly original, and not a mere translation from the Hebrew; and even within the small space of fifteen verses some peculiarities are found (ἄστεκτος, κλίνειν γόνυ καρδίας, παροργίζειν τὸν θυμόν, τίθεσθαι μετάνοιάν τινι). The writer was well acquainted with the LXX. (τὰ κατάστατα τῆς γῆς, τὸ πλῆθος τῆς χρηστοτητός σου, πᾶσα ἡ δύναμις τῶν οὐρανῶν); but beyond this there is nothing to determine the date at which he lived. The allusion to the patriarchs (ver. 8, δίκαιοι; ver. 1, τὸ σπέρμα αὐτῶν τὸ δίκαιον) appears to fix the authorship on a Jew; but the clear teaching on repentance points to a time certainly not long before the Christian era. There is no indication of the place at which the Prayer was written.

3. The earliest reference to the Prayer is contained in a fragment of Julius Africanus (cir. 221 A.D.), but it may be doubted whether the words in their original form clearly referred to the present composition (Jul. Afric. *fr.* 40). It is, however, given at length in the Apostolical Constitutions (ii. 22), in which it is followed by a narrative of the same apocryphal facts (§1) as are quoted from Africanus. The Prayer is found in the Alexandrine MS. in the collection of hymns and metrical prayers which is appended to the Psalter—a position which it generally occupies; but in the three Latin MSS. used by Sabatier it is placed at the end of 2 Chr. (Sabat. *Bibl. Lat.* iii. 1038).

4. The Prayer was never distinctly recognised as a canonical writing, though it was included in many MSS. of the LXX. and of the Latin version, and has been deservedly retained among the apocrypha in A. V. and by Luther. The Latin translation which occurs in Vulgate MSS. is not by the hand of Jerome, and has some remarkable phrases (*intentabilis, importabilis* (ἀνυπόστατος), *omnis cruciatus coelorum*); but there is no sufficient internal evidence to show whether it is earlier or later than his time. It does not, however, seem to have been used by any Latin writer of the first four centuries, and was not known to Victor Tunonensis in the 6th (Ambrosius, iv. 989, ed. Migne).

5. The Commentary of Fritzsche (*Exeg. Handb.* 1851) contains all that is necessary for the interpretation of the Prayer, which is, indeed, in little need of explanation. The Alexandrine text seems to have been interpolated in some places, while it also omits a whole clause; but at present the materials for settling a satisfactory text have not been collected. [B. F. W.]

MANASSITES, THE (הַמְנַשִּׁי, *i. e.* "the Manassite": ὁ Μανασσῆ: *Manasse*), that is, the members of the tribe of Manasseh. The word occurs but thrice in the A. V. viz. Deut. iv. 43; Judg. xii. 4; and 2 K. x. 33. In the first and last of these the original is as given above, but in the other it is "Manasseh"—"Fugitives of Ephraim are you, Gilead; in the midst of Ephraim, in the midst of Manasseh." It may be well to take this opportunity of remarking, that the point of the verse following that just quoted is lost in the A. V. from the word which in ver. 4 is rightly rendered "fugitive" being there given as "those which were escaped." Ver. 5 would more accurately be, "And Gilead seized the fords of the Jordan-of-Ephraim; and it was so that when fugitives of Ephraim said, 'I will go over,' the men of Gilead said to him, 'Art thou an Ephraimite?'"—the point being that the taunt of the Ephraimites was turned against themselves. [G.]

MAN'DRAKES (דוּדָאִים,[a] *dudaim*: μῆλα μανδραγορῶν, οἱ μανδραγόραι: *mandragorae*). "It were a wearisome and superfluous task," says Oedmann (*Vermisch. Samml.* i. v. 95), "to quote and pass judgment on the multitude of authors who have written about *dudaim*:" but the reader who cares to know the literature of the subject will find a long list of authorities in Celsius (*Hierob.* i. 1, sq.) and in Rudbeck (*De Dudaïm Rudenti*, Upsal, 1733). See also Winer, (*Bibl. Realwört.* "Alraun"). The *dudaïm* (the word occurs only in the plural number) are mentioned in Gen. xxx. 14, 15, 16, and in Cant. vii. 13. From the former passage we learn that they were found in the fields of Mesopotamia, where Jacob and his wives were at one time living, and that the fruit (μῆλα μανδραγορῶν, LXX.) was gathered "in the

[a] Ewald (*Gesch.* iii. 679) is inclined to think that the Greek may have been based on the Hebrew. There is at least no trace of such an origin of the Greek text.

[a] Various etymologies have been proposed for this word: the most probable is that it comes from the root דוד "to love," whence דּוֹד, "love."

days of wheat-harvest," *i. e.* in May. There is evidently also an allusion to the supposed properties of this plant to promote conception, hence Rachel's desire of obtaining the fruit, for as yet she had not borne children. In Cant. vii. 13 it is said, "the *dudâîm* give a smell, and at our gates are all manner of pleasant fruits"—from this passage we learn that the plant in question was strong-scented, and that it grew in Palestine. Various attempts have been made to identify the *dudâîm*. Rudbeck the younger—the same who maintained that the quails which fed the Israelites in the wilderness were "flying fish," and who, as Oedmann has truly remarked, seems to have a special gift for demonstrating anything he pleases—supposed the *dudâîm* were "bramble-berries" (*Rubus caesius*, Linn.), a theory which deserves no serious consideration. Celsius, who supposes that a kind of Rhamnus is meant, is far from satisfactory in his conclusions; he identifies the *dudâîm* with what he calls *Lotus Cyrenaica*, the *Sidra* of Arabic authors. This appears to be the lotus of the ancients, *Zizyphus lotus*. See Shaw's *Travels*, i. 263, and Sprengel, *Hist.* ق و

Rei herb. i. 251; Freytag, *Ar. Lex.* s. v. سدر.

Celsius's argument is based entirely upon the authority of a certain Rabbi (see Buxtorf, *Lex. Talm.* p. 1202), who asserts the *dudâîm* to be the fruit of the mayzeh (the lotus?);[b] but the authority of a single Rabbi is of little weight against the almost unanimous testimony of the ancient versions. With still less reason have Castell (*Lex. Hept.* p. 2052) and Leidolf (*Hist. Aeth.* i. c. 9), and a few others, advanced a claim for the *Musa paradisiaca*, the banana, to denote the *dudâîm*. Faber, following Ant. Deusing (*Dissert. de Dudaim*), thought the dudâîm were small sweet-scented melons (*Cucumis dudaim*), which grow in Syria, Egypt, and Persia, known by the Persians as *distembujeh*, a word which means "fragrance in the hand;" and Sprengel (*Hist.* i. 17) appears to have entertained a similar belief. This theory is certainly more plausible than many others that have been adduced, but it is unsupported except by the Persian version in Genesis. Various other conjectures have from time to time been made, as that the *dudâîm* are "figs," or "citrons," or "baskets of figs"—all mere theories.

The most satisfactory attempt at identification is certainly that which supposes the mandrake (*Atropa mandragora*) to be the plant denoted by the Hebrew word. The LXX., the Vulg., the Syriac, and the Arabic versions, the Targums, the most learned of the Rabbis, and many later commentators, are in favour of the translation of the A. V. The arguments which Celsius has adduced against the mandrake being the *dudâîm* have been most ably answered by Michaelis (see *Supp. ad Lex. Heb.* No. 451). It is well known that the mandrake is far from odoriferous, the whole plant being, in European estimation at all events, very fetid; on this account Celsius objected to its being the *dudâîm*, which he supposed were said in the Canticles to be fragrant. Michaelis has shown that nothing of the kind is asserted in Scripture: the *dudâîm* "give forth an odour," which, however, may be one of no fragrant nature; the invitation to the "beloved to go forth into the field" is full of force if we suppose the *dudâîm* ("love plants") to denote the mandrake.[c] Again, the odour or flavour of plants is after all a matter of opinion, for Schulz (*Leitung. des Höchsten*, v. 197), who found mandrakes on Mount Tabor, says of them, "they have a delightful smell, and the taste equally agreeable, though *not to everybody*." Mariti (*Trav.* iii. 146) found on the 7th of May, near the hamlet of St. John in "Mount Juda," mandrake plants, the fruit of which he says "is of the size and colour of a small apple, ruddy and of a *most agreeable odour*." Oedmann, after quoting a number of authorities to show that the mandrakes were prized by the Arabs for their odour, makes the following just remark:—"It is known that Orientals set an especial value on strongly smelling things that to more delicate European senses are unpleasing . . . The intoxicating qualities of the mandrake, far from lessening its value, would rather add to it, for every one knows with what relish the Orientals use all kinds of preparations to produce intoxication."

The Mandrake (*Atropa mandragora*).

The Arabic version of Saadias has *luffach*[d] = mandragora; in Onkelos *yabruchin*, and in Syriac *yabruch*[e] express the Hebrew *dudâîm*: now we learn from Mariti (*Trav.* iii. 146, ed. Lond. 1792) that a word

[b] דודאי. This plant, according to Abulfadli, corresponds with the Arabic مَيْشٌ, which, however, Sprengel identifies with *Zizyphus Paliurus*. ق و

[c] "Qui quidem quod hircinus est quodammodo, virosque mandragorae in Aphrodisiacis laudantur, amoribus auras perflare videtur et ad eos stimulare."

[d] لفاح. [e] יבְרוּחִין. מנפסא

similar to this last was applied by the Arabs to the mandrake—he says "the Arabs call it *jabrohak*."[f] Celsius asserts that the mandrake has not the property which has been attributed to it: it is, however, a matter of common belief in the East that this plant has the power to aid in the procreation of offspring. Schultz, Maundrell, Mariti, all allude to it; compare also Dioscorides, iv. 76, Sprengel's Annotations; and Theophrastus, *Hist. Plant.* ix. 9, §1. Venus was called *Mandragoritis* by the ancient Greeks (Hesych. *s. v.*), and the fruit of the plant was termed "apples of love."

That the fruit was fit to be gathered at the time of wheat-harvest is clear from the testimony of several travellers. Schultze found mandrake-apples on the 15th of May. Hasselquist saw them at Nazareth early in May. He says: "I had not the pleasure to see the plant in blossom, the fruit now [May 5, O. S.] hanging ripe on the stem which lay withered on the ground"—he conjectures that they are Rachel's *dudâîm*. Dr. Thomson (*The Land and the Book*, p. 577) found mandrakes ripe on the lower ranges of Lebanon and Hermon towards the end of April.

From a certain rude resemblance of old roots of the mandrake to the human form, whence Pythagoras is said to have called the mandrake *ἀνθρωπόμορφον*, and Columella (10, 19) *semihomo*, some strange superstitious notions have arisen concerning it. Josephus (*B. J.* vii. 6, §3) evidently alludes to one of these superstitions, though he calls the plant *baaras*. In a Vienna MS. of Dioscorides is a curious drawing which represents Euresis, the goddess of discovery, handing to Dioscorides a root of the mandrake; the dog employed for the purpose is depicted in the agonies of death (Daubeny's *Roman Husbandry*, p. 275).[g]

The mandrake is found abundantly in the Grecian islands, and in some parts of the south of Europe. The root is spindle-shaped and often divided into two or three forks. The leaves, which are long, sharp-pointed, and hairy, rise immediately from the ground; they are of a dark-green colour. The flowers are dingy white, stained with veins of purple. The fruit is of a pale orange colour, and about the size of a nutmeg; but it would appear that the plant varies considerably in appearance according to the localities where it grows. The mandrake (*Atropa mandragora*) is closely allied to the well-known deadly nightshade (*A. belladonna*), and belongs to the order *Solanaceae*. [W. H.]

MANEH. [WEIGHTS AND MEASURES.]

MANGER. This word occurs only in connexion with the birth of Christ, in Luke ii. 7, 12, 16. The original term is *φάτνη*, which is found but once besides in the N. T., viz. Luke xiii. 15, where it is rendered by "stall." The word in classical Greek undoubtedly means a manger, crib, or feeding trough (see Liddell and Scott, *Lex. s. v.*); but according to Schleusner its real signification in the N. T. is the open court-yard, attached to the inn or khan, and enclosed by a rough fence of stones, wattle, or other slight material, into which the cattle would be shut at night, and where the poorer travellers might unpack their animals and take up their lodging when they were either by want of room or want of means excluded from the house. This conclusion is supported by the rendering of the Vulg.—*praesepe*—and of the Peshito-Syriac, ܐܘܪܝܐ, both which terms mean "enclosures,"—and also by the customs of Palestine.[a] Stables and mangers in the sense in which we understand them, are of comparatively late introduction into the East (see the quotations from Chardin and others in Harmer's *Observations*, ii. 205, 6), and although they have furnished material to painters and poets, did not enter into the circumstances attending the birth of Christ—and are hardly less inaccurate than the "cradle" and the "stable,"[b] which are named in some descriptions of that event.

This applies, however, only to the painters of the later schools. The early Christian artists seem almost invariably to represent the Nativity as in an open and detached court-yard. A crib or trough is occasionally shown, but not prominently, and more as if symbolic of the locality than as actually existing.

The above interpretation of *φάτνη* is of course at variance with the traditional belief that the Nativity took place in a cave. Professor Stanley has however shown (*S. & P.* 440, 441; see also 153) how destitute of foundation this tradition is. And it should not be overlooked that the two apocryphal Gospels which appear to be its main foundation, the Protevangelion and the Gospel of the Infancy, do not represent the cave as belonging to the inn—in fact, do not mention the inn in connexion with the Nativity at all, while the former does not introduce the manger and the inn till a later period, that of the massacre of the innocents (Protev. chap. xvi.). [G.]

MA'NI (Μανί: *Banni*). The same as BANI, 4 (1 Esd. ix. 30; comp. Ezr. x. 29).

MAN'LIUS, T. In the account of the conclusion of the campaign of Lysias (B.C. 163) against the Jews given in 2 Macc. xi., four letters are introduced, of which the last purports to be from "L. Memmius and Q. Manlius, ambassadors (*πρεσβευταί*) of the Romans" (ver. 34-38) confirming the concessions made by Lysias. There can be but little doubt that the letter is a fabrication. No such names occur among the many legates to Syria noticed by Polybius; and there is no room for the mission of another embassy between two recorded shortly before and after the death of Antiochus Epiphanes (Polyb. xxxi. 9, 6; 12, 9; Grimm *ad loc.*). If, as seems likely, the true reading is T. Manius (not Manlius), the writer was proudly thinking of the former embassy when C. Sulpicius and Manius Sergius were sent to Syria. The form of the letter is no less fatal to the idea of its authenticity than the names in which it is written. The use of the aera of the Seleucidae to fix the year, the omission of the name of the place at which it was dated, and the exact coincidence of the date of this letter with that of the young Antiochus, are all suspicious circumstances. Moreover, the first intercourse

[f] The Arabs call the fruit *tuphach el sheitah*, "the devil's apple," from its power to excite voluptuousness.

[g] Comp. also Shaksp. *Henry IV.*, Pt. II. Act i. Sc. 2; *Rom. and Jul.*, Act iv. Sc. 3; D'Herbelot, *Biblioth. Orient.* s. v. "Abroussanam."

[a] Those who desire to see all that can be said on the meaning of *φάτνη* in the N. T. and in the LXX., as bearing on the N. T., will find it in the 16th chapter of the 2nd book of P. Horrel, *Miscell. criticorum libri duo: Leovardiae*, 1732

[b] See for example Milton's *Hymn on the Nativity*, line 143.

between the Jews and Romans is marked distinctly as taking place two years later (1 Macc viii 1 ff.), when Judas heard of their power and fidelity

The remaining letters are of no more worth, though it is possible that some facts may have suggested special details (*e. g.* 2 Macc. xi. 29 ff.).

MANNA (מָן, *mân*: Μάννα: *Manhu, Man, Manna*). The most important passages of the O. T. on this topic are the following:—Ex. xvi. 14-36; Num. xi. 7-9; Deut. viii. 3, 16; Josh. v. 12; Ps. lxxviii. 24, 25; Wisd. xvi. 20, 21. From these passages we learn that the manna came every morning except the Sabbath, in the form of a small round seed resembling the hoar frost; that it must be gathered early, before the sun became so hot as to melt it; that it must be gathered every day except the Sabbath; that the attempt to lay aside for a succeeding day, except on the day immediately preceding the Sabbath, failed by the substance becoming wormy and offensive; that it was prepared for food by grinding and baking; that its taste was like fresh oil, and like wafers made with honey, equally agreeable to all palates; that the whole nation subsisted upon it for forty years; that it suddenly ceased when they first got the new corn of the land of Canaan; and that it was always regarded as a miraculous gift directly from God, and not as a product of nature.

The natural products of the Arabian deserts and other Oriental regions, which bear the name of manna, have not the qualities or uses ascribed to the manna of Scripture. They are all condiments or medicines rather than food, stimulating or purgative rather than nutritious; they are produced only three or four months in the year, from May to August, and not all the year round; they come only in small quantities, never affording anything like 15,000,000 of pounds a-week, which must have been requisite for the subsistence of the whole Israelitish camp, since each man had an omer (or three English quarts) a-day, and that for forty years; they can be kept for a long time, and do not become useless in a day or two; they are just as liable to deteriorate on the Sabbath as on any other day; nor does a double quantity fall on the day preceding the Sabbath; nor would natural products cease at once and for ever, as the manna is represented as ceasing in the book of Joshua. The manna of Scripture we therefore regard as wholly miraculous, and not in any respect a product of nature.

The etymology and meaning of the word *manna* are best given by the old authorities, the Septuagint, the Vulgate, and Josephus. The Septuagint translation of Ex. xvi. 15 is this: Ἰδόντες δὲ οἱ υἱοὶ Ἰσραὴλ εἶπαν ἕτερος τῷ ἑτέρῳ, τί ἐστι τοῦτο· οὐ γὰρ ᾔδεσαν τί ἦν. "*But the children of Israel, seeing it, said one to another, What is this? for they knew not what it was.*" The Vulgate, with a very careful reference to the Hebrew, thus: "Quod cum vidissent filii Israel, dixerunt ad invicem *manhu*, quod significat: Quid est hoc? ignorabant enim quid esset:" i. e. '*Which when the children of Israel saw, they said one to another*, MAN HU, which *signifies, What is this? for they knew not what it was.*" In Josephus (*Ant.* iii. 1, §6) we have the following: Καλοῦσι δὲ Ἑβραῖοι τὸ βρῶμα τοῦτο μάνα, τὸ γὰρ μὰν ἀνερώτησις κατὰ τὴν ἐκείνων διάλεκτον, τί τοῦτ' ἐστιν, ἀνακρίνουσα. "*Now the Hebrews call this food* MANNA, *for the particle* MAN, *in our language, is the asking of a question,* WHAT IS THIS?"

According to all these authorities, with which the Syriac also agrees, the Hebrew word *man*, by which this substance is always designated in the Hebrew Scriptures, is the neuter interrogative pronoun (what?); and the name is derived from the inquiry מָן הוּא (*man hu*, what is this?), which the Hebrews made when they first saw it upon the ground. The other etymologies, which would derive the word from either of the Hebrew verbs מָנָה or מָנַן, are more recent and less worthy of confidence, and do not agree with the sacred text; a literal translation of which (Ex. xvi. 15) is this: "*And the children of Israel saw and said, a man to his neighbour, what is this* (man hu); *for they knew not what it was.*"

The Arabian physician Avicenna gives the following description of the manna which in his time was used as a medicine:—"Manna is a dew which falls on stones or bushes, becomes thick like honey, and can be hardened so as to be like grains of corn."

Tamarix Gallica.

The substance now called manna in the Arabian desert through which the Israelites passed, is collected in the month of June from the *tarfa* or tamarisk shrub (*Tamarix gallica*). According to Burckhardt it drops from the thorns on the sticks and leaves with which the ground is covered, and must be gathered early in the day, or it will be

melted by the sun. The Arabs cleanse and boil it, strain it through a cloth, and put it in leathern bottles; and in this way it can be kept uninjured for several years. They use it like honey or butter with their unleavened bread, but never make it into cakes or eat it by itself. It abounds only in very wet years, and in dry seasons it sometimes disappears entirely. Various shrubs, all through the oriental world, from India to Syria, yield a substance of this kind. The tamarisk gum is by some supposed to be produced by the puncture of a small insect, which Ehrenberg has examined and described under the name of *Coccus manniparus*. See *Symbolae Physicae*, p. i.; *Transact. of Literary Society of Bombay*, i. 251. This surely could not have been the food of the Israelites during their forty years' sojourn in the wilderness, though the name might have been derived from some real or fancied resemblance to it.

Rauwolf (*Trav.* i. 94) and some more recent travellers have observed that the dried grains of the oriental manna were like the coriander-seed. Gmelin (*Trav. through Russia to Persia*, pt. iii. p. 28) remarks this of the manna of Persia, which he says is white as snow. The peasants of Ispahan gather the leaves of a certain thorny shrub (the sweet thorn) and strike them with a stick, and the grains of manna are received in a sieve. Niebuhr observed that at Mardin in Mesopotamia, the manna lies like meal on the leaves of a tree called in the East *ballôt* and *afs* or *as*, which he regards as a species of oak.[a] The harvest is in July and August, and much more plentiful in wet than dry seasons. It is sometimes collected before sunrise by shaking it from the leaves on to a cloth, and thus collected it remains very white and pure. That which is not shaken off in the morning melts upon the leaves, and accumulates till it becomes very thick. The leaves are then gathered and put in boiling water, and the manna floats like oil upon the surface. This the natives call *manna essemma*, i. e. *heavenly manna*. In the valley of the Jordan Burckhardt found manna like gum on the leaves and branches of the tree *gharrob*,[b] which is as large as the olive-tree, having a leaf like the poplar, though somewhat broader. It appears like dew upon the leaves, is of a brown or grey colour, and drops on the ground. When first gathered it is sweet, but in a day or two becomes acid. The Arabs use it like honey or butter, and eat it in their oatmeal gruel. They also use it in cleaning their leather bottles and making them air-tight. The season for gathering this is May or June. Two other shrubs which have been supposed to yield the manna of Scripture, are the *Alhagi maurorum*, or Persian *manna*, and the *Alhagi desertorum*,—thorny plants common in Syria.

The manna of European commerce comes mostly from Calabria and Sicily. It is gathered during the months of June and July from some species of ash (*Ornus Europaea* and *Ornus rotundifolia*), from which it drops in consequence of a puncture by an insect resembling the locust, but distinguished from it by having a sting under its body. The substance is fluid at night, and resembles the dew, but in the morning it begins to harden.

[a] عفص, which Freytag, however, identifies with some species of *Capparis*.

[b] Sprengel (*Hist. Rei herb.* i. 270) identifies the *gharrob* or *kharub* with the *Salix babylonica*

Compare Rosenmüller's *Alterthumskunde*, iv. p. 316-29; Winer, *Realwörterbuch*, ii. p. 53, 54; and the Oriental travellers above referred to. [C. E. S.]

Alhagi maurorum.

MANO'AH (מָנוֹחַ: Μανοέ; Joseph. Μανόχης: *Manue*), the father of Samson; a Danite, native of the town of Zorah (Judg. xiii. 2). The narrative of the Bible (xiii. 1-23), of the circumstances which preceded the birth of Samson, supplies us with very few and faint traits of Manoah's character or habits. He seems to have had some occupation which separated him during part of the day from his wife, though that was not field work, because it was in the field that his wife was found by the angel during his absence. He was hospitable, as his forefather Abram had been before him: he was a worshipper of Jehovah, and reverent to a great degree of fear. These faint lineaments are brought into somewhat greater distinctness by Josephus (*Ant.* v. 8, §2, 3), on what authority we have no means of judging, though his account is doubtless founded on some ancient Jewish tradition or record. "There was a certain Manoches who was without controversy the best and chiefest person of his country. This man had a wife of exceeding beauty, surpassing the other women of the place. Now, when they had no children, and were much distressed thereat, he besought God that He would grant unto them a lawful heir, and for that purpose resorted often with his wife to the suburb[a] (τὸ προάστειον) of the city. And in that place was the

[a] Possibly to consult the Levites, whose special property the suburbs of the city were. But Zorah is nowhere stated to have been a Levites' city.

great plain. Now the man loved his wife to distraction, and on that account was exceedingly jealous of her. And it came to pass that his wife being alone, an angel appeared to her . . . and when he had said these things he departed, for he had come by the command of God. When her husband came she informed him of all things concerning the angel, wondering greatly at the beauty and size of the youth, insomuch that he was filled with jealousy and with suspicion thereat. Then the woman desiring to relieve her husband of his excessive grief, besought God that He would send again the angel, so that the man might behold him as well as she. And it came to pass that when they were in the suburbs again, by the favour of God the angel appeared the second time to the woman, while her husband was absent. And she having prayed him to tarry awhile till she should fetch her husband, went and brought Manoches." The rest of the story agrees with the Bible.

We hear of Manoah once again in connexion with the marriage of Samson to the Philistine of Timnath. His father and his mother remonstrated with him thereon, but to no purpose (xiv. 2, 3). They then accompanied him to Timnath, both on the preliminary visit (vers. 5, 6), and to the marriage itself (9, 10). Manoah appears not to have survived his son: not he, but Samson's brothers, went down to Gaza for the body of the hero, and bringing it up to the family tomb between Zorah and Eshtaol, reunited the father to the son (xvi. 31), whose birth had been the subject of so many prayers and so much anxiety. Milton, however, does not take this view. In *Samson Agonistes* Manoah bears a prominent part throughout, and lives to bury his son. [G.]

MANSLAYER.[a] The principle on which the "manslayer" was to be allowed to escape, viz. that the person slain was regarded as "delivered into his hand" by the Almighty, was obviously open to much wilful perversion (1 Sam. xxiv. 4, 18; xxvi. 8; Philo, *De Spec. Leg.* iii. 21, vol. ii. 320), though the cases mentioned appear to be a sufficient example of the intention of the lawgiver. *a.* Death by a blow in a sudden quarrel (Num. xxxv. 22). *b.* Death by a stone or missile thrown at random (ib. 22, 23). *c.* By the blade of an axe flying from its handle (Deut. xix. 5). *d.* Whether the case of a person killed by falling from a roof unprovided with a parapet involved the guilt of manslaughter on the owner, is not clear; but the law seems intended to prevent the imputation of malice in any such case, by preventing as far as possible the occurrence of the fact itself (Deut. xxii. 8). (Michaelis, *On the Laws of Moses*, arts. 223, 280, ed. Smith.) In all these and the like cases the manslayer was allowed to retire to a city of refuge. [CITIES OF REFUGE.]

Besides these the following may be mentioned as cases of homicide. *a.* An animal, not known to be נגחן, causing death to a human being, was to be put to death, and regarded as unclean. But if it was known to be vicious, the owner also was liable to it, and even death (Ex. xxi. 28, 31). *b.* A thief overtaken at night in the act might lawfully be put to death, but if the sun had risen the act of killing him was to be regarded as murder (Ex. xxii. 2, 3). Other cases are added by the Mishna, which, however, are included in the definitions given above. (*Sanh.* ix. 1, 2, 3; *Maccoth*, ii. 2; Otho, *Lex. Rabb.* "Homicida." [MURDER.] [H. W. P.]

MANTLE. The word employed in the A. V. to translate no less than four Hebrew terms, entirely distinct and independent both in derivation and meaning.

1. שְׂמִיכָה, *s'mîcah*. This word occurs but once, viz. Judg. iv. 18, where it denotes the thing with which Jael covered Sisera. It has the definite article prefixed, and it may therefore be inferred that it was some part of the regular furniture of the tent. The clue to a more exact signification is given by the Arabic version of the Polyglott, which renders it by *alcatîfah*, القطيفة, a word which is explained by Dozy,[a] on the authority of Ibn Batuta and other Oriental authors, to mean certain articles of a thick fabric, in shape like a plaid or shawl, which are commonly used for beds by the Arabs: "When they sleep they spread them on the ground." "For the under part of the bed they are doubled several times, and one longer than the rest is used for a coverlid." On such a bed on the floor of Heber's tent no doubt the weary Sisera threw himself, and such a coverlid must the *semicah* have been which Jael laid over him. The A. V. perhaps derived their word "mantle" from the *pallium* of the Vulgate, and the *mantel* of Luther.

2. מְעִיל, *meîl*. (Rendered "mantle" in 1 Sam. xv. 27, xxviii. 14; Ezr. ix. 3, 5; Job i. 20, ii. 12; and Ps. cix. 29.) This word is in other passages of the A. V. rendered "coat," "cloak," and "robe." This inconsistency is undesirable; but in one case only—that of Samuel—is it of importance. It is interesting to know that the garment which his mother made and brought to the infant prophet at her annual visit to the Holy Tent at Shiloh was a miniature of the official priestly tunic or robe; the same that the great Prophet wore in mature years (1 Sam. xv. 27), and by which he was on one occasion actually identified. When the witch of Endor, in answer to Saul's inquiry, told him that "an old man was come up, covered with a *meil*," this of itself was enough to inform the king in whose presence he stood—"Saul perceived that it was Samuel" (xxviii. 14).

3. מַעֲטָפָה *maataphah* (the Hebrew word is found in Is. iii. 22 only). Apparently some article of a lady's dress; probably an exterior tunic, longer and ampler than the internal one, and provided with sleeves. See Gesenius, *Jesaia*, i. 214; Schroeder, *de Vestitu Hebraearum*, ch. xv. § 1-5.

But the most remarkable of the four is:

4. אַדֶּרֶת, *addereth* (rendered "mantle" in 1 K. xix. 13, 19; 2 K. ii. 8, 13, 14; elsewhere "garment" and "robe"); since by it, and it only, is denoted the cape or wrapper which, with the exception of a strip of skin or leather round his loins,

[a] רָצַח part. of רָצָה "pierce" or "crush," Gen. ix. 6; φονεύς; homicida: used also in the sense of murderer. The phrase בִּשְׁגָגָה, ἀκουσίως, *per ignorantiam*, Gen. p. 1362, must therefore be included, to denote the distinction which the Law drew so plainly between malicious and involuntary homicide. (Ex. xxi. 13, 14; Lev. iv. 22; Num. xxxv. 22, 23; Deut. xix. 4, 5.

[a] *Dictionnaire des Vêtements Arabes*, p. 232. We gladly seize this opportunity to express our obligations to this admirable work.

[b] But see the curious speculations of Dr. Maitland *Essay on False Worship*, p. 176, &c.

formed, as we have every reason to believe, the sole garment of the prophet Elijah.

Such clothing, or absence of clothing, is commonly assumed by those who aspire to extraordinary sanctity in the East at the present day—"Savage figures, with 'a cloak woven of camels' hair thrown over the shoulders, and tied in front on the breast, naked except at the waist, round which is a girdle of skin, the hair flowing loose about[c] the head.'" But a description still more exactly in accordance with the habit of the great Israelite [d] dervish, and supporting in a remarkable manner the view of the LXX., who render *adderèth* by μηλωτήν, *i. e.* "sheep-skin," is found in the account of a French traveller[e] in the 16th century:—"L'enseigne que les dervis portent pour montrer qu'ils sont religieux, est une peau de brebis sur leurs epaules: et ne portent autre vêtement sur eux sinon une seule peau de mouton ou de brebis, et quelque chose devant leur parties honteuses."

Inaccurately as the word "mantle" represents such a garment as the above, it has yet become so identified with Elijah that it is impossible now to alter it. It is desirable therefore to substitute "mantle" for "garment" in Zech. xiii. 4; a passage from which it would appear that since the time of Elijah his garb had become the recognized sign of a prophet of Jehovah. [G.]

MA'OCH (מָעוֹךְ: Ἀμμάχ; Alex. Μααβ: *Maoch*), the father of Achish, king of Gath, with whom David took refuge (1 Sam. xxvii. 2). In the Syriac version he is called Maachah; and in 1 K. ii. 39 we find Maachah described as the father of Achish, who was king of Gath at the beginning of Solomon's reign. It is not impossible that the same Achish may be intended in both cases (Keil, *Comm.* on 1 K. ii. 39), and Maoch and Maachah would then be identical; or Achish may have been a title, like Abimelech and Pharaoh, which would still leave Maoch and Maachah the same; "son" in either case denoting descendant.

MA'ON (מָעוֹן: Μαών, Μαάν; Alex. Μαων: *Maon*), one of the cities of the tribe of Judah, in the district of the mountains; a member of the same group which contains also the names of Carmel and Ziph (Josh. xv. 55). Its interest for us lies in its connexion with David. It was in the *midbar* or waste pasture-ground of Maon (A. V. "wilderness") that he and his men were lurking when the treachery of the Ziphites brought Saul upon them, and they had the narrow escape of the cliff of ham-Machlekoth (1 Sam. xxiii. 24, 25). It seems from these passages to have formed part of a larger district called "the Arabah" (A. V. ver. 24, "plain"), which can hardly have been the depressed locality round the Dead Sea usually known by that name. To the north of it was another tract or spot called "the Jeshimon," possibly the dreary burnt-up hills lying on the immediate west of the Dead Sea. Close by was the hill or the cliff of Hacilah, and the *midbar* itself probably extended over and about the mountain (ver. 26), round which Saul was pursuing his fugitives when the sudden alarm of the Philistine incursion drew him off. Over the pastures of Maon and Carmel ranged the three thousand sheep and the thousand goats of Nabal (xxv. 2). Close adjoining was the *midbar* of Paran which the LXX. make identical with Maon. Josephus's version of the passage is curious—"a certain man of the Ziphites from the city Emma" (*Ant.* vi. 13, §6).

The name of Maon still exists all but unchanged in the mouths of the Arab herdsmen and peasants in the south of Palestine. *Main* is a lofty conical hill, south of, and about 7 miles distant from, Hebron. To the north there is an extensive prospect—on the one hand over the region bordering the Dead Sea, on the other as far as Hebron. Close in front is the lower eminence of Kurmul, the ancient Carmel, no less intimately associated with David's fortunes than Maon itself (Rob. i. 493, 494).

It is very much to be desired that some traveller would take the trouble to see how the actual locality of *Main* agrees with the minute indications of the narrative cited above. See also HACHILAH.

In the genealogical records of the tribe of Judah in 1 Chronicles, Maon appears as a descendant of Hebron, through Rekem and Shammai, and in its turn the "father" or colonizer of Beth-zur (ii. 45). Hebron is of course the well-known metropolis of the southern country, and Beth-zur has been identified in *Beit-sûr*, 4 miles north of Hebron, and therefore about 11 from *Main*.

It should not however be overlooked that in the original the name of Maon is identical with that of the Mehunim, and it is quite possible that before the conquest it may have been one of their towns, just as in the more central districts of Palestine there were places which preserved the memory of the Avites, the Zemarites, the Ammonites, and other tribes who originally founded them. [BENJAMIN, vol. i. 188*b*.] [G.]

MA'ONITES, THE (מְעוּנִים, *i. e.* Maon, without the article: Μαϊδμ in both MSS.: *Chamaan*), a people mentioned in one of the addresses of Jehovah to the repentant Israelites, as having at some former time molested them: "the Zidonians also, and Amalek, and Maon did oppress you, and ye cried to me, and I delivered you out of their hand" (Judg. x. 12). The name agrees with that of a people residing in the desert far south of Palestine, elsewhere in the A. V. called MEHUNIM; but, as no invasion of Israel by this people is related before the date of the passage in question, various explanations and conjectures have been offered. The reading of the LXX.—"Midian"—is remarkable as being found in both the great MSS., and having on that account a strong claim to be considered as the reading of the ancient Hebrew text. Ewald (*Gesch.* i. 322 *note*) appears to incline to this, which has also in its favour, that, if it be not genuine, Midian—whose ravages were then surely too recent to be forgotten—is omitted altogether from the enumeration. Still it is remarkable that no variation has hitherto been found in the Hebrew MSS. of this verse. Michaelis (*Bibel für Ungelehrte*; and *Supplem.* No. 1437), on the other hand, accepts the current reading, and explains the difficulty by assuming that Maon is included among the Bene-Kedem, or "children of the East," named in vi. 3: leaving, however, the equal difficulty of the omission of Israel's great foe, Midian, unnoticed. The reason which would lead

[b] Light, *Travels in Egypt*, &c., quoted by Stanley, *S. & P.* 311.

[c] See the instructive and suggestive remarks of Dr. Wolff, on the points of correspondence between the ancient Prophets and the modern Dervishes (*Travels*, &c. i. 483; also 329, 531); and Stanley's *East. Church*, 97.

[d] Belon, *Observations* (Paris, 1588), quoted by Dozy *Dictionnaire*, &c., p. 54.

to accept Midian would lead us to reject the reading of the Syriac Peshito—"Ammon,"—the Beneammon having been already named. "Canaan" was probably a conjecture of Jerome's. [MEHUJAEL.]

A trace of the residence of the Maonites in the south of Palestine is perhaps extant in MAON, now *Main*, the city of Judah so well known in connexion with David. [G.]

MARA (מָרָא, or, according to the correction of the *Kri*, מָרָה), the name which NAOMI adopted as the exclamation forced from her by the recognition of her fellow-citizens at Bethlehem (Ruth i. 20), "Call me not Naomi (pleasant), but call me Mara (bitter), for Shaddai hath dealt-very-bitterly (hamer) with me." The LXX. have preserved the play.... πικράν, ὅτι ἐπικράνθη ὁ ἱκανός; though hardly as well as Jerome, "*Vocate me Mara* (hoc est amaram) *quia amaritudine me replevit omnipotens.*" Marah is often assumed to have been the origin of the name MARY, but inaccurately, for Mary—in the N. T. Mariam—is merely a corruption of MIRIAM (see that article). [G.]

MARAH (מָרָה: Μερρᾶ, Πικρία, Πικρίαι: *Mara*), a place which lay in the wilderness of Shur or Etham, three days' journey distant (Ex. xv. 22-24, Num. xxxiii. 8) from the place at which the Israelites crossed the Red Sea, and where was a spring of bitter water, sweetened subsequently by the casting in of a tree which "the Lord showed" to Moses. It has been suggested (Burckhardt, *Syria*, 474) that Moses made use of the berries of the plant *Ghârkâd*,[a] and which still it is implied would be found similarly to operate. Robinson, however i. 67), could not find that this or any tree was now known by the Arabs to possess such properties; nor would those berries, he says, have been found so early in the season as the time when the Israelites reached the region. It may be added that, had any such resource ever existed, its eminent usefulness to the supply of human wants would hardly have let it perish from the traditions of the desert. Further, the expression "the Lord shewed" seems surely to imply the miraculous character of the transaction. As regards the identity of Marah with any modern site, all travellers appear to seek out for water which is bitter at this day, it seems if miraculous, the effect would surely have been permanent, as it clearly is intended to be in Ex. xv. 21. On this supposition, however, *Howarah*, distant 16½ hours (Rob. *B. R.*, i. 67) from *Ayoun Mousa*, has been by Robinson, as also by Burckhardt (April 27, 1816), Schubert (274), and Wellsted, identified with it, apparently because it is the bitterest water in the neighbourhood. Winer (*R. W. B.*) that a still bitterer well lies east of Marah, the claims of which Tischendorf, it appears, has supported. Lepsius prefers *Wady Ghârundel*. Mr. Stanley thinks that the claim may be left between this and *Howarah*, but adds in a note a mention of a spring south of *Howarah*, "so bitter that neither men nor camels could drink it," of which "Dr. Grael (vol. ii. p. 254) was told." The *Ayoun Mousa*, "wells of Moses," which local tradition points to Marah, are manifestly too close to the head of the gulf, and probable spot of crossing it,

[a] Rabbinic מרי (l. 26), "*pagumum returum*," Forst., *Flora Aeg. Arab.* p. lxvi. More correctly, "*Nitraria tridentata*" of Desfontaines, *Flora Atlant.* i. 372.

to suit the distance of "three days' journey." The soil of this region is described as being alternately gravelly, stony, and sandy; under the range of the *Gebel Wardan* chalk and flints are plentiful, and on the direct line of route between *Ayoun Mousa* and *Howarah* no water is found (Robinson, i. 67). [H. H.]

MAR'ALAH (מַרְעָלָה: Μαγελδά; Alex. Μαριλά: *Marala*), one of the landmarks on the boundary of the tribe of Zebulun (Josh. xix. 11), which, with most of the places accompanying it, is unfortunately hitherto unknown. Keil (*Josua*, ad loc.) infers, though on the slightest grounds, that it was somewhere on the ridge of Carmel. [G.]

MARAN'ATHA (Μαρανα θά), an expression used by St. Paul at the conclusion of his first Epistle to the Corinthians (xvi. 22). It is a Grecised form of the Aramaic words מָרָן אָתָא, "our Lord cometh." In the A. V. it is combined with the preceding "anathema;" but this is unnecessary; at all events it can only be regarded as adding emphasis to the previous adjuration. It rather appears to be added "as a weighty watchword" to impress upon the disciples the important truth that the Lord was at hand, and that they should be ready to meet Him (Alford, *Gr. Test.* in loc.). If, on the other hand, the phrase be taken to mean, as it may, "Our Lord *has* come," then the connection is, "the curse will remain, for the Lord has come who will take vengeance on those who reject Him." Thus the name "Maronite" is explained by a tradition that the Jews, in expectation of a Messiah, were constantly saying *Maran*, i.e. Lord; to which the Christians answered *Maran atha*, the Lord is come, why do you still expect Him? (Stanley, *Corinthians*, ad loc.). [W. L. B.]

MARBLE.[a] Like the Greek μάρμαρος, No. 1 (see foot-note), the generic term for marble may probably be taken to mean almost any shining stone. The so-called marble of Solomon's architectural works, which Josephus calls λίθος λευκός, may thus have been limestone—(*a*) from near Jerusalem (*b*) from Lebanon (Jura limestone), identical with the material of the Sun Temple at Baalbec; or (*c*) white marble from Arabia or elsewhere (Joseph. *Ant.* viii. 3, §2; Diod. Sic. ii. 52; Plin. *H. N.* xxxvi. 12; Jamieson, *Mineralogy*, 41; Rëumer, *Pal.* 28; Volney, *Trav.* ii. 241; Kitto, *Phys. Geogr. of Pal.* 73, 88; Robinson, ii. 493, iii. 508; Stanley, *S. & P.* 307, 424; Wellsted, *Trav.* i. 426, ii. 143). That this stone was not marble seems probable from the remark of Josephus, that whereas Solomon constructed his buildings of "white stone," he caused the roads which led to Jerusalem to be made of "black stone," probably the black basalt of the *Haurân;* and also from his account of the porticoes of Herod's temple, which he says were μονόλιθοι λευκοτήτης μαρμάρου (Joseph. *Ant. l.c.*, and *B. J.* v. 5, §1, 6; Kitto, pp. 74, 75, 80,

[a] 1. שֵׁשׁ, or שַׁיִשׁ; Πάρος, Πάριος λίθος; *marmor Parium;* from שָׁשָׁה, to shine (Gen. 1384). 2. סַחֶרֶת, from סָחַר, to travel round, either a stone used in tessellated pavements, or one with circular spots (Gen. 947). 3. דֹּר; πίννινος λίθος; probably a stone with pearly appearance, like alabaster (Gen. 355). 4. בַּהַט; σμαραγδίτης λίθος; *lapis smaragdinus* (Gen. 182). The three last words used only in Esth. i. 6. 5. μάρμαρος; *marmor* (Rev. xviii. 12).

89). But whether the "costly stone" employed in Solomon's buildings was marble or not, it seems clear from the expressions both of Scripture and Josephus, that some at least of the "great stones," whose weight can scarcely have been less than 40 tons, must have come from Lebanon (1 K. v. 14-18, vii. 10; Joseph. *Ant.* viii. 2, §9).

There can be no doubt that Herod, both in the Temple and elsewhere, employed Parian or other marble. Remains of marble columns still exist in abundance at Jerusalem (Joseph. *Ant.* xv. 9, §4, 6, and 11, §3, 5; Williams, *Holy City*, ii. 330; Sandys, 190; Robinson, i. 301, 305).

The marble pillars and tesserae of various colours of the palace at Susa came doubtless from Persia itself, where marble of various colours is found, especially in the province of Hamadan, Susiana. (Esth. i. 6; Marco Polo, *Travels*, 78, ed. Bohn; Chardin, *Voy.* iii. 280, 308, 358, and viii. 253; P. della Valle, *Viaggi*, ii. 250; Winer, s. v. "Marmor.") [H. W. P.]

MARCHESHVAN. [MONTHS.]

MAR'CUS (Μάρκος: *Marcus*). The Evangelist Mark, who was cousin to Barnabas (Col. iv. 10), and the companion and fellow-labourer of the apostles Paul (Philem. 24) and Peter (1 Pet. v. 13). [MARK.]

MARDOCHE'US (Μαρδοχαῖος: *Mardochaeus*). 1. MORDECAI, the uncle of Esther, in the apocryphal additions (Esth. x. 1, xi. 2, 12, xii. 1-6, xvi. 13; 2 Macc. xv. 36). The 14th of the month Adar, on which the feast of Purim was celebrated, is called in the last passage "Mardocheus' day" (ἡ Μαρδοχαϊκὴ ἡμέρα; *Mardochaei dies*).

2. (*Mardocheus*) = MORDECAI, who returned with Zerubbabel and Joshua (1 Esdr. v. 8; comp. Ezr. ii. 2).

MARE'SHAH (מָרֵאשָׁה, in Josh. only; elsewhere in the shorter form of מָרֵשָׁה: Βαθησόρ, τὴν Μαρεισάν; Alex. Μαρησα: *Maresa*), one of the cities of Judah in the district of the Shefelah or low country; named in the same group with KEILAH and NEZIB (Josh. xv. 44). If we may so interpret the notices of the 1 Chronicles (see below), Hebron itself was colonized from Mareshah. It was one of the cities fortified and garrisoned by Rehoboam after the rupture with the northern kingdom (2 Chr. xi. 8). The natural inference is, that it commanded some pass or position of approach, an inference which is supported by the fact that it is named as the point to which the enormous horde of Zerah the Cushite reached in his invasion of Judaea, before he was met and repulsed by Asa (2 Chr. xiv. 9). A ravine (ver. 10; *Ge*: A. V. "valley") bearing the name of Zephathah was near. In the rout which followed the encounter, the flying Cushites were pursued to the Bedouin station of Gerar (ver. 14, 15).

Mareshah is mentioned once or twice in the history of the Maccabaean struggles. Judas probably passed through it on his way from Hebron to avenge the defeat of Joseph and Azarias (1 Macc. v. 66. The reading of the LXX. and A. V. is Samaria; but Josephus, *Ant.* xii. 8, §6, has *Marisa*, and the position is exactly suitable, which that of Samaria is not. The same exchange, but reversed, will be found in 2 Macc. xii. 35.)

A few days later it afforded a refuge to Gorgias when severely wounded in the attack of Timotheus (2 Macc. xii. 35; here, as just remarked, the Syriac version would substitute Samaria,—a change quite unallowable). Its subsequent fortunes were sad enough, but hardly worse than might be expected for a place which lay as it were at the junction of two cross-roads, north and south, east and west, each the constant thoroughfare of armies. It was burnt by Judas in his Idumaean war, in passing from Hebron to Azotus (*Ant.* xii. 8, §6. About the year 110 B.C. it was taken from the Idumaeans by John Hyrcanus. Some forty years after, about B.C. 63, its restoration was decreed by the clement Pompey (*Ant.* xiv. 4, §4), though it appears not to have been really reinstated till later (xiv. 5, §3). But it was only rebuilt to become again a victim (B.C. 39), this time to the Parthians, who plundered and destroyed it in their rage at not finding in Jerusalem the treasure they anticipated (*Ant.* xiv. 13, §9; *B. J.* i. 13, §9). It was in ruins in the 4th century, when Eusebius and Jerome describe it as in the second mile from Eleutheropolis. S.S.W. of *Beit-jibrin*—in all probability Eleutheropolis—and a little over a Roman mile therefrom, is a site called *Marash*, which is very possibly the representative of the ancient Mareshah. It is described by the indefatigable Tobler (*Dritte Wand.* 129, 142) as lying on a gently swelling hill leading down from the mountains to the great western plain, from which it is but half an hour distant. The ruins are not extensive, and Dr. Robinson, to whom their discovery is due,[a] has ingeniously conjectured (on grounds for which the reader is referred to *B. R.* ii. 67, 68) that the materials were employed in building the neighbouring Eleutheropolis.

On two other occasions Mareshah comes forward in the O. T. It was the native place of Eliezer ben-Dodavah, a prophet who predicted the destruction of the ships which king Jehoshaphat had built in conjunction with Ahaziah of Israel (2 Chr. xx. 37). It is included by the prophet Micah among the towns of the low country which his attempts to rouse to a sense of the dangers their misconduct is bringing upon them (Mic. i. 15). Like the rest, the apostrophe to Mareshah is a play on the name: "I will bring your heir (*yoresh*) to you, oh city of inheritance" (*Mareshah*). The following verse (16) shows that the inhabitants had adopted the heathen and forbidden custom of cutting off the back hair as a sign of mourning.

2. (Μαρεισᾶ) Father of Hebron, and apparently a son or descendant of Caleb the brother of Jerahmeel (1 Chr. ii. 42), who derived his descent from Judah through Pharez. "The sons of Caleb were . . . Mesha, the father of Ziph, and the sons of Maresha father of Hebron." It is difficult not to suppose that Mesha may have been a transcriber's variation for Maresha, especially as the text of the LXX.—both MSS.—actually stands so. It is however only a probable conjecture. The names in these lists are many of them no doubt those not of persons but of towns, and whether Mesha and Mareshah be identical or not, a close relationship is equally denoted between the towns of Hebron and Mareshah. But

[a] Benjamin of Tudela (Asher, i. 77) identifies Mareshah with "Beit Gabrin." Parchi, with unusual inaccuracy, would place it in the mountains East of Jaffa.

3. (Μαρμώ; Alex. Μαρμοθ) in 1 Chr. iv. 21 we find Mareshah again named as deriving its origin from SHELAH, the third son of Judah, through Laadah. Whether this Mareshah be a man or a place, identical with or distinct from the last-mentioned, it is impossible to determine. [G.]

MARIMOTH (*Marimoth*). The same as MEMAIOTH the priest, one of the ancestors of Ezra (1 Esdr. i. 2; comp. Ezr. vii. 3). He is also called MELEMOTH (1 Esdr. viii. 2).

MARISA (Μαρισά: *Maresa*), the Greek form of the name MARESHAH, occurring 2 Macc. xii. 35 only. [G.]

MARK (Μάρκος: *Marcus*). Mark the Evangelist is probably the same as "John whose surname was Mark" (Acts xii. 12, 25). Grotius indeed maintains the contrary, on the ground that the earliest ecclesiastical writers nowhere call the Evangelist by the name of John, and that they always describe him as the companion of Peter and not of Paul. But John was the Jewish name, and Mark, a name of frequent use amongst the Romans, was adopted afterwards, and gradually superseded the other. The places in the N. T. enable us to trace the process. The John Mark of Acts xii. 12, 25, and the John of Acts xiii. 5, 13, becomes Mark only in Acts xv. 39, Col. iv. 10, 2 Tim. iv. 11, Philem. 24. The change of John to Mark is analogous to that of Saul to Paul; and we cannot doubt that the choice of the Jewish name in favour of the other is intentional, and has reference to the putting away of his former life, and entrance upon a new ministry. No inconsistency arises from the accounts of his ministering to two Apostles. The desertion of Paul (Acts xiii. 13) may have been prompted partly by a wish to rejoin Peter and the Apostles engaged in preaching in Palestine (Benson; see Kuinoel's note), though partly from a disinclination to a perilous and doubtful journey. There is nothing strange in the character of a warm impulsive young man, drawn almost equally towards the two great leaders of the faith, Paul and Peter. Had mere cowardice been the cause of his withdrawal, Barnabas would not so soon after have chosen him for another journey, nor would he have accepted the choice.

John Mark was the son of a certain Mary, who lived at Jerusalem, and was therefore probably born in that city (Acts xii. 12). He was the cousin (ἀνεψιός) of Barnabas (Col. iv. 10). It was to Mary's house, as to a familiar haunt, that Peter came after his deliverance from prison (Acts xii. 12), and there found "many gathered together praying;" and probably John Mark was converted by Peter from seeing him in his mother's house, for he speaks of "Marcus my son" (1 Pet. v. 13). This natural line of connexion between the two passages is broken by the supposition of two Marks, which is on all accounts improbable. The theory that he was one of the seventy disciples is without any warrant. Another theory, that an event of the night of our Lord's betrayal, related by Mark alone, is one that he himself (Olshausen, Lange), must not be so promptly dismissed. "There followed Him a certain young man, having a linen cloth cast about his naked body; and the young men laid hold on him: and he left the linen cloth, and fled from them naked" Mark xiv. 51, 52). The detail of facts is remarkably minute, the name only is wanting. The most probable view is that St. Mark suppressed his own name, whilst telling a story which he had the best means of knowing. Awakened out of sleep, or just preparing for it, in some house in the valley of Kedron, he comes out to see the seizure of the betrayed Teacher, known to him and in some degree beloved already. He is so deeply interested in His fate that he follows Him even in his own linen robe. His demeanour is such that some of the crowd are about to arrest him; then, "fear overcoming shame" (Bengel), he leaves his garment in their hands and flees. We can only say that if the name of Mark is supplied the narrative receives its most probable explanation. John (i. 40, xix. 26) introduces himself in this unobtrusive way, and perhaps Luke the same (xxiv. 18). Mary the mother of Mark seems to have been a person of some means and influence, and her house a rallying point for Christians in those dangerous days. Her son, already an inquirer, would soon become more. Anxious to work for Christ, he went with Paul and Barnabas as their "minister" (ὑπηρέτης) on their first journey; but at Perga, as we have seen above, turned back (Acts xii. 25, xiii. 13). On the second journey Paul would not accept him again as a companion, but Barnabas his kinsman was more indulgent; and thus he became the cause of the memorable "sharp contention" between them (Acts xv. 36-40). Whatever was the cause of Mark's vacillation, it did not separate him for ever from Paul, for we find him by the side of that Apostle in his first imprisonment at Rome (Col. iv. 10; Philem. 24). In the former place a possible journey of Mark to Asia is spoken of. Somewhat later he is with Peter at Babylon (1 Pet. v. 13). Some consider Babylon to be a name here given to Rome in a mystical sense; surely without reason, since the date of a letter is not the place to look for a figure of speech. Of the causes of this visit to Babylon there is no evidence. It may be conjectured that he made the journey to Asia Minor (Col. iv. 10), and thence went on to join Peter at Babylon. On his return to Asia he seems to have been with Timothy at Ephesus when Paul wrote to him during his second imprisonment, and Paul was anxious for his return to Rome (2 Tim. iv. 11).

When we desert Scripture we find the facts doubtful and even inconsistent. If Papias be trusted (quoted in Eusebius, *H. E.* iii. 39), Mark never was a disciple of our Lord; which he probably infers from 1 Pet. v. 13. Epiphanius, on the other hand, willing to do honour to the Evangelist, adopts the tradition that he was one of the seventy-two disciples, who turned back from our Lord at the hard saying in John vi. (*Cont. Haer.* li. 6, p. 457, Dindorf's recent edition). The same had been said of St. Luke. Nothing can be decided on this point. The relation of Mark to Peter is of great importance for our view of his Gospel. Ancient writers with one consent make the Evangelist the interpreter (ἑρμηνευτής) of the Apostle Peter (Papias in Euseb. *H. E.* iii. 39; Irenaeus, *Haer.* iii. 1, iii. 10, 6; Tertullian, *c. Marc.* iv. 5; Hieronymus, *ad Hedib.* ix., &c.). Some explain this word to mean that the office of Mark was to translate into the Greek tongue the Aramaic discourses of the Apostle (Eichhorn, Bertholdt, &c.); whilst others adopt the more probable view that Mark wrote a Gospel which conformed more exactly than the others to Peter's preaching, and thus "interpreted" it to the church at large (Valesius, Alford, Lange, Fernandez, Meyer, &c.). The passage from Eusebius

favours the latter view; it is a quotation from Papias. "This also [John] the elder said:—Mark, being the interpreter of Peter, wrote down exactly whatever things he remembered, but yet not in the order in which Christ either spoke or did them; for he was neither a hearer nor a follower of the Lord's, but he was afterwards, *as I* [Papias] *said, a follower of Peter.*" The words in italics refer to the word interpreter above, and the passage describes a disciple writing down what his master preached, and not an interpreter orally translating his words. This tradition will be further examined below. [MARK, GOSPEL OF.] The report that Mark was the companion of Peter *at Rome* is no doubt of great antiquity. Clement of Alexandria is quoted by Eusebius as giving it for "a tradition which he had received of the elders from the first" (*παράδοσιν τῶν ἀνέκαθεν πρεσβυτέρων*, Eusebius, *H. E.* vi. 14; Clem. Alex. *Hyp.* 6). But the force of this is invalidated by the suspicion that it rests on a misunderstanding of 1 Pet. v. 13, Babylon being wrongly taken for a typical name of Rome (Euseb. *H. E.* ii. 15; Hieron. *De Vir. ill.* 8). Sent on a mission to Egypt by Peter (Epiphanius, *Haer.* li. 6, p. 457, Dindorf; Euseb. *H. E.* ii. 16), Mark there founded the church of Alexandria (Hieron. *De Vir. ill.* 8), and preached in various places (Niceph. *H. E.* ii. 43), then returned to Alexandria, of which church he was bishop, and suffered a martyr's death (Niceph. ibid., and Hieron. *De Vir. ill.* 8). But none of these later details rest on sound authority. (SOURCES:—The works on the Gospels referred to under LUKE and GOSPELS; also Fritzsche, *In Marcum*, Leipzig, 1830; Lange, *Bibelwerk*, part ii., &c.) [W. T.]

MARK, GOSPEL OF. The characteristics of this Gospel, the shortest of the four inspired records, will appear from the discussion of the various questions that have been raised about it.

I. *Sources of this Gospel.*—The tradition that it gives the teaching of Peter, rather than of the rest of the Apostles, has been alluded to above. The witness of John the Presbyter, quoted by Eusebius (*H. E.* iii. 39) through Papias, has been cited. [See p. 235, *b*.] Irenaeus calls Mark "interpres et sectator Petri," and cites the opening and the concluding words of the Gospel as we now possess them (iii. x. 6). He also alludes to a sect (the Cerinthians?) who hold "impassibilem perseverasse Christum, passum vero Jesum," and who prefer the Gospel of St Mark to the rest (iii. xi. 7). Eusebius says, on the authority of Clement of Alexandria, that the hearers of Peter at Rome desired Mark, the follower of Peter, to leave with them a record of his teaching; upon which Mark wrote his Gospel, which the Apostle afterwards sanctioned with his authority, and directed that it should be read in the Churches (Eus. *H. E.* ii. 15). Elsewhere, quoting Clement again, we have the same account, except that Peter is there described as "neither hindering nor urging" the undertaking (*H. E.* vi. 14). The apparent contradiction has been conciliated by supposing that Peter neither helped nor hindered the work before it was completed, but gave his approval afterwards ("licet fieri ipsum non jusserit, tamen factum non prohibuit," Ruffinus: see note of Valesius *in loc.* Eus.). Tertullian (*Cont. Marcionem*, iv. 5) speaks of the Gospel of Mark as being connected with Peter, "cujus interpres Marcus," and so having apostolic authority. Epiphanius says that, immediately after St. Matthew, the task was laid on St. Mark, "the follower of St. Peter at Rome," of writing a Gospel (*Haer.* li.). Hieronymus (*De Vir. ill.* 8) repeats the story of Eusebius; and again says that the Gospel was written, "Petro narrante, et illo scribente" (*Ad Hedib.* 2). If the evidence of the Apostle's connexion with this Gospel rested wholly on these passages, it would not be sufficient, since the witnesses, though many in number, are not all independent of each other, and there are marks, in the former of the passages from Eusebius, of a wish to enhance the authority of the Gospel by Peter's approval, whilst the latter passage does not allege the same sanction. But there are peculiarities in the Gospel which are best explained by the supposition that Peter in some way superintended its composition. Whilst there is hardly any part of its narrative that is not common to it and some other Gospel, in the manner of the narrative there is often a marked character, which puts aside at once the supposition that we have here a mere epitome of Matthew and Luke. The picture of the same events is far more vivid; touches are introduced such as could only be noted by a vigilant eye-witness, and such as make us almost eye-witnesses of the Redeemer's doings. The most remarkable case of this is the account of the demoniac in the country of the Gadarenes, where the following words are peculiar to Mark: "And no man could bind him, no not with chains: because that he had often been bound with fetters and chains, and the chains had been plucked asunder by him, and the fetters broken in pieces: neither could any man tame him. And always night and day he was in the mountains crying and cutting himself with stones. But when he saw Jesus afar off, he ran," &c. Here we are indebted for the picture of the fierce and hopeless wanderer to the Evangelist whose work is the briefest, and whose style is the least perfect. He sometimes adds to the account of the others a notice of our Lord's look (iii. 34, viii. 33, x. 21, x. 23); he dwells on human feelings and the tokens of them; on our Lord's pity for the leper, and His strict charge not to publish the miracle (i. 41, 44); He "loved" the rich young man for his answer (x. 21); He "looked round" with anger when another occasion called it out (iii. 5); He groaned in spirit (vii. 34, viii. 12). All these are peculiar to Mark; and they would be explained most readily by the theory that one of the disciples most near to Jesus had supplied them. To this must be added that whilst Mark goes over the same ground for the most part as the other Evangelists, and especially Matthew, there are many facts thrown in which prove that we are listening to an independent witness. Thus the humble origin of Peter is made known through him (i. 16-20), and his connexion with Capernaum (i. 29); he tells us that Levi was "the son of Alphaeus" (ii. 14), that Peter was the name given by our Lord to Simon (iii. 16), and Boanerges a surname added by Him to the names of two others (iii. 17); he assumes the existence of another body of disciples wider than the Twelve (iii. 32, iv. 10, 36, viii. 34, xiv. 51, 52): we owe to him the name of Jairus (v. 22), the word "carpenter" applied to our Lord (vi. 3), the nation of the "Syrophoenician" woman (vii. 26); he substitutes Dalmanutha for the "Magdala" of Matthew (viii. 10); he names Bartimaeus (x. 46); he alone mentions that our Lord would not suffer any man to carry any vessel through the Temple (xi. 16); and that Simon of Cyrene was the father of Alexander and Rufus (xv. 21). All these are tokens of an in-

pendent writer, different from Matthew and Luke, d in the absence of other traditions it is natural look to Peter. One might hope that much light ould be thrown on this question from the way in hich Peter is mentioned in the Gospel; but the idence is not so clear as might have been expected. ter is often mentioned without any special occa- n for it (i. 36, v. 37, xi. 20-26, xiii. 3, xvi. 7); ut on the other hand there are passages from which might seem that the writer knew less of the great postle. Thus in Matt. xv. 15 we have "Peter;" the parallel place in Mark only "the disciples." he Apostle's walking on the sea is omitted: so the lessing pronounced on him (Matt. xvi. 17-19), and he promise made to all the Apostles in answer to im Matt. xix. 28). Peter was one of those who ere sent to prepare the Passover; yet Mark omits is name. The word "bitterly" of Matthew and uke is omitted by Mark from the record of Peter's pentance; whilst the account of his denials is full nd circumstantial. It has been sought to account r these omissions on the ground of humility; but one may think that this cannot be the clue to all he places. But what we generalize from these assages is, that the name Peter is peculiarly dealt ith, added here, and there withdrawn, which ould be explained if the writer had access to ecial information about Peter. On the whole, in pite of the doubtfulness of Eusebius' sources, and he almost self-contradiction into which he falls, the ternal evidence inclines us to accept the account hat this inspired Gospel has some connexion with t. Peter, and records more exactly the preaching hich he, guided by the Spirit of God, uttered for he instruction of the world.

II. *Relation of Mark to Matthew and Luke.*—The results of criticism as to the relation of the hree Gospels are somewhat humiliating. Up to his day three views are maintained with equal ardour: (*a*) that Mark's Gospel is the original Gospel out of which the other two have been eveloped; (*b*) that it was a compilation from the ther two, and therefore was written last; and , that it was copied from that of Matthew, and orms a link of transition between the other two. a Of the first view Thiersch may serve as the xponitor. "No one," he says, "will now venture o call Mark a mere epitomizer of Matthew and uke. Were his Gospel an epitome of theirs, it ould bear the marks of the attempt to combine ome the excellences of both; else the labour of pitome would have been without an object. But he very opposite is the case. We miss the pecu- arities of Matthew and Luke. We find that ark is common to both. And therefore, were ark's Gospel a mere epitome of the others, we ould have a third repetition of that which had een already twice related, with so little additional r more exact matter, that the intention and con- ect of the writer would remain a riddle. This ifficulty disappears, and a great step is made in reaking the labyrinth of the Gospel harmony, hen we see that Mark formed the basis of Mat- hew and Luke. Where they follow him they gree. Where they do not, as in the history of he Lord's childhood, in His discourses, and in is appearances after His resurrection, they differ idely, and each takes his own way" (Thiersch, *hurch History*, p. 94, Carlyle's translation). But he amount of independent narrative is too great, r each of the others, to admit of their having erived their Gospels from Mark; and in the places which they have in common, each treats the events in an independent way, and not as a copyist. Still this opinion has been held by Herder, Storr, Wilke, Weisse, Reuss, Ewald, and others. (*b*) The theory that Mark's Gospel is a compilation and abridgment of that of Matthew is maintained by Augustin, and after him by Euthymius and Michaelis. The facts on which it rests are clear enough. There are in St. Mark only about three events which St. Matthew does not narrate (Mark i. 23, viii. 22, xii. 41); and thus the matter of the two may be regarded as almost the same. But the form in St. Mark is, as we have seen, much briefer, and the omissions are many and important. The explanation is that Mark had the work of Matthew before him, and only condensed it. But many would make Mark a compiler from both the others (Griesbach, De Wette, &c.), arguing from passages where there is a curious resemblance to both (see De Wette, *Handbuch*, §94*a*). (*c*) Lastly, the theory that the Gospel before us forms a sort of transition-link between the other two, standing midway between the Judaic tendency of Matthew and the Universalist or Gentile Gospel of St. Luke, need not trouble us much here [see above, p. 155]. An account of these views may be found in Hilgenfeld's *Evangelien*. It is obvious that they refute one another: the same internal evidence suffices to prove that Mark is the first, and the last, and the intermediate. Let us return to the facts, and, taught by these contradictions what is the worth of "internal evidence," let us carry our speculations no further than the facts. The Gospel of Mark contains scarcely any events that are not recited by the others. There are verbal coincidences with each of the others, and sometimes peculiar words from both meet together in the parallel place in Mark. On the other hand, there are unmistakeable marks of independence. He has passages peculiar to himself (as iii. 20, 21, iv. 26-29, vii. 31-37, viii. 22-26, xi. 11-14, xiv. 51, 52, xvi. 9-11), and a peculiar fulness of detail where he goes over the same ground as the others. The beginning of his Gospel is peculiar; so is the end. Remarkable is the absence of passages quoted from the Old Testament by the writer himself, who, however, recites such passages when used by our Lord. There are only two exceptions to this, namely, the opening verses of the Gospel, where Mal. iii. 1 and Is. xl. 3 are cited; and a verse in the account of the crucifixion (xv. 28), where he quotes the words, "and He was numbered with the transgressors" (Is. liii. 12); but this is rejected by Alford and Tischendorf as spurious, inserted here from Luke xxii. 37. After deducting these exceptions, 23 quotations from or references to the O. T. remain, in all of which it is either our Lord Himself who is speaking, or some one addressing Him.

The hypothesis which best meets these facts is, that whilst the matter common to all three Evangelists, or to two of them,[a] is derived from the oral teaching of the Apostles, which they had purposely reduced to a common form, our Evangelist writes as an independent witness to the truth, and not as a compiler; and that the tradition that the Gospel was written under the sanction of Peter, and its matter in some degree derived from him, is made probable by the evident traces of an eye-witness in

[a] Mark has 39 sections common to all three; 23 common to him and Matthew; and 18 common to him and Luke.

many of the narratives. The omission and abridgment of our Lord's discourses, and the sparing use of O. T. quotations, might be accounted for by the special destination of the Gospel, if we had surer data for ascertaining it; but it was for Gentiles, with whom illustrations from the O. T. would have less weight, and the purpose of the writer was to present a clear and vivid picture of the acts of our Lord's human life, rather than a full record of His divine doctrine. We may thankfully own that, with little that is in substance peculiar to himself, the Evangelist does occupy for us a distinct position, and supply a definite want, in virtue of these characteristics.

III. *This Gospel written primarily for Gentiles.*—We have seen that the Evangelist scarcely refers to the O. T. in his own person. The word Law (*νόμος*) does not once occur. The genealogy of our Lord is likewise omitted. Other matters interesting chiefly to the Jews are likewise omitted; such as the references to the O. T. and Law in Matt. xii. 5-7, the reflexions on the request of the Scribes and Pharisees for a sign, Matt. xii. 38-45; the parable of the king's son, Matt. xxii. 1-14; and the awful denunciation of the Scribes and Pharisees, in Matt. xxiii. Explanations are given in some places, which Jews could not require: thus, Jordan is a "river" (Mark i. 5; Matt. iii. 6); the Pharisees, &c. "used to fast" (Mark ii. 18; Matt. ix. 14), and other customs of theirs are described (Mark vii. 1-4; Matt. xv. 1, 2); "the time of figs was not yet," *i. e.* at the season of the Passover (Mark xi. 13; Matt. xxi. 19); the Sadducees' worst tenet is mentioned (Mark xii. 18); the Mount of Olives is "over against the temple" (Mark xiii. 3; Matt. xxiv. 3); at the Passover men eat "unleavened bread" (Mark xiv. 1, 12; Matt. xxvi. 2, 17), and explanations are given which Jews would not need (Mark xv. 6, 16, 42; Matt. xxvii. 15, 27, 57). Matter that might offend is omitted, as Matt. x. 5, 6, vi. 7, 8. Passages, not always peculiar to Mark, abound in his Gospel, in which the antagonism between the pharisaic legal spirit and the Gospel come out strongly (i. 22, ii. 19, 22, x. 5, viii. 15), which hold out hopes to the heathen of admission to the kingdom of heaven even without the Jews (xii. 9), and which put ritual forms below the worship of the heart (ii. 18, iii. 1-5, vii. 5-23). Mark alone preserves those words of Jesus, "The sabbath was made for man, and not man for the sabbath" (ii. 27). Whilst he omits the invective against the Pharisees, he indicates by a touch of his own how Jesus condemned them "with anger" (iii. 5). When the Lord purges the Temple of those that polluted it, He quotes a passage of Isaiah (lvi. 7); but Mark alone reports as part of it the words "of all nations" (xi. 17). Mark alone makes the Scribe admit that love is better than sacrifices (xii. 33). From the general testimony of these places, whatever may be objected to an inference from one or other amongst them, there is little doubt but that the Gospel was meant for use in the first instance amongst Gentiles. But the facts give no warrant for the dream that the first Evangelist represents the Judaic type of Christianity, and the third the Pauline; and that Mark occupies an intermediate position, marking the transition from one to the other! In St. Mark we have the Gospel as it was preached to all the world, and it is so presented as to suit the wants of Gentiles. But there is not a trace of the wish, conscious or unconscious, to assist in any change of Christ an belief or modes of thinking. In all things it has calm history, not a polemical pleading.

IV. *Time when the Gospel was written.*—It will be understood from what has been said, that nothing positive can be asserted as to the time when this Gospel was written. The traditions are contradictory. Irenaeus says that it was written after the death (*ἔξοδον*, but Grabe would translate, wrongly, *departure* from Rome) of the apostle Peter (Eusebius, *H. E.* v. 8); but we have seen above, that in other passages it is supposed to be written during Peter's lifetime (Eus. *H. E.* vi. 14, and ii. 15). In the Bible there is nothing to decide the question. It is not likely that it dates before the reference to Mark in the epistle to the Colossians (iv. 10), where he is only introduced as a relative of Barnabas, as if this were his greatest distinction; and this epistle was written about A.D. 62. If after coming to Asia Minor on Paul's sending he went on and joined Peter at Babylon, he may have then acquired, or rather completed, that knowledge of Peter's preaching, which tradition teaches us to look for in the Gospel, and of which there is so much internal evidence; and soon after this the Gospel may have been composed. On the other hand, it was written before the destruction of Jerusalem (xiii. 13, 24–30, 33, &c.). Probably, therefore, it was written between A.D. 63 and 70. But nothing can be certainly determined on this point.

V. *Place where the Gospel was written.*—The place is as uncertain as the time. Clement, Eusebius, Jerome, and Epiphanius, pronounce for Rome, and many moderns take the same view. The Latin expressions in the Gospel prove nothing; for there is little doubt that, wherever the Gospel was written, the writer had been at Rome, and so knew its language. Chrysostom thinks Alexandria; but this is not confirmed by other testimony.

VI. *Language.*—The Gospel was written in Greek; of this there can be no doubt if ancient testimony is to weigh. Baronius indeed, on the authority of an old Syriac translation, asserts that Latin was the original language; and some MSS. refered to in Scholz (*Greek Test.* p. xxx.) repeat the same; but this arises no doubt from the belief that it was written at Rome and for Gentiles. The opinion and its grounds Wahl has travestied by supposing that the Gospel was written at Alexandria in Coptic. A Latin Gospel written for the use of Roman Christians would not have been lost without any mention of it in an ancient writer.

VII. *Genuineness of the Gospel.*—Schleiermacher was the first perhaps to question that we have in our present Gospel that of which Papias speaks, on the ground that his words would apply to a simpler and less orderly composition (*Studien u. Kritiken*, 1832). Accordingly the usual assumption of a later editor is brought in, as in the case of St. Luke's Gospel [see p. 155]. But the words of Papias require no such aid (Euseb. *H. E.* iii. 39), nor would such authority be decisive if they did. All ancient testimony makes Mark the author of a certain Gospel, and that this is the Gospel which has come down to us, there is not the least historical ground for doubting. Owing to the very few sections peculiar to Mark, evidence from patristic quotation is somewhat difficult to produce. Justin Martyr, however, quotes ch. ix. 44, 46, 48, xii. 26 and iii. 17, and Irenaeus cites both the opening and closing words (iii. 10. 6). An important testimony is

ary one, but doubly so from the doubt that has been cast on the closing verses (xvi. 9-19). Concerning these verses see Meyer's, Alford's, and Tischendorf's notes. The passage is rejected by the majority of modern critics, on the testimony of MSS. and of old writers and on the internal evidence of the diction. Though it is probable that this section is from a different hand, and was annexed to the Gospel soon after the time of the Apostles, it must be remembered that it is found in three of the four great uncial MSS. (A.C.D), and is quoted without any question by Irenæus. Among late critics Olshausen still pronounces for its genuineness. With the exception of these few verses the genuineness of the Gospel is placed above the reach of reasonable doubt.

VIII. *Style and Diction.*—The purpose of the evangelist seems to be to place before us a vivid picture of the earthly acts of Jesus. The style is peculiarly suitable to this. He uses the present tense instead of the narrative aorist, almost in every chapter. The word εὐθέως, "straightway," is used by St. Mark forty-one times. The first person is preferred to the third (iv. 39, v. 8, 9, 12, vi. 2, 3, 31, 33, ix. 25, 33, xii. 6). Precise and minute details as to persons, places, and numbers, abound in the narrative. All these tend to give force and vividness to the picture of the human life of our Lord. On the other side, the facts are not very exactly arranged; they are often connected by nothing more definite than καὶ and πάλιν. Its graphicness sometimes makes this Gospel more obscure than the others (i. 13, ix. 5, 6, iv. 1-34).

Many peculiarities of diction may be noticed; amongst them the following:—1. Hebrew (Aramaic) words are used, but explained for Gentile readers (iii. 17, 22, v. 41, vii. 11, 34, ix. 43, x. 46, xiv. 36, xv. 22, 34). 2. Latin words are very frequent, as δηνάριον, λεγεών, σπεκουλάτωρ, κεντυρίων, κῆνσος, κοδράντης, φραγγελλόω, πραιτώριον, ξέστης. 3. Unusual words or phrases are found here; as ἀξάπτω, ix. 8; ἐπισυντρέχειν, ix. 25; νυνχῆσαι, xii. 34; νάρδος πιστική, xiv. 3; ἐνειλέω, xv. 46; ἴφυε, i. 34, xi. 16; προσκαρτερεῖν (of a thing), iii. 9; ἐπὶ τὸ πρόσκεφάλαιον ἀσθένων, iv. 38; προέλαβε μυρίσαι, xiv. 8. 4. Diminutives are frequent. 5. The substantive is often repeated instead of the pronoun; as (to cite from ch. ii. only) ii. 16, 18, 20, 22, 27, 28. 6. Negatives are accumulated for the sake of emphasis (vii. 12, ix. 8, xii. 34, xv. 5, i. 44 (οὐκέτι οὐ μή, xiv. 25, &c., &c.). 7. Words are often added to adverbs for the sake of emphasis; as τότε ἐν ἐκείνῃ τῇ ἡμέρᾳ, ii. 20; διανυκτερεύειν νυκτὸς καὶ ἡμέρας, v. 5; εὐθέως μετὰ σαββάτων, vi. 25; also vi. 21, viii. 4, x. 20, xiii. 29, xiv. 30, 43. 8. The same idea is often repeated under another expression, as i. 42, ii. 25, viii. 15, xiv. 40, &c. 9. And sometimes the repetition is caused by means of the opposite, as in i. 22, 44, and many other places. 10. Sometimes emphasis is given by simple reiteration, as in ii. 15, 19. 11. The elliptic use of ἵνα, like that of ὅπως in classical writers, is found, v. 23. 12. The word εὐαγγέλιον is used twenty-five times in this Gospel. 13. Instead of συμβούλιον λαμβάνειν of Matt. we have συμβούλιον ποιεῖν, iii. 6, xv. 1. 13. There are many words peculiar to Mark; thus ἐκθαμβεῖσθαι, vii. 37, ix. 17, 25; ἐκθαμβεῖσθαι, ix. 15, xiv. 33, xvi. 5, 6; ἐναγκαλίζεσθαι, ix. 36, x. 16; συντρίμμα, xv. 39, 44, 45; προμεμιυγμένον, xvi. 3; κατανοεῖσθαι, x. 35; στιλβειν, ix. 3; σπυρίδες, xi. 8; συνθλίβειν, v. 24, 31; σκάνδαλον ix. 44, 46, 48; παιδίθεν, ix. 21; σμυρνίζω, xv. 23.

The diction of St. Mark presents the difficulty that whilst it abounds in Latin words, and in expressions that recall Latin equivalents, it is still much more akin to the Hebraistic diction of St. Matthew than to the purer style of St. Luke.

IX. *Quotations from the Old Testament.*—The following list of references to the Old Testament is nearly or quite complete:—

Mark i. 2.	Mal. iii. 1.
„ 3.	Is. xl. 3.
„ 44.	Lev. xiv. 2.
ii. 25.	1 Sam. xxi. 6.
iv. 12.	Is. v.. 10.
vii. 6.	Is. xxix. 13.
„ 10.	Ex. xx. 12, xxi. 17.
ix. 44.	Is. lxvi. 24.
x. 4.	Deut. xxiv. 1.
„ 7.	Gen. ii. 24.
„ 19.	Ex. xx. 12–17.
xi. 17.	Is. lvi. 7; Jer. vii. 11.
xii. 10.	Ps cxviii. 22.
„ 19.	Deut. xxv. 5.
„ 26.	Ex. iii. 6.
„ 29.	Deut. vi. 4.
„ 31.	Lev. xix. 18.
„ 36.	Ps. cx. 1.
xiii. 14.	Dan. ix. 27.
„ 24.	Is. xiii. 10.
xiv. 27.	Zech. xiii. 7.
„ 62.	Dan. vii. 13.
xv. 28(?)	Is. liii. 12.
„ 34.	Ps. xxii. 1.

X. *Contents of the Gospel.*—Though this Gospel has little historical matter which is not shared with some other, it would be a great error to suppose that the voice of Mark could have been silenced without injury to the divine harmony. The minute painting of the scenes in which the Lord took part, the fresh and lively mode of the narration, the very absence of the precious discourses of Jesus, which, interposed between His deeds, would have delayed the action, all give to this Gospel a character of its own. It is the history of the war of Jesus against sin and evil in the world during the time that He dwelt as a Man among men. Its motto might well be, as Lange observes, those words of Peter: "How God anointed Jesus of Nazareth with the Holy Ghost and with power; who went about doing good, and healing all that were oppressed of the devil; for God was with Him" (Acts x. 38). It developes a series of acts of this conflict, broken by times of rest and refreshing, in the wilderness or on the mountain. It records the exploits of the Son of God in the war against Satan, and the retirement in which after each He returned to commune with His Father, and bring back fresh strength for new encounters. Thus the passage from ii. 1 to iii. 6 describes His first conflict with the Pharisees, and it ends in a conspiracy of Pharisees and Herodians for His destruction, before which He retires to the sea (iii. 7). The passage from iii. 13 to vi. 6 contains the account of his conflict with the unbelief of His own countrymen, ending with those remarkable words, "And He could there do no mighty work, save that He laid His hands upon a few sick folk and healed them:" then, constrained (so to speak) in His working by their resistance, He retired for that time from the struggle, and "went round about the villages teaching" (vi. 6).

The principal divisions in the Gospel are these:—1. John the Baptist and Jesus (i. 1-13). 2. Acts of Jesus in Galilee (i. 14–ix. 50). 3. Teaching in Perœa, where the spirit of the new kingdom of the Gospel is brought out (x. 1-34). 4. Teaching, trials, and sufferings in Jerusalem. Jesus revealing Himself as Founder of the new kingdom (x. 35–xv. 47). 5. Resurrection (xvi.).

MARMOTH (Μαρμωθ; Alex. Μαρμαθ: *Marimoth*) = MEREMOTH the priest, the son of Uriah (1 Esdr. viii. 62; comp. Ezr. viii. 33).

MAR'OTH (מָרוֹת: ὀδύνη in both MSS.: and so also Jerome, *in Amaritudinibus*), one of the towns of the western lowland of Judah whose names are alluded to or played upon by the prophet Micah in the warning with which his prophecy opens (i. 12). The allusion turns on the signification of Maroth—"bitternesses." It is not elsewhere mentioned, nor has the name been encountered by travellers. Schwarz's conjecture (107) that it is a contraction of Maarath is not very happy, as the latter contains the letter *ain*, which but very rarely disappears under any process to which words are subjected. [G.]

MARRIAGE. The topics which this subject presents to our consideration in connexion with Biblical literature may be most conveniently arranged under the following five heads:—

I. Its origin and history.
II. The conditions under which it could be legally effected.
III. The modes by which it was effected.
IV. The social and domestic relations of married life.
V. The typical and allegorical references to marriage.

I. The institution of marriage is founded on the requirements of man's nature, and dates from the time of his original creation. It may be said to have been ordained by God, in as far as man's nature was ordained by Him; but its formal appointment was the work of man, and it has ever been in its essence a natural and civil institution, though admitting of the infusion of a religious element into it. This view of marriage is exhibited in the historical account of its origin in the book of Genesis: the peculiar formation of man's nature is assigned to the Creator, who, seeing it "not good for man to be alone," determined to form an "help meet for him" (ii. 18), and accordingly completed the work by the addition of the female to the male (i. 27). The necessity for this step appears from the words used in the declaration of the Divine counsel. Man, as an intellectual and spiritual being, would not have been a worthy representative of the Deity on earth, so long as he lived in solitude, or in communion only with beings either high above him in the scale of creation, as angels, or far beneath him, as the beasts of the field. It was absolutely necessary, not only for his comfort and happiness, but still more for the perfection of the Divine work, that he should have a "help *meet* for him,"[a] or, as the words more properly mean, "the exact counterpart of himself"—a being capable of receiving and reflecting his thoughts and affections. No sooner was the formation of woman effected, than Adam recognised in that act the will of the Creator as to man's social condition, and immediately enunciated the important statement, to which his posterity might refer as the charter of marriage in all succeeding ages, "Therefore shall a man leave his father and his mother, and shall cleave unto his wife: and they shall be one flesh" (ii. 24). From these words, coupled with the circumstances attendant on the formation of the first woman, we may evolve the following principles:—(1) The unity of man and wife, as implied in her being formed out of man, and as expressed in the words "one flesh;" (2) the indissolubleness of the marriage bond, except on the strongest grounds (comp. Matt. xix. 9); (3) monogamy, as the original law of marriage, resulting from there having been but one original couple,[b] as is forcibly expressed in the subsequent references to this passage by our Lord ("they *twain*," Matt. xix. 5), and St. Paul ("*two* shall be one flesh," 1 Cor. vi. 16), (4) the social equality of man and wife, as implied in the terms *ish* and *ishshah*,[c] the one being the exact correlative of the other, as well as in the words "help meet for him;" (5) the subordination of the wife to the husband, consequent upon her subsequent formation (1 Cor. xi. 8, 9; 1 Tim. ii. 13); and (6) the respective duties of man and wife, as implied in the words "help meet for him."

The introduction of sin into the world modified to a certain extent the mutual relations of man and wife. As the blame of seduction to sin lay on the latter, the condition of subordination was turned into subjection, and it was said to her of her husband, "he shall rule over thee" (Gen. iii. 16)—a sentence which, regarded as a prediction, has been strikingly fulfilled in the position assigned to women in Oriental countries,[d] but which, regarded as a rule of life, is fully sustained by the voice of nature and by the teaching of Christianity (1 Cor. xiv. 34;

[a] כְּנֶגְדּוֹ, literally, "as over against," and so "corresponding to." The renderings, in the A. V. "meet for him," in the LXX. κατ' αὐτὸν, ὅμοιος αὐτῷ, and in the Vulg. *simile sibi*, are inadequate.

[b] The LXX. introduces δύο into the text in Gen. ii. 24, and is followed by the Vulgate.

[c] אִישׁ and אִשָּׁה. We are unable to express the verbal correspondence of these words in our language. The Vulgate retains the etymological identity at the expense of the sense: "*Virago* quoniam de *viro*." The old Latin term *vira* would have been better. Luther is more successful with *mann* and *männin* : yet even this fails to convey the double sense of *ishshah* as = "woman" and "wife," both of which should be preserved, as in the German *weib*, in order to convey the full force of the original. We may here observe that *ishshah* was the only term in ordinary use among the Hebrews for "wife." They occasionally used בַּעֲלָה, as we use "consort," for the wives of kings (Ps. xiv. 9; Neh. ii. 6; Dan. v. 2).

[d] The relation of the husband to the wife is expressed in the Hebrew term *baal* (בַּעַל), literally 'lord,' for husband (Ex. xxi. 3, 22; Deut. xxi. 13; 2 Sam. xi. 26, &c. &c.). The respectful term used by Sarah to Abraham (אֲדֹנִי), "my lord," Gen. xviii. 12; comp. 1 K. i. 17, 18, Ps. xlv. 11) furnishes St. Peter with an illustration of the wife's proper position (1 Pet. iii. 6).

Eph. v. 22, 23; 1 Tim. ii. 12). The evil effects of the fall were soon apparent in the corrupt usages of marriage: the unity of the bond was impaired by polygamy, which appears to have originated among the Cainites (Gen. iv. 19); and its purity was deteriorated by the promiscuous intermarriage of the "sons of God" with the "daughters of men," i. e. of the Sethites with the Cainites, in the days preceding the flood (Gen. vi. 2).

In the post-diluvial age the usages of marriage were marked with the simplicity that characterises a patriarchal state of society. The rule of monogamy was re-established by the example of Noah and his sons (Gen. vii. 13). The early patriarchs selected their wives from their own family (Gen. xi. 29, xxiv. 4, xxviii. 2), and the necessity for doing this on religious grounds superseded the prohibitions that afterwards held good against such marriages on the score of kindred (Gen. xx. 12; Ex. vi. 20; comp. Lev. xviii. 9, 12). Polygamy prevailed (Gen. xvi. 4, xxv. 1, 6, xxviii. 9, xxix. 23, 28; 1 Chr. vii. 14), but to a great extent divested of the degradation which in modern times attaches to that practice. In judging of it we must take into regard the following considerations:—(1) that the *principle* of monogamy was retained, even in the practice of polygamy, by the distinction made between the chief or original wife and the secondary wives, or, as the A. V. terms them, "concubines"—a term which is objectionable, inasmuch as it conveys to us the notion of an illicit and unrecognised position, whereas the secondary wife was regarded by the Hebrews as a wife, and her rights were secured by law;[e] (2) that the motive which led to polygamy was that absorbing desire of progeny which is prevalent throughout Eastern countries, and was especially powerful among the Hebrews; and (3) that the power of a parent over his child, and of a master over his slave (the *potestas patria* and *dominica* of the Romans), was paramount even in matters of marriage, and led in many cases to phases of polygamy that are otherwise quite unintelligible, as, for instance, to the cases where it was adopted by the husband *at the request of his wife*, under the idea that children born to a slave were in the eye of the law the children of the mistress[f] (Gen. xvi. 3, xxx. 4, 9); or, again, to cases where it was adopted at the instance of the father (Gen. xxix. 23, 28; Ex. xxi. 9, 10). It must be allowed that polygamy, thus legalised and systematised, justified to a certain extent by the motive, and entered into, not only without offence to, but actually at the suggestion of those who, according to our notions, would feel most deeply injured by it, is a very different thing from what polygamy would be in our own state of society.

Divorce also prevailed in the patriarchal age, though but one instance of it is recorded (Gen. xxi. 14). Of this, again, we must not judge by our own standard. Wherever marriages are effected by the violent exercise of the *patria potestas*, or without any bond of affection between the parties concerned, ill-assorted matches must be of frequent occurrence, and without the remedy of divorce, in such a state of society, we can understand the truth of the Apostles' remark that "it is not good to marry" (Matt. xix. 10). Hence divorce prevails to a great extent in all countries where marriage is the result of arbitrary appointment or of purchase: we may instance the Arabians (Burckhardt's *Notes*, i. 111; Layard's *Nineveh*, i. 357) and the Egyptians (Lane, i. 235 ff.). From the enactments of the Mosaic law we may infer that divorce was effected by a mere verbal declaration, as it still is in the countries referred to, and great injustice was thus committed towards the wives.

The Mosaic law aimed at mitigating rather than removing evils which were inseparable from the state of society in that day. Its enactments were directed (1) to the discouragement of polygamy: (2) to obviate the injustice frequently consequent upon the exercise of the rights of a father or a master; (3) to bring divorce under some restriction; and (4) to enforce purity of life during the maintenance of the matrimonial bond. The first of these objects was forwarded by the following enactments:—the prohibition imposed upon kings against multiplying[g] wives (Deut. xvii. 17); the prohibition against marrying two sisters together (Lev. xviii. 18); the assertion of the matrimonial rights of each wife (Ex. xxi. 10, 11); the slur cast upon the eunuch state, which has been ever regarded as indispensable to a system of polygamy (Deut. xxiii. 1); and the ritual observances entailed on a man by the duty of marriage (Lev. xv. 18). The second object was attained by the humane regulations relative to a captive whom a man might wish to marry (Deut. xxi. 10-14), to a purchased wife[h] (Ex. xxi.

[e] The position of the Hebrew concubine may be compared with that of the concubine of the early Christian Church, the sole distinction between her and the wife consisting in this, that the marriage was not in accordance with the civil law: in the eye of the Church the marriage was perfectly valid (Bingham, *Ant.* xi. 5, §11). It is worthy of notice that the term *pillegesh* (פִּלֶגֶשׁ; A. V. "concubine") nowhere occurs in the Mosaic law. The terms used are either "wife" (Deut xxi. 15) or "maid-servant" (Ex. xxi. 7); the latter applying to a purchased wife.

[f] The language in 1 Chr. ii. 18, "these are *her* sons," following on the mention of his two wives, admits of an interpretation on this ground.

[g] The Talmudists practically set aside this prohibition, (1) by explaining the word "multiply" of an inordinate number; and (2) by treating the motive for it, "that his heart turn not away," as a matter of discretion. They considered eighteen the maximum to be allowed a king (Selden, *De Jure Nat.* i. 5). It is noteworthy that the high-priest himself authorises bigamy in the case of king Jonah (2 Chr. xxiv. 3).

[h] The regulations in Ex. xxi. 7-11 deserve a detailed notice, as exhibiting the extent to which the power of the head of a family might be carried. It must be premised that the maiden was born of Hebrew parents, was under age at the time of her sale (otherwise her father would have no power to sell), and that the object of the purchase was that when arrived at puberty she should become the wife of her master, as is implied in the difference in the law relating to her (Ex. xxi. 7), and to a slave purchased for ordinary work (Deut. xv. 12-17), as well as in the term *amah*, "maid-servant," which is elsewhere used convertibly with "concubine" (Judg. ix. 18; comp. viii. 31). With regard to such it is enacted (1) that she is not to "go out as the men-servants," (*i. e.* be freed after six years' service, or in the year of jubilee), on the understanding that her master either already has made, or intends to make her his wife (ver. 7): (2) but, if he has no such intention, he is not entitled to retain her in the event of any other person of the Israelites being willing to purchase her of him for the same purpose (ver. 8); (3) he might, however, assign her to his son, and in this case she was to be treated as a daughter and not as a slave (ver. 9); (4) if either he or his son, having married her, took another wife, she was still to be treated as a wife in all respects (ver. 10; and, lastly, if neither of the three contingencies took place

7-11), and to a slave who either was married at the time of their purchase, or who, having since received a wife[l] at the hands of his master, was unwilling to be parted from her (Ex. xxi. 2-6), and, lastly, by the law relating to the legal distribution of property among the children of the different wives (Deut. xxi. 15-17). The third object was effected by rendering divorce a formal proceeding, not to be done by word of mouth as heretofore, but by a "bill of divorcement" (Deut. xxiv. 1), which would generally demand time and the intervention of a third party, thus rendering divorce a less easy process, and furnishing the wife, in the event of its being carried out, with a legal evidence of her marriageability: we may also notice that Moses wholly prohibited divorce in case the wife had been seduced prior to marriage (Deut. xxii. 29), or her chastity had been groundlessly impugned (Deut. xxii. 19). The fourth object forms the subject of one of the ten commandments (Ex. xx. 14), any violation of which was punishable with death (Lev. xx. 10 Deut. xxii. 22), even in the case of a betrothed person (Deut. xxii. 23, 4).

The practical results of these regulations may have been very salutary, but on this point we have but small opportunities of judging. The usages themselves, to which we have referred, remained in full force to a late period. We have instances of the arbitrary exercise of the paternal authority in the cases of Achsah (Judg. i. 12), Ibzan (Judg. xii. 9), Samson (Judg. xiv. 20, xv. 2), and Michal (1 Sam. xvii. 25). The case of Abishag, and the language of Adonijah in reference to her (1 K. i. 2, ii. 17), prove that a servant was still completely at the disposal of his or her master. Polygamy also prevailed, as we are expressly informed in reference to Gideon (Judg. viii. 30), Elkanah (1 Sam. i. 2), Saul (2 Sam. xii. 8), David (2 Sam. v. 13), Solomon (1 K. xi. 3), the sons of Issachar (1 Chr. vii. 4), Shaharaim (1 Chr. viii. 8, 9), Rehoboam (2 Chr. xi. 21), Abijah (2 Chr. xiii. 21), and Joash (2 Chr. xxiv. 3); and as we may also infer from the number of children in the cases of Jair, Ibzan, and Abdon (Judg. x. 4, xii. 9, 14). It does not, however, follow that it was the general practice of the country: the inconveniences attendant on polygamy in small houses or with scanty incomes are so great as to put a serious bar to its general adoption,[k] and hence in modern countries where it is fully established the practice is restricted to comparatively few (Niebuhr, *Voyage*, p. 65; Lane, i. 239). The same rule holds good with regard to ancient times: the discomforts of polygamy are exhibited in the jealousies between the wives of Abraham (Gen. xvi. 6), and of Elkanah (1 Sam. i. 6); and the cases cited above rather lead to the inference that it was confined to the wealthy. Meanwhile it may be noted that the theory of monogamy was retained and comes prominently forward in the pictures of domestic bliss portrayed in the poetical writings of this period (Ps. cxxviii. 3; Prov. v. 18, xviii. 22, xix. 14, xxxi. 10-29; Eccl. ix. 9). The sanctity of the marriage-bond was but too frequently violated, as appears from the frequent allusions to the "strange woman" in the book of Proverbs (ii. 16, v. 20, &c.), and in the denunciations of the prophets against the prevalence of adultery (Jer. v. 8; Ez. xviii. 11, xxii. 11).

In the post-Babylonian period monogamy appears to have become more prevalent than at any previous time: indeed we have no instance of polygamy during this period on record in the Bible, all the marriages noticed being with single wives (Tob. i. 9, ii. 11; Susan. vers. 29, 63; Matt. xviii. 25; Luke i. 5; Acts v. 1). During the same period the theory of monogamy is set forth in Ecclus. xxvi. 1-27. The practice of polygamy nevertheless still existed;[m] Herod the Great had no less than nine wives at one time (Joseph. *Ant.* xvii. 1, §3); the Talmudists frequently assume it as a well-known fact (*e. g. Ketub.* 10, §1; *Yebam.* 1, §1); and the early Christian writers, in their comments on 1 Tim. iii. 2, explain it of polygamy in terms which leave no doubt as to the fact of its prevalence in the Apostolic age. The abuse of divorce continued unabated (Joseph. *Vit.* §76); and under the Asmonæan dynasty the right was assumed by the wife as against her husband, an innovation which is attributed to Salome by Josephus (*Ant.* xv. 7, §10), but which appears to have been prevalent in the Apostolic age, if we may judge from passages where the language implies that the act emanated from the wife (Mark x. 12; 1 Cor. vii. 11), as well as from some of the comments of the early writers on 1 Tim. v. 9. Our Lord and His Apostles re-established the integrity and sanctity of the marriage-bond by the following measures:—(1) by the confirmation of the original charter of marriage as the basis on which all regulations were to be framed (Matt. xix. 4, 5); (2) by the restriction of divorce to the case of fornication, and the prohibition of re-marriage in all persons divorced on improper grounds (Matt. v. 32, xix. 9; Rom. vii. 3; 1 Cor. vii. 10, 11); and (3) by the enforcement of moral purity generally (Heb. xiii. 4, &c.), and especially by the formal condemnation of fornication,[n] which appears to have been classed among acts morally indifferent (ἀδιάφορα) by a certain party in the Church (Acts xv. 20).

Shortly before the Christian era an important change took place in the views entertained on the question of marriage as affecting the spiritual and

[l] i. e. if he neither married her himself, nor gave her to his son, nor had her redeemed, then the maiden was to become absolutely free without waiting for the expiration of the six years or for the year of jubilee (ver. 11).

[i] In this case we must assume that the wife assigned was a non-Israelitish slave; otherwise, the wife would, as a matter of course, be freed along with her husband in the year of jubilee. In this case the wife and children would be the absolute property of the master, and the position of the wife would be analogous to that of the Roman *contubernalis*, who was not supposed capable of any *connubium*. The issue of such a marriage would remain slaves in accordance with the maxim of the Talmudists, that the child is liable to its mother's disqualification (*Kiddush.* 3, §12). Josephus (*Ant.* iv. 8, §28) states that in the year of jubilee the slave, having married during service, carried off his wife and children with him: this, however, may refer to an Israelite maid-servant.

[k] The Talmudists limited polygamists to four wives. The same number was adopted by Mahomet in the Koran, and still forms the rule among his followers (Niebuhr, *Voyage*, p. 62).

[m] Michaelis (*Laws of Moses*, iii. 5, §95) asserts that polygamy ceased entirely after the return from the captivity; Selden, on the other hand, that polygamy prevailed among the Jews until the time of Honorius and Arcadius (circ. A.D. 400), when it was prohibited by an imperial edict (*Ux. Ebr.* i. 9).

[n] The term πορνεία is occasionally used in a broad sense to include both adultery (Matt. v. 32) and incest (1 Cor. v. 1). In the decree of the Council of Jerusalem it must be regarded in its usual and restricted sense.

intellectual parts of man's nature. Throughout the Old Testament period marriage was regarded as the indispensable duty of every man, nor was it supposed that there existed in it any drawback to the attainment of the highest degree of holiness. In the interval that elapsed between the Old and New Testament periods, a spirit of asceticism had been evolved, probably in antagonism to the foreign influences with which the Jews were brought into close and painful contact. The Essenes were the first to propound any doubts as to the propriety of marriage: some of them avoided it altogether, others debarred themselves of it under restrictions (Joseph. *B. J.* ii. 8, §2, 13). Similar views were adopted by the Therapeutæ, and at a later period by the Gnostics (Burton's *Lectures*, i. 214); thence they passed into the Christian Church, forming one of the distinctive tenets of the Encratites (Burton, ii. 51), and finally developing into the system of monachism. The philosophical tenets on which the prohibition of marriage was based are generally referred to in Col. ii. 16-23, and specifically in 1 Tim. iv. 3. The general propriety of marriage is enforced on numerous occasions, and abstinence from it is commended only in cases where it was deemed expedient by the calls of duty (Matt. xix. 12; 1 Cor. vii. 8, 26). With regard to re-marriage after the death of one of the parties, the Jews, in common with other nations, regarded abstinence from it, particularly in the case of a widow, laudable, and a sign of holiness (Luke ii. 36, 7; Joseph. *Ant.* xvii. 13, §4, xviii. 6, §6); but it is clear from the example of Josephus (*Vit.* §76) that there was no prohibition even in the case of a priest. In the Apostolic Church re-marriage was regarded as occasionally undesirable (1 Cor. vii. 40), but as an absolute disqualification for holy functions, whether in a man or woman (1 Tim. iii. 2, 12, v. 9): at the same time it is recommended in the case of young widows (1 Tim. v. 14).

II. The conditions of legal marriage are decided by the prohibitions which the law of any country imposes upon its citizens. In the Hebrew commonwealth these prohibitions were of two kinds, affecting as they regulated marriage (i.) between an Israelite and a non-Israelite, and (ii.) between an Israelite and one of his own community.

The prohibitions relating to foreigners were based on that instinctive feeling of exclusiveness, which forms one of the bonds of every social body, and which prevails with peculiar strength in a rude state of society. In all political bodies the right of marriage (*jus connubii*) becomes in some form or other a constituent element of citizenship, and, even when its nature and limits are not defined by legal enactment, it is supported with rigour by the force of public opinion. The feeling of aversion against intermarriage with foreigners becomes more intense when distinctions of religious creed supervene upon those of blood and language; and hence we should naturally expect to find it more than usually strong among the Hebrews, who were endowed with a peculiar religion, and were separated from surrounding nations by a sharp line of demarcation. The warnings of their history and the examples of the patriarchs are in support of natural feeling: on the one hand, the evil effects of intermarriage with aliens were exhibited in the overwhelming sinfulness of the generation destroyed by the flood (Gen. vi. 2-13): on the other hand, there were the examples of the patriarchs Abraham, Isaac, and Jacob, marrying from among their own kindred (Gen. xx. 12, xxiv. 3 &c., xxviii. 2), and in each of the two latter cases there is a contrast between these carefully-sought unions and those of the rejected sons Ishmael, who married an Egyptian (Gen. xxi. 21), and Esau, whose marriages with Hittite women were "a grief of mind" to his parents (Gen. xxvi. 34, 35). The marriages of Joseph with an Egyptian (Gen. xli. 45), of Manasseh with a Syrian secondary wife (1 Chr. vii. 14; comp. Gen. xlvi. 20, LXX.), and of Moses with a Midianitish woman in the first instance (Ex. ii. 21), and afterwards with a Cushite or Ethiopian woman (Num. xii. 1), were of an exceptional nature, and yet the last was the cause of great dissatisfaction. A far greater objection was entertained against the marriage of an Israelitish woman with a man of another tribe, as illustrated by the narrative of Shechem's proposals for Dinah, the ostensible ground of their rejection being the difference in religious observances, that Shechem and his countrymen were uncircumcised (Gen. xxxiv. 14).

The only distinct prohibition in the Mosaic law refers to the Canaanites, with whom the Israelites were not to marry* on the ground that it would lead them into idolatry (Ex. xxxiv. 16; Deut. vii. 3, 4)—a result which actually occurred shortly after their settlement in the Promised Land (Judg. iii. 6, 7). But beyond this, the legal disabilities to which the Ammonites and Moabites were subjected (Deut. xxiii. 3), acted as a virtual bar to intermarriage with them, totally preventing (according to the interpretation which the Jews themselves put upon that passage) the marriage of Israelitish women with Moabites, but permitting that of Israelites with Moabite women, such as that of Mahlon with Ruth. The prohibition against marriages with the Edomites or Egyptians was less stringent, as a male of those nations received the right of marriage on his admission to the full citizenship in the third generation of proselytism (Deut. xxiii. 7, 8). There were thus three grades of prohibition—total in regard to the Canaanites on either side; total on the side of the males in regard to the Ammonites and Moabites; and temporary on the side of the males in regard of the Edomites and Egyptians, marriages with females in the two latter instances being regarded as legal (Selden, *de Jur. Nat.* cap. 14). Marriages between Israelite women and proselyted foreigners were at all times of rare occurrence, and are noticed in the Bible, as though they were of an exceptional nature, such as that of an Egyptian and an Israelitish woman (Lev. xxiv. 10), of Abigail and Jether the Ishmeelite, contracted probably when Jesse's family was sojourning in Moab (1 Chr. ii. 17), of Sheshan's daughter and an Egyptian, who was staying in his house (1 Chr. ii. 35), and of a Naphthalite woman and a Tyrian, living in adjacent districts (1 K. vii. 14). In the reverse case, viz., the marriage of Israelites with foreign women it is, of course, highly probable that

* The act of marriage with a foreigner is described in the verse by a special term, *châtan* (חָתַן), expressive of the affinity thus produced, as appears from the cognate nouns *hôthên*, *chothen*, and *chothenah*, for "son-in-law," "father-in-law" and "mother-in-law." It is used in Gen. xxxiv. 9; Deut. vii. 3; Josh. xxiii. 12; 1 K. iii. 1; Ezr. ix. 14; and metaphorically in 2 Chr. xviii. 1. The same idea comes prominently forward in the term *châtân* in Ex. iv. 26, where it is used of the affinity produced by the rite of circumcision between Jehovah and the child.

the wives became proselytes after their marriage as instanced in the case of Ruth (i. 16); but this was by no means invariably the case. On the contrary we find that the Egyptian wife of Solomon (1 K. xi. 4), and the Phœnician wife of Ahab (1 K. xvi. 31), retained their idolatrous practices and introduced them into their adopted countries. Proselytism does not therefore appear to have been a *sine qua non* in the case of a wife, though it was so in the case of a husband: the total silence of the law as to any such condition in regard to a captive, whom an Israelite might wish to marry, must be regarded as evidence of the reverse (Deut. xxi. 10-14), nor have the refinements of Rabbinical writers on that passage succeeded in establishing the necessity of proselytism. The opposition of Samson's parents to his marriage with a Philistine woman (Judg. xiv. 3) leads to the same conclusion. So long as such unions were of merely occasional occurrence no veto was placed upon them by public authority; but, when after the return from the Babylonish captivity the Jews contracted marriages with the heathen inhabitants of Palestine in so wholesale a manner as to endanger their national existence, the practice was severely condemned (Ezr. ix. 2, x. 2), and the law of positive prohibition originally pronounced only against the Canaanites was extended to the Moabites, Ammonites, and Philistines (Neh. xiii. 23-25). Public feeling was thenceforth strongly opposed to foreign marriages, and the union of Manasseh with a Cuthæan led to such animosity as to produce the great national schism, which had its focus in the temple on Mount Gerizim (Joseph. *Ant.* xi. 8, §2). A no less signal instance of the same feeling is exhibited in the cases of Joseph (*Ant.* xii. 4, §6) and Anileus (*Ant.* xviii. 9, §5), and is noticed by Tacitus (*Hist.* v. 5) as one of the characteristics of the Jewish nation in his day. In the N. T. no special directions are given on this head, but the general precepts of separation between believers and unbelievers (2 Cor. vi. 14, 17)[p] would apply with special force to the case of marriage; and the permission to dissolve mixed marriages, contracted previously to the conversion of one party, at the instance of the unconverted one, cannot but be regarded as implying the impropriety of such unions subsequently to conversion (1 Cor. vii. 12).

The progeny of illegal marriages between Israelites and non-Israelites was described under a peculiar term, *mamzer*[q] (A. V. "bastard"; Deut. xxiii. 2), the etymological meaning of which is uncertain,[r] but which clearly involves the notion of "foreigner," as in Zech. ix. 6, where the LXX. has ἀλλογενεῖς, "strangers." Persons born in this way were excluded from full rights of citizenship until the tenth generation (Deut. xxiii. 2). It follows hence that intermarriage with such persons was prohibited in the same manner as with an Ammonite or Moabite (comp. Mishna, *Kiddush.* 4, §1).

ii. The regulations relative to marriage between Israelites and Israelites may be divided into two classes: (1) general, and (2) special—the former applying to the whole population, the latter to particular cases.

1. The general regulations are based on considerations of relationship. The most important passage relating to these is contained in Lev. xviii. 6-18, wherein we have in the first place a general prohibition against marriages between a man and the "flesh of his flesh,"[s] and in the second place special prohibitions[t] against marriage with a mother, stepmother, sister, or half-sister, whether "born at home or abroad,"[u] grand-daughter, aunt, whether by consanguinity on either side, or by marriage on the father's side, daughter-in-law, brother's wife, step-daughter, wife's mother, stepgrand-daughter, or wife's sister during the lifetime of the wife.[x] An exception is subsequently made

[p] The term ἑτεροζυγοῦντες (A. V. "unequally yoked with") has no special reference to marriage: its meaning is shown in the cognate term ἑτερόζυγος (Lev. xix. 19; A. V. "of a diverse kind"). It is, however, correctly connected in the A. V. with the notion of a "yoke," as explained by Hesychius, οἱ μὴ συζυγοῦντες, and not with that of a "balance," as Theophylact.

[q] מַמְזֵר.

[r] Cognate words appear in Rabbinical writers, signifying (1) to *spin* or *weave*; (2) to be *corrupt*, as an addled egg; (3) to *ripen*. The important point to be observed is that the word does not betoken *bastardy* in our sense of the term, but simply the progeny of a mixed marriage of a Jew and a foreigner. It may be with a special reference to this word that the Jews boasted that they were not born "of fornication" (ἐκ πορνείας, John viii. 41), implying that there was no admixture of foreign blood, or consequently of foreign idolatries, in themselves.

[s] The Hebrew expression שְׁאֵר בְּשָׂרוֹ (A.V. "near of kin"), is generally regarded as applying to blood-relationship alone. The etymological sense of the term *sheĕr* is not decided. By some it is connected with *shaär*, "to remain," as by Michaelis (*Laws of Moses*, iii. 7, §2), and in the marginal translation of the A. V. "remainder;" but its ordinary sense of "flesh" is more applicable. Whichever of these two we adopt, the idea of blood-relationship evidently attaches to the term from the cases in which it is used (vers. 12, 13, 17; A. V. "near-kinswoman"), as well as from its use in Lev. xx. 19, Num. xxvii. 11. The term *basar*, literally "flesh" or "body," is also peculiarly used of blood-relationship (Gen. xxix. 14, xxxvii. 27; Judg. ix. 2; 2 Sam. v. 1; 1 Chr. xi. 1). The two terms, *sheĕr basar*, are used conjointly in Lev. xxv. 49 as equivalent to *mishpachah*, "family." The term is applicable to relationship by affinity, in as far as it regards the blood-relations of a wife. The relationships specified may be classed under three heads: (1) blood-relationships proper in vers. 7-13; (2) the wives of blood-relations in vers. 14-16; (3) the blood-relations of the wife in vers. 17, 18.

[t] The daughter is omitted; whether as being preeminently the "flesh of a man's flesh," or because it was thought unnecessary to mention such a connexion.

[u] The expression "born at home or abroad" has been generally understood as equivalent to "in or out of wedlock," *i. e.* the daughter of a father's concubine; but it may also be regarded as a re-statement of the preceding words, and as meaning "one born to the father, or mother, in a former marriage" (comp. Keil, *Archäol.* ii. 55). The distinction between the cases specified in vers. 9 and 11 is not very evident: it probably consists in this, that ver. 9 prohibits the union of a son of the first marriage with a daughter of the second, and ver. 11 that of a son of the second with a daughter of the first (Keil). On the other hand, Knobel (*Comm. in loc.*) finds the distinction in the words "wife of thy father" (ver. 11), which according to him includes the *mother* as well as the stepmother, and thus specifically states the *full* sister, while ver. 9 is reserved for the half-sister.

[x] The sense of this verse has been much canvassed, in connexion with the question of marriage with a deceased wife's sister. It has been urged that the marginal translation, "one wife to another," is the correct one, and that the prohibition is really directed against polygamy. The following considerations, however, support the rendering of the text. (1) The writer would hardly use the term rendered "wife" and "sister" in a different sense in ver. 18 from that which he assigned to them in the previous verses. (2) The usage of the Hebrew language, and indeed of every language, requires that the expression

Deut. xxv. 5) in favour of marriage with a brother's wife in the event of his having died childless: to this we shall have occasion to refer at length. Different degrees of guiltiness attached to the infringement of these prohibitions, as implied both in the different terms[7] applied to the various offences, and in the punishments affixed to them, the general penalty being death (Lev. xx. 11-17), but in the case of the aunt and the brother's wife childlessness (19-21), involving probably the stain of illegitimacy in cases where there was an issue, while in the case of the two sisters no penalty is stated.

The moral effect of the prohibitions extended beyond cases of formal marriage to those of illicit intercourse, and gave a deeper dye of guilt to such conduct as that of Lot's daughters (Gen. xix. 33), of Reuben in his intercourse with his father's concubine (Gen. xxxv. 22), and of Absalom in the same act (2 Sam. xvi. 22); and it rendered such crimes tokens of the greatest national disgrace (Ez. xxii. 11). The Rabbinical writers considered that the prohibitions were abrogated in the case of proselytes, inasmuch as their change of religion was deemed equivalent to a new natural birth, and consequently involved the severing of all ties of previous relationship: it was necessary, however, in such a case that the wife as well as the husband, should have adopted the Jewish faith.

The grounds on which these prohibitions were enacted are reducible to the following three heads:—(1) moral propriety; (2) the practices of heathen nations; and (3) social convenience. The first of these grounds comes prominently forward in the expressions by which the various offences are characterised, as well as in the general prohibition against approaching "the flesh of his flesh." The use of such expressions undoubtedly contains an appeal to the *horror naturalis*, or that repugnance with which man instinctively shrinks from matrimonial union with one with whom he is connected by the closest ties both of blood and of family affection. On this subject we need say no more than that there is a difference in kind between the affection that binds the members of a family together, and that which lies at the bottom of the matrimonial bond, and that the amalgamation of these affections cannot take place without a serious shock to one or the other of the two; hence the desirability of drawing a distinct line between the provinces of each, by stating definitely where the matrimonial affection may legitimately take root. The second motive to laying down these prohibitions was that the Hebrews might be preserved as a peculiar people, with institutions distinct from those of the Egyptians and Canaanites (Lev. xviii 3), as well as of other heathen nations with whom they might come in contact. Marriages within the proscribed degrees prevailed in many civilized countries in historical times, and were not unusual among the Hebrews themselves in the pre-Mosaic age. For instance, marriages with half-sisters by the same father were allowed at Athens (Plutarch *Cim.* 4, *Themistocl.* 32), with half-sisters by the same mother at Sparta (Philo, *de Spec. Leg.* p. 779), and with full sisters in Egypt (Diod. i. 27) and Persia, as illustrated in the well-known instances of Ptolemy Philadelphus in the former (Paus. i. 7, §1), and Cambyses in the latter country (Herod. iii. 31). It was even believed that in some nations marriages between a son and his mother were not unusual (Ov. *Met.* x. 331; Eurip. *Androm.* 174). Among the Hebrews we have instances of marriage with a half-sister in the case of Abraham (Gen. xx. 12), with an aunt in the case of Amram (Ex. vi. 20), and with two sisters at the same time in the case of Jacob (Gen. xxix. 26). Such cases were justifiable previous to the enactments of Moses: subsequently to them we have no case in the O. T. of actual marriage within the degrees, though the language of Tamar towards her half-brother Amnon (2 Sam. xiii. 13) implies the possibility of their union with the consent of their father.[8] The Herods committed some violent breaches of the marriage law. Herod the Great married his half-sister (*Ant.* xvii. 1, §3); Archelaus his brother's widow, who had children (xvii. 13, §1); Herod Antipas his brother's wife (xviii. 5, §1; Matt xiv. 3). In the Christian Church we have an in-

"one to another" should be preceded by a plural noun. The cases in which the expression אִשָּׁה אֶל־אֲחוֹתָהּ is equivalent to "one to another," as in Ex. xxvi. 3, 5, 6, 17, Ez. i. 9, 23, iii. 13, instead of favouring, as has generally been supposed, the marginal translation, exhibit the peculiarity above noted. (3) The consent of the ancient versions is unanimous, including the LXX. (γυναῖκα ἐπ' ἀδελφῇ αὐτῆς), the Vulgate (*sororem uxoris tuae*), the Arabic, Syriac, &c. (4) The Jews themselves, as shown by the Mishna, and in the works of Philo, permitted the marriage. (5) Polygamy was recognised by the Mosaic law, and cannot consequently be forbidden in this passage. Another interpretation, by which the sense of the verse is again altered, is effected by attaching the words "in her life-time" exclusively to the verb "vex." The objections to this are patent: (1) it is but reasonable to suppose that this clause, like the others, would depend on the principal verb; and (2), if this were denied, it would be but reasonable to attach it to the *nearest* ("uncover"), rather than the more remote secondary verb; which would be fatal to the sense of the passage.

[7] These terms are—(1) *Zimmah* (זִמָּה); A.V. "wickedness"), applied to marriage with mother or daughter (Lev. xx. 14), with mother-in-law, step-daughter, or grandstep-daughter (xviii. 17). The term is elsewhere applied to gross violations of decency or principle (Lev. xix. 29; Job xxxi. 11; Ez. xvi. 43, xxii. 11). (2) *Tebel* (תֶּבֶל); A.V. "confusion"), applied to marriage with a daughter-in-law (Lev. xx. 12): it signifies *pollution*, and is applied to the worst kind of defilement (Lev. xviii. 23). (3) *Chesed* (חֶסֶד; A.V. "wicked thing"), applied to marriage with a sister (Lev. xx. 17): its proper meaning appears to be *disgrace*. (4) *Niddah* (נִדָּה; A.V. "an unclean thing"), applied to marriage with a brother's wife (Lev. xx. 21) it conveys the notion of *impurity*. Michaelis (*Laws of Moses*, iii. 7, §2) asserts that these terms have a forensic force; but there appears to be no ground for this. The view which the same authority propounds (§4) as to the reason for the prohibitions, viz., to prevent seduction under the promise of marriage among near relations, is singularly inadequate both to the occasion and to the terms employed.

[8] Various attempts have been made to reconcile this language with the Levitical law. The Rabbinical explanation was that Tamar's mother was a heathen at the time of her birth, and that the law did not apply to such a case. Josephus (*Ant.* vii. 8, §1) regarded it as a mere *ruse* on the part of Tamar to evade Amnon's importunity: but, if the marriage were out of the question, she would hardly have tried such a poor device. Thenius (*Comm. in loc.*) considers that the Levitical prohibitions applies only to cases where a disruption of family bonds was likely to result, or where the motives were of a gross character an argument which would utterly abrogate the authority of this and every other absolute law.

stance of marriage with a father's wife (1 Cor. v. 1), which St. Paul characterizes as "fornication" (πορνεία), and visits with the severest condemnation. The third ground of the prohibitions, social convenience, comes forward solely in the case of marriage with two sisters simultaneously, the effect of which would be to "vex" or *irritate* the first wife, and produce domestic jars.[a]

A remarkable exception to these prohibitions existed in favour of marriage with a deceased brother's wife, in the event of his having died childless. The law which regulates this has been named the "Levirate,"[b] from the Latin *levir*, "brother in-law." The custom is supposed to have originated in that desire of perpetuating a name,[c] which prevails all over the world, but with more than ordinary force in Eastern countries, and pre-eminently among Israelites, who each wished to bear part in the promise made to Abraham that "in his *seed* should all nations of the earth be blessed" (Gen. xxvi. 4). The first instance of it occurs in the patriarchal period, where Onan is called upon to marry his brother Er's widow (Gen. xxxviii. 8). The custom was confirmed by the Mosaic law, which decreed that "if brethren (*i. e.* sons of the same father) dwell together (either in one family, in one house, or, as the Rabbins explained it, in contiguous properties; the first of the three senses is probably correct), and one of them die and leave no child (*ben*, here used in its broad sense, and not specifically *son*; compare Matt. xxii. 25, μὴ ἔχων σπέρμα; Mark xii. 19; Luke xx. 28, ἄτεκνος), the wife of the dead shall not marry without (*i. e.* out of the family) unto a stranger (one unconnected by ties of relationship); her husband's brother shall go in unto her and take her to him to wife;" not, however, without having gone through the usual preliminaries of a regular marriage. The first-born of this second marriage then succeeded in the name of the deceased brother,[d] *i. e.* became his legal heir, receiving his name (according to Josephus, *Ant.* iv 8, §23; but compare Ruth i. 2, iv. 17), and his property (Deut. xxv. 5, 6). Should the brother object to marrying his sister-in-law, he was publicly to signify his dissent in the presence of the authorities of the town, to which the widow responded by the significant act of loosing his shoe and spitting in his face, or (as the Talmudists explained it) on the ground before him (*Yebam.* 12, §6)—the former signifying the transfer of property from one person to another[e] (as usual among the Indians and old Germans, Keil, *Archäol.* ii. 66), the latter the contempt due to a man who refused to perform his just obligations (Deut. xxv. 7-9; Ruth iv. 6-11). In this case it was permitted to the next of kin to come forward and to claim both the wife and the inheritance.

The Levirate marriage was not peculiar to the Jews; it has been found to exist in many eastern countries,[f] particularly in Arabia (Burckhardt's *Notes*, i. 112; Niebuhr's *Voyage*, p. 61), and among the tribes of the Caucasus (Haxthausen's *Transcaucasia*, p. 403). The Mosaic law brings the custom into harmony with the general prohibition against marrying a brother's wife by restricting it to cases of childlessness; and it further secures the marriage bond as founded on affection by relieving the brother of the obligation whenever he was averse to the union, instead of making it compulsory, as in the case of Onan (Gen. xxxviii. 9). One of the results of the Levirate marriage would be in certain cases the consolidation of two properties in the same family; but this does not appear to have been the object contemplated.[g]

[a] The expression לְצָרֹר admits of another explanation, "to pack together," or combine the two in one marriage, and thus confound the nature of their relationship to one another. This is in one respect a preferable meaning, inasmuch as it is not clear why two sisters should be more particularly irritated than any two not so related. The usage, however, of the cognate word צָרָה in 1 Sam. i. 6, favours the sense usually given; and in the Mishna צָרוֹת is the usual term for the wives of a polygamist (Mishna, *Yebam.* i. §1).

[b] The Talmudical term for the obligation was *yebûm* (יְבוּם), from *yabam* (יָבַם), "husband's brother:" hence the title *yebamoth* of the treatise in the Mishna for the regulation of such marriages. From the same root comes the term *yibbem* (יַבֵּם), to contract such a marriage (Gen. xxxviii. 8).

[c] The reason here assigned is hardly a satisfactory one. May it not rather have been connected with the *purchase* system, which would reduce a wife into the position of a chattel or *mancipium*, and give the survivors a reversionary interest in her? This view derives some support from the statement in Haxthausen's *Transcaucasia*, p. 404, that among the Ossetes, who have a Levirate law of their own, in the event of none of the family marrying the widow, they are entitled to a certain sum from any other husband whom she may marry.

[d] The position of the issue of a Levirate marriage, as compared with other branches of the family, is exhibited in the case of Tamar, whose son by her father-in-law, Judah, became the head of the family, and the channel through whom the Messiah was born (Gen. xxxviii. 29; Matt. i. 3).

[e] The technical term for this act was *khalitzah* (חֲלִיצָה), from *khalats* (חָלַץ), "to draw off." It is of frequent occurrence in the treatise *Yebamoth*, where minute directions are given as to the manner in which the act was to be performed; *e. g.* that the shoe was to be of leather, or a sandal furnished with a heel-strap; a felt shoe or a sandal without a strap would not do (*Yebam.* 12, §1, 2). The *khalitzah* was not valid when the person performing it was deaf and dumb (§4), as he could not learn the precise formula which accompanied the act. The custom is retained by the modern Jews, and is minutely described by Picart (*Cérémonies Religieuses*, i. 243). It receives illustration from the expression used by the modern Arabs, in speaking of a repudiated wife, "She was my slipper: I have cast her off" (Burckhardt, *Notes*, i. 113).

[f] The variations in the usages of the Levirate marriage are worthy of notice. Among the Ossetes in Georgia the marriage of the widow takes place if there are children, and may be contracted by the father as well as the brother of the deceased husband. If the widow has no children the widow is purchaseable by another husband, as already noticed (Haxthausen, pp. 403, 404). In Arabia, the right of marriage is extended from the brother's widow to the cousin. Neither in this nor in the case of the brother's widow is the marriage compulsory on the part of the woman, though in the former the man can put a veto upon any other marriage (Burckhardt, *Notes*, i. 112, 113). Another development of the Levirate principle may perhaps be noticed in the privilege which the king enjoyed of succeeding to the wives as well as the throne of his predecessor (2 Sam. xii. 8). Hence Absalom's public seizure of his father's wives was not only a breach of morality, but betokened his usurpation of the throne (2 Sam. xvi. 22). And so, again, Adonijah's request for the hand of Abishag was regarded by Solomon as almost equivalent to demanding the throne (1 K. ii. 22).

[g] The history of Ruth's marriage has led to some misconception on this point. Boaz stood to Ruth in the

The Levirate law offered numerous opportunities for the exercise of that spirit of casuistry, for which the Jewish teachers are so conspicuous. One such case is brought forward by the Sadducees for the sake of entangling our Lord, and turns upon the complications which would arise in the world to come (the existence of which the Sadducees sought to invalidate) from the circumstance of the same woman having been married to several brothers (Matt. xxii. 23-30). The Rabbinical solution of this difficulty was that the wife would revert to the first husband: our Lord on the other hand subverts the hypothesis on which the difficulty was based, viz., that the material conditions of the present life were to be carried on in the world to come; and thus He asserts the true character of marriage as a temporary and merely human institution. Numerous difficulties are suggested, and minute regulations laid down by the Talmudical writers, the chief authority on the subject being the book of the Mishna, entitled *Yebamoth*. From this we gather the following particulars, as illustrating the working of the law. If a man stood within the proscribed degrees of relationship in reference to his brother's widow, he was exempt from the operation of the law (2, §3), and if he were on this or any other account exempt from the obligation to marry one of the widows, he was also from the obligation to marry any of them (1, §1); it is also implied that it was only necessary for one brother to marry one of the widows, in cases where there were several widows left. The marriage was not to take place within three months of the husband's death (4, §10). The eldest brother ought to perform the duty of marriage; but, on his declining it, a younger brother might also do it (2, §8, 4, §5). The *khalitzah* was regarded as involving future relationship; so that a man who had received it could not marry the widow's relations within the prohibited degrees (4, §7). Special rules are laid down for cases where a woman married under a false impression as to her husband's death (10, §1), or where a mistake took place as to whether her son or her husband died first (10, §3), for in the latter case the Levirate law would not apply; and again as to the evidence of the husband's death to be produced in certain cases (caps. 15, 16).

From the prohibitions expressed in the Bible, others have been deduced by a process of inferential reasoning. Thus the Talmudists added to the Levitical relationships several remoter ones, which they termed *secondary*, such as grandmother and great-grandmother, great-grandchild, &c.: the only points in which they at all touched the Levitical degrees were, that they added (1) the wife of the father's *uterine* brother under the idea that in the text the brother described was only by the same father, and (2) the mother's brother's wife, for which they had no authority (Selden, *Ux. Ebr.* i. 2). Considerable differences of opinion have arisen as to the extent to which this process of reasoning should be carried, and conflicting laws have been made in different countries, professedly based on the same original authority. It does not fall within our province to do more than endeavour to point out in what respects and to what extent the Biblical statements bear upon the subject. In the first place we must observe that the design of the legislator apparently was to give an exhaustive list of prohibitions; for he not only gives examples of *degrees* of relationship, but he specifies the prohibitions in cases which are strictly parallel to each other, *e. g.*, son's daughter and daughter's daughter (ver. 10), wife's son's daughter and wife's daughter's daughter (ver. 17): whereas, had he wished only to exhibit the prohibited degree, one of these instances would have been sufficient. In the second place it appears certain that he did not regard the degree as the test of the prohibition; for he establishes a different rule in regard to a brother's widow and a deceased wife's sister, though the degree of relationship is in each case strictly parallel. It cannot, therefore, in the face of this express enactment be argued that Moses designed his countrymen to infer that marriage with a niece was illegal because that with the aunt was, nor yet that marriage with a mother's brother's wife was included in the prohibition of that with the father's brother's wife. For, though no explicit statement is made as to the legality of these two latter, the rule of interpretation casually given to us in the first must be held to apply to them also. In the third place, it must be assumed that there were some tangible and even strong grounds for the distinctions noted in the degrees of equal distance; and it then becomes a matter of importance to ascertain whether these grounds are of *perpetual* force, or arise out of a peculiar state of society or legislation; if the latter, then it seems justifiable to suppose that on the alteration of that state we may recur to the spirit rather than the letter of the enactment, and may infer prohibitions which, though not existing in the Levitical law, may yet be regarded as based upon it.

The cases to which these remarks would most pointedly apply are marriage with a deceased wife's sister, a niece, whether by blood or by marriage, and a maternal uncle's widow. With regard to the first and third of these, we may observe that the Hebrews regarded the relationship existing between the wife and her husband's family, as of a closer nature than that between the husband and his wife's family. To what extent this difference was supposed to hold good we have no means of judging; but as illustrations of the difference we may note (1) that the husband's brother stood in the special relation of *levir* to his brother's wife, and was subject to the law of Levirate marriage in consequence; (2) that the nearest relation on the husband's side, whether brother, nephew, or cousin, stood in the special relation of *goël*, or avenger of blood to his widow; and (3) that an heiress was restricted to a marriage with a relation on her father's side. As no corresponding obligations existed in reference to the wife's or the mother's family, it follows almost as a matter of course that the degree of relationship must have been regarded as different in the two cases, and that prohibitions might on this account be applied to the one, from which the other was exempt. When, however, we transplant the Levitical regulations from the Hebrew to any other

position, not of a Levir (for he was only her husband's cousin), but of a *Goël*, or redeemer in the second degree (A. V. "near kinsman," iii. 9): as such, he redeemed the inheritance of Naomi, after the refusal of the redeemer in the nearest degree, in conformity with Lev. xxv. 25. It appears to have been customary for the redeemer at the same time to marry the heiress, but this custom is not founded on any written law. The writer of the book of Ruth, according to Selden (*De Success.* cap. 13), confuses the laws relating to the *Goël* and the *Levir*, as Josephus (*Ant.* v 9, §4) has undoubtedly done; but this is an unnecessary assumption: the custom is one that may well have existed in conformity with the *spirit* of the law of the Levirate marriage.

commonwealth, we are fully warranted in taking into account the temporary and local conditions of relationship in each, and in extending the prohibitions to cases where alterations in the social or legal condition have taken place. The question to be fairly argued, then, is not simply whether marriage within a certain degree is or is not permitted by the Levitical law, but whether, allowing for the altered state of society, *mutatis mutandis*, it appears in conformity with the general spirit of that law. The ideas of different nations as to relationship differ widely; and, should it happen that in the social system of a certain country a relationship is, as a matter of fact, regarded as an intimate one, then it is clearly permissible for the rulers of that country to prohibit marriage in reference to it, not on the ground of any expressed or implied prohibition in reference to it in particular in the book of Leviticus, but on the general ground that Moses intended to prohibit marriage among near relations. The application of such a rule in some cases is clear enough; no one could hesitate for a moment to pronounce marriage with a brother's widow, even in cases where the Mosaic law would permit it, as absolutely illegal in the present day: inasmuch as the peculiar obligation of the *Levir* has been abolished. As little could we hesitate to extend the prohibition from the paternal to the maternal uncle's widow, now that the peculiar differences between relationships on the father's and the mother's side are abolished. With regard to the vexed question of the deceased wife's sister we refrain from expressing an opinion, inasmuch as the case is still *in lite*; under the rule of interpretation we have already laid down, the case stands thus: such a marriage is not only not prohibited, but actually permitted by the letter of the Mosaic law; but it remains to be argued (1) whether the permission was granted under peculiar circumstances; (2) whether those or strictly parallel circumstances exist in the present day; and (3) whether, if they do not exist, the general tenour of the Mosaic prohibitions would, or would not, justify a community in extending the prohibition to such a relationship on the authority of the Levitical law. In what has been said on this point, it must be borne in mind that we are viewing the question simply in its relation to the Levitical law: with the other arguments *pro* and *con* bearing on it, we have at present nothing to do. With regard to the marriage with the niece, we have some difficulty in suggesting any sufficient ground on which it was permitted by the Mosaic law. The Rabbinical explanation, that the distinction between the aunt and the niece was based upon the *respectus parentelae*, which would not permit the aunt to be reduced from her natural seniority, but at the same time would not object to the elevation of the niece, cannot be regarded as satisfactory; for, though it explains to a certain extent the difference between the two, it places the prohibition of marriage with the aunt, and consequently the permission of that with the niece, on a wrong basis; for in Lev. xx. 19 consanguinity, and not *respectus parentelae*, is stated as the ground of the prohibition. The Jews appear to have availed themselves of the privilege without scruple: in the Bible itself, indeed, we have but one instance, and that not an undoubted one, in the case of Othniel, who was probably the brother of Caleb (Josh. xv. 17), and, if so, then the uncle of Achsah his wife. Several such marriages are noticed by Josephus, as in the case of Joseph, the nephew of Onias (*Ant.* xii. 4, §6), Herod the Great (*Ant.* xvii. 1, §3), and Herod Philip (*Ant.* xviii. 5, §1). But on whatever ground they were formerly permitted, there can be no question as to the propriety of prohibiting them in the present day.

2. Among the special prohibitions we have to notice the following. (1) The high-priest was forbidden to marry any except a virgin selected from his own people, *i. e.* an Israelite (Lev. xxi. 13, 14). He was thus exempt from the action of the Levirate law. (2) The priests were less restricted in their choice[h]; they were only prohibited from marrying prostitutes and divorced women (Lev. xxi. 7). (3) Heiresses were prohibited from marrying out of their own tribe,[i] with the view of keeping the possessions of the several tribes intact (Num. xxxvi. 5-9; comp. Tob. vii. 10). (4) Persons defective in physical powers were not to intermarry with Israelites by virtue of the regulations in Deut. xxiii. 1. (5) In the Christian Church, bishops and deacons were prohibited from having more than one wife (1 Tim. iii. 2, 12), a prohibition of an ambiguous nature, inasmuch as it may refer (1) to polygamy in the ordinary sense of the term, as explained by Theodoret (*in loc.*), and most of the Fathers; (2) to marriage after the decease of the first wife; or (3) to marriage after divorce during the lifetime of the first wife. The probable sense is second marriage of any kind whatever, including all the three cases alluded to, but with a special reference to the two last, which were allowable in the case of the laity, while the first was equally forbidden to all. The early Church generally regarded second marriage as a disqualification for the ministry, though on this point there was not absolute unanimity (see Bingham, *Ant.* iv. 5, §1-3). (6) A similar prohibition applied to those who were candidates for admission into the ecclesiastical order of widows, whatever that order may have been (1 Tim. v. 9); in this case the words "wife of one man" can be applied but to two cases, (1) to re-marriage after the decease of the husband, or (2) after divorce. That divorce was obtained sometimes at the instance of the wife, is implied in Mark x. 12, and 1 Cor. vii. 11, and is alluded to by several classical writers (see Whitby *in loc.*). But St. Paul probably refers to the general question of re-marriage. (7) With regard to the general question of the re-marriage of divorced persons, there is some difficulty in ascertaining the sense of Scripture. According to the Mosaic law, a wife divorced at the instance of the husband might marry whom she liked; but if her second husband died or divorced her she could not revert to her first husband, on the ground that, as far as he was concerned, she was "defiled" (Deut. xxiv. 2-4); we may infer from the statement of the ground that there was no objection to the re-marriage of the original parties, if the divorced wife had remained unmarried in the interval. If the wife was divorced on the ground of adultery, her re-marriage was impossible, inasmuch as the punishment for such a crime was death. In the

[h] From Ex. xliv. 22 it appears that the law relative to the marriage of priests was afterwards made more rigid: they could marry only maidens of Israelitish origin or the widows of priests.

[i] The close analogy of this regulation to the Athenian law respecting the ἐπίκληροι has been already noticed in the article on HEIR.

N. T. there are no direct precepts on the subject of the re-marriage of divorced persons. All the remarks bearing upon the point had a primary reference to an entirely different subject, viz. the abuse of divorce. For instance, our Lord's declarations in Matt. v. 32, xix. 9, applying as they expressly do to the case of a wife divorced on other grounds than that of unfaithfulness, and again St. Paul's, in 1 Cor. vii. 11, pre-supposing a contingency which he himself had prohibited as being improper, cannot be regarded as directed to the general question of re-marriage. In applying these passages to our own circumstances, due regard must be had to the peculiar nature of the Jewish divorce, which was not, as with us, a judicial proceeding based on evidence and pronounced by authority, but the arbitrary, and sometimes capricious act of an individual. The assertion that a woman divorced on improper and trivial grounds is made to commit adultery, does not therefore bear upon the question of a person divorced by judicial authority; no such case as our Lord supposes can now take place; at all events it would take place only in connexion with the question of what form adequate grounds for divorce. The early Church was divided in its opinion on this subject (Bingham, *Ant.* xxii. 2, §12).

With regard to age, no restriction is pronounced in the Bible. Early marriage is spoken of with approval in several passages (Prov. ii. 17, v. 18; Is. liii. 5), and in reducing this general statement to the more definite one of years, we must take into account the very early age at which persons arrive at puberty in Oriental countries. In modern Egypt marriage takes place in general before the bride has attained the age of 16, frequently when she is 12 or 13, and occasionally when she is only 10 (Lane, i. 208). The Talmudists forbade marriage in the case of a man under 13 years and a day, and in the case of a woman under 12 years and a day (Buxtorf, *Synagog.* cap. 7, p. 143). The usual age appears to have been higher, about 18 years.

Certain days were fixed for the ceremonies of betrothal and marriage—the fourth day for virgins, and the ninth for widows (Mishna, *Ketub.* 1, §1). The more modern Jews similarly appoint different days for virgins and widows, Wednesday and Friday for the former, Thursday for the latter (Picart, i. 240).

III. The customs of the Hebrews and of Oriental nations generally, in regard to the preliminaries of marriage, as well as the ceremonies attending the rite itself, differ in many respects from those with which we are familiar. In the first place, the choice of the bride devolved not on the bridegroom himself, but on his relations or on a friend deputed by the bridegroom for this purpose. Thus Abraham sends Eliezer to find a suitable bride for his son Isaac, and the narrative of his mission affords one of the most charming pictures of patriarchal life (Gen. xxiv.); Hagar chooses a wife for Ishmael (Gen. xxi. 21); Isaac directs Jacob in his choice (Gen. xxviii. 1); and Judah selects a wife for Er (Gen. xxxviii. 6). It does not follow that the bridegroom's wishes were not consulted in this arrangement: on the contrary, the parents made proposals at the instigation of their sons in the instances of Shechem (Gen. xxxiv. 4, 8) and Samson (Judg. xiv. 1-10). A marriage contracted without the parents' interference was likely to turn out, as in Esau's case, "a grief of mind" to them (Gen. xxvi. 35, xxvii. 46). As a general rule the proposal originated with the family of the bridegroom: occasionally, when there was a difference of rank, this rule was reversed, and the bride was offered by her father, as by Jethro to Moses (Ex. ii. 21), by Caleb to Othniel (Josh. xv. 17), and by Saul to David (1 Sam. xviii. 27). The imaginary case of women soliciting husbands (Is. iv. 1) was designed to convey to the mind a picture of the ravages of war, by which the greater part of the males had fallen. The consent of the maiden was sometimes asked (Gen. xxiv. 58); but this appears to have been subordinate to the previous consent of the father and the adult brothers (Gen. xxiv. 51, xxxiv. 11). Occasionally the whole business of selecting the wife was left in the hands of a friend, and hence the case might arise which is supposed by the Talmudists (*Yebam.* 2, §6, 7), that a man might not be aware to which of two sisters he was betrothed. So in Egypt at the present day the choice of a wife is sometimes entrusted to a professional woman styled a *khát'beh*: and it is seldom that the bridegroom sees the features of his bride before the marriage has taken place (Lane, i. 209-211).

The selection of the bride was followed by the espousal, which was not altogether like our "engagement," but was a formal proceeding, undertaken by a friend or legal representative on the part of the bridegroom, and by the parents on the part of the bride; it was confirmed by oaths, and accompanied with presents to the bride. Thus Eliezer, on behalf of Isaac, propitiates the favour of Rebekah by presenting her in anticipation with a massive golden nose-ring and two bracelets; he then proceeds to treat with the parents, and, having obtained their consent, he brings forth the more costly and formal presents, "jewels of silver, and jewels of gold, and raiment," for the bride, and presents of less value for the mother and brothers (Gen. xxiv. 22, 53). These presents were described by different terms, that to the bride by *mohar*[k] (A. V. "dowry"), and that to the relations by *mattan*.[m] Thus Shechem offers "never so much dowry and gift" (Gen. xxxiv. 12), the former *to* the bride, the latter for the relations. It has been supposed indeed that the *mohar* was a price paid down to the father for the sale of his daughter. Such a custom undoubtedly prevails in certain

[k] The term *mohar* (מֹהַר) occurs only thrice in the Bible (Gen. xxxiv. 12; Ex. xxii. 17; 1 Sam. xviii. 25). From the second of the three passages, compared with Deut. xxii. 29, it has been inferred that the sum was in all cases paid to the father; but this inference is unfounded, because the sum to be paid according to that passage was not the proper *mohar*, but a sum "according to," i. e. equivalent to the *mohar*, and this not as a price for the bride, but as a penalty for the offence committed. The origin of the term and consequently its specific sense, is uncertain. Gesenius (*Thes.* p. 773) has evolved the sense of "purchase-money" by connecting it with מָכַר, "to sell." It has also been connected with מָהַר, "to hasten," as though it signified a present *hastily produced* for the bride when her consent was obtained; and again with מָחָר, "morrow," as though it were the gift presented to the bride on the *morning* after the wedding, like the German *morgen-gabe* (Saalschütz, *Archäol.* ii. 193).

[m] מַתָּן. The importance of presents at the time of betrothal appears from the application of the term *dras* (אָרַשׁ), literally, "to make a present," in the special sense of "to betroth."

parts of the East at the present day, but it does not appear to have been the case with free women in patriarchal times; for the daughters of Laban make it a matter of complaint that their father had bargained for the services of Jacob in exchange for their hands, just as if they were "strangers" (Gen. xxxi. 15); and the permission to sell a daughter was restricted to the case of a "servant" or secondary wife (Ex. xxi. 7): nor does David, when complaining of the non-completion of Saul's bargain with him, use the expression "I *bought* for," but "I *espoused* to me for an hundred foreskins of the Philistines (2 Sam. iii. 14). The expressions in Hos. iii. 2, "So I bought her to me," and in Ruth iv. 10, "Ruth have I *purchased* to be my wife," certainly appear to favour the opposite view; it should be observed, however, that in the former passage great doubt exists as to the correctness of the translation[n]; and that in the latter the case would not be conclusive, as Ruth might well be considered as included in the purchase of her property. It would undoubtedly be expected that the *mohar* should be proportioned to the position of the bride, and that a poor man could not on that account afford to marry a rich wife (1 Sam. xviii. 23). Occasionally the bride received a dowry[o] from her father, as instanced in the cases of Caleb's (Judg. i. 15) and Pharaoh's (1 K. ix. 16) daughters. A "settlement," in the modern sense of the term, *i. e.* a written document securing property to the wife, did not come into use until the post-Babylonian period: the only instance we have of one is in Tob. vii. 14, where it is described as an "instrument" (συγγραφή). The Talmudists styled it a *ketubah*,[p] and have laid down minute directions as to the disposal of the sum secured, in a treatise of the Mishna expressly on that subject, from which we extract the following particulars. The peculiarity of the Jewish *ketubah* consisted in this, that it was a definite sum, varying not according to the circumstances of the parties, but according to the state of the bride,[q] whether she be a spinster, a widow, or a divorced woman[r] (1, §2); and further, that the dowry could not be claimed until the termination of the marriage by the death of the husband or by divorce (5, §1), though advances might be made to the wife previously (9, §8). Subsequently to betrothal a woman lost all power over her property, and it became vested in the husband, unless he had previously to marriage renounced his right to it (8, §1; 9, §1). Stipulations were entered into for the increase of the *ketubah*, when the bride had a handsome allowance (6, §3).

The act of betrothal[s] was celebrated by a feast (1, §5) and among the more modern Jews it is the custom in some parts for the bridegroom to place a ring on the bride's finger (Picart, i. 239)—a custom which also prevailed among the Romans (*Dict. of Ant.* p. 604). Some writers have endeavoured to prove that the rings noticed in the O. T. (Ex. xxxv. 22; Is. iii. 21) were nuptial rings but there is not the slightest evidence of this. The ring was nevertheless regarded among the Hebrews as a token of fidelity (Gen. xli. 42), and of adoption into a family (Luke xv. 22). According to Selden it was originally given as an equivalent for dowry-money (*Uxor Ebraic.* ii. 14). Between the betrothal and the marriage an interval elapsed, varying from a few days in the patriarchal age (Gen. xxiv. 55), to a full year for virgins and a month for widows in later times. During this period the bride-elect lived with her friends, and all communication between herself and her future husband was carried on through the medium of a friend deputed for the purpose, termed the "friend of the bridegroom" (John iii. 29). She was now virtually regarded as the wife of her future husband; for it was a maxim of the Jewish law that betrothal was of equal force with marriage (Phil. *De Spec. Leg.* p. 788). Hence faithlessness on her part was punishable with death (Deut. xxii. 23, 24), the husband having, however, the option of "putting her away" (Matt. i. 19) by giving her a bill of divorcement, in case he did not wish to proceed to such an extreme punishment (Deut. xxiv. 1). False accusations on this ground were punished by a severe fine and the forfeiture of the right of divorce (Deut. xxii. 13-19). The betrothed woman could not part with her property after betrothal, except in certain cases (*Ketub.* 8, §1): and, in short, the bond of matrimony was as fully entered into by betrothal, as with us by marriage. In this respect we may compare the practice of the Athenians, who regarded the formal betrothal as indispensable to the validity of a marriage contract (*Dict. of Ant.* p. 598). The customs of the Nestorians afford several points of similarity in respect both to the mode of effecting the betrothal and the importance attached to it (Grant's *Nestorians*, pp. 197, 198).

We now come to the wedding itself; and in this the most observable point is, that there were no definite religious ceremonies connected with it. It is probable, indeed, that some formal ratification of the espousal with an oath took place, as implied in some allusions to marriage (Ez. xvi. 8; Mal. ii. 14), particularly in the expression, "the covenant

[n] The term used (כָּרָה) has a general sense "to make an agreement." The meaning of the verse appears to be this:—the Prophet had previously married a wife, named Gomer, who had turned out unfaithful to him. He had separated from her; but he was ordered to renew his intimacy with her, and previous to doing this he places her on her probation, setting her apart for a time, and for her maintenance agreeing to give her fifteen pieces of silver, in addition to a certain amount of food.

[o] The technical term of the Talmudists for the dowry which the wife brought to her husband, answering to the *dos* of the Latins, was נְדוֹנְיָא.

[p] כְּתוּבָה, literally "a writing." The term was also specifically applied to the sum settled on the wife by the husband, answering to the Latin *donatio propter nuptias*.

[q] The practice of the modern Egyptians illustrates this; for with them the dowry, though its amount differs according to the wealth of the suitor, is still graduated according to the state of the bride. A certain portion only of the dowry is paid down, the rest being held in reserve (Lane, i. 211). Among the modern Jews also the amount of the dowry varies with the state of the bride, according to a fixed scale (Picart, i. 240).

[r] The amount of the dowry, according to the Mosaic law, appears to have been fifty shekels (Ex. xxii. 17, compared with Deut. xxii. 29).

[s] The technical term used by the Talmudists for betrothing was *kiddáshin* (קִדּוּשִׁין), derived from קָדַשׁ "to set apart." There is a treatise in the Mishna so entitled, in which various questions of casuistry of slight interest to us are discussed.

[t] It is worthy of observation that there is no term in the Hebrew language to express the ceremony of marriage. The substantive *chatunnah* (חֲתֻנָּה) occurs but once, and then in connexion with the day (Cant. iii. 11). The word "wedding" does not occur at all in the A. V. of the Old Testament.

of the God" (Prov. ii. 17), as applied to the marriage bond, and that a blessing was pronounced (Gen. xxiv. 60; Ruth iv. 11, 12) sometimes by the parents (Tob. vii. 13). But the essence of the marriage ceremony consisted in the removal of the bride from her father's house to that of the bridegroom or his father.[a]

The bridegroom prepared himself for the occasion by putting on a festive dress, and especially by placing on his head the handsome turban described by the term *peér* (Is. lxi. 10; A. V. "ornaments"), and a nuptial crown or garland[z] (Cant. iii. 11): he was redolent of myrrh and frankincense and all powders of the merchant" (Cant. iii. 6). The bride prepared herself for the ceremony by taking a bath, generally on the day preceding the wedding. This was probably in ancient as in modern times a formal proceeding, accompanied with considerable pomp (Picart, i. 240; Lane, i. 217). The notices of it in the Bible are so few as to have escaped general observation (Ruth iii. 3; Ez. xxiii. 40; Eph. v. 26, 27); but the passages cited establish the antiquity of the custom, and the expression in the last ("having purified her by the washing of water," "not having spot"), have evident reference to it. A similar custom prevailed among the Greeks (*Dict. of Ant.* s. v. *Balneae*, p. 185). The distinctive feature of the bride's attire was the *tsaíph* or "veil"—a light robe of ample dimensions which covered not only the face but the whole person (Gen. xxiv. 65; comp. xxxviii. 14, 19). This was regarded as the symbol of her submission to her husband, and hence in 1 Cor. xi. 10, the veil is apparently described under the term ἐξουσία, "authority."[b] She also wore a peculiar bride, named *hishshurim*,[c] the "attire" (A. V.), which no bride could forget (Jer. ii. 32); and her head was crowned with a chaplet, which was again a distinctive of the bride, that the Hebrew term *cullah*,[d] "bride," originated from it. If the bride were a virgin, she wore her hair flowing (*Ketub.* 2, §1). Her robes were white (Rev. xix. 8), and sometimes embroidered with gold thread (Ps. xlv. 13, 14), and covered with perfumes (Ps. xlv. 8): she was further decked out with jewels (Is. xlix 18, lxi. 10; Rev. xxi. 2). When the fixed hour arrived, which was generally late in the evening, the bridegroom set forth from his house, attended by his groomsmen, termed in Hebrew *mérí'im*[e] (A. V. "companions; Judg. xiv. 11), and in Greek *υἱοὶ τοῦ νυμφῶνος* (A. V. "children of the bridechamber;" Matt. ix. 15), preceded by a band of musicians or singers (Gen. xxxi. 27; Jer. vii. 34, xvi. 9; 1 Macc. ix. 39), and accompanied by persons bearing flambeaux[e] (2 Esdr. x. 2; Matt. xxv. 7; compare Jer. xxv. 10; Rev. xviii. 23, "the light of a candle"). Having reached the house of the bride, who with her maidens anxiously expected his arrival (Matt. xxv. 6), he conducted the whole party back to his own or his father's[d] house, with every demonstration of gladness[e] (Ps. xlv. 15). On their way back they were joined by a party of maidens, friends of the bride and bridegroom, who were in waiting to catch the procession as it passed (Matt. xxv. 6; comp. Trench on *Parables*, p. 244 *note*). The inhabitants of the place pressed out into the streets to watch the procession (Cant. iii. 11). At the house a feast[f] was prepared, to which all the friends and neighbours were invited (Gen. xxix. 22; Matt. xxii. 1-10; Luke xiv. 8; John ii. 2), and the festivities were protracted for seven, or even fourteen days (Judg. xiv. 12; Tob. viii. 19). The guests were provided by the host with fitting robes (Matt. xxii. 11; comp. Trench, *Parables*, p. 230), and the feast was enlivened with riddles (Judg. xiv. 12) and other amusements. The bridegroom now entered into direct communication with the bride, and the joy of the friend was "ful-

[a] There seems indeed to be a literal truth in the Hebrew expression "to *take*" a wife (Num. xii. 1; 1 Chr. ii. 21); for the ceremony appears to have mainly consisted in the taking. Among the modern Arabs the same custom prevails, the capture and removal of the bride being effected with a considerable show of violence (Burckhardt's *Notes*, i. 108).

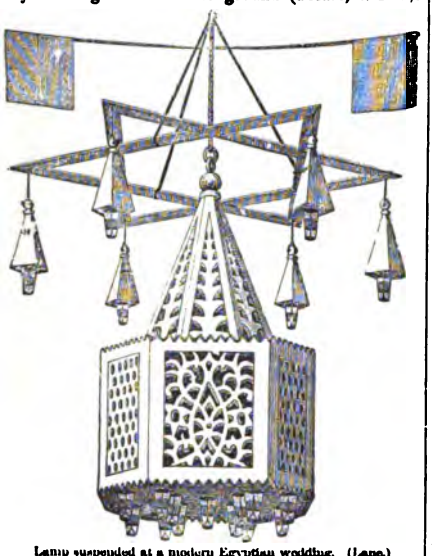
[z] The bridegroom's crown was made of various materials (gold, silver, roses, myrtle or olive), according to his circumstances (Selden, *Ux. Ebr.* ii. 15). The use of the crown in marriages was familiar both to the Greeks and Romans (*Dict. of Ant.*, Corona).

[b] צָעִיף. See article on Dress. The use of the veil was not peculiar to the Hebrews. It was customary also with the Greeks and Romans; and among the latter it gave rise to the expression *nubo*, literally "to veil," and hence our word "nuptial." It is still used by the Jews (Leyer, i. 341). The modern Egyptians envelope the whole in an ample shawl, which perhaps more than any other resembles the Hebrew *tsaíph* (Lane, i. 220).

[c] חִשֻּׁרִים. Some difference of opinion exists as to its true sense. [Gesenius.] The girdle was an important article of the bride's dress among the Romans, and gave rise to the expression *solvere zonam*.

[d] כַּלָּה. The bride's crown was either of gold or gilded. The use of it was interdicted after the destruction of the second Temple, as a token of humiliation (Selden, *Ux. Ebr.* i. 5).

[e] בְּנֵי חֻפָּה. Winer (*Bibl. R.* s. v. "Hochzeit") identifies the "children of the bridechamber" with the *shoshbenim* (שׁוֹשְׁבִינִים) of the Talmudists. But the former were all attendants on the bridegroom alone, while the *shoshbenim* were two persons selected on the day of the marriage to represent the interests of bride and bridegroom, apparently with a special view to any possible litigation that might subsequently arise on the subject noticed in Deut. xxii. 15-21 (Selden, *Ux. Ebr.* ii. 16).



[e] Compare the δᾷδες νυμφικαί of the Greeks (Aristoph. *Pax*, 1317). The lamps described in Matt. xxv. 7 would be small hand-lamps. Without them none could join the procession (Trench's *Parables*, p. 257 note).

[d] The bride was said to "go to" (בּוֹא אֶל) the house of her husband (Josh. xv. 18; Judg. i. 14); an expression which is worthy of notice, inasmuch as it has not been rightly understood in Dan. xi. 6, where "they that brought her" is an expression for *husband*. The bringing home of the bride was regarded in the later days of the Roman empire as one of the most important parts of the marriage ceremony (Bingham, *Ant.* xxii. 4, §7).

[e] From the joyous sounds used on these occasions the term *hdlal* (הִלֵּל) is applied in the sense of marrying in Ps. lxxviii. 63; A. V. "their maidens were not given to marriage," literally, "were not praised," as in the margin. This sense appears preferable to that of the LXX. οὐκ ἐνεύθησαν, which is adopted by Gesenius (*Thes.* p. 596). The noise in the streets, attendant on an Oriental wedding, is excessive, and enables us to understand the allusions in Jeremiah to the "voice of the bridegroom and the voice of the bride."

[f] The feast was regarded as so essential a part of the marriage ceremony, that ποιεῖν γάμον acquired the specific meaning "to celebrate the marriage-feast" (Gen. xxix. 22; Esth. ii. 18; Tob. viii. 19; 1 Macc. ix. 37, x. 58 LXX., Matt. xxii. 4, xxv. 10; Luke xiv. 8), and sometimes to celebrate any feast (Esth. ix. 22).

filled" at hearing the voice of the bridegroom (John iii. 29) conversing with her, which he regarded as a satisfactory testimony of the success of his share in the work. In the case of a virgin, parched corn was distributed among the guests (*Ketub.* 2, §1), the significance of which is not apparent; the custom bears some resemblance to the distribution of the *mustaceum* (Juv. vi. 202) among the guests at a Roman wedding. The modern Jews have a custom of shattering glasses or vessels, by dashing them to the ground (Picart, i. 240).

Lamp suspended at a modern Egyptian wedding. (Lane.)

The last act in the ceremonial was the conducting of the bride to the bridal chamber, *cheder*[a] (Judg. xv. 1; Joel ii. 16), where a canopy, named *chuppáh*[b] was prepared (Ps. xix. 5; Joel ii. 16). The bride was still completely veiled, so that the deception practised on Jacob (Gen. xxix. 23) was very possible. If proof could be subsequently adduced that the bride had not preserved her maiden purity, the case was investigated; and, if she was convicted, she was stoned to death before her father's house (Deut. xxii. 13-21). A newly married man was exempt from military service, or from any public business which might draw him away from his home, for the space of a year (Deut. xxiv. 5): a similar privilege was granted to him who was betrothed (Deut. xx. 7).

Hitherto we have described the usages of marriage as well as they can be ascertained from the Bible itself. The Talmudists specify three modes by which marriage might be effected, viz., money, marriage-contract, and consummation (*Kiddush.* i. §1). The first was by the presentation of a sum of money, or its equivalent, in the presence of witnesses, accompanied by a mutual declaration of betrothal. The second was by a *written*, instead of a verbal agreement, either with or without a sum of money. The third, though valid in point of law, was discouraged to the greatest extent, as being contrary to the laws of morality (Selden, *Ux. Eb.* ii. 1, 2).

IV. In considering the social and domestic conditions of married life among the Hebrews, we must in the first place take into account the position assigned to women generally in their social scale. The seclusion of the *harem* and the habits consequent upon it were utterly unknown in early times, and the condition of the Oriental woman, as pictured to us in the Bible, contrasts most favourably with that of her modern representative. There is abundant evidence that women, whether married or unmarried, went about with their faces unveiled (Gen. xii. 14, xxiv. 16, 65, xxix. 11; 1 Sam. i. 13). An unmarried woman might meet and converse with men, even strangers, in a public place (Gen. xxiv. 24, 45-7, xxix. 9-12; 1 Sam. ix. 11): she might be found alone in the country without any reflection on her character (Deut. xxii. 25-27): or she might appear in a court of justice (Num. xxvii. 2). Women not unfrequently held important offices; some were prophetesses, as Miriam, Deborah, Huldah, Noadiah, and Anna: of others advice was sought in emergencies (2 Sam. xiv. 2, xx. 16-22). They took their part in matters of public interest (Ex. xv. 20; 1 Sam. xviii. 6, 7): in short, they enjoyed as much freedom in ordinary life as the women of our own country.

If such was her general position, it is certain that the wife must have exercised an important influence in her own home. She appears to have taken her part in family affairs, and even to have enjoyed a considerable amount of independence. For instance, she entertains guests at her own desire (2 K. iv. 8) in the absence of her husband (Judg. iv. 12), and sometimes even in defiance of his wishes (1 Sam. xxv. 14, &c.): she disposes of her child by a vow without any reference to her husband (1 Sam. i. 24): she consults with him as to the marriage of her children (Gen. xxvii. 46): her suggestions as to any domestic arrangements meet with due attention (2 K. iv. 9): and occasionally she criticises the conduct of her husband in terms of great severity (1 Sam. xxv. 25; 2 Sam. vi. 20).

The relations of husband and wife appear to have been characterised by affection and tenderness. He is occasionally described as the "friend" of his wife (Jer. iii. 20; Hos. iii. 1), and his love for her is frequently noticed (Gen. xxiv. 67, xxix. 18). On the other hand, the wife was the consolation of the husband in time of trouble (Gen. xxiv. 67), and her grief at his loss presented a picture of the most abject woe (Joel i. 8). No stronger testimony, however, can be afforded as to the ardent affection of husband and wife, than that which we derive from the general tenor of the book of Canticles. At the same time we cannot but think that the exceptions to this state of affairs were more numerous than is consistent with our ideas of matrimonial happiness. One of the evils inseparable from polygamy is the discomfort arising from the jealousies and quarrels of the several wives, as instanced in the households of Abraham and Elkanah (Gen. xxi. 11; 1 Sam. i. 6). The purchase of wives, and the small amount of liberty allowed to daughters in the choice of husbands, must inevitably have led to unhappy unions. The allusions to the misery of a con-

[a] חֶדֶר.

[b] חֻפָּה. The term occurs in the Mishna (*Ketub.* 4, §1), and is explained by some of the Jewish commentators to have been a bower of roses and myrtles. The term was also applied to the canopy under which the nuptial benediction was pronounced, or to the robe spread over the heads of the bride and bridegroom (Selden, ii. 18).

fertious and brawling wife in the Proverbs (xix. 13 xxi. 9, 19, xxvii. 15) convey the impression that the infliction was of frequent occurrence in Hebrew households, and in the Mishna (*Ketub.* 7, §6) the fact of a woman being noisy is laid down as an adequate ground for divorce. In the N. T. the mutual relations of husband and wife are a subject of frequent exhortation (Eph. v. 22-33; Col. iii. 18, 19; Tit. ii. 4, 5; 1 Pet. iii. 1-7): it is certainly a noticeable coincidence that these exhortations should be found exclusively in the epistles addressed to Asiatics, nor is it improbable that they were more particularly needed for them than for Europeans.

The duties of the wife in the Hebrew household were multifarious: in addition to the general superintendence of the domestic arrangements, such as cooking, from which even women of rank were not exempted (Gen. xviii. 6; 2 Sam. xiii. 8), and the distribution of food at meal-times (Prov. xxxi. 15), the manufacture of the clothing and the various textures required in an Eastern establishment devolved upon her (Prov xxxi. 13, 21, 22), and if she were a model of activity and skill, she produced a surplus of fine linen shirts and girdles, which she sold, and so, like a well-freighted merchant-ship, brought in wealth to her husband from afar (Prov. xxxi. 14, 24). The poetical description of a good house-wife drawn in the last chapter of the Proverbs is both filled up and in some measure illustrated by the following minute description of a wife's duties towards her husband, as laid down in the Mishna: "She must grind corn, and bake, and wash, and cook, and suckle his child, make his bed, and work in wool. If she brought her husband one bondwoman, she need not grind, bake, or wash: if two, she need not cook nor suckle his child: if three, she need not make his bed nor work in wool: if four, she may sit in her chair of state" (*Ketub.* 5, §5). Whatever money she earned by her labour belonged to her husband (ib. 6, §1). The qualification not only of working, but of working *at home* (Tit. ii. 5, where **οἰκουργούς** is preferable to **οἰκουρούς**), was insisted on in the wife, and to spin in the street was regarded as a violation of Jewish customs (*Ketub.* 7, §6).

The legal rights of the wife are noticed in Ex. xxi. 10, under the three heads of food, raiment, and duty of marriage or conjugal right. These were defined with great precision by the Jewish doctors; for thus only could one of the most cruel effects of polygamy be averted, viz., the sacrifice of the rights of the many in favour of the one whom the lord of the modern *harem* selects for his special attention. The regulations of the Talmudists founded on Ex. xxi. 10 may be found in the Mishna (*Ketub.* 5, §6-9).

V. The allegorical and typical allusions to marriage have exclusive reference to one subject, viz., to exhibit the spiritual relationship between God and his people. The earliest form, in which the image is implied, is in the expressions "to go a whoring," and "whoredom," as descriptive of the rupture of that relationship by acts of idolatry. These expressions have by some writers been taken in their primary and literal sense, as pointing to the heinous practices of idolaters. But this destroys the whole point of the comparison, and is opposed to the plain language of Scripture: for (1) Israel is described as the false wife[1] "playing the harlot" (Is. i. 21; Jer. iii. 1, 6, 8); (2) Jehovah is the injured husband, who therefore divorces her (Ps. lxxiii. 27: Jer. ii. 20: Hos. iv. 12 ix. 1); and (3) the other party in the adultery is specified, sometimes generally, as idols or false gods (Deut. xxxi. 16; Judg. ii. 17; 1 Chr. v. 25; Ez. xx. 30, xxiii. 30), and sometimes particularly, as in the case of the worship of goats (A. V. "devils," Lev. xvii. 7), Molech (Lev. xx. 5), wizards (Lev. xx. 6), an ephod (Judg. viii. 27), Baalim (Judg. viii. 33), and even the heart and eyes (Num. xv. 39)—the last of these objects being such as wholly to exclude the idea of actual adultery. The image is drawn out more at length by Ezekiel (xxiii.), who compares the kingdoms of Samaria and Judah to the harlots Aholah and Aholibah; and again by Hosea (i. iii.), whose marriage with an adulterous wife, his separation from her, and subsequent reunion with her, were designed to be a visible lesson to the Israelites of their dealings with Jehovah.

The direct comparison with marriage is confined in the O. T. to the prophetic writings, unless we regard the Canticles as an allegorical work. [CANTICLES.] The actual relation between Jehovah and His people is generally the point of comparison (Is. liv. 5, lxii. 4; Jer. iii. 14; Hos. ii. 19; Mal. ii. 11); but sometimes the graces consequent thereon are described under the image of bridal attire (Is. xlix. 18, lxi. 10), and the joy of Jehovah in His Church under that of the joy of a bridegroom (Is. lxii. 5).

In the N. T. the image of the bridegroom is transferred from Jehovah to Christ (Matt. ix. 15; John iii. 29), and that of the bride to the Church (2 Cor. xi. 2; Rev. xix. 7, xxi. 2, 9, xxii. 17), and the comparison thus established is converted by St. Paul into an illustration of the position and mutual duties of man and wife (Eph. v. 23-32). The suddenness of the Messiah's appearing, particularly at the last day, and the necessity of watchfulness are inculcated in the parable of the Ten Virgins, the imagery of which is borrowed from the customs of the marriage ceremony (Matt. xxv. 1-13). The Father prepares the marriage feast for his Son, the joys that result from the union being thus represented (Matt. xxii. 1-14, xxv. 10; Rev. xix. 9; comp. Matt. viii. 11), while the qualifications requisite for admission into that union are prefigured by the marriage garment (Matt. xxii. 11). The breach of the union is, as before, described as fornication or whoredom in reference to the mystical Babylon (Rev. xvii. 1, 2, 5).

The chief authorities on this subject are Selden's *Uxor Ebraica*; Michaelis' *Commentaries*; the Mishna, particularly the books *Yebamoth*, *Ketuboth*, *Gittin*, and *Kiddushin*; Buxtorf's *Sponsal. et Divort.* Among the writers on special points we may notice Benary, *de Hebr. Leviratu*, Berlin, 1835; Reislob's *Leviratsehe*, Leipzig, 1836; and Kurtz's *Ehe des Hosea*, Dorpat, 1859. [W. L. B.]

MARS' HILL. [AREOPAGUS.]

MAR'SENA (מַרְסְנָא: Μαρσεδάρ; Alex. Μα

[1] The term **זנה** (זָנָה), in its ordinary application, is almost without exception applied to the act of the woman. We may here notice the only exceptions to the ordinary sense of this term, viz., Is. xxiii. 17, where it means "commerce," and Nah. iii. 4, where it is equivalent to "crafty policy," just as in 2 K. ix. 22 the parallel word is "witchcrafts."

Ἀμεσθρ: *Marsana*), one of the seven princes of Persia, "wise men which knew the times," which saw the king's face and sat first in the kingdom (Esth. i. 14). According to Josephus they had the office of interpreters of the laws (*Ant.* xi. 6, §1).

MAR'THA (Μάρθα: *Martha*). This name, which does not appear in the O. T., belongs to the later Aramaic, and is the feminine form of מָרָא = Lord. We first meet with it towards the close of the 2nd century B.C. Marius, the Roman dictator, was attended by a Syrian or Jewish prophetess Martha during the Numidian war and in his campaign against the Cimbri (Plutarch, *Marius*, xvii.). Of the Martha of the N. T. there is comparatively little to be said. What is known or conjectured as to the history of the family of which she was a member may be seen under LAZARUS. The facts recorded in Luke x. and John xi. indicate a character devout after the customary Jewish type of devotion, sharing in Messianic hopes and accepting Jesus as the Christ; sharing also in the popular belief in a resurrection (John xi. 24), but not rising, as her sister did, to the belief that Christ was making the eternal life to belong, not to the future only, but to the present. When she first comes before us in Luke x. 38, as receiving her Lord into her house (it is uncertain whether at Bethany or elsewhere), she loses the calmness of her spirit, is "cumbered with much serving," is "careful and troubled about many things." She is indignant that her sister and her Lord care so little for that for which she cares so much. She needs the reproof "one thing is needful;" but her love, though imperfect in its form, is yet recognised as true, and she too, no less than Lazarus and Mary, has the distinction of being one whom Jesus loved (John xi. 3). Her position here, it may be noticed, is obviously that of the elder sister, the head and manager of the household. It has been conjectured that she was the wife or widow of "Simon the leper" of Matt. xxvi. 6 and Mark xiv. 3 (Schulthess, in Winer, *Rwb.*; Paulus, in Meyer, *in loc.*; Greswell, *Diss. on Village of Martha and Mary*). The same character shows itself in the history of John xi. She goes to meet Jesus as soon as she hears that He is coming, turning away from all the Pharisees and rulers who had come with their topics of consolation (ver. 19, 20). The same spirit of complaint that she had shown before finds utterance again (ver. 21), but there is now, what there was not before, a fuller faith at once in His wisdom and His power (ver. 22). And there is in that sorrow an education for her as well as for others. She rises from the formula of the Pharisee's creed to the confession which no "flesh and blood," no human traditions, could have revealed to her (ver. 24-27). It was an immense step upward from the dull stupor of a grief which refused to be comforted, that, without any definite assurance of an *immediate* resurrection, she should now think of her brother as living still, never dying, because he had believed in Christ. The transition from vain fruitless regrets to this assured faith, accounts it may be for the words spoken by her at the sepulchre (ver. 39). We judge wrongly of her if we see in them the utterance of an impatient or despondent unbelief. The thought of that true victory over death has comforted her, and she is no longer expecting that the power of the eternal life will show itself in the renewal of the earthly. The wonder that followed, no less than the tears which preceded, taught her how deeply her Lord sympathised with the passionate human sorrows of which He must seemed to her so unmindful. It taught her, as it teaches us, that the eternal life in which she had learnt to believe was no absorption of the individual being in that of the spirit of the universe—that it recognised and embraced all true and pure affections.

Her name appears once again in the N. T. She is present at the supper at Bethany as "serving" (John xii. 2). The old character shows itself still, but it has been freed from evil. She is no longer "cumbered," no longer impatient. Activity has been calmed by trust. When other voices are raised against her sister's overflowing love, hers is not heard among them.

The traditions connected with Martha have been already mentioned. [LAZARUS.] She goes with her brother and other disciples to Marseilles, gathers round her a society of devout women, and, true to her former character, leads them to a life of active ministration. The wilder Provençal legends make her victorious over a dragon that laid waste the country. The town of Tarascon boasted of possessing her remains, and claimed her as its patron-saint (*Acta Sanctorum*, and *Brev. Rom.* in Jul. 29: Fabricii, *Luz Evangel.* p. 388). [E. H. P.]

MARY OF CLEOPHAS. So in A. V., but accurately "of CLOPAS" (Μαρία ἡ τοῦ Κλωπᾶ). In St. John's Gospel we read that "there stood by the cross of Jesus His mother, and His mother's sister, Mary of Clopas, and Mary Magdalene" (John xix. 25). The same group of women is described by St. Matthew as consisting of Mary Magdalene, and Mary of James and Joses, and the mother of Zebedee's children" (Matt. xxvii. 56); and by St. Mark, as "Mary Magdalene, and Mary of James the Little and of Joses, and Salome"[a] (Mark xv. 40). From a comparison of these passages, it appears that Mary of Clopas, and Mary of James the Little and of Joses, are the same person, and that she was the sister of St. Mary the Virgin. The arguments, preponderating on the affirmative side, for this Mary being (according to the A. V. translation), the *wife* of Clopas or Alphaeus, and the *mother* of James the Little, Joses, Jude, Simon, and their sisters, have been given under the heading JAMES. There is an apparent difficulty in the fact of two sisters seeming to bear the name of Mary. To escape this difficulty, it has been suggested (1) that the two clauses "his mother's sister" and "Mary of Clopas," are not in apposition, and that St. John meant to designate four persons as present—namely, the mother of Jesus; her sister, to whom he does not assign any name; Mary of Clopas; and Mary Magdalene (Lange). And it has been further suggested that this sister's name was Salome, wife of Zebedee (Wieseler). This is avoiding, not solving a difficulty. St. John could not have expressed himself as he does had he meant

[a] The form of the expression "Mary of Clopas," "Mary of James," in its more colloquial form "Clopas' Mary," "James' Mary" is familiar to every one acquainted with English village life. It is still a common thing for the unmarried, and sometimes for the married women of the labouring classes in a country town or village, to be distinguished from their namesakes, not by their surnames, but by the name of their father or husband, or son, *e. g.* "William's Mary," "John's Mary," &c.

more than three persons. It has been suggested (2) that the word ἀδελφή is not here to be taken in its strict sense, but rather in the laxer acceptation, which it clearly does bear in other places. Mary, wife of Clopas, it has been said, was not the sister, but the cousin of St. Mary the Virgin (see Wordsworth, *Gk. Test.*, Preface to the Epistle of St. James). There is nothing in this suggestion which is objectionable, or which can be disproved. But it appears unnecessary and unlikely: unnecessary, because the fact of two sisters having the same name, though unusual, is not singular; and unlikely, because we find the two families so closely united—living together in the same house, and moving about together from place to place—that we are disposed rather to consider them connected by the nearer than the more distant tie. That it is far from impossible for two sisters to have the same name, may be seen by any one who will cast his eye over Betham's Genealogical Tables. To name no others, his eye will at once light on a pair of Antonias and a pair of Octavias, the daughters of the same father, and in one case of different mothers, in the other of the same mother. If it be objected that these are merely gentilic names, another table will give two Cleopatras. It is quite possible too that the same cause which operates at present in Spain, may have been at work formerly in Judea. MIRIAM, the sister of Moses, may have been the holy woman after whom Jewish mothers called their daughters, just as Spanish mothers not unfrequently give the name of Mary to their children, male and female alike, in honour of St. Mary the Virgin.[b] This is on the hypothesis that the two names are identical, but on a close examination of the Greek text, we find that it is possible that this was not the case. St Mary the Virgin is **Μαριάμ**; her sister is **Μαρία**. It is more than possible that these names are the Greek representatives of two forms which the antique מִרְיָם had then taken; and as in pronunciation, the emphasis would have been thrown on the last syllable in **Μαριάμ**, while the final letter in **Μαρία** would have been almost unheard, there would, upon this hypothesis, have been a greater difference in the sisters' names than there is between Mary and Maria among ourselves.[c]

Mary of Clopas was probably the elder sister of the Lord's mother. It would seem that she had married Clopas or Alphæus while her sister was still a girl. She had four sons, and at least three daughters. The names of the daughters are unknown to us: those of the sons are James, Joses, Jude, Simon, two of whom became enrolled among the twelve apostles [JAMES], and a third (Simon), may have succeeded his brother in the charge of the Church of Jerusalem. Of Joses and the daughters we know nothing. Mary herself is brought before us for the first time on the day of the Crucifixion—in the parallel passages already quoted from St. Matthew, St. Mark, and St. John. In the evening of the same day we find her sitting immediately at the tomb with Mary Magdalene (Matt. xxvii. 61; Mark xv. 47), and at the dawn of Easter morning she was again there with sweet spices, which she had prepared on the Friday night (Matt. xxviii. 1; Mark xvi. 1; Luke xxiii. 56), and was one of those who had "a vision of angels, which said that He was alive" (Luke xxiv. 23). These are all the glimpses that we have of her. Clopas or Alphaeus is not mentioned at all, except as designating Mary and James. It is probable that he was dead before the ministry of our Lord commenced. Joseph the husband of St. Mary the Virgin, was likewise dead; and the two widowed sisters, as was natural, both for comfort and for protection, were in the custom of living together in one house. Thus the two families came to be regarded as one, and the children of Mary and Clopas were called the brothers and sisters of Jesus. How soon the two sisters commenced living together cannot be known. It is possible that her sister's house at Nazareth was St. Mary's home at the time of her marriage, for we never hear of the Virgin's parents. Or it may have been on their return from Egypt to Nazareth that Joseph and Mary took up their residence with Mary and Clopas. But it is more likely that the union of the two households took place after the death of Joseph and of Clopas. In the second year of our Lord's ministry, we find that they had been so long united as to be considered one by their fellow townsmen (Matt. xiii. 55) and other Galileans (Matt. xii. 47). At whatever period it was that this joint housekeeping commenced, it would seem to have continued at Nazareth (Matt. xiii. 55) and at Capernaum (John ii. 12), and elsewhere, till St. John took St. Mary the Virgin to his own home in Jerusalem, A.D. 30. After this time Mary of Clopas would probably have continued living with St. James the Little and her other children at Jerusalem until her death. The fact of her name being omitted on all occasions on which her children and her sister are mentioned, save only on the days of the Crucifixion and the Resurrection, would indicate a retiring disposition, or perhaps an advanced age. That his cousins were older than Jesus, and consequently that their mother was the elder sister of the Virgin, may be gathered as likely from Mark iii. 21, as it is not probable that if they had been younger than Jesus, they would have ventured to have attempted to interfere by force with Him for over-exerting Himself, as they thought, in the prosecution of His ministry. We may note that the Gnostic legends of the early ages, and the mediaeval fables and revelations alike refuse to acknowledge the existence of a sister of St. Mary, as interfering with the miraculous conception and birth of the latter. [F. M.]

MARY MAG'DALENE (**Μαρία ἡ Μαγδαληνή**: *Maria Magdalene*). Four different explanations have been given of this name. (1) That which at first suggests itself as the most natural, that she came from the town of Magdala. The statement that the women with whom she journeyed, followed Jesus in Galilee (Mark xv. 41),

[b] **Maria**, Maria-Pia, and Maria-Immacolata, are the first names of three of the sisters of the late king of the Two Sicilies.

[c] The ordinary explanation that **Μαριάμ** is the Hebraic form, and **Μαρία** the Greek form, and that the difference is in the use of the Evangelists, not in the name itself, seems scarcely adequate: for why should the Evangelists constantly employ the Hebraic form when writing of St. Mary the Virgin, and the Greek form when writing about all the other Maries in the Gospel history? It is true that this distinction is not constantly observed in the readings of the Codex Vaticanus, the Codex Ephraemi, and a few other MSS.; but there is sufficient agreement in the majority of the Codices to determine the usage. That it is possible for a name to develop into several kindred forms, and for these forms to be considered sufficiently distinct appellations for two or more brothers or sisters, is evidenced by our daily experience.

agrees with this notion. (2) Another explanation has been found in the fact that the Talmudic writers in their calumnies against the Nazarenes make mention of a Miriam Megaddela (מגדלא), and deriving that word from the Piel of גָּדַל, to twine, explain it as meaning "the twiner or plaiter of hair." They connect with this name a story which will be mentioned later; but the derivation has been accepted by Lightfoot (*Hor. Heb.* on Matt. xxvi. 56; *Harm. Evang.* on Luke viii. 3) as satisfactory, and pointing to the previous worldliness of "Miriam with the braided locks," as identical with "the woman that was a sinner" of Luke vii. 37. It has been urged in favour of this, that the ἡ καλουμένη of Luke viii. 3, implies something peculiar, and is not used where the word that follows points only to origin or residence. (3) Either seriously, or with the patristic fondness for *paronomasia*, Jerome sees in her name, and in that of her town, the old Migdol (= a watch-tower), and dwells on the coincidence accordingly. The name denotes the stedfastness of her faith. She is "vere πυργίτης, vere turris candoris et Libani, quae prospicit in faciem Damasci" (*Epist. ad Principiam*).[a] He is followed in this by later Latin writers, and the pun forms the theme of a panegyric sermon by Odo of Clugni (*Acta Sanctorum*, Antwerp, 1727, July 12). (4) Origen, lastly, looking to the more common meaning of גָּדַל (*gâdal*, to be great), sees in her name a prophecy of her spiritual greatness as having ministered to the Lord, and been the first witness of His resurrection (*Tract. in Matt.* xxxv.). It will be well to get a firm standing-ground in the facts that are definitely connected in the N. T. with Mary Magdalene before entering on the perplexed and bewildering conjectures that gather round her name.

I. She comes before us for the first time in Luke viii. 2. It was the custom of Jewish women (Jerome on 1 Cor. ix. 5) to contribute to the support of Rabbis whom they reverenced, and in conformity with that custom, there were among the disciples of Jesus, women who "ministered unto Him of their substance." All appear to have occupied a position of comparative wealth. With all the chief motive was that of gratitude for their deliverance from "evil spirits and infirmities." Of Mary it is said specially that "seven devils (δαιμόνια) went out of her," and the number indicates, as in Matt. xii. 45, and the "Legion" of the Gadarene demoniac (Mark v. 9), a *possession* of more than ordinary malignity. We must think of her, accordingly as having had, in their most aggravated forms, some of the phenomena of mental and spiritual disease which we meet with in other demoniacs, the wretchedness of despair, the divided consciousness, the preternatural frenzy, the long-continued fits of silence. The appearance of the same description in Mark xvi. 9 (whatever opinion we may form as to the authorship of the closing section of that Gospel), indicates that this was the fact most intimately connected with her name in the minds of the early disciples. From that state of misery she had been set free by the presence of the Healer, and, in the absence, as we may infer, of other ties and duties, she found her safety and her blessedness in following Him. The silence of the Gospels as to the presence of these women at other periods of the Lord's ministry, makes it probable that they attended on Him chiefly in His more solemn progresses through the towns and villages of Galilee, while at other times he journeyed to and fro without any other attendants than the Twelve, and sometimes without even them. In the last journey to Jerusalem, to which so many had been looking with eager expectation, they again accompanied Him (Matt. xxvii. 55; Mark xv. 41; Luke xxiii. 55, xxiv. 10). It will explain much that follows if we remember that this life of ministration must have brought Mary Magdalene into companionship of the closest nature with Salome the mother of James and John (Mark xv. 40), and even also with Mary the mother of the Lord (John xix. 25). The women who thus devoted themselves are not prominent in the history: we have no record of their mode of life, or abode, or hopes or fears during the few momentous days that preceded the crucifixion. From that hour, they come forth for a brief two days' space into marvellous distinctness. They "stood afar off, beholding these things" (Luke xxiii. 49) during the closing hours of the Agony on the Cross. Mary Magdalene, Mary the mother of the Lord, and the beloved disciple were at one time not afar off, but close to the cross, within hearing. The same close association which drew them together there is seen afterwards. She remains by the cross till all is over, waits till the body is taken down, and wrapped in the linen-cloth and placed in the garden-sepulchre of Joseph of Arimathea. She remains there in the dusk of the evening watching what she must have looked on as the final resting-place of the Prophet and Teacher whom she had honoured (Matt. xxvii. 61; Mark xv. 47; Luke xxiii. 55). Not to her had there been given the hope of the Resurrection. The disciples to whom the words that spoke of it had been addressed had failed to understand them, and were not likely to have reported them to her. The sabbath that followed brought an enforced rest, but no sooner is the sunset over than she, with *Salome* and Mary the mother of James, "brought sweet spices that they might come and anoint" the body, the interment of which on the night of the crucifixion they looked on as hasty and provisional (Mark xvi. 1).

The next morning accordingly, in the earliest dawn (Matt. xxviii. 1; Mark xvi. 2) they come with Mary the mother of James, to the sepulchre. It would be out of place to enter here into the harmonistic discussions which gather round the history of the Resurrection. As far as they connect themselves with the name of Mary Magdalene, the one fact which St. John records is that of the chiefest interest. She had been to the tomb and had found it empty, had seen the "vision of angels" (Matt. xxviii. 5; Mark xvi. 5). To her, however, after the first moment of joy, it had seemed to be but a vision. She went with her cry of sorrow to Peter and *John* (let us remember that *Salome* had been with her), "they have taken away the Lord out of the sepulchre, and we know not where they have laid Him" (John xx. 1, 2). But she returns there. She follows Peter and John, and remains when they go back. The one thought that fills her mind is still that the body is not there. She has been robbed of that task of reverential love on which she had set her heart. The words of the angels can call out no other answer than that—"They have taken away my Lord, and I know not where they have laid Him" (John xx. 13). This intense

[a] The writer is indebted for this quotation, and for one or two references in the course of the article, to the kindness of Mr. W. A. Wright.

brooding over one fixed thought was, we may venture to say, to one who had suffered as she had suffered, full of special danger, and called for a special discipline. The spirit must be raised out of its blank despair, or else the "seven devils" might come in once again, and the last state be worse than the first. The utter stupor of grief is shown in her want of power to recognise at first either the voice or the form of the Lord to whom she had ministered (John xx. 14, 15). At last her own name uttered by that voice as she had heard it uttered, it may be, in the hour of her deepest misery, recalls her to consciousness; and then follows the cry of recognition, with the strongest word of reverence which a woman of Israel could use, "Rabboni," and the rush forward to cling to His feet. That, however, is not the discipline she needs. Her love had been too dependent on the visible presence of her Master. She had the same lesson to learn as the other disciples. Though they had "known Christ after the flesh," they were "henceforth to know Him so no more." She was to hear that truth in its highest and sharpest form. "Touch me not, for I am not yet ascended to my Father." For a time, till the earthly affection had been raised to a heavenly one, she was to hold back. When He had finished His work and had ascended to the Father, there should be no barrier then to the fullest communion that the most devoted love could crave for. Those who sought, might draw near and touch Him then. He would be one with them, and they one with Him.—It was fit that this should be the last mention of Mary. The Evangelist, whose position, as the son of Salome, must have given him the fullest knowledge at once of the facts of her after-history, and of her inmost thoughts, bore witness by his silence, in this case as in that of Lazarus, to the truth that lives, such as theirs, were thenceforth "hid with Christ in God."

II. What follows will show how great a contrast there is between the spirit in which he wrote and that which shows itself in the later traditions. Out of these few facts there rise a multitude of wild conjectures; and with these there has been constructed a whole romance of hagiology.

The questions which meet us connect themselves with the narratives in the four Gospels of women who came with precious ointment to anoint the feet or the head of Jesus. Each Gospel contains an account of one such anointing; and men have asked, in endeavouring to construct a harmony, "Do they tell us of four distinct acts, or of three, or of two, or of one only? On any supposition but the last, are the distinct acts performed by the same or by different persons; and if by different, then by how many? Further, have we any grounds for identifying Mary Magdalene with the woman or with any one of the women whose acts are thus brought before us?" This opens a wide range of possible combinations, but the limits of the inquiry may, without much difficulty, be narrowed. Although the opinion seems to have been at one time maintained (Origen, *Tract. in Matt.* xxv.), few would now hold that Matt. xxvi. and Mark xiv. are reports of two distinct events. Few, except critics bent like Schleiermacher and Strauss on getting up a case against the historical veracity of the Evangelists, could persuade themselves that the narrative of Luke vii., differing as it does in well-nigh every circumstance, is but a misplaced and embellished version of the incident which the first two Gospels connect with the last week of our Lord's ministry. The supposition that there were three anointings has found favour with Origen (*l. c.*) and Lightfoot (*Harm. Evang.* in loc., and *Hor. Heb.* in Matt. xxvi.); but while, on the one hand, it removed some harmonistic difficulties, there is, on the other, something improbable to the verge of being inconceivable, in the repetition within three days of the same scene, at the same place, with precisely the same murmur and the same reproof. We are left to the conclusion adopted by the great majority of interpreters, that the Gospels record two anointings, one in some city unnamed (Capernaum or Nain have been suggested) during our Lord's Galilean ministry (Luke vii.), the other at Bethany, before the last entry into Jerusalem (Matt. xxvi.; Mark xiv.; John xii.). We come, then, to the question whether in these two narratives we meet with one woman or with two. The one passage adduced for the former conclusion is John xi. 2. It has been urged (Maldonatus *in Matt.* xxvi. and *Joan.* xi. 2, *Acta Sanctorum*, July 22nd) that the words which we find there ("It was that Mary which anointed the Lord with ointment whose brother Lazarus was sick") could not possibly refer by anticipation to the history which was about to follow in ch. xii., and must therefore presuppose some fact known through the other Gospels to the Church at large, and that fact, it is inferred, is found in the history of Luke vii. Against this it has been said on the other side, that the assumption thus made is entirely an arbitrary one, and that there is not the slightest trace of the life of Mary of Bethany ever having been one of open and flagrant impurity.[b]

There is, therefore, but slender evidence for the assumption that the two anointings were the acts of one and the same woman, and that woman the sister of Lazarus. There is, if possible, still less for the identification of Mary Magdalene with the chief actor in either history. (1.) When her name appears in Luke viii. 3 there is not one word to connect it with the history that immediately precedes. Though possible, it is at least unlikely that such an one as the "sinner" would at once have been received as the chosen companion of Joanna and Salome and have gone from town to town with them and the disciples. Lastly, the description that *is* given—"Out of whom went seven devils"—points, as has been stated, to a form of suffering all but absolutely incompatible with the life implied in ἁμαρτωλός, and to a very different work of healing from that of the divine words of pardon—"Thy sins be forgiven thee." To say, as has been said, that the "seven devils" are the "many sins" (Greg. Mag. *Hom. in Evang.* 25 and 53), is to identify two things which are separated in the whole tenor of the N. T. by the clearest line of demarcation. The argument that because Mary Magdalene is mentioned so soon afterwards she must be the same as the woman of

[b] The difficulty is hardly met by the portentous conjecture of one commentator, that the word ἁμαρτωλός does not mean what it is commonly supposed to mean, and that the "many sins" consisted chiefly (as the name Magdalene, according to the etymology noticed above, implies) in her giving too large a portion of the Sabbath to the braiding or plaiting of her hair (!). Lamy in Lampe on John xii. 2.

Luke vii. (Butler's *Lives of the Saints*, July 22), is simply puerile. It would be just as reasonable to identify "the sinner" with Susanna. Never, perhaps, has a figment so utterly baseless obtained so wide an acceptance as that which we connect with the name of the "penitent Magdalene." It is to be regretted that the chapter-heading of the A. V. of Luke vii. should seem to give a quasi-authoritative sanction to a tradition so utterly uncertain, and that it should have been perpetuated in connexion with a great work of mercy. (2.) The belief that Mary of Bethany and Mary Magdalene are identical is yet more startling. Not one single circumstance, except that of love and reverence for their Master, is common. The epithet Magdalene, whatever may be its meaning, seems chosen for the express purpose of distinguishing her from all other Maries. No one Evangelist gives the slightest hint of identity. St. Luke mentions Martha and her sister Mary in x. 38, 39, as though neither had been named before. St. John, who gives the fullest account of both, keeps their distinct individuality most prominent. The only *simulacrum* of an argument on behalf of the identity is that, if we do not admit it, we have no record of the sister of Lazarus having been a witness of the resurrection.

Nor is this lack of evidence in the N.T. itself compensated by any such weight of authority as would indicate a really trustworthy tradition. Two of the earliest writers who allude to the histories of the anointing—Clement of Alexandria (*Paedag.* ii. 8) and Tertullian (*de Pudic.* ch. 8)—say nothing that would imply that they accepted it. The language of Irenaeus (iii. 4) is against it. Origen (*l. c.*) discusses the question fully, and rejects it. He is followed by the whole succession of the expositors of the Eastern Church: Theophilus of Antioch, Macarius, Chrysostom, Theophylact. The traditions of that Church, when they wandered into the regions of conjecture, took another direction, and suggested the identity of Mary Magdalene with the daughter of the Syro-Phoenician woman of Mark vii. 26 (Nicephorus, *H. E.* i. 33). In the Western Church, however, the other belief began to spread. At first it is mentioned hesitatingly, as by Ambrose (*de Virg. Vel.* and *in Luc.* lib. vi.), Jerome (*in Matt.* xxvi. 2; *contr. Jovin.* c. 16). Augustine at one time inclines to it (*de Consens. Evang. c.* 69), at another speaks very doubtingly (*Tract. in Joann.* 49). At the close of the first great period of Church history, Gregory the Great takes up both notions, embodies them in his Homilies (*in Ev.* 25, 53), and stamps them with his authority. The reverence felt for him, and the constant use of his works as a text-book of theology during the whole mediaeval period, secured for the hypothesis a currency which it never would have gained on its own merits. The services of the feast of St. Mary Magdalene were constructed on the assumption of its truth (*Brev. Rom. in Jul.* 22). Hymns and paintings and sculptures fixed it deep in the minds of the Western nations, France and England being foremost in their reverence for the saint whose history appealed to their sympathies. (See below.) Well-nigh all ecclesiastical writers, after the time of Gregory the Great (Albert the Great and Thomas Aquinas are exceptions), take it for granted. When it was first questioned by Fevre d'Etaples (Faber Stapulensis) in the early Biblical criticism of the 16th century, the new opinion was formally condemned by the Sorbonne (*Acta Sanctorum*, l. c.), and denounced by Bishop Fisher of Rochester. The Prayer-Book of 1549 follows in the wake of the Breviary; but in that of 1552, either on account of the uncertainty or for other reasons, the feast disappears. The Book of Homilies gives a doubtful testimony. In one passage the "sinful woman" is mentioned without any notice of her being the same as the Magdalene (*Serm. on Repentance*, Part ii.); in another it depends upon a comma whether the two are distinguished or identified (*Ibid.* Part ii.). The translators under James I., as has been stated, adopted the received tradition. Since that period there has been a gradually accumulating *consensus* against it. Calvin, Grotius, Hammond, Casaubon, among older critics, Bengel, Lampe, Gresswell, Alford, Wordsworth, Stier, Meyer, Ellicott, Olshausen, among later, agree in rejecting it. Romanist writers even (Tillemont, Dupin, Estius) have borne their protest against it in whole or in part; and books that represent the present teaching of the Gallican Church reject entirely the identification of the two Maries as an unhappy mistake (Migne, *Dict. de la Bible*). The mediaeval tradition has, however, found defenders in Baronius, the writers of the *Acta Sanctorum*, Maldonatus, Bishop Andrewes, Lightfoot, Isaac Williams, and Dr. Pusey.

It remains to give the substance of the legend formed out of these combinations. At some time before the commencement of our Lord's ministry, a great sorrow fell upon the household of Bethany. The younger of the two sisters fell from her purity and sank into the depths of shame. Her life was that of one possessed by the "seven devils" of uncleanness. From the city to which she then went, or from her harlot-like adornments, she was known by the new name of Magdalene. Then she hears of the Deliverer, and repents and loves and is forgiven. Then she is received at once into the fellowship of the holy women and ministers to the Lord, and is received back again by her sister and dwells with her, and shows that she has chosen the good part. The death of Lazarus and his return to life are new motives to her gratitude and love; and she shows them, as she had shown them before, anointing no longer the feet only, but the head also of her Lord. She watches by the cross, and is present at the sepulchre and witnesses the resurrection. Then (the legend goes on, when the work of fantastic combination is completed), after some years of waiting, she goes with Lazarus and Martha and Maximin (one of the Seventy) to Marseilles [comp. LAZARUS]. They land there; and she, leaving Martha to more active work, retires to a cave in the neighbourhood of Arles, and there leads a life of penitence for thirty years. When she dies a church is built in her honour, and miracles are wrought at her tomb. Clovis the Frank is healed by her intercession, and his new faith is strengthened; and the chivalry of France does homage to her name as to that of the greater Mary.

Such was the full-grown form of the Western story. In the East there was a different tradition. Nicephorus (*H. E.* ii. 10) states that she went to Rome to accuse Pilate for his unrighteous judgment; Modestus, patriarch of Constantinople (*Hom. in Marias*), that she came to Ephesus with the Virgin and St. John, and died and was buried there. The Emperor Leo the Philosopher (circ. 890) brought her body from that city to Constantinople (*Acta Sanctorum*, l. c.).

The name appears to have been conspicuous

enough, either among the living members of the Church of Jerusalem or in their written records, to attract the notice of their Jewish opponents. The Talmudists record a tradition, confused enough, that Stada or Satda, whom they represent as the mother of the Prophet of Nazareth, was known by this name as a "plaiter or twiner of hair;" that she was the wife of Paphus Ben-Jehudah, a contemporary of Gamaliel, Joshua, and Akiba; and that she grieved and angered him by her wantonness. Lightfoot, *Hor. Heb.* on Matt. xxvi., *Harm. Evang.* on Luke viii. 3). It seems, however, from the fuller report given by Eisenmenger, that there were two women to whom the Talmudists gave this name, and the wife of Paphus is not the one whom they identified with the Mary Magdalene of the Gospels (*Entdeckt. Judenth.* i. 277).

There is lastly the strange supposition (rising out of an attempt to evade some of the harmonistic difficulties of the resurrection history) that there were two women both known by this name, and both among those who went early to the sepulchre (Lange, *Comm.* in Joann.; Ambrose, *Comm.* in Luc. x. 24). [E. H. P.]

MARY, MOTHER OF MARK. The woman known by this description must have been among the earliest disciples. We learn from Col. iv. 10 that she was sister to Barnabas, and it would appear from Acts iv. 37, xii. 12, that, while the brother gave up his land and brought the proceeds of the sale into the common treasury of the Church, the sister gave up her house to be used as one of its chief places of meeting. The fact that Peter goes to that house on his release from prison, indicates that there was some special intimacy (Acts xii. 12) between them, and this is confirmed by the language which he uses towards Mark as being his "son" (1 Pet. v. 13). She, it may be added, must have been like Barnabas of the tribe of Levi, and may have been connected, as he was, with Cyprus (Acts iv. 36). It has been surmised that filial anxiety about her welfare during the persecutions and the famine which caused the Church at Jerusalem, was the chief cause of Mark's withdrawal from the missionary labours of Paul and Barnabas. The tradition of a later age represented the place of meeting for the disciples, and therefore probably the house of Mary, as having stood on the upper slope of Zion, and affirmed that it had been the scene of the wonder of the day of Pentecost, had escaped the general destruction of the city by Titus, and was preserved as a church in the 4th century (Epiphan. *Haeres. et Mens.* xiv.; Cyril Hierosol. *Catech.* xvi.). [E. H. P.]

MARY, SISTER OF LAZARUS. For all the information connected with this name, see LAZARUS and MARY MAGDALENE. The facts strictly personal to her are but few. She and her sister Martha, appear in Luke x. 40, as receiving Jesus in their house. The contrasted temperaments of the two sisters have been already in part discussed [MARTHA]. Mary sat listening eagerly to every word that fell from the Divine Teacher. She had chosen the good part, the life that has unity, the "one thing needful," in rising from the earthly to the heavenly, no longer distracted by the "many things" of earth. The same character shows itself in the history of John xi. She is deeper but less active. She sits still in the house. She will not go to meet the friends who come on the formal visit of consolation. But when her sister tells her secretly "The Master is come and calleth for thee," she rises quickly and goes forth at once (John xi. 20, 28). Those who have watched the depth of her grief have but one explanation for the sudden change: "She goeth to the grave to weep there!" Her first thought when she sees the Teacher in whose power and love she had trusted, is one of complaint. "She fell down at his feet, saying, Lord if thou hadst been here, my brother had not died." Up to this point, her relation to the Divine Friend had been one of reverence, receiving rather than giving, blessed in the consciousness of His favour. But the great joy and love which her brother's return to life calls up in her, pour themselves out in larger measure than had been seen before. The treasured alabaster-box of ointment is brought forth at the final feast of Bethany, John xii. 3. St. Matthew and St. Mark keep back her name. St. John records it as though the reason for the silence held good no longer. Of her he had nothing more to tell. The education of her spirit was completed. The love which had been recipient and contemplative shows itself in action.

Of her after-history we know nothing. The ecclesiastical traditions about her are based on the unfounded hypothesis of her identity with Mary Magdalene. [E. H. P.]

MARY THE VIRGIN (Μαριάμ: on the form of the name see p. 255). There is no person perhaps in sacred or in profane literature, around whom so many legends have been grouped as the Virgin Mary; and there are few whose authentic history is more concise. The very simplicity of the evangelical record has no doubt been one cause of the abundance of the legendary matter of which she forms the central figure. Imagination had to be called in to supply a craving which authentic narrative did not satisfy. We shall divide her life into three periods. I. The period of her childhood, up to the time of the birth of our Lord. II. The period of her middle age contemporary with the Bible record. III. The period subsequent to the Ascension. The first and last of these are wholly legendary, except in regard to one fact mentioned in the Acts of the Apostles; the second will contain her real history. For the first period we shall have to rely on the early apocryphal gospels; for the second on the Bible; for the third on the traditions and tales which had an origin external to the Church, but after a time were transplanted within her boundaries, and there flourished and increased both by the force of natural growth, and by the accretions which from time to time resulted from supposed visions and revelations.

I. *The childhood of Mary, wholly legendary.*—Joachim and Anna were both of the race of David. The abode of the former was Nazareth; the latter passed her early years at Bethlehem. They lived piously in the sight of God, and faultlessly before man, dividing their substance into three portions, one of which they devoted to the service of the temple, another to the poor, and the third to their own wants. And so twenty years of their life passed silently away. But at the end of this period Joachim went to Jerusalem with some others of his tribe, to make his usual offering at the Feast of the Dedication. And it chanced that Issachar was high-priest (Gospel of Birth of Mary), that Reuben was high-priest (Protevangelion). And the high-priest

scorned Joachim, and drove him roughly away, asking how he dared to present himself in company with those who had children, while he had none; and he refused to accept his offerings until he should have begotten a child, for the Scripture said, "Cursed is every one who does not beget a man-child in Israel." And Joachim was shamed before his friends and neighbours, and he retired into the wilderness and fixed his tent there, and fasted forty days and forty nights. And at the end of this period an angel appeared to him, and told him that his wife should conceive, and should bring forth a daughter, and he should call her name Mary. Anna meantime was much distressed at her husband's absence, and being reproached by her maid Judith with her barrenness, she was overcome with grief of spirit. And in her sadness she went into her garden to walk, dressed in her wedding-dress. And she sat down under a laurel-tree, and looked up and spied among the branches a sparrow's nest, and she bemoaned herself as more miserable than the very birds, for they were fruitful and she was barren; and she prayed that she might have a child even as Sarai was blessed with Isaac. And two angels appeared to her, and promised her that she should have a child who should be spoken of in all the world. And Joachim returned joyfully to his home, and when the time was accomplished, Anna brought forth a daughter, and they called her name Mary. Now the child Mary increased in strength day by day, and at nine months of age she walked nine steps. And when she was three years old her parents brought her to the Temple, to dedicate her to the Lord. And there were fifteen stairs up to the Temple, and while Joseph and Mary were changing their dress, she walked up them without help; and the high-priest placed her upon the third step of the altar, and she danced with her feet, and all the house of Israel loved her. Then Mary remained at the Temple until she was twelve (Prot.) fourteen (G. B. M.) years old, ministered to by the angels, and advancing in perfection as in years. At this time the high-priest commanded all the virgins that were in the Temple to return to their homes and to be married. But Mary refused, for she said that she had vowed virginity to the Lord. Thus the high-priest was brought into a perplexity, and he had recourse to God to enquire what he should do. Then a voice from the ark answered him (G. B. M.), an angel spake unto him (Prot.); and they gathered together all the widowers in Israel (Prot.), all the marriageable men of the house of David (G. B. M.), and desired them to bring each man his rod. And amongst them came Joseph and brought his rod, but he shunned to present it, because he was an old man and had children. Therefore the other rods were presented and no sign occurred. Then it was found that Joseph had not presented his rod; and behold, as soon as he had presented it, a dove came forth from the rod and flew upon the head of Joseph (Prot.); a dove came from heaven and pitched on the rod (G. B. M.). And Joseph, in spite of his reluctance, was compelled to betroth himself to Mary, and he returned to Bethlehem to make preparations for his marriage (G. B. M.); he betook himself to his occupation of building houses (Prot.); while Mary went back to her parents' house in Galilee. Then it chanced that the priests needed a new veil for the Temple, and seven virgins cast lots to make different parts of it; and the lot to spin the true purple fell to Mary. And she went out with a pitcher to draw water. And she heard a voice, saying unto her, "Hail, thou that art highly favoured, the Lord is with thee. Blessed art thou among women!" and she looked round with trembling to see whence the voice came, and she laid down the pitcher and went into the house and took the purple and sat down to work at it. And behold the angel Gabriel stood by her and filled the chamber with prodigious light, and said, "Fear not," &c. And when Mary had finished the purple, she took it to the high-priest; and having received his blessing, went to visit her cousin Elizabeth, and returned back again.[a] Then Joseph returned to his home from building houses (Prot.); came into Galilee, to marry the Virgin to whom he was betrothed (G. B. M.), and finding her with child, he resolved to put her away privily: but being warned in a dream, he relinquished his purpose, and took her to his house. Then came Annas the scribe to visit Joseph, and he went back and told the priest that Joseph had committed a great crime, for he had privately married the Virgin whom he had received out of the Temple, and had not made it known to the children of Israel. And the priest sent his servants, and they found that she was with child; and he called them to him, and Joseph denied that the child was his, and the priest made Joseph drink the bitter water of trial (Num. v. 18), and sent him to a mountainous place to see what would follow. But Joseph returned in perfect health, so the priest sent them away to their home. Then after three months Joseph put Mary on an ass to go to Bethlehem to be taxed: and as they were going, Mary besought him to take her down, and Joseph took her down and carried her into a cave, and leaving her there with his sons he went to seek a midwife. And as he went he looked up, and he saw the clouds astonished and all creatures amazed. The fowls stopped in their flight; the working people sat at their food, but did not eat; the sheep stood still; the shepherds' lifted hands became fixed; the kids were touching the water with their mouths, but did not drink. And a midwife came down from the mountains, and Joseph took her with him to the cave, and a bright cloud overshadowed the cave, and the cloud became a great light, and when the bright light faded, there appeared an infant at the breast of Mary. Then the midwife went out and told Salome that a Virgin had brought forth, and Salome would not believe; and they came back again into the cave, and Salome received satisfaction, but her hand withered away, nor was it restored, until, by the command of an angel, she touched the child, whereupon she was straightway cured. [a] Three spots lay claim to be the scene of the Annunciation. Two of these are, as was to be expected, in Nazareth, and one, as every one knows, is in Italy. The Greeks and Latins each claim to be the guardians of the true spot in Palestine; the third claimant is the holy house of Loretto. The Greeks point out the spring of water mentioned in the Protevangelion as confirmatory of their claim. The Latins have engraved on a marble slab in the grotto of their convent in Nazareth the words *Verbum hic caro factum est*, and point out the pillar which marks the spot where the angel stood; whilst the Head of their Church is irretrievably committed to the wild legend of Loretto. (See Stanley, *S. & P.* ch. xlv).

Petrum Dorlando, appended to Ludolph of Saxony's *Vita Christi*, Lyons, 1642; and a most audacious *Historia Christi*, written in Persian by the Jesuit P. Jerome Xavier, and exposed by Louis de Dieu, Lugd. Bat. 1639).

II. *The real history of Mary.*—We now pass from legend to that period of St. Mary's life which is made known to us by Holy Scripture. In order to give a single view of all that we know of her who was chosen to be the mother of the Saviour, we shall in the present section put together the whole of her authentic history, supplementing it afterwards by the more prominent legendary circumstances which are handed down.

We are wholly ignorant of the name and occupation of St. Mary's parents. If the genealogy given by St. Luke is that of St. Mary (Greswell, &c.), her father's name was Heli, which is another form of the name given to her legendary father, Jehoiakim or Joachim. If Jacob and Heli were the two sons of Matthan or Matthat, and if Joseph, being the son of the younger brother, married his cousin, the daughter of the elder brother (Hervey, *Genealogies of our Lord Jesus Christ*), her father was Jacob. The evangelist does not tell us, and we cannot know. She was, like Joseph, of the tribe of Judah, and of the lineage of David (Ps. cxxxii. 11; Luke i. 32; Rom. i. 3). She had a sister, named probably like herself, Mary (John xix. 25) [MARY OF CLEOPHAS], and she was connected by marriage (*συγγενής*, Luke i. 36) with Elisabeth, who was of the tribe of Levi and of the lineage of Aaron. This is all that we know of her antecedents.

In the summer of the year which is known as B.C. 5, Mary was living at Nazareth, probably at her parents'—possibly at her elder sister's—house, not having yet been taken by Joseph to his home. She was at this time betrothed to Joseph, and was therefore regarded by the Jewish law and custom as his wife, though he had not yet a husband's rights over her. [MARRIAGE, p. 250, b.] At this time the angel Gabriel came to her with a message from God, and announced to her that she was to be the mother of the long-expected Messiah. He probably bore the form of an ordinary man, like the angels who manifested themselves to Gideon and to Manoah (Judg. vi., xiii.). This would appear both from the expression *εἰσελθών*, "he came in;" and also from the fact of her being troubled, not at his presence, but at the meaning of his words. The scene as well as the salutation is very similar to that recounted in the Book of Daniel, "Then there came again and touched me one like the appearance of a man, and he strengthened me, and said, O man greatly beloved, fear not: peace be unto thee, be strong, yea, be strong!" (Dan. x. 18, 19). The exact meaning of *κεχαριτωμένη* is "thou that hast bestowed upon thee a free gift of grace." The A. V. rendering of "highly favoured" is therefore very exact and much nearer to the original than the "*gratia plena*" of the Vulgate, on which a huge and wholly unsubstantial edifice has been built by Romanist devotional writers. The next part of the salutation, "The Lord is with thee," would probably have been better translated, "The Lord be with thee." It is the same salutation as that with which the angel accosts Gideon (Judg. vi. 12). "Blessed art thou among women," is nearly the same expression as that used by Ozias to Judith (Jud. xiii. 18). Gabriel proceeds to instruct Mary that by the operation of the Holy Ghost the everlasting Son of the Father should be born of her; that in Him the prophecies relative to David's throne and kingdom should be accomplished; and that His name was to be called Jesus. He further informs her, perhaps as a sign by which she might convince herself that his prediction with regard to herself would come true, that her relative Elisabeth was within three months of being delivered of a child.

The angel left Mary, and she set off to visit Elisabeth either at Hebron or Juttah (whichever way we understand the *εἰς τὴν ὀρεινὴν εἰς πόλιν Ἰούδα*, Luke i. 39), where the latter lived with her husband Zacharias, about 20 miles to the south of Jerusalem, and therefore at a very considerable distance from Nazareth. Immediately on her entrance into the house she was saluted by Elisabeth as the mother of her Lord, and had evidence of the truth of the angel's saying with regard to her cousin. She embodied her feelings of exultation and thankfulness in the hymn known under the name of the *Magnificat*. Whether this was uttered by immediate inspiration, in reply to Elisabeth's salutation, or composed during her journey from Nazareth, or was written at a later period of her three months' visit at Hebron, does not appear for certain. The hymn is founded on Hannah's song of thankfulness (1 Sam. ii. 1-10), and exhibits an intimate knowledge of the Psalms, prophetical writings, and books of Moses, from which sources almost every expression in it is drawn. The most remarkable clause, "From henceforth all generations shall call me blessed," is borrowed from Leah's exclamation on the birth of Asher (Gen. xxx. 13). The same sentiment and expression are also found in Prov. xxxi. 28; Mal. iii. 12; Jas. v. 11. In the latter place the word *μακαρίζω* is rendered with great exactness "count happy." The notion that there is conveyed in the word any anticipation of her bearing the title of "Blessed" arises solely from ignorance.

Mary returned to Nazareth shortly before the birth of John the Baptist, and continued living at her own home. In the course of a few months Joseph became aware that she was with child, and determined on giving her a bill of divorcement, instead of yielding her up to the law to suffer the penalty which he supposed that she had incurred. Being, however, warned and satisfied by an angel who appeared to him in a dream, he took her to his own house. It was soon after this, as it would seem, that Augustus' decree was promulgated, and Joseph and Mary travelled to Bethlehem to have their names enrolled in the registers (B.C. 4) by way of preparation for the taxing, which however was not completed till ten years afterwards (A.D. 6), in the governorship of Quirinus. They reached Bethlehem, and there Mary brought forth the Saviour of the world, and humbly laid him in a manger.

The visit of the shepherds, the circumcision, the adoration of the wise men, and the presentation in the Temple, are rather scenes in the life of Christ than in that of his mother. The presentation in the Temple might not take place till forty days after the birth of the child. During this period the mother, according to the law of Moses, was unclean (Lev. xii.). In the present case there could be no necessity for offering the sacrifice and making atonement beyond that of obedience to the Mosaic precept; but already He, and His mother for Him, were acting upon the principle of fulfilling all righteousness. The poverty of St. Mary and Joseph, it may be noted, is shown by their making

the offering of the poor. The song of Simeon and the thanksgiving of Anna, like the wonder of the shepherds and the adoration of the magi, only incidentally refer to Mary. One passage alone in Simeon's address is specially directed to her, "Yea a sword shall pierce through thy own soul also." The exact purport of these words is doubtful. A common patristic explanation refers them to the pang of unbelief which shot through her bosom on seeing her Son expire on the cross (Tertullian, Origen, Basil, Cyril, &c.). By modern interpreters it is more commonly referred to the pangs of grief which she experienced on witnessing the sufferings of her Son.

In the flight into Egypt, Mary and the babe had the support and protection of Joseph, as well as in their return from thence, in the following year, on the death of Herod the Great (B.C. 3).[b] It appears to have been the intention of Joseph to have settled at Bethlehem at this time, as his home at Nazareth had been broken up for more than a year; but on finding how Herod's dominions had been disposed of, he changed his mind and returned to his old place of abode, thinking that the child's life would be safer in the tetrarchy of Antipas than in that of Archelaus. It is possible that Joseph might have been himself a native of Bethlehem, and that before this time he had been only a visitor at Nazareth, drawn thither by his betrothal and marriage. In that case, his fear of Archelaus would make him exchange his own native town for that of Mary. It may be that the holy family at this time took up their residence in the house of Mary's sister, the wife of Clopas.

Henceforward, until the beginning of our Lord's ministry—*i. e.* from B.C. 3 to A.D. 26—we may picture St. Mary to ourselves as living in Nazareth, in a humble sphere of life, the wife of Joseph the carpenter, pondering over the sayings of the angels, of the shepherds, of Simeon, and those of her Son, as the latter "increased in wisdom and stature and in favour with God and man" (Luke ii. 52). Two circumstances alone, so far as we know, broke in on the otherwise even flow of the still waters of her life. One of these was the temporary loss of her Son when he remained behind in Jerusalem, A.D. 8. The other was the death of Joseph. The exact date of this last event we cannot determine. But it was probably not long after the other.

From the time at which our Lord's ministry commenced, St. Mary is withdrawn almost wholly from sight. Four times only is the veil removed, which, not surely without a reason, is thrown over her. These four occasions are,—1. The marriage at Cana of Galilee (John ii.). 2. The attempt which she and his brethren made "to speak with him" (Matt. xii. 46; Mark iii. 21 and 31; Luke viii. 19). 3. The Crucifixion. 4. The days succeeding the Ascension (Acts i. 14). If to these we add two references to her, the first by her Nazarene fellow-citizens (Matt. xiii. 54, 5; Mark vi. 1-3), the second by a woman in the multitude (Luke xi. 27), we have specified every event known to us in her life. It is noticeable that, on every occasion of our Lord's addressing her, or speaking of her, there is a sound of reproof in His words, with the exception of the last words spoken to her from the cross.

1. The marriage at Cana in Galilee took place in the three months which intervened between the baptism of Christ and the passover of the year 27. When Jesus was found by his mother and Joseph in the Temple in the year 8, we find him repudiating the name of "father" as applied to Joseph. "*Thy father* and I have sought thee sorrowing"—"How is it that ye sought me? Wist ye not that I must be about" (not Joseph's and yours, but) "my *father's* business?" (Luke ii. 48, 9). Now, in like manner, at His first miracle which inaugurates His ministry, He solemnly withdraws himself from the authority of His earthly mother. This is St. Augustine's explanation of the "What have I to do with thee? my hour is not yet come." It was His humanity not His divinity which came from Mary. While therefore He was acting in His divine character He could not acknowledge her, nor does He acknowledge her again until He was hanging on the cross, when, in that nature which He took from her, He was about to submit to death (St. Aug. *Comm. in Joan. Evang.* tract viii., vol. iii. p. 1455 ed. Migne, Paris, 1845). That the words Τί ἐμοὶ καὶ σοί; = מַה לִּי וְלָךְ, imply reproof, is certain (cf. Matt. viii. 29; Mark i. 24; and LXX., Judg. xi. 12; 1 K. xvii. 18; 2 K. iii. 13), and such is the patristic explanation of them (see Iren. *Adv. Haer.* iii. 18; *Apud Bibl. Patr. Max.* tom. ii., pt. ii. 293; S. Chrys. *Hom. in Joan.* xxi.). But the reproof is of a gentle kind (Trench, *on the Miracles*, p. 102, Lond. 1856; Alford, *Comm. in loc.*: Wordsworth, *Comm. in loc.*). Mary seems to have understood it, and accordingly to have drawn back, desiring the servants to pay attention to her divine Son (Olshausen, *Comm. in loc.*). The modern Humanist translation, "What is that to me and to thee?" is not a mistake, because it is a wilful misrepresentation (Douay version; Orsini, *Life of Mary, &c.*; see *The Catholic Layman*, p. 117 Dublin, 1852).

2. Capernaum (John ii. 12), and Nazareth (Matt. iv. 13, xiii. 54; Mark vi. 1), appear to have been the residence of St. Mary for a considerable period. The next time that she is brought before us we find her at Capernaum. It is the autumn of the year 28, more than a year and a half after the miracle wrought at the marriage feast in Cana. The Lord had in the meantime attended two feasts of the passover, and had twice made a circuit throughout Galilee, teaching and working miracles. His fame had spread, and crowds came pressing round him, so that he had not even time "to eat bread." Mary was still living with her sister, and her nephews and nieces, James, Joses, Simon, Jude, and their three sisters (Matt. xiii. 55); and she and they heard of the toils which He was undergoing, and

[b] In the Gospel of the Infancy, which seems to date from the 2nd century, innumerable miracles are made to attend on St. Mary and her Son during their sojourn in Egypt: *e. g.*, Mary looked with pity on a woman who was possessed, and immediately Satan came out of her in the form of a young man, saying, "Woe is me because of thee, Mary, and thy Son!" On another occasion they fell in with two thieves, named Titus and Dumachus; and Titus was gentle, and Dumachus was harsh: the Lady Mary therefore promised Titus that God should receive him on his right hand. And accordingly, thirty-three years afterwards, Titus was the penitent thief who was crucified on the right hand, and Dumachus was crucified on the left. These are sufficient as samples. Throughout the book we find St. Mary associated with her Son, in the strange freaks of power attributed to them, in a way which shows us whence the *cultus* of St. Mary took its origin. (See Jones, *On the New Test.*, vol. ii. Oxf. 1827; Giles, *Codex Apocryphus*; Thilo, *Codex Apocryphus*.)

they understood that He was denying himself every relaxation from His labours. Their human affection conquered their faith. They thought that He was killing Himself, and with an indignation arising from love, they exclaimed that He was beside himself, and set off to bring Him home either by entreaty or compulsion.[c] He was surrounded by eager crowds, and they could not reach Him. They therefore sent a message, begging Him to allow them to speak to Him. This message was handed on from one person in the crowd to another, till at length it was reported aloud to Him. Again He reproves. Again He refuses to admit any authority on the part of his relatives, or any privilege on account of their relationship. "Who is my mother, and who are my brethren? And He stretched forth His hand towards His disciples, and said, Behold my mother and my brethren! For whosoever shall do the will of my Father which is in heaven, the same is my brother, and sister, and mother" (Matt. xii. 48, 49). Comp. Theoph. *in Marc.* iii. 32; S. Chrys. *Hom.* xliv. in Matt.; S. Aug. *in Joan.* tract x., who all of them point out that the blessedness of St. Mary consists, not so much in having borne Christ, as in believing on Him and in obeying His words (see also *Quæst. et Resp. ad Orthod.* exxxvi., *ap. S. Just. Mart. in Bibl. Max. Patr.* tom. ii. pt. ii. p. 138). This indeed is the lesson taught directly by our Lord Himself on the next occasion on which reference is made to St. Mary. It is now the spring of the year 30, and only about a month before the time of His crucifixion. Christ had set out on His last journey from Galilee, which was to end at Jerusalem. As He passed along, He, as usual, healed the sick, and preached the glad tidings of salvation. In the midst, or at the completion, of one of His addresses, a woman of the multitude, whose soul had been stirred by His words, cried out, "Blessed is the womb that bare thee, and the paps which thou hast sucked!" Immediately the Lord replied, "Yea rather, blessed are they that hear the word of God, and keep it" (Luke xi. 27). He does not either affirm or deny anything with regard to the direct bearing of the woman's exclamation, but passes that by as a thing indifferent, in order to point out in what alone the true blessedness of His mother and of all consists. This is the full force of the μενοῦνγε, with which He commences his reply.

3. The next scene in St. Mary's life brings us to the foot of the cross. She was standing there with her sister Mary and Mary Magdalene, and Salome, and other women, having no doubt followed her Son as she was able throughout the terrible morning of Good Friday. It was about 3 o'clock in the afternoon, and He was about to give up His spirit. His divine mission was now, as it were, accomplished. While His ministry was in progress He had withdrawn Himself from her that He might do His Father's work. But now the hour was come when His human relationship might be again recognised, "Tunc enim agnovit," says St. Augustine, "quando illud quod peperit moriebatur" (S. Aug. *In Joan.* ix.). Standing near the company of the women was St. John; and, with almost His last words, Christ commended His mother to the care of him who had borne the name of the Disciple whom Jesus loved. "Woman, behold thy son." "Commendat homo homini hominem," says St. Augustine. And from that hour St. John assures us that he took her to his own abode. If by "that hour" the Evangelist means immediately after the words were spoken, Mary was not present at the last scene of all. The sword had sufficiently pierced her soul, and she was spared the hearing of the last loud cry, and the sight of the bowed head. St. Ambrose considers the chief purpose of our Lord's words to have been a desire to make manifest the truth that the Redemption was His work alone, while He gave human affection to His mother. "Non egebat adjutore ad omnium redemptionem. Suscepi: quidem matris affectum, sed non quæsivit hominis auxilium" (S. Amb. *Exp. Evang. Luc.* x. 132).

4. A veil is drawn over her sorrow and over her joy which succeeded that sorrow. Mediæval imagination has supposed, but Scripture does not state, that her Son appeared to Mary after His resurrection from the dead. (See for example Ludolph of Saxony, *Vita Christi*, p. 666, Lyons, 1642; and Ruperti, *De Divinis Officiis*, vii. 25, tom. iv. p. 92, Venice, 1751). St. Ambrose is considered to be the first writer who suggested the idea, and reference is made to his treatise, *De Virginitate*, i. 3; but it is quite certain that the text has been corrupted, and that it is of Mary Magdalene that he is there speaking. (Comp. his *Exposition of St. Luke*, x. 156. See note of the Benedictine edition, tom. ii. p. 217, Paris, 1790.) Another reference is usually given to St. Anselm. The treatise quoted is not St. Anselm's, but Eadmer's. (See Eadmer., *De Excellentia Mariæ*, ch. v., appended to Anselm's Works, p. 138, Paris, 1721.) Ten appearances are related by the Evangelists as having occurred in the 40 days intervening between Easter and Ascension Day, but none to Mary. She was doubtless living at Jerusalem with John, cherished with the tenderness which her tender soul would have specially needed, and which undoubtedly she found pre-eminently in St. John. We have no record of her presence at the Ascension. Arator, a writer of the 6th century, describes her as being at the time not on the spot, but in Jerusalem (Arat. *De Act. Apost.* l. 50, apud Migne, tom. lxviii. p. 95, Paris, 1848, quoted by Wordsworth, *Gk. Test. Com. on the Acts*, i. 14). We have no account of her being present at the descent of the Holy Spirit on the day of Pentecost. What we do read of her is, that she remained steadfast in prayer in the upper room at Jerusalem with Mary Magdalene and Salome, and those known as the Lord's brothers and the apostles. This is the last view that we have of her. Holy Scripture leaves her engaged in prayer (see Wordsworth as cited above). From this point forwards we know nothing of her. It is probable that the rest of her life was spent in Jerusalem with St. John (see Epiph. *Haer.* 78). According to one tradition the beloved disciple would not leave Palestine until she had expired in his arms (see Tholuck *Light from the Cross*, ii. *Serm.* x. p. 234, Edinb., 1857); and it is added that she lived and died in the Coenaculum in what is now the Mosque of the Tomb of David, the traditional chamber of the Last Supper (Stanley, *S. & P.* ch. xiv. p. 456). Other traditions make her journey with St. John to Ephesus, and there die in extreme old age. It was believed by some in the 5th century that she was buried at Ephesus (see *Conc. Ephes., Conc. Labb.* tom. iii. p. 574 *a*); by others, in the same century, that she was buried at Gethsemane, and this appears to have been the

[c] It is a mere subterfuge to refer the words ἔλεγον γάρ, &c., to the people, instead of to Mary and his brethren (Talmut and Migne, *Dict. of the Bible*).

mformation given to Marcian and Pulcheria by Juvenal of Jerusalem. As soon as we lose the guidance of Scripture, we have nothing from which we can derive any sure knowledge about her. The darkness in which we are left is in itself most instructive.

5. The *character* of St. Mary is not drawn by any of the Evangelists, but some of its lineaments are incidentally manifested in the fragmentary record which is given of her. They are to be found for the most part in St. Luke's Gospel, whence an attempt has been made, by a curious mixture of the imaginative and rationalistic methods of interpretation, to explain the old legend which tells us that St. Luke painted the Virgin's portrait (Calmet, Kitto, Migne, Mrs. Jameson). We might have expected greater details from St. John than from the other Evangelists; but in his Gospel we learn nothing of her except what may be gathered from the scene at Cana and at the cross. It is clear from St. Luke's account, though without any such intimation we might rest assured of the fact, that her youth had been spent in the study of the Holy Scriptures, and that she had set before her the example of the holy women of the Old Testament as her model. This would appear from the *Magnificat* (Luke i. 46). The same hymn, so far as it emanated from herself, would show no little power of mind as well as warmth of spirit. Her faith and humility exhibit themselves in her immediate surrender of herself to the Divine will, though ignorant how that will should be accomplished (Luke i. 38); her energy and earnestness, in her journey from Nazareth to Hebron (Luke i. 39); her happy thankfulness, in her song of joy (Luke i. 48); her silent musing thoughtfulness, in her pondering over the shepherds' visit (Luke ii. 19), and in her keeping her Son's words in her heart (Luke ii. 51) though she could not fully understand their import. Again, her humility is seen in her drawing back, yet without anger, after receiving reproof at Cana in Galilee (John ii. 5), and in the remarkable manner in which she shuns putting herself forward throughout the whole of her Son's ministry, or after his removal from earth. Once only does she attempt to interfere with her Divine Son's freedom of action (Matt. xii. 46; Mark iii. 31; Luke viii. 19); and even here we can hardly blame, for she seems to have been roused, not by arrogance and by a desire to show her authority and relationship, as St. Chrysostom supposes (*Hom.* xliv. *in Matt.*); but by a woman's and a mother's feelings of affection and fear for him whom she loved. It was part of that exquisite tenderness which appears throughout to have belonged to her. In a word, so far as St. Mary is pourtrayed to us in Scripture, she is, as we should have expected, the most tender, the most faithful, humble, patient, and loving of women, but a woman still.

III. *Her after life, wholly legendary.*—We pass again into the region of free and joyous legend which we quitted for that of true history at the period of the Annunciation. The Gospel record confined the play of imagination, and as soon as this check is withdrawn the legend bursts out afresh. The legends of St. Mary's childhood may be traced back as far as the third or even the second century. Those of her death are probably of a later date. The chief legend was for a length of time considered to be a veritable history, written by Melito Bishop of Sardis in the 2nd century. It is to be found in the *Bibliotheca Maxima* (tom. ii pt. ii. p. 212), entitled *Sancti Melitonis Episcopi Sardensis de Transitu Virginis Mariae Liber*, and there certainly existed a book with this title at the end of the 5th century, which was condemned by Pope Gelasius as apocryphal (Op. Gelas. apud Migne, tom. 59, p. 152). Another form of the same legend has been published at Elberfeld in 1854 by Maximilian Enger in Arabic. He supposes that it is an Arabic translation from a Syriac original. It was found in the library at Bonn, and is entitled *Joannis Apostoli de Transitu Beatae Mariae Virginis Liber*. It is perhaps the same as that referred to in Assemani (*Biblioth. Orient.* tom. iii. p. 287, Rome, 1725), under the name of *Historia Dormitionis et Assumptionis B. Mariae Virginis Joanni Evangelistae falso inscripta*. We give the substance of the legend with its main variations.

When the apostles separated in order to evangelise the world, Mary continued to live with St. John's parents in their house near the Mount of Olives, and every day she went out to pray at the tomb of Christ, and at Golgotha. But the Jews had placed a watch to prevent prayers being offered at these spots, and the watch went into the city and told the chief priests that Mary came daily to pray. Then the priests commanded the watch to stone her. But at this time king Abgarus wrote to Tiberius to desire him to take vengeance on the Jews for slaying Christ. They feared therefore to add to his wrath by slaying Mary also, and yet they could not allow her to continue her prayers at Golgotha, because an excitement and tumult was thereby made. They therefore went and spoke softly to her, and she consented to go and dwell in Bethlehem; and thither she took with her three holy virgins who should attend upon her. And in the twenty-second year after the ascension of the Lord, Mary felt her heart burn with an inexpressible longing to be with her Son; and behold an angel appeared to her, and announced to her that her soul should be taken up from her body on the third day, and he placed a palm-branch from paradise in her hands, and desired that it should be carried before her bier. And Mary besought that the apostles might be gathered round her before she died, and the angel replied that they should come. Then the Holy Spirit caught up John as he was preaching at Ephesus, and Peter as he was offering sacrifice at Rome, and Paul as he was disputing with the Jews near Rome, and Thomas in the extremity of India, and Matthew and James. these were all of the apostles who were still living, then the Holy Spirit awakened the dead, Philip and Andrew, and Luke and Simon, and Mark and Bartholomew; and all of them were snatched away in a bright cloud and found themselves at Bethlehem. And angels and powers without number descended from heaven and stood round about the house; Gabriel stood at blessed Mary's head, and Michael at her feet, and they fanned her with their wings; and Peter and John wiped away her tears; and there was a great cry, and they all said "Hail blessed one! blessed is the fruit of thy womb!" And the people of Bethlehem brought their sick to the house, and they were all healed. Then news of these things was carried to Jerusalem, and the king sent and commanded that they should bring Mary and the disciples to Jerusalem. And horsemen came to Bethlehem to seize Mary, but they did not find her, for the Holy Spirit had taken her and the

disciples in a cloud over the heads of the horsemen in Jerusalem. Then the men of Jerusalem saw angels ascending and descending at the spot where Mary's house was. And the high-priests went to the governor, and craved permission to burn her and the house with fire, and the governor gave them permission, and they brought wood and fire; but as soon as they came near to the house, behold there burst forth a fire upon them which consumed them utterly. And the governor saw these things afar off, and in the evening he brought his son, who was sick, to Mary, and she healed him.

Then, on the sixth day of the week, the Holy Spirit commanded the apostles to take up Mary, and to carry her from Jerusalem to Gethsemane, and as they went the Jews saw them. Then drew near Juphia, one of the high-priests, and attempted to overthrow the litter on which she was being carried, for the other priests had conspired with him, and they hoped to cast her down into the valley, and to throw wood upon her, and to burn her body with fire. But as soon as Juphia had touched the litter the angel smote off his arms with a fiery sword, and the arms remained fastened to the litter. Then he cried to the disciples and Peter for help, and they said, "Ask it of the Lady Mary;" and he cried, "O Lady, O Mother of Salvation, have mercy on me!" Then she said to Peter, "Give him back his arms;" and they were restored whole. But the disciples proceeded onwards, and they laid down the litter in a cave, as they were commanded, and gave themselves to prayer.

And the angel Gabriel announced that on the first day of the week Mary's soul should be removed from this world. And on the morning of that day there came Eve and Anne and Elisabeth, and they kissed Mary and told her who they were: came Adam, Seth, Shem, Noah, Abraham, Isaac, Jacob, David, and the rest of the old fathers: came Enoch and Elias and Moses: came twelve chariots of angels innumerable: and then appeared the Lord Christ in his humanity, and Mary bowed before him and said, "O my Lord and my God, place thy hand upon me;" and he stretched out his hand and blessed her; and she took his hand and kissed it, and placed it to her forehead and said, "I bow before this right hand, which has made heaven and earth and all that in them is, and I thank thee and praise thee that thou hast thought me worthy of this hour." Then she said, "O Lord, take me to thyself!" And he said to her, "Now shall thy body be in paradise to the day of the resurrection, and angels shall serve thee; but thy pure spirit shall shine in the kingdom, in the dwelling-place of my Father's fulness." Then the disciples drew near and besought her to pray for the world which she was about to leave. And Mary prayed. And after her prayer was finished her face shone with marvellous brightness, and she stretched out her hands and blessed them all; and her Son put forth his hands and received her pure soul, and bore it into his Father's treasure-house. And there was a light and a sweet smell, sweeter than anything on earth; and a voice from heaven saying, "Hail, blessed one! blessed and celebrated art thou among women!"[d]

And the apostles carried her body to the valley of Jehoshaphat, to a place which the Lord had told them of, and John went before and carried the palm-branch. And they placed her in a new tomb, and sat at the mouth of the sepulchre, as the Lord commanded them; and suddenly there appeared the Lord Christ, surrounded by a multitude of angels, and said to the apostles, "What will ye that I should do with her whom my Father's command selected out of all the tribes of Israel that I should dwell in her?" And Peter and the apostles besought him that he would raise the body of Mary and take it with him in glory to heaven. And the Saviour said, "Be it according to your word." And he commanded Michael the archangel to bring down the soul of Mary. And Gabriel rolled away the stone, and the Lord said, "Rise up, my beloved, thy body shall not suffer corruption in the tomb." And immediately Mary arose and bowed herself at his feet and worshipped; and the Lord kissed her and gave her to the angels to carry her to paradise.

But Thomas was not present with the rest, for at the moment that he was summoned to come he was baptising Polodius, who was the son of the sister of the king. And he arrived just after all these things were accomplished, and he demanded to see the sepulchre in which they had laid his Lady: "For ye know," said he, "that I am Thomas, and unless I see I will not believe." Then Peter arose in haste and wrath, and the other disciples with him, and they opened the sepulchre and went in; but they found nothing therein save that in which her body had been wrapped. Then Thomas confessed that he too, as he was being borne in the cloud from India, had seen her holy body being carried by the angels with great triumph into heaven; and that on his crying to her for her blessing, she had bestowed upon him her precious Girdle, which when the apostles saw they were glad.[e] Then the apostles were carried back each to his own place.

Joannis Apostoli de Transitu Beatae Mariae Virginis Liber, Elberfeldae, 1854; *S. Melitonis Episc. Sard. de Transitu V. M. Liber*, apud *Bibl. Max. Patr.* tom. ii. pt. ii. p. 212, Lugd. 1677; Jacobi a Voragine, *Legenda Aurea*, ed. Graesse, ch. cxix. p. 504, Dresd. 1846; John Damasc. *Serm. de Dormit. Deiparae*, Op. tom. ii. p. 857 seq., Venice, 1743; Andrew of Crete, *In Dormit. Deiparae Serm* iii. p. 115, Paris, 1644; Mrs. Jameson, *Legends of the Madonna*, Lond. 1852; Butler, *Lives of the Saints in Aug.* 15; Dressel, *Edita et inedita Epiphanii Monachi et Presbyteri*, p. 105, Paris, 1843.

IV. *Jewish traditions respecting her.*—These are of a very different nature from the light-hearted fairy-tale-like stories which we have recounted above. We should expect that the miraculous birth of our Lord would be an occasion of scoffing to the unbelieving Jews, and we find this to be the case. To the Christian believer the Jewish slander becomes in the present case only a confirmation of his faith. The most definite and outspoken of these slanders is that which is contained in the book called תולדות ישוע, or *Toldoth Jesu*. It was grasped at with avidity by Voltaire, and declared by him to be the most ancient Jewish writing directed against Christianity, and apparently of the first century. It was written, he says, before the Gospels, and is altogether contrary to them (*Lettre*

[d] The legend ascribed to Melito makes her soul to be carried to paradise by Gabriel while her Son returns to heaven.

[e] For the story of this *Sacratissimo Cordolo*, still preserved at Prato, see Mrs. Jameson's *Legends of the Madonna*, p. 344 Lond. 1852.

sur les Juifs). It is proved by Ammon (*Biblisch. Theologie*, p. 263, Erlang. 1801) to be a composition of the 15th century, and by Wagenseil (*Tela ignea Satanæ, Confut. Libr. Toldos Jeschu*, p. 12, Altorf, 1681) to be irreconcileable with the earlier Jewish tales. In the Gospel of Nicodemus, otherwise called the Acts of Pilate, we find the Jews represented as charging our Lord with illegitimate birth (c. 2). The date of this Gospel is about the end of the third century. The origin of the charge is referred with great probability by Thilo (*Codex Apocr.* p. 527, Lips. 1832) to the circular letters of the Jews mentioned by Grotius (*ad Matt.* xxvii. 63, *et ad Act. Apost.* xxviii. 22; *Op.* ii. 278 and 666, Basil. 1732), which were sent from Palestine to all the Jewish synagogues after the death of Christ, with the view of attacking "the lawless and atheistic sect which had taken its origin from the deceiver Jesus of Galilee" (Justin, *adv. Tryph.*). The first time that we find it openly proclaimed is in an extract made by Origen from the work of Celsus, which he is refuting. Celsus introduces a Jew declaring that the mother of Jesus ὑπὸ τοῦ γήμαντος, τέκτονος τὴν τέχνην ὄντος, ἐξεῶσθαι, ἐλεγχθεῖσαν ὡς μεμοιχευμένην (*Contra Celsum*, c. 28, Origenis *Opera*, xviii. 59, Berlin, 1845). And again, ἡ τοῦ Ἰησοῦ μήτηρ κύουσα, ἐξωσθεῖσα ὑπὸ τοῦ μνηστευσαμένου αὐτὴν τέκτονος, ἐλεγχθεῖσα ἐπὶ μοιχείᾳ καὶ τίκτουσα ἀπό τινος στρατιότου Πανθήρα τοὔνομα (ibid. 32). Stories to the same effect may be found in the Talmud—not in the Mishna, which dates from the second century, but in the Gemara, which is of the fifth or sixth (see *Tract. Sanhedrin*, cap. vii. fol. 67, col. 1; *Shabbath*, cap. xii. fol. 104, col. 2; and the *Midrash Koheleth*, cap. x. 5). Rabanus Maurus, in the ninth century, refers to the same story:—"Jesum filium Ethnici cujusdam Pandera adulteri, more latronum punitum esse." We then come to the *Toldoth Jesu*, in which these calumnies were intended to be summed up and harmonised. In the year 4671, the story runs, in the reign of King Jannoeus, there was one Joseph Pandera who lived at Bethlehem. In the same village there was a widow who had a daughter named Miriam, who was betrothed to a God-fearing man named Johanan. And it came to pass that Joseph Pandera meeting with Miriam when it was dark, deceived her into the belief that he was Johanan her husband. And after three months Johanan consulted Rabbi Simeon Shetachides what he should do with Miriam, and the rabbi advised him to bring her before the great council. But Johanan was ashamed to do so, and instead he left his home and went and lived at Babylon; and there Miriam brought forth a son and gave him the name of Jehoshua. The rest of the work, which has no merit in a literary aspect or otherwise, contains an account of how this Jehoshua gained the art of working miracles by stealing the knowledge of the unmentionable name from the Temple; how he was defeated by the superior magical arts of one Juda; and how at last he was crucified, and his body hidden under a watercourse. It is offensive to make use of sacred names in connexion with such tales; but in Wagenseil's quaint words we may recollect, "haec nomina non attinere ad Servatorem Nostrum aut beatissimam illius matrem coeteroscque quos significare videntur, sed designari iis a Diabolo supposita Spectra, Larvas, Lemures, Lamias, Stryges, aut si quid turpius istis" (*Tela Ignea Satanæ, Liber Toldos Jeschu*, p. 2, Altorf, 1681). It is a curious thing that a Pandera or Panther has been introduced into the genealogy of our Lord by Epiphanius (*Haeres.* lxxviii.), who makes him grandfather of Joseph, and by John of Damascus (*De Fide orthodoxa*, iv. 15), who makes him the father of Barpanther and grandfather of St. Mary.

V. *Mahometan Traditions.*—These are again cast in a totally different mould from those of the Jews. The Mahometans had no purpose to serve in spreading calumnious stories as to the birth of Jesus, and accordingly we find none of the Jewish malignity about their traditions. Mahomet and his followers appear to have gathered up the floating Oriental traditions which originated in the legends of St. Mary's early years, given above, and to have drawn from them and from the Bible indifferently. It has been suggested that the Koran had an object in magnifying St. Mary, and that this was to insinuate that the Son was of no other nature than the mother. But this does not appear to be the case. Mahomet seems merely to have written down what had come to his ears about her, without definite theological purpose or inquiry.

Mary was, according to the Koran, the daughter of Amram (sur. iii.) and the sister of Aaron (sur. xix.). Mahomet can hardly be absolved from having here confounded Miriam the sister of Moses with Mary the mother of our Lord. It is possible indeed that he may have meant different persons, and such is the opinion of Sale (*Koran*, pp. 38 and 251), and of D'Herbelot (*Bibl. Orient.* in voc. "Miriam"); but the opposite view is more likely (see Guadagnoli, *Apol. pro rel. Christ.* c. viii. p. 277, Rom. 1631). Indeed, some of the Mahometan commentators have been driven to account for the chronological difficulty, by saying that Miriam was miraculously kept alive from the days of Moses in order that she might be the mother of Jesus. Her mother Hannah dedicated her to the Lord while still in the womb, and at her birth "commended her and her future issue to the protection of God against Satan." And Hannah brought the child to the Temple to be educated by the priests, and the priests disputed among themselves who should take charge of her. Zacharias maintained that it was his office, because he had married her aunt. But when the others would not give up their claims, it was determined that the matter should be decided by lot. So they went to the river Jordan, twenty-seven of them, each man with his rod; and they threw their rods into the river, and none of them floated save that of Zacharias, whereupon the care of the child was committed to him (Al Beidawi; Jallalo'ddin). Then Zacharias placed her in an inner chamber by herself; and though he kept seven doors ever locked upon her,[f] he always found her abundantly supplied with provisions which God sent her from paradise, winter fruits in summer, and summer fruits in winter. And the angels said unto her, "O Mary, verily God hath chosen thee, and hath purified thee, and hath chosen thee above all the women of the world" (*Koran*, sur. iii.). And she retired to a place towards the East, and Gabriel appeared unto her and said, "Verily I am the messenger of thy Lord, and am sent to give thee a holy Son" (sur. xix.). And the angels said, "O Mary, verily God sendeth thee good tidings that thou shalt bear the Word proceeding from Himself: His name shall be Christ Jesus, the son of Mary, honourable in this world and in

[f] Other stories make the only entrance to be by a ladder and a door always kept locked.

the world to come, and one of them who approach unto the presence of God: and he shall speak unto men in his cradle and when he is grown up; and he shall be one of the righteous." And she said, "How shall I have a son, seeing I know not a man?" The angel said, "So God createth that which He pleaseth: when He decreeth a thing, He only saith unto it, 'Be,' and it is. God shall teach him the scripture and wisdom, and the law and the gospel, and shall appoint him His apostle to the children of Israel" (sur. iii.). So God breathed of His Spirit into the womb of Mary[g]; and she preserved her chastity (sur. lxvi.); for the Jews have spoken against her a grievous calumny (sur. iv.). And she conceived a son, and retired with him apart to a distant place; and the pains of childbirth came upon her near the trunk of a palm-tree: and God provided a rivulet for her, and she shook the palm-tree, and it let fall ripe dates, and she ate and drank, and was calm. Then she carried the child in her arms to her people; but they said that it was a strange thing she had done. Then she made signs to the child to answer them; and he said, "Verily I am the servant of God: He hath given me the book of the gospel, and hath appointed me a prophet; and He hath made me blessed, wheresoever I shall be; and hath commanded me to observe prayer and to give alms so long as I shall live; and He hath made me dutiful towards my mother, and hath not made me proud or unhappy: and peace be on me the day whereon I was born, and the day whereon I shall die, and the day whereon I shall be raised to life." This was Jesus the Son of Mary, the Word of Truth concerning whom they doubt (sur. xix.).

Mahomet is reported to have said that many men have arrived at perfection, but only four women; and that these are, Asia the wife of Pharaoh, Mary the daughter of Amram, his first wife Khadîjah, and his daughter Fâtima.

The commentators on the Koran tell us that every person who comes into the world is touched at his birth by the devil, and therefore cries out; but that God placed a veil between Mary and her Son and the Evil Spirit, so that he could not reach them. For which reason they were neither of them guilty of sin, like the rest of the children of Adam. This privilege they had in answer to Hannah's prayer for their protection from Satan. (Jallalo'ddin; Al Beidawi; Kitada.) The Immaculate Conception therefore, we may note, was a Mahometan doctrine six centuries before any Christian theologians or schoolmen maintained it.

Bat. 1643; Guadagnoli, *Apologia pro Christiana Religione*, Rom. 1631; D'Herbelot, *Bibliothèque Orientale*, p. 583, Paris, 1697; Weil, *Biblische Legenden der Muselmänner*, p. 230, Frankf. 1845.

VI. *Emblems.*—There was a time in the history of the Church when all the expressions used in the book of Canticles were applied at once to St. Mary. Consequently all the Eastern metaphors of king Solomon have been hardened into symbols, and represented in pictures or sculpture, and attached to her in popular litanies. The same method of interpretation was applied to certain parts of the book of the Revelation. Her chief emblems are the sun, moon, and stars (Rev. xii. 1; Cant. vi. 10). The name of Star of the Sea is also given her, from a fanciful interpretation of the meaning of her name. She is the Rose of Sharon (Cant. ii. 1), and the Lily (ii. 2), the Tower of David (iv. 4), the Mountain of Myrrh and the Hill of Frankincense (v. 6), the Garden enclosed, the Spring shut up, the Fountain sealed (iv. 12), the Tower of Ivory (vii. 4), the Palm-tree (vii. 7), the Closed Gate (Ez. xliv. 2). There is no end to these metaphorical titles. See Mrs. Jameson's *Legends of the Madonna*, and the ordinary Litanies of the B. Virgin.

VII. *Cultus of the Blessed Virgin.*—We do not enter into the theological bearings of the worship of St. Mary; but we shall have left our task incomplete if we do not add a short historical sketch of the origin, progress, and present state of the devotion to her. What was its origin? Certainly not the Bible. There is not a word there from which it could be inferred; nor in the Creeds; nor in the Fathers of the first five centuries. We may scan each page that they have left us, and we shall find nothing of the kind. There is nothing of the sort in the supposed works of Hermas and Barnabas, nor in the real works of Clement, Ignatius, and Polycarp: that is, the doctrine is not to be found in the 1st century. There is nothing of the sort in Justin Martyr, Tatian, Athenagoras, Theophilus, Clement of Alexandria, Tertullian: that is, in the 2nd century. There is nothing of the sort in Origen, Gregory Thaumaturgus, Cyprian, Methodius, Lactantius: that is, in the 3rd century. There is nothing of the sort in Eusebius, Athanasius, Cyril of Jerusalem, Hilary, Macarius, Epiphanius, Basil, Gregory Nazianzen, Ephrem Syrus, Gregory of Nyssa, Ambrose: that is, in the 4th century. There is nothing of the sort in Chrysostom, Augustine, Jerome, Basil of Seleucia, Orosius, Sedulius, Isidore, Theodoret, Prosper, Vincentius Lirinensis, Cyril of Alexandria, Popes Leo, Hilarus, Simplicius, Felix, Gelasius, Anastasius, Symmachus: that is, in the 5th century.[h] Whence, then, did it arise? There is not a shadow of doubt that the origin of the worship of St. Mary is to be found in the apocryphal legends of her birth and of her death which we have given above. There we find the germ of what afterwards expanded into its present portentous proportions. Some of the legends of her birth are as early as the 2nd or 3rd century. They were the production of the Gnostics, and were unanimously

[g] The commentators have explained this expression as signifying the breath of Gabriel (Yahya; Jallalo'ddin). But this does not seem to have been Mahomet's meaning.

[h] "Origen's Lament," the "Three Discourses" published by Voisin as the work of Gregory Thaumaturgus, the Homily attributed to St. Athanasius containing an invocation of St. Mary, the Panegyric attributed to St. Epiphanius, the "Christ Suffering," and the Oration containing the story of Justina and St. Cyprian, attributed to Gregory Nazianzen; the Eulogy of the Holy Virgin, and the Prayer attributed to Ephrem Syrus; the Book of Meditations attributed to St. Augustine; the Two Sermons supposed to have been delivered by Pope Leo on the Feast of the Annunciation,—are all spurious. See *Moral and Devotional Theology of the Church of Rome* (Mosley, Lond. 1857). The oration of Gregory, containing the story of Justina and Cyprian, is retained by the Benedictine editors as genuine; and they pronounce that nowhere else is the protection of the Blessed Virgin Mary so clearly and explicitly commended in the 4th century. The words are: "Justina ... meditating on these instances (and beseeching the Virgin Mary to assist a virgin in peril), throws before her the charm of fasting." It is shown to be spurious by Tyler (*Worship of the Blessed Virgin*, p. 378, Lond. 1844). Even suppose it were genuine, the contrast between the strongest passage of the 4th century and the ordinary language of the 19th would be sufficiently striking.

and firmly rejected by the Church of the first five centuries as fabulous and heretical. The Gnostic tradition seems to have been handed on to the Collyridians, whom we find denounced by Epiphanius for worshipping the Virgin Mary. They were regarded as distinctly heretical. The words which this Father uses respecting them were probably expressive of the sentiments of the entire Church in the 4th century. "The whole thing," he says, "is foolish and strange, and is a device and deceit of the devil. Let Mary be in honour. Let the Lord be worshipped. Let no one worship Mary" (Epiphan. *Haer.* lxxxix., Op. p. 1066, Paris, 1662). Down to the time of the Nestorian controversy the *cultus* of the Blessed Virgin would appear to have been wholly external to the Church, and to have been regarded as heretical. But the Nestorian controversies produced a great change of sentiment in men's minds. Nestorius had maintained, or at least it was the tendency of Nestorianism to maintain, not only that our Lord had two natures, the divine and the human (which was right), but also that He was two persons, in such sort that the child born of Mary was not divine, but merely an ordinary human being, until the divinity subsequently united itself to Him. This was condemned by the Council of Ephesus in the year 431; and the title Θεότοκος, loosely translated "Mother of God," was sanctioned. The object of the Council and of the Anti-Nestorians was in no sense to add honour to the mother, but to maintain the true doctrine with respect to the Son. Nevertheless the result was to magnify the mother, and, after a time, at the expense of the Son. For now the title Θεοτόκος became a shibboleth; and in art the representation of the Madonna and Child became the expression of orthodox belief. Very soon the purpose for which the title and the picture were first sanctioned became forgotten, and the veneration of St. Mary began to spread within the Church, as it had previously existed external to it. The legends too were no longer treated so roughly as before. The Gnostics were not now objects of dread. Nestorians, and afterwards Iconoclasts, were objects of hatred. The old fables were winked at, and thus they "became the mythology of Christianity, universally credited among the Southern nations of Europe, while many of the dogmas, which they are grounded upon, have, as a natural consequence, crept into the faith" (Lord Lindsay, *Christian Art*, i. p. xl. Lond. 1847). From this time the worship of St. Mary grew apace. It agreed well with many natural aspirations of the heart. To paint the mother of the Saviour an ideal woman, with all the grace and tenderness of womanhood, and yet with none of its weaknesses, and then to fall down and worship the image which the imagination had set up, was what might easily happen, and what did happen. Evidence was not asked for. Perfection "was becoming" to the mother of the Lord; therefore she was perfect. Adoration "was befitting" on the part of Christians; therefore they gave it. Any tales attributed to antiquity were received as genuine; any revelations supposed to be made to favoured saints were accepted as true: and the Madonna reigned as queen in heaven, in earth, in purgatory, and over hell. We learn the present state of the religious regard in which she is held throughout the south of Europe from St. Alfonso de' Liguori, whose every word is vouched for by the whole weight of his Church's authority. From the *Glories of Mary*, translated from the original, and published in London in 1852, we find that St. Mary is Queen of Mercy (p. 13) and Mother of all mankind (p. 23), our Life (p. 52), our Protectress in death (p. 71), the Hope of all (p. 79), our only Refuge, Help, and Asylum (p. 81); the Propitiatory of the whole world (p. 81); the one City of Refuge (p. 89); the Comfortress of the world, the Refuge of the unfortunate (p. 100) our Patroness (p. 106); Queen of Heaven and Hell (p. 110); our Protectress from the Divine Justice and from the Devil (p. 115); the Ladder of Paradise, the Gate of Heaven (p. 121); the Mediatrix of grace (p. 124); the Dispenser of all graces (p. 128); the Helper of the Redemption (p. 133); the Co-operator in our Justification (p. 133); a tender Advocate (p. 145); Omnipotent (p. 146); the singular Refuge of the lost (p. 156); the great Peacemaker (p. 165); the Throne prepared in mercy (p. 165); the Way of Salvation (p. 200); the Mediatrix of Angels (p. 278). In short, she is the Way (p. 200), the Door (p. 583), the Mediator (p. 295), the Intercessor (p. 129), the Advocate (p. 144), the Redeemer (p. 275), the Saviour (p. 343).

Thus, then, in the worship of the Blessed Virgin there are two distinctly marked periods. The first is that which commences with the apostolic times, and brings us down to the close of the century in which the Council of Ephesus was held, during which time the worship of St. Mary was wholly external to the Church, and was regarded by the Church as heretical, and confined to Gnostic and Collyridian heretics. The second period commences with the 6th century, when it began to spread within the Church; and, in spite of the shock given it by the Reformation, has continued to spread, as shown by Liguori's teaching; and is spreading still, as shown by the manner in which the papal decree of Dec. 8, 1854, has been, not universally indeed, but yet generally, received. Even before that decree was issued, the sound of the word "deification" had been heard with reference to St. Mary (Newman, *Essay on Development*, p. 409, Lond. 1846); and she had been placed in "a throne far above all created powers, mediatorial, intercessory;" she had been invested with "a title archetypal; with a crown bright as the morning star; a glory issuing from the Eternal Throne; robes pure as the heavens; and a sceptre over all" (*ibid.* p. 406).

VIII. *Her Assumption.*—Not only religious sentiments, but facts grew up in exactly the same way. The Assumption of St. Mary is a fact, or an alleged fact. How has it come to be accepted? At the end of the 5th century we find that there existed a book, *De Transitu Virginis Mariae*, which was condemned by Pope Gelasius as apocryphal. This book is without doubt the oldest form of the legend, of which the books ascribed to St. Melito and St. John are variations. Down to the end of the 5th century, then, the story of the Assumption was external to the Church, and distinctly looked upon by the Church as belonging to the heretics and not to her. But then came the change of sentiment already referred to, consequent on the Nestorian controversy. The desire to protest against the early fables which had been spread abroad by the heretics was now passed away, and had been succeeded by the desire to magnify her who had brought forth Him who was God. Accordingly a writer, whose date Baronius fixes at about this time (*Ann. Eccl.* i. 347, Lucca, 1738), suggested the possibility of the Assumption but declared his inability to decide the question. The letter in which this possibility or probability is thrown ou came to be attributed to St. Jerome

and may be still found among his works, entitled *Ad Paulam et Eustochium de Assumptione B. Virginis* (v. 82, Paris, 1706). About the same time, probably or rather later, an insertion (now recognised on all hands to be a forgery) was made in Eusebius' Chronicle, to the effect that "in the year A.D. 48 Mary the Virgin was taken up into heaven, as some wrote that they had had it revealed to them." Another tract was written to prove that the Assumption was not a thing in itself unlikely; and this came to be attributed to St. Augustine, and may be found in the appendix to his works: and a sermon, with a similar purport, was ascribed to St. Athanasius. Thus the names of Eusebius, Jerome, Augustine, Athanasius, and others, came to be quoted as maintaining the truth of the Assumption. The first writers within the Church in whose extant writings we find the Assumption asserted, are Gregory of Tours in the 6th century, who has merely copied Melito's book, *De Transitu* (*De Glor. Mart.* lib. i. c. 4; Migne, 71, p. 708); Andrew of Crete, who probably lived in the 7th century; and John of Damascus, who lived at the beginning of the 8th century. The last of these authors refers to the Euthymiac history as stating that Marcian and Pulcheria being in search of the body of St. Mary, sent to Juvenal of Jerusalem to inquire for it. Juvenal replied, "In the holy and divinely inspired Scriptures, indeed, nothing is recorded of the departure of the holy Mary, Mother of God. But from an ancient and most true tradition we have received, that at the time of her glorious falling asleep all the holy apostles, who were going through the world for the salvation of the nations, borne aloft in a moment of time, came together to Jerusalem: and when they were near her they had a vision of angels, and divine melody was heard; and, then with divine and more than heavenly melody she delivered her holy soul into the hands of God in an unspeakable manner. But that which had borne God, being carried with angelic and apostolic psalmody, with funeral rites, was deposited in a coffin at Gethsemane. In this place the chorus and singing of the angels continued three whole days. But after three days, on the angelic music ceasing, those of the apostles who were present opened the tomb, as one of them, Thomas, had been absent, and on his arrival wished to adore the body which had borne God. But her all glorious body they could not find; but they found the linen clothes lying, and they were filled with an ineffable odour of sweetness which proceeded from them. Then they closed the coffin. And they were astonished at the mysterious wonder; and they came to no other conclusion than that He who had chosen to take flesh of the Virgin Mary, and to become a man, and to be born of her—God the Word, the Lord of Glory—and had preserved her virginity after birth, was also pleased, after her departure, to honour her immaculate and unpolluted body with incorruption, and to translate her before the common resurrection of all men" (St. Joan. Damasc. *Op.* ii. 880, Venice, 1748). It is quite clear that this is the same legend as that which we have before given. Here, then, we see it brought over the borders and planted within the Church, if this "Euthymiac history" is to be accepted as veritable, by Juvenal of Jerusalem in the 5th century, or else by Gregory of Tours in the 6th century, or by Andrew of Crete in the 7th century, or finally, by John of Damascus in the 8th century (see his three *Homilies on the Sleep of the Blessed Virgin Mary*, Op. ii. 857-886).[1] The same legend is given in a slightly different form as veritable history by Nicephorus Callistus in the 13th century (Niceph. i. 171, Paris 1630); and the fact of the Assumption is stereotyped in the Breviary Services for Aug. 15th (*Brev. Rom. Pars aest.* p. 551, Milan, 1851). Here again, then, we see a legend originated by heretics, and remaining external to the Church till the close of the 5th century, creeping into the Church during the 6th and 7th centuries, and finally ratified by the authority both of Rome and Constantinople. See Baronius, *Ann. Eccl.* (i. 344, Lucca, 1738), and *Martyrologium* (p. 314, Paris, 1607).

IX. *Her Immaculate Conception.*—Similarly with regard to the sinlessness of St. Mary, which has issued in the dogma of the Immaculate Conception. Down to the close of the 5th century the sentiment with respect to her was identical with that which is expressed by theologians of the Church of England (see Pearson, *On the Creed*). She was regarded as "highly favoured," as a woman arriving as near the perfection of womanhood as it was possible for human nature to arrive, but yet liable to the infirmities of human nature, and sometimes led away by them. Thus, in the 2nd century, Tertullian represents her as guilty of unbelief (*De carne Christi*, vii. 315, and *Adv. Marcion.* iv. 19, p. 433, Paris, 1695). In the 3rd century, Origen interprets the sword which was to pierce her bosom as being her unbelief, which caused her to be offended (*Hom. in Luc.* xvii. iii. 952, Paris, 1733). In the 4th century St. Basil gives the same interpretation of Simeon's words (*Ep.* 260, iii. 400, Paris, 1721); and St. Hilary speaks of her as having to come into the severity of the final judgment (*In Ps.* cxix. p. 262, Paris, 1693). In the 5th century St. Chrysostom speaks of the "excessive ambition," "foolish arrogancy," and "vain-glory," which made her stand and desire to speak with Him (vii. 467, Paris, 1718); and St. Cyril of Alexandria (so entirely is he misrepresented by popular writers) speaks of her as failing in faith when present at the Passion—as being weaker in the spiritual life than St. Peter—as being entrusted to St. John, because he was capable of explaining to her the mystery of the Cross—as inferior to the apostles in knowledge and belief of the resurrection (iv. 1064, vi. 391, Paris, 1638). It is plain from these and other passages, which might be quoted, that the idea of St. Mary's exemption from even actual sins of infirmity and imperfection, if it existed at all, was external to the Church. Nevertheless there grew up, as was most natural, a practice of looking upon St. Mary as an example to other women, and investing her with an ideal character of beauty and sweetness. A very beautiful picture of what a girl ought to be is drawn by St. Ambrose (*De Virgin.* ii. 2, p. 164, Paris, 1690), and attached to St. Mary. It is drawn wholly from the imagination (as may be seen by his making one of her characteristics to be that she never went out of doors except when she accompanied her parents to church), but there is nothing in it which is in any way superhuman. Similarly we find St. Jerome speaking of the clear light of Mary hiding the little fires of other women, such as Anna and Elisa-

[1] This "Euthymiac History" is involved in the utmost confusion. Cave considers the Homily proved spurious by its reference to it. See *Historia Literar.* i. 562, 626 Oxf. 1740.

beth (vi. 671, Verona, 1734). St. Augustine takes us a step further. He again and again speaks of her as under *original* sin (iv. 241, x. 654, &c., Paris, 1700); but with respect to her *actual* sin he says that he would rather not enter on the question, for it was possible (how could we tell?) that God had given her sufficient grace to keep her free from actual sin (x. 144). At this time the change of mind before referred to, as originated by the Nestorian controversies, was spreading within the Church; and it became more and more the general belief that St. Mary was preserved from actual sin by the grace of God. This opinion had become almost universal in the 12th century. And now a further step was taken. It was maintained by St. Bernard that St. Mary was conceived in original sin, but that before her birth she was cleansed from it, like John the Baptist and Jeremiah. This was the sentiment of the 13th century, as shown by the works of Peter Lombard (*Sentent.* lib. iii. dist. 3), Alexander of Hales (*Sum. Theol.* num. ii. art. 2), Albertus Magnus (*Sentent.* lib. iii. dist. 3), and Thomas Aquinas (*Sum. Theol.* quaest. xxvii. art. 1, and *Comm. in Lib. Sentent.* dist. 3, quaest. 1). Early in the 14th century died J. Duns Scotus, and he is the first theologian or schoolman who threw out as a possibility the idea of an Immaculate Conception, which would exempt St. Mary from original as well as actual sin. This opinion had been growing up for the two previous centuries, having originated apparently in France, and having been adopted, to St. Bernard's indignation, by the canons of Lyons. From this time forward there was a struggle between the maculate and immaculate conceptionists, which has led at length to the decree of Dec. 8, 1854, but which has not ceased with that decree. Here, then, we may mark four distinct theories with respect to the sinlessness of St. Mary. The first is that of the early Church to the close of the 5th century. It taught that St. Mary was born in original sin, was liable to actual sin, and that she fell into sins of infirmity. The second extends from the close of the 5th to the 12th century. It taught that St. Mary was born in original sin, but by God's grace was saved from falling into actual sins. The third is *par excellence* that of the 13th century. It taught that St. Mary was conceived in original sin, but was sanctified in the womb before birth. The fourth may be found obscurely existing, but only existing to be condemned, in the 12th and 13th centuries; brought into the light by the speculations of Scotus and his followers in the 14th century; thenceforward running parallel with and struggling with the *sanctificata in utero* theory, till it obtained its apparently final victory, so far as the Roman Church is concerned, in the 19th century, and in the lifetime of ourselves. It teaches that St. Mary was not conceived or born in original sin, but has been wholly exempt from all sin, original and actual, in her conception and birth, throughout her life, and in her death.

See Laborde, *La Croyance à l'Immaculée Conception ne peut devenir Dogme de Foi*, Paris, 1855; Perrone, *De Immaculato B. V. M. Conceptu*, Avenione, 1848; *Christian Remembrancer*, vols. xxiii. and xxxvii.; Bp. Wilberforce, *Rome—her new Dogma, and our Duties*, Oxf. 1855; *Observateur Catholique*, Paris, 1855-60; Fray Morgaez, *Examen Bullae Ineffabilis*, Paris, 1858. [F. M.]

MARY (Rec. Text, with D, Μαριάμ; Lachmann, with A B C, Μαρία: *Maria*), a Roman Christian who is greeted by St. Paul in his Epistle to the Romans (xvi. 6) as having toiled hard for him—or according to some MSS. for them. Nothing more is known of her. But Professor Jowett (*The Epistles of St. Paul, &c. ad loc.*) has called attention to the fact that hers is the only Jewish name in the list. G.]

MAS'ALOTH (Μεσαλώθ; Alex. Μεσσαλώθ: *Masaloth*), a place in Arbela, which Bacchides and Alcimus, the two generals of Demetrius, besieged and took with great slaughter on their way from the north to Gilgal (1 Macc. ix. 2). Arbela is probably the modern *Irbid*, on the south side of the *Wady el-Hümâm*, about 3 miles N.W. of Tiberias, and half that distance from the Lake. The name Mesaloth is omitted by Josephus (*Ant.* xii. 11, §1), nor has any trace of it been since discovered; but the word may, as Robinson (*B. R.* ii. 398) suggests, have originally signified the "steps" or "terraces" (as if מְסִלּוֹת). In that case it was probably a name given to the remarkable caverns still existing on the northern side of the same Wady, and now called *Kula'at Ibn Ma'an*, the "fortress of the son of Maan"—caverns which actually stood a remarkable siege of some length, by the forces of Herod (Joseph. *B. J.* i. 16, §4).

A town with the similar name of MISHAL, or MASHAL, occurs in the list, of the tribe of Asher, but whether its position was near that assumed above for Masaloth, we have no means of judging. [G.]

MAS'CHIL (מַשְׂכִּיל: σύνεσις: *intellectus*, but in Ps. liii. *intelligentia*). The title of thirteen Psalms; xxxii., xlii., xliv., xlv., lii.–lv., lxxv., lxxviii., lxxxviii., lxxxix., cxlii. Jerome in his version from the Hebrew renders it uniformly *eruditio*, "instruction," except in Pss. xlii., lxxxix., where he has *intellectus*, "understanding." The margin of our A. V. has in Pss. lxxiv., lxxviii., lxxxix., "to give instruction;" and in Pss. lxxxviii., cxlii., "giving instruction." In other passages in which the word occurs it is rendered "wise" (Job xxii. 2; Prov. x. 5, 19, &c.), "prudent" (Prov. xix. 14; Am. v. 13), "expert" (Jer. iv. 9), and "skilful" (Dan. i. 4). In the Psalm in which it first occurs as a title, the root of the word is found in another form (Ps. xxxii. 8), "I will *instruct* thee," from which circumstance, it has been inferred, the title was applied to the whole Psalm as "didactic." But since "Maschil" is affixed to many Psalms which would scarcely be classed as didactic, Gesenius (or rather Roediger) explains it as denoting "any sacred song, relating to divine things, whose end it was to promote wisdom and piety" (*Thes.* p. 1330). Ewald (*Dichter d. alt. B.* i. 25) regards Ps. xlvii. 7 (A. V. "sing ye praises *with understanding*;" Heb. *maschil*), as the key to the meaning of Maschil, which in his opinion is a musical term, denoting a melody requiring great skill in its execution. The objection to the explanation of Roediger is, that it is wanting in precision, and would allow the term "Maschil" to be applied to every Psalm in the Psalter. That it is employed to indicate to the conductor of the Temple choir the manner in which the Psalm was to be sung, or the melody to which it was adapted, rather than as descriptive of its contents, seems to be implied in the title of Ps. xlv., where, after "Maschil," is added "a song of loves" to denote the special character of the Psalm. Again, with few exceptions, it is associated with directions for the choir. "to the chief musician," &c., and occupies the same position in the titles as *Michtam* (Ps. xvi., lvi.–lx.), *Miktam*

A. V. "Psalm;" Ps. iv.–vi., &c.), and *Shiggaion* (Ps. vii.). If, therefore, we regard it as originally used, in the sense of "didactic," to indicate the character of one particular Psalm, it might have been applied to others as being set to the melody of the original Maschil-l'salm. But the suggestion of Ewald, given above, has most to commend it. Comparing "Maschil" with the musical terms already alluded to, and observing the different manner in which the character of a psalm is indicated in other instances (1 Chr. xvi. 7; Pss. xxviii., lxx., titles), it seems probable that it was used to convey a direction to the singers as to the mode in which they were to sing. There appear to have been Maschils of different kinds, for in addition to those of David which form the greater number, there are others of Asaph (Ps. lxxiv., lxxviii.), Heman the Ezrahite (lxxxviii.), and Ethan (lxxxix.). [W. A. W.]

MASH (מֵשׁ: Μοσόχ: *Mes*), one of the sons of Aram, and the brother of Uz, Hul, and Gether (Gen. x. 23). In 1 Chr. i. 17 the name appears as Meshech, and the rendering of the LXX., as above given, leads to the inference that a similar form also existed in some of the copies of Genesis. It may further be noticed that in the Chronicles, Mash and his brothers are described as sons of Shem to the omission of Aram; this discrepancy is easily explained: the links to connect the names are omitted in other instances (comp. ver. 4), the ethnologist evidently assuming that they were familiar to his readers. As to the geographical position of Mash, Josephus (*Ant.* i. 6, §4) connects the name with *Mesene* in Lower Babylonia, on the shores of the Persian Gulf—a locality too remote, however, from the other branches of the Aramaic race. The more probable opinion is that which has been adopted by Bochart (*Phal.* ii. 11), Winer (*Rwb.* s. v.), and Knobel (*Völkert.* p. 237)—viz. that the name Mash is represented by the *Mons Masius* of classical writers, a range which forms the northern boundary of Mesopotamia, between the Tigris and Euphrates (Strab. xi. pp. 506, 527). Knobel reconciles this view with that of Josephus by the supposition of a migration from the north of Mesopotamia to the south of Babylonia, where the race may have been known in later times under the name of Meshech: the progress of the population in these parts was, however, in an opposite direction, from south to north. Kalisch (*Comm. on Gen.* p. 286) connects the names of Mash and Mysia: this is, to say the least, extremely doubtful; both the Mysians themselves and their name (= *Moesia*) were probably of European origin. [W. L. B.]

MASH'AL (מִשְׁעָל: Μασσᾶ: *Masal*), the contracted or provincial (Galilean) form in which, in the later list of Levitical cities (1 Chr. vi. 74), the name of the town appears, which in the earlier records is given as MISHEAL and MISHAL. It suggests the MASALOTH of the Maccabean history. [G.]

MASI'AS (Μασίας; Alex. Μαείας: *Maisith*), one of the servants of Solomon, whose descendants returned with Zorobabel (1 Esdr. v. 34).

MASMAN (Μασμάν; Alex. Μασσμάν: *Masman*). This name occurs for SHEMAIAH in 1 Esd. ix. 43 (comp. Ezr. viii. 16). The Greek text is evidently corrupt, Ἰαμάλας (A. V. Mamaias), which is the true reading, being misplaced in ver. 44 after Mathanias.

MASORA. [OLD TESTAMENT.]

MASPHA. 1. (Μασσηφάθ: Alex. Μασσηφα: *Maspha.*) A place opposite to (κατέναντι) Jerusalem, at which Judas Maccabaeus and his followers assembled themselves to bewail the desolation of the city and the sanctuary, and to inflame their resentment before the battle of Emmaus, by the sight, not only of the distant city, which was probably visible from the eminence, but also of the Book of the Law mutilated and profaned, and of other objects of peculiar preciousness and sanctity (1 Macc. iii. 46). There is no doubt that it is identical with MIZPEH of Benjamin, the ancient sanctuary at which Samuel had convened the people on an occasion of equal emergency. In fact, Maspha, or more accurately Massêphа, is merely the form in which the LXX. uniformly render the Hebrew name Mizpeh.

2. (Μααφά in both MSS.; but Josephus Μιλλήν: *Maspha.*) One of the cities which were taken from the Ammonites by Judas Maccabaeus in his campaign on the east of Jordan (1 Macc. v. 35). It is probably the ancient city of Mizpeh of Gilead. The Syriac has the curious variation of *Olim*, ܐܠܡܢ, "salt." Perhaps Josephus also reads מֶלַח, "salt." [G.]

MASR'EKAH (מַשְׂרֵקָה: Μασσεκκᾶ, in Chron. Μασεκκᾶ, and so Alex. in both: *Masereca, Marsoa*), an ancient place, the native spot of Samlah, one of the old kings of the Edomites (Gen. xxxvi. 36; 1 Chr. i. 47). Interpreted as Hebrew, the name refers to vineyards—as if from *Sarak*, a root with which we are familiar in the "vine of Sorek," that is, the choice vine; and led by this, Knobel (*Genesis*, 257) proposes to place Masrekah in the district of the Idumaean mountains north of Petra, and along the Hadj route, where Burckhardt found "extensive vineyards," and "great quantities of dried grapes," made by the tribe of the *Refaya* for the supply of Gaza and for the Mecca pilgrims (Burckhardt, *Syria*, Aug. 21). But this is mere conjecture, as no name at all corresponding with Masrekah has been yet discovered in that locality. Schwarz (215) mentions a site called *En-Masrak*, a few miles south of Petra. He probably refers to the place marked *Ain Mafrak* in Palmer's Map, and *Ain el-Usdaka* in Kiepert's (Robinson, *Bib. Res.* 1856). The versions are unanimous in adhering more or less closely to the Hebrew. [G.]

MAS'SA (מַשָּׂא: Μασσᾶ: *Massa*), a son of Ishmael (Gen. xxv. 14; 1 Chr. i. 30). His descendants were not improbably the *Masani*, who are placed by Ptolemy (v. 19, §2) in the east of Arabia, near the borders of Babylonia. [W. L. B.]

MASSAH (מַסָּה: πειρασμός), *i. e.* "temptation," a name given to the spot, also called MERIBAH, where the Israelites "tempted Jehovah, saying, Is Jehovah among us or not?" (Ex. xvi. 7). The name also occurs, with mention of the circumstances which occasioned it, in Ps. xcv. 8, 9 and its Greek equivalent in Heb. iii. 8. [H. H.]

MASSI'AS (Μασσίας: *Hismaenis*) = MAASEIAH 3 (1 Esd. ix. 22; comp. Ezr. x. 22).

MASTICH-TREE (σχῖνος, *lentiscus*) occurs only in the Apocrypha (Susan. ver. 54[a]), where the

[a] This verse contains a happy play upon the word "Under what tree sawest thou them? . . . under a mastich-tree (ὑπὸ σχῖνον). And Daniel said . . . the angel of God

margin of the A. V. has *lentisk*. There is no doubt that the Greek word is correctly rendered, as is evident from the description of it by Theophrastus (*Hist. Plant.* ix. i. §2, 4, §7, &c.); Pliny (*N. H.* xii. 36, xxiv. 28); Dioscorides (i. 90), and other writers. Herodotus (iv. 177) compares the fruit of the lotus (the *Rhamnus lotus*, Linn., not the Egyptian *Nelumbium speciosum*) in size with the mastich berry, and Babrius (3, 5) says its leaves are browsed by goats. The fragrant resin known in the arts as "mastick," and which is obtained by incisions made in the trunk in the month of August, is the produce of this tree, whose scientific name is *Pistacia lentiscus*. It is used with us to strengthen the teeth and gums, and was so applied by the ancients, by whom it was much prized on this account, and for its many supposed medicinal virtues. Lucian (*Lexiph.* 12) uses the term σχινοτρώκτης of one who chews mastich wood in order to whiten his teeth. Martial (*Ep.* xiv. 22) recommends a mastich toothpick (*dentiscalpium*). Pliny (xxiv. 7) speaks of the leaves of this tree being rubbed on the teeth for toothache. Dioscorides (i. 90) says the resin is often mixed with other materials and used as tooth-powder, and that if chewed,[a] it imparts a sweet odour to the breath. Both Pliny and Dioscorides state that the best mastich comes from Chios, and to this day the Arabs prefer that which is imported from that island (comp. Niebuhr, *Beschr. von Arab.* p. 144; Galen, *de fac. Simpl.* 7, p. 69). Tournefort (*Voyages*, ii. 58-61, transl. 1741) has given a full and very interesting account of the Lentisks or Mastich plants of Scio (Chios): he says that "the towns of the island are distinguished into three classes, those *del Campo*, those of *Apanomeria*, and those where they plant *Lentisk-trees*, from whence the mastick in tears is

Mastich (*Pistacia Lentiscus*).

produced." Tournefort enumerates several Lentisk-tree villages. Of the trees he says, "these trees are very wide spread and circular, ten or twelve foot tall, consisting of several branchy stalks which in time grow crooked. The biggest trunks are a foot diameter, covered with a bark, greyish, rugged chapt the leaves are disposed in three or four couples on each side, about an inch long, narrow at the beginning, pointed at their extremity, half an inch broad about the middle. From the juncture of the leaves grow flowers in bunches like grapes (see woodcut); the fruit too grows like bunches of grapes, in each berry whereof is contained a white kernel. These trees blow in May, the fruit does not ripen but in autumn and winter." This writer gives the following description of the mode in which the mastich gum is procured. "They begin to make incisions in these trees in Scio the first of August, cutting the bark crossways with huge knives, without touching the younger branches; next day the nutritious juice distils in small tears, which by little and little form the mastick grains; they harden on the ground, and are carefully swept up from under the trees. The height of the crop is about the middle of August if it be dry serene weather, but if it be rainy, the tears are all lost. Likewise towards the end of September the same incisions furnish mastick, but in lesser quantities." Besides the uses to which reference has been made above, the people of Scio put grains of this resin in perfumes, and in their bread before it goes to the oven.

Mastick is one of the most important products of the East, being extensively used in the preparation of spirits, as juniper berries are with us, as a sweetmeat, as a masticatory for preserving the gums and teeth, as an antispasmodic in medicine, and as an ingredient in varnishes. The Greek writers occasionally use the word σχῖνος for an entirely different plant, viz., the Squill (*Scilla maritima*) (see Aristoph. *Plut.* 715; Sprengel. *Flor. Hippoc.* 41; Theophr. *Hist. Plant.* v. 6, §10). The *Pistacia lentiscus* is common on the shores of the Mediterranean. According to Strand (*Flor. Palaest.* No. 559) it has been observed at Joppa, both by Rauwolf and Pococke. The Mastich-tree belongs to the natural order *Anacardiaceae*. [W. H.]

MATHANI'AS (Ματθανίας: *Mathanias*) = MATTANIAH, a descendant of Pahath-Moab (1 Esd. ix. 31; comp. Ezr. x. 30).

MATHU'SALA (Ματουσάλα: *Mathusale*) = METHUSELAH, the son of Enoch (Luke iii. 37).

MAT'RED (מַטְרֵד: Ματραίθ; Alex. Ματρεδ: *Matred*), a daughter of Mezahab, and mother of Mehetabel, who was wife of Hadar (or Hadad) of Pau, king of Edom (Gen. xxxvi. 39; 1 Chr. i. 50). Respecting the kings of Edom whose records are contained in the chapters referred to, see HADAD, IRAM, &c. [E. S. P.]

MAT'RI (הַמַּטְרִי, with the art. properly "the Matri:" Ματραί; Alex. Ματραεί and Ματραείτ: *Metri*), a family of the tribe of Benjamin, to which Saul the king of Israel belonged (1 Sam x. 21).

MAT'TAN (מַתָּן: Ματθάν; Alex. Μαχαν in Kings; Ματθάν in Chron.: *Mathan*). 1. The priest of Baal slain before his altars in the idol temple at Jerusalem, at the time when Jehoiada swept away idolatry from Judah (2 K. xi. 18; 2 Chr. xxiii. 17). He probably accompanied Atha-

hath received the sentence of God to cut thee in two (σχίσαι σε μέσον). This is unfortunately lost in our version; but it is preserved by the Vulgate, "sub schino . . scindet te;" and by Luther, "Linde . . . finden." A similar play occurs in vers. 58, 59, between πρίονι, and πρίσαι σε. For the bearing of these and similar characteristics on the date and origin of the book, see SUSANNA.

[a] Whence the derivation of mastick, from μαστιχᾶν, the form of the σχῖνος, from μάσταξ, μασᾶσθαι, μασσᾶσθαι, "to chew," "to masticate."

tah from Samaria, and would thus be the first priest of the Baal-worship which Jehoram king of Judah, following in the steps of his father-in-law Ahab, established at Jerusalem (2 Chr. xxi. 6, 13). Josephus (*Ant.* ix. 7, §3) calls him **Maadv.**

2. (**Nádav.**) The father of Shephatiah (Jer. xxxviii. 1). [W. A. W.]

MATTANAH (מַתָּנָה: **Marθavaelv**; Alex. **Marθavav**: *Matthana*), a station in the latter part of the wanderings of the Israelites (Num. xxi. 18, 19). It lay next beyond the well, or Beer, and between it and Nahaliel; Nahaliel again being but one day's journey from the Bamoth or heights of Moab. Mattanah was therefore probably situated to the S.E. of the Dead Sea, but no name like it appears to have been yet discovered. The meaning at the root of the word (if taken as Hebrew) is a "gift," and accordingly the Targumists—Onkelos as well as Pseudojonathan and the Jerusalem—treat Mattanah as if a synonym for BEER, the well which was "given" to the people (ver. 16). In the same vein they further translate the names in verse 20; and treat them as denoting the valleys (Nahaliel) and the heights (Bamoth), to which the miraculous well followed the camp in its journeyings. The legend is noticed under BEER.[a] By Le Clerc it is suggested that Mattanah may be the same with the mysterious word *Vaheb* (ver. 14; A. V. "what He did")—since the meaning of that word in Arabic is the same as that of Mattanah in Hebrew. [G.]

MATTANI'AH (מַתַּנְיָה: **Marθavlas**; Alex. **Maθθavlas**: *Matthanias*). 1. The original name of Zedekiah king of Judah, which was changed when Nebuchadnezzar placed him on the throne instead of his nephew Jehoiachin (2 K. xxiv. 17). In like manner Pharaoh had changed the name of his brother Eliakim to Jehoiakim on a similar occasion (2 K. xxiii. 34), when he restored the succession to the elder branch of the royal family (comp. 2 K. xxiii. 31, 36).

2. (**Marθavlas** in Chr., and Neh. xi. 17; **Marθavía** Neh. xii. 8, 35; Alex. **Maθθavlas**, Neh. xi. 17, **Maθavía**, Neh. xii. 8, **Maθθavía**, Neh. xii. 35: *Mathania*, exc. Neh. xii. 8, 35, *Mathanias*). A Levite singer of the sons of Asaph (1 Chr. ix. 15). He is described as the son of Micah, Micha (Neh. xi. 17), or Michaiah (Neh. xii. 35), and after the return from Babylon lived in the villages of the Netophathites (1 Chr. ix. 16) or Netophathi (Neh. xii. 28), which the singers had built in the neighbourhood of Jerusalem (Neh. xii. 29). As leader of the Temple choir after its restoration (Neh. xi. 17, xii. 8) in the time of Nehemiah, he took part in the musical service which accompanied the dedication of the wall of Jerusalem (Neh. xii. 25, 35). We find him among the Levites of the second rank, "keepers of the thresholds," an office which fell to the singers (comp. 1 Chr. xv. 18, 21). In Neh. xii. 35, there is a difficulty, for "Mattaniah, the son of Michaiah, the son of Zaccur, the son of Asaph," is apparently the same with "Mattaniah, the son of Micha, the son of Zabdi the son of Asaph" (Neh. xi. 17), and with the Mattaniah of Neh. xii. 8, 25, who, as in xi. 17, is associated with Bakbukiah, and is expressly mentioned as living in the days of Nehemiah and Ezra (Neh. xii. 26). But, if the reading in Neh. xii. 35 be correct, Zechariah, the great-grandson of Mattaniah (further described as one of "the *priests'* sons,"[b] whereas Mattaniah was a Levite), blew the trumpet at the head of the procession led by Ezra, which marched round the city wall. From a comparison of Neh. xii. 35 with xii. 41, 42, it seems probable that the former is corrupt, that Zechariah in verses 35 and 41 is the same priest, and that the clause in which the name of Mattaniah is found is to be connected with ver. 36, in which are enumerated his "brethren" alluded to in ver. 8.

3. (**Marθavlas**: *Mathanias.*) A descendant of Asaph, and ancestor of Jahaziel the Levite in the reign of Jehoshaphat (2 Chron. xx. 14).

4. (**Marθavía**; Alex. **Maθθavía**: *Mathanias.*) One of the sons of Elam who had married a foreign wife in the time of Ezra (Exr. x. 26). In 1 Esdr. ix. 27 he is called MATTHANIAS.

5. (**Marθavaí**; Alex. **Maθθavaí**.) One of the sons of Zattu in the time of Ezra, who put away his foreign wife (Ezr. x. 27). He is called OTHONIAS in 1 Esdr. ix. 28.

6. (**Marθavid**; Alex. **Maθθavid**: *Mathanias.*) A descendant of Pahath-Moab who lived at the same time, and is mentioned under the same circumstances as the two preceding (Ezr. x. 30). In 1 Esdr. ix. 31, he is called MATHANIAS.

7. One of the sons of Bani, who like the three above mentioned, put away his foreign wife at Ezra's command (Ezr. x. 37). In the parallel list of Esdr. ix. 34, the names "Mattaniah, Mattenai," are corrupted into MAMNITANAIMUS.

8. (**Marθavalas**; Alex. **Maθθavlas.**) A Levite, father of Zaccur, and ancestor of Hanan the under-treasurer who had charge of the offerings for the Levites in the time of Nehemiah (Neh. xiii. 13).

9. (מַתַּנְיָהוּ: **Marθavlas**: *Mathaniâ*, 1 Chr. xxv. 4; *Mathanias*, 1 Chr. xxv. 16), one of the fourteen sons of Heman the singer, whose office it was to blow the horns in the Temple service as appointed by David. He was the chief of the 9th division of twelve Levites who were "instructed in the songs of Jehovah."

10. A descendant of Asaph, the Levite minstrel, who assisted in the purification of the Temple in the reign of Hezekiah (2 Chr. xxix. 13). [W. A. W.]

MATTATHA (**Marraθá**: *Mathatha*), the son of Nathan, and grandson of David in the genealogy of our Lord (Luke iii. 31).

MATTATHAH (מַתַּתָּה: **Marθaθá**: Alex. **Maθθaθá**: *Mathatha*), a descendant of Hashum, who had married a foreign wife in the time of Ezra, and was separated from her (Ezr. x. 33). He is called MATTHIAS in 1 Esdr. ix. 33.

MATTATHI'AS (**Marraθías**: *Mathathias*). 1. = MATTITHIAH, who stood at Ezra's right hand when he read the law to the people (1 Esdr. ix. 43; comp. Neh. viii. 4).

2. (*Mathathias.*) The father of the Maccabees (1 Macc. ii. 1, 14, 16, 17, 19, 24, 27, 39, 45, 49, xiv. 29). [MACCABEES, 165 *a.*]

[a] Vol. i. 179*a*. In addition to the authorities there cited, the curious reader who may desire to investigate this remarkable tradition will find it exhausted in Buxtorf's *Exercitationes* (No. v. *Hist. Petræ in Deserto*).

[b] The word "priest" is apparently applied in a less

restricted sense in later times, for we find in Exr. viii. 24 Sherebiah and Hashabiah described as among the "chief of the priests," whereas, in vers. 18, 19, they are Merarite Levites; if, as is probable, the same persons are alluded to in both instances. Comp. also Josh. iii. 3 with Num. vii. 9.

3. (*Mathathias.*) The son of Absalom, and brother of JONATHAN 14 (1 Macc. xi. 70; xiii. 11). In the battle fought by Jonathan the high-priest with the forces of Demetrius on the plain of Nasor (the old Hazor), his two generals Mattathias and Judas alone stood by him, when his army was seized with a panic and fled, and with their assistance the fortunes of the day were restored.

4. (*Mathathias.*) The son of Simon Maccabeus, who was treacherously murdered, together with his father and brother, in the fortress of Docus, by Ptolemeus the son of Abubus (1 Macc. xvi. 14).

5. (*Matthias.*) One of the three envoys sent by Nicanor to treat with Judas Maccabeus (2 Macc. xiv. 19).

6. (*Mathathias.*) Son of Amos, in the genealogy of Jesus Christ (Luke iii. 25).

7. (*Mathathias.*) Son of Semei, in the same catalogue (Luke iii. 26). (W. A. W.)

MATTENA'I (מַתְּנַי: Ματθανία; Alex. Μαθθαναΐ: *Mathanaï*). 1. One of the family of Hashum, who in the time of Ezra had married a foreign wife (Ezr. x. 33). In 1 Esdr. ix. 33 he is called ALTANEUS.

2. (Ματθαναΐ; Alex. Μαθθαναΐ· *Mathanaï*). A descendant of Bani, who put away his foreign wife at Ezra's command (Ezr. x. 37). The place of this name and of Mattaniah which precedes it is occupied in 1 Esdr. ix. 34 by MAMNITANAIMUS.

3. A priest in the days of Joiakim the son of Jeshua (Neh. xii. 19). He represented the house of Joiarib.

MAT'THAN (Rec. Text, Ματθάν; Lachm. with B, Μαθθάν: *Mathan, Matthan.*) The son of Eleazar, and grandfather of Joseph "the husband of Mary" (Matt. i. 15). He occupies the same place in the genealogy as MATTHAT in Luke iii. 24, with whom indeed he is probably identical (Hervey, *Genealogies of Christ*, 129, 134, &c.). "He seems to have been himself descended from Joseph the son of Judah, of Luke iii. 26, but to have become the heir of the elder branch of the house of Abiud on the failure of Eleazar's issue" (ib. 134).

MATTHANI'AS (Ματθανίας) = MATTANIAH, one of the descendants of Elam (1 Esdr. ix. 27; comp. Ezr. x. 26). In the Vulgate, "Ela, Mathanias," are corrupted into "Jolaman, Chamas," which is evidently a transcriber's error.

MAT'THAT (Ματθάτ; but Tisch. Μαθθάτ: *Mathat, Mattat, Matthad*, &c.) 1. Son of Levi and grandfather of Joseph, according to the genealogy of Luke (iii. 24). He is maintained by Lord A. Hervey to have been the same person as the MATTHAN of Matt. i. 15 (see *Genealogies of Christ*, 137, 138, &c.).

2. Also the son of a Levi, and a progenitor of Joseph, but much higher up in the line, namely eleven generations from David (Luke iii. 29). Nothing is known of him.

It should be remarked that no fewer than five names in this list are derived from the same Hebrew root as that of their ancestor NATHAN the son of David (see Hervey, *Genealogies*, &c., p. 150).

MATTHE'LAS (Μαθθλας: *Maselas*) = MAASEIAH 1 (1 Esd. ix. 19; comp. Ezr. x. 18). The reading of the LXX. which is followed in the A. V. might easily arise from a mistake between the uncial Θ and Σ (C).

MAT'THEW (Lachm. with BD, Μαθθαῖος; AC and Rec. Text, Ματθαῖος: *Matthaeus.*) Matthew the Apostle and Evangelist is the same as Levi (Luke v. 27-29) the son of a certain Alphaeus (Mark ii. 14). His call to be an Apostle is related by all three Evangelists in the same words, except that Matthew (ix. 9) gives the former, and Mark (ii. 14) and Luke (v. 27) the latter name. If there were two publicans, both called solemnly in the same form at the same place, Capernaum, then one of them became an Apostle, and the other was heard of no more; for Levi is not mentioned again after the feast which he made in our Lord's honour (Luke v. 29). This is most unlikely. Euthymius and many other commentators of note identify Alphaeus the father of Matthew with Alphaeus the father of James the Less. Against this is to be set the fact that in the lists of Apostles (Matt. x. 3; Mark iii. 18; Luke vi. 15; Acts i. 13), Matthew and James the Less are never named together, like other pairs of brothers in the apostolic body. It may be, as in other cases, that the name Levi was replaced by the name Matthew at the time of the call. According to Gesenius, the names Matthaeus and Matthias are both contractions of Mattathias (= מַתִּתְיָה, "gift of Jehovah;" Θεόδωρος, Θεόδοτος), a common Jewish name after the exile; but the true derivation is not certain (see Winer, Lange). The publicans, properly so called (*publicani*), were persons who farmed the Roman taxes, and they were usually, in later times, Roman knights, and persons of wealth and credit. They employed under them inferior officers, natives of the province where the taxes were collected, called properly *portitores*, to which class Matthew no doubt belonged. These latter were notorious for impudent exactions everywhere (Plautus, *Menaech.* i. 2, 5; Cic. *ad Quint. Fr.* i. 1; Plut. *De Curios.* p. 518 *e*); but to the Jews they were especially odious, for they were the very spot where the Roman chain galled them, the visible proof of the degraded state of their nation. As a rule, none but the lowest would accept such an unpopular office, and thus the class became more worthy of the hatred with which in any case the Jews would have regarded it. The readiness, however, with which Matthew obeyed the call of Jesus seems to show that his heart was still open to religious impressions. His conversion was attended by a great awakening of the outcast classes of the Jews (Matt. ix. 9, 10). Matthew in his Gospel does not omit the title of infamy which had belonged to him (x. 3); but neither of the other Evangelists speaks of "Matthew *the publican.*" Of the exact share which fell to him in preaching the Gospel we have nothing whatever in the N. T., and other sources of information we cannot trust.

Eusebius (*H. E.* iii. 24) mentions that after our Lord's ascension Matthew preached in Judaea (some add for fifteen years, Clem. *Strom.* vi.), and then went to foreign nations. To the lot of Matthew it fell to visit Aethiopia, says Socrates Scholasticus (*H. E.* i. 19; Ruff. *H. E.* x. 9). But Ambrose says that God opened to him the country of the Persians (*In Ps.* 45); Isidore the Macedonian (Isidore Hisp. *de Sanct.* 77); and others the Parthians, the Medes, the Persians of the Euphrates. Nothing whatever is really known. Heracleon, the disciple of Valentinus (cited by Clemens Alex. *Strom.* iv. 9), describes him as dying a natural death, which Clement, Origen, and Tertullian seem to accept: the tradition that he died a martyr, is

true or false, came in afterwards (Niceph. *H. E.* ii. 41).

If the first feeling on reading these meagre particulars be disappointment, the second will be admiration for those who doing their part under God in the great work of founding the Church on earth, have passed away to their Master in heaven without so much as an effort to redeem their names from silence and oblivion. (For authorities see the works on the Gospels referred to under LUKE and GOSPELS; also Fritzsche, *In Matthaeum*, Leipzic, 1826: Lange, *Bibelwerk*, part i.) [W. T.]

MATTHEW, GOSPEL OF. The Gospel which bears the name of St. Matthew was written by the Apostle, according to the testimony of all antiquity.

1. *Language in which it was first written.*—We are told on the authority of Papias, Irenaeus, Pantaenus, Origen, Eusebius, Epiphanius, Jerome, and many other Fathers, that the Gospel was first written in Hebrew, *i. e.* in the vernacular language of Palestine, the Aramaic. *a.* Papias of Hierapolis (who flourished in the first half of the 2nd century) says, "Matthew wrote the divine oracles (τὰ λόγια) in the Hebrew dialect; and each interpreted them as he was able" (Eusebius, *H. E.* iii. 39). It has been held that τὰ λόγια is to be understood as a collection of *discourses*, and that therefore the book here alluded to, contained not the acts of our Lord but His speeches; but this falls through, for Papias applies the same word to the Gospel of St. Mark, and he uses the expression λόγια κυριακά in the title of his own work, which we know from fragments to have contained facts as well as discourses (*Studien und Kritiken*, 1832, p. 735; Meyer, *Einleitung*; De Wette, *Einleitung*, §97 a; Alford's *Prolegomena to Gr. Test.* p. 25). Eusebius, indeed, in the same place pronounces Papias to be "a man of very feeble understanding," in reference to some false opinions which he held; but it requires little critical power to bear witness to the fact that a certain Hebrew book was in use. *b.* Irenaeus says (iii. 1), that "whilst Peter and Paul were preaching at Rome and founding the Church, Matthew put forth his written Gospel amongst the Hebrews in their own dialect." It is objected to this testimony that Irenaeus probably drew from the same source as Papias, for whom he had great respect; this assertion can neither be proved nor refuted, but the testimony of Irenaeus is in itself no mere copy of that of Papias. *c.* According to Eusebius (*H. E.* v. 10), Pantaenus (who flourished in the latter part of the 2nd century) "is reported to have gone to the Indians" (*i. e.* to the south of Arabia?)," where it is said that he found the Gospel of Matthew already among some who had the knowledge of Christ there, to whom Bartholomew, one of the apostles, had preached, and left them the Gospel of Matthew written in Hebrew, which was preserved till the time referred to." We have no writings of Pantaenus, and Eusebius recites the story with a kind of doubt. It reappears in two different forms:—Jerome and Ruffinus say that Pantaenus *brought back* with him this Hebrew Gospel, and Nicephorus asserts that Bartholomew *dictated* the Gospel of Matthew to the inhabitants of that country. Upon the whole, Pantaenus contributes but little to the weight of the argument. *d.* Origen says (*Comment. on Matt.* i. in Eusebius, *H. E.* vi. 25), "As I have learnt by tradition concerning the four Gospels, which alone are received without dispute by the Church of God under heaven: the first was written by St. Matthew, once a tax-gatherer, afterwards an apostle of Jesus Christ, who published it for the benefit of the Jewish converts, composed in the Hebrew language." The objections to this passage brought by Masch, are disposed of by Michaelis iii. part i. p. 127; the "tradition" does not imply a doubt, and there is no reason for tracing this witness also to Papias. *e.* Eusebius (*H. E.* iii. 24) gives as his own opinion the following: "Matthew having first preached to the Hebrews, delivered to them, when he was preparing to depart to other countries, his Gospel, composed in their native language." Other passages to the same effect occur in Cyril (*Catech.* 14), Epiphanius (*Haer.* li. 2, 1), Hieronymus (*de Vir. ill.* ch. 3), who mentions the Hebrew original in seven places at least of his works, and from Gregory of Nazianzus, Chrysostom, Augustine, and other later writers. From all these there is no doubt that the old opinion was that Matthew wrote in the Hebrew language. To whom we are to attribute the Greek translation, is not shown; but the quotation of Papias proves that in the time of John the Presbyter, and probably in that of Papias, there was no translation of great authority, and Jerome (*de Vir. ill.* ch. 3) expressly says that the translator's name was uncertain.

So far all the testimony is for a Hebrew original. But there are arguments of no mean weight in favour of the Greek, a very brief account of which may be given here. 1. The quotations from the O. T. in this Gospel, which are very numerous (see below), are of two kinds: those introduced into the narrative to point out the fulfilment of prophecies, &c., and those where in the course of the narrative the persons introduced, and especially our Lord Himself, make use of O. T. quotations. Between these two classes a difference of treatment is observable. In the latter class, where the citations occur in discourses, the Septuagint version is followed, even where it deviates somewhat from the original (as iii. 3, xiii. 14), or where it ceases to follow the very words, the deviations do not come from a closer adherence to the Hebrew O. T.; except in two cases, xi. 10 and xxvi. 31. The quotations in the narrative, however, do not follow the Septuagint, but appear to be a translation from the Hebrew text. Thus we have the remarkable phenomenon that, whereas the Gospels agree most exactly in the speeches of persons, and most of all in those of our Lord, the quotations in these speeches are reproduced not by the closest rendering of the Hebrew, but from the Septuagint version, although many or most of them must have been spoken in the vernacular Hebrew, and could have had nothing to do with the Septuagint. A mere translator could not have done this. But an independent writer, using the Greek tongue, and wishing to conform his narrative to the oral teaching of the Apostles (see vol. i. p. 718 *a*), might have used for the quotations the well-known Greek O. T. used by his colleagues. There is an independence in the mode of dealing with citations throughout, which is inconsistent with the function of a mere translator. 2. But this difficulty is to be got over by assuming a high authority for this translation, as though made by an inspired writer; and it has been suggested that this writer was Matthew himself (Bengel, Olshausen, Lee, and others), or at least that he directed it (Guericke), or that it was some other apostle (Gerhard), or James the brother of the Lord, or John, or the general body of the Apostles.

or that two disciples of St. Matthew wrote, from him, the one in Aramaic and the other in Greek! We are further invited to admit, with Dr. Lee, that the Hebrew book "belonged to that class of writings which, although composed by inspired men, were never designed to form part of the Canon" (*On Inspiration*, p. 571). But supposing that there were any good ground for considering these suggestions as facts, it is clear that in the attempt to preserve the letter of the tradition, they have quite altered the spirit of it. Papias and Jerome make a Hebrew original, and dependent translations; the moderns make a Greek original, which is a translation only in name, and a Hebrew original never intended to be preserved. The modern view is not what Papias thought or uttered; and the question would be one of mere names, for the only point worthy of a struggle is this, whether the Gospel in our hands is or is not of apostolic authority, and authentic. 4. Olshausen remarks, "While all the Fathers of the Church relate that Matthew has written in Hebrew, yet they universally make use of the Greek text, as a genuine apostolic composition, without remarking what relation the Hebrew Matthew bears to our Greek Gospel. For that the earlier ecclesiastical teachers did not posses the Gospel of St. Matthew in any other form than we now have it, is established" (*Echtheit*, p. 35). The original Hebrew of which so many speak, no one of the witnesses ever saw (Jerome, *de Vir. ill.* 3, is no exception). And so little store has the Church set upon it, that it has utterly perished. 5. Were there no explanation of this inconsistency between assertion and fact, it would be hard to doubt the concurrent testimony of so many old writers, whose belief in it is shown by the tenacity with which they held it in spite of their own experience. But it is certain that a gospel, not the same as our canonical Matthew, sometimes usurped the Apostle's name; and some of the witnesses we have quoted appear to have referred to this in one or other of its various forms or names. The Christians in Palestine still held that the Mosaic ritual was binding on them, even after the destruction of Jerusalem. At the close of the first century one party existed who held that the Mosaic law was only binding on Jewish converts—this was the Nazarenes. Another, the Ebionites, held that it was of universal obligation on Christians, and rejected St. Paul's Epistles as teaching the opposite doctrine. These two sects, who differed also in the most important tenets as to our Lord's person, possessed each a modification of the same gospel, which no doubt each altered more and more, as their tenets diverged, and which bore various names—the Gospel of the twelve Apostles, the Gospel according to the Hebrews, the Gospel of Peter, or the Gospel according to Matthew. Enough is known to decide that the Gospel according to the Hebrews was not identical with our Gospel of Matthew. But it had many points of resemblance to the synoptical gospels, and especially to Matthew. What was its origin it is impossible to say: it may have been a description of the oral teaching of the Apostles, corrupted by degrees; it may have come in its early and pure form from the hand of Matthew, or it may have been a version of the Greek Gospel of St. Matthew, as the Evangelist who wrote especially for Hebrews. Now this Gospel, "the Proteus of criticism" (Thiersch), did exist; is it impossible that when the Hebrew Matthew is spoken of, this questionable document, the Gospel of the

Hebrews, was really referred to? Observe that all accounts of it are at second hand (with a notable exception); no one quotes it; in cases of doubt about the text, Origen even does not appeal from the Greek to the Hebrew. All that is certain is, that Nazarenes or Ebionites, or both, boasted that they possessed the original Gospel of Matthew. Jerome is the exception; and him we can convict of the very mistake of confounding the two, and almost on his own confession. "At first he thought," says an anonymous writer (*Edinburgh Review*, 1851, July, p. 39), "that it was the authentic Matthew, and translated it into both Greek and Latin from a copy which he obtained at Beroea, in Syria. This appears from his *De Vir. ill.*, written in the year 392. Six years later, in his Commentary on Matthew, he spoke more doubtfully about it,—"quod vocatur *a plerisque* Matthaei authenticum." Later still in his book on the Pelagian heresy, written in the year 415, he modifies his account still further, describing the work as the 'Evangelium juxta Hebraeos, quod Chaldaico quidem Syroque sermone, sed *Hebraicis literis* conscriptum est, quo utuntur usque hodie Nazareni secundum Apostolos, sive *ut plerique autumant* juxta Matthaeum, quod et in Caesariensi habetur Bibliotheca.'" 5. Dr. Lee in his work on Inspiration asserts, by an oversight unusual with such a writer, that the theory of a Hebrew original is "generally received by critics as the only legitimate conclusion." Yet there have pronounced for a Greek original—Erasmus, Calvin, Le Clerc, Fabricius, Lightfoot, Wetstein, Paulus, Lardner, Hey, Hales, Hug, Schott. De Wette, Moses Stuart, Fritzsche, Credner, Thiersch, and many others. Great names are ranged also on the other side; as Simon, Mill, Michaelis, Marsh, Eichhorn, Storr, Olshausen, and others.

With these arguments we leave a great question unsettled still, feeling convinced of the early acceptance and the Apostolic authority of our "Gospel according to St. Matthew;" and far from convinced that it is a reproduction of another Gospel from St. Matthew's hand. May not the truth be that Papias, knowing of more than one Aramaic Gospel in use among the Judaic sects, may have assumed the existence of a Hebrew original from which these were supposed to be taken, and knowing also the genuine Greek Gospel may have looked on all these, in the loose uncritical way which earned for him Eusebius' description, as the various "interpretations" to which he alludes?

The independence of the style and diction of the Greek Evangelist, will appear from the remarks in the next section.

BIBLIOGRAPHY.—Hug's *Einleitung*, with the Notes of Professor M. Stuart, Andover, 1836. Meyer, *Komm. Einleitung*, and the Commentaries of Kuinöl, Fritzsche, Alford, and others. The passages from the Fathers are discussed in Michaelis (ed. Marsh, vol. iii. part i.); and they will be found for the most part in Kirchhofer, *Quellensammlung*; where will also be found the passages referring to the Gospel of the Hebrews, p. 448. Credner's *Einleitung*, and his *Beiträge*; and the often cited works on the Gospels, of Gieseler, Baur, Norton, Olshausen, Weisse, and Hilgenfeld. Also Cureton's *Syriac Gospels*; but the views in the preface must not be regarded as established. Dr. Lee on *Inspiration*, Appendix P., London, 1857.

II. *Style and Diction.*—The following remarks on the style of St. Matthew are founded on those of Credner.

1. Matthew uses the expression "that it might be fulfilled which was spoken of the Lord by the prophet" (i. 22, ii. 15). In ii. 5, and in later passages of Matt. it is abbreviated (ii. 17, iii. 3, iv. 14, viii. 17, xii. 17, xiii. 14, 35, xxi. 4, xxvi. 56, xxvii. 9). The variation ὑπὸ τοῦ Θεοῦ in xxvii. 31, is notable; and also the τοῦτο δὲ ὅλον γέγονεν of i. 22, not found in other Evangelists; but compare Mark xiv. 49; Luke xxiv. 44.

2. The reference to the Messiah under the name Son of David," occurs in Matthew eight times; and three times each in Mark and Luke.

3. Jerusalem is called "the holy city," "the holy place" (iv. 5, xxiv. 15, xxvii. 53).

4. The expression συντέλεια τοῦ αἰῶνος is used five times; in the rest of the N. T. only once, in Ep. to Hebrews.

5. The phrase "kingdom of heaven," about thirty-three times; other writers use "kingdom of God," which is found also in Matthew.

6. "Heavenly Father," used about six times; and "Father in heaven" about sixteen, and without explanation, point to the Jewish mode of speaking in this Gospel.

7. Matthew alone of the Evangelists uses τὸ ῥηθὲν, ἐῤῥέθη as the form of quotation from O. T. The apparent exception in Mark xiii. 14, is rejected by Tischendorf, &c. as a wrong reading. In Matt. about twenty times.

8. Ἀναχωρεῖν is a frequent word for to *retire*. Once in Mark.

9. Κατ' ὄναρ used six times; and here only.

10. The use of προσέρχεσθαι preceding an interview, as in iv. 3, is much more frequent with Matt. than Mark and Luke; once only in John. Compare the same use of πορεύεσθαι, as in ii. 8, far more frequent in Matt.

11. Ἐκεῖθεν after a verb, or participle, six times; the same word used once each by Mark and Luke, but other adjectives.

12. With St. Matthew the particle of transition is usually the indefinite τότε; he uses it ninety times, against six times in Mark and fourteen in Luke.

13. Καὶ ἐγένετο ὅτε, vii. 28, xi. 1, xiii. 53, xix. 1, xxvi. 1; to be compared with the ὅτε ἐγένετο of Luke.

14. Ποιεῖν ὃς, ὅστις, &c., is characteristic of Matthew:—i. 24, vi. 2, xx. 5, xxi. 6, xxvi. 19, xxvii. 15.

15. Τόπος six times in this Gospel, not in the rest. They use μνημεῖον frequently, which is not found seven times in Matt.

16. Συμβούλιον λαμβάνειν, peculiar to Matt. Has ποιεῖν twice in Mark; nowhere else.

17. Παλιγγενεσία, μαθητεύειν, σεληνιάζεσθαι, peculiar to Matt. The following words are either used by this Evangelist alone, or by him more frequently than by the others:—φρόνιμος ἐλεημοσύνη, ὕστερον, ἀπὸ, διατάσσειν, καταναντίζεσθαι, μεταίρειν, ἐκεῖθεν, φράζειν, συναίρειν λόγον.

18. The frequent use of ἰδού after a genitive absolute (as i. 20), and of καὶ ἰδού when introducing anything new, is also peculiar to St. Matt.

19. Adverbs usually stand after the imperative, not before it; except οὕτως, which stands first. Ch. x. 11, is an exception.

20. Προσκυνεῖν takes the dative in St. Matt., as elsewhere more rarely. With Luke and John it takes the accusative. There is one apparent exception in Matt. (ix. 13), but it is a quotation from O. T.

21. The participle λέγων is used frequently without the dative of the person, as in i. 20, ii. 2 Ch. viii. 21 is an exception.

22. The expression ὀμνύειν ἐν or εἰς is a Hebraism, frequent in Matt., and unknown to the other Evangelists.

23. Ἱεροσόλυμα is the name of the holy city with Matt. always, except xxiii. 37. It is the same in Mark, with one (doubtful) exception (xi. 1). Luke uses this form rarely; Ἱερουσαλήμ frequently.

III. *Citations from O. T.*—The following list is nearly complete.

Matt.		Matt.	
i. 23.	Is. vii. 14.	xvii. 2.	Ex. xxxiv. 29.
ii. 6.	Mic. v. 2.	11.	Mal. iii. 1, iv. 5

xv. 8.	Is. xxix. 13.		

The number of passages in this Gospel which refer to the O. T. are about 65. In St. Luke they are 43. But in St. Matthew there are 43 *verbal citations* of O. T.; the number of these direct appeals to its authority in St. Luke is only about 19 This fact is very significant of the character and original purpose of the two narratives.

IV. *Genuineness of the Gospel.*—Some critics, admitting the apostolic antiquity of a part of the Gospel, apply to St. Matthew as they do to St. Luke (see above p. 155) the gratuitous supposition of a later editor or compiler, who by augmenting and altering the earlier document produced our present Gospel. Hilgenfeld (p. 106) endeavours to separate the older from the newer work, and includes much historical matter in the former: since Schleiermacher, several critics, misinterpreting the λόγια of Papias, consider the older document to have been a collection of "discourses" only. We are asked to believe that in the second century for two or more of the Gospels, new works, differing from them both in matter and compass, were substituted for the old, and that about the end of the second century our present Gospels were adopted by authority to the exclusion of all others, and that henceforth the copies of the older works entirely disappeared, and have escaped the keenest research ever since. Eichhorn's notion is that "the Church" sanctioned the four canonical books, and by its authority gave them exclusive currency: but there existed at that

ame no means for convening a Council; and if such a body could have met and decided, it would not have been able to force on the Churches books discrepant from the older copies to which they had long been accustomed, without discussion, protest, and resistance (see Norton, *Genuineness*, Chap. I.). That there was no such resistance or protest we have ample evidence. Irenaeus knows the four Gospels only (*Haer.* iii. ch. 1.). Tatian, who died A.D. 170, composed a harmony of the Gospels, lost to us, under the name of Diatessaron (Eus. *H. E.* iv. 29). Theophilus, bishop of Antioch, about 168, wrote a commentary on the Gospels (Hieron. *ad Algasiam* and *de Vir. ill.*). Clement of Alexandria (flourished about 189) knew the four Gospels, and distinguished between them and the uncanonical Gospel according to the Egyptians. Tertullian (born about 160) knew the four Gospels, and was called on to vindicate the text of one of them against the corruptions of Marcion (see above, LUKE). Origen (born 185) calls the four Gospels the four elements of the Christian faith; and it appears that his copy of Matthew contained the genealogy (*Comm. in Joan.*). Passages from St. Matthew are quoted by Justin Martyr, by the author of the letter to Diognetus (see in Otto's *Justin Martyr*, vol. ii.), by Hegesippus, Irenaeus, Tatian, Athenagoras, Theophilus, Clement, Tertullian, and Origen. It is not merely from the matter but the manner of the quotations, from the calm appeal as to a settled authority, from the absence of all hints of doubt, that we regard it as proved that the book we possess had not been the subject of any sudden change. Was there no heretic to throw back with double force against Tertullian the charge of alteration which he brings against Marcion? Was there no orthodox Church or member of a Church to complain, that instead of the Matthew and the Luke that had been taught to them and their fathers, other and different writings were now imposed on them? Neither the one nor the other appears.

The citations of Justin Martyr, very important for this subject, have been thought to indicate a source different from the Gospels which we now possess: and by the word ἀπομνημονεύματα (memoirs), he has been supposed to indicate that lost work. Space is not given here to show that the remains referred to are the Gospels which we possess, and not any one book; and that though Justin quotes the Gospels very loosely, so that his words often bear but a slight resemblance to the original, the same is true of his quotations from the Septuagint. He transposes words, brings separate passages together, attributes the words of one prophet to another, and even quotes the Pentateuch for facts not recorded in it. Many of the quotations from the Septuagint are indeed precise, but these are chiefly in the Dialogue with Trypho, where, reasoning with a Jew on the O. T., he does not trust his memory, but consults the text. This question is disposed of in Norton's *Genuineness*, vol. i., and in Hug's *Einleitung*.

The genuineness of the two first chapters of the Gospel has been questioned; but is established on satisfactory grounds (see Fritzsche, *on Matt.*, Excursus iii.; Meyer, *on Matt.* p. 65). i. All the old MSS. and versions contain them; and they are quoted by the Fathers of the 2nd and 3rd centuries (Irenaeus, Clement Alex., and others). Celsus also knew ch. ii. (see Origen cont. Cels. i. 38). ii. Their contents would naturally form part of a Gospel intended primarily for the Jews. iii. The commencement of ch. iii. is dependent on ii. 23; and in iv. 13 there is a reference to ii. 23. iv. In constructions and expressions they are similar to the rest of the Gospel (see examples above, in II. *Style and diction*). Professor Norton disputes the genuineness of these chapters upon the ground of the difficulty of harmonising them with St. Luke's narrative, and upon the ground that a large number of the Jewish Christians did not possess them in their version of the Gospel. The former objection is discussed in all the commentaries; the answer would require much space. But, 1. Such questions are by no means confined to these chapters, but are found in places of which the Apostolic origin is admitted. 2. The treatment of St. Luke's Gospel by Marcion (above, pp. 152, 153) suggests how the Jewish Christians dropped out of their version an account which they would not accept. 3. Prof. N. stands alone, among those who object to the two chapters, in assigning the genealogy to the same author as the rest of the chapters (Hilgenfeld, p. 46, 47). 4. The difficulties in the harmony are all reconcileable, and the day has passed, it may be hoped, when a passage can be struck out, against all the MSS. and the testimony of early writers, for subjective impressions about its contents.

On the whole, it may be said that we have for the genuineness and Apostolic origin of our Greek Gospel of Matthew, the best testimony that can be given for any book whatever.

V. *Time when the Gospel was written.*—Nothing can be said on this point with certainty. Some of the ancients think that it was written in the eighth year after the Ascension (Theophylact and Euthymius); others in the fifteenth (Nicephorus, *H. E.* ii. 45); whilst Irenaeus says (iii. 1) that it was written "when Peter and Paul were preaching in Rome," and Eusebius (*H. E.* iii. 24), at the time when Matthew was about to leave Palestine. From two passages xxvii. 7, 8, xxviii. 15, some time must have elapsed between the events and the description of them, and so the eighth year seems out of the question; but a term of fifteen or twenty years would satisfy these passages. The testimony of old writers that Matthew's Gospel is the earliest must be taken into account (Origen in Eus. *H. E.* vi. 25; Irenaeus iii. 1; comp. Muratorian fragment, as far as it remains, in Credner's *Kanon*); this would bring it before A.D. 58–60 (above, p. 154), the supposed date of St. Luke. The most probable supposition is that it was written between 50 and 60; the exact year cannot even be guessed at.

VI. *Place where it was written.*—There is not much doubt that the Gospel was written in Palestine. Hug has shown elaborately, from the diffusion of the Greek element over and about Palestine, that there is no inconsistency between the assertions that it was written for Jews in Palestine, and that it was written in Greek (*Einleitung*, ii., ch. 1. § 10); the facts he has collected are worth study.

VII. *Purpose of the Gospel.*—The Gospel itself tells us by plain internal evidence that it was written for Jewish converts, to show them in Jesus of Nazareth the Messiah of the O. T. whom they expected. Jewish converts over all the world seem to have been intended, and not merely Jews in Palestine (Irenaeus, Origen, and Jerome say simply that it was written "for the Hebrews"). Jesus is the Messiah of the O. T., recognisable by Jews from his acts as such (i. 22, ii. 5, 15 17. iv. 14

viii. 17, xii. 17-21, xiii. 35, xxi. 4, xxvii. 9). Knowledge of Jewish customs and of the country is presupposed in the readers (Matt. xv. 1, 2 with Mark vii. 1-4; Matt. xxvii. 62 with Mark xv. 42; Luke xxiii. 54; John xix. 14, 31, 42, and other places). Jerusalem is the holy city (see above, *Style and diction*). Jesus is the son of David, of the seed of Abraham (i. 1, ix. 27, xii. 23, xv. 22, xx. 30, xxi. 9, 15); is to be born of a virgin in David's place, Bethlehem (i. 22, ii. 6); must flee into Egypt and be recalled thence (ii. 15, 19); must have a forerunner, John the Baptist (iii. 3, xi. 10); was to labour in the outcast Galilee that sat in darkness (iv. 14-16); His healing was a promised mark of His office (viii. 17, xii. 17); and so was His mode of teaching in parables (xiii. 14); He entered the holy city as Messiah (xxi. 5-16); was rejected by the people, in fulfilment of a prophecy (xxi. 42); and deserted by His disciples in the same way (xxvi. 31, 56). The Gospel is pervaded by one principle, the fulfilment of the Law and of the Messianic prophecies in the person of Jesus. This at once sets it in opposition to the Judaism of the time; for it rebuked the Pharisaic interpretations of the Law (v., xxiii.), and proclaimed Jesus as the Son of God and the Saviour of the world through His blood, ideas which were strange to the cramped and limited Judaism of the Christian era.

VIII. *Contents of the Gospel.*—There are traces in this Gospel of an occasional superseding of the chronological order. Its principal divisions are—I. The Introduction to the Ministry, i.–iv. II. The laying down of the new Law for the Church in the Sermon on the Mount, v.–vii. III. Events in historical order, showing Him as the worker of Miracles, viii. and ix. IV. The appointment of Apostles to preach the Kingdom, x. V. The doubts and opposition excited by His activity in divers minds—in John's disciples, in sundry cities, in the Pharisees, xi. and xii. VI. A series of parables on the nature of the Kingdom, xiii. VII. Similar to V. The effects of His ministry on His countrymen, on Herod, the people of Gennesaret, Scribes and Pharisees, and on multitudes, whom He feeds, xiii. 53—xvi. 12. VIII. Revelation to His disciples of His sufferings. His instructions to them thereupon, xvi. 13—xviii. 35. IX. Events of a journey to Jerusalem, xix., xx. X. Entrance into Jerusalem and resistance to Him there, and denunciation of the Pharisees, xxi.–xxiii. XI. Last discourses; Jesus as Lord and Judge of Jerusalem, and also of the world, xxiv., xxv. XII. Passion and Resurrection, xxvi.–xxviii.

Sources.—The works quoted under LUKE, p. 1361; and Norton, *Genuineness of the Gospels*; Fritzsche, *on Matthew*; Lange, *Bibelwerk*; Credner, *Einleitung* and *Beiträge*. [W. T.]

MATTHI'AS (**Ματθίας**: *Matthias*), the Apostle elected to fill the place of the traitor Judas (Acts i. 26). All beyond this that we know of him for certainty is that he had been a constant attendant upon the Lord Jesus during the whole course of His ministry; for such was declared by St. Peter to be the necessary qualification of one who was to be a witness of the resurrection. The name of Matthias occurs in no other place in the N. T. We may accept as probable the opinion which is shared by Eusebius (*H. E.* lib. i. 12) and Epiphanius (i. 20) that he was one of the seventy disciples. It is said that he preached the Gospel and suffered martyrdom in Ethiopia (Nicephor. ii. 40). Cave believes that it was rather in Cappadocia. An apocryphal gospel was published under his name (Euseb. *H. E.* iii. 23), and Clement of Alexandria quotes from the Traditions of Matthias (*Strom.* ii. 163, &c.).

Different opinions have prevailed as to the manner of the election of Matthias. The most natural construction of the words of Scripture seems to be this:—After the address of St. Peter, the whole assembled body of the brethren, amounting in number to about 120 (Acts i. 15), proceeded to nominate two, namely, Joseph surnamed Barsabas, and Matthias, who answered the requirements of the Apostle: the subsequent selection between the two was referred in prayer to Him who, knowing the hearts of men, knew which of them was the fitter to be His witness and apostle. The brethren then, under the heavenly guidance which they had invoked, proceeded to give forth their lots, probably by each writing the name of one of the candidates on a tablet, and casting it into the urn. The urn was then shaken, and the name that first came out decided the election. Lightfoot (*Hor. Heb. Luc.* i. 9) describes another way of casting lots which was used in assigning to the priests their several parts in the service of the Temple. The apostles, it will be remembered, had not yet received the gift of the Holy Ghost, and this solemn mode of casting the lots, in accordance with a practice enjoined in the Levitical law (Lev. xvi. 8), is to be regarded as a way of referring the decision to God (comp. Prov. xvi. 33). St. Chrysostom remarks that it was never repeated after the descent of the Holy Spirit. The election of Matthias is discussed by Bishop Beveridge, *Works*, vol. i. serm. 2. [E. H—s.]

MATTHI'AS (**Ματταθίας**: *Mathathias*) = MATTATHAH, of the descendants of Hashum (1 Esdr. ix. 33; comp. Ezr. x. 33).

MATTITHI'AH (מַתִּתְיָה: **Ματθαθίας**; Alex. **Ματταθίας**: *Mathathias*). 1. A Levite, the first-born of Shallum the Korhite, who presided over the offerings made in the pans (1 Chr. ix. 31; comp. Lev. vi. 20 [12], &c.).

2. (**Ματταθίας**.) One of the Levites of the second rank under Asaph, appointed by David to minister before the ark in the musical service (1 Chr. xvi. 5), "with harps upon Shemiuith" (comp. 1 Chr. xv 21), to lead the choir. See below, 5.

3. (**Ματθανίας**; Alex. **Μαθθαθίας**.) One of the family of Nebo, who had married a foreign wife in the days of Ezra (Neh. x. 43). He is called MAZITIAS in 1 Esdr. ix. 35.

4. (**Ματθαθίας**; Alex. **Ματταθίας**.) Probably a priest, who stood at the right hand of Ezra when he read the law to the people (Ezr. viii. 4). In 1 Esdr. ix. 43, he appears as MATTATHIAS.

5. (מַתִּתְיָהוּ): **Ματθαθία**; Alex. **Ματταθία**; 1 Chr. xv. 18, **Ματταθίας**; 1 Chr. xv. 21, **Ματθαθίας**; Alex. **Ματταθίας**, 1 Chr. xxv. 3; **Ματθίας**, 1 Chr. xxv. 21). The same as 2, the Hebrew being in the lengthened form. He was a Levite of the second rank, and a doorkeeper of the ark (1 Chr. xv. 18, 21). As one of the six sons of Jeduthun, he was appointed to preside over the 14th division of twelve Levites into which the Temple choir was distributed (1 Chr. xxv. 3, 21).

MATTOCK.[a] The tool used in Arabia for

[a] 1. מַעֲדֵר; *sarculum*, Is. vii. 25. 2. מִזְרֶשָׁה, ἄροτρον, *sarculum* and מַחֲרֵשָׁה, ἀριστήριον, *ploughshare*, both

loosening the ground, described by Niebuhr, answers generally to our mattock or grubbing-axe, *i. e.* a single-headed pickaxe, the *sarculus simplex*, as opposed to *bicornis*, of Palladius. The ancient Egyptian hoe was of wood, and answered for hoe, spade, and pick. The blade was inserted in the handle, and the two were attached about the centre by a twisted rope. (Palladius, *de Re rust.* i. 43; Niebuhr, *Descr. de l'Ar.* p. 137; Loudon, *Encycl. of Gardening*, p. 517; Wilkinson, *Anc. Eg.* ii. 16, 18, abridgm.; comp. Her. ii. 14; Hasselquist, *Trav.* p. 100.) [HANDICRAFT.] [H. W. P.]

Egyptian hoes. (From Wilkinson.)

MAUL (*i. e.* a hammer; a variation of mall, from *malleus*), a word employed by our translators to render the Hebrew term מַפֵּץ. The Hebrew and English alike occur in Prov. xxv. 18 only. But a derivative from the same root, and differing but slightly in form, viz. מַפָּץ, is found in Jer. li. 20, and is there translated by "battle-ax"—how incorrectly is shown by the constant repetition of the verb derived from the same root in the next three verses, and there uniformly rendered "break in pieces." The root נָפַץ or פּוּץ, has the force of dispersing or smashing, and there is no doubt that some heavy warlike instrument, a mace or club, is alluded to. Probably such as that which is said to have suggested the name of Charles *Martel*.

The mace is frequently mentioned in the accounts of the wars of the Europeans with Saracens, Turks, and other Orientals, and several kinds are still in use among the Bedouin Arabs of remoter parts (Burckhardt, *Notes on Bedouins*, i. 55.) In their European wars the Turks were notorious for the use they made of the mace (Knollys' *Hist. of the Turks*).

A similar word is found once again in the original of Ez. ix. 2, כְּלִי מַפָּץ = weapon of smashing (A. V. "slaughter-weapon"). The sequel shows how terrible was the destruction such weapons could effect. [G.]

MAUZ'ZIM (מָעֻזִּים: Μαωζείμ; Alex. Μαωζεί: *Maozim*). The marginal note to the A. V. of Dan. xi. 38, "the God of *forces*," gives, as the equivalent of the last word, "Mauzzim, or gods protectors, or munitions." The Geneva version renders the Hebrew as a proper name both in Dan. xi. 38 and 39, where the word occurs again (marg. of A. V. "munitions"). In the Greek version of Theodotion, given above, it is treated as a proper name, as well as in the Vulgate. The LXX. as at present printed is evidently corrupt in this passage, but ἰσχυρά (ver. 37) appears to represent the word in question. In Jerome's time the reading was different, and he gives "Deum fortissimum" for the Latin translation of it, and "Deum fortitudinum" for that of Aquila. He ridicules the interpretation of Porphyry, who, ignorant of Hebrew, understood by "the god of *Mauzzim*" the statue of Jupiter set up in *Modin*, the city of Mattathias and his sons, by the generals of Antiochus, who compelled the Jews to sacrifice to it, "the god of Modin." Theodoret retains the reading of Theodotion (Μαζωείμ being evidently for Μαωζείμ), and explains it of Antichrist, "a god strong and powerful." The Peshito-Syriac has ܐܠܗ ܚܣܝܠܐ, "the strong god," and Junius and Tremellius render it "Deum summi roboris," considering the Hebrew plural as intensive, and interpreting it of the God of Israel. There can be little doubt that "Mauzzim" is to be taken in its literal sense of "fortresses," just as in Dan. xi. 19, 39, "the god of fortresses" being then the deity who presided over strongholds. But beyond this it is scarcely possible to connect an appellation so general with any special object of idolatrous worship. Grotius conjectured that Mauzzim was a modification of the name Ἄζιζος, the war-god of the Phoenicians, mentioned in Julian's hymn to the sun. Calvin suggested that it denoted "money," the strongest of all powers. By others it has been supposed to be Mars, the tutelary deity of Antiochus Epiphanes, who is the subject of allusion. The only authority for this supposition exists in two coins struck at Laodicea, which are believed to have on the obverse the head of Antiochus with a radiated crown, and on the reverse the figure of Mars with a spear. But it is asserted on the contrary that all known coins of Antiochus Epiphanes bear his name, and that it is mere conjecture which attributes these to him; and further, that there is no ancient authority to show that a temple to Mars was built by Antiochus at Laodicea. The opinion of Gesenius is more probable, that "the god of fortresses" was Jupiter Capitolinus, for whom Antiochus built a temple at Antioch (Liv. xli. 20). By others it is referred to Jupiter Olympius, to whom Antiochus dedicated the Temple at Jerusalem (2 Macc. vi. 2). But all these are simply conjectures. Fürst (*Handw.* s. v.), comparing Is. xxxiii. 4, where the reference is to Tyre, "the fortress of the sea," makes מָעֻזִּים equivalent to מָעוֹז חַיִּים, or even proposes to read for the former מָעֻזִּים, the god of the "stronghold of the sea" would thus be Melkart, the Tyrian Hercules. A suggestion made by Mr. Layard (*Nin.* ii. 456, note), is worthy of being recorded, as being at least as well founded as any already mentioned. After describing Hera, the Assyrian Venus, as "standing erect on a lion, and crowned with a tower or mural coronet, which, we learn from Lucian, was peculiar to the Semitic figure of the goddess," he adds in a note, "May she be connected with the 'El Maozem,' the deity presiding over bulwarks and for-

from חָרַשׁ, "carve," "engrave," 1 Sam. xiii. 20. Which of these is the ploughshare and which the mattock cannot be ascertained. See Geo. p. 530.

treasse, the 'god of forces' of Dan. xi. 38?" Pfeiffer (*Dub. Vex.* cent. 4, loc. 72) will only see in it "the idol of the *Mass!*" [W. A. W.]

MAZITI'AS (Μαζιτίας: *Mathathias*) = MATTITHIAH 3 (1 Esd. ix. 35; comp. Ezr. x. 43).

MAZ'ZAROTH (מַזָּרוֹת: Μαζουρώθ: *Lucifer*). The margin of the A. V. of Job xxxviii. 32 gives "the twelve signs" as the equivalent of "Mazzaroth," and this is in all probability its true meaning. The Peshito-Syriac renders it by ܐܓܠܬܐ, *egalta*, "the wain" or "Great Bear;" and J. D. Michaelis (*Suppl. ad Lex. Heb.* No. 1391) is followed by Ewald in applying it to the stars of "the northern crown" (Ewald adds "the southern"), deriving the word from נָזַר, *názar*, "a crown." Fürst (*Handw.* s. v.) understands by Mazzaroth the planet Jupiter, the same as the "star" of Amos v. 26.[a] But the interpretation given in the margin of our version is supported by the authority of Gesenius (*Thes.* p. 869). On referring to 2 K. xxiii. 5, we find the word מַזָּלוֹת, *mazzálóth* (A. V. "the planets"), differing only from Mazzaroth in having the liquid *l* for *r*, and rendered in the margin "the twelve signs," as in the Vulgate. The LXX. there also have μαζουρώθ, which points to the same reading in both passages, and is by Suidas explained as "the Zodiac," but by Procopius of Gaza as probably "Lucifer, the morning star," following the Vulgate of Job xxxviii. 32. In later Jewish writings *mazzálóth* are the signs of the Zodiac, and the singular, *mazzál*, is used to denote the single signs, as well as the planets, and also the influence which they were believed to exercise upon human destiny (Selden, *De Dis Syr.* Synt. i. c. 1). In consequence of this, Jarchi, and the Hebrew commentators generally, identify *mazzáróth* and *mazzaróth*, though their interpretations vary. Aben Ezra understands "stars" generally; but R. Levi ben Gershom, "a northern constellation." Gesenius himself is in favour of regarding *mazzáróth* as the older form, signifying strictly "premonitions," and in the concrete sense, "stars that give warnings or presages," from the usage of the root נָזַר, *názar*, in Arabic. He deciphered, as he believed, the same word on some Cilician coins in the inscription מזר זך על, which he renders as a prayer, "may thy pure star (shine) over (us)" (*Mon. Phoen.* p. 279, tab. 36). [W. A. W.]

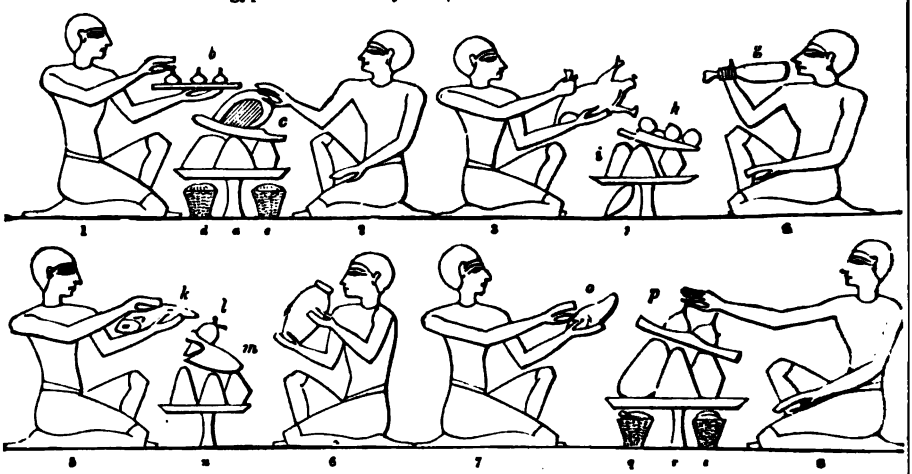
MEADOW. This word, so peculiarly English, is used in the A. V. to translate two words which are entirely distinct and independent of each other.

1. Gen. xli. 2 and 18. Here the word in the original is הָאֲחוּ (with the definite article), *ha-Achú*. It appears to be an Egyptian term, literally transferred into the Hebrew text, as it is also into that of the Alexandrian translators, who give it as τὸ Ἀχείν.[b] The same form is retained by the Coptic ϩⲁϫⲓ. Its use in Job viii. 11 (A. V. "flag") —where it occurs as a parallel to *gómé* (A. V. "rush"), a word used in Ex. ii. 3 for the "bulrushes" of which Moses' ark was composed—seems to shew that it is not a "meadow," but some kind of reed or water-plant. This the LXX. support, both by rendering in the latter passage βούτομον, and also by introducing Ἀχεί as the equivalent of the word rendered "paper-reeds" in Is. xix. 7. St. Jerome, in his commentary on the passage, also confirms this meaning. He states that he was informed by learned Egyptians that the word *achi* denoted in their tongue any green thing that grew in a marsh—*omne quod in palude virens nascitur*. But as during high inundations of the Nile—such inundations as are the cause of fruitful years—the whole of the land on either side is a marsh, and as the cultivation extends up to the very lip of the river, is it not possible that *Achu* may denote the herbage of the growing crops? The fact that the cows of Pharaoh's vision were feeding there would seem to be as strong a figure as could be presented to an Egyptian of the extreme fruitfulness of the season: so luxuriant was the growth on either side of the stream, that the very cows fed amongst it unmolested. The lean kine, on the other hand, merely stand on the dry brink. [NILE.] No one appears yet to have attempted to discover on the spot what the signification of the term is.

2. Judg. xx. 33 only: "the meadows of Gibeah." Here the word is מַעֲרֶה, *Maareh*, which occurs no where else with the same vowels attached to it. The sense is thus doubly uncertain. "Meadows" around Gibeah can certainly never have existed: the nearest approach to that sense would be to take *maareh* as meaning an open plain. This is the dictum of Gesenius (*Thes.* 1069), on the authority of the Targum. It is also adopted by De Wette (*die Bücher von G.*). But if an open plain, where could the ambush have concealed itself?

The LXX., according to the Alex. MS.,[c] read a different Hebrew word—מַעֲרָב—"from the west of Gibeah." Tremellius, taking the root of the word in a figurative sense, reads "after Gibeah had been left open," *i. e.* by the quitting of its inhabitants —*post denudationem Gibeae*. This is adopted by Bertheau (*Kurzgef. Handb.* ad loc.) But the most plausible interpretation is that of the Peshito-Syriac, which by a slight difference in the vowel-points makes the word מְעָרָה, "the cave;" a suggestion quite in keeping with the locality, which is very suitable for caves, and also with the requirements of the ambush. The only thing that can be said against this is that the liers-in-wait were "set round about" Gibeah, as if not in one spot, but several. [G.]

ME'AH, THE TOWER OF (מְאָה הַמֵּאָה: πύργος τῶν ἑκατόν: *turris centum cubitorum, turrim Emeth*), one of the towers of the wall of Jerusalem when rebuilt by Nehemiah (iii. 1, xii. 39). It stood between the tower of Hananeel and the sheep-gate, and appears to have been situated somewhere at the north-east part of the city, out side of the walls of Zion (see the diagram, vol. i. p. 1027). The name in Hebrew means "the tower of the hundred," but whether a hundred cubits of distance from some other point, or a hundred in height (Syriac of xii. 39), or a hundred heroes com-



[a] A note to the Hexaplar Syriac version of Job (ed. Middeldorpf, 1835) has the following: "Some say it is the dog of the giant (Orion, *i. e.* Canis major), others that it is the Zodiac."

[b] This is the reading of Codex A. Codex B, if we may accept the edition of Mai, has ελει; so also the rendering of Aquila and Symmachus, and of Josephus (*Ant.* ii. 5, §5). Another version, quoted in the fragments of the Hexapla, attempts to reconcile sound and sense by ἐχθύς. The Veneto-Greek has λειμών.

[c] The Vatican Codex translates the word literally —Μαραγαβά.

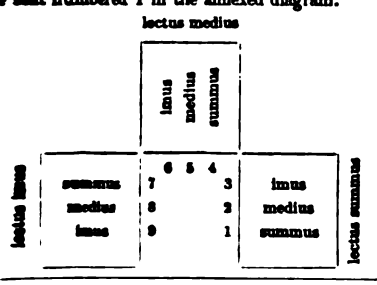
memorated by it, we are not told or enabled to infer. In the Arabic version it is rendered *Bab-el-bostân*, the gate of the garden, which suggests its identity with the "gate Gennath"[d] of Josephus. But the gate Gennath appears to have lain further round towards the west, nearer the spot where the ruin known as the *Kasr Jalûd* now stands. [G.]

MEALS. Our information on this subject is but scanty: the early Hebrews do not seem to have given special names to their several meals, for the terms rendered "dine" and "dinner" in the A. V. (Gen. xliii. 16; Prov. xv. 17) are in reality general expressions, which might more correctly be rendered "eat" and "portion of food." In the N. T. we have the Greek terms ἄριστον and δεῖπνον, which the A. V. renders respectively "dinner" and "supper"[a] (Luke xiv. 12; John xxi. 12), but which are more properly "breakfast" and "dinner." There is some uncertainty as to the hours at which the meals were taken: the Egyptians undoubtedly took their principal meal at noon (Gen. xlm. 16): labourers took a light meal at that time (Ruth ii. 14; comp. verse 17); and occasionally that early hour was devoted to excess and revelling (1 K. xx. 16). It has been inferred from those passages (somewhat too hastily, we think) that the principal meal generally took place at noon: the Egyptians do indeed still make a substantial meal at that time (Lane's *Mod. Egypt.* i. 189), but there are indications that the Jews rather followed the custom that prevails among the Bedouins, and made their principal meal after sunset, and a lighter meal at about 9 or 10 A.M. (Burckhardt's *Notes*, i. 64). For instance, Lot prepared a feast for the two angels "at even" (Gen. xix. 1-3): Boaz evidently took his meal late in the evening (Ruth iii. 7): the Israelites ate *flesh* in the evening, and *bread* only, or manna, in the morning (Ex. xvi. 12): the context seems to imply that Jethro's feast was in the evening (Ex. xviii. 12, 14). But, above all, the institution of the Paschal feast

An ancient Egyptian dinner party. (Wilkinson.)

a, j, n, r. Tables with various dishes. b, p. Figs. d, e, q, and c. Baskets of grapes. Fig. 3 is taking a wing from a goose. Fig. 4 holds a joint of meat. Figs. 5 and 7 are eating fish. Fig. 6 is about to drink water from an earthen vessel.

in the evening seems to imply that the principal meal was usually taken then: it appears highly improbable that the Jews would have been ordered to eat meat at an unusual time. In the later Biblical period we have clearer notices to the same effect: breakfast took place in the morning (John xxi. 4, 12), on ordinary days not before 9 o'clock, which was the first hour of prayer (Acts ii. 15), and on the Sabbath not before 12, when the service of the synagogue was completed (Joseph. *Vit.* §54): the more prolonged and substantial meal took place in the evening (Joseph. *Vit.* §44; *B. J.* i. 17, §4). The general tenour of the parable of the great supper certainly implies that the feast took place in the working hours of the day (Luke xiv. 15-24): but we may regard this perhaps as part of the imagery of the parable, rather than as a picture of real life.



The posture at meals varied at various periods. there is sufficient evidence that the old Hebrews were in the habit of *sitting* (Gen. xxvii. 19; Judg. xix. 6; 1 Sam. xx. 5, 24; 1 K. xiii. 20), but it does not hence follow that they sat on chairs; they may have squatted on the ground, as was the occasional, though not perhaps the general, custom of the ancient Egyptians (Wilkinson, *Anc. Eg.* i. 58, 181). The table was in this case but slightly elevated above the ground, as is still the case in Egypt. At the same time the chair[b] was not unknown to the Hebrews, but seems to have been regarded as a token of dignity. As luxury increased, the practice of sitting was exchanged for that of reclining: the first intimation of this occurs in the prophecies of Amos, who reprobates those "that lie upon beds of ivory, and stretch themselves upon their couches" (vi. 4), and it ap-

[d] Possibly from גַּנּוֹת, *gannôth*, "gardens," perhaps alluding to the gardens which lay north of the city.

[a] The Greek word δεῖπνον was used indifferently in the Homeric age for the early or the late meal, its special meaning being the *principal* meal. In later times, however, the term was applied exclusively to the late meal, —the δόρπον of the Homeric age.

[b] The Hebrew term is *kisse'* (כִּסֵּא). There is only one instance of its being mentioned as an article of ordinary furniture, viz., in 2 K. iv. 10, where the A. V. incorrectly renders it "stool." Even there it seems probable that it was placed more as a mark of special honour to the prophet than for common use.

pears that the couches themselves were of a costly character—the "corners"[c] or *edges* (iii. 12) being furnished with ivory, and the seat covered with silk or damask coverlets.[d] Ezekiel, again, inveighs against one who sat "on a stately bed with a table prepared before it" (xxiii. 41). The custom may have been borrowed in the first instance from the Babylonians and Syrians, among whom it prevailed at an early period (Esth. i. 6, vii. 8). A similar change took place in the habits of the Greeks, who are represented in the Heroic age as *sitting*[e] (*Il.* x. 578; *Od.* i. 145), but who afterwards adopted the habit of reclining, women and children excepted. In the time of our Saviour reclining was the universal custom, as is implied in the terms[f] used for "*sitting* at meat," as the A. V. incorrectly has it. The couch itself (κλίνη) is only once mentioned (Mark vii. 4; A. V. "tables"), but there can be little doubt that the Roman *triclinium* had been introduced, and that the arrangements of the table resembled those described by classical writers. Generally speaking, only three persons reclined on each couch, but occasionally four or even five. The couches were provided with cushions on which the left elbow rested in support of the upper part of the body, while the right arm remained free: a room provided with these was described as ἐστρωμένον, lit. "spread" (Mark xiv. 15; A. V. "furnished"). As several guests reclined on the same couch, each overlapped his neighbour, as it were, and rested his head on or near the breast of the one who lay behind him: he was then said to "lean on the bosom" of his neighbour (ἀνακεῖσθαι ἐν τῷ κόλπῳ, John xiii. 23, xxi. 20; comp. Plin. *Epist.* iv. 22). The close proximity into which persons were thus brought rendered it more than usually agreeable that friend should be next to friend, and it gave the opportunity of making confidential communications (John xiii. 25). The ordinary arrangement of the couches was in three sides of a square, the fourth being left open for the servants to bring up the dishes. The couches were denominated respectively the highest, the middle, and the lowest couch; the three guests on each couch were also denominated highest, middle, and lowest—the terms being suggested by the circumstance of the guest who reclined on another's bosom always appearing to be *below* him. The *protoklisia* (πρωτοκλισία, Matt. xxiii. 6), which the Pharisees so much coveted, was not, as the A. V. represents it, "the uppermost rooms," but the highest seat in the highest couch—the seat numbered 1 in the annexed diagram.

Some doubt attends the question whether the females took their meals along with the males. The present state of society in the East throws no light upon this subject, as the customs of the Harem date from the time of Mahomet. The cases of Ruth amid the reapers (Ruth ii. 14), of Elkanah with his wives (1 Sam. i. 4), of Job's sons and daughters (Job i. 4), and the general intermixture of the sexes in daily life, make it more than probable that they did so join; at the same time, as the duty of attending upon the guests devolved upon them (Luke x. 40), they probably took a somewhat irregular and briefer repast.

Washing before or after a meal. (From Lane's *Modern Egyptians*.)

Before commencing the meal, the guests washed their hands. This custom was founded on natural decorum; not only was the hand the substitute for our knife and fork, but the hands of all the guests were dipped into one and the same dish; uncleanliness in such a case would be intolerable. Hence not only the Jews, but the Greeks (*Od.* i. 136), the modern Egyptians (Lane, i. 190), and many other nations, have been distinguished by this practice; the Bedouins in particular are careful to wash their hands *before*, but are indifferent about doing so *after* their meals (Burckhardt's *Notes*, i. 63). The Pharisees transformed this conventional usage into a ritual observance, and overlaid it with burdensome regulations—a wilful perversion which our Lord reprobates in the strongest terms (Mark vii. 1-13). Another preliminary step was the grace or blessing, of which we have but one instance in the O. T. (1 Sam. ix. 13), and more than one pronounced by our Lord Himself in the N. T. (Matt. xv. 36; Luke ix. 16: John vi. 11); it consisted, as far as we may judge from the words applied to it, partly of a blessing upon the food, partly of thanks to the Giver of it. The Rabbinical writers have, as usual, laid down most minute regulations respecting it, which may be found in the treatise of the Mishna, entitled *Berachoth*, chaps. 6-8.

The mode of taking the food differed in no material point from the modern usages of the East generally there was a single dish into which each

[c] The word is פֵּאָה (פֵּאָה), which will apply to the edge as well as to the angle of a couch. That the seat and couches of the Assyrians were handsomely ornamented, appears from the specimens given by Layard (*Nineveh*, ii. 360-2).

[d] The A. V. has "in Damascus in a couch;" but there can be no doubt that the name of the town was transferred to the silk stuffs manufactured there, which are still known by the name of "Damask."

[e] Sitting appears to have been the posture usual among the Assyrians on the occasion of great festivals. A bas-relief on the walls of Khorsabad represents the guests seated on high chairs (Layard, *Nineveh*, ii. 411).

[f] Ἀνακεῖσθαι, κατακεῖσθαι, ἀναπίπτειν, κατακλίνεσθαι.

guest dipped his hand (Matt. xxvi. 23); occasionally separate portions were served out to each (Gen. xliii. 34; Ruth ii. 14; 1 Sam. i. 4). A piece of bread was held between the thumb and two fingers of the right hand, and was dipped either into a bowl of melted grease (in which case it was termed ψωμίον, "a sop," John xiii. 26), or into the dish of meat, whence a piece was conveyed to the mouth between the layers of bread (Lane, i. 193, 194; Burckhardt's *Notes*, i. 63). It is esteemed an act of politeness to hand over to a friend a delicate morsel (John xiii. 26; Lane, i. 194). In allusion to the above method of eating, Solomon makes it a characteristic of the sluggard, that "he hideth his hand in his bosom and will not so much as bring it to his mouth again" (Prov. xix. 24, xxvi. 15). At the conclusion of the meal, grace was again said in conformity with Deut. viii. 10, and the hands were again washed.

A party at dinner or supper. (From Lane's *Modern Egyptians*.)

Thus far we have described the ordinary meal: on state occasions more ceremony was used, and the meal was enlivened in various ways. Such occasions were numerous, in connexion partly with public, partly with private events: in the first class we may place—the great festivals of the Jews (Deut. xvi.; Tob. ii. 1); public sacrifices (Deut. xii. 7; xxvii. 7; 1 Sam. ix. 13, 22; 1 K. i. 9, iii. 15; Zeph. i. 7); the ratification of treaties (Gen. xxvi. 30, xxxi. 54); the offering of the tithes (Deut. xiv. 26), particularly at the end of each third year (Deut. xiv. 28): in the second class—marriages (Gen. xxix. 22; Judg. xiv. 10; Esth. ii. 18; Tob. viii. 19; Matt. xxii. 2; John ii. 1), birth-days (Gen. xl. 20; Job i. 4; Matt. xiv. 6, 9), burials (2 Sam. iii. 35; Jer. xvi. 7; Hos. ix. 4; Tob. iv. 17), sheep-shearing (1 Sam. xxv. 2, 36; 2 Sam. xiii. 23), the vintage (Judg. ix. 27), laying the foundation stone of a house (Prov. ix. 1-5), the reception of visitors (Gen. xviii. 6-8, xix. 3; 2 Sam. iii. 20, xii. 4; 2 K. vi. 23; Tob. vii. 9; 1 Macc. xvi. 15; 2 Macc. ii. 27; Luke v. 29, xv. 23; John xii. 2), or any event connected with the sovereign (Hos. vii. 5).[g] On each of these occasions a sumptuous repast was prepared; the guests were previously invited (Esth. v. 8; Matt. xxii. 3), and on the day of the feast a second invitation was issued to those that were bidden (Esth. vi. 14; Prov. ix. 3; Matt. xxii. 3). The visitors were received with a kiss (Tob. vii. 6, Luke vii. 45); water was produced for them to wash their feet with (Luke vii. 44); the head, the beard, the feet, and sometimes the clothes, were perfumed with ointment (Ps. xxiii. 5; Am. vi. 6; Luke vii. 38; John xii. 3); on special occasions robes were provided (Matt. xxii. 11; comp. Trench on *Parables*, p. 230); and the head was decorated with wreaths[h] (Is. xxviii. 1; Wisd. ii. 7, 8; Joseph. *Ant.* xix. 9, §1). The regulation of the feast was under the superintendence of a special officer, named ἀρχιτρίκλινος[i] (John ii. 8; A. V. "governor of the feast"), whose business it was to taste the food and the liquors before they were placed on the table, and to settle about the toasts and amusements; he was generally one of the guests (Ecclus. xxxii. 1, 2), and might therefore take part in the conversation. The places of the guests were settled according to their respective rank (Gen. xliii. 33; 1 Sam. ix. 22, Luke xiv. 8; Mark xii. 39; John xiii. 23); portions of food were placed before each (1 Sam. i. 4; 2 Sam. vi. 19; 1 Chr. xvi. 3), the most honoured guests receiving either larger (Gen. xliii. 34; comp. Herod. vi. 57) or more choice (1 Sam. ix. 24; comp. *Il.* vii. 321) portions than the rest. The importance of the feast was marked by the number of the guests (Gen. xxix. 22; 1 Sam. ix. 22; 1 K. i. 9, 25; Luke v. 29, xiv. 16), by the splendour of the vessels (Esth. i. 7), and by the profusion or the excellence of the viands (Gen. xviii. 6, xxvii. 9; Judg. vi. 19; 1 Sam. ix. 24; Is. xxv. 6 Am. vi. 4). The meal was enlivened with music singing, and dancing (2 Sam. xix. 35; Ps. lxix. 12; Is. v. 12; Am. vi. 5; Ecclus. xxxii. 3-6; Matt. xiv. 6; Luke xv. 25), or with riddles (Judg. xiv. 12); and amid these entertainments the festival was prolonged for several days (Esth. i. 3, 4). Entertainments designed almost exclusively for drinking were known by the special name of *mishteh*[k]; instances of such drinking-bouts are noticed in 1 Sam. xxv. 36; 2 Sam. xiii. 28; Esth. i. 7; Dan. v. 1; they are reprobated by the prophets (Is. v. 11; Am. vi. 6). Somewhat akin to the *mishteh* of the Hebrews was the *kômos*[m] (κῶμος) of the apostolic age, in which gross licentiousness was added to drinking, and which is frequently made the subject of warning in the Epistles (Rom. xiii. 13; Gal. v. 21; Eph. v. 18; 1 Pet. iv. 3). [W. L. B.]

ME'ANI (Μαανί; Alex. Μααναί: *Maanei*). The same as MEHUNIM (1 Esdr. v. 31; comp. Ezr. ii.

g "The day of the king" in this passage has been variously understood as his birthday or his coronation: it may, however, be equally applied to any other event of similar importance.

h This custom prevailed extensively among the Greeks and Romans: not only were chaplets worn on the head, but festoons of flowers were hung over the neck and breast (Plut. *Symp.* iii. 1, §3; Mart. x. 19: Ov. *Fast* ii. 739). They were generally introduced after the first part of the entertainment was completed. They are noticed in several familiar passages of the Latin poets (Hor. *Carm.* ii. 7, 24; *Sat.* ii. 3, 256; Juv. v. 36).

i The classical designation of this officer among the Greeks was συμποσίαρχος, among the Romans *magister* or *rex convivii*. He was chosen by lot out of the guests (*Dict. of Ant.* p. 925).

k מִשְׁתֶּה.

m The κῶμος resembled the *comissatio* of the Romans. It took place after the supper, and was a mere drinking revel, with only so much food as served to whet the palate for wine (*Dict. of Ant.* p. 271).

59). In the margin of the A. V. it is given in the form "Meunim," as in Neh. vii. 52.

MEA'RAH (מְעָרָה: LXX. omit, both MSS.: *Maara*), a place named in Josh. xiii. 4 only, in specifying the boundaries of the land which remained to be conquered after the subjugation of the southern portion of Palestine. Its description is "Mearah which is to the Zidonians" (*i. e.* which belongs to—לְ: the "beside" of the A. V. is an erroneous translation). The word *meārâh* means in Hebrew a cave, and it is commonly assumed that the reference is to some remarkable cavern in the neighbourhood of Zidon; such as that which played a memorable part many centuries afterwards in the history of the Crusades. (See William of Tyre, xix. 11, quoted by Robinson, ii. 474 *note*.) But there is, as we have often remarked, danger in interpreting these very ancient names by the significations which they bore in later Hebrew, and when pointed with the vowels of the still later Masorets. Besides, if a cave were intended, and not a place called Mearah, the name would surely have been preceded by the definite article, and would have stood as הַמְּעָרָה, "the cave."

Reland (*Pal.* 896) suggests that Mearah may be the same with Meroth, a village named by Josephus (*Ant.* iii. 3, §1) as forming the limit of Galilee on the west (see also *Ant.* ii. 20, §6), and which again may possibly have been connected with the WATERS OF MEROM. The identification is not improbable, though there is no means of ascertaining the fact.

A village called *el-Mughar* is found in the mountains of Naphtali, some ten miles W. of the northern extremity of the sea of Galilee, which may possibly represent an ancient Mearah (Rob. iii. 79, 80; Van de Velde's *map*). [G.]

MEASURES. [WEIGHTS AND MEASURES.]

MEAT. It does not appear that the word "meat" is used in any one instance in the Authorised Version of either the O. or N. Testament, in the sense which it now almost exclusively bears of animal food. The latter is denoted uniformly by "flesh."

1. The only possible exceptions to this assertion in the O. T. are:—

(*a.*) Gen. xxvii. 4, &c., "savoury meat."

(*b.*) Ib. xlv. 23, "corn and bread and meat."

But (*a*) in the former of these two cases the Hebrew word, מַטְעַמִּים, which in this form appears in this chapter only, is derived from a root which has exactly the force of our word "taste," and is employed in reference to the manna. In the passage in question the word "dainties" would be perhaps more appropriate. (*b*) In the second case the original word is one of almost equal rarity, מָזוֹן; and if the Lexicons did not shew that this had only the general force of food in all the other Oriental tongues, that would be established in regard to Hebrew by its other occurrences, viz., 2 Chr. xi. 23, where it is rendered "victual;" and Dan. iv. 12, 21, where the "meat" spoken of is that to be furnished by a tree.

2. The only real and inconvenient ambiguity in use is by the change which has taken place in the meaning of the word is in the case of the "meat-offering," the second of the three great divisions into which the sacrifices of the Law were divided —the burnt-offering, the meat-offering, and the peace-offering (Lev. ii. 1, &c.)—and which consisted solely of flour, or corn, and oil, sacrifices of flesh being confined to the other two. The word thus translated is מִנְחָה, elsewhere rendered "present" and "oblation," and derived from a root which has the force of "sending" or "offering" to a person. It is very desirable that some English term should be proposed which would avoid this ambiguity. "Food-offering" is hardly admissible, though it is perhaps preferable to "unbloody or bloodless sacrifice."

3. There are several other words, which though entirely distinct in the original, are all translated in the A. V. by "meat;" but none of them present any special interest except טֶרֶף. This word, from a root signifying "to tear," would be perhaps more accurately rendered "prey" or "booty." Its use in Ps. cxi. 5, especially when taken in connexion with the word rendered "good understanding" in ver. 10, which should rather be, as in the margin, "good success," throws a new and unexpected light over the familiar phrases of that beautiful Psalm. It seems to shew how inextinguishable was the warlike predatory spirit in the mind of the writer, good Israelite and devout worshipper of Jehovah as he was. Late as he lived in the history of his nation he cannot forget the "power" of Jehovah's "works" by which his forefathers acquired the "heritage of the heathen;" and to him, as to his ancestors when conquering the country, it is still a firm article of belief that those who fear Jehovah shall obtain most of the spoil of His enemies—those who obey His commandments shall have the best success in the field.

4. In the N. T. the variety of the Greek words thus rendered is equally great; but dismissing such terms as ἀνακεῖσθαι or ἀνακλίνειν, which are rendered by "sit at meat"—φαγεῖν, for which we occasionally find "meat"—τράπεζα (Acts xvi. 34) the same—εἰδωλοθύτα, "meat offered to idols"—κλάσματα, generally "fragments," but twice "broken meat"—dismissing these, we have left τροφή and βρῶμα (with its kindred words, βρῶσις, &c.), both words bearing the widest possible signification, and meaning every thing that can be eaten or can nourish the frame. The former is most used in the Gospels and Acts. The latter is found in St. John and in the Epistles of St. Paul. It is the word employed in the famous sentences, "for meat destroy not the work of God," "if meat make my brother to offend," &c. [G.]

MEAT-OFFERING (מִנְחָה: δῶρον θυσία, or θυσία: *oblatio sacrificii*, or *sacrificium*). The *word Minchâh*[a] signifies originally a gift of any kind; and appears to be used generally of a gift from an inferior to a superior, whether God or man. Thus in Gen. xxxii. 13 it is used of the present from Jacob to Esau, in Gen. xliii. 11 of the present sent to Joseph in Egypt, in 2 Sam. viii. 2, 6 of the tribute from Moab and Syria to David, &c., &c.; and in Gen. iv. 3, 4, 5 it is applied to the sacrifices to God, offered by Cain and Abel, although Abel's was a whole burnt-offering. Afterwards this general sense became attached to the word "Corban (קָרְבָּן);" and the word *Minchâh* restricted to an "unbloody offering" as opposed to זֶבַח, a "bloody" sacrifice. It is constantly spoken of in connexion

[a] מִנְחָה from the obsolete root מָנָה, "to distribute" or "to give."

with the DRINK-OFFERING (נֶסֶךְ: σπονδή; *libamen*), which generally accompanied it, and which had the same meaning. The law or ceremonial of the meat-offering is described in Lev. ii. and vi. 14-23. It was to be composed of fine flour, seasoned with salt, and mixed with oil and frankincense, but without leaven; and it was generally accompanied by a drink-offering of wine. A portion of it, including all the frankincense, was to be burnt on the altar as "a memorial;" the rest belonged to the priest; but the meat-offerings offered by the priests themselves were to be wholly burnt.

Its meaning (which is analogous to that of the offering of the tithes, the first-fruits, and the shew-bread) appears to be exactly expressed in the words of David (1 Chr. xxix. 10-14), "All that is in the heaven and in the earth is Thine All things come of Thee, and *of Thine own have we given Thee.*" It recognised the sovereignty of the Lord, and His bounty in giving them all earthly blessings, by dedicating to Him the best of His gifts: the flour, as the main support of life; oil, as the symbol of richness; and wine as the symbol of vigour and refreshment (see Ps. civ. 15). All these were unleavened, and seasoned with salt, in order to show their purity, and hallowed by the frankincense for God's special service. This recognition, implied in all cases, is expressed clearly in the form of offering the first-fruits prescribed in Deut. xxvi. 5-11.

It will be seen that this meaning involves neither of the main ideas of sacrifice—the atonement for sin and the self-dedication to God. It takes them for granted, and is based on them. Accordingly, the meat-offering, properly so called, seems always to have been a subsidiary offering, needing to be introduced by the sin-offering, which represented the one idea, and forming an appendage to the burnt-offering which represented the other.

Thus, in the case of public sacrifices, a "meat-offering" was enjoined as a part of—

(1) *The daily morning and evening sacrifice* (Ex. xxix. 40, 41).

(2) *The Sabbath-offering* (Num. xxviii. 9, 10).

(3) *The offering at the new moon* (Num. xxviii. 11-14).

(4) *The offerings at the great festivals* (Num. xxviii. 20, 28, xxix. 3, 4, 14, 15, &c.).

(5) *The offerings on the great day of atonement* (Num. xxix. 9, 10).

The same was the case with private sacrifices, as at—

(1) *The consecration of priests* (Ex. xxix. 1, 2; Lev. vi. 20, viii. 2), *and of Levites* (Num. viii. 8).

(2) *The cleansing of the leper* (Lev. xiv. 20).

(3) *The termination of the Nazaritic vow* (Num. vi. 15).

The unbloody offerings offered alone did not properly belong to the regular meat-offering. They were usually substitutes for other offerings. Thus, for example, in Lev. v. 11, a tenth of an ephah of flour is allowed to be substituted by a poor man for the lamb or kid of a trespass-offering: in Num. v. 15 the same offering is ordained as the "offering of jealousy" for a suspected wife. The unusual character of the offering is marked in both cases by the absence of the oil, frankincense, and wine. We find also at certain times libations of water poured out before God; as by Samuel's command at Mizpeh during the fast (1 Sam. vii. 6), and by David at Bethlehem (2 Sam. xxiii. 16), and a libation of oil poured by Jacob on the pillar at Bethel (Gen. xxxv 14). But these have clearly especial meanings, and are not to be included in the ordinary drink-offerings. The same remark will apply to the remarkable libation of water customary at the Feast of Tabernacles [TABERNACLES], but not mentioned in Scripture. [A. B.]

MEBUN'NAI (מִבֻּנַּי: *ἐκ τῶν υἱῶν . . Mebonnai*). In this form appears, in one passage only (2 Sam. xxiii. 27), the name of one of David's guard, who is elsewhere called SIBBECHAI (2 Sam. xxi. 18; 1 Chr. xx. 4) or SIBBECAI (1 Chr. xi. 29, xxvii. 11) in the A. V. The reading "Sibbechai" (סִבְּכַי), is evidently the true one, of which "Mebunnai" was an easy and early corruption, for even the LXX. translators must have had the same consonants before them though they pointed thus, מִבֻּנַּי. It is curious, however, that the Aldine edition has Ἀβουχαΐ (Kennicott, *Diss.* i. p. 186). [W. A. W.]

MECHER'ATHITE, THE (הַמְּכֵרָתִי: Μοχόρ; Alex. φερομεχουραθι: *Mecherathites*), that is, the native or inhabitant of a place called Mecherah. Only one such is mentioned, namely HEPHER, one of David's thirty-seven warriors (1 Chr. xi. 36). In the parallel list of 2 Sam. xxiii. the name appears, with other variations, as "the Maachathite" (ver. 34). It is the opinion of Kennicott, after a long examination of the passage, that the latter is the correcter of the two; and as no place named Mecherah is known to have existed, while the Maachathites had a certain connexion with Israel, and especially with David, we may concur in his conclusion, more especially as his guard contained men of almost every nation round Palestine. [G.]

ME'DABA (Μηδαβά: *Madaba*), the Greek form of the name MEDEBA. It occurs only in 1 Macc. ix. 36. [G.]

ME'DAD. [ELDAD and MEDAD.]

ME'DAN (מָדָן, "strife, contention," Ges.: Μαδιάμ, Μαδάμ: *Madan*), a son of Abraham and Keturah (Gen. xxv. 2; 1 Chr. i. 32), whose name and descendants have not been traced beyond this record. It has been supposed, from the similarity of the name, that the tribe descended from Medan was more closely allied to *Midian* than by mere blood-relation, and that it was the same as, or a portion of, the latter. There is, however, no ground for this theory beyond its plausibility.—The traditional city Medyen of the Arab geographers (the classical Modiana), situate in Arabia on the eastern shore of the gulf of Eyleh must be held to have been Midianite, not Medanite (but Bunsen, *Bibelwerk*, suggests the latter identification). It has been elsewhere remarked [KETURAH] that many of the Keturahite tribes seem to have merged in early times into the Ishmaelite tribes. The mention of "Ishmaelite" as a convertible term with "Midianite," in Gen. xxxvii. 28, 36, is remarkable: but the Midianite of the A. V. in ver 28 is Medanites in the Hebrew (by the LXX. rendered Μαδιηνεῖς and in the Vulgate *Ismaelitae* and *Madianitae*); and we may have here a trace of the subject of this article, though Midianite appears on the whole to be more likely the correct reading in the passages referred to. [MIDIAN.] [E. S. P.]

MEDEBA (מֵידְבָא: Μαιδαβά and Μηδαβα[a]; Medeba), a town on the eastern side of Jordan. Taken as a Hebrew word, Me-deba means "waters[b] of quiet," but except the tank (see below), what waters can there ever have been on that high plain? The Arabic name, though similar in sound, has a different signification.

Medeba is first alluded to in the fragment of a popular song of the time of the conquest, preserved in Num. xxi. (see ver. 30). Here it seems to denote the limit of the territory of Heshbon. It next occurs in the enumeration of the country divided amongst the Transjordanic tribes (Josh. xiii. 9), as giving its name to a district of level downs called "the Mishor of Medeba," or "the Mishor on Medeba." This district fell within the allotment of Reuben (ver. 16). At the time of the conquest Medeba belonged to the Amorites, apparently one of the towns taken from Moab by them. When we next encounter it, four centuries later, it is again in the hands of the Moabites, or which is nearly the same thing, of the Ammonites. It was before the gate of Medeba that Joab gained his victory over the Ammonites, and the horde of Aramites of Maachah, Mesopotamia, and Zobah, which they had gathered to their assistance after the insult perpetrated by Hanun on the messengers of David (1 Chr. xix. 7, compared with 2 Sam. x. 8, 14, &c.). In the time of Ahaz Medeba was a sanctuary of Moab (Is. xv. 2), but in the denunciation of Jeremiah (xlviii.) often parallel in part with that of Isaiah, it is not mentioned. In the Maccabean times it had returned into the hands of the Amorites, who seem most probably intended by the obscure word JAMBRI in 1 Macc. ix. 36. (Here the name is given in the A. V. as Medaba, according to the Greek spelling.) It was the scene of the capture, and possibly the death, of John Maccabæus, and also of the revenge subsequently taken by Jonathan and Simon (Joseph. *Ant.* xiii. 1, §4; the latter is omitted in Macc. on the second occasion, ver. 35). About 110 years B.C. it was taken after a long siege by John Hyrcanus (*Ant.* xiii. 9, §1; *B. J.* i. 2, §4) and then appears to have remained in the possession of the Jews for at least sixty years, till the time of Alexander Jannæus (*Ant.* xiii. 15, §4); and it is mentioned as one of the cities, by the promise of which Aretas, the king of Arabia, was induced to assist Hyrcanus II. to recover Jerusalem from his brother Aristobulus (*Ant.* xiv. 1, §4).

Medeba has retained its name down to our own time. To Eusebius and Jerome (*Onomast.* "Medaba" it was evidently known. In Christian times it was a noted bishopric of the patriarchate of "Bostra or Bitra Arabiæ," and is named in the Acts of the Council of Chalcedon (A.D. 451) and other Ecclesiastical Lists (Reland, 217, 223, 226, 893. See the Le Quien, *Oriens Christ.*). Among modern travellers *Mádeba* has been visited, recognised, and described by Burckhardt (*Syria*, July 13, 1812), Irby (i. 407, 408, iv. 223), and Irby (145); see also Porter (*Handbook*, 303). It is in the pastoral district of the *Belka*, which probably answers to the Mishor of the Hebrews, 4 miles S.E. of *Heshbân*, and like it lying on a rounded but rocky hill (Burckh., Seetzen). A large tank, columns, and extensive foundations are still to be seen; the remains of a Roman road exist near the town, which seems formerly to have connected it with Heshbon. [G.]

MEDES (מָדַי: Μῆδοι: *Medi*), one of the most powerful nations of Western Asia in the times anterior to the establishment of the Kingdom of Cyrus, and one of the most important tribes composing that kingdom. Their geographical position is considered under the article MEDIA. The title by which they appear to have known themselves was *Mada*; which by the Semitic races was made into *Madai*, and by the Greeks and Romans into *Medi*, whence our "Medes."

1. *Primitive History.*—It may be gathered from the mention of the Medes, by Moses, among the races descended from Japhet [see MADAI], that they were a nation of very high antiquity; and it is in accordance with this view that we find a notice of them in the primitive Babylonian history of Berosus, who says that the Medes conquered Babylon at a very remote period (circ. B.C. 2458), and that eight Median monarchs reigned there consecutively, over a space of 224 years (Beros. ap. Euseb. *Chron. Can.* i. 4). Whatever difficulties may lie in the way of our accepting this statement as historical—from the silence of other authors, from the affectation of precision in respect of so remote a time, and from the subsequent disappearance of the Medes from these parts, and their reappearance, after 1300 years, in a different locality—it is too definite and precise a statement, and comes from too good an authority, to be safely set aside as unmeaning. There are independent grounds for thinking that an Arian element existed in the population of the Mesopotamian valley, side by side with the Cushite and Semitic elements, at a very early date.[c] It is therefore not at all impossible that the Medes may have been the predominant race there for a time, as Berosus states, and may afterwards have been overpowered and driven to the mountains, whence they may have spread themselves eastward, northward, and westward, so as to occupy a vast number of localities from the banks of the Indus to those of the middle Danube. The term Arians, which was by the universal consent of their neighbours applied to the Medes in the time of Herodotus (*Herod.* vii. 62), connects them with the early Vedic settlers in western Hindustan; the *Mati*-eni of Mount Zagros, the Sauro-*Matae* of the steppe-country between the Caspian and the Euxine, and the *Maetae* or *Maeotae* of the Sea of Azov, mark their progress towards the north; while the *Moedi* or *Medi* of Thrace seem to indicate their spread westward into Europe, which was directly attested by the native traditions of the Sigynnae (*Herod.* v. 9).

2. *Connexion with Assyria.*—The deepest obscurity hangs, however, over these movements, and indeed over the whole history of the Medes from the time of their bearing sway in Babylonia (B.C. 2458-2234) to their first appearance in the cuneiform inscriptions among the enemies of Assyria, about B.C. 880. They then inhabit a portion of the region which bore their name down to the Ma-

[a] It may be well to give a collation of the passages in the O.T. in which Medeba occurs in the Hebrew text, that will show how frequently it is omitted:—Num. xxi. 30, for Μωάβ; Josh. xiii. 9, Δαιδαβάν, Alex. Μαιδά, B in mg. omit, both MSS.; 1 Chr. xix. 7, Μαιδαβά, [illegible]; Is. xv. 2, τῆς Μωαβίτιδος.

[b] To this Burckhardt seems to allude when he observes (*Syr.* 366), "this is the ancient Medeba; but there is no river near it."

[c] See the remarks of Sir H. Rawlinson in Rawlinso's *Herodotus*, i. 621 note.

bonetar conquest of Persia; but whether they were recent immigrants into it, or had held it from a remote antiquity, is uncertain. On the one hand it is noted that their absence from earlier cuneiform monuments seems to suggest that their arrival was recent at the date above mentioned; on the other, that Ctesias asserts (ap. Diod. Sic. ii. 1, §9), and Herodotus distinctly implies (i. 95), that they had been settled in this part of Asia at least from the time of the first formation of the Assyrian Empire (B.C. 1273). However this was, it is certain that at first, and for a long series of years, they were very inferior in power to the great empire established upon their flank. They were under no general or centralised government, but consisted of various petty tribes, each ruled by its chief, whose dominion was over a single small town and perhaps a few villages. The Assyrian monarchs ravaged their lands at pleasure, and took tribute from their chiefs; while the Medes could in no way retaliate upon their antagonists. Between them and Assyria lay the lofty chain of Zagros, inhabited by hardy mountaineers, at least as powerful as the Medes themselves, who would not tamely have suffered their passage through their territories. Media, however, was strong enough, and stubborn enough, to maintain her nationality throughout the whole period of the Assyrian sway, and was never absorbed into the empire. An attempt made by Sargon to hold the country in permanent subjection by means of a number of military colonies planted in cities of his building failed [SARGON]; and both his son Sennacherib, and his grandson Esarhaddon, were forced to lead into the territory hostile expeditions, which however seem to have left no more impression than previous invasions. Media was reckoned by the great Assyrian monarchs of this period as a part of their dominions; but its subjection seems to have been at no time much more than nominal, and it frequently threw off the yoke altogether.

3. *Median History of Herodotus.*—Herodotus represents the decadence of Assyria as greatly accelerated by a formal revolt of the Medes, following upon a period of contented subjection, and places this revolt more than 218 years before the battle of Marathon, or a little before B.C. 708. Ctesias placed the commencement of Median independence still earlier, declaring that the Medes had destroyed Nineveh and established themselves on the ruins of the Assyrian Empire, as far back as B.C. 875. No one now defends this latter statement, which alike contradicts the Hebrew records and the native documents. It is doubtful whether even the calculation of Herodotus does not throw back the independence to too early a date: his chronology of the period is clearly artificial; and the history, as he relates it, is fabulous. According to him the Medes, when they first shook off the yoke, established no government. For a time there was neither king nor prince in the land, and each man did what was right in his own eyes. Quarrels were settled by arbitration, and a certain Deioces, having obtained a reputation in this way, contrived after a while to get himself elected sovereign. He then built the seven-walled Ecbatana [ECBATANA], established a court after the ordinary Oriental model, and had a prosperous and peaceful reign of 53 years. Deioces was succeeded by his son Phraortes, an ambitious prince, who directly after his accession began a career of conquest, first attacking and subduing the Persians, then reducing nation after nation, and finally perishing in an expedition against Assyria, after he had reigned 22 years. Cyaxares, the son of Phraortes, then mounted the throne. Having first introduced a new military system, he proceeded to carry out his father's designs against Assyria, defeated the Assyrian army in the field, besieged their capital, and was only prevented from capturing it on this first attack by an invasion of Scythians, which recalled him to the defence of his own country. After a desperate struggle during eight-and-twenty years with these new enemies, Cyaxares succeeded in expelling them and recovering his former empire; whereupon he resumed the projects which their invasion had made him temporarily abandon, besieged and took Nineveh, conquered the Assyrians and extended his dominion to the Halys. Nor did these successes content him. Bent on establishing his sway over the whole of Asia, he passed the Halys, and engaged in a war with Alyattes, king of Lydia, the father of Croesus, with whom he long maintained a stubborn contest. This war was terminated at length by an eclipse of the sun, which, occurring just as the two armies were engaged, furnished an occasion for negotiations, and eventually led to the conclusion of a peace and the formation of an alliance between the two powers. The independence of Lydia and the other kingdoms west of the Halys was recognised by the Medes, who withdrew within their own borders, having arranged a marriage between the eldest son of Cyaxares and a daughter of the Lydian king, which assured them of a friendly neighbour upon this frontier. Cyaxares, soon after this, died, having reigned in all 40 years. He was succeeded by his son Astyages, a pacific monarch, of whom nothing is related beyond the fact of his deposition by his own grandson Cyrus, 35 years after his accession—an event by which the Median Empire was brought to an end, and the Persian established upon its ruins.

4. *Its imperfections.*—Such is, in outline, the Median History of Herodotus. It has been accepted as authentic by most modern writers, not so much from a feeling that it is really trustworthy, as from the want of anything more satisfactory to put in its place. That the story of Deioces is a romance has been seen and acknowledged (Grote's *Greece*, iii. 307, 308). That the chronological dates are improbable, and even contradictory, has been a frequent subject of complaint. Recently it has been shown that the whole scheme of dates is artificial (Rawlinson's *Herodotus*, i. 421, 422); and that the very names of the kings, except in a single instance, are unhistorical. Though the cuneiform records do not at present supply the actual history of the time, they enable us in a great measure to test the narrative which has come down to us from the Greeks. We can separate in that narrative the authentic portions from those which are fabulous; we can account for the names used, and in most instances for the numbers given; and we can thus rid ourselves of a great deal that is fictitious, leaving a *residuum* which has a fair right to be regarded as truth.

The records of Sargon, Sennacherib, and Esarhaddon clearly show that the Median kingdom did not commence so early as Herodotus imagined. These three princes, whose reigns cover the space extending from B.C. 720 to B.C. 660, all carried their arms deep into Media, and found it, not under the dominion of a single powerful monarch, but under the rule of a vast number of petty chieftains

It cannot have been till near the middle of the 7th century B.C. that the Median kingdom was consolidated, and became formidable to its neighbours. How this change was accomplished is uncertain: the most probable supposition would seem to be, that about this time a fresh Arian immigration took place from the countries east of the Caspian, and that the leader of the immigrants established his authority over the scattered tribes of his race, who had been settled previously in the district between the Caspian and Mount Zagros. There is good reason to believe that this leader was the great Cyaxares, whom Diodorus speaks of in one place as the first king (Diod. Sic. ii. 32), and whom Aeschylus represents as the founder of the Medo-Persic empire (*Pers.* 761). The Deioces and Phraortes of Herodotus are thus removed from the list of historical personages altogether, and must take rank with the early kings in the list of Ctesias,[b] who are now generally admitted to be inventions. In the case of Deioces the very name is fictitious, being the Arian *dahâk*, "biter" or "snake," which was a title of honour assumed by all Median monarchs, but not a proper name of any individual. Phraortes, on the other hand, is a true name, but one which has been transferred to this period from a later passage of Median history, to which reference will be made in the sequel. (Rawlinson's *Herod.* i. 408.)

5. *Development of Median power, and formation of the Empire.*—It is evident that the development of Median power proceeded *pari passu* with the decline of Assyria, of which it was in part an effect, in part a cause. Cyaxares must have been contemporary with the later years of that Assyrian monarch who passed the greater portion of his time in hunting expeditions in Susiana. [ASSYRIA, §11.] His first conquests were probably undertaken at this time, and were suffered tamely by a prince who was destitute of all military spirit. In order to consolidate a powerful kingdom in the district east of Assyria, it was necessary to bring into subjection a number of Scythic tribes, who disputed with the Arians the possession of the mountain-country, and required to be incorporated before Media could be ready for great expeditions and distant conquests. The struggle with these tribes may be the real event represented in Herodotus by the Scythic war of Cyaxares, or possibly his narrative may contain a still larger amount of truth. The Scyths of Zagros may have called in the aid of their kindred tribes towards the north, who may have impeded for a while the progress of the Median arms, while at the same time they really prepared the way for their success by weakening the other nations of this region, especially the Assyrians. According to Herodotus, Cyaxares at last got the better of the Scyths by inviting their leaders to a banquet, and there treacherously murdering them. At any rate it is clear that at a tolerably early period of his reign they ceased to be formidable, and he was able to direct his efforts against other enemies. His capture of Nineveh and conquest of Assyria are facts which no sceptic can doubt; and the date of the capture may be fixed with tolerable certainty to the year B.C. 625. Abydenus (probably following Berosus) informs us that in his Assyrian war Cyaxares was assisted by the Babylonians under Nabopolassar, between whom and Cyaxares an intimate alliance was formed, cemented by a union of their children; and that a result of their success was the establishment of Nabopolassar as independent king on the throne of Babylon, an event which we know to belong to the above-mentioned year. It was undoubtedly after this that Cyaxares endeavoured to conquer Lydia. His conquest of Assyria had made him master of the whole country lying between Mount Zagros and the river Halys, to which he now hoped to add the tract between the Halys and the Aegean Sea. It is surprising that he failed, more especially as he seems to have been accompanied by the forces of the Babylonians, who were perhaps commanded by Nebuchadnezzar on the occasion. [NEBUCHADNEZZAR.] After a war which lasted six years he desisted from his attempt, and concluded the treaty with the Lydian monarch, of which we have already spoken. The three great Oriental monarchies, Media, Lydia, and Babylon, were now united by mutual engagements and intermarriages, and continued at peace with one another during the remainder of the reign of Cyaxares, and during that of Astyages, his son and successor.

6. *Extent of the Empire.*—The limits of the Median Empire cannot be definitely fixed; but it is not difficult to give a general idea of its size and position. From north to south its extent was in no place great, since it was certainly confined between the Persian Gulf and the Euphrates on the one side, the Black and Caspian Seas on the other. From east to west it had, however, a wide expansion, since it reached from the Halys at least as far as the Caspian Gates, and possibly further. It comprised Persia, Media Magna, Northern Media, Matiene or Media Mattiana, Assyria, Armenia, Cappadocia, the tract between Armenia and the Caucasus, the low tract along the south-west and south of the Caspian, and possibly some portion of Hyrcania, Parthia, and Sagartia. It was separated from Babylonia either by the Tigris, or more probably by a line running about half-way between that river and the Euphrates, and thus did not include Syria, Phoenicia, or Judaea, which fell to Babylon on the destruction of the Assyrian Empire. Its greatest length may be reckoned at 1500 miles from N.W. to S.E., and its average breadth at 400 or 450 miles. Its area would thus be about 600,000 square miles, or somewhat greater than that of modern Persia.

7. *Its character.*—With regard to the nature of the government established by the Medes over the conquered nations, we possess but little trustworthy evidence. Herodotus in one place compares, somewhat vaguely, the Median with the Persian system (i. 134), and Ctesias appears to have asserted the positive introduction of the satrapial organization into the empire at its first foundation by his Arbaces (Diod. Sic. ii. 28); but on the whole it is perhaps most probable that the Assyrian organization was continued by the Medes, the subject-nations retaining their native monarchs, and merely acknowledging subjection by the payment of an annual tribute. This seems certainly to have been the case in Persia, where Cyrus and his father Cambyses were monarchs, holding their crown of the Median

[b] Ctesias made the Median monarchy commence about B.C. 918, with a certain Arbaces, who headed the rebellion against Sardanapalus, the voluptuary. Arbaces reigned 50 years, and was succeeded by Mandaucas, who reigned 30 years. Then followed Sosarmus (30 years), Artias (50 years), Arbianes (22 years), Artaeus (40 years), Artynes (22 years), Astibaras (40 years), and finally Aspadas, or Astyages, the last king (35 years). This scheme appears to be a clumsy extension of the monarchy, by means of repetition, from the data furnished by Herodotus.

king, before the revolt of the former; and there is no reason to suppose that the remainde. of the empire was organized in a different manner. The satrapial organization was apparently a Persian invention, begun by Cyrus, continued by Cambyses, his son, but first adopted as the regular governmental system by Darius Hystaspis.

8. *Its duration.*—Of all the ancient Oriental monarchies the Median was the shortest in duration. It commenced, as we have seen, after the middle of the 7th century B.C., and it terminated B.C. 558. The period of three-quarters of a century, which Herodotus assigns to the reigns of Cyaxares and Astyages, may be taken as fairly indicating its probable length, though we cannot feel sure that the years are correctly apportioned between the monarchs. Two kings only occupied the throne during the period; for the Cyaxares II. of Xenophon is an invention of that amusing writer.

9. *Its final overthrow.*—The conquest of the Medes by a sister-Iranic race, the Persians, under their native monarch Cyrus, is another of those indisputable facts of remote history, which make the inquirer feel that he sometimes attains to solid ground in these difficult investigations. The details of the struggle, which are given partially by Herodotus (i. 127, 128), at greater length by Nicolas of Damascus (*Fr. Hist. Gr.* iii. 404-406), probably following Ctesias, have not the same claim to acceptance. We may gather from them, however, that the contest was short, though severe. The Medes did not readily relinquish the position of superiority which they had enjoyed for 75 years; but their vigour had been sapped by the adoption of Assyrian manners, and they were now no match for the hardy mountaineers of Persia. After many partial engagements a great battle was fought between the two armies, and the result was the complete defeat of the Medes, and the capture of their king, Astyages, by Cyrus.

10. *Position of Media under Persia.*—The treatment of the Medes by the victorious Persians was not that of an ordinary conquered nation. According to some writers (as Herodotus and Xenophon) there was a close relationship between Cyrus and the last Median monarch, who was therefore naturally treated with more than common tenderness. The fact of the relationship is, however, denied by Ctesias; and whether it existed or no, at any rate the peculiar position of the Medes under Persia was not really owing to this accident. The two nations were closely akin; they had the same Arian or Iranic origin, the same early traditions, the same language (Strab. xv. 2, §8), nearly the same religion, and ultimately the same manners and customs, dress, and general mode of life. It is not surprising therefore that they were drawn together, and that, though never actually coalescing, they still formed to some extent a single privileged people. Medes were advanced to stations of high honour and importance under Cyrus and his successors, an advantage shared by no other conquered people. The Median capital was at first the chief royal residence, and always remained one of the places at which the court spent a portion of the year; while among the provinces Media claimed and enjoyed a precedency, which appears equally in the Greek writers and in the native records. Still, it would seem that the nation, so lately sovereign, was not altogether content with its secondary position. On the first convenient opportunity Media rebelled, elevating to the throne a certain Phraortes (*Fravartish*), who called himself Xathrites, and claimed to be a descendant from Cyaxares. Darius Hystaspis, in whose reign this rebellion took place, had great difficulty in suppressing it. After vainly endeavouring to put it down by his generals, he was compelled to take the field himself. He defeated Phraortes in a pitched battle, pursued, and captured him near Rhages, mutilated him, kept him for a time "chained at his door," and finally crucified him at Ecbatana, executing at the same time his chief followers (see the *Behistun Inscription*, in Rawlinson's *Herodotus*, ii. 601, 602). The Medes hereupon submitted, and quietly bore the yoke for another century, when they made a second attempt to free themselves, which was suppressed by Darius Nothus (Xen. *Hell.* i. 2, §19). Henceforth they patiently acquiesced in their subordinate position, and followed through its various shifts and changes the fortune of Persia.

11. *Internal divisions.*—According to Herodotus the Median nation was divided into six tribes (ἔθνη), called the Busae, the Paretaceni, the Struchates, the Arizanti, the Budii, and the Magi. It is doubtful, however, in what sense these are to be considered as ethnic divisions. The Paretaceni appear to represent a geographical district, while the Magi were certainly a priest-caste; of the rest we know little or nothing. The Arizanti, whose name would signify "of noble descent," or "of Arian descent," must (one would think) have been the leading tribe, corresponding to the Pasargadae in Persia; but it is remarkable that they have only the fourth place in the list of Herodotus. The Budii are fairly identified with the eastern *Phut*—the *Putiya* of the Persian inscriptions—whom Scripture joins with Persia in two places (Ez. xxvii. 10, xxxviii. 5). Of the Busae and the Struchates nothing is known beyond the statement of Herodotus. We may perhaps assume, from the order of Herodotus' list, that the Busae, Paretaceni, Struchates, and Arizanti were true Medes, of genuine Arian descent, while the Budii and Magi were foreigners admitted into the nation.

12. *Religion.*—The original religion of the Medes must undoubtedly have been that simple creed which is placed before us in the earlier portions of the Zendavesta. Its peculiar characteristic was Dualism, the belief in the existence of two opposite principles of good and evil, nearly if not quite on a par with one another. Ormazd and Ahriman were both self-caused and self-existent, both indestructible, both potent to work their will—their warfare had been from all eternity, and would continue to all eternity, though on the whole the struggle was to the disadvantage of the Prince of Darkness. Ormazd was the God of the Arians, the object of their worship and trust; Ahriman was their enemy, an object of fear and abhorrence, but not of any religious rite. Besides Ormazd, the Arians worshipped the Sun and Moon, under the names of Mithra and Homa; and they believed in the existence of numerous spirits or genii, some good, some bad, the subjects and ministers respectively of the two powers of Good and Evil. Their cult was simple, consisting in processions, religious chants and hymns, and a few simple offerings, expressions of devotion and thankfulness. Such was the worship and such the belief which the whole Arian race brought with them from the remote east when they migrated westward. Their migration brought them into contact with the fire-worshippers of Armenia and Mount Zagros, among

whom Magism had been established from a remote antiquity. The result was either a combination of the two religions, or in some cases an actual conversion of the conquerors to the faith and worship of the conquered. So far as can be gathered from the scanty materials in our possession, the latter was the case with the Medes. While in Persia the true Arian creed maintained itself, at least to the time of Darius Hystaspis, in tolerable purity, in the neighbouring kingdom of Media it was early swallowed up in Magism, which was probably established by Cyaxares or his successor as the religion of the state. The essence of Magism was the worship of the elements, fire, water, air, and earth, with a special preference of fire to the remainder. Temples were not allowed, but fire-altars were maintained on various sacred sites, generally mountain-tops, where sacrifices were continually offered, and the flame was never suffered to go out. A hierarchy naturally followed, to perform these constant rites, and the Magi became recognised as a sacred caste entitled to the veneration of the faithful. They claimed in many cases a power of divining the future, and practised largely those occult arts which are still called by their name in most of the languages of modern Europe. The fear of polluting the elements gave rise to a number of curious superstitions among the professors of the Magian religion (Herod. i. 138); among the rest to the strange practice of neither burying nor burning their dead, but exposing them to be devoured by beasts or birds of prey (Herod. i. 140; Strab. xv. 3, §20). This custom is still observed by their representatives, the modern Parsees.

Median Dress. (From Monuments.)

13. *Manners, customs, and national character.*—The customs of the Medes are said to have nearly resembled those of their neighbours, the Armenians and the Persians; but they were regarded as the inventors, their neighbours as the copyists (Strab. xi. 13. §9). They were brave and warlike, excellent riders, and remarkably skilful with the bow. The flowing robe, so well known from the Persepolitan sculptures, was their native dress, and was certainly among the points for which the Persians were beholden to them. Their whole costume was rich and splendid; they were fond of scarlet, and decorated themselves with a quantity of gold, in the shape of chains, collars, armlets, &c. As troops they were considered little inferior to the native Persians, next to whom they were usually ranged in the battle-field. They fought both on foot and on horseback, and carried, not bows and arrows only, but shields, short spears, and poniards. It is thought that they must have excelled in the manufacture of some kinds of stuffs.

14. *References to the Medes in Scripture.*—The references to the Medes in the canonical Scriptures are not very numerous, but they are striking. We first hear of certain "cities of the Medes," in which the captive Israelites were placed by "the king of Assyria" on the destruction of Samaria, B.C. 721 (2 K. xvii. 6, xviii. 11). This implies the subjection of Media to Assyria at the time of Shalmaneser, or of Sargon, his successor, and accords (as we have shown) very closely with the account given by the latter of certain military colonies which he planted in the Median country. Soon afterwards Isaiah prophesies the part which the Medes shall take in the destruction of Babylon (Is. xiii. 17, xxi. 2); which is again still more distinctly declared by Jeremiah (li. 11 and 28), who sufficiently indicates the independence of Media in his day (xxv. 25). Daniel relates, as a historian, the fact of the Medo-Persic conquest (v. 28, 31), giving an account of the reign of Darius the Mede, who appears to have been made viceroy by Cyrus (vi. 1-28). In Ezra we have a mention of Achmetha (Ecbatana), "the *palace* in the province of the Medes," where the decree of Cyrus was found (vi. 2-5)—a notice which accords with the known facts that the Median capital was the seat of government under Cyrus, but a royal residence only and not the seat of government under Darius Hystaspis. Finally, in Esther, the high rank of Media under the Persian kings, yet at the same time its subordinate position, are marked by the frequent combination of the two names in phrases of honour, the precedency being in every case assigned to the Persians.[a]

In the Apocryphal Scriptures the Medes occupy a more prominent place. The chief scene of one whole book (Tobit) is Media; and in another (Judith) a very striking portion of the narrative belongs to the same country. But the historical character of both these books is with reason doubted; and from neither can we derive any authentic or satisfactory information concerning the people. From the story of Tobias little could be gathered, even if we accepted it as true; while the history of Arphaxad (which seems to be merely a distorted account of the struggle between the rebel Phraortes and Darius Hystaspis) adds nothing to our knowledge of that contest. The mention of Rhages in both narratives as a Median town and region of importance is geographically correct; and it is historically true that Phraortes suffered his overthrow in the Rhagian district. But beyond these facts the narratives in question contain little that even illustrates the true history of the Median nation. (See the articles on JUDITH and TOBIAS in Winer's *Realwörterbuch*; and on the general subject compare Rawlinson's *Herodotus*, i. 401-422; Bosanquet's *Chronology of the Medes*, read before the Royal Asiatic Society, June 5, 1858; Brandis, *Rerum Assyriarum tempora emendata*, pp. 1-14; Grote's *History of Greece*, iii. pp. 301-312; and Hupfeld's *Exercitationum Herodotearum Specimina duo*, p. 56, seq.) [G. R.]

ME'DIA (מָדַי, *i.e.* Madai: Μηδία: *Media*), a country the general situation of which is abundantly

[a] See Esth. i. 3, 14, 18, and 19. The only passage in Esther where Media takes precedence of Persia is x. 2, where we have a mention of "the book of the chronicles of the kings of Media and Persia." Here the order is chronological. As the Median empire preceded the Persian, its chronicles came first in "the book." The precedency in Daniel (v. 28, and vi. 8, 12. &c.) is owing to the fact of a Median viceroy being established on the throne.

clear, though its limits may not be capable of being precisely determined. Media lay north-west of Persia Proper, south and south-west of the Caspian, east of Armenia and Assyria, west and north-west of the great salt desert of Iram. Its greatest length was from north to south, and in this direction it extended from the 32nd to the 40th parallel, a distance of 550 miles. In width it reached from about long. 45° to 53°; but its average breadth was not more than from 250 to 300 miles. Its area may be reckoned at about 150,000 square miles, or three-fourths of that of modern France. The natural boundary of Media on the north was the river *Aras;* on the west Zagros and the mountain-chain which connects Zagros with Ararat; in the south Media was probably separated from Persis by the desert which now forms the boundary between *Farsistan* and *Irak Ajemi;* on the east its natural limit was the desert and the Caspian Gates. West of the gates, it was bounded, not (as is commonly said) by the Caspian Sea, but by the mountain range south of that sea, which separates between the high and the low country. It thus comprised the modern provinces of *Irak Ajemi*, Persian *Kurdistan*, part of *Luristan*, *Azerbijan*, perhaps *Talish* and *Ghilan*, but not *Mazanderan* or *Asterabad*.

The division of Media commonly recognised by the Greeks and Romans was that into Media Magna, and Media Atropatene. (Strab. xi. 13, §1; comp. Polyb. v. 44; Plin. *H. N.* vi. 13; Ptol. vi. 2, &c.) 1. Media Atropatene, so named from the satrap Atropates, who became independent monarch of the province on the destruction of the Persian empire by Alexander (Strab. *ut. sup.*; Diod. Sic. xviii. 3), corresponded nearly to the modern *Azerbijan*, being the tract situated between the Caspian and the mountains which run north from Zagros, and consisting mainly of the rich and fertile basin of Lake *Urumiyeh*, with the valleys of the *Aras* and the *Sefid Rud*. This is chiefly a high tract, varied between mountains and plains, and lying mostly three or four thousand feet above the sea level. The basin of Lake *Urumiyeh* has a still greater elevation, the surface of the lake itself, into which all the rivers run, being as much as 4200 feet above the ocean. The country is fairly fertile, well-watered in most places, and favourable to agriculture; its climate is temperate, though occasionally severe in winter; it produces rice, corn of all kinds, wine, silk, white wax, and all manner of delicious fruits. *Tabriz*, its modern capital, forms the summer residence of the Persian kings, and is a beautiful place, situated in a forest of orchards. The ancient Atropatene may have included also the countries of *Ghilan* and *Talish*, together with the plain of *Moghan* at the mouth of the combined *Kur* and *Aras* rivers. These tracts are low and flat; that of *Moghan* is sandy and sterile; *Talish* is more productive; while *Ghilan* (like *Mazanderan*) is rich and fertile in the highest degree. The climate of *Ghilan*, however, is unhealthy, and at times pestilential; the streams perpetually overflow their banks; and the waters which escape, stagnate in marshes, whose exhalations spread disease and death among the inhabitants. 2. Media Magna lay south and east of Atropatene. Its northern boundary was the range of *Elburz* from the Caspian Gates to the *Rudbar* pass, through which the *Sefid Rud* reaches the low country of *Ghilan*. It then adjoined upon Atropatene, from which it may be regarded as separated by a line running about S.W. by W. from the bridge of *Menjil* to Zagros. Here it touched Assyria, from which it was probably divided by the last line of hills towards the west, before the mountains sink down upon the plain. On the south it was bounded by Susiana and Persis Proper, the former of which it met in the modern *Luristan*, probably about lat. 33° 30′, while it struck the latter on the eastern side of the Zagros range, in lat. 32° or 32° 30′. Towards the east it was closed in by the great salt desert, which Herodotus reckons to Sagartia, and later writers to Parthia and Carmania. Media Magna thus contained great part of *Kurdistan* and *Luristan*, with all *Ardelan* and *Irak Ajemi*. The character of this tract is very varied. Towards the west, in *Ardelan*, *Kurdistan* and *Luristan*, it is highly mountainous, but at the same time well-watered and richly wooded, fertile and lovely; on the north, along the flank of *Elburz*, it is less charming, but still pleasant and tolerably productive; while towards the east and south-east it is bare, arid, rocky, and sandy, supporting with difficulty a spare and wretched population. The present productions of Zagros are cotton, tobacco, hemp, Indian corn, rice, wheat, wine, and fruits of every variety; every valley is a garden; and besides valleys, extensive plains are often found, furnishing the most excellent pasturage. Here were nurtured the valuable breed of horses called Nisaean, which the Persians cultivated with such especial care, and from which the horses of the monarch were always chosen. The pasture-grounds of *Khawah* and *Alishtar* between *Behistun* and *Khorram-abad*, probably represent the "Nisaean plain" of the ancients, which seems to have taken its name from a town Nisaea (*Nisaya*), mentioned in the cuneiform inscriptions.

Although the division of Media into these two provinces can only be distinctly proved to have existed from the time of Alexander the Great, yet there is reason to believe that it was more ancient, dating from the settlement of the Medes in the country, which did not take place all at once, but was first in the more northern and afterwards in the southern country. It is indicative of the division, that there were two Ecbatanas — one, the northern, at *Takht-i-Suleiman:* the other, the southern, at *Hamadan*, on the flanks of Mount Orontes (*Elwand*)—respectively the capitals of the two districts. [ECBATANA.]

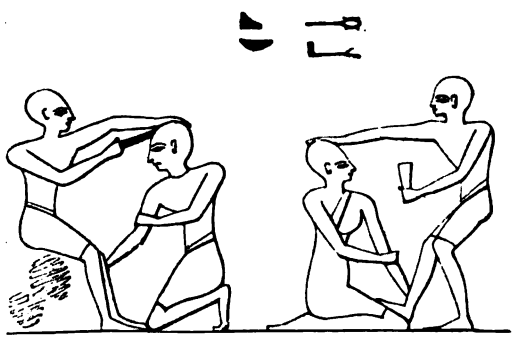
Next to the two Ecbatanas, the chief town in Media was undoubtedly Rhages—the *Ragæ* of the inscriptions. Hither the rebel Phraortes fled on his defeat by Darius Hystaspis, and hither too came Darius Codomannus after the battle of Arbela, on his way to the eastern provinces (Arr. *Exp. Alex.* iii. 20). The only other place of much note was Bagistana, the modern *Behistun*, which guarded the chief pass connecting Media with the Mesopotamian plain.

No doubt both parts of Media were further subdivided into provinces; but no trustworthy account of these minor divisions has come down to us. The tract about Rhages was certainly called Rhagiana; and the mountain tract adjoining Persis seems to have been known as Paraetacene, or the country of the Paraetacae. Ptolemy gives as Median districts Elymais, Choromithrene, Sigrina, Daritis, and Syromedia; but these names are little known to other writers, and suspicions attach to some of them. On the whole it would seem that we do not possess materials for a minute account of the ancient geography of the country, which is very imperfectly described by Strabo, and almost omitted by Pliny.

(See Sir H. Rawlinson's Articles in the *Journal of the Geographical Society*, vol. ix. Art. 2, and vol. x. Articles 1 and 2, and compare Layard's *Nineveh and Babylon*, chap. xvii. and xviii.; Chesney's *Euphrates Expedition*, i. 122, &c.; Kinnair's *Persian Empire*; Ker Porter's *Travels*; and Rawlinson's *Herodotus*, vol i. Appendix, Essay iv.) [G. R.]

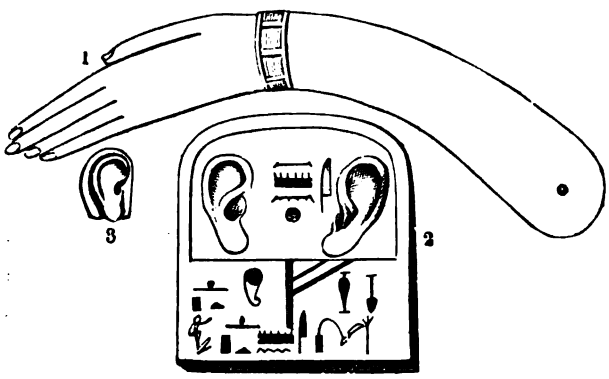
MEDIAN (מָדַי; *Kori*, מָדָאָה: ὁ Μῆδος: *Medus*). Darius, "the son of Ahasuerus, of the seed of the Medes" (Dan. ix. 1) or "the Mede" (xi. 1), is thus described in Dan. v. 31.

MEDICINE. I. Next to care for food, clothing, and shelter, the curing of hurts takes precedence even amongst savage nations. At a later period comes the treatment of sickness, and recognition of states of disease; and these mark a nascent civilization. Internal diseases, and all for which an obvious cause cannot be assigned, are in the most early period viewed as the visitation of God, or as the act of some malignant power, human—as the evil eye—or else superhuman, and to be dealt with by sorcery, or some other occult supposed agency. The Indian notion is that all diseases are the work of an evil spirit (Sprengel, *Gesch. der Arzeneikunde*, pt. ii. 48). But among a civilised race the pre-eminence of the medical art is confessed in proportion to the increased value set on human life, and the vastly greater amount of comfort and enjoyment of which civilised man is capable. It would be strange if their close connexion historically with Egypt had not imbued the Israelites with a strong appreciation of the value of this art, and with some considerable degree of medical culture. From the most ancient testimonies, sacred and secular, Egypt, from whatever cause, though perhaps from necessity, was foremost among the nations in this most human of studies purely physical. Again, as the active intelligence of Greece flowed in upon her, and mingled with the immense store of pathological records which must have accumulated under the system described by Herodotus,—Egypt, especially Alexandria, became the medical repertory and museum of the world. Thither all that was best worth preserving amid earlier civilisations, whether her own or foreign, had been attracted, and medicine and surgery flourished amidst political decadence and artistic decline. The attempt has been made by a French writer (Renouard, *Histoire de Médicine depuis son Origine* &c.) to arrange in periods the growth of the medical art as follows:—1st. The Primitive or Instinctive Period, lasting from the earliest recorded treatment to the fall of Troy. 2ndly. The Sacred or Mystic Period, lasting till the dispersion of the Pythagorean Society, 500 B.C. 3rdly. The Philosophical Period, closing with the foundation of the Alexandrian Library, B.C. 320. 4thly. The Anatomical Period, which continued till the death of Galen, A.D. 200. But these artificial lines do not strictly exhibit the truth of the matter. Egypt was the earliest home of medical and other skill for the region of the Mediterranean basin, and every Egyptian mummy of the more expensive and elaborate sort, involved a process of anatomy. This gave opportunities of inspecting a vast number of bodies, varying in every possible condition. Such opportunities were sure to be turned to account (Pliny, *N. H.* xix. 5) by the more diligent among the faculty—for "the physicians" embalmed (Gen. l. 2). The intestines had a separate receptacle assigned them, or were restored to the body through the ventral incision (Wilkinson, v. 468); and every such process which we can trace in the mummies discovered shows the most minute accuracy of manipulation. Notwithstanding these laborious efforts, we have no trace of any philosophical or rational system of Egyptian origin; and medicine in Egypt was a mere art or profession. Of science the Asclepiadae of Greece were the true originators. Hippocrates, who wrote a book on "Ancient Medicine," and who seems to have had many opportunities of access to foreign sources, gives no prominence to Egypt. It was no doubt owing to the repressive influences of her fixed institutions that this country did not attain to a vast and speedy proficiency in medical science, when *post mortem* examination was so general a rule instead of being a rare exception. Still it is impossible to believe that considerable advances in physiology could have failed to be made there from time to time, and similarly, though we cannot so well determine how far, in Assyria.[a] The best guarantee for the advance of medical science is, after all, the interest which every human being has in it; and this is most strongly felt in large gregarious masses of population. Compared with the wild countries around them, at any rate, Egypt must have seemed incalculably advanced. Hence the awe, with which Homer's Greeks speak of her wealth,[b] resources, and medical skill; and even the visit of Abraham, though prior to this period, found her no doubt in advance of other countries. Representations of early Egyptian surgery apparently occur on some of the monuments of Beni-Hassan. Flint knives used for embalming have been recovered—the "Ethiopic stone" of Herodotus (ii. 86; comp. Ex. iv. 25) was probably either black flint or agate; and those who have assisted at the opening of a mummy have noticed that the teeth exhibited a



Flint Knives. (Wilkinson.)

[a] Recent researches at Kouyunjik have given proof, it is said, of the use of the microscope in minute devices, and yielded up even specimens of magnifying lenses. A cone engraved with a table of cubes, so small as to be unintelligible without a lens, was brought home by Sir H. Rawlinson, and is now in the British Museum. As to whether the invention was brought to bear on medical science, proof is wanting. Probably such science had not yet been pushed to the point at which the microscope becomes useful. Only those who have quick keen eyes for the nature-world feel the want of such spectacles.



[b] *Il.* ix. 381; *Od.* iv. 229. See also Herod. ii. 84, and i. 77. The simple heroes had reverence for the healing skill which extended only to wounds. There is hardly any recognition of disease in Homer. There is sudden death, pestilence, and weary old age, but hardly any fixed morbid condition, save in a simile (*Od.* v. 396). See, however, a letter *De rebus ex Homero medicis*, D. G. Wolf, Wittenberg, 1791

dentistry not inferior in execution to the work of the best modern experts. This confirms the statement of Herodotus that every part of the body was studied by a distinct practitioner. Pliny (vii. 57) asserts that the Egyptians claimed the invention of the healing art, and (xxvi. 1) thinks them subject to many diseases. Their "many medicines" are mentioned (Jer. xlvi. 11). Many valuable drugs may

Physicians (or Barbers?) and Patients. (Wilkinson.)

be derived from the plants mentioned by Wilkinson (iv. 621), and the senna of the adjacent interior of Africa still excels all other. Athothmes II., king of the country, is said to have written on the subject of anatomy. Hermes (who may perhaps be the same as Athothmes, intellect personified, only disguised as a deity instead of a legendary king), was

Exvotos. (Wilkinson.)

1. Ivory hand, in Mr. Salt's collection.
2. Stone tablet, dedicated to Amunre, for the recovery of a complaint in the ear; found at Thebes.
3. An ear, of terra cotta, from Thebes, in Sir J. Gardner Wilkinson's possession.

said to have written six books on medicine; in which an entire chapter was devoted to diseases of the eye (Rawlinson's *Herod.*, note to ii. 84), and the first half of which related to anatomy. The various recipes known to have been beneficial were recorded, with their peculiar cases, in the *memoirs* of physic, inscribed among the laws, and deposited in the principal temples of the place (Wilkinson, iii. 396, 397). The reputation of its practitioners in historical times was such that both Cyrus and Darius sent to Egypt for physicians or surgeons[c] (Herod. iii. 1, 129-132); and by one of the same country, no doubt, Cambyses' wound was[d] tended, though not perhaps with much zeal for his recovery.

Of midwifery we have a distinct notice (Ex. i. 15), and of women as its practitioners,[e] which fact may also be verified from the sculptures (Rawlinson's note on Herod. ii. 84). The physicians had salaries from the public treasury, and treated always according to established precedents, or deviated from these at their peril, in case of a fatal termination; if, however, the patient died under accredited treatment no blame was attached. They treated gratis patients when travelling or on military service. Most diseases were by them ascribed to indigestion and excessive eating (Diod. Sicul.[f] i. 82), and when their science failed them magic[g] was called in. On recovery it was also customary to suspend in a temple an exvoto, which was commonly a model of the part affected; and such offerings doubtless, as in the Coan temple of Aesculapius, became valuable aids to the pathological student. The Egyptians who lived in the corn-growing region are said by Herodotus, (ii. 77) to have been specially attentive to health. The practice of circumcision is traceable on monuments certainly anterior to the age of Joseph. Its antiquity is involved in obscurity; especially as all we know of the Egyptians makes it unlikely that they would have borrowed such a practice, so late as the period of Abraham, from any mere sojourner among them. Its beneficial effects in the temperature of Egypt and Syria have often been noticed, especially as a preservative of cleanliness, &c. The scrupulous attention paid to the dead was favourable to the health of the living. Such powerful drugs as asphaltum, natron resin, pure bitumen, and various aromatic gums suppressed or counteracted all noxious effluvia from[h]

[c] Comp. the letter of Benhadad to Joram, 2 K. v. 6, to procure the cure of Naaman.

[d] The words of Herod. (iii. 66), ὡς ἐσφακέλισέ τε τὸ ὀστέον καὶ ὁ μηρὸς τάχιστα ἐσαπῇ, appear to indicate medical treatment by the terms employed. It is not unlikely the physician may have taken the opportunity to avenge the wrongs of his nation.

[e] The sex is clear from the Heb. grammatical forms. The names of two, Shiphrah and Puah, are recorded. The treatment of newborn Hebrew infants is mentioned (Ex. xvi. 4) as consisting in washing, salting, and swaddling: this last was not used in Egypt (Wilkinson).

[f] The same author adds that the most common method of treatment was by κλυσμοῖς καὶ ῥυστείαις καὶ ἐμέτοις.

[g] Magicians and physicians both belonged to the priestly caste, and perhaps united their professions in one person.

[h] "L'Egypte moderne n'en est plus là, et, comme M. Pariset l'a si bien signalé, les tombeaux des pères, infiltrés par les eaux du Nil, se convertissent en autant de foyers pestilentiels pour leurs enfants" (Michea Levy, p. 12)

the corpse; even the saw-dust of the floor, on which the body had been cleansed, was collected in small linen bags, which, to the number of twenty or thirty, were deposited in vases near the tomb (Wilkinson,[1] v. 461, 469). For the extent to which these practices were imitated among the Jews, see EMBALMING; at any rate the uncleanness imputed to contact with a corpse was a powerful preservative[k] against the inoculation of the living frame with morbid humours. But, to pursue to later times this merely general question, it appears (Pliny, *N. H.* xix. 5[m]) that the Ptolemies themselves practised dissection, and that, at a period when Jewish intercourse with Egypt was complete and reciprocal,[n] there existed in Alexandria a great zeal for anatomical study. The only influence of importance which would tend to check the Jews from sharing this was the ceremonial law, the special reverence of Jewish feeling towards human remains, and the abhorrence of "uncleanness." Yet those Jews—and there were at all times since the captivity not a few, perhaps —who tended to foreign laxity, and affected Greek philosophy and culture, would assuredly, as we shall have further occasion to notice that they in fact did, enlarge their anatomical knowledge from sources which repelled their stricter brethren, and the result would be apparent in the general elevated standard of that profession, even as practised in Jerusalem. The diffusion of Christianity in the 3rd and 4th centuries exercised a similar but more universal restraint on the dissecting-room, until anatomy as a pursuit became extinct, and the notion of profaneness quelling everywhere such researches, surgical science became stagnant to a degree to which it had never previously sunk within the memory of human records.

In comparing the growth of medicine in the east of the ancient world, the high rank of its practitioners—princes and heroes—settles at once the question as to the esteem *in* which it was held in the Homeric[o] and pre-Homeric[p] period. To descend to the historical, the story of Democedes[q] at the court of Darius illustrates the practice of Greek surgery before the period of Hippocrates; anticipating in its gentler waiting upon[r] nature, as compared (Herod. iii. 130) with that of the Persians and Egyptians, the method and maxims of that Father of physic, who wrote against the theories and speculations of the so-called philosophical school, and was a true Empiricist before that sect was formularized. The Dogmatic school was founded after his time by his disciples, who departed from his eminently practical and inductive method. It recognised hidden causes of health and sickness arising from certain supposed principles or elements, out of which bodies were composed, and by virtue of which all their parts and members were attempered together and became sympathetic. He has some curious remarks on the sympathy of men with climate, seasons, &c. Hippocrates himself rejected supernatural accounts of disease, and especially demoniacal possession. He refers, but with no mystical sense, to numbers[s] as furnishing a rule for cases. It is remarkable that he extols the discernment of Orientals above Westerns, and of Asiatics above Europeans, in medical diagnosis.[t] The empirical school, which arose in the third century B.C., under the guidance of Acron of Agrigentum, Serapion of Alexandria, and Philinus of Cos,[u] waited for the symptoms of every case, disregarding the rules of practice based on dogmatic principles. Among its votaries was a Zachalias (perhaps Zacharias, and possibly a Jew) of Babylon, who (Pliny, *N. H.* xxxvii. 10, comp. xxxvi. 10) dedicated a book on medicine to Mithridates the Great; its views were also supported[x] by Herodotus of Tarsus, a place which, next to Alexandria, became distinguished for its schools of philosophy and medicine; as also by a Jew named Theodas, or Theudas,[y] of Laodicea, but a student

This may perhaps be the true account of the production of the modern plague, which, however, disappears when the temperature rises above a given limit, excessive heat tending to dissipate the miasma.

[1] This author further refers to Pettigrew's *History of Egyptian Mummies*.

[k] Dr. Fergusson, in an article on pestilential infection, *Quarterly Review*, vol. xlvi., 1852, insists on actual contact with the diseased or dead as the condition of transmission of the disease. But compare a tract by Dr. Macmichael, *On the Progress of Opinion on the Subject of Contagion*. See also *Essays on State Medicine*, H. W. Ramsey, London, 1844, esp. iii. p. 130, &c. For ancient opinions on the matter, see *Paulus Aegin.* ed. Sydenham Society, i. 284 &c. Thucydides, in his description of the Athenian plague, is the first who alludes to it, and that but inferentially. It seems as the whole most likely that contagiousness is a quality of morbid condition which may be present or absent. What the conditions are no one seems able to say. As an instance, elephantiasis was said by early writers (*e. g.* Aretæus and Rhazes) to be contagious, which some modern authorities deny. The assertion and denial are so clear and circumstantial in either case, that no other evidence seems open to the question.

[m] "Regibus corpora mortuorum ad scrutandos morbos insecantibus."

[n] Cyrene, the well-known Greek African colony, had a high repute for physicians of excellence; and some of its coins bear the impress of the *brέξ*, or *assafoetida*, a medicinal drug to which miraculous virtues were ascribed. Here the Cyrenaica was a name for the Jews of the dispersion (Acts ii. 10; *Paul. Aegin.* Sydenham Society, iii. 283).

[o] Galen himself wrote a book, περὶ τῆς καθ' Ὁμηρον ἰατρικῆς, quoted by Alexander of Trallec, lib. ix. cap. 4.

[p] The indistinctness with which the medical, the magical, and the poisonous were confounded under the word φάρμακα by the early Greeks will escape no one. (So Ex. xxii. 18, the Heb. word for "witch" is in the LXX. rendered by φαρμακός.) The legend of the Argonauts and Medea illustrates this; the Homeric Moly, and Nepenthes and the whole story of Circe, confirm it.

[q] The fame which he had acquired in Samos had reached Sardis before Darius discovered his presence among the captives taken from Oroetes (Herod. iii. 129).

[r] The best known name amongst the pioneers of Greek medical science is Herodicus of Selymbria, "qui totam gymnasticam medicinae adjunxit;" for which he was censured by Hippocrates (*Biblioth. Script. Med.* s. v.). The alliance, however, of the ἰατρική with the γυμναστική is familiar to us from the Dialogues of Plato.

[s] Thus the product of seven and forty gives the term of the days of gestation; in his περὶ νούσων δ, why men died, ἐν τῇσι περισσῇσι τῶν ἡμερέων, is discussed; so the 4th, 8th, 11th, and 17th, are noted as the critical days in acute diseases.

[t] Sprengel, *ub. sup.* iv. 52-5, speaks of an Alexandrian school of medicine as having carried anatomy, especially under the guidance of Hierophilus, to its highest pitch of ancient perfection. It seems not, however, to have claimed any distinctive principles, but stands chronologically between the Dogmatic and Empiric schools.

[u] The former of these wrote against Hippocrates, the latter was a commentator on him (Sprengel, *ub. sup.* iv. 81).

[x] It treats of a stone called *hematite*, to which the author ascribes great virtues, especially as regards the eyes.

[y] The authorities for these statements about Theudas are given by Wunderbar, *Biblisch-Talmudische Medicin*, 1tes Heft, p. 25. He refers among others to Talmud.

of Alexandria, and the last, or nearly so, of the Empiricists whom its schools produced. The remarks of Theudas on the right method of observing, and the value of experience, and his book on medicine, now lost, in which he arranged his subject under the heads of *indicatoria*, *curatoria*, and *salubris*, earned him high reputation as a champion of empiricism against the reproaches of the dogmatists, though they were subsequently impugned by Galen and Theodosius of Tripoli. His period was that from Titus to Hadrian. "The empiricists held that observation and the application of known remedies in one case to others presumed to be similar constitute the whole art of cultivating medicine. Though their views were narrow, and their information scanty when compared with some of the chiefs of the other sects, and although they rejected as useless and unattainable all knowledge of the causes and recondite nature of diseases, it is undeniable that, besides personal experience, they freely availed themselves of historical detail, and of a strict analogy founded upon observation and the resemblance of phenomena" (Dr. Adams, *Paul. Aegin.* ed. Sydenham Soc.).

This school, however, was opposed by another, known as the Methodic, which had arisen under the leading of Themison, also of Laodicea, about the period of Pompey the Great.[a] Asclepiades paved the way for the "method" in question, finding a theoretic[b] basis in the corpuscular or atomic theory of physics which he borrowed from Heraclides of Pontus. He had passed some early years in Alexandria, and thence came to Rome shortly before Cicero's time (comp. *quo nos medico amicoque usi sumus*, Crassus, ap. *Cic. de Orat.* i. 14). He was a transitional link between the Dogmatic and Empiric schools and this later or Methodic (Sprengel, *ub. sup.* pt. v. 16), which sought to rescue medicine from the bewildering mass of particulars in which empiricism had plunged it. He reduced diseases to two classes, chronic and acute, and endeavoured likewise to simplify remedies. In the meanwhile the most judicious of medical theorists since Hippocrates, Celsus of the Augustan period, had reviewed medicine in the light which all these schools afforded, and not professing any distinct teaching, but borrowing from all, may be viewed as eclectic. He translated Hippocrates largely *verbatim*, quoting in a less degree Asclepiades and others. Antonius Musa, whose "cold-water cure," after its successful trial on Augustus himself, became generally popular, seems to have had little of scientific basis; but by the usual method, or the usual accidents, became merely the fashionable practitioner of his day in Rome.[b] Attalia, near Tarsus, furnished also, shortly after the period of Celsus, Athenaeus, the leader of the last of the schools of medicine which divided the ancient world, under the name of the "Pneumatic," holding the tenet "of an etherial principle (πνεῦμα) residing in the microcosm, by means of which the mind performed the functions of the body." This is also traceable in Hippocrates, and was an established opinion of the Stoics. It was exemplified in the innate heat, θερμὸν ἔμφυτον, (Aret. *de Caus. et Sign. Morb. Chron.* ii. 13), and the *calidum innatum* of modern physiologists, especially in the 17th century (Dr. Adams, *Pref. Aretaeus*, ed. Syd. Soc.). It is clear that all these schools may easily have contributed to form the medical opinions current at the period of the N. T., that the two earlier among them may have influenced Rabbinical teaching on that subject at a much earlier period, and that, especially at the time of Alexander's visit to Jerusalem, the Jewish people, whom he favoured and protected, had an opportunity of largely gathering from the medical lore of the west. It was necessary therefore to pass in brief review the growth of the latter, and especially to note the points at which it intersects the medical progress of the Jews. Greek Asiatic medicine culminated in Galen, who was, however, still but a commentator on his western predecessors, and who stands literally without rival, successor, or disciple of note, till the period when Greek learning was reawakened by the Arabian intellect. Galen himself[c] belongs to the period of the Antonines, but he appears to have been acquainted with the writings of Moses, and to have travelled in quest of medical experience over Egypt, Syria, and Palestine, as well as Greece, and a large part of the west, and, in particular, to have visited the banks of the Jordan in quest of opobalsamum, and the coasts of the Dead Sea to obtain samples of bitumen. He also mentions Palestine as producing a watery wine, suited for the drink of febrile patients.

II. Having thus described the external influences which, if any, were probably most influential in forming the medical practice of the Hebrews, we may trace next its internal growth. The cabalistic legends mix up the names of Shem and Heber in their fables about healing, and ascribe to those patriarchs a knowledge of simples and rare roots, with, of course, magic spells and occult powers, such as have clouded the history of medicine from the earliest times down to the 17th century.[d] So to Abraham is ascribed a talisman, the touch of which healed all disease. We know that such simple surgical skill as the operation for circumcision implies was Abraham's; but severer operations than this are constantly required in the flock and herd, and those who watch carefully the habits of animals can hardly fail to amass some guiding principles applicable to man and beast alike. Beyond this, there was probably nothing but such ordinary obstetrical craft as has always been traditional among the women of rude tribes, which could be classed as medical lore in the

Wasir, 52b; to *Tosiphta Ohloth*, § iv.; and to *Tr. Sanhedrin*, 33a, 93d; *Bechoroth*, 28b.

[a] "Alia est Hippocratis secta [the Dogmatic], alia Asclepiadis, alia Themisonis" (Seneca, *Epist.* 95; comp. Juv. *Sat.* x. 221).

[b] For his remains see *Asclepiadis Bithynici Fragmenta*, ed. Christ. Gottl. Gumpert, 8°. Vinar. 1794.

[b] Female medical aid appears to have been current at Rome, whether in midwifery only (the *obstetric*), or in general practice, as the titles *medica*, ἰατρίνη, would seem to imply (see Martial, *Epig.* xi. 72). The Greeks were not strangers to female study of medicine; *e. g.* some fragments of the famous Aspasia on women's disorders occur in Aetius.

[c] The Arabs, however, continued to build wholly upon Hippocrates and Galen, save in so far as their advance in chemical science improved their pharmacopoeia: this may be seen on reference to the works of Rhazes, A.D. 932, and Haly Abbas, A.D. 980. The first mention of smallpox is ascribed to Rhazes, who, however, quotes several earlier writers on the subject. Mahomet himself is said to have been versed in medicine, and to have compiled some aphorisms upon it; and a herbalist literature was always extensively followed in the East from the days of Solomon downwards (Freind's *History of Medicine*, ii. 8, 27).

[d] See, in evidence of this, *Royal and Practical Chymistry, in three treatises*, London, 1670

family of the patriarch, until his sojourn brought him among the more cultivated Philistines and Egyptians. The only notices which Scripture affords in connexion with the subject are the cases of difficult midwifery in the successive households of Isaac,* Jacob, and Judah (Gen. xxv. 26, xxxv. 17, xxxviii. 27), and so, later, in that of Phinehas (1 Sam. iv. 19). The traditional value ascribed to the mandrake, in regard to generative functions, relates to the same branch of natural medicine; but throughout this period occurs no trace of any attempt to study, digest, and systematise the subject. But, as Israel grew and multiplied in Egypt, they derived doubtless a large mental cultivation from their position until cruel policy turned it into bondage; even then Moses was rescued from the lot of his brethren, and became learned in all the wisdom of the Egyptians, including, of course, medicine and cognate sciences (Clem. Alex. i. p. 413), and those attainments perhaps became suggestive of future laws. Some practical skill in metallurgy is evident from Ex. xxxii. 20. But, if we admit Egyptian learning as an ingredient, we should also notice how far exalted above it is the standard of the whole Jewish legislative fabric, in its exemption from the blemishes of sorcery and juggling pretences. The priest, who had to pronounce on the cure, used no means to advance it, and the whole regulations prescribed exclude the notion of trafficking in popular superstition. We have no occult practices reserved in the hands of the sacred caste. It is God alone who doeth great things, working by the wand of Moses, or the brazen serpent; but the very mention of such instruments is such as to expel all pretence of mysterious virtues in the things themselves. Hence various allusions to God's "healing mercy," and the title "Jehovah that healeth" (Ex. xv. 26; Jer. xvii. 14, xxx. 17; Ps. ciii. 3, cxlvii. 3; Is. xxx. 26). Nor was the practice of physic a privilege of the Jewish priesthood. Any one might practise it, and this publicity must have kept it pure. Nay, there was no scriptural bar to its practice by resident aliens. We read of "physicians," "healing," &c., in Ex. xxi. 19; 2 K. viii. 29; 2 Chr. xvi. 12; Jerem. viii. 22. At the same time the greater leisure of the Levites and their other advantages would make them the students of the nation, as a rule, in all science, and their constant residence in cities would give them the opportunity, if carried out in fact, of a far wider field of observation. The reign of peace of Solomon's days must have opened, especially with renewed Egyptian intercourse, new facilities for the study. He himself seems to have included in his favourite natural history some knowledge of the medicinal uses of the creatures. His works show him conversant with the notion of remedial treatment (Prov. iii. 8, vi. 15, xii. 18, xvii. 22, xx. 30, xxix. 1; Eccles. iii. 3); and one passage (see p. 306) indicates considerable knowledge of anatomy. His repute in magic is the universal[†] theme of eastern story. It has even been thought he had recourse to the shrine of Aesculapius at Sidon, and enriched his resources by its records or relics; but there seems some doubt whether this temple was of such high antiquity. Solomon, however, we cannot doubt, would have turned to the account, not only of wealth but of knowledge his peaceful reign, wide dominion, and wider renown, and would have sought to traffic in learning, as well as in wheat and gold. To him the Talmudists ascribe a "volume of cures" (ספר רפואות), of which they make frequent mention (Fabricius, *Cod. Pseudep. V. T.* 1043,4). Josephus (*Ant.* viii. 2) mentions his knowledge of medicine, and the use of spells by him to expel demons who cause sicknesses, "which is continued among us," he adds, "to this time." The dealings of various prophets with quasi-medical agency cannot be regarded as other than the mere accidental form which their miraculous gifts took (1 K. xiii. 6, xiv. 12, xvii. 17; 2 K. i. 4, xx. 7; Is. xxxviii. 21). Jewish tradition has invested Elisha, it would seem, with a function more largely medicinal than that of the other servants of God; but the Scriptural evidence on the point is scanty, save that he appears to have known at once the proper means to apply to heal the waters, and temper the noxious pottage (2 K. ii. 21, iv. 39-41). His healing the Shunammite's son has been discussed as a case of suspended animation, and of animal magnetism applied to resuscitate it; but the narrative clearly implies that the death was real. As regards the leprosy, had the Jordan commonly possessed the healing power which Naaman's faith and obedience found in it, would there have been "many lepers in Israel in the days of Eliseus the prophet," or in any other days? Further, if our Lord's words (Luke iv. 27) are to be taken literally, Elisha's reputation could not have been founded on any succession of lepers healed. The washing was a part of the enjoined lustration of the leper *after* his cure was complete; Naaman was to act as though clean, like the "ten men that were lepers," bidden to "go and show themselves to the priest"—in either case it was "as thou hast believed, so be it done unto thee."

The sickness of Benhadad is certainly so described as to imply treachery on the part of Hazael (2 K. viii. 15). Yet the observation of Bruce, upon a "cold-water cure" practised among the people near the Red Sea, has suggested a view somewhat different. The bed-clothes are soaked with cold water, and kept thoroughly wet, and the patient drinks cold water freely. But the crisis, it seems, occurs on the third day, and not till the fifth is it

* Doubts have been raised as to the possibility of twins being born, one holding the other's heel; but there does not seem any such limit to the operations of nature as any objection on that score would imply. After all, it was perhaps only just such a relative position of the limbs of the infants at the mere moment of birth as would suggest the "holding by the heel." The midwives, it seems, in case of twins, were called upon to distinguish the first-born, to whom important privileges appertained. For tying on a thread or ribbon was an easy way of preventing mistake, and the assistant in the case of Tamar seized the earliest possible moment for doing it. "When the hand or foot of a living child protrudes, it is to be crushed up . . and the head made to present" (*Pand. Legis.* ed. Sydenh. Soc., i. 643, Hippocr. quoted by Dr. Adams). This probably the midwife did; at the same time marking him as first-born in virtue of being thus "presented" first. The precise meaning of the doubtful expression in Gen xxxviii. 27 and marg. is discussed by Wunderbar, *ub. sup.* p. 50, in reference both to the children and to the mother. Of Rachel a Jewish commentator says, "Multis etiam ex itinere difficultatibus praegressis, viribusque post diu protractos dolores exhaustis, atonia uteri, forsan quidem haemorrhagia in pariendo mortua est" (*ibid.*).

† Josephus (*Ant.* viii. 2) mentions a cure of one possessed with a devil by the use of some root, the knowledge of which was referred by tradition to Solomon.

there usual to apply this treatment. If the chamberlain, through carelessness, ignorance, or treachery, precipitated the application, a fatal[g] issue may have suddenly resulted. The "brazen serpent," once the means of healing, and worshipped idolatrously in Hezekiah's reign, is supposed to have acquired those honours under its Aesculapian aspect. This notion is not inconsistent with the Scripture narrative, though not therein traceable. It is supposed that something in the "volume of cures," current under the authority of Solomon, may have conduced to the establishment of these rites, and drawn away the popular homage, especially in prayers during sickness, or thanksgivings after recovery, from Jehovah. The statement that King Asa (2 Chr. xvi. 12) "sought *not* to Jehovah *but* to the physicians," may seem to countenance the notion that a rivalry of actual worship, based on some medical fancies, had been set up, and would so far support the Talmudical tradition.

The captivity at Babylon brought the Jews in contact with a new sphere of thought. Their chief men rose to the highest honours, and an improved mental culture among a large section of the captives was no doubt the result which they imported on their return.[h] We know too little of the precise state of medicine in Babylon, Susa, and the "cities of the Medes," to determine the direction in which the impulse so derived would have led the exiles; but the confluence of streams of thought from opposite sources, which impregnate each other, would surely produce a tendency to sift established practice and accepted axioms, to set up a new standard by which to try the current rules of art, and to determine new lines of inquiry for any eager spirits disposed to search for truth. Thus the visit of Democedes to the court of Darius, though it seems to be an isolated fact, points to a general opening of oriental manners to Greek influence, which was not too late to leave its traces in some perhaps of the contemporaries of Ezra. That great reformer, with the leaders of national thought gathered about him, could not fail to recognise medicine among the salutary measures which distinguished his epoch. And whatever advantages the Levites had possessed in earlier days were all too speedily lost even as regards the study of the divine law, and much more therefore as regards that of medicine; into which competitors would crowd in proportion to its broader and more obvious human interest, and effectually demolish any narrowing barriers of established privilege, if such previously existed.

It may be observed that the priests in their ministrations, who performed at all seasons of the year barefoot on stone pavement, and without perhaps any variation of dress to meet that of temperature, were peculiarly liable to sickness.[i] Hence the permanent appointment of a Temple physician has been supposed by some, and a certain Ben Ahijah is mentioned by Wunderbar as occurring in the Talmud in that capacity. But it rather appears as though such an officer's appointment were precarious, and varied with the demands of the ministrants.

The book of Ecclesiasticus shows the increased regard given to the distinct study of medicine, by the repeated mention of physicians, &c., which it contains, and which, as probably belonging to the period of the Ptolemies, it might be expected to show. The wisdom of prevention is recognised in Ecclus. xviii. 19, perhaps also in x. 10. Fame and honour are said to be the portion of the physician, and his office to be from the Lord (xxxviii. 1, 3, 12). The repeated allusions to sickness in vii. 35, xxx. 17, xxxi. 22, xxxvii. 30, xxxviii. 9, coupled with the former recognition of merit, have caused some to suppose that this author was himself a physician. If he was so, the power of mind and wide range of observation shown in his work would give a favourable impression of the standard of practitioners; if he was not, the great general popularity of the study and practice may be inferred from its thus becoming a common topic of general advice offered by a non-professional writer. In Wisd. xvi. 12, plaister is spoken of; anointing, as a means of healing, in Tob. vi. 8.

To bring down the subject to the period of the N. T. St. Luke,[k] "the beloved physician," who

[g] Professor Newman remarks on the manner of Benhadad's recorded death, that "when a man is so near to death that this will kill him, we need good evidence to show that the story is not a vulgar scandal" (*Hebrew Monarchy*, p. 180 *note*). The remark seems to betray ignorance of what is meant by the crisis of a fever.

[h] Wunderbar, whom the writer has followed in a large portion of this general review of Jewish medicine, and his obligations to whom are great, has here set up a view which appears untenable. He regards the Babylonian captivity as parallel in its effects to the Egyptian bondage, and seems to think that the people would return debased from its influence. On the contrary, those whom subjection had made ignoble and unpatriotic would remain. If any returned, it was a pledge that they were not so impaired; and, if not impaired, they would be certainly improved by the discipline they had undergone. He also thinks that sorcery had the largest share in any Babylonian or Persian system of medicine. This is assuming too much: there were magicians in Egypt, but physicians also (see above) of high cultivation. Human nature has so great an interest in human life, that only in the savage rudimentary societies is its economy left thus involved in phantasms. The earliest steps of civilization include somethin.g of medicine. Of course superstitions are found copiously involved in such medical tenets, but this is not equivalent to abandoning the study to a class of professed magicians. Thus in the *Uebersicht der altbabylonischen Literatur*, p. 123, by D. Chwolson, St. Petersb. 1859 (the value of which is not however yet ascertained), a writer on poisons claims to have a magic antidote, but declines stating what it is, as it is not his business to mention such things, and he only does so in cases where the charm is in connexion with medical treatment and resembles it; the magicians, adds the same writer on another occasion, use a particular means of cure, but he declines to impart it, having a repugnance to witchcraft. So (pp. 125-6) we find traces of charms introduced into Babylonish treatises on medical science, but apologetically, and as if against sounder knowledge. Similarly, the system of fatalism is not without its influence on medicine; but it is chiefly resorted to where, as in pestilence often happens, all known aid seems useless.

[i] Thus we find Kall, *De Morbis Sacerdotum*, Hafn. 1748 referred to by Wunderbar, 1stes Heft, p. 60.

[k] This is not the place to introduce any discussion on the language of St. Luke; it may be observed, however that it appears often tinctured by his early studies: e. g. v. 18 παραλελυμένος, the correct term, instead of the popular παραλυτικὸς of St. Matthew and St. Mark; so viii. 6 ἔστη ἡ ῥύσις, instead of the apparently Hebraistic phrase ἐξηράνθη ἡ πήγη of the latter; so vi. 19, ἰᾶτο πάντας where διεσώθησαν and ἐσώζοντο are used by the others and viii. 55, ἐπέστρεψε τὸ πνεῦμα (the breath?), as the sign of a token of animation returning; and the list might easily be enlarged. St. Luke abounds in the narratives of demoniacs while Hippocrates repudiates such influence, as produc-

practised at Antioch whilst the body was his care, could hardly have failed to be conversant with all the leading opinions current down to his own time. Situated between the great schools of Alexandria and Cilicia, within easy sea-transit of both, as well as of the western homes of science, Antioch enjoyed a more central position than any great city of the ancient world, and in it accordingly all the streams of contemporary medical learning may have probably found a point of confluence. The medicine of the N. T. is not solely, nor even chiefly, Jewish medicine; and even if it were, it is clear that the more mankind became mixed by intercourse, the more medical opinion and practice must have ceased to be exclusive. The great number of Jews resident in Rome and Greece about the Christian era, and the successive decrees by which their banishment from the former was proclaimed, must have imported, even into Palestine, whatever from the west was best worth knowing; and we may be as sure that its medicine and surgery expanded under these influences, as that, in the writings of the Talmudists, such obligations would be unacknowledged. But, beyond this, the growth of large mercantile communities such as existed in Rome, Alexandria, Antioch, and Ephesus, of itself involves a peculiar sanitary condition from the mass of human elements gathered to a focus under new or abnormal circumstances. Nor are the words in which an eloquent modern writer describes the course of this action less applicable to the case of an ancient than to that of a modern metropolis. "Diseases once indigenous to a section of humanity, are slowly but surely creeping up to commercial centres from whence they will be rapidly propagated. One form of Asiatic leprosy is approaching the Levant from Arabia. The history of every disease which is communicated from man to man establishes this melancholy truth, that ultimately such maladies overleap all obstacles of climate, and demonstrate a solidarity in evil as well as in good among the brotherhood of nations."[m] In proportion as this "melancholy truth" is perceived, would an intercommunication of medical science prevail also.
